PENN STATE intercom

Volume 3, Number 1

September 6, 1973

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News in Brief

ABOARD THE STANELA

Dr. Jon N. Weber, associate professor of marine geology, was chief scientist aboard the Smithsonian Institution research vessel, Stanela, during August. The vessel, owned and operated by the Smithsonian tropical research institute in Panama, was used to conduct surveys of coral reefs and other marine wildlife in the Archipelago Las Perlas, Eastern Pacific Ocean. The scientists aboard sought to identify suitable sites for future research studies in the region.

FOREST ACOUSTICS

Dr. Gerhard Reethof, Alcoa Professor of Mechanical Engineering and director of the Noise Control Laboratory, has been given an 18-month contract to do research in the area of "forest acoustics." The grant is from the Pinchot Consortium for Environmental Forestry Studies, a group of universities which, along with the U.S.D.A. Forest Service Northeastern Forest Experiment Station, is concerned with developing a sound approach to research required to understand, protect, and improve the amenity values of forest vegetation in the metropolitan complex.

BOOKSTORE HOURS

The University Park bookstore invites the faculty to inspect the quarters in McAllister Building and reminds that the hours of operation will be variable for a short time at the start of the Fall Term. Today (Sept. 6) and tomorrow, the store will be open from 8:30 a.m. to 8:30 p.m.; Saturday, Sept. 8, the hours will be from 9 a.m. to 4 p.m.; Monday-Wednesday, Sept. 10-12, 8:30 a.m. to 8:30 p.m.

PILOT GROUND SCHOOL

Persons aiming to become private airplane pilots will have a chance to go to ground school at Delaware County Campus

this fall. The course, which will cover such topics as aerodynamics, weight and balance, aircraft performance, meteorology, and navigation, will provide comprehensive preparation for the written Private Pilot's Examination. An instrument flight ground school is also being offered, to give students with a private pilot's license or equivalent training with the preparation needed for the written examination for instrument rating. Classes in both courses get underway in mid-September.

CLEP EXAM AT CAPITOL

An examination in Afro-American history has been added to those in the College Level Entrance Examination Program (CLEP) which is given monthly at the Central Pennsylvania Test Center at Capitol Campus. The test is designed to measure knowledge and understanding of material usually covered in a one-semester survey course in Afro-American history.

NEW FACULTY ART

Sculptures, photographs, paintings, prints, and graphics created by new department of art faculty members are featured in a show currently on exhibit in the Zoller Gallery of the Visual Arts Building. The show closes September 15.

Recently appointed art faculty members whose works are represented in the show include Patricia Carroll, Rob Fisher, William Kinser, Stephen Porter, Joseph Ramos, and Nina Rosenblum.

BLUE COURSE CLOSED

Beginning Monday, Sept. 10, the Blue Golf Course, west of the campus, will be closed for extensive alterations, including repairs to all greens, installation of new women's tees, and additions to the driving range. The white course, across Rt. 322 from Rec Hall, will remain open for play.

Use of writing clinic urged

Over the past year, the English Department has expanded the services of the Writing Clinic. Relocated in new quarters (Rooms 203, 204, 205 of the Liberal Arts Building), the Writing Clinic is open weekdays from 8:30 a.m. to 12:30 p.m. and 1:30-4:30 p.m. Lynn Christy, associate professor of English composition, is the director. Phone: 865-1552.

The purpose of the Writing Clinic is to provide supplementary assistance to students with deficiencies in written expression. Its main clientele are students concurrently enrolled in English 1, although it is open to any Penn State student with writing problems.

For the first time in Fall term 1973, all entering freshmen who perform un-

satisfactorily on the English Placement Test will have the phrase "recommended for Writing Clinic" printed on their student profile forms. This is to alert counselors as well as students to a possible writing problem, so that each student can seek assistance at his earliest convenience.

Students should inform their English 1 instructor of their deficiency, so that arrangements can be made for enrollment in the Clinic. Students who fail the mid-term Minimum Essentials Test in English 1 will be automatically assigned to the Clinic. Attendance at the Clinic is voluntary, but experience indicates that students who seek help early in the term tend to pass the Minimum Essentials Test and indeed the final examination in English 1.

Lowenstein to speak Saturday

Allard Lowenstein, former New York State representative to Congress and president of the Americans for Democratic Action in 1971-72, will speak in Schwab Auditorium, Saturday, Sept. 8, at 8 p.m. The talk is sponsored by the Student Affairs Office and Student Orientation Committee as an activity of Orientation Week.

Admission is free and the lecture is open to the public.

Lowenstein, currently a National Committeeman of the Democratic Party, was the national leader of the "Dump Johnson" movement and of Registration Summer, 1971, when a voter registration drive was launched to encourage 18-21 year-olds to vote. Earlier, he organized the first important voter registration drive in Mississippi. An attorney, Lowenstein has also lectured widely in colleges and universities.

To provide year-round programs of academic concern

Groups cooperate for new Colloquy

Colloquy is new; the old Colloquy which for four years has brought outstanding programs to the academic community, largely in the Spring Term, has been completely reorganized "to provide a wide range of programming for the entire campus community — students, faculty, and townspeople — during the entire year."

In effect, too, only the name is the same, since the new Colloquy is an amalgamation of four student organizations — Free U, Graduate Student Association, University Union Board, and the old Colloquy — which are now cooperating to bring a variety of academic programming, in the form of seminars, colloquiums, lectures, workshops, etc., to appeal to the entire community.

The new organization grew out of a realization that the four organizations were often duplicating their efforts and compounding their scheduling and publicity problems by carrying on their separate programs. Some events found limited success because of organizational and promotional problems.

The new Colloquy was formed, therefore, with a view to presenting a cooperative front in presenting student-sponsored academic programs. An executive board was formed with two members each from GSA, UUB, and Free U, a member of the University Faculty Senate, a member from the Associated Student Activities office, and the chairman of three committees: speaker coordination, programming, and publicity.

The entire Colloquy organization, however, is open for membership to any full-time student at Penn State.

An introduction to the U.S.

Swiss artists to be exhibited here

The introduction to America of the work of three Swiss artists — Augusto Giacometti, Giovanni Giacometti, and Cuno Amiet — who are all well-known in Europe, will take place on the Penn State campus in an exhibit occupying much of the Museum of Art in the period of Sept. 23 to Nov. 3.

Through the efforts of Dr. George L. Mauner, professor of art history, and William Hall, director of the Museum, the oils, watercolors, and drawings acquired from museums and private collections will constitute undoubtedly the finest single exhibit ever shown at the University.

Augusto Giacometti, born in 1877, as early as 1898 produced a pastel abstraction, 12 years before the famous watercolor by Kandinsky which was once considered

the first abstract painting. Giovanni Giacometti, cousin of Augusto and father of the sculptor Alberto, born in 1868, was in his later years identified with modernistic art in Switzerland. Cuno Amiet, who was a friend of Giovanni's, was also born in 1868; he painted until shortly before his death in 1961. His art showed many influences and changed character many times in his long career.

From Penn State, the show will travel to the Utica, N.Y., Munson-Williams-Proctor Museum, to the Busch-Reisinger Museum at Harvard, and to the Guggenheim Museum in New York City.

Aid for the show comes from the Pro Helvetia Foundation, Zurich, Switzerland, and a catalog for the show has been written by the Ciba-Geigy Corp., Swiss firm. Although Colloquy will have primary control of academic programs provided by the students, other organizations are in no way limited in scheduling their own speakers, conferences, etc. Colloquy only suggests that when other organizations plan a program of campus-wide interest that they cooperate with Colloquy in such matters as scheduling and publicity.

Allen Miller, a member of Colloquy's executive board, makes it clear that the organization has no concern with "popular entertainment," which includes concerts, movies, plays, etc.

He also makes it clear that faculty and student input are welcomed (a call to the Associated Student Activities office in the HUB will be adequate to initiate a contact). For example, if a speaker is coming to the campus to address a specialized seminar or colloquium group, he might also be available to give a more generalized talk to the entire academic community. Colloquy would like to know about it, and the executive board would develop the scheduling and promotional aspects of the talk if it approved the project.

"All the programs are free and open to the public," Miller points out. "We want to bring to the community people that might not otherwise be seen or heard here and we want to develop programs ranging from one-night stands to four-day conferences that are interesting and relevant."

The first event planned by Colloquy is a three-day program related to the Science Fiction conference being held next week. The entire program is noted elsewhere in INTERCOM.

New learning laboratory opens

Listening-Learning Services announces the opening of a newly remodelled multimedia Learning Laboratory located in Room 10, Human Development Building. The laboratory is furnished with study carrels, a film and TV viewing room, and various types of audio-visual equipment, including audio and video cassette players, sound filmstrip viewers, 16 mm. and 8 mm. film projectors, and synchronized slide cassette recorders.

The facilities were designed to accommodate courses involving independent learning activities. They are open to faculty members from all colleges of the University who are invited to place course materials in the laboratory for use by their students.

The hours of operation during Fall Term will be as follows: Monday through Friday 8:00-12:00, 1:00-5:00, and 6:30-10:30. Saturdays closed, and Sundays 6:30-10:30 p.m.

Faculty members interested in utilizing the facilities regularly or occasionally are invited to contact the Director of Listening-Learning Services, 13 Pinchot Hall (865-1325). Visitors to the laboratory will be welcome.

1973 Fall Term Calendar

University Park Campus

The Pennsylvania State University

WEEK OF SEPT. 3-9

Monday, September 3

Labor Day. New students arrive

Tuesday, September 4

Women's open recreation, 7 p.m., White.

Wednesday, September 5

Pre-examination in German for advanced degree candidates
Fall Term registration

Thursday, September 6

Pre-examination in German for advanced degree candidates
Fall Term registration
First meeting, women's varsity field hockey team, 5 p.m., White.

Friday, September 7

Pre-examination in German for advanced degree candidates
Fall Term registration
Commonplace Coffeehouse, 8 p.m., 102 Kern

Saturday, September 8

PSOC Hiking Div. annual Mt. Nittany hike, meet at 1:30 p.m., HUB

NOTES:

WEEK OF SEPT. 10-16

Monday, September 10

Fall Term classes begin, 8 a.m.
Undergraduate Library Jazz Session-Orientation Program, 7:30-9 p.m., HUB reading room.
Naiads Try-Out, 7 p.m., White
First meeting, women's varsity gymnastics team, 5:30 p.m., White

Tuesday, September 11

Naiads Try-out, 7 p.m., White.
Orchestr. Try-out (men and women), 2:30 and 7 p.m., South Dance Studio, White.
First meeting, women's varsity golf team, 2 p.m., White

Wednesday, September 12

Orchestr. Try-out (men and women), 7 p.m., South Dance Studio, White.
Naiads first meeting, 7 p.m., White.
Commonplace Theatre, 8 and 10 p.m., 112 Kern. "The Legend of the Lone Ranger," Clayton Moore and Jay Silverheels.

Thursday, September 13

Arnold Ar Society film, "Summer of '42," 7 and 9 p.m., 105 Forum.
Orchestr. (old members) first meeting, 6:30 p.m., White.
Deadline for entries in Intramural touch football, tennis singles, and team golf, 4:30 p.m., 206 Rec Hall.

Friday, September 14

Last date for registering with Foreign language departments (other than French and Spanish) for written language examinations.
Arnold Ar Society film, "Summer of '42," 7 and 9 p.m., 105 Forum.
Panhel, 10 a.m., HUB ballroom.
Student SF films, 7-12 p.m., HUB assembly room.
Annual Conference of the Science Fiction Research Association, Sept. 14-17.
Commonplace Coffeehouse, 8 p.m., 102 Kern.

Saturday, September 15

Arnold Ar Society Film, "Summer of '42," 7 and 9 p.m., 105 Forum.
Artists Series, "Godspell," 3 p.m. and 8:30 p.m., Schwab.
Students' SF films, 7-12 p.m., HUB assembly room.
Young Socialists, 7-12 p.m., HUB ballroom.

Sunday, September 16

Arnold Ar Society, "Summer of '42," 7 and 9 p.m., 105 Forum.
Artists Series, "Godspell," 3 p.m. and 8:30 p.m., Schwab.
Chapel Service, 11 a.m., Eisenhower Chapel.
Reverend James D. Glaspey, Lancaster Theological Seminary.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Sigma Delta Epsilon's Annual Fall Social for women in science, 10 a.m., 101 Kern.
Penn State Sports Car Club Autocross.

NOTES:

INTEREST GROUPS

Chapel Service, 11 a.m., Music Bldg. recital hall.
The Reverend James C. Alexander, Shaw Divinity School.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

NOTES:

WEEK OF OCT. 29-NOV. 4

Monday, October 29

Last date for a December graduate to deliver thesis to the Graduate School office.
Last date for departments to certify completion of required papers for December graduates.
Last date for a December graduate to order cap, gown, and hood locally.
Musica da Camera, 8:30 p.m., Music Bldg. recital hall.
Campus Crusade for Christ (also Oct. 30-31), 7 p.m.; speaker, John McDowell.
First meeting, women's varsity fencing team, 7 p.m., 33 White.

Tuesday, October 30

Women's field hockey, Lock Haven State College, 2:30 p.m., two games.
Engineering Undergraduate Council meeting, 7:30 p.m., 207 Sackett.
First day for signing NDSL (National Direct Student Loans), SEOG (Supplemental Educational Opportunity Grants), and University Loans for Winter Term.

Penn State meets West Virginia on All-University Day, October 27.

Wednesday, October 31

Raymond Page, viola, 8:30 p.m., Music Bldg. recital hall.
Commonplace Theatre, 8 and 10 p.m., 112 Kern. "Mondo Cane."

Thursday, November 1

Artists Series, Lennagard Philharmonic, 8:30 p.m., Rec Hall.
Thespians show, "The Brotherhood," 8:30 p.m., Schwab.

Friday, November 2

Women's field hockey, Susquehanna Field Hockey Tournament.
Student SF films, 7-12 p.m., HUB assembly room.
Penn State Brass Chorus, 8:30 p.m., Music Bldg. recital hall.
University Theatre, "One Flew Over the Cuckoo's Nest," by Dale Wasserman, 8 p.m., The Playhouse.
Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.
Thespians show, "The Brotherhood," 8:30 p.m., Schwab.
Commonplace Coffeehouse, 8 p.m., 102 Kern.
Last day for signing NDSL, SEOG, and University Long Range Loans for Fall Term.

Saturday, November 3

Women's field hockey, Susquehanna Field Hockey Tournament.
Student SF films, 7-12 p.m., HUB assembly room.
University Theatre, "One Flew Over the Cuckoo's Nest," 8 p.m., The Playhouse.
Thespians show, "The Brotherhood," 8:30 p.m.,

Sunday, November 4

Women's field hockey, Susquehanna Field Hockey Tournament.
Chapel Service, 11 a.m., Eisenhower Chapel.
Charles L. Coleman, Religious Affairs.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

NOTES:

WEEK OF NOV. 5-11

Tuesday, November 6

Bloodmobile, sponsored by Alpha Phi Omega, 9 a.m.-5 p.m., HUB ballroom.
University Theatre, "One Flew Over the Cuckoo's Nest," 8 p.m., The Playhouse.
Comparative Literature luncheon, 12:15 p.m., HUB dining Room A. John McCabe.

Wednesday, November 7

Bloodmobile, sponsored by Alpha Phi Omega, 9 a.m.-5 p.m., HUB ballroom.
University Theatre, "One Flew Over the Cuckoo's Nest," 8 p.m., The Playhouse.
Ilor James, French horn, John McCabe, piano, 8:30 p.m., Music Bldg. recital hall.
Commonplace Theatre, 8 and 10 p.m., 112 Kern. "The Cane Mule," Humphrey Bogart, Jose Ferrer.
Graduate Council meeting, 3 p.m., 101 Kern.

Thursday, November 8

University Theatre, "One Flew Over the Cuckoo's Nest," 8 p.m., The Playhouse.
Taylor Lectures in Materials Science, 8 p.m., 26 Min. Sci., Dr. Linus Pauling.

Friday, November 9

Student SF films, 7-12 p.m., HUB assembly room.
University Theatre, "One Flew Over the Cuckoo's Nest," 8 p.m., The Playhouse.
Taylor Lectures in Materials Science, 8 p.m., 26 Min. Sci., Dr. Linus Pauling.
Soccer, vs. Temple, 7 p.m.
Commonplace Coffeehouse, 8 p.m., 102 Kern.

Saturday, November 10

Student SF films, 7-12 p.m., HUB assembly room.
University Theatre, "One Flew Over the Cuckoo's Nest," 8 p.m., The Playhouse.
PSU Symphony Orchestra, 8 p.m., Schwab.
Football, vs. North Carolina State, 1:30 p.m., Beaver Stadium.
Concert Commencement program, 8 p.m., Rec Hall.

Sunday, November 11

Penn State Glee Club, 3:30 p.m., Music Bldg. recital hall.
Chapel Service, 11 a.m., Eisenhower Chapel.
Dr. Richard Jungkuntz, Provost, Pacific Union University.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

NOTES:

WEEK OF NOV. 12-18

Tuesday, November 13

Comparative Literature luncheon, 12:15 p.m., HUB Dining Room A. Colin Rodenick on "Cook and the Noble Savage."
University Faculty Senate, 2:10 p.m., 112 Kern.

Wednesday, November 14

Leonard Feldman, cello, 8:30 p.m., Music Bldg. recital hall.
English Colloquium, 8 p.m., 101 Kern. Colin Rodenick on "The Character of Australian Literature."

Thursday, November 15

Last day for signing Emergency Loans for Fall Term.

Friday, November 16

Student SF films, 7-12 p.m., HUB assembly room.
Soccer, vs. Pittsburgh, 7 p.m.

Saturday, November 17

Last date for submitting a petition to graduate in absentia in December.
Fall Term classes and 12:25 p.m.
Student SF films, 7-12 p.m., HUB assembly room.
Football, vs. Ohio U., 1:30 p.m., Beaver Stadium, Band Day.

NOTES:

WEEK OF NOV. 19-25

Monday, November 19

Final examinations.
Color Slide Club, 7:30 p.m., 112 Kern.

Tuesday, November 20

Liberal Arts faculty meeting, 3:55 p.m., 121 Sparks.
Final examinations.
College of Agriculture faculty meeting, 4 p.m., HUB assembly room.

Wednesday, November 21

Final examinations.
Graduate Council meeting, 3 p.m., 101 Kern.

Saturday, November 24

Football, vs. Pittsburgh, 1:30 p.m., Beaver Stadium.

NOTES:

WEEK OF NOV. 26-DEC. 2

Saturday, December 1

Commencement, 10:30 a.m., Rec Hall.

Death

Lester S. Hamel, who was director of student affairs research when he retired from the University in 1969, died August 24; he was 68. A retired Marine Brigadier General, with a total of 32 years of military service, he joined the staff in a full-time position in 1961, as research assistant in Student Affairs Research, Office of Student Affairs. Immediately after military retirement, he was admitted as an undergraduate student at Penn State with a junior standing. He was graduated in 1960, with a B.A. in secondary education; a year later he received an M.Ed. degree in counseling. He taught, on a part-time basis, in the College of Education. His enlistment in the Marine Corps in 1926 followed a three-year teaching career in public schools in Pennsylvania; he had completed a two-year course at Kutztown State College in 1923. In his long Marine career, he participated in operations on Bougainville and Iwo Jima in World War II. His last tour of duty was as commanding officer of the Marine barracks at the Bremerton, Wash., Naval base.

Promotions

Dr. Robert J. Graham, to associate professor of humanities and American studies, Capitol Campus (effective July 1).

Dr. Robert W. Ott, to assistant professor of art education, (effective Sept. 1).

Funding opportunities

For more information, call 865-1372 except where noted below, and refer to the item by its number and the general information provided. People with grants information for dissemination in this column should call the same number.

September 6, 1973

(96-1) A program of Technological Innovation in Education Programs is supported by the National Science Foundation with the objectives of (1) exploring and developing computer and related communication technologies and techniques of potential application to education; (2) developing, and evaluating concepts, applications, and courseware; and (3) exploring and evaluating various computer-based and related systems for effective and efficient instruction. There are no proposal deadlines but several months are required for proposal review. Inquiries may be directed to: Arthur S. Mainland, Technological Innovation in Education Programs, Education Directorate NSF, Washington, D.C. 20550-7745.

(96-2) A new NSF program — Latin American Cooperative Science Program — has been established to facilitate and support mutually beneficial scientific and technological cooperation between the United States and Latin America. Argentina, Brazil, Mexico and other Latin American countries are to be considered. This program is designed to encourage collaboration and exchange of information between scientists, engineers, scholars and institutions of research and higher learning. Three different activities supported are: cooperative research, joint seminars, and scientific visits. The next deadline for research is Oct. 15 with advance notice recommended. Seminars should normally be proposed 12 months before the meeting date. Visit requests are needed as early as possible. Preliminary proposals are encouraged. Inquiries may be directed to: Latin American Cooperative Science Program, Office of International Programs, NSF, Washington, D.C. 20550 (202)632-5811.

(96-3) The Student-Oriented Program of the National Science Foundation contains three programs for FY 1974, each with a separate application deadline. Guidelines (NSF E74-7) will be available soon.

Undergraduate Research Participation has a Nov. 2 deadline and provides undergraduate students with research or independent study opportunities under the guidance of research directors. Grants are awarded for full-time projects of at least 10-weeks duration.

Student-Oriented Studies has a Nov. 30 deadline and supports student contributions to the understanding of science- or technology-based societal problems through individual or group oriented studies. The award deadline is Oct. 15, 1974.

Secondary School Student Science Training has a Nov. 16 deadline and supports either scientific research or special course work for superior secondary school students. Summer training is customary and runs for at least 5 weeks.

REMEMINDERS — DEADLINE DATES
Oct. 1, Feb. 1, June 1 — Grants for Training Grant Programs and Grants for Training Grant Programs (Aug. 9 INTERCOM #92-1 and 92-2); for HSMAH Science Research and Development for Health Sciences Research Resources (Aug. 23 INTERCOM #94-1 & 94-2); and for NIH Lab Animal Programs and NIMH Minority Group Mental Health Program (Aug. 30 INTERCOM #94-1 & 94-2).
Oct. 15 for OE Cooperative Education Program Awards (Aug. 9 INTERCOM #92-4); for OE Faculty Research Abroad, Doctoral Dissertation Research Awards (Aug. 16 INTERCOM #93-2 & 93-4); and for NSF Instruction Improvement Implementation Programs (Aug. 30 INTERCOM #95-4).

Retirement

Dr. Frances M. Andrews, professor and head of the department of music education, retired August 31 with emeritus rank, after serving on the faculty for 27 years. She was department head for eight years. Earlier, she was head of the music program in the State College Area junior and senior high schools for eight years and taught part-time at the University. She had previously taught in the Abington Independent School District at Waverly and in the Benton schools at Fleetwood. A graduate of Marywood College, Scranton, she earned M.Ed. and D.Ed. degrees at Penn State; she also studied at Oberlin and at N.Y.U. In addition to teaching and administrative duties here she directed a number of research projects and studies and was the author or co-author of six books and many articles in professional journals. One book, "Guiding Junior High School Pupils in Music Experiences," won wide acclaim and has effected a basic change in music education in junior high schools. It was selected for the 1954 Peabody Best Book List. One of her deepest involvements was in the Music Educators National Conference, which she served as president for two years. After holding other offices and being on a number of committees, she will continue on the Board for another year. As president of the 60,000-member organization, she worked for improvement of quality and quantity of music education in schools and communities. In 1970 she brought about the adoption of the organization's first comprehensive statement of goals and objectives in music education. She has won many honors: National Band Association citation for outstanding contributions to band and band music; State Department Education citation for distinguished contributions to the advancement of education; Mu Phi Epsilon Elizabeth Mathias Award, for inspiring many young students in music education.

Staff vacancies

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Network Line 475-1387). Do not contact the area that has this vacancy. Applications for these staff vacancies will be accepted.

5 P.M., THURSDAY, SEPTEMBER 20, 1973
SENIOR INSTRUCTIONAL SERVICES SPECIALIST
York Campus

Responsible for providing and encouraging the use of a wide variety of instructional resources; for investigation, evaluation and implementation of instructional methods and media. A Bachelor's degree, preferably in education or instructional media with at least two years of experience are desired.

PROCEDURES SPECIALIST
CONTROLLER'S OFFICE

Responsible for reviewing, investigating and analyzing current fiscal policies, procedures, practices, forms and records. Documents and develops and develops and maintains effective manuals. Bachelor's degree preferably in Business Administration together with related experience in procedures, forms control or similar management service work are preferred.

DEAN OF STUDENT AFFAIRS
Shenango Valley Campus

Responsible for the planning and administration of student affairs programs and services and other activities as assigned by the Director. A Master's degree in Student Personnel or related field is desired with three years of applicable experience.

In writing

The University Press has published the fifth volume of the "Yearbook of Comparative Criticism," edited by Dr. Joseph P. Streika, former member of the University's German department.

This volume is devoted to "Literary Criticism and Sociology," and among the contributors is Dr. Maxwell H. Goldberg, also a former member of the faculty. Studies in the dialectics of the literary imagination, literature and its reading public, technology and literature, morals and society, and sociological aspects in literary evaluations are considered in the volume, which represents a cross-section of the most important sociological considerations in literary criticism, literary theory, and literary history.

"Three Preludes" dance to be featured by National Ballet on Artists Series Sept. 22.

National Ballet follows

Artists Series has 'Godspell'

The first two events on the 1973-74 Artists Series will be the performances of the award winning musical, "Godspell," Sept. 15 and 16, and the National Ballet Saturday, Sept. 22.

"Godspell" will be given in both afternoon and evening shows, 3 p.m. and 8:30 p.m., Saturday and Sunday, Sept. 15 and 16, in Schwab Auditorium. Season ticket holders were given first opportunity to purchase tickets for this special event and may continue to do so at the HUB booth through September 13. If any tickets remain after the subscription sales, they will be offered to non-subscribers Friday, Sept. 14, at 9:00 a.m. in the HUB.

The musical has enjoyed a Broadway run since 1971 and a number of touring

companies have given performances throughout the country. The word, "Godspell," incidentally, is an old spelling of the word "gospel." The show is created by John-Michael Tebelak, who directed the Broadway performance. The music and lyrics were written by Stephen Schwartz who produced the original cast album and has been responsible for 14 productions of the show here and abroad.

"Godspell," which became the longest running musical of all time in Boston at Washington, D.C., is based on the Gospel of St. Matthew. John-Michael Tebelak has drawn from the spirit of Christ and his teachings rather than from the literal reading of the Bible. Only during the last sequences do the Passion and Crucifixion enter into the production.

Newcomers invited to join club

Wives of new faculty members and administrative personnel as well as new women faculty are invited to join the Faculty Women's Newcomers' Club and to take part in a variety of activities this fall, starting with "desserts."

"Desserts" will be held in the period of Oct. 20-21, and their purpose is to enable newcomers to meet members and other newcomers to the area. They are held in the homes of faculty wives, and packets of information will be distributed concerning the community.

The Club is open to wives of faculty and administration members and women faculty

who have been on campus for less than two years. Some of their activities, including fall reception Sept. 25, are conducted with the Faculty Women's Club.

For more information about the Newcomers' Club and to join, call Mrs. Richard Tressler, 237-5426, or Mrs. David Colton, 237-9527.

Members of the Newcomers' Board are: Mrs. Richard Tressler, president; Mrs. Gordon Dixon, first vice president; Mrs. Charles Sams, second vice president; Mrs. Robert Blashfield, secretary; and Mrs. Robert Keith, treasurer.

Colloquy features science fiction

The first program in the 1973-74 Colloquy series will revolve around writers and critics attending the annual conference of the Science Fiction Research Association, to be held on campus Sept. 14-17.

Wednesday, Sept. 12, at 8 p.m., in Schwab Auditorium, John Brunner will discuss the future of the environment.

Thursday, Sept. 13, at 8 p.m., in the HUB ballroom, writers Gordon Dixon, Frederick Pohl and Theodore Sturgeon will

discuss issues of the future, each speaking on a subject of his own choice. A reception will be held in the HUB reading room following the discussions.

Monday, Sept. 17, at 8 p.m. in Schwab Auditorium, Leslie Fielder and Roy Zelinsky will debate the subject of science fiction.

As with all Colloquy programs, the lectures and discussions are free and open to the public.

Calendar — Sept. 6-16, 1973

(Note: The items below are in addition to those listed on the Fall Term calendar on Pages 2 and 3).

SEMINARS

Monday, Sept. 10 — Genetics, 3:55 p.m., Room 111 Tyson. Dr. J. E. Wright, on "Pseudolinkage in Rainbow Trout."

Thursday, Sept. 13 — Agronomy, 3:55 p.m., Room 112 Kern. Dr. James B. Bartoo, Graduate School dean, on "Problems Associated with the Graduate Academic Environment."

SPECIAL EVENTS

Saturday, Sept. 8 — Talk by Allard K. Lowenstein, former A.D.A. head, 8 p.m., Schwab, sponsored by Student Orientation Committee and Student Affairs Office.

Sunday, Sept. 9 — Black Christian Fellowship worship service, 11 a.m., Walnut Building. The Rev. John M. Day, Jr., Baltimore, Md.

Wednesday, Sept. 12 — COLLOQUY, 8 p.m., Schwab, John Brunner, science fiction writer, on the future of the environment.

Thursday, Sept. 13 — COLLOQUY, 8 p.m., HUB ballroom. Science fiction writer, Gordon Dixon, Frederick Pohl, and Theodore Sturgeon, discussing the future of their special areas.

INTEREST GROUPS

Alpha Phi Omega, Wednesday, Sept. 12, 7:30 p.m., HUB reading room.

Chess Club, Wednesday, 6:30 p.m., HUB card room.

Chess Team, Thursday, 6:30 p.m., Room 203 Boucke.

Eastern Orthodox Christian Fellowship Divine Liturgy, Sunday, Sept. 9, 8 a.m., HUB assembly room.

Interludia Folk Dancing, Mondays, 7:30 p.m., HUB ballroom.

New Democratic Coalition, Friday, Sept. 14, 8 p.m., HUB ballroom.

OFFICIAL Monday-Friday, Sept. 10-14 — Drop-in/stand-up event in HUB; also Sept. 17-19.

Wednesday, Sept. 12 — Association of Women Students, 7 p.m., Room 203 HUB.

PENN STATE intercom

Volume 3, Number 2

September 13, 1973

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the cless schedule

News in Brief

PHONE CHANGE

Worthington-Scranton Campus has a new Wide Area phone number. It is now 459-4757; the prefix was previously 493. Individuals may be reached on the Network by calling 459 and the last four digits of the person's number. However, these numbers are not correct in the old directory, and individuals' numbers may only be obtained by calling 459-4757 until the new directories are available.

COINS

The Keeper of the Heberden Coin Room, Ashmolean Museum, Oxford, England, will give two talks relating to coins and coinage next week. Prof. Colin Kraay will speak on "Timoleon and Corinthian Coins in the West," Wednesday, Sept. 19, at 2:20 p.m. in Room 230 Arts. The following day he will speak at 8 p.m. in the Kern Graduate Bldg. auditorium on "Greek Coinage and History," sponsored by the Central Pa. Society of the Archaeological Institute of America.

GOLF EQUIPMENT SALE

Currently underway is a sale of golf equipment and supplies at the Golf Shop in Recreation Building, at the White Course. The sale will continue as long as sale stock is on hand.

INTERNATIONAL SCHOOL

The annual State College community reception for international students will be

held Sunday, Sept. 23, from 3 to 5 p.m. in the social rooms of the Grace Lutheran Church. The entire community is invited to welcome and get acquainted with the international students enrolled at the University. The International Hospitality Council, the Women's Church United, and International Center at the University are cooperating in the event, which is informal.

JAY CERAMICS

Paul Jay, instructor of ceramics, art history, and drawing at the Allegheny Campus, Community College of Allegheny County, has an exhibit of both stoneware and porcelain at the Kern Graduate Bldg. It will continue on display until Sept. 30. He has exhibited widely throughout the country in recent years, including the 29th annual show of the Craftsmen's Guild of Pittsburgh.

FRENCH INTERESTS

Members of the faculty and staff and their wives who are interested in "things" French — literature, art, theatre, or merely conversation — may wish to express that interest to Alliance Francaise, an organization of French-speaking persons in the community having a purpose of continuing the individual's contact with French language and culture. The organization sponsors an activity each year to provide scholarship money for a student to study in France. It also cooperates in a number

(Continued on page four)

Science fiction conference brings outstanding writers

A four-day conference bringing together some of the outstanding science fiction writers and critics both in this country and abroad will begin tomorrow (Friday, Sept. 14) and continue through lunch Monday, with sessions in the assembly room of the J. O. Keller Building conference center.

A Friday evening session, beginning at 8 p.m., will be devoted to an overview of science fiction, with speakers Patrick G. Hogan, Jr., of Houston, and Leslie A. Fielder, SUNY-Buffalo. Introductory remarks will be made by Dr. Arthur O. Lewis, conference co-chairman with Philip Klass, and Liberal Arts Dean Stanley F. Paulson.

Saturday's program will include a discussion on "Myth and the Science Fiction Writer" at 9 a.m. and a panel discussion on "Utopias," also at 9 a.m. Among the panelists is Philip E. Stebbins, associate professor of history.

At 11 a.m., sessions on "The Beginnings of Modern Science Fiction: Wells" and "Probing the Limits" will include speakers from Loyola University of Montreal: SUNY-Albany, St. John's University, and Montana. Charles W. Mann, Jr., head of special collections in the University Libraries, is a discussant.

The Saturday afternoon sessions, beginning at 2 and 4 p.m., will include papers on "Science Fiction after Wells"; "Wells and His Contemporaries," in a panel dis-

cussion; "The American Science Fiction Magazine"; and "Teaching Science Fiction: The Use of Film." One of the panelists on the latter subject will be L. P. Greenhill, assistant vice president for academic services.

An awards banquet will be held at 6:30 p.m. Saturday.

Sessions will be held Sunday at 9 and 11 a.m. and at 2 and 4 p.m., on the topics "The Campbell Period (The Forties)", "Science Fiction: The Communication of Technological Concepts" (panel discussion); "The Galaxy — Fantasy and SF Period (the Fifties)"; "Science Fiction and Society"; "Science Fiction in the Last Two Decades"; "Teaching Science Fiction, the Methods and Goals"; and "Science Fiction and Bibliography." At 8 p.m., "The Problem of Prediction" will be discussed by John Brunner, from England, and Robert U. Ayres, International Research and Technology Corporation. Charles Mann will be one of the speakers on the program of the "Science Fiction and Bibliography" session.

The 9 a.m. session on Monday, Sept. 17, will be devoted to a round table discussion on "Literary Perspectives, the Science Fiction Writer and His Critics Today." Among the speakers will be Stuart H. Stock, graduate assistant in English.

Among the various session chairmen

(Continued on page two)

Senate chairman Bergman values citizenship highly

When he's asked what impelled him to let his name be put up for Senate Chairman — or why he's running for the job of Township Supervisor in Ferguson this fall — Ernest L. Bergman likes to quote an old German proverb: "The way you make your bed, that's the way you sleep."

"I remember," he says, "how I lost my citizenship in Germany in 1939 and didn't get another until 1952 when I became an American. When you've had no rights, you treasure your civic duties more."

Born in Munich, Dr. Bergman fled the Nazis, emigrating to Switzerland as a boy of 14. There, he went to a State Agricultural School and supported himself by working on farms and orchards.

"Everyone talked about America," he recalls. "One of the dreams was coming here. I had relatives in this country so in 1946, as soon as the war ended, I emigrated."

He got a job pruning trees in upstate New York and eventually wound up as a hopyard foreman, working for his relatives in Oregon.

"I'd always wanted to go back to school," Dr. Bergman continues, "but I didn't think I could afford it. After I got my citizenship, I found a job at Oregon State College helping a retired professor, Dr. E. J. Kraus, breed ornamental plants. He was an old German and a bachelor who had been head of the Botany Department at the University of Chicago and was very well known."

"One day the old man started to talk to me about my educational background. 'Unless you go back to school,' he said, 'when I die, you will be nothing.' So he

cleared the way for Oregon State to give me credit for my schooling in Switzerland, provided I made at least a 'B' average in my required courses the first year. I had to take all the basic sciences, which helped to pull it off, and I continued working full time. I got my B.S. in pomology in two years."

"I hadn't thought about continuing for an advanced degree when I started out, but Michigan State offered me an assistantship, and I earned by master's and doctorate there. Without Dr. Kraus's encouragement, however, I doubt I would have ever returned to school. I owe him a great debt."

Dr. Bergman joined Penn State's faculty in 1958 as an assistant professor of plant nutrition. Now a full professor, he is doing research on plant nutrition and vegetables, investigating, with members of the department of plant pathology, the effects of plant viruses on nutrition. Working with ag engineers, he has helped develop a plastic mulch laying machine and the mechanical harvesting of tomatoes. His current research with poultry scientists, in conjunction with mining engineering, involves hydroseeding burnt mine sites with a mixture of dried poultry manure and seeds.

Dr. Bergman developed Pennscrisp winter celery which now accounts for 70 percent of the State's bleached celery acreage, and he also received the Kenneth Post Award for co-authoring a research paper dealing with the yield prediction of roses. One of his most challenging assignments was the several months he spent in

(Continued on page two)

Dr. Ernest L. Bergman, chairman of the University Faculty Senate, hopes that the organization can help the administration with some of the decision-making, especially in academic and faculty affairs. He hopes further that the Senate will initiate ideas to present to the administration.

Appointment

Col. Alan J. Grill, USAF, as professor and head of Air Force Aerospace Studies. He is a command pilot with 4,400 hours of flying time. Commissioned as an aviator cadet in 1953, he has completed Squadron Officer's School at Maxwell AFB, Armed Forces Staff College at Norfolk, Va., and the Naval War College at Newport, R.I. He is a graduate of the University of Chicago with an M.B.A. degree, conferred in 1961. His decorations include the Distinguished Flying Cross, Air Medal with Six Oak Leaf Clusters, and the AF Commendation Medal with one Oak Leaf Cluster. His overseas duties have included tours in Thailand and Vietnam and in Europe.

In Writing

"Operating Systems Theory," a new book co-authored by Dr. Edward G. Coffman, Jr., professor of computer science at the University, has been published by Prentice-Hall, Inc. The purpose of the book, intended both as a text and as a reference, is to study various algorithms needed in the design of computer operating systems. These include sequencing and control algorithms designed to avoid various types of failures in systems supporting concurrent processes; scheduling algorithms, algorithms for using input/output devices and buffer storage; and storage management algorithms. Dr. Coffman and his co-author, Dr. Peter J. Denning of the Massachusetts Institute of Technology, present the most important formal methods which have been applied to the study of operating systems algorithms in order to replicate the nature of the results, the essence of the analysis, and the power and limitations of the methods.

Recently published by the American Library Association is "Guidelines for Handling Library Orders for In-print Monographic Publications." This is the first of a series of guidelines being produced by the Bookdealer-Library Relations Committee of the Resources Section. Murray S. Martin, associate director of Libraries, is chairman of the committee. Two other books are being prepared for the series.

Retirement

George G. R. Lucas, associate professor of insurance in the College of Business Administration, retired August 31 after 35 years of service to the University, which began in 1938 when he was appointed assistant in economics in the commerce and economics department of the College of Liberal Arts. He was graduated from Penn State in 1934 with a B.A. degree; in 1947 he earned an M.A. degree. He came back to the University following flood duty with the American National Red Cross in Memphis, Tenn. He had also served the Red Cross as an accountant and earlier had been district supervisor of business courses for the Penna. Dept. of Education. During World War II he was on active military duty for four-and-a-half years, teaching military science and tactics at various army camps and in the R.O.T.C. program at Penn State. His major professional interest has been in property and casualty insurance, but he has also taught courses in accounting, economics, finance, taxes, and business law. He is co-author of "Insurance Principles and Coverages," a widely used textbook published in 1954 and revised in 1956. It has been published in Braille and Chinese editions. He is also author of manuals, handbooks, and of many articles.

Air freight service available

Next day delivery of parcels to most cities in the continental U.S. is now available via Emery Air Freight Service, and departments may make use of the service through University Mail Service, 106 Service Building. Information will be provided by A. E. Mische, 865-5602.

Shipments will be flown from University Park Airport to connecting carriers at the Greater Pittsburgh Airport on a daily basis, Monday through Friday. Parcels for shipment must be at the Service Building by 2 p.m. to be mailed that day. Parcels which exceed 500 pounds or 6 ft. by 3 ft. require a one-day notice.

Typical rates for a 10-pound parcel include Bangor, Maine, \$20; Spokane, Washington, \$20; Miami, Fla., \$15. Insurance rates vary.

Dettra to perform

Pianist Philip Dettra will open the 1973-74 Music Department series of recitals and concerts with a program Wednesday, Sept. 19, at 8:30 p.m. in the Music Building recital hall.

The program will include works by three French composers, Faure, Ravel, and Chopin. In 1972, Dettra studied French impressionistic keyboard music with Paul Dugueure, in Lausanne, Switzerland, under grants from the Peabody-Mason Foundation, Boston.

Dettra will give similar programs at the Altoona Campus Sept. 16 and at Mount Aloysius Junior College, Cresson, Nov. 14. The program includes Faure's "Theme and Variations," Ravel's "Sonatine," and Chopin's "Ballades."

Women's club to have reception

On Tuesday, September 25, the Faculty Women's Newcomers' Club will hold a joint reception with the Faculty Women's Club at 7:30 p.m. in the Hetzel Union Building ballroom.

New Penn State faculty women and wives of administration and faculty members who have been on campus less than two years are invited to attend and get acquainted with the club members and other newcomers to the area.

Also at the reception, members may sign up for interest groups which usually meet informally once a month, including: book exchange, beginners' bridge lessons, bridge, for ladies and for couples, home-and-community, tongue-and-thimble and dinners-for-eight conversations.

This year's program includes a "Fall Shopping Hop" scheduled for October 20, featuring visits to several interesting shops in State College and the surrounding area. Other activities include a Champagne Dessert and Theatre Party with husbands as guests, an Athletic Event followed by a key party, an International Pot Luck Dinner and a Seminar.

For more information, call Mrs. Tresler 237-5426 or Mrs. Colton 237-9527.

Staff vacancies

This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Network Line 475-1387). Do not contact the area that has the vacancy. Applications for these staff vacancies will be accepted until:

5 P.M., Thursday, Sept. 20, 1973

SCIENTIFIC AIDE

INTERDISCIPLINARY RESEARCH PROGRAMS

University Park

Assist physicians with physical examinations, maintain examination and health records; draw blood and administer blood chemistry assays on blood and body fluids; records electrocardiograms and pulmonary diagrams; assists with variety of data gathering and logging tasks; supervises mounting and filing of tracings. A B.S. degree, or equivalent, plus two years lab experience are desired.

JUNIOR LABORATORY ASSISTANT

INTERDISCIPLINARY RESEARCH PROGRAMS

University Park

Responsible for conducting laboratory procedures to include animal handling and surgical preparation of laboratory animals. Assist in teaching in basic sciences and at least six months lab experience are desired.

LIBRARY ASSISTANT

Delaware County Campus

Responsible for assistance in all phases of library operations. Supervise part-time personnel working in the library. Oversee circulating program. Two years of college and two years of library work are desired.

RESIDENCE HALL HOSTESS

Bethlehem College

Responsible for the welfare, security and integrity of a Residence Hall or Area. Monitor visitors, assist new students with orientation to resident living. High school graduate and at least two years of business experience are preferred.

SENATE —

(Continued from page one)

gentina as part of a College of Agriculture team in the Rio Negro Valley.

"Fruit tree nutrition — particularly apples — was my responsibility, and I helped set up a plant analysis lab," he says. "My experiences abroad have made me feel strongly that when foreign students come to Penn State for their Ph.D.s, we should put them to work on problems similar to those they will eventually face in their own country instead of on sophisticated equipment they may never have the opportunity to use again."

An enthusiastic teacher, Dr. Bergman likes to provide an auto-tutorial component in his upper level course in plant nutrition.

"I travel a good bit," he says, "and wherever I go, I take my camera and keep on the lookout for plant nutrition problems. If I spot any specific one, I photograph it. Then I assemble my slides and record a taped commentary to accompany them, and make them available to students to watch for about an hour each week. They seem eager to see them. During the last six years, attendance in my class has increased from about six or seven to 45."

Before becoming Senate chairman, Dr. Bergman was chairman of the Faculty Affairs Committee as well as a member of the Advisory Subcommittee on Affirmative Action and the Faculty Rights and Responsibilities Committee.

"I hope that in the coming year the Senate will be an effective bridge between the administration and the faculty," he notes, "and that we can help the administration with some of its decision-making, especially in the area of personnel."

SCIENCE —

(Continued from page one)

will be the following from Penn State: Dr. Lewis, Dr. Wilfred T. Jewkes, professor of English; Dr. Robert F. Lima, professor of Spanish and comparative literature; Dr. Stanley Weintraub, director of the Institute for the Arts and Humanistic Studies; Dr. Richard G. Cunningham, vice president for research and graduate studies; Dr. Harrison T. Meserole, professor of English; Dr. Rusum Roy, director of the Materials

ially pertaining to academic and faculty affairs. Perhaps the Senate needs to become more active itself and initiate items present to the administration, rather than passively waiting until they come to us and say, "This is what we're doing. How do you feel about it?"

"I'm a great believer in keeping the faculty informed. They shouldn't have to find things out from the local newspaper. People can't work together effectively unless they communicate well. I think communication can do some improvement here."

Among the major issues which Dr. Bergman believes will confront the present Senate are unionization, curriculum view, external degree programs and credit accumulation methods. He is particularly pleased by the new faculty rights and responsibilities policy.

"For the first time, the faculty and the administration have an organ to go to for help when they need it," he points out. "I think it's a big step forward. Each college and campus will elect its own ombudsman to bring disagreeing individuals or groups together. Only when this solution has failed will a dispute go to the Senate Committee."

Although the job of Senate Chairman carries a heavy workload with it, Dr. Bergman intends to continue his longstanding interest in civic affairs. He has served on the Board of Adjustment in Ferguson Township and is a member of two different sewer authorities.

"I've found that it's surprising how much work you can get done," he says, "in the time you would have spent explaining why you couldn't do it."

Research Laboratory; Murray S. Martin, as associate director of Libraries.

In connection with the Conference, an exhibit will be on display in the Rahr Book Room of West estate. The exhibit will include the 1973-74 editions of the following works from the 18th and 19th centuries: original issues of pulp magazines; and modern hard-cover editions. A special display will include books and manuscripts of Philip Klann, who under the name of William Tenn is one of the country's leading science fiction writers.

Funding Opportunities

For more information, call 865-1372 except where noted below, and refer to the item by its number and the general information provided. People with specific information for dissemination in this column should call the same number.

SEPTEMBER 1, 1973

(91-1) The National Endowment for the Humanities Division of Public Programs has four programs with Oct. 15, 1973 deadlines as follows: Film/TV (6/15/74 deadline) in humanistic fields such as history, biography, linguistics, literature. These productions must be aimed at an adult audience. Development grants (1/15/74 deadline) includes pre-emptive Film/TV Grants to finance research and script writing.

(91-2) Interpretive Exhibition Grants (also 2/15/74, 4/15/74 deadlines) to provide a learning experience for visiting general public through use of collections employing interpretive methods to explain objects and show theme relationship.

(91-3) Community Education Grants (also 2/15/74 and 4/15/74 deadlines) to present seminars and other projects for planning and staging educational events, especially those reflecting local interests.

(91-4) Personnel Development Programs to support training projects aimed at encouraging and preparing individuals for leadership roles in museums and historical societies, specifically: graduate fellowship programs, internship programs, and seminars and other training.

(91-5) The National Science Foundation through a special program funded by the Agency for International Development (AID) will provide support for U.S. scientists and engineers to apply their experience to problems in 42 developing countries. Objectives will include: formulation and operation of research and education programs in these countries; exchange of personnel; and to increase the capability of their scientific and technical institutions. Research/Teaching Grants and International Travel Grants are available. Proposals deadline is Dec. 1, 1973. For additional information contact: Office of International Programs, NSF, Washington, D.C. 20550 (202) 632-8680.

(91-6) The National Endowment for the Humanities, Office of Fellowships and Stipends has four programs with Oct. 15, 1973 deadlines as follows:

(91-7) Fellowships for Younger Humanists (not degree candidates) including languages (linguistics, literature, history, jurisprudence, philosophy, ethics, comparative religion, anthropology, art, social science, humanities. Bilingual-related studies are encouraged. Stipends are \$1250/month maximum for 12 months.

(91-8) Fellowships and Summer Stipends for Junior

College Teachers (not degree candidates) to undertake humanistic studies to increase subject knowledge. Same stipend and tenure as above.

(91-9) Summer Stipends for college and university teachers (not degree candidates) covering the same scope of support as Fellowships for Younger Humanists above. Each institution may nominate three applicants. The stipend is \$2000 for two months in the summer of 1974. Contact B. A. Howell, 317 from Bldg. 565-2514.

(91-10) Fellowships in Selected Fields of (1) historical and social, and cultural studies of U.S. ethnic minorities, and (2) interrelations between human values and behavior. These fellowships are for degree candidates. The stipend is \$11250 for 6-9 months during 1974-75.

(91-11) A new research grants policy has been adopted by the National Institute of Education (NIE) whereby in addition to emphasis on the solution of problems in educational practice and other linkages among researchers, developers, and practitioners, NIE will also promote the development of new knowledge which strengthens understanding of the scientific and technological foundations of education. Individual scholars and research institutions will be invited to investigate these matters. Priorities will be identified and research supported. One such priority will be the education of personnel from low-income families and minority communities.

(91-12) The President's Commission on White House Fellows has announced it will accept applications for the 1973-74 Cohort. Clear 1973 to serve in Washington from Sept. 1, 1974 to Sept. 30, 1975. Applicants must be U.S. citizens at least 23 but not 38 by Sept. 1, 1974. Those serving are added to cabinet officers and officials are paid up to \$26,692 for the period. Institutions and service can be obtained from President's Commission staff, Room 5000, 1900 E. Street, N.W., Washington, D.C. 20015.

(91-13) Folger Shakespeare Library (O. B. Harrison, Director, Washington, D.C. 20003) has fellowships for graduate students and faculty wishing to work in the library. For further information write to address given. Application deadlines are Oct. 15 and Feb. 15.

REMINERS — DEADLINE DATES Oct. 15 for OE Cooperative Education Program Awards (Aug. 9 INTERCOM 292-4); for OE Faculty Research Grants (Aug. 9 INTERCOM 292-4); for OE Abroad (Aug. 16 INTERCOM 293-4); for NSF Instruction Improvement Implementation Program (Aug. 30 INTERCOM 294-4) and for NSF Local Action Grants (Aug. 30 INTERCOM 294-4). INTERCOM 296-2. Nov. 2 for NSF Undergraduate Research Participation Program, Nov. 16 for NSF Secondary School Student Science Teacher Program.

University Calendar

September 13-23, 1973

Special Events

Thursday, September 13 — Sports: Deadline for entries in intramural touch football, tennis singles, and team golf, 4:30 p.m., Room 206 Rec Hall.

Thursday, September 13 — Colloquy, 8 p.m., HUB ballroom. Gordon Dixon, Frederick Pohl and Theodore Sturgeon, science fiction writers, on issues of the future.

Friday, September 14 — Panel, 10 a.m.-3 p.m., HUB ballroom.

Friday-Saturday, September 14-17 — Annual Conference of the Science Fiction Research Association, Keller Conference Center. Sessions begin Friday, 8 p.m.; awards banquet, Saturday, 6:30 p.m.

Friday, September 14 — Commonsplace Coffeehouse, 8 p.m. Room 102 Kern.

Friday, September 14 — New Democratic coalition, 8-11:30 p.m., HUB ballroom.

Saturday, September 15 — Young Socialists, social, 7-12 p.m., HUB ballroom.

Saturday-Sunday, September 15-16 — Artists Series, "Godspell," 3 p.m., and 8:30 p.m., Schwab.

Sunday, September 16 — Chapel Service, 11 a.m., Eisenhower Chapel. Dr. John W. Brush, Andover-Newton Theological Seminary.

Sunday, September 16 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. The Reverend Loran Mann, Pittsburgh.

Sunday, September 16 — Sigma Delta Epsilon's Annual Fall Social for women in science, 2 p.m., Room 101 Kern. Mr. Gilbert Ward on "The Physics of Musical Sounds."

Monday, September 17 — Colloquy, 8 p.m., Schwab. Leslie Fiedler and Roger Zelazny, science fiction writing critics, debate on the field.

Tuesday, September 18 — American Welding Society, 7:30 p.m., Room 232 Hammond. D. J. Snyder, U.S. Steel Corp., on "Welding Quenched and Tempered Steel."

Tuesday, September 18 — English Colloquium, 8 p.m., Room 101 Kern. Michael Bell.

Wednesday, September 19 — Philip Oettra, piano recital, 8:30 p.m., Music Bldg. recital hall.

Wednesday, September 19 — "Ham's Wide World," film. Penn State Amateur Radio Club, 7:30 p.m., HUB assembly room.

Thursday, September 20 — Panel, 10 a.m.-3 p.m., HUB ballroom.

Friday, September 21 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, September 22 — Artists Series, National Ballet, 8:30 p.m., Rec Hall.

Saturday, September 22 — Free-U! social event, 7-11:30 p.m., HUB ballroom.

Saturday, September 22 — Sports: Women's golf, vs. SUNY-Brockport and Madison College, 10 a.m. Women's field hockey, vs. Wilson, 1 p.m., two games.

Sunday, September 23 — Community reception for international students, everyone welcome, 3-5 p.m., Grace Lutheran Church social rooms.

Sunday, September 23 — Chapel Service, 11 a.m., Eisenhower Chapel. Kenneth W. Hybert, education.

Sunday, September 23 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Films

Thursday-Saturday, September 13-16 — Arnold Air Society, "Summer of '42," 7 and 9 p.m., Room 105 Forum.

Wednesday, September 19 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "A Midsummer Night's Dream," James Cagney, Mickey Rooney, Olivia DeHavilland.

Friday-Saturday, Sept. 14-15 — Graduate Student Association series, "Alice in Wonderland," 8 and 10 p.m., Room 112 Kern.

Seminars

Thursday, September 13 — Agronomy, 3:55 p.m., Room 112 Kern. Dr. James B. Bartoo, Dean of the Graduate School, on "Problems Associated with the Graduate Academic Environment."

Thursday, September 13 — Chemistry, 12:45 p.m., Room 310 Whitmore. Dr. Daryle H. Busch, Ohio State, on "Metal Complexes of Macrocyclic Ligands."

Thursday, September 13 — Physics, 3:35 p.m., Room 117 Osmond. Or. George Lang, on "Mössbauer Spectroscopy of Biological Molecules."

Thursday, Sept. 13 — Anthropology, 3 p.m., Room 101 Kern.

Friday, Sept. 14 — Economics, 2:30 p.m., Room 101 Kern.

Monday, September 17 — Biochemistry, 11:10 a.m., Room 101 Althouse Lab. Alec D. Keith, biophysics, on "General Use of Molecular and Biological Probes for Studies of Membranes."

Tuesday, September 18 — Engineering Mechanics, 4 p.m., Room 215 Hammond. Dr. Eugen Skudrzyk, physics, on "Sound Radiation from Complex Vibratory Systems."

Tuesday, September 18 — Biochemistry, 11:10 a.m., Room 101 Althouse Lab. Alec D. Keith, on "Spin Label Studies of Biological Membranes."

Thursday, September 20 — Chemistry, 12:45 p.m., Room 310 Whitmore. Dr. Murray Goodman, U-Cal at San Diego, on "Peptides: Synthesis, Structure, and Biomedical Properties."

Thursday, September 20 — Physics, 3:25 p.m., Room 117 Osmond. Pierre M. Ramond, Yale University, on "Relativistic Composite Particles."

Thursday, September 20 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. Dr. James M. Beattie, Dean, College of Agriculture, on "Environmental Quality and Other Research Missions of Agriculture."

Lectures

Thursday, Sept. 20 — Art, 8 p.m., Zoller Gallery, Museum of Art. Sewell Silman, on "Josef Albers: Formulation-Articulation."

Wednesday, September 19 — 2:20 p.m., Room 230 Arts. Professor Colin M. Kraay, Keeper of the Hebrides Coin Room, Ashmolean Museum, Oxford, on "Timoleon and Corinthian Coins in the West."

Thursday, September 20 — Central Pennsylvania Society of the Archaeological Institute of America, 8 p.m., Room 112 Kern. Professor Colin M. Kraay on "Greek Coinage and History." Coffee hour will follow lecture.

Meetings

Thursday, September 13 — U.S.G. Academic Assembly, 7:30 p.m., Room 203 HUB.

Monday, September 17 — USG-Senate, 7:30 p.m., HUB assembly room.

Monday, September 17 — OTIS, 6:30 p.m., HUB assembly room.

Tuesday, September 18 — Liberal Arts Faculty, 3:55 p.m., Room 121 Sparks.

Tuesday, September 18 — Engineering Undergraduate Council, 7:30 p.m., Room 207 Kern.

Wednesday, September 19 — Graduate Council, 3 p.m., Room 101 Kern.

Wednesday, September 19 — A.W.S., 7 p.m., Room 233 HUB.

Thursday, September 20 — College of Education faculty, 3:45 p.m., Room 102 Kern.

Sunday, September 16 — Friends of India, 7 p.m., Room 12 Kern.

Interest Groups

Alpha Phi Omega, Mondays, 7 p.m., Room 308 Boucke.

Chess Club, Wednesdays, 6:30 p.m., HUB card room.

Chess Team, Thursdays, 6:30 p.m., Room 105 Sackett.

Eco-Action, Mondays, 8:30 p.m., Room 301 Boucke.

Focus on Sweden, Wednesdays, 7 p.m., Room 312 Boucke.

Gamma Sigma Sigma, Tuesdays, 7 p.m., Room 309 Boucke.

Interlandia Folk Dancers, Sundays, 7:30 p.m., HUB ballroom.

Young Socialists, 7:30 p.m., Mondays, Room 167 Willard; Wednesdays, Room 62 Willard.

S.I.M.S., Thursday, September 13, 8 p.m., Room 101 Chambers.

Thursday, September 13 — Orchestra, (old members) first meeting, 6:30 p.m., White.

Sunday, September 16 — Penn State Sports Car Club Autocross, 12 noon. Parking Lot 80. (Entries accepted at 10:30 a.m.)

Monday, September 17 — Color Slide Club, 7:30 p.m., Room 112 Kern.

Tuesday, September 18 — Rifle Club, women, 7 p.m., White.

Tuesday, September 18 — Orchestra, old and new members, 6:30 p.m., White.

Tuesday, September 18 — Fencing Club, 7 p.m., White.

Tuesday, September 18 — American Welding Society, 7:30 p.m., Room 232 Hammond. D. J. Snyder, U.S. Steel Corp., on "Welding Quenched and Tempered Steel."

Tuesday, September 18 — PSOC, Mountaineering division, 7:30 p.m., Room 214 Sackett.

Tuesday, September 18 — PSOC, Equestrian division, 7:30 p.m., Room 111 Animal Industries. Film.

Wednesday, September 19 — Gymnastics clinic (women), 7 p.m., White.

Wednesday, September 19 — PSOC Ski division, 7:30 p.m., Room 121 Sparks.

Thursday, September 20 — Women's Modern Dance Interest Group, 6:30 p.m., White.

Thursday, September 20 — PSOC, Canoe division, 7:30 p.m., Room 214 Boucke.

Artists Series

Should any tickets for the four performances of "Godspell" on the Artists Series remain, they will go on sale tomorrow (Friday, Sept. 14) at 9 a.m., in the HUB.

"Godspell," the hit musical show based on The Gospel According to St. Matthew, will be performed in Schwab Auditorium Saturday and Sunday, Sept. 15 and 16, at a 3 p.m. matinee and an 8:30 p.m. evening show both days.

The second Artists Series program will feature the National Ballet Saturday, Sept. 22, in Recreation Building, and tickets will go on sale to the general public Wednesday, Sept. 19, at 9 a.m., in the HUB. For students only, the sale will be on Tuesday, Sept. 18, at 9 a.m. in the HUB.

The National Ballet, founded in 1962 as the resident company of Washington, O.C., gave its first performance in January, 1963, and won instant praise from critics. Through this decade it has continued to gain fame, under the direction of Frederick Franklin and Ben Stevenson.

Scene from the hit musical, "Godspell," to be performed twice each day, Sept. 15 and 16 in Schwab Auditorium, on the Artists Series. The play won the Drama Desk and the National Theatre Arts Council Awards as well as the 1971 Grammy Award.

Official

Friday, September 14 — Last date for registering with foreign language departments other than French and Spanish for written language examinations.

Wednesday, September 19 — Add period ends, 5 p.m.

Exhibits

Pattee Library, Circulation Lobby — "Retrospect," multi-media drawings and paintings by Janet L. Dougherty.

Museum of Art — PSU Faculty Graphics. Gallery A, until September 16.

Kern Gallery — Shirley Sturtz, jewelry, prints, paintings, until September 22.

Paul Jay, pottery.

Zoller Gallery, Visual Arts — New Faculty Show, until September 16. Silman and Albers, opens September 19.

Wilkes-Barre Campus faculty and staff members made out well in their back-to-mature, beat-the-high-cost-of-living project this summer. Secretary Lorraine Mackowski, engineering professor Walter Sowa, and counselor Robert L. Sabatino stand in the middle of their successful gardens.

Wilkes-Barre faculty's success at gardening helps beat living costs

Wilkes-Barre Campus faculty, staff, and administrators settled on one sure method — Nature cooperating — to battle the cost of living increases by planting vegetable gardens on the campus last spring and have now completed a successful harvest of products for canning, freezing, and table use.

Campus director George W. Bierly announced in March that if enough faculty and staff expressed interest in "cost of living" gardens, he would set aside an area of the campus for the purpose. The response was slightly overwhelming. Walter Sowa, who as associate professor of engineering was the most logical person to

be picked for the job, was commissioned to lay out the garden plots and assign them to the interested people.

The scene ultimately was somewhat reminiscent of "Victory Garden" days of World War II. Soon faculty and staff members and their families were spending many evenings and weekend hours carefully nursing their crops, removing stones, raking, hoeing, etc.

The result of the hard work was a bountiful crop of corn, peppers, tomatoes, beans, carrots, peas, squash, parsley, radishes, cucumbers, and red beets. Still to be harvested is an apparently good crop of potatoes.

New leave of absence policy for students will begin Winter Term

A leave-of-absence policy for students, developed by the Division of Admissions, Records and Scheduling, will go into effect in the Winter Term, which begins December 6.

The plan is designed to allow students greater flexibility in their programs of study and, at the same time, provide faculty and administrators the means by which to plan for a student's return to the University.

For the present, the leave of absence option will be available only to associate and baccalaureate degree students and carries a four-term or one-year limit. However, under special circumstances, it will be possible to extend the leave period to a maximum of eight terms or two years.

The option is to be available at the University's 17 Commonwealth Campuses and the Behrend College, as well as at University Park Campus.

Under the procedure, a student wishing to take a leave will complete the required form and submit it to the Records Office at University Park. The dean of the student's college at University Park or the director of his campus will determine a stu-

dent's eligibility to take a leave of absence. Generally, any student who would continue in his program for the next term if he remained consecutively enrolled would be approved for a leave of absence.

The student will return for registration for the term indicated on his request form.

If a student returns earlier or later than he has specified, he must apply for readmission. If degree requirements change while a student is on leave of absence, he will be held to those requirements in effect prior to his taking leave.

It is expected that the new option will be helpful in encouraging students to attend Penn State under a flexible attendance pattern.

According to Warren R. Haffner, director of the Division of Admissions, Records and Scheduling, department personnel will be able to project course offerings and requests, based on the number of students who are returning for a particular term.

At the same time, he said, administrators will be able to plan for students' returns as far as University planning and facilities are concerned.

A lap in 90 seconds to break mark

Faculty in 60-mile race Sunday

Twelve ambitious Penn State faculty and staff members — average age 37.5 years — will attempt to break a world's record for Seniors running a team race of 60 miles.

The event is scheduled for Sunday, Sept. 16, starting at 1 p.m. at the all-weather track of the State College High School. The team was organized by Dr. John Lucas, associate professor of physical education, who has actively promoted running here as a physical fitness activity for faculty members.

The record that the team will attempt to break was made recently by Southwest Missouri College, which completed a 60-mile run in 6 hours, 55 minutes and 21 seconds.

The Penn State team will include the following, each of whom will run five miles:

Dr. Harry Gahagan, physical education; Dr. John White, horticulture; Dr. G. Thomas Tait, physical education; Kent Addis, Continuing Education; Dr. Robert Farwell, Ap-

plied Research Laboratory; F. Wally Luter, Conference Center; Dr. David R. Vomer, electrical engineering.

Also, Dr. T. V. Hershberger, animal nutrition; Dr. Richard B. Mansfield and Dr. Torrence Parsons, both mathematics; Dr. Peter Cavanagh, biomechanics; and Dr. L. Colton, Penn State Foundation.

Should any of the original 12 be required to drop out, seven alternates will be available. Dr. J. J. Coyle, business logistics; Dr. Herschel Leibowitz, psychology; Mark D. Johnson, political science; Dr. George Etzweiler, electrical engineering; Dr. M. T. Pigott, Applied Research Laboratory; Dr. Richard J. Bord, sociology; Dr. Harry Groves, physical education; Dr. Forrest Long, horticulture.

The participants will be expected to run five continuous miles; it is hoped that they will run each quarter-mile lap in 90 seconds or less in order to break the record.

Colloquy talks on science fiction

The first 1973-74 program of the newly reorganized COLLOUUY will continue today (Thursday, Sept. 13) with additional discussions by science fiction writers attending the conference of the Science Fiction Research Association to be held in the J. O. Keller conference center.

The COLLOUUY program opened yesterday with a talk by John Brunner, of England.

The talks today will center around issues of the future, with writers Gordon Dixon, Science Fiction Writers of America; Frederick Pohl, of Bantam Books; and Theodore Sturgeon, "New York Times Book Review." The session will be held at 8 p.m. in the HUB ballroom, and a reception will follow in the HUB reading room.

On Monday, Sept. 17, Leslie Fiedler, of SUNY-Buffalo, and Roger Zelazny, Science Writers of America, will debate the subject of science fiction writing. The session will be held in Schwab Auditorium at 8 p.m.

All of these sessions are sponsored by COLLOUUY and are open to everyone.

NEWS —

(Continued from page one)

of activities with the Department of French. President of the organization currently is Mme. Lucie Heymann, 237-5167, who may be contacted for more information and enrollment in the group. Honorary president is Dr. Laurent LeSage, professor of French.

INVENTION PATENTED

James D. Weir, assistant professor of engineering research at the Applied Research Laboratory, is the inventor of a transistor delay line driver for which U. S. Patent No. 3,750,040 has been granted. The invention relates to a transistor current amplifier that incorporates a high-gain amplifier consisting of a regular transistor with a Field Effect Transistor as the collector load. This is followed by Darlingtontype transistors that provide bias current and feedback through an input resistor between emitter and ground of the high-gain amplifier. Output is taken from the collector of the Darlington pair.

APPOINTED TO COMMITTEE

Dr. Rustum Roy has been appointed to the joint Advisory Committee of the National Endowment for the Humanities and the National Science Foundation on the Ethical and Human Value Implications of Science and Technology. Dr. Roy, director of the Materials Research Laboratory, has been active both on and off campus in the area of concerns encompassed by the Committee, which has been charged with providing guidance to national programs in that area.

SILKSREENS AND DRAWINGS

The Zoller Gallery (Arts Building) exhibit opening September 19 is an unusual display of a portfolio-book of silkscreens made by Sewell Silman of a selection of works of artist Josef Albers.

Silman, as a partner of designer Norman Ives, pioneered the portfolio-book art form in this country and is a specialist in color and silkscreen processes. He will visit

Children's games classes scheduled

Registration will be held Monday through Wednesday of next week (Sept. 17-19) for enrollment of children in games and gymnastics classes conducted each year by the College of Health, Physical Education and Recreation.

The classes, for children of faculty and staff members and other area residents will meet Wednesday and Thursday afternoons, beginning the week of Sept. 17 and continuing through the week of Sept. 24. Children should be enrolled for one class only; two selections will be scheduled each afternoon, one class for children first and second grades and another for those in grades three and four.

The number is limited in all classes a selection will be made in order of registration, which must be accomplished either the child or the parent; aquatics not register for children of another family.

Registration will be carried out in Room 145 White Building from 9 a.m. to noon and 2-4 p.m. each of the three days.

the department of art Sept. 19, 20, and 21, lecturing and working with students. He will give a public lecture Thursday, Sept. 20, at 8 p.m. in the Gallery, discussing the portfolio-book, "Josef Albers: Formulation, Articulation," and his own drawings, some of which will be exhibited also in the Zoller Gallery.

Albers, German-born artist, came to the U.S. in 1933 and in 1950-58 served as head of the Yale University art department. He has gained many laurels both in Europe and in this country.

ARTWORK WANTED

Anyone interested in exhibiting original art work, handmade articles, or items of educational interest in Pattee Library asked to contact Linda Viau, in charge of exhibits for the library, at 865-9551. Several areas of the library are given over to displays of paintings, crafts, and other art media works provided by student faculty and staff, and area residents.

CHAPEL COFFEE

Preceding the weekly nondenominational religious service in the Helen Eakin Elstower Chapel each Sunday at 11 a.m. (services Sept. 28 and Oct. 30 are in the Music Building recital hall), an informal coffee "half hour" will be held in the Chapel lounge. Coffee, doughnuts and juice will be available. Chapel services are for all students, faculty, staff and area residents, and they are also welcome at the pre-service get-together.

AUTOCROSS SCHEDULED

The Penn State Sports Car Club combining with the General Pennsylvania Region, Sports Car Club of America, staging an "Autocross" Sunday, Sept. 16. In Parking Lot 80 (along Park Ave., west of East Halls). Registration of cars for the event will begin at 10:30 a.m.; the first event will begin at 12 noon. Prizes will be awarded to winners in each of the various classes and will be awarded.

The Penn State Sports Car Club, in cooperation with the Central Pennsylvania Region Sports Car Club of America, will stage an Autocross Sunday, Sept. 16, in Parking Lot 80 (the area along Park Road, west of East Halls). The race against time starts at 12 noon, but cars entered will be registered beginning at 10:30 a.m. There is no admission charge for spectators. Prizes are awarded to winners in various classes.

News in brief

CREATIVE DRAMA

Registration for Children's Creative Dramatics classes, conducted by Helen Manfull in the department of theatre arts, is now underway, and may be made by calling 865-7586. The classes will be held Tuesdays and Thursdays, beginning Sept. 25 and ending Nov. 15. Children enrolled in kindergarten will attend from 2:20 to 3:20 p.m., and those in fifth and sixth grades will attend from 3:45 to 4:45 p.m. The classes will be held in Pavilion Theatre. The classes give graduate students in theatre arts a laboratory experience in directing creative drama, which serves to develop the imagination and creativity of the participants.

ARCHITECTURAL MODELS

On display in the Gallery, third floor of Sackett Building, is an exhibit of architectural models designed by 20 students under the direction of Harold R. Lawrence, assistant professor of architecture. The displays, single- and three-dimensional, will

remain until Oct. 5. They demonstrate the students' diverse approaches to understanding the integrative development of systems, considered an essential part of their architectural education.

HERSHEY CLASS

A record enrollment of medical students at the Hershey Medical Center has been set with the registration of 307 students for the current term. In part, the record has been set because the largest entering class, 86, was admitted this term; the new admissions double those of the first class in 1967. The total number of persons in training — including graduate students, nursing students, physician assistants, postdoctoral fellows and hospital residents — has topped 520.

GYMNASTICS CLINIC

Margaret Gilmour, former Penn State gymnast and a nationally rated USGF-DGWS judge, will conduct a workshop, Saturday, Sept. 22, for anyone interested in learning the USGF-DGWS Gymnastics Compulsory Routines for girls. The workshop will be held in the Gymnastics Room in White Building, beginning at 10 a.m. Fur-

ther information may be obtained from Elizabeth Hanley, women's gymnastics coach from 1969 to 1972 and now a judge herself.

HORT SHOW UPCOMING

The 60th annual Horticulture Show, staged by the Horticultural Club as a feature of Homecoming Weekend, will be held at the Ice Rink Pavilion Saturday and Sunday, Sept. 29 and 30. The show will be open from 10 a.m. to 8 p.m. Saturday and 10 a.m. to 4 p.m. Sunday. Five exhibits and a sales area will occupy the 10,000 square feet of exhibit area. At the close of the show Sunday, many plants used in the exhibits will be sold.

NURSES CONFERENCE

Nurses from the Commonwealth Campuses are taking part in a two-day Student Health Services Conference today and tomorrow at the Nittany Lion Inn.

The conference has been organized by Dr. Ralph E. Pilgram, associate medical director of University Health Services for the Commonwealth Campuses.

Members of the medical and dental staff

(Continued on page four)

"Alberto," an oil painting on canvas by Giovanni Giacometti, is one of many works by "Three Swiss Artists" to be exhibited at the Museum of Art beginning Sunday.

Exhibit of three Swiss artists opening Sunday

The unique combination of personnel and facilities at Penn State were credited by Dr. Walters added, "that the quality of the Museum of Art is a credit to the quality of the University." The paintings will be shown at the Guggenheim Museum in New York, at Harvard University, and in the Utica, N.Y., museum.

The exhibit includes works by Augusto Giacometti, Giovanni Giacometti, and Cuno Amiel, all born in Switzerland between 1863 and 1877. Augusto, father of the sculptor Alberto Giacometti, produced a pair abstract painting in 1898, 12 years before the famous watercolor of Russian abstract painter Kandinsky, who with Paul Klee was said to have initiated German expressionism.

Dr. George Mauner, professor of art history, and William Hull, Museum director, have arranged the exhibit. In conjunction with it, a color film of the life and art of Amiel will be shown at the Museum at designated times to be announced.

Also, a piano recital will be held in the Museum Gallery C, Sunday, Oct. 7, by the Swiss concert pianist, Elisabeth Helm, a music professor at the university at St. Gallen. The recital, at 3 p.m., will require tickets, which will be sold at the Museum store beginning Oct. 2.

Skylab pilot is Alumni Fellow

Capt. Paul J. Weltz, USN, who piloted the Skylab II spacecraft, will serve as an Alumni Fellow Sept. 27-29, giving a public lecture Thursday at 8 p.m. in Recreation Building.

Tickets of admission will be required, but they are free of charge; they may be obtained from the Alumni Association.

(Continued on page four)

Doesn't fit the common image of a reclusive librarian

Stuart Forth seeks student, faculty contacts

The office of Penn State's recently arrived dean of libraries is on the top floor of Patton's new east wing. It's a spacious room with a view through the tree tops, and Dr. Stuart Forth is enjoying it — with reservations.

"The faculty and librarians I've met since I came here in July are an exciting group," he says, "and I'd like to get to know more of them. This office is so far off the beaten path, however, that I'm afraid it will prevent people from dropping in just to visit and to offer suggestions or complaints."

"I'd like the academic community to

know that if they tell me what their problems are, we'll help them if we can. If we can't, I'll tell them that, too, and try to work out some way to make things happen."

Dean Forth came to Penn State from the University of Kentucky, where he was director of libraries and a professor of library science. Further proof that he does not fit the popular image of the reclusive librarian emerges from a glance at his activities there. In addition to his professional duties, he served as acting vice president for student affairs from 1968 to 1970 — during

what were probably the worst two years of the century to hold such a post.

"I like working with students," he says, "and I knew a lot of them socially from having served as an advisor to various student groups. But I was still surprised when, in the course of a courtesy call on the new president of the University, I asked him if there was anything I could do to help, and he immediately said yes, would I take the job on an acting basis until they found someone else."

"That search took two years. At first, our situation wasn't too bad despite all the troubles at other campuses, since the University of Kentucky student body was pretty conservative. However, when the Governor sent the National Guard to our campus in the aftermath of Kent State, the students worked up their concerns."

Throughout, Dean Forth managed to retain his support with most campus groups, to the extent that the very student newspaper which had frequently attacked his policies turned around and elected him president of its board of directors after he stepped down from his student affairs position.

"With typical student casualness, they didn't bother to tell me of my election," he recalls, "and I read about it in the Louisville paper."

Because of his genuine interest in undergraduates, Dean Forth is excited about the potential inherent in Penn State's undergraduate libraries.

"It's expensive, because you have to duplicate some resources and services, but with a big student body, the opportunity exists to reach out to them and teach them how to use the library's research collections," he explains. "It is one of the library's major responsibilities."

"I'm astonished by how many students don't know a bibliography from a hockey puck. Some departments offer good bibliography courses, but they rarely venture outside their field, and too often students are just thrown out to sink or swim."

A native of Michigan, Dean Forth re-

(Continued on page four)

Dr. Stuart Forth, dean of libraries, seeks faculty contact.

Death

Col. William H. Cox, admissions director for veteran and freshman counselor, died Sept. 10, while in his office. He was 56, retired for five years from the U.S. Army, having served for 28 years. A graduate of West Virginia University with a B.S. in agriculture in 1940, he earned his commission as a second lieutenant in the Infantry. He entered into active duty in 1942, after working for the U.S.D.A. for two years. In 1950-53 he served as an associate professor of military science at Penn State and in 1955-58 was at the University of Richmond as professor of military science. In World War II he served in Europe, and his active service also took him to Thailand, Greece, and Washington, D.C. He won the Legion of Merit.

Honors

Dr. Carl S. Bittner, professor emeritus of horticulture extension, has been elected Fellow of the American Society for Horticultural Science. Appointed to the Extension Staff in 1947, he retired in 1970.

Leave

Dr. James Kollias, associate professor of applied physiology, began a year's leave of absence Sept. 1 in order to join a team of researchers at NASA's Ames Research Center for a study of the effects of bed rest and physical reconditioning on women. He has been awarded a senior post-doctoral resident research associationship by the National Research Council. Dr. Kollias helped to design the study, and his particular interest is in the changes of physical work capacity and fluid and electrolyte balance in space. NASA has initiated a study on the tolerance of women to various environmental conditions, because it is presumed that they will join space crews in the future.

Staff vacancies

This announcement is made so that all university employees who are interested in promotion may apply by calling the Employment Office, 865-1387 (Newline 454-1387). Do not contact the area that has the vacancy. Applications for these staff vacancies will be accepted until:

5 p.m., Thursday, October 4, 1973

ADMINISTRATIVE ASSISTANT

COLLEGE OF EDUCATION

University Park

Responsible for assisting in the administration of department educational programs, including the scheduling of classes and the coordination of admissions. A Bachelor's degree and at least two years of related administrative work are desired.

ART ASSISTANT

CONTINUING EDUCATION

University Park

Responsible for the design and execution of art work, as assigned, for use in television or film production, for public display, or as visual aids for lectures, conferences, etc. A Bachelor's degree in Art, or equivalent, from an art institution and at least two years of related experience in television or film set design or construction are desired.

ASSISTANT FILM COORDINATOR

CONTINUING EDUCATION

University Park

Responsible for providing film services to the various production and programming areas, including the scheduling of personnel and equipment. A Bachelor's degree in broadcasting, journalism, or a related field and at least two years of experience in this field are desired.

ADMINISTRATIVE ASSISTANT

Hershey Medical Center

Responsible for business and administrative functions of the department, including budgetary responsibilities, personnel administration, purchasing, departmental operational policies, and liaison with other departments. This is an individual vacancy basis. Applications for such positions may be made at any time and we are welcome to make inquiries known near to the Employment Division for future consideration when vacancies occur. These positions are:

At Hershey Medical Center — Registered Nurses; Practical Nurses; X-ray Technologists; Medical Technologists (ASCP); Cardiology Technician; J.R. Research Technicians.

SERVICE AWARD

Dr. C. Leonard Feigus, left, professor of botany, received the 23rd Year Service award from College of Science Dean Thomas Wauk recently. A graduate of Ottawa (Kansas) University, with a degree in biology-chemistry, he received a master's degree from Kansas State University in 1942, after serving there as a graduate assistant for two years. He was a lieutenant in the U.S. Navy for the next three years. In 1948 he came to Penn State as instructor in botany and received his Ph.D. in botany; the following year he was named assistant professor, was advanced to associate professor in 1953 and full professor in 1960. He was interested in oak wilt disease early in his career, identifying the disease in the Commonwealth in 1950. In 1962 and again in 1969 he spent six months in Switzerland, primarily at the E. Heuser Champignon Laboratories near Zurich, in his research on fungi and mushrooms. He prepared a manual on "Illustrated Genera of Wood Decay Fungi," published by Burgess Publishing Co. in 1962 and is the author of "Laboratory Guide to Studies in Botany," published by William C. Brown in 1967. He has served as the editor of the publication "Phytopathology."

All faculty, staff eligible for membership

Credit union expanding services

Now in its 14th year of operation, Penn State's Credit Union is seeking to expand its activities both at University Park and the Commonwealth Campuses.

Credit unions are savings and borrowing institutions which a group of people are allowed by law to set up for their own benefit. They are membership corporations chartered by the state or federal government.

Membership in Penn State's Credit Union is open to any full-time or part-time employee of the University or to members of their immediate family living under the same roof. To join, a membership fee of 25 cents is required plus a purchase of at least one \$5.00 share.

With their shares, members become part owners of the Credit Union and have one vote at all membership meetings. Because the Credit Union operates in accordance with federal laws — including those requiring adequate reserves — each account insured up to a maximum of \$20,000 with the National Credit Union Administration, a government agency.

Every dollar which a member saves, up to \$2,000, earns free life insurance benefits, provided he or she is between the ages of six months and 55 years. There are no physical examinations and very liberal health requirements. Reduced life insurance benefits are included for shares purchased between ages 55 and 70 years.

This life insurance remains in force for as long as members leave their shares in the Credit Union. In the event of death, the designated beneficiary receives the insurance money earned.

Shares purchased by the tenth day of the month earn dividends from the first, and during the first two quarters of 1973, dividends were paid at an annual rate of 5.25 percent. Dividends for the third quarter have been declared at 5.50 percent.

Members who wish to take advantage of Credit Union loans may borrow up to \$2,500 without security. For loans over this amount, security is required or a co-signer. Automobile and mobile home purchases are frequently financed.

Current interest rates, as established by the Board of Directors, are one percent per month on the unpaid balance of the loan, an annual percentage rate of 12 percent. Within the time limit set by law, terms of repayment are arranged to fit the needs of individual members.

All loans are insured at no cost to members. If a member dies before age 70 or becomes totally or permanently disabled before age 60, the loan balance is paid up to the maximum of \$10,000.

Faculty or staff at the University who may be paid monthly or biweekly on a regular basis can purchase shares in the Credit

Dr. James C. Wambold, left, president of the Penn State Federal Credit Union, and Raymond Dimeo, a director, go over plans for adding to the services the Credit Union provides to its members.

Union or repay loans by authorizing payroll deductions. Authorization cards are available from the Credit Union office located in the Telephone Bldg. at University Park. The phone number is 863-0265.

Beginning modestly in 1959, Penn State's Credit Union had assets of \$1,217,021 and a membership of 2,126, as of Aug. 31, 1973. Its administrators, who serve without pay, include: James C. Wambold, president; Norman Sud, treasurer; Anthony V. Williams, secretary; and Richard A. Keppeler, Geraldine Gage, and Raymond Dimeo, directors.

The Supervisory Committee is composed of George E. Olson, chairman; Bruno J. Martini, secretary; and John E. Olson, William E. Toombs serves as chairman of the Credit Committee and Harold F. Graves as its secretary. Members are Bernard Wydra and Michael Futrick.

Women's clubs hold reception

A joint reception of the Faculty Women's Club and Newcomers' Club will be held Tuesday, September 25, from 7:30 to 9:30 p.m. in the Hotel Union ballroom.

All faculty women and all wives of faculty members and administrators including staff exempt positions are invited to attend. Wives of visiting faculty and visiting faculty women are invited to attend also. A courtesy membership is extended to those who are here for six months or less. Questions concerning eligibility should be directed to Mrs. William Christoffers, 237-2366.

Mrs. John Oswald, honorary president of the Faculty Women's Club, will receive guests along with Mrs. Rodney Rhodes, president of the Faculty Women's Club, and Mrs. Richard Tressler, president of the Newcomers Club.

Funding opportunities

For more information, call 865-1372 except when noted below, and refer to the item by its number and the general information provided. People will grants information for dissemination in this column should call the same number.

September 20, 1973

(98-1) The U.S. Department of Interior Office of Water Resources Research (OWRR) now accepting unsolicited research proposals in the field of water resources for consideration for FY1975, beginning July 1, 1974. Proposals may be submitted at any time, but FY1975 supports will be considered only for the proposals received Jan. 11, 1974. Proposal materials, the procedure for submitting proposals, and other information are available from Dr. A. J. McDonnell, Director of Penn State's Water Resources Center, Land & Water Research Building (865-3933). Although OWRR will consider the eleven research subject areas funded last year, this year primary emphasis will be directed toward certain priority objectives of the Dept. of the Interior. These objectives include: solving of energy problems; encouraging Indian self-determination and improvement in the quality of life on Indian reservations; solving land use problems; and providing for the conservation of scarce water and water-related resources compatible with the environment, etc., i.e. recycling, irrigation, etc.; and improving the quality of our physical environment. Early contact with A. J. McDonnell is suggested.

(98-2) The National Academy of Sciences announces opportunities to exchange visits in its USNR and USNR-Europe in Academic Year 1974-75 in the physical and biological sciences including mathematics and engineering sciences, and social and behavioral sciences. Any American scientist is eligible for consideration if he possesses the doctoral degree or would receive it prior to the exchange visit. Visits are for a one-month familiarization or three to twelve months for research. Loss of salary up to \$1500 per month is paid plus other allowances and travel. The application deadline is Nov. 21, 1973 but preliminary inquiries must be received by Nov. 7, 1973. For information and forms write to: Office of the Foreign Secretary (USNR/EE), National Academy of Sciences, 2101 Constitution Ave., N.W., Washington, D.C. 20418 (202)961-1228.

(98-3) To help educational institutions in provide instruction and more effective use of resources in the humanities, the Education Division of the National Endowment for the Humanities supports Project, Planning, Program, and Development grants. Project and Planning grants have Nov. 1 deadline — earlier draft proposals are needed (end deadline May 15). Project grants are to develop and test innovative approaches to humanities education especially to provide models for other institutions. Specific areas of research priority include: experiments in humanistic education; development of teaching materials, educational use of libraries, training institutes, conferences, and development of interdisciplinary courses and programs; 10% cost sharing is required on awards above \$25,000. Planning grants are for progressing from identified areas to the development of a formula for improving the status of humanities. These grants are usually limited to \$50,000 for a 12-month period. Contact Dr. Roy Rosenblatt, Director, Div. of Education, NEH, 80 15th St., N.W., Washington, D.C. 20506 (202)351-5881.

(98-4) The Division of Research Grants, National Endowment for the Humanities, considers applications for support of original, basic research, and editing projects in the humanities. Proposals for supporting the humanities are also invited. Projects bearing on major areas of current temporary public concern are of special interest. Projects contributing to the forthcoming 8th centennial of the American Revolution. Few grants exceed \$35,000. The next two deadlines are Nov. 19 and May 7, but earlier contact with the Division is encouraged. For this purpose contact: D. Wambold, 20418 (202)351-5881. Contact Dr. Roy Rosenblatt, NEH, 806 15th St., N.W., Washington, D.C. 20506 (202)382-5857.

(98-5) Committee on International Exchange of Persons (CIP) Constitution Ave., Washington, D.C. 20540 has announced the award of 23 Fulbright-Hays awards for younger scholar to 1974-75 involving lecturing in American Studies in Belgium, France, Germany, Italy, and the Netherlands in Belgium. These are intended primarily for post-doctoral scholars. The application deadline is Nov. 1, 1973. For further information and application blanks write to address given above.

(98-6) International Research and Exchange Board (IIR) 59th St., New York City, announces positions for faculty and graduate students wishing to conduct research in the USSR. Deadline for applications Nov. 1 (students), Dec. 1 (faculty). Grants cover travel, subsistence, and community educational grants. Personnel Development Programs, Fellowships for Younger Humanities, Summer Stipends and Selected Grants, and Summer Stipends. For more information write to: IIR, 59th St., New York City 10019. For NSF Student Original Studies program fall Sept. 6 INTERCOM 956-1.

REMINDERS DEADLINE DATES

Oct. 15 for NSF Institution Implementing Programs (Aug. 30 INTERCOM 955-4); for NSF Latin American Cooperative Science Program (Sept. 6 INTERCOM 956-2); and for NSF Film Grants, Exhibition Grants, Community Educational Grants, Personnel Development Programs, Fellowships for Younger Humanities, Summer Stipends and Selected Grants, and Summer Stipends. For more information write to: IIR, 59th St., New York City 10019. For NSF Student Original Studies program fall Sept. 6 INTERCOM 956-1.

University Calendar

September 20-30, 1973

Special Events

Friday, September 21 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Saturday, September 22 — Women's gymnastics workshop for compulsory routines for girls, 10 a.m., White Building.
Saturday, September 22 — Artists Series, National Ballet, 8:30 p.m., Rec Hall.
Saturday, September 22 — Free-U jammy, 7-11:30 p.m., HUB ballroom.
Saturday, September 22 — Sports: Women's golf, vs. SUNY-Brockport and Madison College, 10 a.m. Women's field hockey vs. Wilton, 1 p.m., two games.
Sunday, September 23 — Chapel Service, 11 a.m., Eisenhower Chapel. Kenneth W. Hyibert, education.
Sunday, September 23 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Reverend Robert G. Murray, Durham, N.C.
Sunday, September 23 — Community reception for international students, everyone welcome, 3-5 p.m., Grace Lutheran Church social rooms.

Sunday, September 23 — Pre-Vet Club faculty-student picnic, 3 p.m., dinner at 4:30 p.m., Sunset Park, N. McKee St. (Sign up at 111 Animal Industries by Sept. 21.)
Monday, September 24 — Flag Football (Co-ed) Intramurals, entries due 4 p.m., Room 105A White.
Tuesday, September 25 — Faculty Women's Club-Newcomers Club reception, 7:30-9:30 p.m., HUB ballroom.
Tuesday, September 25 — Comparative Literature Luncheon, HUB Dining Room A, 12:15 p.m. Stuart Fort.
Tuesday-Wednesday, September 25-26 — Free U registration for Fall Term courses, HUB assembly room, 9 a.m. to 4 p.m.
Wednesday, September 26 — Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.
Thursday, September 27 — German Forum, 7:30 p.m., Room 124 Sparks. Otto Poegele.
Friday, September 28 — Artists Series, Seth McCoy, tenor, 8:30 p.m., Schwab.
Friday, September 28 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.

Friday, September 28 — Groove Phi Groove, 10 p.m.-3 a.m., HUB ballroom.
Friday, September 28 — Freshman Football vs. Middle Academy, 3 p.m.
Friday, September 28 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Saturday, September 29 — Penn State Glee Club Homecoming Concert, 7 p.m., HUB ballroom.
Saturday, September 29 — Football, vs. Iowa, Beaver Stadium, 1:30 p.m., Homecoming.
Saturday, September 29 — Concert Committee Program, 8 p.m., Rec Hall.
Saturday, September 29 — PSOC Sailing Division Regatta, noon, Stone Valley.
Saturday, September 29-30 — Horticulture Show, Ice Rink Pavilion. Open Saturday, 10 a.m. to 10 p.m.; Sunday, 10 a.m. to 4 p.m.
Sunday, September 30 — Chapel Service, 11 a.m., Music Bldg. recital hall. Luther Harshbarger, religious studies.
Sunday, September 30 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Reverend M. B. Spiller, St. Paul's AME Church, Bellefonte.

Tickets for the talk by Alumni Fellow, Capt. Paul J. Weitz, USA, Skykay II pilot, to be held Thursday, Sept. 27 at 8 p.m. in Rec Hall are now being distributed, free of charge, at the HUB, the Alumni Office in Old Main and in Room 101 Hammond Bldg.

Seminars

Thursday, September 20 — Chemistry, 12:45 p.m., Room 310 Whitmore. Dr. Murray Goodman, U-Cal at San Diego, on "Peptides: Synthesis, Structure, and Biomedical Frontiers."
Thursday, September 20 — Physics, 3:25 p.m., 117 Osmond. Pierre M. Ramond, Yale University, on "Relativistic Composite Particles."
Thursday, September 20 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. Dr. James M. Beattie, Iowa College of Agriculture, on "Environmental Quality and Other Research Missions of Agriculture."
Thursday, September 20 — Engineering Acoustics, 4 p.m., Room 71 Willard. Oliver H. McDaniel, mechanical engineering, on "Sound Absorbing Materials."

Thursday, September 20 — Meteorology, 3:55 p.m., Room 26 Mineral Science. Dr. Ron Schwiesow, National Oceanic and Atmospheric Administration, Environmental Lab., on "Meteorological Applications of Doppler Lidar."
Monday, September 24 — Entomology, 4 p.m., Room 204 Patterson. Dr. Charles Schwalbe, on "Relationships between 'Trogoderma Glabrum' and a Protozoan Pathogen."
Monday, September 24 — Analytical Chemistry, 1 p.m., Room 310 Whitmore. Dr. T. H. Risby, on "Thesis Topics in Analytical Chemistry."
Tuesday, September 25 — Chemical and Nuclear Engineering, 4 p.m., Room 140 Fenske Lab. Dr. Matthew J. Reilly, National Academy of Engineering, on "Integrated Utility Systems — A Preliminary Evaluation."
Tuesday, September 25 — Operations Re-

search, 3:45 p.m., Room 267 Willard. Dr. J. Frank O'Connor, agricultural economics, on "Optimal Strategies for Dynamic Planning under Uncertainty."
Tuesday, September 25 — Engineering Mechanics, 4 p.m., Room 215 Hammond. Dr. A. D. Stuart, A.R.L., on "Acoustic Radiation from Point-Excited Infinite Plates."
Tuesday, September 25 — Graduate Air Pollution Control, 2:30 p.m., Room 104 Fenske Lab. Dr. Hans Panofsky, Atmospheric Science, on "Effect of Pollution on the Climate."
Wednesday, September 26 — Fuel Science, 4 p.m., Room 341 Deike. Dr. Gary L. Haller, Yale University, on "Comparative Energy Requirements in the Manufacture of Steel, Aluminum, Glass, and Plastic."
Wednesday, September 26 — Ceramic Science, 2 p.m., Room 244 Deike. M. H. Hodge, T. R. W. Corp.

Thursday, September 27 — Philosophy, 4 p.m., Laurel Room, Nittany Lion Inn. Dr. James Sheridan, Allegheny College, and Dr. Carl Hausman, head of philosophy, on "A Theory of Value," with audience discussion.
Thursday, September 27 — Chemistry, 12:45 p.m., Room 310 Whitmore. Wade Fire, University of Pittsburgh, on "Associative Ionization Reactions in the Gas Phase."
Thursday, September 27 — Physics, 3:35 p.m., Room 117 Osmond. Donald N. Langenberg, University of Pennsylvania, on "Recent Studies of the Josephson Effects."
Thursday, September 27 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. Benjamin Reynolds, Green Valley Farms, on "Spray Irrigation, Crop Production and Land Development."

Films

Friday-Saturday, September 21-22 — Student SF films, 7 and 9 p.m., HUB assembly room. "Burn, Witch, Burn."
Wednesday-Thursday, September 26-27 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "The Great Escape."
Thursday-Sunday, September 27-30 — Arnold Air Society, 7 p.m. and 9 p.m., Room 105 Forum. "The Ballad of Cable Hogue."
Friday-Saturday, September 28-29 — Student SF films, 7 and 9 p.m., HUB assembly room. "Bedazzled."

PSOC, Canoe division, Thursday, September 20, 7:30 p.m., Room 214 Boucke.
Women's Modern Dance Interest Group, Thursday, September 20, 6:30 p.m., White.
Penn State Barbell Club, Tuesday, September 25, 7:30 p.m., Room 151 Willard.
Pre-Vet Club, Wednesday, September 26, 7:30 p.m., Room 111 Animal Industries.
Lambda Alpha Epsilon, Wednesday, September 26, 7 p.m.
Nitty nitty Grotto, Wednesday, September 26, 7:30 p.m., Room 273 Willard.
Penn State Sports Car Club, Wednesday, September 26, 7:30 p.m., Room 365 Willard.
Election of officers and speaker, PSOC, Sailing division, Thursday, September 27, 7:30 p.m., Room 214 Boucke.
Tau Beta Pi, Wednesday, September 26, 7 p.m., Room 373 Willard.

Official

Thursday, September 27 — Last date for a December graduate to pay thesis fees and to activate diploma card in Registrar's office.
Thursday, September 27 — Last date for registering with Educational Testing Service, Princeton, for French and Spanish written language exams.
Thursday, September 27 — File for Pass-Fail.
Thursday, September 27 — File repeat course forms.
Friday, September 28 — File for Pass-Fail.
Friday, September 28 — File repeat course forms.

Lectures

Thursday, September 20 — Central Pennsylvania Society of the Archaeological Institute of America, 8 p.m., Room 112 Kern. Professor Colin M. Kraay on "Greek Coinage and History."
Tuesday, September 25 — "Three Swiss Artists," by Hansjakob Diggelmann, Swiss Institute of Art Research, Zurich, 3 p.m., Museum of Art.
Thursday, September 27 — "Skykay Report," by Skykay II pilot, Capt. Paul J. Weitz, 8 p.m., Recreation Building (Alumni Fellow Program).

Exhibits

Kern Gallery — Shirley Sturtz, jewelry, prints, paintings, until September 22.
Paul Jay, pottery, Black Images, photography-ACU-I, opening September 23.
June Stoyer, acrylic paintings, opening September 23.
Zoller Gallery, Visual Arts — Silman and Albers.
Pattee Library, Circulation Lobby — "Retrospect," multi-media drawings and painting by Jane Dougherty.
Sackett Building Gallery, third floor — Architectural models, until Oct. 5.

Meetings

Thursday, September 20 — U.S.G. Academic Assembly, 7:30 p.m., Room 203 HUB.
Thursday, September 20 — College of Education Faculty, 3:45 p.m., Room 102 Kern.
Monday, September 24 — USG Senate, 7:30-10:45 p.m., HUB assembly room.
Monday, September 24 — OTIS, 6:30-7:30 p.m., HUB assembly room.
Tuesday, September 24 — Panhellenic Council, 6:30 p.m., Kappa Alpha Theta, Wolf.
Monday, September 24 — College of Education Student Council, 7 p.m., Room 317 Boucke.
Tuesday, September 25 — College of Arts and Architecture faculty, 4 p.m., Room 122 Music Bldg.
Tuesday, September 25 — College of Agriculture faculty, 4 p.m., HUB assembly room.
Tuesday, September 25 — ARHS, 7:30-9:30 p.m., Room 203 HUB.
Wednesday, September 26 — A.W.S., 7 p.m., Room 203 HUB.
Wednesday, September 26 — Earth and Mineral Sciences Student Council, 6:15 p.m., Room 244 Deike.

Artists series

Tickets for the Artists Series performance by the National Ballet Saturday, Sept. 22, in Rec Hall are currently on sale at the HUB.
Following the Ballet on the Series Sept. 28 will be tenor Seth McCoy, who began his singing career with the famous Jubilee Singers and comparatively late in life has become a leading tenor in opera, oratorio, and solo recitals. He has sung as soloist with the leading orchestras on the continent, in Philadelphia, Chicago, San Francisco, Ottawa and Toronto and many others. He was recently chosen to be a regular member of the Bach Aria Group while still maintaining a tour schedule. Among the highlights of his career was the honor of appearing during inaugural week of the new Kennedy Center for the Performing Arts, in Washington, D.C.
For some time residents he is no stranger, for he has appeared as soloist with the State College Choral Society a number of times.
On his schedule this year are performances with the San Francisco Orchestra, Cincinnati Symphony, Cleveland Orchestra, and the Akron Symphony.
Tickets for the performance (Friday, Sept. 28, 8:30 p.m., Schwab) will go on sale to the public Wednesday, Sept. 26, at 9 a.m. in the HUB. Sale to students will begin at 9 a.m. Tuesday, Sept. 25.

Kirk Peterson, a featured dancer with the National Ballet, will perform during the program Saturday (Sept. 22) in Rec Hall (8:30 p.m.) on the Artists Series. One of his appearances will be in the dance set to Bartok's Piano Concerto.

UNICARE CHANGE

President John W. Oswald today announced a significant improvement in the University's health expense insurance program known as UNICARE. Under the major medical provisions of UNICARE, each insured faculty member or staff member, and eligible insured dependent has been covered by a maximum lifetime major medical benefit of up to \$25,000. As of October 1, 1973, the new lifetime maximum will be increased to \$100,000.

"This new benefit should be welcomed by each member of the University family particularly in light of today's skyrocketing medical costs," said Dr. Oswald. "A faculty member will have the assurance that he won't have extreme financial hardship if faced with the catastrophic medical expenses connected with some of the sophisticated medical procedures more recently developed," added the President.

The improvement in the plan has been arranged by the Office of Personnel Administration as part of the University's continuing effort to provide faculty and staff members with the most comprehensive and up-to-date health care program feasible within the University's resources.

Membership now 223, to be expanded

Faculty Club building committees named

Two committees have been appointed by the Penn State Faculty Club, one to select an architect for its building and the other to work closely with the person who is chosen.

The selection committee is chaired by Louis P. Inerra, associate professor of architecture, and includes Dr. Walter H. Walters, dean of Arts and Architecture, and Dr. James Tammann, professor and head of plant pathology.

Chairing the group which will work with the architect is Robert H. Gray, professor and head of art. Other members are Dr. Marjorie East, professor and head of home economics education; Dr. Samuel B. Guss, professor of veterinary science extension and chairman of the section; and Dr. William A. Steele, professor of chemistry.

The committees were appointed by Dr. Donald R. Olson, professor and head of mechanical engineering, who is vice president of the Faculty Club.

STUART FORTH —

(Continued from page one)

ceived his bachelor's degree in history and his master of arts in library science from the University of Michigan and then worked as a junior librarian at Oregon State from 1950 to 1954. From there, he enrolled at the University of Washington in Seattle to obtain a doctorate in history.

"I like to tease my colleagues in history," he says. "For me, history is pure fun. Librarianship is real work!"

American political history in the post civil war period was his specialty, and as part of his concern for the history of his country, he has over the years tried to play an active role in the political process himself at the county and state levels.

"Usually," he notes, "my wife and I supported the losing candidates."

Pearl FORTH was originally a research chemist, and she has also taught public school in the communities where they lived. In addition to Lexington, this includes Lawrence, Kansas. In 1959, Dean FORTH became the undergraduate librarian at the University of Kansas. Three years later, he was named associate director of

in a letter to the membership. Club President Dr. Richard D. Schein, who is director of the Office of Environmental Quality Programs, reported that the new building, to be built as a wing of the Nittany Lion Inn, is expected to have approximately 9,700 net square feet of space. This will be divided into:

Dining area — 4,200 square feet including a number of small "meet and eat" rooms. This space will accommodate some 300 persons comfortably.

Kitchen — 2,100 square feet, half of which may initially be used for small dining rooms.

Reception, lounge, library, etc. — 3,400 square feet to accommodate 113 people. "The architect," Dr. Schein wrote, "will be asked to work within this general framework. The exterior is to be compatible with but not necessarily strictly imitative of the Georgian style of the Inn. The building will occupy part of the present garages

libraries, moving to Kentucky in 1965.

After such a short period in his new job, Dean FORTH is unwilling to make too many pronouncements about future plans, but does hope to press ahead with the renovation of the central wing of Pattee.

"The old building has no air conditioning," he points out, "so the lower stack levels are almost intolerable in summer. We also need to make our total space more usable. Right now, one has to use the reading rooms as corridors to get anywhere. Research has shown that people are more distracted by motion than noise, and the comings and goings make it hard to study in these areas."

With the University's rate of growth slowing, Dean FORTH also has budgetary worries.

"The recent Carnegie Commission report on using university resources specifically warns against trying to save money by cutting library budgets," he points out. "One economy which we are instituting, however, is the reduction of our duplicate journal commitment. In the past, when an engineer, a mathematician, or a physicist used the same journal, we tried to provide each appropriate branch library with a

area and will not intrude into the natural woods near the Inn."

The Faculty Club currently has 22 members, and plans are being made to solicit further memberships later this fall. Memberships are open to persons on the University's instructional or research faculty in the three professorial grades as well as to research associates, research assistants and instructors who are not degree candidates are eligible.

According to the Club's by-laws, membership may also be drawn from persons with professional positions in Extension Services and Continuing Education, as well as librarians, personnel executives or administrative categories at staff exempt positions, visiting staff, trustees, and government educators or researchers stationed at the University.

Ross B. Lehman, executive secretary of the Alumni Association, is chairman of the Membership Committee.

copy. We can't continue to do this, so we are trying to weed out duplicates."

Dean FORTH has run into a number of inquiries about his plans for the branch libraries at University Park.

"I'm not a decentralization person," he says. "I've worked in a highly centralized library system at Oregon State and in decentralized ones at Kentucky and Kansas, and have no strong feelings about centralizing library facilities. I do think that to be effective a branch library needs a strong collection and adequate library staff."

"Overall," he continues, "this is not a large library in terms of its resources to the aspirations of its academic program although I haven't been here long enough to get a reading on the quality of the collection and of course, quality is critical."

"I hope that the faculty and students on our campuses will be concerned enough about the collections to accept a degree of responsibility for their well being. Libraries don't exist for librarians but for the total academic community. After all, as I personally am concerned, I don't need any more books or journals. There plenty here in Pattee to keep me busy reading for the rest of my life."

NEWS —

(Continued from page one)

at the Ritenour Health Center will participate in various discussion sessions.

Dr. John A. Hargleroad, director of University Health Services, will address the final session Friday.

Also scheduled to speak at the conference are Ralph L. DeShong, assistant dean of student affairs for Commonwealth Campuses; Dr. J. J. Robert Wynn, health educator; and H. O. Triebold, manager of the University Student Division.

RADIO NETWORK

The Penn State Football Radio Network includes 42 stations this year in Pennsylvania, two in West Virginia, one in New York, and one in New Jersey. The coverage reaches just about every nook and cranny of the Commonwealth.

CAPITOL PAINTING

A course in oil painting has been added to the Capitol Campus schedule, being offered on Saturday mornings for degree and non-degree students. Lectures on contemporary and traditional arts, demonstrations, guidance and criticism will be given by a local artist, May Schock, who has gained many awards for her paintings and has had one-woman shows in Pennsylvania and Delaware. Students will get a variety of experiences in painting in the course.

SPEECH IMPROVEMENT

Members of the faculty or staff who feel they have communication problems and wish to correct them may be interested in a course in personal speech improvement offered by the Speech Department. The course is designed to help those who have difficulties lecturing, participating in group discussions, or with social conversation. Classes will meet weekly on Wednesdays from 7 to 9 P.M. in Room 225 Sparks. Further information is available from Dr. Gerald Phillips, 865-4072.

ALARD QUARTET CONCERT

The Alard String Quartet, which for the 14th year is composed of Donald Hopkins and Joanne Zagst, violins, Raymond Page, viola, and Leonard Feldman, cello, will give its first concert of the season Wednesday, Sept. 26, at 8:30 p.m. in the Music Building recital hall. The program will feature Haydn's "Quartet in E flat major, Op. 50, No. 3," Bartok's "Quartet No. 3," and Beethoven's "Quartet in E minor, Op. 59, No. 2." The Alard group has been at Penn State since 1962, having originated at Julliard School of Music in 1954, although Hopkins is the only original member remaining. The present group has been intact since 1960.

NEW YORK LANDMARK

The SoHo Cast Iron area of New York City was designated recently as Historic District by the City's Landmark Preservation Commission, largely through the research conducted by the team headed by Dr. Winston R. Weisman, research professor of art history. The 15-student team, which was directed by Regina Kellerman, now a doctoral candidate here, and Vaughn Glasow, student project director, spent months on the research which provided background to the Landmark Commission for its decision to protect the 25-square block area of the city. The designation insures

the preservation of the exteriors of the building and to a degree the interior. The cast iron buildings in the area date from early post-Civil War years to 1910.

CHILDREN'S ART

The Department of Art Education will begin classes in nine courses for children and teenagers Saturday, Sept. 22. The classes are in Arts and Crafts for ages 6-7; Drawing and Painting (6-7); 3-D Art (8-12); Arts and Crafts (8-12); Sculpture (8-12); Printmaking for Teens; Ceramic for Teens; Sculpture for Teens; Drawing and Painting for Teens. All classes meet on Saturdays from 9:45 to 10:45 a.m. Dr. Robert W. Ott (865-6570), assistant professor of art education, directs the majors who teach the classes.

CAPITOL CONFERENCE

"Flying for Profit" was the theme of a day-long seminar attended by some 13 Pennsylvania corporate executives at state offices at Capitol Campus Sept. 1. The focus of the Pennsylvania Business Aviation Conference was on potential benefits of using general aviation in business. The Aviation Council of Pennsylvania operated with Continuing Education in stage the conference, which was chaired by Dr. John L. Leathers, Altoona Campus director.

Publications wanted for archives

Three copies of all departmental and University publications should be provided to the Penn State Collection in Pattee Library, reminds Mrs. Louise K. Kelly, curator. Two of the copies are bound for archival purposes.

Reprints submitted to the Office of Vice President for Research through department and college channels are forwarded to the Penn State Library. Mrs. Kelly points

out, and if the faculty member wishes to check his folder to see that it is complete, he would be happy to assist him at Room 107 Central Pattee.

Copies of published works, photographic programs, original Christmas cards, and other items appropriate to the collection should also be sent to Mrs. Kelly. Further information may be obtained by calling 865-7931.

SKYLAB —

(Continued from page one)

tained either at the HUB, the Alumni Office in Old Main, or in Room 101 Hammond Building.

During his three-day visit, Capt. Weltz will meet with students, faculty and administrators in informal sessions. On Friday, Sept. 29, he will be guest of honor at a dinner given by President and Mrs. Oswald.

A 1954 Penn State graduate in aeronautical engineering, Capt. Weltz will receive the permanent title of Alumni Fellow, and special recognition will include a plaque and a certificate signed by President Oswald. He is the ninth alumnus to be so honored since the program was initiated last year by the Trustees in order to give the University community the expertise of those alumni who have demonstrated leadership in their respective fields.

Capt. Weltz piloted the Skylab II mission which began May 25 and concluded June 22. Capt. Charles "Pete" Conrad was flight commander, and Capt. Joseph P. Kerwin was the science pilot.

Safety Rules for Bike Riders

To promote safety and help to prevent accidents and injuries, the following rules and regulations should be noted and observed:

1. Bicycles are subject to the same laws as motor vehicles.
2. Bikes are to be driven only where automobiles are permitted.
3. Bike riders must yield the right of way to pedestrians at crosswalks and intersections.
4. Traffic signals and devices must be obeyed.
5. On campus, do not exceed the 15-mile speed limit.
6. Do not ride the wrong way on a one-way street.
7. Ride single file only.
8. Travel in direction of motor vehicles.
9. Do not weave in and out of traffic.
10. Use correct hand signals.
11. Watch for turning vehicles when nearing an intersection.
12. Pass motor vehicles only on the left side.

PENN STATE intercom

September 27, 1973

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News in brief

ASTRONAUT TALK

In addition to his public lecture Thursday, Sept. 27, at 8 p.m. in Rec Hall, Capt. Paul J. Weltz, Skylab II pilot and Alumni Fellow, will speak before the luncheon meeting of A.S.E.E. the following day at noon in HUB dining room A. His talk is to be titled "It Has to Work the First Time." A limited number of seats will be available for those wishing to attend the program, starting at 12:30 p.m., without lunch.

BRUNCH IN MAPLE ROOM

The Penn State Hotel-Restaurant Society is sponsoring a Sunday Brunch at the Maple Room, Human Development Building, with an "all-you-can-eat" provision for \$1.95, adults, and 95 cents, children under 12. The menu will emphasize breakfast, but an item or two will be of luncheon nature. Service is from 10 a.m. to 1 p.m. every Sunday.

PLAY PRODUCED

"Confessions of a Female Disorder," a full-length play by Susan Miller, instructor of English at the Hazleton Campus, will be produced in New Theatre for Now at the Mark Taper Forum, Los Angeles, Oct. 10-14. A staged reading of the play was held this summer during the O'Neil National Playwright's Conference. Another Miller play, "Silverstein and Co.," will be produced by the Five O'Clock Theatre (University Park) during the Fall Term.

COMPUTER IN MEDICINE

Dr. D. Garfinkel, University of Pennsylvania computer science department, will lecture on "Computer Applications in Medicine."

icine," Thursday, Oct. 4, at 8 p.m., Room 110 Q. The lecture will be on a level that non-computer science persons will understand and find of interest. The public is invited.

WOMEN'S STUDIES

Five hundred dollars have been allotted by the University Libraries for the purchase of monographs that relate specifically to women's studies. The fund administrator, Linda Rambler, may be contacted at 865-1859 or in writing at E506 East Pattee. Suggestions for purchase are now being accepted.

TV DEMONSTRATION

A display and demonstration of new, portable television production and receiving equipment will be held in Room 129 Mitchell Building Tuesday and Wednesday, Oct. 2-3.

Faculty members involved in the use of television may be interested in the modern developments to be shown, including some equipment recently purchased by the University.

The displays will be open Tuesday from 10 a.m. to 6 p.m. and Wednesday from 9 a.m. to 2 p.m.

COED GYMNASICS CLUB

Under the sponsorship of the College of Health, Physical Education and Recreation, a Coed Gymnastics Club has been established and is open to any member of the University community. The Club meets from 7:30 to 9:30 p.m. on Mondays (Rec Hall South Gym) and Thursdays (White Building gymnastics room). No gymnastics experience is needed and instruction is available. More information may be obtained from Gene Pellechia, who is president of the Club, 238-6789, or Elizabeth Hanley, advisor, 865-7591.

NO OPENING TEMPORARILY

Parking Area Yellow H on the University Park Campus will be closed to the public and faculty, staff and students Saturday, Sept. 29, in the morning, so that the area can be available to Pennsylvania legislators who will attend a luncheon in the HUB that day.

PATTEE ENTRANCE OPEN

The entrance to East Pattee, the new section of the University Park campus main library, is now open; entrance hours during the term are Monday-Thursday, 7:45 a.m. to 10 p.m.; Friday, 7:45 a.m. to 5 p.m.; and Sunday, 1-10 p.m. It is not open on Saturday. The entrance is on the ground floor adjacent to the exterior underpass to North Campus.

AG OPEN HOUSE

The College of Agriculture will hold an open house program in the lobby of the Agricultural Administration Building Saturday, Sept. 29, from 9 a.m. to noon. Paul Harner, fruit grower near State College and alumnus, Class of '39 in horticulture, is president of the Alumni Association of the College.

NOTE, PLEASE

It was pointed out to the editor of INTERCOM that the recent conference on the University Park campus of science fiction writers and other members of the Science Fiction Research Association was funded largely by the Institute for the Arts and Humanistic Studies.

WELCOME ALUM

The Penn State Room in its new location on the First Floor of Central Pattee will be open on Homecoming, Saturday, September 29, from 8:30 a.m. - 11:30 a.m.

(Continued on page four)

Elmore Browne

Browne heads BCC

Elmore M. Browne, former dean of men at Cheyney State College, has been named director of the Black Cultural Center.

Born in Charleston, S.C., Browne is a graduate of Hampton Institute, Hampton, Va., with a bachelor of science degree in rural sociology and economics.

He served in the U.S. Army during World War II and the Korean War in the Chemical Corps and Army Ordnance. He retired with the rank of captain after 20 years' service.

Browne undertook graduate studies at American University, Washington, D.C., and received his master of arts degree in education with an emphasis in student personnel administration from Case Western Reserve University, Cleveland, Ohio.

He served as training director of an electronics team, and then from 1968 to 1970 was dean of men at Cheyney State. He served for one year as assistant to the vice president for student affairs at Cheyney before going to Case Western as house director of a coed freshman dorm.

Oliver LaGrone, poet, sculptor, educator—and man with mission

His mother wanted him to be a minister, and although he never quite fulfilled her dreams, he thinks of himself as a man with a mission.

For Oliver LaGrone, that mission began

some 60 years ago as a youngster playing with red clay which had been moistened by spring rains in the yard of his McAlester, Okla., home. From the clay, he fashioned crude, sculptured heads of two

of his heroes — Abraham Lincoln and Frederick Douglass.

"I can remember Mama trying to get me cleaned up before my Daddy came home," he says, "but as soon as she had turned around, I was back playing in that clay. When my Daddy saw what I'd made, he wasn't mad at all that I was dirty."

In the intervening years, LaGrone has forged a career for himself as an artist and educator, triumphing over obstacles which, in the America of the thirties, included both the Depression and the fact that he had been born black.

Nowadays, he spends his time travelling throughout the State spreading his own form of gospel — the message that the arts are a common denominator among all groups of people. As a special assistant to the vice president for undergraduate studies at the University, LaGrone visits the Commonwealth Campuses accompanied by a travelling show of his sculpture and lectures to students and to groups in surrounding communities on art and black studies.

"I like to think I may be realizing something of my mother's dream for me," he says. "Many of my sculptures are portraits of great black figures — George Washington Carver, Harriet Tubman, Paul Robeson. I'm trying to say something more than may be conveyed with pure aesthetics, something that will help in a little way to show America the black face, too often, 'The Invisible Man,' as novelist Ralph Ellison put it."

His own career stands as an inspiration to the many young people with whom he comes in contact.

"My father," he recalls, "was a minister who liked to write poetry, and on the side, he did barbering and ran a gin and grist mill. He came to Oklahoma from Mississippi before it was a state, and one of his first jobs was as a guard at the penitentiary where Jesse James and the Dalton brothers were imprisoned."

"He hated slavery, and he brought us up to hate it, too, and to speak out for our civil rights. Once he knocked down a white man who had insulted him, and there was talk of a lynching. But he had a lot of friends — white men, black men, and Indians — and they flocked to his side and supported him."

One of eight children in his family, LaGrone put aside his interest in art for awhile during his teens in favor of sports of all kinds and made the all-state football team. In 1928, he enrolled at Howard University in Washington, D.C., for his freshman year.

"The stock market crashed," he continues, "and my father was unable to find any kind of work. I got a summer job selling books door-to-door in some of the Southern states, and with the money I earned, I was able to help my father and brothers move to Albuquerque, N.M. I found a job washing windows on the main street, and my brothers picked up work, too."

(Continued on page two)

Oliver LaGrone, special assistant to the vice president for undergraduate studies, discusses his sculpture, "When Aretha Sings," with students.

Leaves

Dr. Robert R. Reed, Jr., associate professor of English, will be on leave for the Winter Term to do further research on a study focusing on the Influence that the dead exert on the tragic consequences of Shakespeare's plays. The project is tentatively titled "Shakespeare and the Broken Urn."

M. Robert Des Marais, associate professor of architecture, has been granted a leave for the Spring Terms of 1974 and 1975 in order to do research for a book on the illustration of building construction and design from the 14th to the 19th centuries.

In writing

Dr. John C. Snowdon, professor of engineering research at the Applied Research Laboratory, is editor of "Isolation of Mechanical Vibration, Impact, and Noise," a monograph published by the American Society of Mechanical Engineers. It was prepared with Dr. E. E. Unger and contains the texts of lectures given at the Technical Conference of the Society of Design Engineering recently.

Dr. Robert Scholten, professor of petroleum geology, is co-editor of "Gravity and Tectonics," published last week by John Wiley Interscience. Dr. Kees A. De Jong, University of Cincinnati, is the other editor. Thirty one articles were written expressly for the book, which presents analysis of the role of gravity in the deformation of the earth's crust at all scales and levels.

Dr. Virginia M. Brant, director of nursing and nursing education at the Hershey Medical Center and professor of nursing in the College of Medicine, is co-editor of "Readings in Gerontology," published by C. V. Mosby. Sister Marie Raymond Brown, R.S.M. N.Ed., formerly assistant professor of nursing in the University of Rochester's School of Nursing, is the other editor. The readings were organized to provide an understanding of the relationship between theory, research and practice in the field of gerontology.

Staff vacancies

This announcement is made so that all University employees who are interested in promotion may be kept by calling the Employment Office, 865-1387 (Network Line 475-1387). Do not contact the area that has the vacancy. Application for these staff vacancies will be accepted until:

5 P.M., Thursday, October 4, 1973

COMPUTER OPERATOR

COLLEGE OF MEDICINE

Responsible for monitoring and controlling electronic computers on established routines and for assisting department staff members as required. One year of college or equivalent and one to two years of experience in Data Processing are desired.

OPERATIONS FOREMAN

COLLEGE OF MEDICINE

Hershey Medical Center

Responsible for the operation of the Steam Plant, including boilers and boilers, plus operation of the air conditioning and heating systems and the repair and maintenance of refrigeration equipment. An equivalent to an Associate degree in a technical area related to heating, ventilation or refrigeration and an appropriate amount of experience in one of these trades areas, plus four or five years of supervisory experience are desired.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS

Berks Campus

Responsible for administration of student activities and cultural program. Provides general assistance to the Dean in administration of Student Affairs programs and services. A Master's degree in student personnel or related field and one to three years of related experience are preferable.

COMPUTER AIDE

Capitol Campus

Responsible for conferring with and assisting students and faculty members in programming and operation of computer facilities. Minimum requirement: High school graduate plus formal training in a computer Institute and one to two years of experience are desired.

ACCOUNTANT

UNIVERSITY LIBRARIES

University Park

Responsible for the direction and supervision of the Library Accounting operations and other related projects. Establish a more comprehensive book-keeping system which will utilize more fully the Burroughs 4400 machine. A Bachelor's degree in accounting and at least four years of accounting and supervisory experience are preferred.

Applications for staff vacancies are considered without regard to race, color, creed, sex, or national origin.

OLIVER LAGONE —

(Continued from page one)

Then, just as things were starting to look up, tragedy struck the family. LaGrone's father was felled by a heart attack, his mother was injured in an automobile accident, and one of his sisters died.

"I was despondent," he says simply. "I wanted to go back to school, but I couldn't see any way. I expressed some of my frustration in a piece of wooden sculpture I carved. It showed a man, his face calm, but with his hands tied behind his back. The piece was displayed in a bank window and came to the attention of a family for whom I had worked. They were sufficiently impressed to arrange an interview with the president of the University of New Mexico, which resulted in my being given a job as a student assistant in the art department. I also worked every morning from 3 a.m. until the start of school to help with my expenses."

Toward the end of his college career, LaGrone had another break. One of his professors took Scripps-Howard columnist Eric Pyle to an exhibit of LaGrone's work. Pyle liked the sculptures, looked up the artist, and wrote a nationally syndicated column about him.

Lecture series by community expert for community systems grad program

The College of Human Development is sponsoring a lecture series by William Nagel, executive director of the American Foundation, Inc., and director of its Institute of Corrections. The series is being conducted in conjunction with the graduate program in Community Systems Planning and Development, launched by the College this fall.

Nagel has had eleven years of major responsibility with correctional institutions and has served as Executive Secretary for

the resulting publicity won LaGrone a place at the Cranbrook Art Academy in Bloomfield, Mich., where he was the first black ever to be accepted.

"The great Swedish sculptor, Carl Milles, was teaching there," LaGrone continues, "and when we got to Cranbrook, my wife — I had married before I was graduated from college in 1936 — said, 'Let's visit him.' I was shocked. I couldn't imagine going to see an artist with such a great reputation, but she kept pushing me. Finally, we went up and knocked on his door, and my wife told him that we admired his work and wanted to meet him.

Milles took the LaGrones and their tiny daughter, Joy, to his heart. He got Oliver a fellowship and supplemented the monthly stipend from his own pocket.

After the family left Cranbrook, they settled in Detroit, Mich., where Joy grew up. Today, she and her husband, Greg Johnson, are both students at the University of California Law School in San Francisco. Their only daughter, Gretchen, the Rhonda, spent last summer with her grandfather while her parents worked to earn their tuition for the year.

In Detroit, LaGrone was put in charge of a visual education program for the United

the Council for Human Services on the staff of the Governor of Pennsylvania.

Dates for the lectures, which will cover varied topics concerning corrections, are October 2, 16, 30, November 13, and December 11. All sessions will be held in S-204 Human Development Building. The times for the lectures will be varied, and a call to the Division of Community Development (865-1452) several days prior to each lecture date will provide information about the specific time for each presentation.

Funding Opportunities

For more information, call 865-1372 except where noted below, and refer to the item by its number and the general information provided. People with grants information for dissemination in this column should call the same number.

September 27, 1973

(99-1) Pulmonary Research Grants for scientists who are engaged in research at the National Heart and Lung Institute. The pulmonary lung related projects must be of the scientist's own design. Eligible applicants must have a doctorate in some relevant field across a broad basic-clinical spectrum of fields ranging from biochemistry and engineering to surgery and pediatrics. Applications must be received before Oct. 1, 1973. Contact: J. Markowitz, Executive Secretary, Grants and Resources Branch, Div. of Lung Diseases, NHLI, Bethesda, Md. 20814.

(99-2) The National Institutes of Health (NIH) announces a new research training and fellowship program beginning in FY 1974. There will be \$30 million in new awards for each of the first three fiscal years, total awards rising to \$90 million by 1976. The following general guidelines are noted: (1) The program will apply only to research training; (2) support emphasis will be for individuals rather than institutions, and support will be limited to institutional M.O., O.D., O.S., D.V.M., Ph.D., or other equivalent professional people for up to 3 years. Program initiation will be announced. Detailed information as it becomes available may order same at 865-1372.

(99-3) Engineering Research Initiation Grants supported by the National Science Foundation are directed toward young and/or new engineering faculty (generally assistant professors or instructors) with or without the doctorate (with industrial experience). Two options are available: (1) academic research on campus; (2) academic research and research in an off-campus environment. About 100 grants were awarded in FY 1973 averaging \$180,000. Application deadline is Oct. 1, 1973.

(99-4) A U.S.-France Exchange of scientists is funded by the National Science Foundation and the French National Center of Scientific Research. Each agency will make about 12 awards for study in the mathematical, physical, chemical, engineering, biological and social sciences including economics. Exchange visits are normally between 5 and 15 months. Shorter or longer times must be justified. Contact: NSF, Office of International Programs, 400 Connecticut Ave., Washington, O.C. 20550. Deadline date is Nov. 1, 1973.

(99-5) Annual fellowships of \$300/month, plus tuition, for the years 1974 to 1977 are available to U.S. citizens for Masters and bachelors graduate students in science and engineering. Application forms can be obtained from the National Research Council, Fellowship Office, 2101 Constitution Ave., N.W., Washington, O.C. 20418. Application deadline is Nov. 26, 1973; applicants must take Graduate Record Exams no later than Oct. 8, 1973.

(99-6) Improving teaching quality in the humanities is the aim of \$2,000 summer (1974) stipends to be given to college and university teachers. The National Endowment for the Humanities advises that faculty must have a research or study program preferably related to cultural and philosophical foundations of the American Revolution. Young scholars (under 30) and advanced scholar may be nominated by Penn State. Applications must reach the Fellowship Office, 317 Kern Blvd., by Oct. 15, 1973.

(99-7) The British Council General (2320 P.K. Bldg., 12 & 12th St., Philadelphia, Pa. 19107) announces the availability of Marshall Scholarships for U.S. citizens. The British Council Applicant must be a U.S. citizen born since Oct. 1, 1948 who will have a bachelor's degree by Aug. 31, 1974. Fellowship provides approximately \$300 British Pounds per year for two years. Thirty fellowships are available, tenable at any of one 30 British universities. Most applicants will currently be seniors or beginning graduate students. Preference is given to unmarried students. The application deadline is Oct. 23. Copies of application forms and instructions can be obtained by writing address given above.

(99-8) The American-Scandinavian Foundation (127 E. 73rd St., New York 10021) announces a variety of graduate fellowship opportunities in Scandinavia, plus undergraduate awards for study in Scandinavia. The deadline for applications to the foundation is Nov. 1, other fellowships, Oct. 1. Awards vary from \$500 to \$4,000. For detailed information and application forms write to address given above.

(99-9) The Woodrow Wilson International Center for Scholars (Smithsonian Inst. Bldg., Washington, O.C. 20560, 202-381-5513) invites applications from established postdoctoral scholars for fellowships and guest scholarships of a few weeks to a year in duration. Awards provide office space, secretarial services, and in some cases a stipend or expenses or both. The program is most likely to be useful to faculty and doctoral candidates carrying on research requiring temporary residence in Washington. The Center is particularly interested in supporting work on international affairs, sustainable growth, the environment, the ocean, and the space program. Application deadlines are Oct. 1 and March 1. A copy of the application form is available at 317 Kern Blvd. For further information and application forms, write to address given above.

REMINDERS — DEADLINE DATES

Nov. 1 for NEH Project Grants and Planning Grants
Nov. 1 for NEH Research Grants
Nov. 1 for NEH Undergraduate Research Participation Program (Sept. 6 INTERCOM #96-3) — Nov. 7 for USER A Eastern Europe exchange visits (Sept. 20 INTERCOM #96-2)
Nov. 16 for NSF-NSEC Secondary Student Science Training program; and Nov. 30 for NSF Student Originated Studies program (Sept. 6 INTERCOM #96-4)
Nov. 16 for NEH Research Grants (Sept. 20 INTERCOM #96-4)
Jan. 11 for Opt. Interior (OWAR) requested research proposals (Sept. 20 INTERCOM #96-4).

Auto Workers. He free-lanced as an artist and labor organizer, worked in the public school system teaching arts and crafts, to the mentally retarded and later taught Afro-American history at Northwestern High School and Margyrove College in Detroit. He also continued with his sculpture and had numerous one-man shows of his work in bronze, and marble figures in universities in Michigan and other states.

"Image-making" is how LaGrone referred to his art, and he has practiced it not only in sculpture but also in poetry. His poems have been anthologized, and he has published two books, "Footfalls" and "They Speak of Dawns." On a recent trip to Africa, he found his poems displayed in two American embassies which he happened to visit.

Three years ago, LaGrone was invited to come to Penn State's Capitol Campus at Middletown as a lecturer in art education and Afro-American history. Out of that grew his present work.

"Art recreates and keeps alive experience," he concludes. "What I'm trying to do now is to synthesize art with blue studies. By talking to groups and showing my work, I hope I am helping people see the common humanity which joins us all."

VADD insurance changes made; check urged

Since 1964, the University has offered voluntary plan of accidental death and dismemberment insurance to all regular faculty and staff members. The plan currently provides optional amounts of coverage ranging from \$10,000 to \$100,000. Effective November 1, 1973, a new maximum amount of \$150,000 will be made available for the first time.

Participation in the plan to elect this new maximum amount or to make a variety of other changes is opened during the month of October. The following changes are permitted in October: (1) change the dollar amount of insurance coverage; (2) change from individual coverage to family coverage or vice-versa; (3) enroll in the plan as a new member; (4) withdraw from the plan.

To accomplish any of the above change obtain and complete a new VADD enrollment card from your dean or administrative officer and send it to the Employee Benefits Division, 133 Willard Building, October 31. All changes received by the date become effective November 1.

If you should wish to check your present coverage, examine the section of the paycheck stub marked "VADD." The deduction will indicate the amount of coverage you have.

Coverage	Monthly Deduction	Benefit Schedule
\$ 10,000	.50 single 70 family	\$ 233 single \$ 324 family
\$ 25,000	1.25 single 1.75 family	\$ 573 single \$ 801 family
\$ 50,000	2.50 single 3.50 family	\$1,155 single \$1,611 family
\$100,000	5.00 single 7.00 family	\$2,310 single \$3,222 family
\$150,000	7.50 single 10.50 family	\$3,465 single \$4,844 family

If you are unable to check in this manner, information about your coverage may be obtained from the Employee Benefits Division.

Ground broken for Scranton study center

Groundbreaking ceremonies were held Tuesday, Sept. 25, for a student study learning center at the Worthington Scranton Campus in Dunmore.

The new structure is designed as a two-story building with approximately 26,500 square feet.

The game room, food service area, and book store will be located on the upper floor. On the lower floor there will be quiet lounge, three classrooms, three seminar rooms, student government offices, meeting rooms, and student affairs offices, including counseling and health rooms.

Slightly more than \$1,000,000 has been allocated for the project.

University Calendar

September 27-October 7, 1973

Special Events

Thursday, Sept. 27 — German Forum, 7:30 p.m., Room 124 Sparks. Otto Poeggeler.
Thursday, Sept. 27 — Human Development (Alumni Recognition Award, 8 p.m., Room 6-209 Human Development.
Friday, Sept. 28 — "Creating Your Own Job," 2-3 p.m., Human Development Living Center. Mrs. Margaret Lucas on her involvement in developing community resources.
Friday, Sept. 28 — Artists Series. Seth McCoy, tenor, 8:30 p.m., Schwab.
Friday, Sept. 28 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.
Friday, Sept. 28 — Groove Phil Groove, 10 p.m.-3 a.m., HUB ballroom.
Friday, Sept. 28 — Freshman Football, vs. Milford Academy, 3 p.m.
Friday, Sept. 28 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.
Saturday, Sept. 29 — Penn State Glee Club Homecoming Concert, 7 p.m., HUB ballroom.

Saturday, Sept. 29 — Football, vs. Iowa, Beaver Stadium, 1:30 p.m., Homecoming.
Saturday, Sept. 29 — PSOC Sailing Division Regatta, noon, Stone Valley.
Saturday-Sunday, Sept. 29-30 — Horticulture Show, Ice Rink Pavilion. Open Saturday, 10 a.m. to 8 p.m.; Sunday 10 a.m. to 4 p.m.
Saturday, Sept. 29 — Human Development Alumni Coffee Hour, 9:30-11 a.m., Human Development Living Center.
Saturday, Sept. 29 — College of Agriculture Alumni Association "open house," 9 a.m.-noon, lobby of the Agricultural Administration Building.
Sunday, Sept. 30 — Chapel Service, 11 a.m., Marie Bldg. recital hall. Luther Harshbarger, religious studies.
Sunday, Sept. 30 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center. Reverend M. B. Spiller, St. Paul AME Church, Bellefonte.
Wednesday, Oct. 3 — Musica da Camera Concert, 8:30 p.m., Music Bldg. recital hall.

Wednesday, Oct. 3 — Sports: Soccer, vs. West Chester, 7 p.m., Jeffrey Field.
Wednesday-Friday, Oct. 3-5 — "Five O'Clock Theatre, Pavilion, 5:20 p.m., Wednesday, Thursday; 7:20 p.m., Friday.
Friday, Oct. 5 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.
Friday, Oct. 5 — Free-U Jammy, 7:30-11:30 p.m., HUB ballroom.
Saturday, Oct. 6 — Sports: Cross Country, vs. West Virginia; Rugby, vs. Rutgers, 2 p.m.
Saturday, Oct. 6 — Free-U children's film, 12:30 and 2:30 p.m., HUB assembly room.
Sunday, Oct. 7 — Elsbeth Heim, piano recital, 8 p.m., Museum of Art, Gallery C.
Sunday, Oct. 7 — Chapel Service, 11 a.m., Eisenhower Chapel. Charles L. Coleman, Religious Affairs.
Sunday, Oct. 7 — Black Christian Fellowship worship service, 11 a.m., HUB Cultural Center.

Seminars

Thursday, September 27 — Philosophy, 4 p.m., Laurel Room. Nitany Lion, Jr., Dr. James Sheridan, Allegheny College, and Dr. Carl Hausman, head of philosophy, on "A Theory of Value," with audience discussion.
Thursday, September 27 — Chemistry, 12:45 p.m., Room 310 Whitmore. Wade E. Hilde, University of Pittsburgh, on "Assessment of Ionization Reactions in the Gas Phase."
Thursday, September 27 — Physics, 3:35 p.m., Room 117 Osmond. Donald N. Langenberg, University of Pennsylvania, on "Recent Studies of the Josephson Effects."
Thursday, September 27 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. Benjamin Reynolds, Green Valley Farms, on "Spray Irrigation, Crop Production and Land Development."
Thursday, Sept. 27 — Slavic and Soviet Language and Area Center, 3 p.m., Room 132 Electrical Engineering East. William R. Schmalstieg on "Penn State in Russia."

Thursday, Sept. 27 — Two Cultures Dialogue, noon, Room 189 Materials Research Laboratory. Technology: Its Character, Role, and Future. With Dr. R. J. Heinsbohn and David M. Parke, mechanical engineering, leading discussion.
Thursday, Sept. 27 — Aerospace Engineering, 11 a.m., Room 202 Hammond. T. S. Duranti and C. Greated, on "Flow Measurement by Electro-Optic Techniques."
Friday, Sept. 28 — Physical Chemistry, 4 p.m., Room 310 Whitmore. Dr. Frederick Mann, University of Rochester, on "Effective Intermolecular Potentials in Liquids."
Monday, Oct. 1 — Analytical Chemistry, 1 p.m., Room 310 Whitmore. Dr. P. C. Jurs, on "Thesis Topics in Analytical Chemistry."
Monday, Oct. 1 — Entomology, 4 p.m., Room 204 Patterson. Dr. Jim Richerson on "Hosts Findings Behavior of *Coeloides Brunneri*, a Parasite of the Cuckoo Fly Beetle."
Monday, Oct. 1 — Genetics, 3:55 p.m., Room 111 Tyson. Dr. Dale Therrien, on "Comparative Measurements of Nuclear DNA in a Heterothallic and a Self Fertilize isolate of the Slime Mold *Dicoidium lridis*."

Tuesday, Oct. 2 — Graduate Air Pollution Control, 2:20 p.m., Room 140 Fenske Lab. Dr. Eva J. Pell, plant pathology, on "Economic Impact of Air Pollution on Vegetation in New Jersey and Interpretation of Annual Variability."
Tuesday, Oct. 2 — Engineering Mechanics, 4 p.m., Room 215 Hammond. G. F. Lin, on "Acoustic Radiation from Point Excited Beam-Reinforced Plates."
Tuesday, Oct. 2 — English Colloquium, 8 p.m., Room 101 Kern. Francis Utey on "Boccaccio, Chaucer and the Internationalization of the Middle Ages."
Tuesday, Oct. 2 — Comparative Literature luncheon and discussion, with Francis Utey 12:15 p.m., HUB dining room "A".
Thursday, Oct. 4 — Chemistry, 12:45 p.m., Room 310 Whitmore. Richard P. Vandyne, Northwestern University, on "Applications of Nanosecond Photon Timing Experiments to Chemistry."
Thursday, Oct. 4 — Physics, 3:35 p.m., Room 117 Osmond. Malvin A. Ruderman, Columbia University, on "Relativistic Theories of Composite Systems."
Thursday, Oct. 4 — Agronomy, 3 p.m., Parking Lot Blue C. L. T. Kardos, soil physics, on "The Living Filter." Field Trip.

Lectures

Thursday, September 27 — "Skybal Report," by Skybal II pilot, Capt. Paul J. Weitz, 8 p.m., Recreation Building (Alumni Fellow Program).
Thursday, Oct. 4 — Computer Science, Dr. D. Garfinkel, University of Pennsylvania, on computer applications in medicine, 8 p.m., Room 110 Osmond.

Films

Thursday, Sept. 27 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "The Great Escape."
Thursday, Sept. 27 — International Films, 7 and 9 p.m., HUB assembly room. "The Lower Depths," directed by Akira Kurosawa.
Thursday-Sunday, Sept. 27-30 — Arnold Air Society, 7 and 9 p.m., Room 105 Forney Hall. "The Cable Hogue."
Friday-Saturday, Sept. 28-29 — Student SF films, 7 and 9 p.m., HUB assembly room. "Bedazzled."
Wednesday, Oct. 3 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "The Oklahoma Kid."
Thursday, Oct. 4 — International Films, 7 and 9 p.m., HUB assembly room. "Two Daughters," directed by Satyajit Ray.
Friday-Saturday, Oct. 5-6 — Student SF films, 7 and 9 p.m., HUB assembly room. "M."

Official

Thursday, September 27 — Last date for a December graduate to pay thesis fees and to activate diploma card in Registrar's office.
Thursday, September 27 — Last date for registering with Educational Testing Service, Princeton, for French and Spanish written language exams.
Thursday, September 27 — File for Pass-Fall.
Thursday, September 27 — File repeat course forms.
Friday, September 28 — File for Pass-Fall.
Friday, September 28 — File repeat course forms.
Monday, Oct. 1 — Drop period ends 5 p.m.
Monday, Oct. 1 — File for Pass-Fall.
Monday, Oct. 1 — File Repeat Course forms.
Monday, Oct. 1 — Preregistration period ends.
Tuesday, Oct. 2 — Last date for written foreign language exams (other than French and Spanish) for advanced degree candidates.
Saturday, Oct. 6 — Last date for a December graduate to deliver doctoral thesis to committee.

Meetings

Monday, Oct. 1 — OTIS, 6:30-7:30 p.m., HUB assembly room.
Monday, Oct. 1 — USO-Senate, 7:30-10:45 p.m., HUB assembly room.
Tuesday, Oct. 2 — ARHS, 7:30-9:30 p.m., Room 203 HUB.
Wednesday, Oct. 3 — A.W.S., 7 p.m., Room 203 HUB.
Wednesday, Oct. 3 — Penn State Faculty Club, 8 p.m., Room 101 Kern. Annual meeting of members.
Wednesday, Oct. 3 — Graduate Council Meeting, 3 p.m., Room 101 Kern.
Thursday, Oct. 4 — College of Engineering Faculty, 3:30 p.m., Room 26 Mineral Sciences.
Thursday, Oct. 4 — USG Academic Assembly, 7:30-9 p.m., Room 203 HUB.

Exhibits

Museum of Art — Three Swiss Painters, by Charles A. B. C.
Zoller Gallery, Visual Arts — Sillman and Albers.
Kern Gallery — Black Images, photographic-ACU-I, until Oct. 6. June Stoyer, acrylics. Marilyn Dwyer, palette knife, opening October 7.
Pattee Library, Circulation Lobby — "Retrospect," Janet Dougherty. Arts Lobby, 10 Eastern European Prints.
Sackett Building Gallery, third floor — Architectural models, until October 5.
Pattee Library, main lobby — Display of Esperanto materials, continuing until Oct. 8.

WPXS highlights

Thursday, Sept. 27 — "Phosphores New York on the Forties" presents "Particular Men," a drama about scientists involved in the development of the atom bomb.
Friday, Sept. 28 — 3:30 p.m. Governor Milton Shapp talks with a group of high school students on "People, Places, Things, Now." At 8:30 p.m. Dr. Jacob J. Kaufman, director of the Institute for Research on Human Resources; Dr. Edwin L. Herr, acting director of the Division of Educational Policies Studies; and Dr. Kenneth P. Mortimer of the Center for the Study of Higher Education, join State College area educators Christopher Mare and Dr. Donald Gross on "The World... Their Classroom."
Saturday, Sept. 29 — Wildlife liberation leader Gloria Steinem talks with Edwin Newman on "Speaking Wild" at 6 p.m. At 8:30 p.m., "Man Builds, Man Destroys" examines alternative methods of environmental management.
Sunday, Sept. 30 — At 6 p.m., "Puppets and the Port" uses "black theatre" puppet techniques to explore the role of the plays of William Shakespeare. America's artistic heritage is examined through paintings, pre-Columbian artifacts, and architecture on "American Vision" at 8 p.m.
Monday, Oct. 1 — "Handfuls of Ashes," a dramatic serial about the poor people of Appalachia, premieres at 7:00 p.m.
Wednesday, Oct. 3 — At 7 p.m., on "TV Quaterbacks," coach Joe Paterno and co-hosts Fran Fisher and Jim Tarmen review and analyze the Penn State football game.

Interest Groups

Alpha Phi Omega, Mondays, 7 p.m., Room 308 Boucke.
Chess Club, Wednesdays, 6:30 p.m., HUB card room.
Chess Team, Thursdays, 6:30 p.m., Room 106 Sackett.
Eco-Action, Mondays, 8:30 p.m., Room 301 Boucke.
Focus on Sweden, Tuesday, 7 p.m., Room 312 Boucke.
Gamma Sigma Sigma, Tuesdays, 7 p.m., Room 309 Boucke.
Interludia Folk Dancers, Sundays, 7:30 p.m., HUB ballroom.
Keystone Society, Wednesdays, 7:30-8 p.m., Room 304 Boucke.
P.S. Overcomers, Mondays, 7:30 p.m., 106 Sackett.
Young Socialists, 7:30 p.m., Mondays, Room 167 Willard; Wednesdays, Room 62 Willard.
S.I.M.S., Thursday, September 27, 8 p.m., Room 101 Chambers.
Campus GOLF Scout Scouts, Thursday, Sept. 27, 7:30 p.m., lobby of Cross Hall.
PSOC Sailing division, Thursday, Sept. 27, 7:30 p.m., Room 214 Boucke.
Panther Council, Monday, Oct. 1, 6:30 p.m., Phil Mu. Hester.
Penn State Amateur Radio Club, Tuesday, Oct. 2, 7:30 p.m., Room 208 Engineering Unit E.
PSOC, Equestrian division, Tuesday, Oct. 2, 7:30 p.m., Room 111 Animal Industries. Meeting and demonstration.
PSOC, Hiking division, Wednesday, Oct. 3, 7:30 p.m., Room 214 Boucke.
PSOC, Canoe division, Thursday, Oct. 4, 7:30 p.m., Room 214 Boucke.
Young Socialists Club, Wednesday, Oct. 3, 8 p.m., Rec Hall.
Ukrainian Club, Thursday, Sept. 27, 8 p.m., Room 306 Boucke. Folk dancing; everyone welcome.
Goed Gymnastics Club, Mondays, 7:30 p.m., Rec Hall; Saturdays, 10 a.m., Thursdays, 7:30 p.m., White Bldg. gymnastics room.

Seth McCoy, tenor

Artists series

Tenor Seth McCoy, who began his active singing career with the famous Jubilee Singers and who gained attention as a soloist in two tours with the Robert Shaw Chorus, will appear on the Artists Series tomorrow (Friday, Sept. 28) at 8:30 p.m. in Schwab Auditorium.
Now a veteran of the recital tour and frequent soloist with leading symphony orchestras in this country, McCoy was recently chosen as a regular member of the Bach Aria Group.
Tickets for the recital are currently on sale at the HUB.
McCoy's program will include two recitatives by Handel; four songs by Brahms; three songs by Duparc; two arias from Puccini's opera, "Tosca"; five songs by Charles Ives; and John Carter's "Cantata."

Susan Gregg, right, will become the first woman to receive an MFA degree in directing after her production of the musical comedy, "The Amorous Flea," opens at Pavillion Theatre October 18. With her is Merrill Plushko, graduate student in theatre arts, who plays Arnolpho, the mole lord in the show. (Photo by Roger Dreconwall.)

Theatre has musical, classics

A vigorous and varied theatre season, starting out with a rollicking musical comedy and such classics as George Bernard Shaw's "St. Joan," and an innovative and experimental production from visiting Polish playwright Slawomir Mrozek, is in store for University Theatre audiences this year.

Opening the fall season will be the musical farce, "The Amorous Flea," a bright and lively adaptation of Moliere's classic "School for Wives," directed by Susan Gregg, that will open in the Pavillion Theatre on Oct. 19, with other performances on Oct. 20, 23-27.

The second major production in the fall will be Dale Wasserman's "One Flew Over the Cuckoo's Nest," directed by Richard Edelman, the artistic director for the Summer Festival of America Theatre. "Cuckoo's Nest," was Ken Kesey's best selling novel, and the play is considered by many to be a pop art masterpiece, dealing with a man's struggle against a repressive society.

Susan Gregg's production of "The Amorous Flea" will have a special significance, as she will be the first woman to be graduated from the department of theatre arts with an MFA (Master of Fine Arts) in directing. "Flea" is her final MFA project.

Written by Jerry Devine with music and lyrics by Bruce Montgomery, the play concerns itself with the humorous tale of a decaying old nobleman, Arnolpho, and his lovely, and seemingly innocent ward, Agnes.

Susan Gregg said she wanted the lead character to be something of a stand-up comedian who could deliver the lines to the audience, where she felt much of this show has to be aimed. "The production really calls for someone to work the audience." It is an extremely funny play and involves bringing the audience into a lot of private pecks," she says.

Rich Victor, grad assistant in the Music

Department, is the musical director. Last spring, he directed the music for the Penn State Thespians 75th Anniversary production of "Hello, Dolly!"

In addition to the musical comedy entertainment of "Flea," and the more brittle and tragic-comedy nature of "Cuckoo's Nest," other productions by the University Theatre this year will be geared for a variety of theatre and, in the case of the Christmas play, for Children's Theatre.

Helen Manfull, who produced last year's Children's Theatre production of "The Beeples," will be working shortly on "The Second Shepherd's Play." This play, intended for adults and children alike, will appear in the Playhouse from Dec. 15 through 18.

Polish author Slawomir Mrozek will be visiting Penn State and teaching a course in playwrighting, while his play, that is not yet announced, will be produced by the University Theatre and directed by Archie Smith.

Smith directed last spring's "Kafka on Kafka," and looks forward to doing a Mrozek play that may be an American premiere. This play will appear in the Pavillion from Feb. 14 through Feb. 23.

George Bernard Shaw's play "St. Joan," at the Playhouse from Jan. 31 through Feb. 9, will be directed by Warren Smith, professor of theatre arts, who is in charge of General Education in the Arts at the University.

Other spring productions will include "The House of Bernarda Alba," directed by Manuel Duque, and "The Jazz Dance Theatre in Concert," under the direction of Jean Sabatine, which had such success last spring.

Information on any University Theatre production can be obtained by calling the publicity office 863-0361, and ticket information and reservations can be made by dialing 865-1884.

5 O'Clock theatre season opens Oct. 3

"My Legs Are Fine: I Can Smell the Smoke," by recent theatre arts graduate Mike King, will open the Five O'Clock Theatre season Oct. 3-5, in the Pavillion Theatre. The plot concerns an hospitalized quadriplegic.

The Five O'Clock Theatre productions are free and open to the public, but be-

cause of their popularity a ticket policy has been adopted. Tickets will be distributed a half hour before curtain each day, and these tickets will be honored until five minutes before curtain, which is at 5:20 p.m. on Wednesdays and Thursdays and 7:20 p.m. on Fridays.

King is now a disc jockey and television writer in Washington, D.C.

Esperanto featured in Pattee display

A collection of contemporary publications and other materials related to Esperanto, the International Language, will continue on display in the entrance lobby of Pattee Library at the University until Oct. 8.

Esperanto was created by Dr. L. L. Zamenhof in 1887, to overcome language barriers. His first Esperanto textbook was published in Poland and shortly thereafter Esperanto textbooks appeared in other countries. Esperanto is used extensively in publishing literary and scientific works. It is also used for International meetings and for personal contacts.

The display shows how Esperanto is used in daily life and indicates its use-

fulness as a second language for all men, favoring no particular language group. The items consist of books, magazines, phonograph records, correspondence from many nations as well as other items which figure in the personal and professional lives of Esperantists throughout the world.

The materials on display are part of a collection prepared by Cornelius McKown, of State College, who has been an active Esperantist for 14 years. He is the local delegate of the Universala Esperanto-Asocio (UEA), the largest Esperanto organization in the world, with 32,000 members in 80 nations. The UEA is in consultative relations with UNESCO. Mr. McKown is a librarian at the University Libraries.

Pledge materials mailed to faculty

Fund drive endorsed by president

President Oswald has endorsed participation by staff and faculty members at the various campuses in the local efforts, through United Fund, Community Chest, or similar organizations, to raise money for community service purposes.

Through payroll deduction, employees may contribute to one designated major charity campaign each year. Materials supporting the University Park area campaign drive by United Way were mailed yesterday to all employees in the area. A letter from President Oswald, dated Sept. 15, explained that "while the University is a part of the life of many Pennsylvania communities, it is difficult for it, as a corporate entity, to support needed community services. However, as individual members of both

the University and the community, we do have the opportunity through United Way to provide our voluntary financial support."

Graduate School Dean James B. Barlow, chairman of the United Way activity at the University, noted that "our goal is 10 percent response. The University is Century County's No. 1 employer; we hope it will be the No. 1 contributor."

Brochures describing the participation, agencies and contribution cards were mailed to employees. Individuals may make cash or check contributions if they do not elect to use the payroll deduction plan. New employees, added to the payroll after August 31, may obtain campaign information and contribution cards from various area sub-chairmen.

Behrend to honor local citizens

A "Behrend College Medallion" has been established to be awarded to citizens of Northwest Pennsylvania who have attained excellence in their chosen professions, and the first recipient will be Capt. Paul J. Weltz, Skylab II pilot, who will be honored Sunday, Oct. 7, at the College.

Capt. Weltz is to serve this weekend as

Alumni Fellow at the University Park Campus.

A native of Harborcreek Township, which is near Erie, Capt. Weltz is, of course, a University Park graduate.

A luncheon will be held at 12:30 p.m. in Reed Dining Hall at Behrend Oct. 7, while faculty and students will attend.

Honored for community service

HD recognition award to alumna

Margaret-Alice Haggart Lucas will receive the Alumni Recognition Award of the College of Human Development, during ceremonies Thursday, Sept. 27, at 8 p.m., in Room S209 Human Development.

Mrs. Lucas, one of two persons selected

to receive the newly-established award, is being cited for her outstanding contributions in community service.

Dr. Vilma Hunt, president of the College of Human Development Faculty Organization, will present the award on behalf of faculty, students and alumni. Theme of the program is "Innovative Services in the Community."

Mrs. Lucas, a 1965 Penn State graduate has combined marriage and family with a career. The wife of a career Naval officer and the mother of two children, she joined the Child and Family Services of Newport Rhode Island, in 1969 when the day care center was serving three children.

Today it has grown into a comprehensive day care agency with a staff of 12 and services for groups of all ages.

EBERLY SERVICES

Robert E. Eberly, who was national chairman of the Penn State Alumni Fund during the past year, will serve again in that capacity for the 1974 campaign. He has set as an objective an increase in the contributions, which topped \$527,000 in 1973. Eberly, Uniontown industrialist and civic leader, is a 1939 graduate and has received the Distinguished Alumnus Award. He has been treasurer of the Fayette Campus Advisory Board since the Campus was established in 1965.

PRESIDENT NAMED

President Oswald has been appointed to the Advisory Council of Presidents of the Association of Governing Boards of Colleges and Universities, an organization devoted to strengthening higher education by strengthening its lay leadership.

AG SCHOLARSHIPS

The average amount of the 107 scholarships provided to College of Agriculture students last year was \$246, which the College seeks to increase by appealing to businesses, industries, and individuals. It is noted that 58 per cent of scholarship aid comes from donations of individuals and 24 per cent from nonprofit agricultural associations.

CREATIVE COOKERY

The Capitol Campus Faculty Women's Club has created a 350-page cookbook, "Creative Campus Cookery," which features the recipes of each of the persons who contributed to the book, those of the Campus community and local and nationally known personalities. Proceeds from the sale of the books (\$3.50 each plus 21 cents postage) go to the Student Scholarship Fund. Checks or money orders should be made out to the Capitol Campus Faculty

Women's Club and sent to Mrs. Charles Hary, 21 Heatherland Rd., Middletown, Pa. 17057. Include name and address. The book has recipes for everything from appetizers to gourmet entrees and those of ethnic origin.

ELECTED

Dr. Hubert L. Barnes, professor of geochemistry and director of the ore deposit research section, College of Earth and Mineral Sciences, has been elected to serve as a member of the U.S. National Committee for Geochemistry for a three-year term. The Committee advises the National Academy of Sciences, which named him to the post, the National Science Foundation, and other agencies in the field of geochemistry, and serves to represent U.S. geochemists internationally.

HONORED

Dr. Nunzio J. Palladino, dean of the College of Engineering, has been honored in election as Fellow of the American Society of Mechanical Engineers. He earned his bachelor's and master's degrees in mechanical engineering at Lehigh University. For many years his interests lay in the field of nuclear engineering; he headed the department of nuclear engineering before becoming dean in 1966 and is a Fellow of the American Nuclear Society. He holds the Prime Mover's Award of A.S.M.E. for his contributions to the literature nuclear reactors.

LIGHTING EQUIPMENT

Portable lighting equipment that will be used ultimately in the Kern Graduate Theater and at the nearby proposed Herring and Alti Plaza will be purchased with the aid of a \$1,000 grant by the Alumni Fund. In the building, the equipment will be used in the auditorium and, with portable stage, in the coffee house. At Alti Plaza, the lighting will be used for outdoor theatrical activities.

Approve cooperative program

The Board of Trustees last Friday approved a cooperative educational program in liberal arts and engineering between the University and Edinboro State College.

Under the agreement, Penn State will wish to enter specified curricula in the College of Engineering and the College of Earth and Mineral Sciences following completion of a three-year program at Edinboro.

The cooperative program, which is similar to programs instituted previously by Penn State and other Pennsylvania liberal arts colleges, will enable students to obtain a general education in liberal arts as well as a technological education through five years of study instead of six or more years that might be required if the degrees were obtained separately.

Upon completion of the five-year program, the student will earn a bachelor of arts degree in arts and letters and also a bachelor of science degree in one of 15 different curricula.

According to Dr. Robert E. Dunham, vice

president for undergraduate studies at Penn State, the program permits students whose aptitude for engineering may be uncertain, or whose decision between engineering and other disciplines may not yet be made, to study both arts and sciences during the first three years of college, while determining whether or not their major interest lies in the field of engineering.

The plan also is designed to:

—Provide students with a planned sequence of liberal arts courses which, if completed successfully, would guarantee them acceptance in an engineering curriculum.

—Allow those qualified students to receive both a liberal and technical education at relatively low costs and thus help provide the State and the Nation with more well-educated engineers.

Colleges currently cooperating with the University in a similar arrangement are Albright, Lycoming, Elizabethtown, Millersville, Slippery Rock, Saint Vincent's, Westminster, and Lincoln University.

Undergraduate studies division

Establishment of a new academic unit to improve student advising and enroll students unsure of their academic goals was approved last Friday by the Board of Trustees.

The Division of Undergraduate Studies, established effective Oct. 1, was developed out of extended investigations conducted jointly by faculty and administrators and approved by the University Faculty Senate.

Dr. R. E. Larson, provost of the University, said the new division will have responsibilities in four major program areas:

—Serve as an academic unit for the advancement, enrollment and registration of undergraduate degree students not enrolled in one of the University's ten existing colleges, and for resident education adjunct students and others aspiring for degree programs.

—Provide pre-college testing and counseling services for entering undergraduate students at all locations.

—Develop an academic information system, including undergraduate academic in-

formation centers within each college and campus, for the collection and dissemination of information on academic programs, courses, and procedures for the purpose of supporting and supplementing academic advising by faculty.

Dr. Larson said establishment of the Division of Undergraduate Studies as an academic unit will enable the University's Career Development and Placement Center to concentrate on extensive career counseling and develop a staff of experts in the field of vocational and career decisions and placement.

Arts services unit is established

Dr. Walter H. Walters, dean of the College of Arts and Architecture, has also been appointed director of University Arts Services.

In this position, he will continue to coordinate the professional programs of the Museum of Art, the Artists Series, the University Theatre, and a new unit of Auditorium Management.

This unit will include a manager of auditoriums, production and assistant production managers, a theatre systems engineer, a resident house manager, and an accounting aide.

For cultural events, the University will (Continued on page two)

Administrative structure changes at Hershey

A revised administrative structure at The Milton S. Hershey Medical Center was announced last week by Dr. John W. Oswald, president of the University, and Dr. Harry Prystowsky, provost and dean at Hershey, following the meeting of the Board of Trustees.

Dr. Prystowsky said that the Medical Center has reached a point in its growth and development where several new positions are being established to provide the most efficient direction of the Medical Center's three primary functions of patient care, education, and research.

"I am pleased that people who are already members of our staff have accepted these additional responsibilities while retaining positions they have held since

their arrival at Hershey," Dr. Prystowsky said.

Dr. Fred Rapp has been appointed associate provost and dean for health affairs. Dr. Rapp has been professor and chairman of the department of microbiology at Hershey since 1969.

Clarence A. Brockman, who joined the Medical Center staff in February of this year as associate provost for management, has been named associate provost for administration.

Three department chairmen have been named associate deans in relation to the three major purposes of the Medical Center. Dr. John A. Waldhausen, professor and chairman of surgery and chief of cardiothoracic surgery since 1970, is associ-

ate dean for health care. Dr. Nicholas M. Nelson, professor and chairman of pediatrics since 1970, is associate dean for education. Dr. Howard E. Morgan, professor and chairman of physiology since 1967, is associate dean for research.

Three faculty members have been named assistant deans. Dr. Cheston M. Berlin, associate professor of pediatrics and pharmacology since 1971, is assistant dean for student affairs (M.D. degree program). Dr. Elliott Vesseli, professor and chairman of pharmacology since 1968, is assistant dean for graduate education (Ph.D.-M.S. degree programs). Dr. Richard M. Bergland, professor of surgery and chief of neurosurgery since 1971, is assistant dean for continuing education.

Guidelines for Implementation of the Faculty Rights and Responsibilities Report of the University Faculty Senate

1. The preamble of the Report is not a part of the statement. It should be used for guidance on such matters as the meaning of academic freedom, professional ethics and procedural fairness.

2. The policy begins with Part II, A, Scope, beginning on page 4 of the Report.

The term faculty member shall include the Senate's definition of the electorate plus the research equivalent ranks as specified in the Policy Manual (PS-21). The definition is as follows: All persons who are not candidates for degrees at Penn State, who hold full-time academic appointments, and who fall into one of the following categories, those holding professorial, research or librarian titles, those who are full-time instructors or assistant librarians, and those other full-time academic employees who are members of the Graduate Faculty but who do not fall into either of the above categories.

3. Part II, B, (page 4 of the Report) defines the kinds of issues which the Committee may review. The Committee shall not consider the substantive academic judgment aspects of such matters as promotion, tenure, compensation, and evaluation of performance in such matters as those which procedural fairness may be reviewed. The Committee may not review petitions which are being or have been processed in the courts or through affirmative action.

4. Some persons who are not included in the definition of faculty members should also have access to these procedures.

The use of the masculine gender is solely for convenience. The term ombudsman may apply to both men and women who perform this role.

For those matters specified in Part II, C, this provision shall apply to professional employees involved in teaching, research or creative activities who are attached to a research unit or an academic college. This would also include the following categories: part-time (with at least a six months appointment), visiting, clinical, and adjunct.

6. Paragraph II, C, 3, describes other matters that may come under the jurisdiction of the Committee on Faculty Rights and Responsibilities. These other matters shall not be defined so as to include cases which are being or have been processed in court, or through affirmative action.

6. In such cases as described in paragraph II, C, the only place for hearing is through the Standing Joint Committee on Tenure.

7. Procedures for the establishment of conciliatory mechanisms (Part III).

A. Ombudsmen shall be appointed in the following colleges, campus and academic units, the ten academic colleges at University Park, the Library, each of the 17 Commonwealth Campuses, the Behrend College, the Capital Campus, the King of Prussia Graduate Center, and the Milton S. Hershey Medical Center.

For those not associated with one of these academic units or in cases where the appropriate ombudsman may be in doubt, the following policy shall be applied:

1) Where appropriate, the ombudsman will be the same as the academic unit to which the employee is most closely associated. For example, research

(Continued on page four)

Three-year term, expiring June, 1976 — Roy C. Buck, Liberal Arts; Richard Cragg, Agriculture; Robert J. Scannell, dean, Health, Physical Education and Recreation.

Two-year term — Jeanne L. Smith, Ogontz Campus; E. T. Z. Sun, Liberal Arts; James B. Bartoo, dean, Graduate School.

One-year term — Robert J. Graham, Capitol Campus; Elizabeth M. Ray, Education; Stanley F. Paulson, dean, Liberal Arts.

Elects as Alternates:

Three-year term, expiring June, 1976 — Charles L. Hosler, Jr., dean, Earth and Mineral Sciences; Richard A. Master, Behrend College; Theodore R. Vallance, Human Development.

Two-year term — Henry W. Moehling, Berks Campus; Donald R. Olson, Engineering; Nunzio J. Palladino, dean, Engineering.

One-year term — Raymond G. Ayoub, Science; Daniel Katkin, Human Development; Thomas Wartick, dean, Science.

EDITOR'S NOTE: On page four of this issue of INTERCOM is the complete text of the Report of the Joint Subcommittee on Faculty Rights and Responsibilities of the University Faculty Senate, as passed May 8, 1973. At left on this page are the Administrative Guidelines to be used in implementing the Report, as transmitted by President Oswald to Senate Chairman Dr. Ernest Bergman. Some additional copies of this issue of INTERCOM are available and will be sent, on request, as long as they last. Call 865-7817 or address the request to INTERCOM, 312 Old Main.

September 14, 1973

Dr. Ernest Bergman
Chairman of the
University Faculty Senate
204 Wilbur Building
University Park, Pennsylvania 16802

Dear Dr. Bergman,

The consultative process on administrative guidelines for the Implementation of the Faculty Rights and Responsibilities Report has been completed. A copy of the guidelines is enclosed. I would like to restate some important points relative to the Implementation of this new policy.

1. The new policy is effective as of September 1, 1973. No action taken before that date will be subject to the committee's consideration.

2. The procedures in this new policy must not be considered as replacing the regular administrative decision-making channels of the department or division heads, campus deans, and deans.

3. The newly formed Senate Committee on Faculty Rights and Responsibilities will confine itself to consideration of alleged violations of academic freedom, professional ethics and procedural fairness. The burden of proof in establishing a prima facie case shall be on the complaining party. The Committee's jurisdiction is precluded from considering the substantive academic judgment aspects of such matters as promotion, tenure, compensation, and evaluation of performance.

4. This new policy, as other policies, is subject to continue our review and revision.

I am pleased that the Senate and the administration have been able to cooperate so well in developing this new policy. As you suggested in your letter of July 26, 1973, the new policy will be incorporated into the Policy Manual.

Sincerely,
John W. Oswald

Dean Kern dies at age of 90

Dr. Frank D. Kern, the first dean of the Graduate School, died early Friday, Sept. 28, at the age of 90. Trustees of the University in 1971 named the new Kern Graduate Bldg. for him, recognizing his 37 years of service, which included also appointments as professor and head of the Department of Botany prior to his retirement with emeritus rank in 1950. He became professor and head of the Department of Botany at Penn State in 1913, after serving as special agent for the Bureau of Plant Industry of the U.S. Department of Agriculture, as botanist at the Agricultural Experiment Station and Instructor at Purdue University, and as research scholar at the New York Botanical Garden. He received the bachelor of arts degree from the University of Iowa, the master of science degree from Purdue, and the doctor of philosophy degree from Columbia University. In 1922, when the Graduate School at Penn State was formally established, Dr. Kern was named dean. During the next 28 years he directed the development of graduate programs in numerous fields. A noted botanist, Dr. Kern twice served one-year terms, in 1926-27 and 1933-34, as acting dean of the University of Puerto Rico's Colleges of Agriculture and Engineering while on leaves of absence from Penn State. The University of Puerto Rico conferred upon him the honorary degree of doctor of science in 1926. Since his retirement, he has published more than 20 papers, and earlier this year he published a new book to revise and update research he started 60 years ago on a genus of fungi known as cedar apple rusts. His botanical research throughout his career was concerned most notably with rusts and other fungus diseases in plants and resulted in numerous articles and research papers. Dean Kern was honored in 1958 by the American Phytopathological Society on its 50th anniversary as a charter member and as author of the first scientific paper published by the Society.

Retirement

Dr. A. Chester Richer, professor of soil science, retired Oct. 1, just 39 years after he joined the faculty in the College of Agriculture. He was a recent graduate in agronomy in 1934 when he joined the faculty as an assistant. He received his M.S. degree the following year and in 1940 was granted the Ph.D. He was named professor of soil technology in 1952. In 1968 he received the Christian R. and Mary F. Lindback Award for Distinguished Teaching. From 1947 until retirement, he taught a basic course in soil science to more than 6,000 students and in more recent years also had a course in biological science. But he was also advisor to many graduate students, of whom a number have entered the teaching profession. His research was in the areas of soil chemistry, soil organic matter, and soil microbiology. He is the co-author of the textbook, "Producing Farm Crops." For his outstanding contributions to the field of soil science, he was honored in 1970 with the Pennsylvania Plant Food's "Man of the Year" award. He is a Fellow of the American Association for the Advancement of Science.

News in Brief

USMC BIRTHDAY

The U.S. Marine Corps will celebrate its 198th birthday Nov. 10, and the event will be noted at a dinner, dance, and ceremony at the Elks Club. The Marine Officer Instructor at the University wishes to include all regular, reserve, retired, and former Marines in the State College area in the mailing list used to send invitations for the affair. Anyone eligible who does not believe he is on the list should get in touch with Major Roger K. Ryman or GYSGT Steve Valent at 865-4052, at the office, or in the evenings at 237-1738 or 237-5666.

WOMEN AND CANCER

In a program sponsored by Sigma Delta Epsilon, women's professional society in science, Wednesday, Oct. 10, at 8 p.m., in Room 101 Kern, the public is invited to see three films on women and cancer, with a demonstration of breast examination by a registered nurse.

Hospital coverage review urged

Faculty and staff members of the University should review periodically the deduction taken for their hospital coverage to be certain that they are paying for the correct coverage.

The reason the review should be made is that changes in family status may affect your costs and your coverage. For example, when you get married, when you have a first child, or when your spouse stops working for the University, you run the risk of having inadequate dependent coverage unless you do something about it.

You should check your coverage if any of the following circumstances arise:

1. Your spouse or child begins working for the University as a regular employee.
2. Your spouse or only child dies.
3. You are divorced.
4. Your only dependent child enters military service or reaches his 18th birthday (or 23rd birthday in the case of a full-time student).
5. Your only dependent child gets married.
6. Your spouse reaches age 65.

PIANO RECITAL

A piano recital, scheduled in conjunction with the "Three Swiss Painters" exhibit, will be presented by Swiss pianist Elisabeth Helm at 3 p.m., Sunday, October 7, in the Museum's Gallery C. Miss Helm, a champion of young Swiss avant-garde composers, will play 20th century Swiss piano music. The recital will be followed by a reception in Gallery C at 5 p.m. Tickets are available at the Museum Store during the week prior to the performance, at \$1.00 per student, \$1.50 for nonstudents.

THALIA TRIO

The Thalia Trio will perform works by Mozart, Sowell, and Brahms in a concert on Wednesday, October 10, at 8:30 p.m., in the recital hall of the Music Building. Robert Baisley, pianist, Joanne Zagst, violinist, and Leonard Feldman, cellist, combined to form the chamber music trio in 1967.

How do you know if you have the right coverage or are paying the right amount? Compare the amounts shown on your salary check stub with the amount you should be paying as shown in the following table.

INSURED PERSONS	MONTHLY	BI-WEEKLY
Employee, only	None	None
Employee, child, children	\$1.75	\$0.80
Employee, spouse	\$3.60	\$1.66
Employee, spouse, child or children	\$5.00	\$2.30

(These rates apply when all insured persons are under age 65. Persons over age 65 are insured in a different plan on a cost.)

If a change should be made, call, write or visit the Employee Benefits Division, 133 Willard, 865-1473. The University has no way of knowing whether a change should be made, so it is the employee's responsibility to keep the records up to date and accurate. No refunds for overpayment will be made unless it is shown the University was in error.

Service Award

Harold D. White, Jr., right, associate professor of physical education, receiving the 26-Year Service Award from College of Health, Physical Education and Recreation Dean Robert J. Scamell, actually began his service in the College of Agriculture. He was instructor in Rural Sociology Extension when he joined the faculty in September, 1948, becoming assistant professor in 1951, as a recreation specialist. A year later he was appointed assistant professor of physical education when a formal program of student activities clubs was instituted. Since then he has been the important cog in the program that gets some 5,500 students into extra-curricular activities ranging from archery to water polo. A University of Massachusetts graduate with a B.S. in recreational leadership, Hal had gone to college after serving four years in the U.S. Army. He was an executive in Boy Scout work in Colorado and was director part time in a youth center in New Hampshire before coming here in 1948. He subsequently earned a master's degree in education at U. of Mass. in 1951.

Wilkinson Award

The John E. Wilkinson Award for Administrative Excellence in the University was presented last week to Kenneth L. Holderman, third from left above. President Quast made the presentation of the award which was established in 1970 to honor a University administrator for outstanding achievement. At right is Mr. Wilkinson, Bellefonte businessman, for whom the award is named and at left is Sy Barash, State College businessman and treasurer of the group which sponsors the award. Holderman, who has served the University since 1960, is vice president for Commonwealth Campus; previously he had been in the College of Engineering, from 1940 to 1959, primarily in extension activities. He was assistant dean of the College at one time. Previous winners of the award were the late Dr. Paul Althaus, provost, and John V. Pezzoni, manager of the employee benefits division of the department of personnel administration.

ARTS —

(Continued from page one)

have the present Schwab Auditorium which will handle audiences up to 800, and the new University Auditorium, scheduled to open next Spring, which will be used for audiences numbering between 800 and 2,600. Larger groups for cultural events will be accommodated in Recreation Bldg., and the Office of Auditorium Management will coordinate them.

Dean Walters will have the counsel of two advisory committees. An Activities Advisory Committee will consider matters of policy concerning the events eligible to use the auditoriums, suggest improvements in services, and assist in determining priorities for use of the facilities.

Members of this Committee, each of whom will serve a two-year term, include the manager of auditoriums, representatives of various user groups appointed

by the University Provost, one undergraduate student appointed by the president of the Undergraduate Student Government, and one graduate student named by the president of the Graduate Student Association.

A Management Advisory Committee has also been established which will advise Dean Walters and the manager of auditoriums on improvements in management, operations and procedures, personnel management, and budgetary matters. The Provost has appointed this five-member Committee, also for two-year terms. Serving are L. P. Greenhill, assistant vice president for academic services; Dr. Melvin S. Klein, director of student activities; George R. Lovette, assistant vice president for business; David R. Schuckers, director of University relations; and Henry L. Yentley, Jr., assistant vice president for physical plant.

University Calendar

October 4-14, 1973

Special Events

Thursday-Friday, Oct. 4-5 — Five O'Clock Theatre, Pavilion, 5:20 p.m., Thursday; 7:20 p.m., Friday.
Friday, Oct. 5 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Friday, Oct. 5 — Free-Y Jammy, 7:30-11:30 p.m., HUB ballroom.
Saturday, Oct. 6 — Sports: Cross Country, vs. West Virginia; Rugby, vs. Rutgers, 2 p.m.
Saturday, Oct. 6 — Free-Y children's film, 12:30 and 2:30 p.m., HUB assembly room.
Sunday, Oct. 7 — Elsiebeth Helm, piano recital, 3 p.m., Museum of Art, Gallery C.
Sunday, Oct. 7 — Sigma Chi Derby Day, 1-4 p.m., HUB lawn.

Sunday, Oct. 7 — Chapel Service, 11 a.m., Eisenhower Chapel. Charles L. Coleman, Religious Affairs.
Sunday, Oct. 7 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Monday, Oct. 8 — Anne Reynolds, graduate student, piano recital, 8:30 p.m., Music Bldg. recital hall.
Wednesday, Oct. 10 — Thaila Trio, 8:30 p.m., Music Bldg. recital hall.
Wednesday, Oct. 10 — Sigma Delta Epsilon, film on cancer detection, 8 p.m., Room 101 Kern.
Friday, Oct. 12 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Friday, Oct. 12 — Sports: Freshman Football, vs. Delaware, 3 p.m.

Friday, Oct. 12 — Young Socialists, social event, 7-12 p.m., HUB ballroom.
Saturday, Oct. 13 — Artists Series, "Two Gentlemen of Verona," 8:30 p.m., Rec Hall.
Saturday, Oct. 13 — Sports: Women's golf, vs. SUNY-Buffalo, 10 a.m.
Saturday, Oct. 13 — WHRA Record Hop, 8 p.m., HUB ballroom.
Saturday, Oct. 13 — Sports: Football, vs. Army, 1:00 p.m., Beaver Stadium.
Sunday, Oct. 14 — Raymond Brown, voice recital, 3:30 p.m., Music Bldg. recital hall.
Sunday, Oct. 14 — Chapel Service, 11 a.m., Eisenhower Chapel. Donald A. Webb, Methodist Theological School in Ohio.
Sunday, Oct. 14 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Lectures

Thursday, Oct. 4 — Dr. D. Garfinkel, Moore School of Engineering, on "Computer Application in Medicine," 8 p.m., Room 110 Osmond. Sponsored by ACM Chapter.

Seminars

Thursday, Oct. 4 — Chemistry, 12:45 p.m., Room 310 Whitmore. Richard P. Vandyne, Northwestern University, on "Applications of Nanosecond Photon Timing Experiments to Chemistry."
Thursday, Oct. 4 — Physics, 3:35 p.m., Room 117 Osmond. Malvin A. Ruderman, Columbia University, on "Relativistic Theories of Composite Systems."
Thursday, Oct. 4 — Agronomy, 3 p.m., Parking Lot Blue C. L. T. Kardos, soil physics, on "The Living Filter." Field Trip.
Thursday, Oct. 4 — Microbiology, 11 a.m., Room 71 Willard. Dr. Perry L. McCarty, Dept. of Civil Engineering, Stanford University, on "Biological Nitrification and Denitrification of Waste Waters."
Thursday, Oct. 4 — Computer Science and Physical Chemistry, 4 p.m., Room 101 Althouse. Dr. D. Garfinkel, Moore School of Electrical Engineering, on "Computer Modeling of Complex Biochemical Systems."
Thursday, Oct. 4 — Anthropology, 3 p.m., Room 101 Kern. Dr. Carol P. Hoffer, Franklin and Marshall College, on "Bundu: Political Implications of Female Solidarity in a Secret Society."

Monday, Oct. 8 — Genetics, 3:55 p.m., Room 111 Tyson. Dr. Wallace Snipes, on "The Nature and Genetic Control of Phospholipid Synthesis in Cells Infected with a Liquid-Containing Bacterial Virus."
Monday, Oct. 8 — Physics Solid State, 4 p.m., Room 339 Davey. Dr. R. L. Park, Sandia Laboratories Albuquerque, New Mexico.
Monday, Oct. 8 — Analytical Chemistry, 1 p.m., Room 310 Whitmore. John Lynch on "Advances in Thermometric Titrimetry."
Monday, Oct. 8 — Health, Physical Education and Recreation, 7:30 p.m., Room 112 Kern. Dr. David R. Maneval, Science Advisor for the Appalachian Regional Commission, on "Utilization of Mining Lands for Recreation."
Tuesday, Oct. 9 — Graduate Air Pollution Control, 2:20 p.m., Room 140 Fenske Lab. Dr. R. J. Anderson, Director, Environmental Policy Center, on "Some Thoughts on Current Air Pollution Control Policies."
Tuesday, Oct. 9 — Engineering Mechanics, 4 p.m., Room 215 Hammond. Dr. Eugene E. Watson, on "Sound Radiation Detection by Long-Wavelength Acoustical Holography."

Tuesday, Oct. 9 — Comparative Literature luncheon, 12:15 p.m., HUB dining room A. Otto Poegeleier.
Tuesday, Oct. 9 — Operations Research, 2:45 p.m., Room 267 Willard. Dr. E. Emory Ensore on "Multistage Leontief Systems with Dynamic Characteristics."
Wednesday, Oct. 10 — Ceramic Science, 4 p.m., Room 244 Deike. Dr. J. I. Goldstein, Lehigh University.
Wednesday, Oct. 10 — Fuel Science, 4 p.m., Room 341 Deike. Dr. Philip M. Becker on "How Methane Burns."
Thursday, Oct. 11 — Computer Science, 4 p.m., Room 101 Althouse. Dr. M. Carey, Bell Laboratories, New Jersey, on "Bounds on Scheduling with Limited Resources."
Thursday, Oct. 11 — Physics, 3:35 p.m., Room 117 Osmond. Robert Gomer, University of Chicago, on "Recent Developments in Surface Physics."
Thursday, Oct. 11 — Chemistry, 12:45 p.m., Room 310 Whitmore. W. E. Billups, Rice University, on "Thermal Hydrocarbon Rearrangements."
Thursday, Oct. 11 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. R. M. Leach, poultry science, on "Heavy Metals and the Food Chain."
Friday, Oct. 12 — Ceramic Science, 4 p.m., Room 244 Deike. Dr. Barry Koepke, Honeywell.

Meetings

Thursday, Oct. 4 — College of Engineering Faculty, 3:30 p.m., Room 26 Mineral Sciences.
Thursday, Oct. 4 — USG Academic Assembly, 7:30-9 p.m., Room 203 HUB.
Monday, Oct. 8 — College of Education Student Council, 7:30-8 p.m., Room 317 Boucke.
Monday, Oct. 8 — OTIS, 6:30-7:30 p.m., HUB assembly room.
Monday, Oct. 8 — USG Senate, 7:30-10:45 p.m., HUB assembly room.
Monday, Oct. 8 — Panel Council, 6:30 p.m., Kappa Delta, Cross Hall.
Tuesday, Oct. 9 — Engineering Undergraduate Council, 7:30 p.m., Room 207 Sakell.
Tuesday, Oct. 9 — ARHS, 7:30-9:30 p.m., Room 203 HUB.
Tuesday, Oct. 9 — University Faculty Senate, 7:10 p.m., Room 112 Kern.
Wednesday, Oct. 10 — A.W.S., 7 p.m., Room 203 HUB.
Wednesday, Oct. 10 — Earth and Mineral Sciences Student Council, 6:15 p.m., Room 244 Deike.

Films

Thursday, Oct. 4 — International Films, 7 and 9 p.m., HUB assembly room. "Two Daughters," directed by Satyajit Ray.
Friday-Saturday, Oct. 5-6 — Student SF films, 7 and 9 p.m., HUB assembly room. "M."
Saturday, Oct. 6 — USG films, 7-12 p.m., HUB ballroom. Marx Brothers, Spanky and Cur Gang, etc.
Wednesday, Oct. 10 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "The Wild One."
Thursday, Oct. 11 — International Films, 7 and 9 p.m., HUB assembly room. "Alphaville," directed by Jean-Luc Godard.
Friday-Saturday, Oct. 12-13 — Student SF films, 7 and 9 p.m., HUB assembly room. "The Thing."

WPSX highlights

Friday, Oct. 5: At 7:30 p.m., "People, Places, Things, Now" presents the WPSX production of "They Just Faded Away (A Vietnam Homecoming)," a half-hour documentary about the physical, economic, and psychological frustrations and problems facing many of Pennsylvania's Vietnam era veterans. At 8:30 p.m., "Wall Street Week" returns for another season of stock market news with a look at the cost of living.
Saturday, Oct. 6: At 2 p.m., "The Advocates" begin a new series of debates on current issues by asking "Should the Senate Watergate Hearings Stop Now?" A series of limnaker Frederick Wiseman's cinema verite documentaries begins at 8:30 p.m. with his "Basic Training," a look at a soldier's first weeks of life in the U.S. Army.
Sunday, Oct. 7: The Alard String Quartet performs three quartets by Joseph Haydn on the first program of "The Classical String Quartet" at 8 p.m. Folk and rock music and where they

stood when they met in 1970 provide the focus of "Folk-Rock 1970," featuring top folk and rock musicians, at 8 p.m. At 9 p.m. Ian Carmichael stars as Lord Peter Wimsey, Dorothy Sayers' British detective hero, when "Mystic Picture Theatre" brings a five-part dramatization of "Clouds of Witness."

Monday, Oct. 8: At 8 p.m., "The PBS Special of the Week" presents an evening with the American Ballet Theatre, America's oldest and most distinguished dance company, featuring a complete production of Antony Tudor's "Pillar of Fire," as well as excerpts from their extensive repertoire. Pennsylvania's 195, the law that allows public employees to unionize and bargain with employers is examined by teachers, legislators, and school administrators on the first program of "Overview" at 9:30 p.m.
Wednesday, Oct. 10: At 7:30 p.m., Nittany Lion Coach Joe Paterno and co-coaches Jim Termon and Fern Fisher review and analyze Penn State's game with Air Force on "TV Quarterbacks."

Interest Groups

Alpha Phi Omega, Mondays, 7 p.m., Room 308 Boucke.
Archery Club, Mondays, Wednesdays, Thursdays, 7 p.m., Room 33 White.
Chess Club, Wednesdays, 6:30 p.m., HUB card room.
Chess Team, Thursdays, 6:30 p.m., Room 106 Sackell.
Coed Gymnastics Club, Mondays, 7:30 p.m., Rec Hall, South Gym; Thursdays, 7:30 p.m., White gymnastics room.
Eco-Action, Mondays, 8:30 p.m., Room 301 Boucke.
Focus on Sweden, Tuesdays, 7 p.m., Room 312 Boucke.
Free-Y, Mondays, 7 p.m., Room 203 HUB.
Gamma Sigma Sigma, Tuesdays, 7 p.m., Room 303 Boucke.
Interludia Folk Dancers, Sundays, 7:30 p.m., HUB ballroom.
Keystone Society, Wednesdays, 7-8:30 p.m., Room 304 Boucke.
S.I.M.S., Wednesdays, 8 p.m., Room 108 Forum; Thursdays, 8 p.m., Room 101 Chambers.
Young Socialists, 7:30 p.m., Mondays, Room 167 Willard; Wednesdays, Room 62 Willard.
PSOC, Cane division, Thursday, Oct. 4, 7:30 p.m., Room 214 Boucke.
Ukrainian Club, Thursday, Oct. 4, 8 p.m., Room 50 White. Folk dancing; public welcome.
Circle K, Thursday, Oct. 4, 7:30 p.m., Room 67 Willard.
Penn State Young Republicans, Monday, Oct. 8, 7 p.m., Room 369 Willard (subject to change).
PSOC, Mountaineering division, Tuesday, Oct. 9, 7:30 p.m., Room 214 Boucke.
Nittany Grotto, Wednesday, Oct. 10, 7:30 p.m., Room 273 Willard.
Penn State Sports Car Club, Wednesday, Oct. 10, 7:30-9 p.m., Room 363 Willard.
Films.
Campus Gold Girl Scouts, Tuesday, Oct. 11, 7 p.m., Cross Hall lobby.
PSOC, Sailing division, Thursday, Oct. 11, 7:30 p.m., Room 214 Boucke.

Exhibits

Museum of Art — Three Swiss Painters, Galleries A, B, C.
Zoller Gallery, Visual Arts — Silman and Albers, until Oct. 12.
Kern Gallery — Black Images, photography, ACU-1, until Oct. 6. June Stoyer, acrylics, Marilyn Dwyer, palette knife, opening October 7. DuWayne Milloties, photography, opening October 7.
Paltee Library, Circulation Lobby — "Retrospect," Janet Dougherty. Arts Lobby, 10 Eastern European Prints.
Sackell Building Gallery, third floor — Architectural models, until October 5.

Official

Saturday, Oct. 6 — Last date for a December graduate to deliver doctoral thesis to committee.
Saturday, Oct. 13 — Last date for a December graduate to deliver Master's Thesis or Paper to adviser.
Saturday, Oct. 13 — Last date for final oral doctoral examinations for December graduates.

Artists Series

The 1972 Tony Award for Best Broadway Musical was given to the pop musical "Two Gentlemen of Verona," which will be featured on the Artists Series Saturday, Oct. 13, at 8:30 p.m. in Recreation Building. Produced by Joseph Papp and the New York Shakespeare Festival, the musical has been a hit wherever it has played on tour and is on Broadway. Tickets for the single performance will go on sale to the general public Wednesday, Oct. 10, at 3 a.m. in the HUB; for students, the sale begins Tuesday, Oct. 9, also at 3 a.m.

Undergraduate studies director

Committee seeks division head

A nine-member faculty-student committee has been appointed to seek nominees for the directorship of the new Division of Undergraduate Studies. Dr. Robert E. Dunham, vice president for undergraduate studies, has announced.

The committee is to consider all potentially qualified candidates and will submit a list of four or five candidates who committee members believe to be most highly qualified for the post. Completion of the committee's assignment is expected by Jan. 1.

The Board of Trustees, at its Sept. 28 meeting, approved establishment of the Division of Undergraduate Studies as an academic unit to improve student advising and enroll students unsure of their academic goals.

Dr. Harvey W. Wall is serving as acting director of the Division, which was developed out of extended investigations con-

ducted jointly by faculty and administrators and approved by the University Faculty Senate.

Dr. Asa J. Berlin, associate professor of speech pathology, serves as chairman of the search committee. Members are Dr. Jefferson D. Ashby, counselor with the Career Development and Placement Center; Dr. Thomas E. Daubert, associate professor of chemical engineering; Ronald G. Hoover, assistant professor of English at the Altoona Campus; Dr. W. Lamar Kopp, associate professor of German and assistant dean in the College of the Liberal Arts; Dr. Mary L. McCammon, associate professor of mathematics; Dr. Eugene R. Melander, professor of quantitative business analysis and assistant vice-president for undergraduate studies; Cynthia R. Beach, sophomore in man-environment relations at the Altoona Campus; and Bruce A. Hild, sophomore in counseling.

Through a course improvement grant

Radical revision made in basic psych course

A radical revision of Psychology 13, Introduction to Developmental Psychology, has been completed by Dr. Francis J. Whaley, associate professor of psychology at Penn State, and Dr. Penny Ziegenfuss, assistant professor of child development at the University of Delaware, who will be offered at both schools.

Funds for the project were supplied

through a course improvement grant by the office of Dr. Robert E. Dunham, vice president for undergraduate studies. Almost 100 hours of videotapes were made using the facilities of the Division of Instructional Services.

The revised course now contains little format "lecturing," according to Dr. Whaley, with most of the tapes devoted to vis-

News in Brief

CLEOPATRA

"Cleopatra" will be the subject of a talk by writer and lecturer Michael Grant, Wednesday, Oct. 17, at 8 p.m. in the HUB Assembly Room. The program is sponsored by the Graduate School Lecture Committee and the Department of Classics. A scholar and specialist in Roman coinage, Dr. Grant has written, edited, and translated more than 25 books, ranging in subject from "Roman Imperial Money" to "Herod the Great," "Julius Caesar," "Gladiators," and "Nero, Emperor in Revolt." His most recent volume, "The Jews in the Roman World," has just appeared in Great Britain.

WOODWIND QUINTET

The new Clarion Woodwind Quintet of the Department of Music will make its debut performance at 8:30 p.m., on Friday, Oct. 12, in the recital hall of the Music Bldg. The quintet, composed of Overde Page, flute, Gregory Donovetsky, oboe,

Smith Toulson, clarinet, and new faculty members William Dole, bassoon, and Christine Dole, French horn, was formed since the beginning of the current term. Danzi's "Quintet, Opus 67, No. 2" will be among the program selections, as will Lefebvre's "Suite, Opus 57," one of the few quintets written during the Romantic period. Compositions by Bozza and Francaix will complete the program.

MUSEUM TRIP

A one-day trip to the University of Pennsylvania Museum and the Philadelphia Museum of Art will get underway at 7:30 a.m. Saturday, Oct. 20, departing from the HUB.

The trip is being sponsored by the Institute for the Arts and Humanistic Studies, in conjunction with the Medieval Studies and Comparative Literature Programs, and is open to all members of the University community.

Guided tours will be provided to Penn's well-known Mesopotamian collection and the medieval materials at the Philadelphia Museum. Each participant is asked to contribute \$6.35 toward the cost of chartering the bus, and checks may be sent to Prof. Caroline Eckhardt, Department of English. The bus will be filled on a first-come, first-served basis.

This is the second trip sponsored by the Institute. Last year, a group visited the Cloisters Museum in New York City.

Coeducational team to start with riflery

Interest growing in women's varsity sports

When Della Durant transferred to Russell Sage College in her sophomore year, she was an English major, but somehow all the compositions she wrote seemed to be about sports.

"So I finally decided that's where I belonged," she recalls, "and switched my major to phys ed."

After obtaining her B.S. in 1950, the Great Barrington, Mass., native taught for a year at a private girls' school in New Jersey and then for four years at the

University of Delaware. In 1955, she returned to school, earning her master's degree in physical education at Penn State, where she has remained.

Women's lib and female stars like Billie Jean King are creating a new image for women in sports, but Miss Durant quietly began helping athletically talented college women develop their potential long before it was fashionable.

Her contributions were recognized last summer when she was named director of

intercollegiate athletics at the University. She has also been elected treasurer of the Association for Intercollegiate Athletics for Women (A.I.A.W.), the national organization which runs women's sports competitions and establishes policy guidelines. Combining the two roles, she is utilizing experiences gained at the University to help revise A.I.A.W.'s most director's handbook.

Penn State currently fields 11 women varsity teams (the men have 14). They are basketball, bowling, fencing, field hockey, golf, gymnastics, lacrosse, riflery, softball, swimming and diving, and tennis.

"Our program grew out of the Women's Recreation Association," Miss Durant explains. "W.R.A. couldn't finance competitions, since it was, and is, a recreational program with clubs, interest groups, and intramural teams on which anyone can play. There were, however, a number of highly skilled women athletes on campus whose needs were not being met, because the level of W.R.A. competition was not challenging enough for them."

Interest among Penn State's women in varsity competition coincided with a national trend in the sixties. A Commission on Intercollegiate Sports for Women was established (to be replaced in 1971 by A.I.A.W.), and rules for national competitions were formulated.

Miss Durant had been serving as advisor to W.R.A. since 1959, and when Penn State's new program began in 1964, she assumed the title of coordinator of women's varsity sports.

"Today, we have one intercollegiate pro-

gram in sports at the University," she emphasizes. "In most sports, we do have separate teams because of differences in strengths between men and women and the danger of contact sports resulting in unequal competition. Also there are different rules in certain sports, such as basketball, depending on whether they are played by men or women."

"Next year, however, we plan to field a coeducational riflery team. Our men and women swimmers and divers practice together, and we are organizing a field and track club for women. We want to offer a quality program for both sexes, so we are constantly alert to equalize opportunities." Women players do not hesitate to bring what they consider evidence of discrimination against them to the attention of Miss Durant and their coaches. One of their pet peeves is a lack of publicity for their efforts.

"It's frustrating for a team to work hard getting ready for a game and then not have anyone come out to see them play," Miss Durant continues. "Newspapers just don't pay as much attention to women's sports as men's, but we have had a graduate assistant assigned to us to try and get more publicity for the girls."

"We try to ensure that the members of a winning women's team get the same kind of awards as their male counterparts; if the men receive a big trophy, the women shouldn't get a fapel pin. We are working on the problems of getting additional training assistance and equipment for women and providing meals for teams which have to schedule practices during the dinner hour."

"As for recruitment and scholarships for women athletes, this problem is being reviewed regionally and nationally, and meet-

(Continued on page four)

Della Durant — women athletes maintain good grades too.

Retirees Dengler, Northrup die

Dr. Robert E. Dengler and Harry B. Northrup, two retirees who served the University for many years, died in the last week of September.

Dr. Dengler, professor emeritus of Greek, who was head of the department of Classics when he retired in 1955, died Sept. 30. Last June, he was honored by former students and colleagues with a reception anticipating his 80th birthday, which was passed August 29. He joined the faculty in 1920, after U.S. Army service in World War I and a short stint of teaching at the University of Pennsylvania, his alma mater. Penn also granted his master's and doc-

tor's degrees, and he also studied briefly at the Sorbonne. A member of a number of honor societies, including Phi Beta Kappa, he was a Fellow of the American Association for the Advancement of Science. He was author of a book on Theophrastus, successor of Aristotle, and of many articles and papers. Persons wishing to memorialize him may contribute to the Dengler Prize, which has been established by the Department of Classics as an annual award to students.

Harry Northrup, director emeritus of Earth and Mineral Sciences Extension, was 87 when he died Sept. 29 in North Carolina, where he lived. He retired in 1947 after serving the University in two periods, 1911-1920 and 1931-1947. He was associate professor of metallurgy in 1920 when he resigned to serve in industry, returning to the campus in 1931 to become director of Mineral Industries Extension Service.

Retirement

Dr. H. Beecher Chambury, who served as State Secretary of Mines and Mineral Industries from 1963 to 1971 while on leave from the faculty, retired Oct. 1 as assistant dean for planning and development in the College of Earth and Mineral Sciences. He plans to continue research and consulting projects. He joined the faculty in 1931, subsequently doing research and teaching in the areas of petroleum and natural gas engineering, fuel technology, mineral preparation, and mining. He values the contact with graduate and undergraduate students and being able to look back on the accomplishments of many of them. In his State service, he served under Governors Scrantom and Shafer and is credited with being the architect of "Operation Scarfill" to combat and erase the scars of a century of unrestrained mining in the State. He also developed methods to prevent stream pollution from mine drainage, eliminate air pollution from burning coal refuse dumps, eliminate hazardous underground mine fires, and also to solve other environmental and human problems related to mines and mineral industries. A graduate of Gettysburg College, he served the department of geology at the University of Pennsylvania, and also taught by Penn State. Gettysburg also conferred on him an honorary doctorate and its Distinguished Alumnus Award.

Appointment

The appointment of Dr. James T. McKeel as director of undergraduate admissions has been announced. Dr. McKeel has been serving as admissions director for advanced standing students in the Division of Admissions, Records and Scheduling. In his new position, he will be responsible for admission of all undergraduate students.

Dr. Robert E. Dunham, vice president for undergraduate studies, will oversee the Division of Admissions, Records, and Scheduling reports, said the appointment of a single officer responsible for the Undergraduate Admissions Office is an important step in the reorganization of the Division begun several years ago.

Dr. McKeel, who received his doctor of education degree from Penn State, joined the staff in 1965 as admissions counselor and research assistant. The following year he was named assistant director of admissions. Since 1967, he was appointed assistant admissions director. He served in that post until May 1, 1969, when he was named admissions director, advancing standing.

25-Year Service Award

Jack H. Vincent, assistant dean for student affairs in the College of the Liberal Arts, received the University's 25-Year Service Award from Dr. Arthur O. Lewis, Jr., associate dean for residential instruction recently, and Dean Stanley F. Paulsen added his thanks and congratulations. Although 1948 is the official beginning of Vincent's service to the University, his first contact was as a student, in the 'forties. He received a B.S. degree in 1937 and from 1938 to 1940 was a student scholar in economics while earning his M.A. degree. For the next two years he was at Cornell University, as instructor while taking graduate work. From 1942 to 1945, he held various positions as an economist with the U.S. Bureau of Labor Statistics and in the Economic Institute. He served in the U.S. Maritime Service in 1945, then was a marketing manager in a Wilkes-Barre firm before returning to Penn State as assistant professor of economics. In 1965, he was appointed assistant to the dean of the College of the Liberal Arts and earlier this year was named assistant dean for student affairs.

Artists Series has music, theatre

Tickets are still available for the performance of the pop musical, "Two Gentlemen of Verona," in Rec Hall Saturday, Oct. 13, at 8:30 p.m. And tickets will go on sale to the general public next Wednesday (Oct. 17) for the appearance Saturday and Sunday, Oct. 20-21, of the noted acting couple, Hume Cronyn and Jessica Tandy. The sale of student tickets will begin Tuesday, Oct. 16, at 9 a.m. All tickets are sold in the HUB.

"Two Gentlemen of Verona" was rated a very hilarious show by the New York Times' Clive Barnes. The Joseph Papp-produced show opened on Broadway in 1974 and ran for 18 months, winning the Tony Award for "Best Musical" of 1972. Since then it has played to sellout audiences every-

where it has travelled, playing for 15 weeks in Los Angeles.

The original Shakespearean play is believed to have been written in 1592, one of the Bard's earliest. It was turned into an opera in 1820, and in 1895 its performance drew from George Bernard Shaw the commendation of "a pleasant vaudeville." So Papp's treatment of the play as a musical, adapted by Mel Shapiro and John Guare with music by the "Hair" composer, Galt MacDermitt, has plenty of precedent.

Hume Cronyn and Jessica Tandy will perform "Two by Samuel Beckett." Cronyn will present the monologue by Krapp in the play "Krapp's Last Tape," and Jessica Tandy will do "Not I."

RADICAL—

(Continued from page one)

conductor makes a more indelible impression."

The instructor's role in the 24 taped lessons is largely limited to setting up and cueing examples of behavior, and the burden of the course's content is contained in the textbook as well as in a 300-page volume which Dr. Whaley and Dr. Ziegenfuss prepared.

"The manual includes typical outlines of the lectures, sample study questions, and data from any charts or graphs used on the tapes," Dr. Whaley points out. "We have also supplied a 'back-grounder' for each lesson, a mini-textbook with a summary of some content material that provides a perspective for viewing the tapes."

The use of video tape, even in color, gives the instructors great flexibility.

"We went into a child's home, for example, and filmed a case study," Dr. Whaley continues. "The cameras were present as he dressed in the morning, watched television, attended a day care center, and got ready for bed at night. Students can see just how a particular child and his family function. Another time, we shot footage of an adoption for a few minutes after two parents had received their new baby. This kind of immediacy would be pretty hard to present in a regular classroom."

Filming was done both at Penn State and Delaware, thus allowing students access to two very different populations. Centre County's small town, rural mix was supplemented by Wilmington's blacks, school dropouts, and children who had suffered some cultural deprivation.

"Obviously, there's a great advantage in having two people involved in planning,

selecting, producing, and editing material for a course," Dr. Whaley says. "Also, it's more interesting for the students to watch and listen to two people interact. By sharing production facilities and the completed product, both universities are realizing significant economies."

The tapes have been placed on cassettes, and with the new cassette play-back machines at Penn State's Listening-Learning Centers, students can view or review any of the lessons at their leisure. Dr. Ziegenfuss successfully tried out an independent study option with the course at Delaware this summer. Students used the cassettes to fit their own schedules and took exams when they wished.

Student reaction to the course has been excellent. Dr. Whaley and Dr. Ziegenfuss prepared a pilot series which was tested at both universities. Students at Penn State,

responding to a television attitude questionnaire at the beginning of the course were very negative about televised instruction.

Half of them regarded it unfavorably. 43.1 percent were neutral, and only 6.6 percent were favorable. By the end of the course, half were favorable, 28.4 percent neutral, and the unfavorable group had dropped to 21.6 percent.

Similarly, at the beginning of the course 65.7 percent said they would prefer to take Psychology 13 as a large lecture course, and 25.7 percent opted for the television alternative. After viewing the pilot film, 72.6 percent said they would prefer the course on television, while 27.4 percent chose the lecture version.

Results at Delaware were less clear cut, since television courses are a novelty of that campus.

Funding opportunities

For more information, call 865-1327 except where noted. The following systems are available and the general information provided. People with grants information for dissemination in this column should call the same number.

October 11, 1973

- (100-1) The National Endowment for the Humanities Education Program has a January 1, 1974 deadline for its Program Grants and Institutional Development Grants. Project and Planning Grants have a Nov. 1, 1973 deadline. Program grants support broad basic humanities programs which may be interdisciplinary and systems designed to improve the effectiveness of humanities instruction. Grants may range up to \$100,000 for a three-year period. Development grants implementing the selective development of resources in the humanities as determined through planning grants and ranging between \$100,000 and \$200,000 per year for a three- to five-year period starting at 80% funding.
- (100-2) The National Science Foundation RANN program has issued a program solicitation for a "Research of Subsystems for the Application of Solar Energy to the Heating and Cooling of Buildings." Several categories of research are specified including: Solar energy col-

lectors, storage subsystems, space cooling systems, assisted heat pumps, and advanced control heating and cooling systems; also alternative approaches to SE systems, evaluation of completed buildings with SE systems, systems analysis and simulation studies, scale economies of SE heating and cooling of large buildings, and demand analysis. Total program funding is expected to be \$2.5 million for 20-30 projects ranging from a low professional man-months to five equivalent professional man-months. Proposal guidelines are available. Proposals must be received by 5 p.m. EST, Nov. 28, 1973.

(100-3) The National Endowment for the Humanities (NEH) supports a program of Youth Grants in the Humanities funding projects initiated and conducted by students and other young persons. Grants are awarded for research, writing, film, and community projects in: history, philosophy, language, linguistics, literature, archeology, jurisprudence, art history and criticism, and humanistic social sciences. Six-month projects are given preference; 15 months is the maximum grant period. Grants for individual projects are normally under \$20,000 but grants group projects may range up to \$100,000. A preliminary proposal or inquiry should be made two months before the formal application deadline. The next three formal deadlines are Nov. 15, 1972; April 15, 1973; and Aug. 1, 1974. (It is suggested that faculty pass this information along to students, undergraduate and graduate.)

(100-4) Women who wish to return to teaching "after a hiatus in their professional careers of three years or more" and who are not cur-

rently employed as a teacher or registered as a graduate student may apply for \$4000/year On-fellowship. These 1974-1975 awards will be made by the American Heart Association (Pennsylvania affiliate), P.O. Box 2435, 2743 N. Front St., Harrisburg, Pa. 17105. Application deadline is Oct. 31, 1973.

(100-4) Business and Professional Women's Foundation (2012 Massachusetts Ave., N.W. Washington, D.C. 20036, 202-293-1200) offers fellowships for men and women performing research related to working women. There is special interest in the participation of women in political life and community action, counseling of women and girls, students, vocational guidance clinics, women in management. Applicants must be U.S. citizens, doctoral candidates. Stipends range from \$500-\$3000/year. Application deadline is Jan. 1, 1974. One fellowship is open to a Latin-American currently enrolled in a U.S. Graduate School. For further information and application forms write to address given.

(100-7) Ford Foundation (320 E. 43rd Street, New York 10017) has announced its program

of fellowships for Mexican Americans, Native Americans and Puerto Ricans for 1974-75. Applicants must be U.S. citizens enrolled in or planning to enter a U.S. Graduate School in a major offering the doctorate and planning a career in higher education. Stipends are \$250/month and \$50/month per dependent child, a \$300 administrative stipend. Fellowships are for one year, but can be renewable. Graduate Record Examination scores on the Oct. 27 or Oct. 8 tests (December and Nov. 13) are required. The application deadline is Jan. 5, 1974. For further information and application forms write to address given.

REMINERS—DEADLINE DATE
Nov. 1 for NEH Project Grants and Planning Grants (Sept. 20 INTERCOM #39-3) ... Nov. 7 for USSF and Eastern Europe exchange visits (Sept. 20 INTERCOM #39-3) ... Nov. 30 (extended) for NSF Undergraduate Research Participation and NSF Secondary School Student Teacher Training program; and Nov. 30 for NSF Student Originator program (Sept. 6 INTERCOM #39-3) ... Nov. 19 for NEH Research Grants (Sept. 20 INTERCOM #39-4) ... Oct. 1 for NHL Pulmonary Research Grants and NSF Engineering Research Fellowships (Sept. 27 INTERCOM #39-1 and #39-2) ... Jan. 11 for Opt. Internat. (OVR) unsolicited research proposals (Sept. 20 INTERCOM #39-1).

University Calendar

October 11-21, 1973

Special Events

Friday, Oct. 12 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Friday, Oct. 12 — Sports: Freshman Football vs. Delaware, 3 p.m.
Friday, Oct. 12 — Young Socialists, special event, 7-12 p.m., HUB ballroom.
Saturday, Oct. 13 — Artists Series, "Two Gentlemen of Verona," 8:30 p.m., Rec Hall.
Saturday, Oct. 13 — Sports: Women's golf vs. SUNY-Buffalo, 10 a.m. Football vs. Army, 1:30 p.m., Beaver Stadium.
Saturday, Oct. 13 — WHRA Record Hop, 8 p.m., HUB ballroom.
Sunday, Oct. 14 — Raymond Brown, voice recital, 3:30 p.m., Music Bldg. recital hall.
Sunday, Oct. 14 — Chapel Service, 11 a.m., Eisenhower Chapel. Donald A. Webb, Methodist Theological School in Ohio.

Seminars

Thursday, Oct. 11 — Engineering Acoustics, 4 p.m., Room 71 Willard. Dr. John C. Snow, on "Isolation and Absorption of Machinery Vibration."
Thursday, Oct. 11 — Computer Science, 4 p.m., Room 101 Althouse. M. R. Garey, Bell Laboratories, New Jersey, on "Bounds on Scheduling with Limited Resources."
Thursday, Oct. 11 — Physics, 3:35 p.m., Room 117 Osmond. Robert Gomer, University of Chicago, on "Recent Developments in Surface Physics."
Thursday, Oct. 11 — Chemistry, 12:45 p.m., Room 310 Whitmore. W. E. Billups, Rice University, on "Thermal Hydrocarbon Rearrangements."
Thursday, Oct. 11 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. R. M. Leach, poultry science, on "Heavy Metals and the Food Chain."
Thursday, Oct. 11 — Slave and Soviet Language and Area Center, 3 p.m., Room 132 Electrical Engineering East. John P. Gunneman, religious studies, on "Marxism and the Problem of Evil."

Meetings

Monday, Oct. 15 — Panel Council, 6:30 p.m., Delta Zeta, Heister.
Monday, Oct. 15 — USG-Senate, 7:30-10:45 p.m., HUB assembly room.
Monday, Oct. 15 — OTIS, 6:30-7:30 p.m., HUB assembly room.
Monday, Oct. 15 — College of Education Student Council, 7-8:30 p.m., Room 317 Boucke.
Tuesday, Oct. 16 — ARHS, 7:30-9:30 p.m., Room 203 HUB.
Wednesday, Oct. 17 — A.W.S., 7 p.m., Room 203 HUB.
Wednesday, Oct. 17 — Graduate Council, 3 p.m., Room 101 Kern.
Thursday, Oct. 18 — USG Academic Assembly, 7:30-9 p.m., Room 203 HUB.
Thursday, Oct. 18 — Penn State Chapter of American Association of University Professors, 8 p.m., Room 112 Kern. Discussion of collective bargaining; open to general faculty.

Exhibits

Museum of Art — Three Swiss Painters. Daily showing at 2 and 4 p.m. of half-hour film on Cuno Amiet.
Zoller Gallery, Visual Arts — Stillman and Albers, through Oct. 12. Super Mud '73, opens Oct. 15.
Kern Gallery — June Stoner, acrylics, through Oct. 13. Marilyn Dwyer, palette knife, through Oct. 20. DuWayne Millies, photography, opens Oct. 14. John Dorish, watercolors, opens Oct. 21. African trade bead jewelry by Selma Brande.
Pattee Library, Arts lobby — 10 Eastern European Prints, through Oct. 16. Main lobby — Display of Esperanto materials.
Chambers Gallery — Larry Duran, ceramics. Frank Tillman, paintings and drawings.

Official

Saturday, Oct. 13 — Last date for a December graduate to deliver Master's Thesis or Paper to adviser.
Saturday, Oct. 13 — Last date for final doctoral examinations for December graduates.

Sunday, Oct. 14 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Monday, Oct. 15 — First meeting, women's varsity basketball team, 6:30 p.m., White.
Tuesday, Oct. 16 — First meeting, women's varsity bowling team, 3 p.m., Rec Hall lanes.
Tuesday, Oct. 16 — First meeting, women's varsity rifle team, 6:30 p.m., White.
Wednesday, Oct. 17 — Karen Cain, voice recital, 8:30 p.m., Music Bldg. recital hall.
Thursday-Saturday, Oct. 18-20 — University Theatre, "Amorous Flea," 8 p.m., Pavilion.
Friday, Oct. 19 — Sports: Women's field hockey vs. SUNY-Cortland, 3 p.m., two games; Soccer vs. Maryland, 7 p.m.
Friday, Oct. 19 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.
Friday, Oct. 19 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday, Oct. 19 — Free-U, jammy, 7:30-11:30 p.m., HUB ballroom.
Saturday, Oct. 20 — Sports: Cross Country vs. Georgetown and William and Mary; Rugby vs. Philadelphia, 2 p.m.
Saturday-Sunday, Oct. 20-21 — Artists Series, Samuel Beckett's "Kropp's Last Tape," and "Not I," with Hume Cronyn, Jessica Tandy, 8:30 p.m., Schwab.
Saturday, Oct. 20 — Casino Night, sponsored by OTIS to benefit Centre County United Way, 7-12 p.m., HUB card room.
Sunday, Oct. 21 — Chapel Service, 11 a.m., Reverend Donald Davis, United Campus Ministry, Eisenhower Chapel.
Sunday, Oct. 21 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Sunday, Oct. 21 — Sports: Rugby, vs. Pittsburgh Law, 2 p.m.

Films

Thursday, Oct. 11 — International Films, 7 and 9 p.m., HUB assembly room. "Alpha-ville," directed by Jean-Luc Godard.
Friday-Saturday, Oct. 12-13 — Student SF films, 7 and 9 p.m., HUB assembly room. "The Thing."
Wednesday, Oct. 17 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "All the Kings Men."
Thursday, Oct. 18 — International Films, 7 and 9 p.m., HUB assembly room. "Kanal," directed by Adreaz Wajda.
Friday-Saturday, Oct. 19-20 — Student SF films, 7 and 9 p.m., HUB assembly room. "The Come Muijny."
Saturday, Oct. 20 — Free-U children's films, 12:30-5:30 p.m., HUB assembly room.

Friday, Oct. 12 — Ceramic Science, 4 p.m., Room 244 Deike. Dr. Barry Koepeke, Honeywell.
Friday, Oct. 12 — Physical Chemistry, 4 p.m., Room 310 Whitmore. T. M. Mayer on "Ionic Reactions in Methyl Silane."
Monday, Oct. 15 — Entomology, 4 p.m., Room 204 Patterson. Andrew Zettie on "The Fate of 10-Sulfur Dioxide in 'Trichoplusia' N. Larvae: Interactions in the Hemolymph."
Monday, Oct. 15 — Analytical Chemistry, 1 p.m., Room 310 Whitmore. William Brugger on "Chemical Investigations into Odo."
Monday, Oct. 15 — Genetics, 3:55 p.m., Room 111 Tyson. Dr. Alan Long on "Genetic Control of Feeder Root Formation and Mycorrhizal Development in Lobelia Pine."
Monday-Tuesday, Oct. 15-16 — Biochemistry, 11:10 a.m., Room 101 Althouse. P. H. Maurer, Jefferson Medical College, on "The Use of Synthetic Polymers of Amino Acids to Study Genetic Control of the Immune Response."
Tuesday, Oct. 16 — Chemical Engineering, 4 p.m., Room 140 Fenske Lab. John Stellmack, on "Speleology."

Tuesday, Oct. 16 — Physics Solid State, 1 p.m., Room 339 Davey. Dr. Stephen Fonash, engineering science, on "Role of Interfaces in Determining the Electrical Properties of Metal-Insulator-Metal Junctions."
Tuesday, Oct. 16 — Geosciences, 4 p.m., Room 26 M.S. Walter B. Weiner, psychology, on "Methodology of Scientific Research."
Tuesday, Oct. 16 — Engineering Mechanics, 4 p.m., Room 215 Hammond. Dr. Bruce Samond, Naval Underwater Systems Center, Newport, RI, on "Steady State Plate Vibration in a Coupled Acoustical Field."
Tuesday, Oct. 16 — Comparative Literature Luncheon, 12:15 p.m., HUB Dining Room A. Bruce Rosenberg.
Wednesday, Oct. 17 — Ceramic Science, 4 p.m., Room 244 Deike. Dr. John Answorth, Bethlehem Steel.
Thursday, Oct. 18 — Chemistry, 12:45 p.m., Room 310 Whitmore. Benjamin Ward, Cornell University on "Stochastic Models in Chemical Reaction Kinetics."
Thursday, Oct. 18 — Physics, 3:35 p.m., Room 117 Osmond. Harold J. Melcalf, State University of New York at Stony

Brook, on "Experiments with Tunable Diode Lasers."
Thursday, Oct. 18 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. D. J. Epp, resource economics, on "Economic Trade-Offs for Environmental Quality."
Thursday, Oct. 18 — Archaeology, 3 p.m., Room 101 Kern. Dr. Joseph Michels, anthropology, "Archaeological Research in Ethiopia."
Friday, Oct. 19 — Earth and Mineral Sciences, 3:45 p.m., Room 26 M.S. Dr. K. Vedam, Materials Research Lab and physics, on "Characterization of Real Surfaces — A Survey of the State of the Art."

Interest Groups

Alpha Phi Omega, Mondays, 7 p.m., Room 308 Boucke.
Archery Club, Mondays, Wednesdays, Thursdays, 7 p.m., Room 33 White.
Chess Club, Wednesdays, 6:30 p.m., HUB card room.
Chess Team, Thursdays, 6:30-11 p.m., Room 106 Sackett.
Coeq Gymnastics Club, Mondays, 7:30 p.m., Rec Hall South Gym; Thursdays, 7:30 p.m., White gymnastics room.
Eco-Action, Mondays, 8:30 p.m., Room 301 Boucke.
Focus on Sweden, Tuesdays, 7 p.m., Room 312 Boucke.
Free-U, Mondays, 7-9 p.m., Room 203 HUB.
Gamma Sigma Sigma, Tuesdays, 7 p.m., Room 309 Boucke.
Young Socialists, Friday, Oct. 12, 6:30 p.m., Room 303 Boucke.

German "Kaffeestunde," Thursdays, 2:30-4:30 p.m., Room 217 Burrows. Faculty and students.
Interlandia Folk Dancers, Sundays, 7:30 p.m., HUB ballroom.
Keystone Society, Wednesdays, 7-8:30 p.m., Room 304 Boucke.
S.I.M.S., Wednesdays, 8 p.m., Room 108 Forum; Thursdays, 8 p.m., Room 101 Chambers.
Squash Club, Mondays, 7 p.m., White. Informal competition.
Young Socialists, 7:30 p.m., Mondays, 8:00 Willard; Wednesdays, Room 62 Willard.
PSOC, Sailing division, 7:30 p.m., Room 214 Boucke.
Campus Gold Girl Scouts, 7 p.m., Thursday, Oct. 11 and 18, lobby of Cross Hall.
Undergraduate Political Science Association, Tuesday, Oct. 16, 6:30-9:30 p.m., Room 173 Willard.

PSOC, Equestrian division, Tuesday, Oct. 16, 7:30 p.m., Room 111 Animal Industries.
Alpha Phi Omega, Wednesday, Oct. 17, 7:30-9 p.m., HUB reading room.
Biology Society, Wednesday, Oct. 17, 7:30 p.m., Room 2, South Frear. Dr. Jim Richerson on "Sexual Behavior of Gypsy Moths."
American Welding Society, Wednesday, Oct. 17, 7:30 p.m., Room 323 Hammond. Mr. H. E. Roediger, Tektran Corp., on "A New Arc Welding Power Supply."
Penn State Amateur Radio Club, Wednesday, Oct. 17, 7:30 p.m., Room 208 Eng. Unit E.
PSOC, Ski division, 7:30 p.m., Room 121 Sparks.
PSOC, Canoe division, Thursday, Oct. 18, 7:30 p.m., Room 214 Boucke.
Folklore Society, Thursday, Oct. 18, 8 p.m., Room 101 Kern.

Lectures

Monday, Oct. 15 — Architecture, 7:30 p.m., Room 26 Mineral Sciences. Ronaldo Guigola, on "About Architecture," in conjunction with the 10th anniversary of the College of Arts and Architecture.
Tuesday, Oct. 16 — "Art and Special Education: The Therapeutic Approach," by Dr. Marianne Frostig, 2 p.m., Room 112 Kern.
Tuesday, Oct. 16 — "Imagery and How It Is Learned," by Phyllis Maslow (associate of Dr. Frostig) 7 p.m., Room 112 Chambers.
Wednesday, Oct. 17 — Classics and the Graduate School Lecture Committee, 8-9:30 p.m., HUB assembly room. Dr. Michael Grant, author and lecturer, on "Cleopatra."
Thursday, Oct. 18 — Faculty Women's Club, 9:30 a.m., HUB assembly room. Dr. Carol Cartwright and Judy Seaver, on "Parenting."

Heroines of the hit musical, "Two Gentlemen of Verona," are Rosae Wortham, who plays Silvia, and Louise Shaffer, right, who is Julia. The award-winning comedy duo of Shakespear's play will be in Rec Hall Saturday, Oct. 13, at 8:30 p.m. on the Artists Series. Tickets are currently on sale at the HUB. Following "Two Gentlemen," the Artists Series will have Hume Cronyn and Jessica Tandy, with two excerpts from Samuel Beckett plays, Saturday and Sunday, Oct. 20-21.

DEDICATION At Wilkes-Barre Campus, the new Laboratory Building, which is the first steps of the second phase of a \$5 million building program, will be dedicated Tuesday, Oct. 16, at 2 p.m. In attendance will be the first director of the Wilkes-Barre Center, Edgar J. Gealy, and his successor, Alice Kenworthy, who served from 1923 to 1935. The oldest public college in Wyoming Valley, the Campus was started a half century ago, primarily as an engineering and technical school. In the ceremonies will be Campus director George W. Blevy, William Blevy, president of the student government; Kenneth L. Holderman, vice president for Commonwealth Campuses; and Dr. Robert G. Quinn, dean of academic instruction for Commonwealth Campuses. The new building, on the campus of Lehman, Pa., will have physics, chemistry and biology labs, classrooms, a computer lab, engineering drafting room, conference room, and offices.

Super Mud '73 exhibit opens Monday

Super Mud '73, this year's edition of the Annual Student Ceramics Invitational Exhibit sponsored by the Department of Art, begins Monday, Oct. 15, in the Zollner Gallery, Visual Arts Building.

Each fall, different schools are invited to send their best pieces of student work to Penn State for the show, held in conjunction with the Annual Ceramic Arts Conference, November 2 and 3.

This year's show is an expansion of the geographic area represented by the guest schools with a West Coast Contributor among the invitees. Virginia Commonwealth University, Cranbrook Academy of Art, the University of Washington, Towson State College, and the Rochester Institute of Technology will send pieces to be shown with those of Penn State ceramics students.

(Continued from page one)

BROWN IN RECITAL

Raymond Brown, professor of music, will give a vocal recital of songs by Hugo Wolf, on poems by Goethe, Morierke, Eichendorff, and Michelangelo. The song recital will be held Sunday, Oct. 14, at 3:30 p.m. in the White Building recital hall. Barry Brinsmaid, assistant professor of music, will be accompanist.

KAREN CAIN SINGS

Rarely performed songs by Strauss and Mozart will be sung by Karen Cain, instructor of voice and a soprano, in a recital Wednesday, Oct. 17, at 8:30 p.m. in the Music Building recital hall. Stephen Smith will accompany.

FAGAN SCHOLARSHIP

The Scripps-Howard Foundation has provided \$1,000 to establish the Lawrence J. Fagan Scholarship Fund. Mr. Fagan, in whose honor the scholarship fund is named, was chief editor of the Pittsburgh Press for many years and a long-time admirer of Penn State.

AFRICAN BEADS

A display of African Trade Bead Jewelry by Selma Brande in the Graduate Commons

A display of top quality works is insured by the advance jurying of the guest schools to select the pieces to be sent. Each school will send six works for exhibit. Super Mud '73 culminates in the two-day conference, which features three internationally known guest artists who will present lecture-demonstrations.

The three include Hui Ka Kwong, Rutgers University, Howard Kottler, University of Washington, and Marilyn Levine, University of Utah. Each guest lecturer is widely known and is recognized as a talented ceramic artist with a distinctive individual style.

Conference participants are encouraged to register in advance. Additional information on the two-day conference can be obtained by calling Ronald Avilion at 865-7557.

Gallery will continue through Oct. 31. A resident of Altoona, Mrs. Brande attended the Altoona Campus of the University and is presently studying privately under Kenneth Kuhl, head of the art department at the Altoona Campus.

ALTOONA FINE ARTS

A scholarship fund has been established by the Altoona Campus Fine Arts Club to honor students in creative writing, drama, music, speech and art at the Altoona Campus. The annual award of \$500 will be made to those with a 3.0 average who have demonstrated skills in their fields, actively supported the arts among students, contributed their arts to the Campus, and contributed to the artistic environment of the Altoona area.

ART EDUCATION

A noted speech educator, Dr. Marianne Frostig, founder of the Center for Educational Therapy, Los Angeles, Calif., will speak Tuesday, Oct. 16, on "Art and Special Education: The Therapeutic Approach," at 2 p.m. in Room 112 Kern. Her associate, Mrs. Phyllis Maslow, will discuss "Imagery and How It Is Learned" at 7 p.m. the same day, in Room 112 Chambers Building. The departments of art education and special education are sponsoring the talks.

and systems analysis for offices of the Division. Review and initiate new procedures and systems. A Bachelor's degree or equivalent and at least two years of experience, preferably in systems analysis or records management, and a familiarity with data processing equipment and techniques are preferred.

PROFESSIONAL BILLING SUPERVISOR

Responsible to the Assistant Manager of Business for the supervision and direction of the Professional Billing Unit. Minimum of 10 years of experience in billing operations and at least four year related experience are preferred.

SUPERVISORS, AUXILIARY ENTERPRISES

Responsible to the Campus Business Manager for the total bookstore operations; for handling a high quality, efficiently run food vending operation; for the coordination and direction of Student Union Building auxiliary areas. An associate degree or equivalent to two years of college level training, plus at least four years of effective bookstore and/or college student union experience are preferred.

PERSONNEL AND TRAINING ASSISTANT

Responsible to the Director of Human Resources and Food Service Operations.

Responsible to the Manager of Personnel and Training, Housing and Food Services, for administering and coordinating the payroll, job classification programs, safety, and sanitation programs, as well as assisting and developing training and public

INTEREST—

(Continued from page one)

ings are scheduled for later this Fall to try and formulate guidelines or regulations to deal with the situation."

Penn State has begun to notice a decided upswing in interest and applications from female high school athletes.

"One thing we make clear," Miss Durant says, "is that we are interested first in the total education of our women athletes and second in their participation in intercollegiate athletics. I don't think competition should ever be put first, or we'll lose sight of the goals we're here to instill."

Last year, Miss Durant did a study to see what happened to the grade point averages of the some 200 women athletes on Penn State's varsity teams during their competitive seasons. Fifty nine percent of the women maintained the same cumulative average or got a higher one. Only two percent wound up with deferred grades or incompletes during their period of competition. The average for the group was 3.01 during competition; 2.95 before.

Fencers. Miss Durant found, had the highest cumulative average—3.23. Golfers scored 3.22, and the field hockey team, 3.18.

Interested in sports for as far back as she can remember, Miss Durant personally enjoys swimming and tennis, and she is also an enthusiastic spectator at all team events. Teaching, for her, is not a chore, at any level. For years, she worked with children in the special swimming and recreation classes at White Building, and she supervises classes in the required physical ed program along with those for majors.

"I think," she says reflectively, "that I must have made the right choice when I switched my major in language."

Employment office seeks student jobs

Got a job? The Student Employment Office is interested in hearing about it. The office, under the direction of newly appointed coordinator, Benson M. Lichtig, is seeking to increase part-time student job opportunities within the University.

"We would like more people in the University to contact us with job openings related to their individual responsibilities within the University," Lichtig said.

"University jobs are most convenient for students," Lichtig noted. "The jobs are more closely related to student interest,

Library notes

CALCULATOR AVAILABLE

A calculator is now available for use in the Pellet-Scott Undergraduate Library. Students may charge out the calculator at the circulation desk upon presentation of their student identification card. Pellet-Scott Library has two calculators available for public use in the Documents Area, 2nd floor Central Palace. Pellet-Scott Undergraduate Library is open during the term from 9:00 a.m. to midnight, Monday through Friday, from 9:00 a.m. to 5:00 p.m. on Saturday, and from 1:00 p.m. to midnight on Sunday.

UNIVERSITY LIBRARIES OPEN LISTENING SERVICE

A music cassette listening service is now available in the Library located on the Fourth floor of East Palace. The collection contains chiefly classical music in the Western tradition and jazz. As materials are catalogued, the collection will expand to about 800 cassette tapes. During the first weeks all cassette collections, whether or not catalogued will be available upon request at the service desk in the Arts Library. Valid identification will be required for all users for the collection. Listening hours will be Friday, 1:30 p.m. to 9:30 p.m.; Saturday, 1:00 p.m. to 5:00 p.m.

WINTER TERM RESERVE LISTS

Reserve reading lists for Winter Term, 1974, are to be submitted to the Main Undergraduate Library on or before October 22, to allow time for processing the lists. Lists received after the deadline will be accepted only if material requested is not needed until the beginning of the third week of classes. The October 22 deadline requires a reasonable amount of time to order books and to prepare available materials for reserve use. Only required readings, which will circulate either for a two-hour period or for overnight loan periods, will be placed on reserve. Lists should be submitted on reserve forms which are available upon request from the Undergraduate Library, West Palace. Lists should be typewritten and contain full bibliographic information, including the author's full name, title, publisher and the date of publication.

Employment office seeks student jobs

and often the hours are more flexible and fit well into student schedules."

On one day last month, the Student Employment Office had 80 jobs posted. Of that number, 10 were on campus and 70 off campus.

Because of a cutback of some financial aid programs, Lichtig said there is more demand for part-time jobs this year.

Interested staff members having job openings are urged to contact the Student Employment Office, 308 Grange Building, 863-0336.

WPSX highlights

Thursday, Oct. 11: George Michael and his guests examine audio restorations on "Aniques" at 6:30 p.m. At 8 p.m. the Senate Watergate Hearings.

Friday, Oct. 12: At 7:30 p.m. "People, Places, Things, Now" looks at "A Prison Within Walls." At 8:30 p.m. Louis Rukavaya and his panel of stock market experts on "Wall Street Week" examine the possibility of inflation as a continuing phenomenon.

Saturday, Oct. 13: "Sports '80" premieres at 6:30 p.m. with coverage of the 1973 Women's Interscholastic Gymnastics Championships. "E-sense," Frederick Wymann's documentary about an Anglican monastery, explores the changes threatened by monastic life at 8:30 p.m.

Sunday, Oct. 14: At 6 p.m. the Alard String Quartet performs three string quartets by Mozart in

the second program of "The Classical Shift Quartet." William F. Buckley, Jr. talks with Sir Alec Douglas-Home on "Firing Line" at 8 p.m.

Monday, Oct. 15: At 8 p.m., "The PBS Special of the Week" presents "The Mystery of Melville," a documentary about the work of Dr. Raymond W. Bialek and his staff, who are using a computer to piece together the tomb of Egyptian queen Nefertiti. "The Penn Central Can't Wait" examines the subject matter of transportation economists, railroad experts, and city representatives meet on "Overview" at 9:30 p.m.

Tuesday, Oct. 16: At 7:30 p.m. "The Business Writing" premieres with television instruction on how to improve communications skills in business letters.

Wednesday, Oct. 17: At 7:00 p.m. on "TV Out Loud" Jack Buckley and his panel of commentators Fran Fisher and Jim Tarmun review and analyze Penn State's game with Army.

Responsible for studying the concept of adult education, establishing and implementing a fully-satisfying academic information system for all advisors and policies and procedures within the program for recruiting, training and supervising academic consultants. Candidates must have a Ph.D. and at least four years of related experience, or an M.S. and at least six years of experience in related academic programs, advising of information systems.

COORDINATOR, OFFICE OF SECONDARY SCHOOL RELATIONS STUDENT AFFAIRS

Under the direction of the Vice President of Student Affairs and with the advice of a University coordinating (advisory) council for the information and recruitment system for prospective students, the coordinator will plan, coordinate and supervise the University effort to inform, attract and interest all prospective students. This position will serve as a communication link between the University academic and administrative divisions involved with prospective students. A Master's degree, equivalent experience in planning, recruiting, communications, or higher education with at least four to five years of effective University level experience which includes recruitment and promotion and development, student recruitment, orientation, supervision and administration.

Staff vacancies

To make application for the vacancies listed below call 865-1387 (Network 405-1387) no later than:

5 p.m. Thursday, Oct. 18, 1973 ASSISTANT TO THE ASSISTANT VICE PRESIDENT FOR BUSINESS SERVICES

Responsible for assisting in the efficient and effective operations of the various organizations of the department and for assistance in maintaining accounting records and controls over the various departments in Business Services. A college degree or equivalent and at least four years of administrative experience are preferred.

CLASSIFICATION ANALYST

OFFICE OF PERSONNEL ADMINISTRATION University Park

Responsible for implementing the wage and salary plans of the University, writing job descriptions, and evaluating substantiating data for salary grade. A Bachelor's degree or equivalent, preferably with course work in Personnel Administration or Industrial Engineering. At least two years of administrative experience necessary.

ASSISTANT TO THE DIRECTOR, DIVISION OF ADMISSIONS, RECORDS AND SCHEDULING

University Park Responsible for providing planning assistance

PENN STATE intercom

Volume 3, Number 7

October 18, 1973

News in brief

HUB CANDLELIGHT

A special Candlelight Dinner will be held in the HUB Terrace Room Wednesday, Oct. 21, Halloween night. The menu will feature beef stroganoff, roast turkey with dressing, Salisbury steak with mushrooms, veal Cordon Bleu, and baked stuffed potatoes. Witches' brew will be served, and the feature pastry will be pumpkin raisin muffin. Service at the Terrace Room is from 5 to 6:45 p.m.

BUSINESS ADM. STUDY

The College of Business Administration will sponsor a study abroad program in Lima, Peru, for the Spring Term 1974. This program will be open to students who will be of senior standing in the Spring Term.

Additional requirements are an all-University average of at least 2.50 and the completion of the "core" requirements of the Business Administration curriculum.

Students desiring further information about the program should attend the organizational meeting to be held Tuesday, October 23, 1973, at 4:00 p.m. in the H.U.B. assembly room.

FENCING CLUB

An organizational meeting of the Nittany Fencing Club, which is open to faculty, staff and students, will be held Sunday, Oct. 28, at 7 p.m. in Room 134 White Building. The Club is being developed by experienced fencers with the hope of providing competition and fun for those who have never tried fencing as well as those who have previously had instruction and experience. Eventually, it is the goal of those promoting the Club to seek mem-

bership in the Amateur Fencers League of America, and also to provide additional competition with clubs elsewhere. Equipment will be made available, as will instruction given by those who have had instruction themselves previously.

VETERANS VISITING

Eleven disabled veterans will visit the University next week as guests of the Penn State Veteran Organization; all college-age, they are members of the Pittsburgh chapter of the Disabled Veterans Association. They will meet with faculty, administrators, and other veterans and attend various social events, including the Penn State-West Virginia football game.

FAYETTE SCHOLARSHIP

A scholarship fund has been established at the Fayette Campus by the family of O. C. Cluss, as a memorial to the Un-

(Continued on page two)

Communications:

(The following telegram was received in the Office of the President Oct. 8.)

A suggested proposal for new administrative structure to implement provisions of the Academic Policy Plan regarding the Commonwealth Campuses being presented by your staff raises serious legal questions concerning the University's sworn testimony before the PLRB. Since the testimony and the proposal plan seem to be in direct conflict, we demand immediate clarification of your position and ask that you meet with representatives of our organization in participation with the PLRB within the next two weeks.

Jacqueline Zemel

(A reply to the telegram above was given by Dr. R. E. Larson, Provost of the University, on Oct. 12.)

Mrs. Jacqueline Zemel
Assistant Professor of Mathematics
Opontz Campus
The Pennsylvania State University
Abington, Pennsylvania 19001

Dear Mrs. Zemel:

Reference is made to your telegram of October 8, 1973, addressed to President John W. Oswald concerning the "Proposal for New Administrative Structures to Implement Provisions of the Academic Policy Plan Relating to Commonwealth Campuses."

At the present time, this is a proposal and not an established policy. The decision concerning the proposal shall be decided following complete faculty review, to determine whether the faculty considers it to be in their best interests. In our opinion, the establishment of such a proposal as policy would not alter the appropriateness of one bargaining unit for all University faculty or the decision of the Pennsylvania Labor Relations Board. We see no labor to be gained in a meeting with your organization and the PLRB.

Very truly yours,
R. E. Larson
Provost

Buck is named rights chairman

Dr. Roy C. Buck has been named chairman of the newly formed Faculty Senate Committee on Faculty Rights and Responsibilities.

Dr. Richard C. Craig is committee vice chairman and Dr. E-Tu Sun is secretary.

The committee presently is developing standing rules. Any inquiries should be made of Dr. Buck at his office, 308 Liberal Arts Bldg., or his home, 115 LeNor Dr., State College.

Film series

"But Where Will the Earth Land?" a series of educational films about the environment and man's interaction with it, will be previewed Thursday, October 18, at 3:00 p.m. in Kern Graduate Building Auditorium.

The series was produced by the Division of Broadcasting in Continuing Education at the University for the Pennsylvania Department of Education. It is designed for use in junior high school classrooms around the state.

All interested University staff are invited to attend the preview.

United Way drive at half-way

One hundred per cent response was what United Way campaign officials hoped for from the University community and, at the campaign's half-way point, they're half way to realizing that goal.

Dean James Bartoo, University division chairman for the campaign, said that Penn State giving is far ahead of the other divisions at this point with more than \$24,000 contributed to date. "Since the University is the County's No. 1 employer, we had hoped it would be the No. 1 contributor, and it looks like we might reach that goal too," the Dean said.

He issued a reminder to faculty and

staff who have not yet responded and said that those who did not receive contribution cards and campaign literature (persons new to the University payroll since Aug. 31) may obtain them from United Way subcommittee or at the campaign office, 336 S. Fracker St., State College.

President Oswald last month endorsed participation by staff and faculty members at the various campuses in the local efforts — through United Fund, Community Chest or similar organizations — to raise funds for community service purposes, and authorized the use of payroll deductions for such contributions.

Senate acts on adjunct rule

Action taken at the Oct. 16 University Senate meeting, during which President Oswald discussed faculty and staff salary increases, included approval of a rule change lowering the grade point average and credit hours required for students transferring from adjunct to degree candidacy status. (Ed. Note: President Oswald's remarks are printed on Page 4 of this issue of INTERCOM.)

Under the new rule, an adjunct student, with the approval of the appropriate college dean, may be admitted to a bachelor's degree program without fulfilling regular secondary school requirements if he has

at least 18 credit hours of courses with at least a 2.0 grade point average.

The Senate received an informational report from its Intra-University Relations Committee and a status report from the Ad Hoc Committee to Study the Implications of Collective Bargaining for Faculty Governance.

The seven page report on collective bargaining was developed by the group's subcommittee on governance. In presenting the report, Dr. Roy C. Buck, subcommittee chairman, said it was not intended to take sides, but designed to increase debate about the University community.

Advisory committee established to aid

Public administration institute made separate unit

The newly appointed Advisory Committee to the Institute of Public Administration will meet Friday, Oct. 19, marking the establishment of the Institute as a separate research, academic, and public service unit in the College of the Liberal Arts.

The Advisory Committee, which was appointed by College Dean Stanley F. Paulson, includes two public members and seven from within the University, according to Dr. Robert J. Mowitz, Institute director and professor of public administration.

"Because of the changing role and mission of the Institute, it was decided that such a committee would be helpful to the director and his staff in providing advice on research and educational policies," Dr. Mowitz points out.

Members are: Joseph W. Barr, Jr., di-

rector, Community Development Services, Pennsylvania League of Cities; John Ingram, director, State Division, Pennsylvania Economy League; Theodore R. Vallance, associate dean, research and graduate study, College of Human Development; Thomas F. Magner, associate dean, research and graduate study, College of the Liberal Arts.

Also: Cyril F. Hager, associate dean, continuing education, Liberal Arts; Paul H. Rigby, director, Center for Research, assistant dean for research, College of Business Administration; Ruth C. Silva, professor of political science; Monroe Newman, professor of economics; and Roy C. Buck, professor of sociology.

The Institute grew out of an Institute of Local Government which existed at

Penn State from 1935 to 1959. Dr. Mowitz explains. It offers a Master of Public Administration degree program for students preparing to enter public service.

This program, which between 1960 and 1965 graduated about six students a year, now has an average class size of 65.

The Institute's research emphasis has contributed to the development of new management technologies for the Commonwealth and local governments within the State, according to Dr. Mowitz. It has also expanded in scope to include comparative studies of American and foreign urban administrative systems.

In the area of public service, the Institute runs executive developing training programs for top level state officials and selected conferences of national interest.

Faculty women

The Faculty Women's Club will help celebrate the 50th anniversary of the College of Education in a seminar lecture series and lecture luncheon to be held three consecutive Thursdays this fall beginning today (Oct. 18).

The seminar lectures will be held October 18 and October 25 from 9:30 to 11:00 a.m. in the Hetzel Union Building assembly room. The luncheon lecture will be held November 1 from 12:30 to 2:00 p.m. in dining rooms, A, B, C in the Hetzel Union Building.

With education as the theme for the series, "Parenting" will be the topic of the first seminar lecture. Dr. Carol Cartwright, associate professor of education, and Mrs. Judy Seaver, Ph.D. candidate, College of Education, will discuss different aspects of this topic.

The second seminar lecture will feature a panel discussion on "Alternative Schools: What Does That Mean for State College?" Dr. Mary Dupuis, assistant professor of education, will be the moderator. Her panel will be Theodore First, Edward Fry, Dr. Daryl Hesley and William Keough.

Dr. James W. Kelz, professor of education, will consider the topic "Hear What I'm Saying — Please," at the luncheon lecture.

Everyone is invited to attend the series. Reservations for the luncheon lecture can be made with Mrs. Marilynne Hollis at 466-7397.

D.E.H.Frear dies pesticides pioneer

Dr. Donald E. H. Frear, 67, professor emeritus of chemical pesticides, and a pioneer in the field of chemical pesticides, died Oct. 11. He retired from the University on Jan. 1, 1969, following 38 years on the faculty. He was director of the Pesticides Research Laboratory and Graduate Study Center at the time of his retirement.

Internationally recognized as an authority on the chemistry of pesticides, Dr. Frear authored the first book published in the United States on this subject. He is also the author of 32 books and more than 125 articles in the field of chemical pesticides. And he served for more than 20 years as editor of an annual publication, "The Pesticide Handbook," which he originated.

Dr. Frear was honored in 1961 with an award for distinguished service from the Food Law Institute. He was an original member of the Food Protection Committee and served for five years as chairman of its chemical subcommittee.

Dr. Frear began his association with Penn State as an undergraduate, receiving the bachelor of science degree in 1926. He received the master of science degree from the University of New Hampshire and returned to Penn State to earn the doctor of philosophy degree. His first teaching appointment at the University was as instructor in the department of animal nutrition. His career continued in the department of agricultural and biological chemistry, and when the colleges and departments were restructured within the University, he became professor of chemical pesticides in the Department of Entomology.

Honors

Dr. Paul B. Baltes, director of the Division of Individual and Family Studies in the College of Human Development, has been elected a Fellow of the American Psychological Association. His election was in the Division of Developmental Psychology and Adult Development and Aging.

Appointments

Slvka Bogdan Marinkovic, as visiting scientist, Materials Research Laboratory. She is scientific collaborator on vacuum-deposited thin films, Institute of Physics, Belgrade, Yugoslavia. Her current research concerns optical and electrical properties relationships. Her husband, Dr. Slobodan Marinkovic, is doing post-doctoral research in the department of material sciences.

Chaim Wardi, as visiting professor of studies for the Fall, Winter and Spring terms. He has been teaching church history at Tel Aviv University, in Israel, and previously taught at the American Institute of Holy Land Studies, in Jerusalem.

Dr. Lee C. Wensel, as adjunct professor of statistics, for 1973-74. He has been at the University of Minnesota School of Forestry since 1964, teaching forest mensuration and advising staff and students on statistical and computational aspects of research problems. He is a 1962 Penn State graduate, receiving advanced degrees from Purdue and Minnesota universities.

Staff vacancies

To make application for the vacancies listed below call 865-1387 (Network 465-1387) no later than:

5 p.m. Thursday, Nov. 1, 1973

BOOKSTORE MANAGER

Worthington Scranton Campus
Responsible to the Campus Business Manager for the purchasing, merchandising, financial and retail operations of the Scranton Campus Bookstore. An Associate degree or equivalent to two years of college plus training with over two years of related experience, or high school graduate with two years of business school plus four years of related experience are preferred.

INSTRUCTIONAL PROGRAM SPECIALIST

COLLEGE OF MEDICINE
Hershey Medical Center
Responsible for preparing and conducting videotape training workshops, to include working with faculty to identify proper case examples and assist in conducting field testing of program materials. A Bachelor's degree, preferably in the Behavioral Sciences, or equivalent, and at least one year of experience in preparing instructional materials.

PHARMACEUTICAL COLLEGE OF MEDICINE

Hershey Medical Center
Responsible for the performance of pharmaceutical functions of dispensing, extemporaneous compounding, providing drug information to physicians, students, nurses and patients. A Bachelor's degree in Pharmacy and at least two years of related experience are desired. Pennsylvania registration is required.

RESEARCH AIDE

COLLEGE OF SCIENCE
University Park
Responsible for preparation of chemical solutions and cell culture growth media, maintenance and recordkeeping on virus and plant tissue stocks, work with Herpes simplex virus and its mutants. A Bachelor's degree and at least one year of related laboratory experience are preferred.

Funding opportunities

For more information, call 865-1372 except where noted below, and refer to the item by its number and the general information provided. People with grants information for dissemination in this column should call the same number.

(101-1) **Maternal and Child Health Training Institutional Project Grants** are funded by the Health Services and Mental Health Administration (HSMHA) at OHEW. These grants will advance the training of professionals working in university-affiliated mental retardation centers and will cover costs of faculty, traineeships, services, clinical facilities, and short term workshops and institutes. Grants range from \$50,000 to \$1,000,000 and average \$450,000. The next annual application deadline is Oct. 1, 1973. Contact is Mrs. Gloria Wackernoh, Chief Grants Management Officer, Division of Research Health Services Improvement, Maternal and Child Health Services, 56 Fisher Lane, Rockville, Maryland 20852 (301)443-2160.

(101-2) **October 15, 1973 is the annual deadline for the Office of Education, Early Education Program** consisting of the **Handicapped Children Early Education Demonstration Program** and the **Child Service Demonstration Program** (Learning Disabilities). Experimental preschool and early childhood programs for handicapped children are supported. Parent participation, dissemination of information, the professional competence of staff in general public, and project effectiveness evaluation are included as project objectives. Contact is Miss Jane de Weerd, Coordinator, Early Education Program, Division of Educational Services, Bureau of Education for the Handicapped, Office of Education, Room 2016, Regional Office Building, 400 Maryland Avenue, S.W., Washington, O.C. 20002 (202)927-7011.

(101-3) **A new health agency, the Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA)** has become the sixth PHS agency. It is the third largest with a \$600 million budget for its three institutes: National Institute on Alcohol Abuse and Alcoholism (Dr. Morris Chazet, head); National Institute on Drug Abuse (Dr. Barbara Brown, head); and the new National Institute of Drug Abuse (Dr. Robert O'Neil, head). There is information on this socio-medical program will be released. Research inquiries are invited.

(101-4) **National Institute of Education** spending will be guided by percentage limitations established by the National Council of Educational Research. These guidelines are as follows: 10-15 percent to expand knowledge about education, including research grants programs; 10-20 percent to strengthen the research and development system; and 65-80 percent to advance the practice of American education. In all three areas, 3-5 percent of funds will be available for unsolicited proposals. Contacts are available for application to NIE.

Fellowships
(101-5) **Predoctoral or postdoctoral candidates wishing to conduct research in Africa and the Middle East** may apply to the Ford Foundation for 9 to 12-month grants that include transportation, travel, maintenance and dependency allowances. The Foundation is interested in field research in agriculture, business administration, public administration, demography, economics, educational planning, nutrition, rural sociology, and urbanization studies. Grants are as follows: 10-15 percent to expand knowledge about education, including research grants programs; 10-20 percent to strengthen the research and development system; and 65-80 percent to advance the practice of American education. In all three areas, 3-5 percent of funds will be available for unsolicited proposals. Contacts are available for application to NIE.

(101-6) **Predocetor and postdoctoral researchers who wish to study social change in Latin America and the Caribbean** may apply to the Inter-American Foundation. Applicants will affiliate with a native institution and must speak the local language. Maintenance, travel, and dependency allowances are furnished; application deadline is Oct. 1, 1973. The Foundation's address is 1515 Wilson Blvd., Rosslyn, Va. 22209.

REMEMINDERS—DEADLINE OCTOBER 15, 1973
Nov. 15 for NSF Research Grants (NSF 20 INTERCOM #98-4) ... Nov. 28 (received) for NSF/RANN Research-Solar Energy-Heating & Cooling Units (Oct. 11 INTERCOM #100-2) ... Oct. 1 for NEH Pulmonary Research Grants (Oct. 11 INTERCOM #100-1) ... Oct. 1 for NSF Engineering Research Initiation Grants (Sept. 27 INTERCOM #99-1 and #99-3) ... Dec. 7 (extended) for NSF Undergraduate Research Participation, NSF Secondary School Science Teaching Program, and NSF Student Originated Studies Program (Sept. 6 INTERCOM #96-3) ... Jan. 1 for NEH Research and Development Grants (Oct. 11 INTERCOM #100-1) ... Jan. 11 for Dept. Interior (OVR) unsolicited research proposals (Sept. 20 INTERCOM #98-1).

TIAA-CREF now has withdrawal plan

The Teachers Insurance and Annuity Association of New York (TIAA) is now offering a new feature in its tax-deferred annuity program effective October 1, 1973.

The new contract, known as the Supplemental Retirement Annuities (SRA), is the same as the current TIAA-CREF program except that it permits a faculty or staff member to withdraw the entire cash value of the annuity at any time. This option is already a feature of the tax-deferred annuity plan provided to faculty and staff members by The Equitable Life Assurance Society.

There is a slightly higher expense charge to cover the cost of this additional feature. In TIAA, a charge of 4% (instead of 3.5%) is deducted from each premium payment to an SRA contract and in CREF, a charge of 1.75% (instead of 1.5%) is deducted from each premium payment. In all other aspects, SRA contracts have the options and flexibilities of regular TIAA-CREF annuities.

Employees who are presently participating in the purchase of a TIAA-CREF annuity may not elect to transfer past accumulated premiums to an SRA contract. They may, however, elect to discontinue payment to their present contract and enroll in the new SRA program or to participate under both programs.

Descriptive booklets and applications are available by calling or writing to the Employee Benefits Division, 133 Willard Building.

University Theatre production opens

Anophe, played by Merrill Plaskow, 11, center) plots with his two untrustworthy servants, played by Ellen Fitzgerald and Steve Woz, in a unusual comedy, "The Amorous Plaskow," at University Theatre production opening Friday, Oct. 19, at Pavilion Theatre. The three conspirators plan to trap the "impudent fool" who is wrecking Anophe's marriage plans, in the musical version of Moliere's classic French farce, "The School of Wives." The show will continue at Pavilion Theatre Oct. 20 and Oct. 23-27. Reservations may be made by calling 865-1884. (Roger Greenwald photo.)

Former Peruvian president lectures

Dr. Fernando Belaunde-Terry, former President of Peru, will deliver two public lectures during a three-day visit Tuesday through Thursday, Oct. 23-25.

"Inter-American Relations in the 70's" is the title of the talk Dr. Belaunde-Terry will give Oct. 23 at 7:30 p.m. in the Kern Bldg. Auditorium. He will speak about "Some Contemporary Urban Developments in South America" Oct. 25 at 7:30 p.m. in the Mineral Science Auditorium. The latter talk, which will be illustrated, is being presented as part of the Tenth Anniversary Celebration of the College of Arts and Architecture.

Dr. Belaunde-Terry, an architect and urban planner by profession, was invited to

the campus by the Latin American Studies Committee, with the co-sponsorship of the Department of Architecture and the Institute for the Arts and Humanistic Studies.

Dean of the Faculty of Architecture in Lima before his election to the presidency of Peru in 1963, Dr. Belaunde-Terry was overthrown by a military coup in 1968. Educated in France, the United States, and Peru, he has been variously a regional planner, promoter of public housing, author, professor, lecturer and builder.

Since the downfall of his government, he has lived in this country and has served as a visiting professor at Harvard University, Columbia, and Johns Hopkins universities.

H.D. honors alumna

Dr. Katherine B. Hall, internationally recognized educator, will be honored with the second College of Human Development Alumni Recognition Award to be presented during a program October 18-20.

Entitled "Cross-Cultural Challenges in Human Relations," the program will revolve around Dr. Hall's experiences and work in cross-cultural projects.

Dr. Hall, chairman of the department of home economics at Montclair State College, is also president of the National Council of Administrators of Home Economics and was the recent recipient of the American Home Economics Association's Inner City Fellowship. Her range of accomplishments includes: organizing SPURT (Special Program for Urban Teachers for the disadvantaged); acting as a consultant for the Agency of International Development; and working as a representative at the White House Conferences on Aging, Children and Youth, and Low Income Families.

Dr. Hall received her doctorate from Penn State in 1955, with a major in clothing and textiles and minor in home management family economics.

NEWS—

(Continued from page one)

town industrialist who was a member of the Campus Advisory Board before his death in 1971. The number of grants to be provided each will be determined by the funds available and contributions to the memorial fund are being accepted from friends and interested groups.

SHENANGO SCHOLARSHIPS

The Builders Association of Eastern Ohio and Western Pennsylvania have just approved a new scholarship program for students admitted to the Architectural Engineering Technology degree program at the Shenango Valley Campus. The Association will annually grant two scholarships in the amount of \$450.00 each. Any person within the five county area (Mahoning, Trumbull, Columbia, Mercer and Lawrence) is eligible for such awards.

RELIGIOUS EMPHASIS

The Black Church Fellowship will observe Religious Emphasis Week with activities Oct. 23, 24 and 25. Dr. Lawrence Craig, pastor of the Parkwood CME Church in Cleveland, serving as consultant for the week, will speak on the general theme "Reaching Out," each evening at 7:30 p.m. in the Black Cultural Center.

University Calendar

October 18-28, 1973

Special Events

Thursday-Saturday, Oct. 18-20 — University Theatre, "Amorous Flea," 8 p.m., Pavilion.
Friday, Oct. 19 — Sports: Women's field hockey, vs. SUNY-Cortland, 3 p.m.; two games: Soccer, vs. Maryland, 3 p.m.; Friday, Oct. 19 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.
Friday, Oct. 19 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.
Friday, Oct. 19 — William Thomas, cellist, MFA student recital, 8:30 p.m., Music Bldg. recital hall.
Friday, Oct. 19 — Free-U, jammy, 7:30-11:30 p.m., HUB ballroom.
Saturday, Oct. 20 — Sports: Cross Country, vs. Georgetown and William and Mary; Rugby, vs. Philadelphia, 2 p.m.

Seminars

Thursday, Oct. 18 — Meteorology and Aerospace Engineering, 4 p.m., Room 26 Mineral Sciences, Dr. J. C. Wyngaard, Air Force Cambridge Research Laboratories, on "Model Studies of Atmospheric Boundary Layer Structure."
Thursday, Oct. 18 — Chemistry, 12:45 p.m., Room 310 Whitmore, Benjamin Whitmore, Cornell University on "Stochastic Models in Chemical Reaction Kinetics."
Thursday, Oct. 18 — Physics, 3:35 p.m., Room 117 Osmond, Harold J. Metcalf, State University of New York at Stony Brook, on "Experiments with Tunable Dye Lasers."
Thursday, Oct. 18 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. D. J. Epp, resource economics, on "Economic Trade-Offs for Environmental Quality."
Thursday, Oct. 18 — Archaeology, 3 p.m., Room 101 Kern, Dr. Joseph Michels, anthropology, "Archaeological Research in Ethiopia."
Friday, Oct. 19 — Earth and Mineral Sciences, 3:45 p.m., Room 26 M.S. Dr. K. Vedam, Materials Research Lab and

Saturday-Sunday, Oct. 20-21 — Artists Series, Samuel Beckett's "Krapp's Last Tape," and "Not I," with Hume Cronyn, Jessica Tandy, 8:30 p.m., Schwab.
Saturday, Oct. 20 — Casino Night, sponsored by OTIS to benefit Centre County United Way, 7-12 p.m., HUB card room.
Saturday, Oct. 20 — Astronomy Department "Open House," roof of Dave Laboratory, 7:30-10:00 p.m. (tickets required).
Sunday, Oct. 21 — Chapel Service, 11 a.m., Reverend Donald David, United Campus Ministry, Eisenhower Chapel.
Sunday, Oct. 21 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Sunday, Oct. 21 — Sports: Rugby, vs. Pittsburgh Law, 2 p.m.
Monday, Oct. 22 — Barbara Harbach, George, organ recital, 8:30 p.m., Music Bldg. recital hall.

physics, on "Characterization of Real Surfaces — A Survey of the State of the Art."
Friday, Oct. 19 — Physical Chemistry, 4 p.m., Room 310 Whitmore, Dr. John Reissner, on "Collision-Manifest Transition Coefficients."
Monday, Oct. 22 — Analytical Chemistry, 1 p.m., Room 310 Whitmore, Dan H. Waugh on "Clinical Analysis by Thermometric Methods."
Monday, Oct. 22 — Biochemistry, 11:10 a.m., Room 101 Altohouse, Dr. Harry Alcock, chemistry, on "New Inorganic Polymer for Biomedical Applications."
Tuesday, Oct. 23 — Engineering Mechanics, 11:10 a.m., Room 215 Willard, Ralph Liebowitz, Naval Research and Development Center, Bethesda, Md., on "Turbulence Induced Vibration and Acoustic Radiation from Plates."
Tuesday, Oct. 23 — Chemical and Nuclear Engineering, 4 p.m., Room 140 Fenske, Mr. Robert Ritzman, Acting Director, Office of Industrial Relations, U.S. Atomic Energy Commission, on "The Nuclear Incident — Present Status and Future (to 1985)."

Tuesday-Saturday, Oct. 23-27 — University Theatre, "Amorous Flea," 8 p.m., Pavilion.
Wednesday, Oct. 24 — Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.
Wednesday, Oct. 24 — Centre County Chapter of the United Nations Association and various campus organizations in observance of United Nations Day, 8 p.m., HUB assembly room, Dr. Elton Atwater, political science, and Dr. Robert Schmalz, geology, on "Who Owns the Seas?"
Thursday, Oct. 25 — Faculty Women's Club, 9:30-11 a.m., HUB assembly room, Panel discussion on "Alternative Schools: What Does That Mean on State College," Dr. Mary Dupuis, education, will be moderator.
Friday, Oct. 26 — Artists Series, Alicia De Larrocha, piano recital, 8:30 p.m., Schwab.

Friday, Oct. 26 — Sports: Women's field hockey, vs. Millersville State College, 2:30 p.m., two games: Soccer, vs. Navy, 7 p.m.
Friday, Oct. 26 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.
Saturday, Oct. 27 — Sports: Football, vs. West Virginia, 1:30 p.m., Beaver Stadium.
Saturday, Oct. 27 — Indian Festival celebration, "Divali," 6:30 p.m., first floor, Kern, 20-30 minute prayers; Indian snacks, 7 p.m.; Indian movie, "Seeta Aur Geeta," 8 p.m. Charge, 50 cents.
Sunday, Oct. 28 — Sports: Cross Country, USTFF Eastern Regional Championships.
Sunday, Oct. 28 — Chapel Service, 11 a.m., Music Bldg. recital hall. The Reverend James Z. Alexander, Shaw Divinity School.
Sunday, Oct. 28 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Tuesday, Oct. 23 — Graduate Air Pollution Control, 2:20 p.m., Room 108 Form, Dr. R. A. Rhoades, applied physiology, will lead discussion on the film: "Health Effects of Air Pollution."
Tuesday, Oct. 23 — Physics Solid State, 1 p.m., Room 339 Dawey, Dr. Rustum Roy, Director Materials Research Labs, on "The Structure of Non-Crystalline Matter."
Tuesday, Oct. 23 — Veterinary Science, 7-10 p.m., Room 111 Animal Industries, Tony Ganey, Agricultural Representative, Peace Corps, Rochester, in an informal presentation on agricultural programs overseas. Films.
Tuesday, Oct. 23 — Comparative Literature, Lincoln, 12:15 p.m., HUB Dining Room A, Lloyd Fernando.
Tuesday, Oct. 23 — Astronomy, 4 p.m., Room 445 Davey Lab, Dr. John P. Hagan, on "Films from the African Solar Eclipse of June 30, 1973."
Wednesday, Oct. 24 — Ecology, 9:30 a.m., Room 101 Kern, Roger J. Cuffey, on "Research in Paleocology."

Wednesday, Oct. 24 — Fuel Science, 4 p.m., Room 541 Delke, Dr. Richard L. Seaton, mineral economics, on "A Spectral View of Coal's Prospects."
Thursday, Oct. 25 — Chemistry, 12:45 p.m., Room 310 Whitmore, Jack Halpern, University of Chicago, on "Oxidative Addition Reactions of Transition Metal Compounds."
Thursday, Oct. 25 — Geosciences, 4 p.m., Room 22 Delke, R. W. Staehle, International Nickel Professor of Corrosion Science and Engineering, Ohio State University, on "Thermodynamics of Grain Boundaries."
Thursday, Oct. 25 — Physics, 3:55 p.m., Room 117 Osmond, Ezra T. Newman, University of Pittsburgh, on "A Rather Remarkable Curiously arising from the Maxwell Equations."
Thursday, Oct. 25 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. D. M. Corder, rural sociology, on "Social Implications of Technological Advancement."

Lectures

Tuesday, Oct. 23 — Latin American Studies Committee, the Department of Architecture and the Institute for the Arts and Humanistic Studies, 7:30 p.m., Room 112 Kern, Dr. Fernando Belaudé-Terry, former President of Peru and former Dean of the Faculty of Architecture in Lima, on "Inter-American Relations in the 70's."
Thursday, Oct. 25 — 7:30 p.m., Mineral Science Auditorium, Dr. Fernando Belaudé-Terry, on "Some Contemporary Urban Developments in South America." Illustrated lecture.

Meetings

Thursday, Oct. 18 — USG Academic Assembly, 7:30-9 p.m., Room 203 HUB.
Thursday, Oct. 18 — Penn State Chapter of American Association of University Professors, 7 p.m., Room 112 Kern. Discussion of collective bargaining; open to general faculty.
Thursday, Oct. 18 — Faculty Women's Club, 9:30-11 a.m., HUB assembly room, Dr. Carol Cartwright, education, and Mrs. Judy Seaver, Ph.D. candidate in the College of Education, on "Parenting."
Monday, Oct. 22 — Panel Council, 6:30 p.m., Gamma Phi Beta, Haller.
Monday, Oct. 22 — USG Senate, 7:30-10:45 p.m., HUB assembly room.
Monday, Oct. 22 — OTIS, 8:30-7:30 p.m., HUB assembly room.
Monday, Oct. 22 — College of Education Student Council, 7-8:30 p.m., Room 317 Boucke.
Tuesday, Oct. 23 — ARHS, 7:30-9:30 p.m., Room 203 HUB.
Tuesday, Oct. 23 — College of Business Administration Student Council, 7 p.m., Room 208 Business Adm. Bldg.
Friday, Oct. 23 — OTIS, 8:30 p.m.-3 a.m., HUB assembly room. Landlord-tenant committee hearings.
Tuesday, Oct. 23 — College of Business Administration organizational meeting for study abroad program in Lima, Peru; 4 p.m., HUB Assembly Room.
Wednesday, Oct. 24 — A.W.S., 7 p.m., Room 203 HUB.
Wednesday, Oct. 24 — Earth and Mineral Sciences Student Council, 6:15 p.m., Room 244 Delke.

Interest Groups

Alpha Phi Omega, Mondays, 7 p.m., Room 308 Boucke.
Archery Club, Mondays, Wednesdays, Thursdays, 7 p.m., Room 33 White.
Chess Club, Wednesdays, 6:30 p.m., HUB card room.
Chorus, Thursdays, 6:30-11 p.m., Room 106 Sackett.
Coed Gymnastics Club, Mondays, 7:30 p.m., Rec Hall South Gym; Thursdays, 7:30 p.m., gymnastics room, White.
Coed-Acrobatics, Mondays, 6:30 p.m., Room 301 Boucke.
Focus on Sweden, Tuesdays, 7 p.m., Room 312 Boucke.
Gamma Sigma Sigma, Tuesdays, 7 p.m., Gamma Phi Beta, Haller.
Interlaria Folk Dancers, Sundays, 7:30 p.m., HUB ballroom.
Jazz Club, Thursdays, 8:30-9:30 p.m., Room 67 Willard.
Keynotes Club, Wednesdays, 7-8:30 p.m., Room 304 Boucke.
S.I.M.S., Wednesdays, 8 p.m., Room 108 Forum; Thursdays, 8 p.m., Room 101 Chambers.
Squash Club, Mondays, 7 p.m., White. Informal competition.

Artists Series

Hume Cronyn and Jessica Tandy will interpret Samuel Beckett, the Irish dramatist and novelist, on the Schwab Auditorium stage Saturday and Sunday, Oct. 20 and 21, at 8:30 p.m. If tickets remain, they are on sale at the HUB.
Cronyn will do one of Beckett's short plays, "Krapp's Last Tape," while his wife, Jessica Tandy, will do "Not I." As a husband and wife acting team and separately, the two have won many plaques.
Following this program, the next to appear on the Artists Series will be Alicia De Larrocha, on Friday, Oct. 26. The outstanding Spanish pianist will feature not only works of her countrymen but also of Debussy and Chopin, playing 24 preludes by the latter. Tickets for her concert will go on sale to the public Wednesday, Oct. 24, at the HUB. Student tickets will be sold beginning Tuesday, Oct. 23.

Young Socialists, 7:30 p.m., Mondays, Room 167 Willard; Wednesdays, Room 62 Willard.
Ukrainian Club, Thursday, Oct. 18, 8 p.m., Room 50 White, folk dancing.
Folklore Society, Thursday, Oct. 18, 8 p.m., Room 101 Kern.
PSOC, Canoe division, Thursday, Oct. 18, 7:30 p.m., Room 214 Boucke.
Alpha Lambda Delta, Monday, Oct. 22, 7 p.m., Room 67 Willard.
Nittany Grotto, Tuesday, Oct. 24, 7:30 p.m., Room 273 Willard.
German Club, Wednesday, Oct. 24, 8 p.m., West Room of Warnock Dining Hall. Rick Jackson, guitar.
Young Socialists, Wednesday, Oct. 24, 7-10:30 p.m., HUB ballroom.
PSOC, Ski division, Wednesday, Oct. 24, Ski Clinic, Blue Knob Ski Club, Wednesday, Oct. 24, 7:30 p.m., Room 365 Willard.
PSOC, Sailing division, Thursday, Oct. 25, 7:30 p.m., Room 214 Boucke.
College Republicans, Thursday, Oct. 25, 7 p.m., Room 269 Willard.
Ski Club, Thursday, Oct. 25, 7:30-10 p.m., HUB ballroom.
New Democratic Coalition, Friday, Oct. 19, 8 and 10 p.m., film, "Millhouse."

Films

Thursday, Oct. 18 — International Films, 7 and 9 p.m., HUB assembly room. "Kanal," directed by Andrzej Wajda.
Friday-Saturday, Oct. 19-20 — Student SF films, 7 and 9 p.m., HUB assembly room. "The Gaine Mutilator."
Saturday, Oct. 20 — Free-U children's film, "Three Caballeros," 12:30 and 2:30 p.m., HUB assembly room. Free popcorn and balloons.
Wednesday-Thursday, Oct. 24-25 — Commensplace Theatre, 8 and 10 p.m., Room 112 Kern. "Little Caesar."
Thursday, Oct. 25 — International Films, 7 and 9 p.m., HUB assembly room. "Beauty and the Beast."
Thursday-Saturday, Oct. 25-28 — Arnold Air Society, 7 and 9 p.m., Room 105 Forum. "Ir Ga."
Friday-Saturday, Oct. 26-27 — Student SF films, 7 and 9 p.m., HUB assembly room. "Little Shop of Horrors."
Saturday, Oct. 27 — Penn State Film Club, 11 p.m., HUB ballroom.

Exhibits

Museum of Art — Three Swiss Painters. Daily showing at 4 and 4 p.m. of half-hour film on Cuno Amiet.
Zoller Gallery, Visual Arts — "Super Mud '73," student invitational ceramic exhibit.
Kern Gallery — Marilyn Dwyer, palette knife, through Oct. 20. Duwayne Millets, photography, through Oct. 27. Opening Oct. 21, John Dorish, watercolors.
Pattee Library, Main Lobby — Display of Espanto materials.
Chambers Gallery — Larry Jordan, ceramics, and Frank Tillman, paintings and drawings, through Oct. 26. Opening Oct. 26, Design Show — a selection of mass-produced objects.

Official

Saturday, Oct. 27 — Written French and Spanish language examinations for advanced degree candidates.

Hume Cronyn: "Krapp's Last Tape."

President at Senate meeting Oct. 9

Salary plans discussed

Believing that the faculty at large might be interested in remarks made by President Oswald to the University Faculty Senate on October 9, INTERCOM presents a very slightly condensed report of his talk, with only minor changes from the verbatim transcript provided by the Office of the Senate. We wish to thank the Senate office for its help in making the transcript available.

Mr. Chairman, Ladies and Gentlemen of the University Faculty Senate, as you heard in the report of the minutes of the Senate Council, there were several matters of concern to the broad University that I discussed at some length with the Senate Council, and I felt that they were of such importance . . . that I should discuss them with the entire Senate.

The first two of my subjects about which I wish to speak are in the way of status reports, and the latter three are reports on actions that the Administration has taken that . . . implement actions of this University Faculty Senate.

By far the most important item, in my judgment, relates to the salary increments for 1973-1974. I spoke before the July meeting of the Senate, at which time I reported that salary increments for this coming year were the highest single priority item as we develop the new budget. I, of course, expressed regret and concern as to the uncertainty of the appropriation request at that time, both as to when it would be resolved and also as to the level. But I did attempt to give assurances of our determination to provide equitable, adequate increases in so far as we could go within the guidelines, and certainly that they would be retroactive in character to the first of the fiscal year.

In response to a question put to me, I indicated that a significant percentage of the monies that would be available for faculty and staff increases would be put along the lines of meeting the cost of living, and that another significant amount would be related to merit. As to the status at this very moment . . . it is difficult for me to speak with an absolute specificity, when probably at this very hour there is discussion in the General Assembly, in the House, as to whether or not that body will concur or not concur with the Senate Bill. If it does concur . . . of course we will be ready to go immediately upon signature of the Governor, and we have no reason to believe that will not be forthcoming. On the other hand, if it is non-concurrence, this requires a conference and some additional period. But certainly I would indicate that we have worked so as to be in a position to move as rapidly as possible once the appropriation level is settled.

The question now is not if there is going to be an increase of appropriation to enable us to proceed with increments, but the question is the exact amount . . . for The Pennsylvania State University, the difference between the Senate Bill and the House Bill is approximately \$800,000. It is my prediction that the so-called Snyder Amendment . . . in the Senate version of the Bill, which calls for an annual reporting relating to the work schedule, work loads, and diverse activities of faculty members . . . will continue, and of course it will be as late last year for the University of Pittsburgh and Temple University. I'm not sure as to whether or not the University of Pennsylvania is involved in this — although with their appropriation they may well be.

COST OF LIVING

Now the diversity of our University is such that we have several categories of employees. We of course are anxious to move as rapidly as possible with all categories in as equitable a manner as possible, always with retroactivity in mind, and with always in mind the very serious cost-of-liv-

ing increases that have occurred. They affect all of us, but the lower salaried employees even significantly harder.

For two of the categories of employees — namely, the technical-service employees and the clerical employees — we have been able to proceed with the increments for those two groups on two bases — one, is that a significant part of the funds for these employees, that is, the increased monies needed for salary increments for these employees, is already in-hand, being non-University monies, monies that are generated from increased room and board fees; and (two) the fact that those two categories of employees together make up less than 20% of our total payroll of the University — 80% being for faculty and staff. And so, in view of the fact that a significant part of the funds was available and the fact that it was a smaller part, significantly smaller part, and the fact that many of the employees were of the lower-salaried individuals within the institution, made us pleased that we were able to go ahead.

These increases were within the federal guidelines — I think those of you who are familiar with the guidelines are aware that there are certain minimum salaries, I believe it's \$3.50 an hour, below which the federal guidelines do not apply, and there was a high percentage of employees in these two categories, thus, not subject to the guidelines.

MERIT INCREASES

As for salaries for faculty and staff, I indicated that last time in response to a question (and now I can be more specific) that somewhere more than a third and less than 40% of the monies that we predict will be available will be paid in the form of a common dollar amount to each employee. Therefore, to an individual who receives, for example, a salary of \$7,200 and would receive \$360, that would represent a 5% increase. For the individual who was making \$20,000, that same \$360 would represent a 1.8% increase. The balance of the funds are being and have been based on recommendations on merit to individuals. But I can say this, that the average, and I of course speak of averages because individual salaries are a function of merit and other factors . . . the salaries of people in the faculty and staff that are at the comparable income level as those in the other two groups will receive comparable kinds of increases.

I should also point out that in our salary administration we are breaking out every single salary, particularly with reference to the faculty, on the basis of sex; and these are being reviewed to be certain that any practices that may have existed that led to inequities, indeed are corrected. . . . I just want to assure you that we are prepared to move as rapidly as possible, (1) the increments will be within the guidelines . . . (2) they will be retroactive, and (3) they will on the average be comparable to the lower income levels for other employees.

I would like to make this comment also. I went before this group in the Spring quite disturbed — still am for that matter — about a zero recommendation from the Governor and indicated that there were several fixed costs that the University had that were significant in amount for which we had to develop funds. Most of these related to additional costs for staff or fringe benefits. I have asked a report on this area to be prepared for all employees so that they fully understand our fringe benefit program. Let me just indicate some figures here. Faculty and staff benefits have risen from \$7.6 million in 1968-69 to an estimated \$19.8 million in 1973-74. This \$12.2 million increase in fringe benefits has been brought about primarily in relationship to a strengthening of the University retirement program. Whereas in

1971-72 the University was contributing 8% of the salary, last year we were contributing 7%, and this year 8%. And just a round figure, each percentage point increase of the University's contribution it means \$1.2 million extra in the budget.

Similarly, costs of the Social Security program, increases of which of course we all support . . . have increased during this five-year period 150 per cent.

In the area of faculty and staff medical benefits, of course, the cost of these continue to grow as the costs of medical treatment and hospitalization go up. I can state that in the past two years, health insurance premiums for family coverage alone has increased over 75%. I would just like to remind you that all of the increase has been absorbed by the University, while the employee's contribution to the plan — the \$5.00 per month — has remained the same. And so as we talk about the questions of salaries and compensation, I wanted to emphasize that much of the funds that have become available in addition to what anticipate from state appropriation sources have gone in some way or other towards the increased fringe benefits.

The second matter that I wish to mention concerns two academic personnel policies, policy matters about which consultation with the Senate is very, very important. In fact, you all are aware that the Trustee regulations very properly say the President shall consult with the faculty as appropriately organized . . . on all matters relating to academic personnel policies. What I have put before the University Faculty Senate Council, and I am sure will go to the appropriate committees, are drafts of two documents. The first perhaps could be better described as a report relating to policies that should govern academic ranks and titles in the University. This grew out of a committee that was advising the Provost a year and a half ago on academic promotions; there were several questions raised suggesting that clarification was needed in handling of academic titles and ranks. Quote . . . "the whole matter of academic titles be studied and a view toward sharpening or sharpening sharper descriptions of Associate Professor, Professor and the various relationships of the functions, i.e., should there be extension professors, research professors, should there be multiple ranks, or a multiple series, or a single series?" A very distinguished committee has studied this long and hard, and has come back to the Provost with a series of recommendations, one of which indicated that any changes that are made in this regard should be made in a context of the reconsideration of tenure regulations of the University.

TENURE

With this in mind, the second of the policies which have been put before the Senate Council has been a draft of proposed policies governing the granting of tenure. Now academic tenure recently has been the subject of considerable national attention. To most of the academic community, tenure has traditionally represented an important safeguard to academic freedom. Criticisms of tenure, however, have been on the ascendancy. The concept of tenure . . . was carefully studied . . . by the Keast Commission on Academic Tenure, and the findings . . . are now available. This was a commission headed up by William Ray Keast who was then the president of Wayne State and now is a professor of political science at the University of Texas. This commission is, or was, of the conviction that academic tenure — rightfully understood and properly administered — provides the most reliable means of assuring the quality of faculty and educational excellence as well as the best guarantee of academic freedom. While the concept of tenure itself is sound, the commission does point out the fact that practices for awarding tenure may have been less than ideal. The commission also appears to have been responsible for generating much of the criticism that has been directed towards tenure as a policy.

Despite the shortcomings that have been identified by the critics, tenure is still in my view preferable to any of the many substitutes that have been proposed. The challenge however, is to assure that Penn State's tenure policy is strong and effective. Soon after I joined this institution, I

was told by members of the then Senate leadership, and others of this need to revise Penn State's tenure policies. I suggested at a Senate meeting that perhaps a commission ought to be formed representative of the institution and the people who are most concerned. I was advised by this group at that time, that the appropriate group should be the Faculty Affairs Committee of this body, as the principal review group. Also the Senate leadership at that time indicated that they would prefer that I would, or my office would, put forward a draft of tenure changes that I felt might be appropriate, rather than just raising issues with the faculty committee. And that's what we have done — this is a draft and will be before first, the Senate Council and I assume later the Committee on Faculty Affairs.

(Ed. note: At this point, President Oswald spoke briefly about the new Faculty Rights and Responsibilities Policy and about the Division of Undergraduate Studies, concluding with the following concerning the Applied Research Laboratory.)

And finally, I would remind you of discussions that probably are not in the forefront of your mind now, but were very much a couple of years ago, and that is, what should the policies of this University be vis-a-vis research? Particularly on the top of people's minds was classified research, how it should be dealt with, what was the place of the Ordnance Research Laboratory now applied Research Laboratory — in the University. I went before the Senate and to the Senate chairman, Professor Smith, and asked that the Senate undertake such a review.

This went on for a period under the overall aegis of the Academic Affairs Committee with a special subcommittee of Research chaired by Dr. Hugh Urban. The committee made recommendations which were adopted by this group — one of the principal recommendations was to the effect that the view be expressed that the institution and continuing presence of the ORL was consistent with the published commitment of the University to engage in both theoretical and applied research pointed toward the solution of problems of society above and beyond the needs and purposes of its own collegiate community and those of the Commonwealth. The University has both an obligation and a right to conduct academically justifiable research in defense as well as in other areas of societal concern.

The key word there, of course you will detect, was "justifiable," and it went on then to conclude that in the case of institutionalized patterns of classification and secrecy, what is important is that members of the general University community and the public must have special assurance that there is some respected University body which will monitor the work of this and other organizations in order that the mission of the University will be honored and not distorted.

It went on then to recommend that we restructure the Board that is advisory to the ARL, and that it be given a proper charge and also that it be composed of representatives of the entire University community, not just the technical people at that particular area.

What I am reporting to you now, as I have written in a full report to your Chairman, is that these recommendations have been done. The Board has been restructured and to facilitate ARL and University administrative communications with the University community to improve understanding and confidence in the ARL program — to insure that the ARL programs continue to be academically justifiable and to insure that security classification is minimally employed and only to protect information important to national security.

This Board will have its initial meeting here in the next couple weeks.

Council asks evaluation delay

The University Council Oct. 18 asked a delay in implementing the University-wide student evaluation of instruction after recommending at the Oct. 3 meeting that the evaluation be made during the fall term.

The delay was requested to allow time for the Senate Committee on Academic Affairs to complete a major study of student evaluation now in progress. Dr. Ronald J. Harshbarger, assistant professor of mathematics at the Beaver Campus and chairman of the Council subcommittee on

Instructional Improvement, requested the delay.

The Council also recommended that Provost Russell E. Larson ask department heads to give their estimates on the usefulness of the experimental course survey given at registration last spring to all students scheduled to graduate at the June commencement. The request would be in the form of a brief questionnaire and covering letter transmitting summary results of the evaluation to department heads.

(Continued on page two)

Two in Nelson W. Taylor series

Linus Pauling to give three lectures

Dr. Linus Pauling will give the 1973 Nelson W. Taylor Lectures in Material Sciences Thursday and Friday, Nov. 8 and 9, and will give a lecture of general interest Saturday, Nov. 10.

The Taylor lecture series was established by the widow of Nelson W. Taylor, who was professor and head of what was then the department of ceramics here from 1933 to 1943. He died in 1965, and the memorial was established in 1966 to provide, in part, for lectures by distinguished visiting speakers prominent in science.

Dr. Pauling, winner of two Nobel Prizes, will speak on "The Structure of Metals and Alloys," Thursday, Nov. 8, at 8 p.m. and on "The Structure of Atomic Nuclei" the following evening at 8 p.m.

The University Committee on International Programs is sponsor of the lecture Saturday, Nov. 10, on "Vitamins and International Health," at 8:30 p.m.

All the lectures are open to the public, and all are in Room 112 Kern Graduate Building.

Remembering his boyhood, a goat for his sons

Biophysicist Keith grew up on Kentucky farm

After 18 months in Central Pennsylvania, Dr. Alec D. Keith has become an enthusiastic proselytizer for the beauties of his new home.

"I don't know if most of the people here really appreciate how high the quality of life is," the associate professor of biophysics says. "We lived in Orinda, California, before coming East. The major news in Orinda is whose house was robbed the preceding day. You practically had to lock your car with a ball and chain. One afternoon, we left the house for an hour and came back to find it had been robbed."

"I really enjoy living on a couple of acres and still being only ten minutes from the University. I think this is one of the ecologically preferred spots in America."

Dr. Keith first became interested in Penn

State when biophysicist professor Wallace Snipes spent a sabbatical at the University of California at Berkeley where he was teaching, and the two men began collaborating on some papers.

For his research, Dr. Keith has been awarded an H.E.W. Research Career Program Development Award. He is studying biological membrane structures and function, often by examining the mutants of yeast and bacteria to introduce a requirement that has to be supplied in the diet. The requirements of interest to him are structural elements necessary for membrane growth and function.

"We're trying to make structural, functional assignments," Dr. Keith explains. "For example, inositol is a vitamin and a structural element required in the mem-

MUSIC PROGRAMS

Three programs of music, involving Music Department faculty members, will be performed in the Music Building recital hall next week.

Monday, Oct. 29, Musica da Camera and other members of the faculty, along with a senior performance major, Charles Metz, will play works by a variety of composers. Metz, who built his own harpsichord this summer, will play compositions by Francois Couperin for two harpsichords, with Teri Gemberling, part-time music instructor.

A trio sonata by Handel will be performed by June Miller, harpsichord; Overda Page, flute; and Raymond Page, violin, following which Miss Miller will play two groups of harpsichord pieces from French Baroque and English Renaissance periods.

The chamber orchestra, Musica da Camera, formed and conducted by Dr. D. Douglas Miller, assistant professor of music, will play Bach's Concerto in C Minor and Telemann's Suite in A Minor, in which Mrs. Page will be flute soloist.

Wednesday, Oct. 31, Raymond Page, associate professor of music, and violinist with the Alard Quartet, will play Regner's "Suite No. 7" for viola; Bach's "Sonata in

F Minor" for violin, with June Miller accompanying on harpsichord; a Hindemith composition, with Philip Dettra providing piano accompaniment; and Stravinsky's "Elegy," for viola.

The Brass Choral, under the direction of James D. Benshoof, instructor in music, will give a concert Friday, Nov. 2, at 8:30 p.m. in the Music Building recital hall. Works of eight composers will be featured by the Choral. Members of the Symphonic Wind Ensemble, directed by Smith C. Toulson, assistant professor of music, will also perform.

All programs are free and open to the public.

WRESTLING TICKETS

Penn State will be host to wrestlers of seven colleges in the first Penn State Invitational Wrestling Tournament, Dec. 7-8. Applications are currently being accepted for tickets for the entire series; individual session tickets will be sold beginning Nov. 15. Ticket orders are being accepted now, and those wishing to pick up their tickets later can avoid the 50-cent mailing and handling charge. The cost for the entire series (three sessions) is \$6. It you

(Continued on page two)

is extremely important to university professors. They feel it is essential to their creativity."

Dr. Keith is convinced that a professor to be a good teacher in a university that carries on a graduate program, he should be involved in research.

"The special knowledge and exploratory attitudes gained from research activities filter down through all of one's teaching, resulting in better education for both graduate and undergraduate students," he says.

Although many scientific fields currently have an oversupply of Ph.D.s, Dr. Keith believes there's still plenty of room for people who can do high quality work.

"I don't think we need more quantity in American science today, but we always need more quality," he comments.

Dr. Keith himself did not originally intend to become a scientist. He grew up on a farm in Pulaski, Ky., and planned to go into farming on his own. However, his family moved to Arizona when he was in his teens, and he enlisted in the Air Force and served in Korea. On his return, he contracted polio, and the resulting paralysis of his legs sent him to Walter Reed Army Hospital, where he spent two-and-one-half years. Transferred to the Long Beach, Calif., Veterans Administration Hospital for an additional two years, he found himself next door to Long Beach State College. He enrolled and wound up with a B.S. in zoology. From there, he went to the University of Oregon, earned a Ph.D. in genetics, and joined the Genetics Department at Berkeley.

He has not totally turned his back on farming, however. He and his wife recently bought their three sons a goat, since Dr. Keith remembered from his own boyhood that they make good pets. The family is also converting a long porch attached to their home into a greenhouse.

"I don't like paying \$1.00 a pound for tomatoes in the winter," he says, "so I've decided to go back to farming on a small scale anyway and grow my own table vegetables!"

Dr. Alec D. Keith — studying biological membrane structures.

Dr. Maurice Mook dies at 69

Dr. Maurice A. Mook, professor emeritus of anthropology, died Oct. 18; he was 69 and had retired in 1969 after serving on the faculty for 20 years. A native of Pennsylvania, he received his B.A. degree from Allegheny College in 1925, the M.A. from Northwestern University in 1929, and Ph.D. from the University of Pennsylvania in 1942.

Noted for his studies among religious and ethnic groups in this country, he conducted field work among communities of the "Plain People" of Pennsylvania and lectured on the subject more than 200 times throughout the state. Earlier, he had done field work among Indian tribes, and was co-author of "Walapai Ethnography," a

book on the tribe in Arizona. He made archaeological excavations of Indian sites in Illinois and Missouri and conducted studies of remnant Indian peoples in Delaware, Maryland, Virginia, and North Carolina. He also did field studies in Mexico and Peru.

In 1926 the University honored him with the Christian R. and Mary F. Lindback Award for Distinguished Teaching.

Prior to coming to Penn State, he served on faculties at the University of Pittsburgh (1929-33), Ohio Wesleyan University (1935-36), Brown (1936-38), American (1941-45), and Missouri (1945-49). During World War II he worked as a civilian with the Office of Strategic Services in Overseas Security.

process. The Federation, which is composed of more than 22,000 member-subscribers throughout the world, was the award annually to a member of any member association of the Federation for the in-plant study and solution of an operating problem. The method of phosphorus removal from sludge, worked out by Dr. Long and other engineers, is now being used at many locations throughout the nation.

Dr. Walter H. Walters, dean of the College of Arts and Architecture, has been elected Fellow of the Association, by the American Theatre Association. The honor was bestowed for "continuous and outstandingly meritorious work in the theatre in America."

A one-act play by Dr. Lillian Preston, associate professor of speech, won first place in the John Gassner Memorial Award contest sponsored by the New England Theatre Conference. This is her sixth playwrighting award.

Dr. James E. Yesselsky, assistant professor of school psychology, has won the 1973 Lighter Witmer Award for a paper, "Accountability of diagnostic-prescriptive Teaching: Myth or Reality?" School Division of the American Psychological Association makes the annual award.

any proposals and inquiries are encouraged. There are no formal deadlines.

(102-3) The National Science Foundation is formulating a new division under its RANN program. To be called the **Advanced Energy Research and Technology Division**, the new division will conduct studies and research. Advanced research and technological problems in geothermal energy, energy conversion, energy resources, and energy and fuel transportation will also be supported. Estimated FY 1974 funding will be \$25 million. The acting head for the new division is Dr. Richard Green, Advanced Energy Research and Technology Division, RANN, NSF, 1800 G Street, N.W., Washington, D.C. 20540.

(102-4) The National Research Council announces the **1974 Research Associateship Program**, providing opportunities for research in selected federal organizations for postdoctoral scientists and engineers. Associateships are open to recent recipients of the doctorate and in some cases to senior investigators. Certain programs are open to non-U.S. citizens. Three areas of research to be supported — atmospheric, earth and space science, biological, medical, and behavioral sciences; chemical, engineering, mathematical, and physical sciences. Stipends are not less than \$13,000/year. Applications must be postmarked not later than Jan. 15, 1974. Additional information is available from Dr. R. B. Howell, 3110 Rockledge Blvd., (865-2514) or from: Associateship Office JH06-P, National Research Council, 2101 Constitution Ave., N.W., Washington, D.C. 20540.

(102-5) The Rockefeller Foundation and the Ford Foundation announce a program of awards in support of **Population Policy Research** in the social sciences, humanities and law. In this fourth year of the program, projects in population policy research drawing on humanistic disciplines have been added to social scientific and legal research on population policy. The following is a suggestive listing of research areas: interaction of population variables and social, cultural, and humanistic concerns; interaction of population variables and economic policy; population distribution and interaction of population variables and law. Detailed program and proposal information is available. For review and approval by Jan. 15, 1974. Robert J. McIntyre, PSU Dept. of Economics, is a 1973 award winner under this program.

REMINERS — DEADLINE OATES, Dec. 1 for NHL Pulmonary Research Grants and NSF Engineering Research Initiation Grants (Sept. 27 INTERCOM 289-1 and 289-3). Dec. 1 for NSMHA training grants (Oct. 6 INTERCOM 210-11). Dec. 7 (extended) for NSF Undergraduate Research Participation, NSF Secondary School Science Education program; and NSF Student Originated Studies program (Sept. 6 INTERCOM 296-3).

At New Kensington Campus

Gonzalez-Cruz gets director's award

Dr. Luis F. Gonzalez-Cruz, assistant professor of Spanish, Italian and Portuguese at the New Kensington Campus, has received the 1973 New Kensington Campus Director's Award, which is given annually for "Outstanding Achievement and for Outstanding Service to his Campus and University."

Dr. Gonzalez-Cruz, whose class enrollment in Spanish courses has increased from 15 students to 52 in three years, offered, for the first time on any campus of the University, courses in Latin American

literature of 19th and 20th centuries in English translation and in Latin American culture and civilization in English translation.

In the publishing field, he has written various articles, reviews and translations of Latin American texts into English, and a book on the late Pablo Neruda. He has also published poems and short stories and completed a manuscript on three poets, Neruda, Vallejo, and Garcia Lorca, as well as a book of poems.

Occupational privilege tax deduction

As was the case last year, the University will withhold the Occupational Privilege Tax of \$10.00 from all employees who are based at University Park and are liable for the tax. Since the University will be able to obtain a 2% discount for prompt payment, it will pass this savings on to each employee.

Accordingly, the Faculty and Staff members who are paid on a monthly basis, the tax of \$9.80 will be withheld from their pay checks, dated November 30, 1973. For

all other employees (Technical Service, Graduate Assistants, and Wage) the deduction will be made from their paychecks dated November 23, 1973.

If any employee wishes to appeal his liability for this tax, he should apply directly to Mr. Paul O. Bender, Tax Collector, 250 East Beaver Avenue, State College, Pennsylvania 16801.

(Department Heads are asked to make sure that their wage earners are aware of this tax.)

NEWS—

(Continued from page one)

pen to obtain tickets by mail, address the Penn State Ticket Office, 237 Recreation Building, making checks of money orders payable to The Pennsylvania State University (\$6.50 for tickets to be mailed).

ART SHOW TOURS

For the duration of the exhibit of the art works of three Swiss painters, tours of the show will be conducted Tuesdays and Thursdays at 2 p.m., with guides familiar with the artists and their works. The exhibit is at the Museum of Art and will remain until Nov. 4. A film of the life of one of the artists, Cuno Amiet, is shown daily except Monday at 1 and 3 p.m., just before and just after the tours.

SPECIAL FILM

As part of the classwork in Comparative Literature 100 (Introduction to Comparative Literature), a film, "Black Orpheus," will be shown Tuesday, Oct. 30, at 7:30 p.m. in Room 207 S. Human Development. Anyone interested may attend. English subtitles are used.

USTFF CHAMPIONSHIPS

Cross country championship races, involving senior men (over 30), women (all ages) and varsity runners from colleges and universities in the Eastern Region of the U.S. Track and Field Federation, will be held Sunday, Oct. 28, on the University White golf course. The six-mile senior men's race will start at 10:30 a.m.; the USTFF varsity race, also six miles, at 11:30 a.m.; and the women's 25-mile race at 12:30 p.m.

WOMEN'S TRACK

An organizational meeting of all women students, faculty and staff interested in participating in a Women's Track and Field Club will be held Tuesday, October 29, at 6:00 p.m. in the Game Room of White Hall. The Club is planning to engage in supervised Winter conditioning looking to Spring competition.

All who are interested are encouraged to attend this initial meeting; if unable to do so or to obtain further information, contact Maribeth Peninger — 105 White Building — 865-7591.

HUB CANDLELIGHT

A special Candlelight Dinner will be held in the Hub Terrace Room Wednesday, Oct. 31. Below is the menu. The menu will feature beef burgundy, roast turkey with dressing, Salisbury steak with mushrooms, fowl Cordon Bleu, and baked stuffed potatoes. Witches' brew will be served, and the feature pastry will be pumpkin raisin muffin. Service at the Terrace Room is from 5 to 6:45 p.m.

Volume 3, No. 8 October 26, 1973
Penn State INTERCOM is a weekly publication for the academic community of The Pennsylvania State University. It includes each Thursday when classes are in session. General information and items for the calendar should be sent to the Editor, INTERCOM, by the preceding publication date, Room 312 Old Main.

Honors

Dr. Frank Anthony, associate professor of agricultural education, received the Honorary American Farmer Degree of the Future Farmers of America, presented at the organization's 46th National Convention in Kansas City, Mo. A gold key and certificate were presented to 153 teachers, representatives of government and industry, and parents of Star Farmer of America and Star Agribusinessman of America.

Albert J. Midler, librarian at the New Kensington Campus, has been selected for inclusion in the 38th biennial edition of the publication, "Who's Who in America." He has been at the New Kensington Campus since 1968.

Martha A. Adams, assistant to the dean of the College of Health, Physical Education and Recreation, has received the annual Merit Award of the Eastern Association for Physical Education of College Women. The award was given for her contributions to the profession and to the organization, which she has served as vice president.

Dr. David A. Long, assistant professor of civil engineering, has received the Philip F. Morgan Medal given by the Water Pollution Control Federation for work on soluble phosphorus removal in the activated sludge

Funding Opportunities

For more information, call 865-1372 except where noted below, and refer to the item by its number and the general information. People with grants information for dissemination in this column should call the same number.

OCTOBER 26, 1973

(102-1) The Environmental Protection Agency (EPA) has a number of grants programs for which no specific proposal deadlines have been set. Descriptions and contacts are available; follow-up listings, subject to changes and new legislation.

Air Pollution — Control Program Grants; Fellowship-Masterpiece Training Grants; Survey and Demonstration Grants; Control-Technical Training; Control Research Grants.

Water Pollution — Control-Drift Training; Control-Drift of Wastewater Treatment Works; Control-State and Interstate Program Grants; Control-State and Local Municipal Development; Control-Training Grants; Control-Research, Development and Demonstration Grants.

Radiation — Training Grants and Research Grants. **Environmental Protection** — Comprehensive Research Grants and Consolidated Program Grants.

Pesticides — Research Grants. **Solid Waste** — Research Grants. **Water Supply** — Research Grants.

(102-2) The NSF Research Applications Directorate has an Office of Exploratory Research and Problem Assessment whose purpose is to support research on emerging or existing problems of national significance which fall under the other RANN topics (Divisions Environmental Systems and Resources, Advanced Technology Applications, and Social Systems and Human Resources). The following have areas in Exploratory Research and Problem Assessment:

Technology Assessment — study of effects on science when a technology is introduced.

Technology and the Economy — exploration of the interface between technology and the economy including environmental consideration in the problem areas. Internalization of social costs, large scale projects, the consumer and the marketplace, productivity in the public and private sectors, and competitiveness in the international market.

Human Needs — research and assessment on topics such as: alternative population patterns; women, youth, family, work and leisure; human rehabilitation; minority group problems and the aging population.

Alternative Futures and Institutional Change — exploring societal consequences through scenario forecasting, long-range planning, and social institution responsiveness.

Other Societal Problems — to handle creative new ideas which lie outside the above-defined areas, e.g., education, transportation, health, communications, environmental management. Preliminary

U. COUNCIL—

(Continued from page one)

The survey asked students to name the best and worst courses both within and outside their major field of study during their college career.

The major part of the Council meeting was devoted to a presentation of a proposal for developing an administrative and academic structure consonant with the mission of the Commonwealth Campuses. The Council is one of several University groups whose advice is being sought in the development of the organization within the University's overall academic policy plan. Or Robert G. Quinn, dean of academic instruction for the Commonwealth Campuses, made the presentation.

Names of a subcommittee to prepare a response to the proposal for the Council were Dr. John J. Coyle, Jr., professor and head of the department of business logistics, chairman; Leo Sam Deegan, University Park student member; Dr. Harshbarger, Or. Charles L. Hosier, dean of the College of Earth and Mineral Sciences; and Charles J. Smith, director of the Osgood Campus.

The Nov. 1 meeting of the Council will be held at the Berks Campus.

WPSX highlights

Thursday, Oct. 25: At 8 p.m., "Behind the Lines" presents a monthly review of the news media concentrating on how the media reported major news stories. Items of discussion include journalism, and interviews with journalists. At 10:30 p.m. on "Overview," Henry Burns, assistant director of criminal justice at Penn State, joins a panel of legislators, prison officials, and administration officials to discuss prison reform in Pennsylvania.

Friday, Oct. 26: At 6:30 p.m. on "Women," Samantha Dean and Dr. Jo Ann Evans Gaudin discuss whether or not women should question psychological theories developed by male researchers. Items of discussion include "Old Man and Myth" at 8 p.m. The program serves as an introduction to "Law and Order," which will air every week. Film about a big city police force, to be seen at 8:30 p.m.

Saturday, Oct. 27: Award-winning documentary filmmaker Fred Wiseman and Joe Paul Kinigho to appear on the Beverly Hills police department are featured in a discussion of "Old Man and Myth" at 8 p.m. The program serves as an introduction to "Law and Order," which will air every week. Film about a big city police force, to be seen at 8:30 p.m.

Sunday, Oct. 28: Arthur Mitchell and his Dancel Theatre of Harlem are featured in a performance documentary at 6 p.m. At 10 p.m. on "Film Line," William F. Buckley, Sr. and women's liberation leader Germaine Greer resume their debate on women's lib.

Monday, Oct. 29: Concomid Film, Wilson Hall, "The City of Women," and "Other Faces" a special program about aging, at 8 p.m. At 9:30 p.m. "Tax Dollars and Public Schools" is the subject on "Overview."

Tuesday, Oct. 30: Opera star Shirley Verrett tells those who have made mistakes in her operatic career on "Profile in Music: Shirley Verrett" at 8 p.m. About 9:30 p.m. the blues team of Dr. Terry Brown and McGee perform in a special hour program.

Wednesday, Oct. 31: Coach Joe Paterno and hosts Fran Fisher and Jim Tarmann present NFL highlights and analysis of Penn State's game at West Virginia on "TV Outbreakers" at 7 p.m. At 10:30 p.m. novelist Eric Caldwell discusses his new book, "Annette," with host Robert G. New on "Book Beat."

University Calendar

October 25-November 4, 1973

Special Events

Thursday, Saturday, Oct. 25-27 — University Theatre, "Amorous Flea," 8 p.m., Pavilion.

Thursday, Oct. 25 — Black Christian Fellowship "Religious Emphasis Week" program, 7:30 p.m., Black Cultural Center. Talk by Dr. Lawrence Craib, pastor, Parkwood CME Church, Cleveland, on the theme "Reaching Out."

Thursday, Oct. 25 — Faculty Women's Club, 9:30-11 a.m., HUB assembly room. Panel discussion on "Alternative Schools: What Does That Mean for State College?" Dr. Mary Dupuis, education, moderator.

Friday, Oct. 26 — Artists Series, Alicia De Larrucha, piano recital, 8:30 p.m., Schwab.

Friday, Oct. 26 — Sports: Women's field hockey, vs. Millersville State College, 2:30 p.m., two games. Men's soccer, vs. Navy, 7 p.m.

Friday, Oct. 26 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Saturday, Oct. 27 — Sports: Football, vs. West Virginia, 1:30 p.m., Beaver Stadium, All-University Day.

Saturday, Oct. 27 — Indian Festival Celebration, "Diwali," 6:30 p.m., first floor, Kern. 20:30 minute prayer; Indian snacks, 7 p.m.; Indian movie, "Seete Aai Geeta," 8 p.m., Charge, 50 cents.

Sunday, Oct. 28 — Sports: Cross Country USTFF Eastern Regional Championships, 11:30 a.m. Senior men's six-mile race, 10:30 a.m.; women's 2½ mile race, 12:30 p.m.

Sunday, Oct. 28 — Chapel Service, 11 a.m., Music Bldg. recital hall, The Reverend James Z. Alexander, Shaw Divinity School.

Sunday, Oct. 28 — Black Christian Fellowship service, 11 a.m., Black Cultural Center.

Monday, Oct. 29 — Musica da Camera, 8:30 p.m., Music Bldg. recital hall.

Monday, Oct. 29 — First meeting, women's varsity fencing team, 7 p.m., Room 33 White.

Tuesday, Oct. 30 — Sports: Women's field hockey, vs. Lock Haven State College, 2:30 p.m., two games.

Tuesday, Oct. 30 — Free-UI Jammy, 7-11:30 p.m., HUB ballroom.

Wednesday, Oct. 31 — Free-UI Halloween Jammy, 7-11 p.m., HUB ballroom.

Wednesday, Oct. 31 — Raymond Page, violin-viola recital, 8:30 p.m., Music Bldg. recital hall.

Thursday, Nov. 1 — Artists Series, Leningrad Philharmonic, 8:30 p.m., Rec Hall.

Thursday-Saturday, Nov. 1-3 — Thespians show, "The Brotherhood," 8:30 p.m., Schwab.

Friday, Nov. 2 — Penn State Brass Choral, 8:30 p.m., Music Bldg. recital hall.

Friday, Nov. 2 — Folk and Squire Dance Roundup, 7:30-10 p.m., North Gym White.

Friday, Nov. 2 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday-Saturday, Nov. 2-3 — University Theatre, "One Flew Over the Cuckoo's Nest," 8 p.m., Playhouse Theatre.

Friday-Saturday, Nov. 2-4 — Sports: Women's field hockey, Susquehanna Field Hockey Tournament.

Saturday, Nov. 3 — Sports: Rugby, vs. Kent State, 2 p.m.

Sunday, Nov. 4 — Chapel Service, 11 a.m., Eisenhower Chapel. Charles L. Coleman, Religious Affairs.

Sunday, Nov. 4 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Meetings

Sunday, Oct. 28 — Organizational meeting. Nityany Fencing Club, 7 p.m., Room 134 White. For students, faculty, staff.

Monday, Oct. 29 — USG Senate, 7:30-10:45 p.m., HUB assembly room.

Monday, Oct. 29 — Panel Council, 6:30 p.m., Alpha Xi Delta.

Monday, Oct. 29 — OTIS, 6:30-7:30 p.m., HUB assembly room.

Tuesday, Oct. 30 — Engineering Undergraduate Council, 7:30 p.m., Room 207 Sackett.

Tuesday, Oct. 30 — Undergraduate Political Science Association, 8:30-9:30 p.m., Room 173 Willard.

Tuesday, Oct. 30 — ARHS, 7:30-9:30 p.m., Room 203 HUB.

Tuesday-Wednesday, Oct. 30-31 — A.W.S., 6:30-10:30 p.m., Room 203 HUB.

Thursday, Nov. 1 — USG Academic Assembly, 7:30-9 p.m., Room 203 HUB.

Seminars

Thursday, Oct. 25 — Chemistry, 12:45 p.m., Room 308 Bouché. Jack Halpern, University of Chicago, on "Oxidative Addition Reactions of Transition Metal Compounds."

Thursday, Oct. 25 — Geosciences, 4 p.m., Room 102 Kern. R. W. Staehle, International Nickel Professor of Corrosion Science and Engineering, Ohio State University, on "Thermodynamics of Grain Boundaries."

Thursday, Oct. 25 — Physics, 3:55 p.m., Room 117 Osmond. Ezra T. Newman, University of Pittsburgh, on "A Rather Remarkable Curiosity Arising from the Maxwell Equations."

Thursday, Oct. 25 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. D. M. Cridler, rural sociology, on "Social Implications of Technological Advance."

Thursday, Oct. 25 — Population Issues Research Office, 3:30 p.m., Room 344 Deike. Dr. Betty Kirchner on "Reasons for Wanting Children: Factors and Correlations."

Thursday, Oct. 25 — Computer Science, 4 p.m., Room 101 Althouse. Dr. Donald Johnson on "Optimal Spanning Trees, Branchings, and the Traveling Salesman Problem."

Thursday, Oct. 25 — Slavic-Soviet Language and Area Center, 8 p.m., Room 101 Kern. Professor Shelia Fitzpatrick, Columbia University, on "A. V. Lunacharsky, the Peoples' Commissar of Enlightenment."

Thursday, Oct. 25 — Statistics, 4 p.m., Room 73 Willard. Cathy Campbell on Applied Sampling: Some Examples."

Friday, Oct. 26 — Geochemistry-Metalurgy, 2 p.m., Room 244 Deike. Dr. R. W. Staehle, Ohio State University, on "Applications of Auger Analysis and Elipsometer to the Study of Surfaces."

Friday, Oct. 26 — Clinical Psychology, 3 p.m., Room 112 Kern. Dr. James W. Prescott, National Institute of Child Health and Human Development, on "Somatosensory Deprivation."

Monday, Oct. 29 — Genetics, 3:55 p.m., Room 111 Tyson. Dr. Lowell Wilson on "Genetic-Environmental Interactions in Livestock."

Monday, Oct. 29 — Biochemistry, 11:10 a.m., Room 101 Althouse. R. Rhoades on "Surfactant and Lipid Synthesis in the Lung."

Monday, Oct. 29 — Analytical Chemistry, 1 p.m., Room 310 Whitmore. Dr. Frederick R. Matson, on "Analytical Studies of Archaeological Ceramics."

Tuesday, Oct. 30 — Biochemistry, 11:10 a.m., Room 101 Althouse. R. Rhoades

on "Glucosid and Palmitate Metabolism in the Isolated Perfused Lung."

Tuesday, Oct. 30 — English, 8 p.m., Room 101 Kern. Philip Klass (William Tenn), new story for a forthcoming anthology on Jewish fantasy and science fiction.

Tuesday, Oct. 30 — Comparative Literature luncheon, 12:15 p.m., HUB Dining Room A. Anthony Cutler.

Tuesday, Oct. 30 — Operations Research, 3:45 p.m., Room 267 Willard. Dr. Stuart H. Mann, man-environment relations, on "Markov Decision Processes and Some Applications to Biological Control."

Tuesday, Oct. 30 — Chemical Engineering, 4 p.m., Room 140 Fenske. John A. Stellmack on "Speleology."

Tuesday, Oct. 30 — Graduate Air Pollution Control, 2:20 p.m., Room 140 Fenske. Dr. Joseph L. Carroll, business logistics, on "Public Transportation — How Can We Make It Work?"

Tuesday, Oct. 30 — Solid State Physics, 1 p.m., Room 339 Davey. Dr. Joel Appelbaum, Bell Telephone Research Laboratories, New Jersey.

Tuesday, Oct. 30 — Engineering Mechanics, 4 p.m., Room 216 Hammond. Dr. Frank L. DiMaggio, Columbia University, on "Dynamic Response of Fluid-Filled Shells."

Wednesday, Oct. 31 — Geosciences, 4 p.m., Room 26 M.S. Clement H. Bruce, American Association of Petroleum Ge-

ologists Distinguished Lecturer, on "Pressured Shale and Related Sediment Deformation-Mechanism for Development of Regional Contemporaneous Faults."

Wednesday, Oct. 31 — Ceramic Science, 4 p.m., Room 244 Deike. Dr. A. G. Evans, National Bureau of Standards, on "Acoustic Emission from Ceramics."

Thursday, Nov. 1 — Chemistry, 12:45 p.m., Room 310 Whitmore. Dr. Donald Sechrist, University of Illinois, on "Molecular Scattering."

Thursday, Nov. 1 — French, 8 p.m., Room 112 Kern. Dr. Raymond L. LaCharité, University of Kentucky, on "Interpenetration in Fiberglass's Panataguel."

Thursday, Nov. 1 — Physics, 3:35 p.m., Room 117 Osmond. Moshe J. Lubin, University of Rochester, on "Recent Developments in Laser-Induced Thermodynamic Reactions."

Thursday, Nov. 1 — Agronomy, 3:55 p.m., Room 112 Kern. H. R. Fortmann, Agri. Exp. Station, on "Profitable Agriculture and Environmental Issues Are Compatible."

Thursday, Nov. 1 — Statistics, 3:30 p.m., Room 73 Willard. Oscar Kempthorne, Iowa State University, on "The Controversies on Probability and Inference."

Interest Groups

Alpha Phi Omega, Mondays, 7 p.m., Room 308 Bouché.

Archery Club, Mondays, Wednesdays, Thursdays, 7 p.m., Room 33 White.

Badminton Club, Fridays, 6:15 p.m., Rec Hall South Gym.

Chess Club, Wednesdays, 6:30 p.m., HUB card room.

Chess Team, Thursdays, 6:30-11 p.m., Room 105 Sackett.

Coed Gymnastics Club, Mondays, 7:30 p.m., Rec Hall South Gym. Tuesdays, 7:30 p.m., gymnastics room, White.

Eco-Action, Mondays, 8:30 p.m., Room 301 Bouché.

Focus on Sweden, Tuesdays, 7 p.m., Room 312 Bouché.

German "Kaffeestunde", Thursdays, 2:30-4:30 p.m., Room 217 Burrows.

Interlinda Folk Dancers, Sundays, 7:30 p.m., HUB ballroom.

Jazz Club, Thursdays, 8:30-9:30 p.m., Room 167 Willard.

Keystone Society, Wednesdays, 7:30-9:30 p.m., Room 304 Bouché.

S.L.M.S., Wednesdays, 8 p.m., Room 108 Forum; Thursdays, 8 p.m., Room 101 Chambers.

Swash Club, Mondays, 7 p.m., White. Informal competition.

Young Socialists, 7:30 p.m., Mondays, Room 167 Willard; Wednesdays, Room 62 Willard.

PSOC, Sailing division, Thursday, Oct. 25, 7:30 p.m., Room 214 Bouché.

College Republicans, Thursday, Oct. 25, 7 p.m., Room 369 Willard.

SKI Club, Thursday, Oct. 25, 7:30-10 p.m., HUB ballroom.

Campus Crusade for Christ, Monday-Wednesday, Oct. 29-31, 6:30-11 p.m., HUB assembly room. Speaker, Josh McDowell.

PSOC, Equestrian division, Tuesday, Oct. 30, 7:30 p.m., Room 111 Animal Industries.

P.S. Amateur Radio Club, Wednesday, Oct. 31, 7:30 p.m., Room 208 Eng. E.

Penn State Barbell Club, Wednesday, Oct. 31, 8:30-9:15 p.m., Room 273 Willard.

PSOC, Ski Clinic, Wednesday, Oct. 31, Oregon Hill.

Folklore Society, Thursday, Nov. 1, 8 p.m., Room 101 Kern.

PSOC, Canoe division, Thursday, Nov. 1, 7:30 p.m., Room 214 Bouché.

Official

Saturday, Oct. 27 — Written French and Spanish language examinations for advanced degree candidates.

Monday, Oct. 29 — Last date for a December graduate to deliver thesis to the Graduate School office.

Monday, Oct. 29 — Last date for department to certify completion of required papers for December graduates.

Monday, Oct. 29 — Last date for December graduates to order cap, gown, and hood locally.

Tuesday, Oct. 30 — First day for signing NDSL (National Direct Student Loans), SEOG Supplemental Educational Opportunity Grants, and University loans for Winter Term.

Friday, Nov. 2 — Last day for signing NDSL, SEOG, and University long range loans for Fall Term.

Films

Wednesday-Thursday, Oct. 24-25 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Little Caesar."

Thursday, Oct. 25 — International Films, 7 and 9 p.m., HUB assembly room. "Beauty and the Beast."

Thursday-Sunday, Oct. 25-28 — Arnold Air Society, 7 and 9 p.m., Room 105 Forum. "Il Gai."

Friday-Saturday, Oct. 26-27 — Student SF films, 7 and 9 p.m., HUB assembly room. "Little Shop of Horrors."

Saturday, Oct. 27 — Penn State Film Club, 11 p.m., HUB ballroom.

Tuesday, Oct. 30 — "Black Orpheus," to be shown in Comparative Lit 100, 7:30 p.m., Room 207 S. Human Development. English subtitles. Anyone interested may attend.

Wednesday, Oct. 31 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Mondo Cane."

Thursday, Nov. 1 — International Films, 7 and 9 p.m., HUB assembly room. "Variety Lights," directed by Fellini-Li-Lauda.

Friday-Saturday, Nov. 2-3 — Student SF Films, 7 and 9 p.m., HUB assembly room. "The 39 Steps."

Saturday, Nov. 3 — Free-UI children films, 12-30 p.m., Room 207 S. HUB assembly room. Cartoon Festival.

Alicia de Larrucha, brilliant Spanish pianist, will feature works by Chopin, Debussy, and Albeniz in her Artists Series program Friday (Oct. 26) at 8:30 p.m. in Schwab Auditorium. Tickets for the program are currently on sale at the HUB. The program next week will feature the Leningrad Philharmonic orchestra.

Lectures

Thursday, Oct. 25 — 7:30 p.m., Mineral Science Auditorium. Dr. Fernando Beaudante-Terry on "Some Contemporary Urban Developments in South America." Illustrated lecture.

Leningrad Philharmonic, directed by Maris Jansons, on Artists Series Nov. 1, in Schwab.

Artists Series has pianist Friday, Leningrad Philharmonic next week

Works by Mateo and Isaac Albéniz, Debussy, and Chopin are featured on the program of Alicia de Larrocha, the Spanish pianist who will perform Friday, Oct. 26, at 8:30 p.m. in Schwab Auditorium.

Winner of the Grand Prix du Disque, the Paderewski Memorial Medal, and the Spanish Order of Civil Merit, Alicia de Larrocha has been hailed for her "near-miraculous keyboard control," and "impeccable taste."

Along with presenting 20 recitals throughout the U.S., she will appear with the Baltimore, Cincinnati, New Orleans, Louisville, Pittsburgh, and St. Louis Orchestras this season.

Altoona band in first public appearance

Two campuses hold homecomings

Both Behrend College and Altoona Campus will be holding homecoming programs beginning next week.

Altoona Campus activities actually extend over a full week, beginning with a stage review Friday, Nov. 2. Crowning of the Homecoming Queen will be held Sunday, Nov. 4.

Certainly one of the highlights of the week will be the first public appearance of the 72-member Altoona Campus Cougar Band, which has been organized from among the students by the retired director of the Altoona High School band. The band's uniforms were purchased from the Hollidaysburg High School band. Organiza-

Any remaining tickets for her concert are available at the HUB.

Tickets for the Thursday, Nov. 1, appearance of the Leningrad Philharmonic will go on sale Monday, Oct. 29, at 9 a.m. at the HUB for students, and Tuesday, Oct. 30, for the general public. The Orchestra, under its guest conductor, Maris Jansons, will play at 8:30 p.m. in Recreation Bldg.

The program will feature violinist Viktor Liberman, who will play the Concerto for Violin and Orchestra, Op. 9/29 by the modern Russian composer Boris Tischenko, as well as Symphony No. 9, Op. 70 by Shostakovich and Tchaikovsky's Symphony No. 4 in F minor, Op. 36.

ing a band on a two-year campus has obvious difficulties. The band will march Nov. 8 in a community parade which will include floats and other marchers.

The Homecoming program will also include a stage review and class reunions Saturday, Nov. 9, and dance and class reunions Saturday, Nov. 10. Three or four bus loads of alumni, their families, and others interested, will travel to University Park for the Penn State-North Carolina State football game.

At Behrend, activities will include a reception Nov. 2 for alumni, faculty, staff, and students; campus tours, an alumni-student football game; and a dance Nov. 3.

Funny, moving play opens at Playhouse

The University Theatre production of "One Flew Over the Cuckoo's Nest" will open at 8 p.m. on Friday, Nov. 2, in the Playhouse Theatre with subsequent performances on Nov. 3 and 6 through 10.

Adapted by Dale Wasserman, the play is based on the best-selling novel by Ken Kesey. Richard Edelman, associate professor of theatre arts, will direct the production.

The play, set in the psychiatric ward of a hospital in the Pacific Northwest, involves the struggle of a freedom-loving young man in the orderly world of the hospital against the repressions of society. According to Edelman, it is a joyously funny and moving allegorical play that "wanders all over the comic map" with satirical and farcical humor of the nature of the popular "M.A.S.H." and "Catch-22."

"The play opened on Broadway before its time," Edelman continued, "and was overwhelmingly successful in its later San Francisco run. It expresses the feeling of the student revolt generation of the late '60s."

The cast of graduate and undergraduate students features theatre arts faculty Kay Doubleday and Manuel Duque in leading roles. Both are professional actors.

Miss Doubleday, who is teaching part-time this term, has performed extensively in movies, television and on stage, most recently, with Center Stage in Baltimore. Locally, she played Regina in the '71 Festival Theatre production of "Little Foxes." Duque, who taught at Bennington College, Bucknell University, and the University of Illinois before coming to Penn State in 1970, has directed many college and university productions, including the 1972 University Theatre production of "Hedda Gabler."

In its annual tour, Le Treteau de Paris

To perform Moliere's classic, "L'Avare"

One of Moliere's masterpieces, "L'Avare," ("The Miser"), will be performed in French by Le Treteau de Paris during its annual visit to the campus at 8 p.m. Tuesday, Nov. 6, in Schwab Auditorium.

Written in 1668, "L'Avare" has been described as simultaneously a comedy of character and manners. Moliere portrays the corrupting effect of the miser Harpagon's avarice both on himself and his children. Relationships between the father and his son and daughter who try to trick him are carefully detailed as are those between Harpagon and his servants.

Critics have pointed to the strong inner logic of the play. The character of the miser is clearly shown in the opening scenes, and all his subsequent speeches and reactions follow from it. This inner coherence enhances the comedy.

Tickets for the performance are available in S404 Burrows Bldg. and from Dr. Isabelle Armitage, 865-8481. They will go on sale at the HUB Desk from 8 a.m. to 5 p.m. beginning Oct. 30 and can also be

Georges Werier, as Cleante, and Diane Kurys, as Mariane, star in Moliere's "L'Avare," to be performed in French Tuesday, Nov. 6, in Schwab.

purchased at the box office the night of the performance.

IN WRITING

"Breeding Plants for Disease Resistance, Concepts and Applications," is a book recently published by the University Press, edited by Dr. Richard A. Nelson, professor of plant pathology. The book is dedicated to the late Dr. Clifford C. Wernham, who was professor of plant pathology and who began compiling the book before he died in 1969. The book focuses on methods to increase disease resistance in plants through breeding. Dr. Nelson wrote the first half of the book which deals with general considerations of the concepts, principles, and terminology of the subject. Dr. Walter I. Thomas, associate dean for research in the College of Agriculture, wrote a chapter, "Breeding Methods for Disease Resistance." Dr. Henry D. Gerhold, professor of forest genetics, wrote on "Forest Trees," which is in the second section of the book. This portion treats many of the important crop species specifically.

"The Coach," a text book written by Dr. Ralph J. Sabock, assistant professor of physical education, has been published by W. B. Saunders Co., Philadelphia. The 273-page book, specifically written for prospective high school coaches, is being used by students at the University in a physical education course entitled: "Methods and Principles of Athletic Coaching."

Dr. Stanley Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies, is editor of a Louisiana State University Press book, "Saint Joan" Fifty Years After, 1923/24-1973/74. A chronological tracing is made of the best criticism of George Bernard Shaw's play, "Saint

Joan," from the time of its opening performance through five decades. Essays, articles, reviews, and critiques are included, and Dr. Weintraub has written a critical introduction to the book, which also includes a survey of the impact of the play on the French people, and a discussion of the play by Shaw himself.

The fatal attraction of totalitarianism to the West is the subject of a new book, "A Critique of Totalitarianism," by Dr. R. A. Preisner, professor of German.

The 400-page volume has been published by Academia Christiana in Rome, and a 600-page sequel will appear next year.

Although economics — Czarist mismanagement or the German inflation after World War I — has been stressed as the principal cause of totalitarian take-overs, Dr. Preisner believes that spiritual reasons are equally important, and his book traces these reasons back to the religious, spiritual, and political crises of the 17th century.

"Western civilization today has no real answers for the questions people ask about the meaning of existence," he comments. "But many young people want quick and easy answers, so they turn to totalitarian ideologies, because they seem to promise solutions to life's problems."

The objects of the book's analysis and criticism range from Hegel and Marx to contemporary theorists of ideological trends. The sharpest criticism is aimed at the classical formulations of totalitarianism in Communist doctrine, not only in Europe but as it has developed worldwide. The book also deals with some of the newer revisions of classical Communist ideology.

Staff vacancies

To make application for the vacancies listed below call 865-1387 (Network 465-1387) no later than:

5 p.m. Thursday, Nov. 1, 1973

NURSE INTERCOLLEGIATE RESEARCH PROGRAM

University Park
Responsible for assisting with physical examinations within the Human Performance Laboratory. Assist with usual health record maintenance and a variety of data gathering tasks. A Bachelor's degree, or equivalent, and an R.N. plus two years of laboratory experience are desired.

RESEARCH AIDE COLLEGE OF SCIENCE

University Park
Responsible for setting up, using and maintaining various types of research equipment and for conducting experiments on the cellular structure of bones. A Bachelor's degree in biology, chemistry, biochemistry or microbiology, or equivalent, plus at least one year of related experience are desired.

ENGINEERING AIDE COLLEGE OF ENGINEERING

University Park
Responsible for the maintenance of Reactor control and support electronic equipment and for duties as Reactor Operator An Associate degree in Electronic Technology or equivalent, and work related experience are desired.

Applications for staff vacancies are considered without regard to race, color, creed, sex, or national origin.

Exhibits

Museum of Art — Three Swiss Painters. Daily showing at 1 and 3 p.m. of half-hour film of Cuno Amiet. Guided tours, 2 p.m., Tuesdays and Thursdays.

Zotter Gallery, Visual Arts — Super Mud '73. BFA Show, opening November 4.
Pattee Library, Main Lobby — Display of Esperanto materials. John Pettus, pen and ink drawings.

SUPERMUD The annual national student invitational ceramics exhibit currently on display at the 2nd Floor includes a sculpture by Pamela Turner, graduate student in art.

PENN STATE intercom

Volume 3, Number 9

November 1, 1973

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News in brief

AAUW COLLECTING BOOKS

Books of all types and quality magazines are being collected by the American Association of University Women for the annual Used Book Sale benefitting scholarships. Donations may be dropped off at 2-E Graduate Circle or pick-up arranged by calling Mrs. Pat Clark, 238-6275.

The AAUW Used Book Sale has been an annual Spring event for the past twelve years. Proceeds benefit graduate scholarships and local educational projects such as Centre Area Health Council for Tel-Med, Family Planning Council, Youth Employment Service, Child Development Council, and Schlow Memorial and Centre County Libraries.

FRENCH PLAY

Tickets will be available at the door of Schwab Auditorium for the performance Tuesday, Nov. 6, at 8 p.m. of Moliere's classic play, "L'Avare," by the acting company, Le Troupeau de Paris. Tickets are \$2.25 for students and \$3.00 for non-

students. The play ("The Miser") is considered the most popular of Moliere's plays over the span of 300 years since it was written and first performed. It has played at the Comedie-Francaise 2,162 times alone and abroad has surpassed his other plays, even in China, where it is especially relished for its tragicomic portrait of compulsive avarice.

HORN AND PIANO

The noted British musicians Ifor James, French horn player, and James McCabe, pianist and composer, will present a recital Wednesday, Nov. 7, at 8:30 p.m. in the Music Bldg. recital hall during a visit to the campus which will last from Nov. 5 through Nov. 9.

Their appearance is being sponsored by the Institute for the Arts and Humanistic Studies through the cooperation of the Music Department.

James is well known for his performance of high horn parts in Baroque music and for his interpretation of contemporary works, which many composers have written for him. This is his second visit to Penn State, since he performed here in 1971 with the Philip Jones Brass Ensemble at an Artists Series presentation.

McCabe has written in most of the established forms, and his work has been recorded and performed widely. His repertoire as a pianist ranges from Haydn and Mozart to Webern and Schoenberg.

The two men will conduct masters classes and give private lessons while at the University. McCabe is also scheduled to speak at composition seminars, while James will work with the Brass Choral.

DIFFERENT FOODS?

Interested in new and different foods? Dinners featuring specialties of different countries are held twice weekly in the Maple Room of the Human Development Building, the work of students in FSHA 410. Each dinner is an authentic production in the style and atmosphere characteristic of the area being featured. Service is at 5:30 p.m.; meals cost between \$4.50 and \$6.00, depending on the specific meal. Reservations are required and may be made live or six days in advance (and early reservations are urged, since some patrons have been turned away for lack of space). Meals in the near future

(Continued on page four)

L.A. dedication Friday; talk by Dr. Clark Kerr

Dr. Clark Kerr, chairman of the Carnegie Commission on Higher Education and former president of the University of California, will present a public lecture Friday, Nov. 2, at 2 p.m. in Room 112 Kern Bldg. in connection with the dedication of the Liberal Arts Building. He will discuss the role of the liberal arts in the coming decade of higher education.

Following his talk, there will be an open house at the building for all members of the University community. Dr. Stanley F. Paulson, dean of the College of the Liberal Arts, has announced. There will also be an invitational luncheon prior to the lecture.

During the six years Dr. Kerr has served as its chairman and executive director, the Carnegie Commission has published more than 50 studies covering almost every phase of higher education, and its recommendations have begun to affect not only colleges and universities but also federal policies for their support.

Dr. Kerr served as chancellor of the University of California from 1952 to 1958 and as its president from 1958 to 1967. He began his career as an economist, teaching at Antioch College, Stanford University, and the University of Washington before joining the Berkeley faculty in 1945.

He currently holds the titles of professor of economics, professor of industrial relations, and research economist at Berkeley, and is an Honorary Fellow of Merrill College at the University of California at Santa Cruz.

Pivot on sale

The 24th anniversary issue of *Pivot*, the highly successful poetry magazine produced by the Poetry Workshop, went on sale yesterday at various points on campus and in the community.

Along with the announcement of the winners of the seven prizes for best poems printed in *Pivot*, the issue is highlighted by a poem by Eugene J. McCarthy, the former Senator from Minnesota. His poem is one of three he composed on the poet Robert Frost. A previous poem by the senator, titled "Tamarack," was printed in the 1968 issue of *Pivot*.

Joseph L. Grucci, associate professor of English who founded and has directed the Workshop, was one of three who judged the poems appearing in the issue to determine the winners of the seven \$25 prizes provided by various donors. Pauline M. Fisher and Jack McManis were also judges.

CALENDAR

INTERCOM welcomes information from faculty, staff, and student organizations and departments to be included in the term calendar. There are obviously some space limitations, but every effort will be made to include those items which have some general appeal and to a certain extent those items which are very specialized. Information is now being sought for the Winter Term calendar which will be printed in the issue of December 6. Send such information immediately to INTERCOM, 312 Old Main.

Tolerance for hard work began in depression days

Dr. Spackman fills many roles in professional, public life

Although it's one of man's oldest fuels, surprisingly little research has been done on coal.

"Historically, the coal industry consisted of many small companies, which could not afford to support research," explains Dr. William Spackman. "Their philosophy was to dig coal and sell it to the consumer in as close to mine condition as possible."

"The stimulus wasn't there to develop the same kind of knowledge as the oil industry, which has to refine its products before they can be used."

Dr. Spackman, a professor of paleobotany, is director of the Coal Research section in the Earth and Mineral Sciences Experiment Station. Because Penn State has established a preeminent position in coal research, he is currently seeing a steady stream of visitors eager to assess the role of coal in helping solve the energy crisis.

Despite manifold duties as an administrator, Dr. Spackman has remained active in research, continues to teach, and recently finished four years as president of Centre Community Hospital's Board of Trustees during the period when the planning and construction of the new Mount-alnview unit was completed.

Also, as the owner of the oldest house in the county — it was built in Aaronsburg in 1789 — he never lacks work at home. It being all but impossible to attract workmen to do the painstaking renovation an 184-year-old structure requires.

Dr. Spackman is probably best known for his research in coal petrology and its use as a tool in predicting the quality of the metallurgical coke burned by the steel industry in their blast furnaces. Since 1957, he has been president of the International Commission for Coal Petrographic Nomenclature, which meets annually to standardize terminology and analytical methods in the field of coal petrology.

He has also compiled and published the 36-volume "Catalog of Fossil Spores and Pollen" and spent many months in the Florida Everglades studying the develop-

ment of modern organic sediments. At present, he is supervising efforts to collect and classify data on all the important coal reserves in the Nation while seeking to establish relationships between coal characteristics and their gasification and liquefaction behavior.

Hard work is no novelty to Dr. Spackman. Growing up in Chicago during the Depression, he originally had no thoughts of college. However, on completing high school, he found a job in a laundry, and by dint of working there 40 hours a week managed to get an associate degree from North Park College in 1940. His parents

cashed in their insurance, enabling him to register at the University of Illinois and obtain a B.S. in botany.

"I was certain that I'd never get any further," he recalls, "so I took enough credits in education to be able to teach in the secondary schools. Then, being interested in the Boy Scout movement, I went to their national training school and served two years on the Chicago Council."

"This was during the war, and one day a former botany professor of mine from Illinois called me to ask if I would accept a position at the Philadelphia Naval

Office . . .

Three campuses seek associate directors

Dr. Robert G. Quinn, dean of academic instruction for Commonwealth Campuses, and the campus directors of New Kensington, McKeesport and Shenango Valley jointly announce the opening of the associate director for academic affairs position at each of the respective campuses.

The associate director for academic affairs will serve as the chief academic officer of the campus. This individual will, under the supervision of the campus director, be responsible for providing leadership and developing and maintaining academic programs in resident and continuing education. Other areas of responsibility include local community relations, planning, recruitment, evaluation and development of faculty, student development programs, course scheduling, end credits and participation in other campus and university activities.

Applicants for this position are expected to have a doctoral degree and a minimum of five years of experience in teaching and administration of higher education. Letters of nomination or letters of application should be directed to: Dr. Robert G. Quinn, dean of Academic Instruction for Commonwealth Campuses, 205 Old Main, University Park, PA 16802, by November 30, 1973.

Search committee named for Allentown post

President Oswald has appointed an Advisory Search Committee to assist him in the evaluation of candidates for the position of director for the Allentown Campus. Members of the committee are drawn from faculty, administration and the student body of the University.

The Advisory Search Committee is chaired by Russell N. DeVinny, associate professor of English (Allentown). Other committee members are Robert A. Bartkowski, associate professor of engineering (Allentown); Jane W. Schooley, instructor of speech (Allentown); Dr. William McKehe, associate professor of art and assistant dean of the College of Arts and Architecture (University Park); Dr. John O. Sink, professor of mass science (University Park); Marjorie F. Smith, director of Media and Learning Resources (University Park); Charles J. Smith, director of Student Government Association (University Park); and Eduardo F. Garcia, president of the Allentown Campus Student Government Association.

The Advisory Search Committee is to identify those candidates who can provide the ideal blend of professional leadership and competent administration of the Allentown Campus. The committee will receive suggestions and nominations from sources both within and outside the University. These should be forwarded to Dean Robert G. Quinn, dean of academic instruction for Commonwealth Campuses, 205 Old Main, University Park, Pennsylvania 16802, by no later than November 15, 1973.

Folklore society program Sunday

The Folklore Society will offer "A Night of Bluegrass" Sunday, Nov. 4, at 8 p.m. in Schwab Auditorium.

Seven performers who call themselves the "Breakfast Special" are featured. They include Kenny Kestel, Andy Stratton, Martin and sax; Tony Trischka, banjo and pedal steel; Jim Tullies, guitar and vocals; Stacy Phillips, dobro; and Roger Masson, bass. Richard Cooks will play drums for a few numbers.

Although a relatively new group, the Breakfast Special musicians have performed separately as "back-up" musicians for such performers as David Bromberg, Bob Dylan, Doug Sahm, Goose Creek Symphony, and the Grateful Dead. Their repertoire, in addition to bluegrass, includes country, jazz, Hawaiian, and some rhythm and blues.

Also appearing at the concert will be Lewis London, who performed at the Commonwealth Canteenhouse earlier this fall. He plays a wide variety of instruments and has appeared with the legendary "Bottle Hill."

Tickets for the concert are on sale at the HUB and the Record Ranch and can also be obtained at the door the night of the performance.

Staff Vacancies

To make application for the vacancies listed below call 855-1387 (Network 465-1387) no later than:

5 p.m., Thursday, Nov. 15, 1973

ADMINISTRATIVE ASSISTANT Belmont College

Responsible for coordination of Academic Registration and Scheduling Activities. Provides general assistance in developing supporting services for the academic program. A bachelor's degree or equivalent and 1 to 2 years administrative experience are preferred.

GRAPHIC ARTIST University Park

Responsible for art and lettering in the production of visual aids and displays, preparation of graphs, charts and related material. An associate degree or graduation from a two-year art institute program and over two years of related experience are preferred.

MATERIALS MANAGER Hershey Medical Center

Responsible to the Associate Provost for Administration for the development and implementation of the total materials handling program. Duties include control of the specification, purchase, receipt and storage, inventory and storage, issue and use of Medical Center equipment and supplies. A bachelor's degree or equivalent and at least four years of effective material purchasing experience are preferred.

Volume 3, No. 9

November 1, 1973

Penn State INTERCOM is a weekly publication for the academic community of The Pennsylvania State University, published each Thursday. When classes are in session, general information and items for the calendar should be sent to the editor by Tuesday of the week preceding publication date, Room 312 Old Main.

Editor: W. F. Ackerman Phone 855-7517

SPACKMAN —

(Continued from page one)

Shipyard working on problems of wood decay. I wanted to continue in science, and my job with the Scouts had convinced me that I wasn't cut out to be a fund raiser — which is somewhat ironic in view of all the money I've had to raise for research projects at Penn State!

After the war, Dr. Spackman obtained a fellowship and earned his M.A. and Ph.D. in biology at Harvard, graduating in 1949, the year he came to Penn State.

"I was brought here," he notes, "to develop a program in paleobotany in four major areas. The first was paleontology, the study of fossil species and pollen. Dr. G. O. W. Krenp of the German Geological Survey helped me set up this program, which is now directed by Dr. Alfred Traverse."

Coal petrology was the second area to which Dr. Spackman turned his attention after U.S. Steel approached him in 1951 because of problems it had encountered with certain coals used in coking.

"I didn't know anything about coal at the time," Dr. Spackman continues, "but their support enabled me to get started in this sub-science. As the research began to bear fruit, other companies became interested, and we developed an instructional program. Initially Dr. Russell Durbin assumed responsibility for this area, and it is now headed by Dr. Alan Davis."

With these two projects well launched, Dr. Spackman felt free to work up two other areas of paleobotany. One of these was classic paleobotany, which encompasses the study of fossil woods and of what Darwin called the "abominable mystery," the origin of flowering plants. The other was the study of modern organic sediments as a means to understanding the origin of coal.

In the Florida Everglades, conditions today approximate those when coal deposits were formed. Dr. Spackman and his colleagues have studied the rates of deposition of peat in the swamps to establish a relationship between coal and peat which would allow them to reconstruct the geological sequences of coal formation.

Not content with professional activities alone, Dr. Spackman believes that he has an obligation to his fellow man to try and help the world go 'round just a bit more smoothly. It was this attitude which led him to take on the many hours of work involved in heading the Hospital's Board.

He is particularly pleased by the success of the family out-patient clinic. During its first year of operation, 16,000 persons used the new facility. He also feels that the new hospital is attracting more physicians to the Centre Region.

Taking on an 184-year-old house, however, was not completely his idea.

"My wife has always been interested in early American houses and antiques," he notes. "On a trip to Illinois in 1954, I called home to report my sad arrival, and she told me that the oldest house in the area has just come on the market and asked if she could just go look at it."

"I said, 'Yes,' and that was my mistake."

A Letter to the Faculty:

(The following letter was sent to all members of the faculty this week by Provost Russell E. Larson.)

On June 8, 1973, President John W. Oswald wrote to you concerning the matter of collective bargaining for the faculty of the University. Among other points, the President stated that he hoped that members of the faculty would temporarily discontinue the signing of authorizations, a call which designated an employee organization as the faculty member's exclusive agent for collective bargaining purposes and which required an election by the Pennsylvania Labor Relations Board of an exclusive bargaining agent. President Oswald hoped that the signing of such cards could be deferred until the Faculty Senate had adequate opportunity to consider and report to the faculty on the implications of collective bargaining for the University community.

As you know, efforts are now being made to collect signed authorization cards from the faculty, although the Faculty Senate has not yet completed its consideration of this important matter. If 30% or more of the faculty of the entire University sign authorization cards before the Faculty Senate has reported to the faculty, consideration of the Senate's report could take place in the context of an election ordered by the Labor Relations Board, i.e., during a campaign between competing adversaries. I urge that consideration of the card signing process await the conclusion of the Senate's report of this important question, so that we all may make dispassionate, scholarly and objective evaluations of its many implications.

It is your right, of course, to sign authorization cards at this time if that is your decision. However, I would remind you of the legal aspects and consequences of the document you may be asked to sign.

FIRST, an authorization card is more than a request for an election. It is a legal designation of the employee organization as the individual faculty member's exclusive agent to bargain on wages, hours and terms and conditions of employment. The employee organization must be certified by the Labor Relations Board in order to bargain on behalf of the faculty. However, it is possible for the employee organization to be certified without an election. Act 195 and the Regulations of the Labor Relations Board permit certification without an election where the employer and the employee organization jointly request certification and show to the Board authorization cards signed by a majority of the members of an appropriate bargaining unit. Thus, it is possible that the signing of an authorization card now could result in the establishment of collective bargaining at the University either with or without an election.

SECOND, you do not have to sign an authorization in order to vote in any subsequent election.

THIRD, if you sign an authorization, it does not commit you to vote for that employee organization if an election to determine a bargaining agent is held.

FOURTH, your refusal to sign a card now will in no way affect your status should an employee organization subsequently win an election.

FIFTH, although the signing of an authorization card does not commit you to join the organization, it does grant authority to the employee organization to seek certification by the Board. An employee organization which is certified by the Labor Relations Board is the exclusive agent for all of the members of the bargaining unit. Exclusivity gives the bargaining agent fundamental legal rights under the law not granted to the individual or other faculty organizations.

In my opinion, the only reason for signing an authorization card at this time is because you are uneasily in favor of collective bargaining. If you have not yet made up your mind, signing an authorization card may force a decision before you have had opportunity for full consideration.

Funding Opportunities

For more information, call 855-1702 except where noted below, and refer to the item by its number and the general information provided. People with grants information for dissemination in this column should call the same number.

November 1, 1973

(103-1) The National Science Foundation (NSF) funds Grants for Computing Activities, such as: (1) basic research; (2) Computer Science and Engineering consisting of theoretical computer sciences, software and programming systems, and computer systems design; (3) Computer Application in Research consisting of networking for science, techniques and systems and software widely research; and (4) Computer Impact on Society.

(103-2) The purpose of NSF's National R&O Assessment Program is to supply objective analysis and define options which would enhance the contribution of science and technology to the nation. Activities include: (1) encourage research that will provide greater insight into technological and national purposes; (2) support research that will empirically verify and uncover cause-effect relationships used to plan and evaluate technological innovation; and (4) supply objective analyses of policy options related to R&O/technological innovation. About 20 to 25 external grants and contracts are awarded each year. It is estimated that \$2 million will be available for this in FY 1974. An initial descriptive letter is required, followed by applicant description with the program office prior to proposal submission. Dr. Irwin Feiler of the Department of Economics has received an R&O Assessment award.

(103-3) The purpose of the National Science Foundation for the Improvement of Postsecondary Education (FIPSE) has \$10 million appropriated for FY 1974 — \$2.2 million to be committed to on-going projects and \$7.8 million for about 20 competency-based education programs for teachers, \$2.8 million for projects on faculty motivation, and \$2.8 million for general competency-based education. Research will not be funded. The program is designed to sponsor improvements and innovations in education beyond those categorical programs which focus on research facilities and professional development. Priorities include new approaches to teaching and learning, revitalization of institutional missions, support of new missions, and new programs. For more information, call Dec. 15, 1973, for preliminary proposals for competency-based and faculty motivation programs, and Jan. 15, 1974, for final proposals for the above two programs and for the general competition. Contact for this

program is: Dr. Virginia Smith, Fund for the Improvement of Postsecondary Education, 400 Maryland Ave., S.W., Washington, D.C. 20002 (202-861-3811). Guidelines will be available soon.

(103-4) The Office of Right-to-Retire Programs plans to solicit proposals in the near future. There are four components under the program — skill based, demonstration projects, adult competencies, and research and development grant-based projects. Only the latter component will have available \$1 million for "new starts." Guidelines information will be available soon. The application deadline is: Mr. Conrad O'Right to Retire, U.S. Office of Education, Washington, D.C. 20002 (202-691-1653).

(103-5) The Alfred P. Sloan Foundation is expected to spend \$12 to \$15 million in the next five to seven years to enhance minority opportunities in the engineering profession. Percy A. Pien, dean of engineering at Howard University, will head the program, dividing his time between the university and the foundation.

(103-6) Danforth Foundation (222 S. Central Ave., St. Louis, Mo. 63105) has set Dec. 1, 1973 as the deadline for nominations for K&E Fellowships. People who are vitally interested in relating their educational plans to their values and who are planning college teaching careers may apply. Applicants must have completed at least one year of graduate study as of Sept. 1973, and must be 26 years of age and hold a master's or related major. The stipend is \$2025 for a single student, \$2200 for a married couple. GRE scores are required, and Nov. 20 is the deadline for GRE scores. Applications are to be submitted by a Kent or Danforth Fellow or by a graduate faculty member. Forms are available at the address given above.

(103-7) American Water Works Association (2 Park Ave., New York 10017) invites applications for three prizes of \$500, \$250 and \$125 for the best thesis to water supply. Applicants should submit a manuscript suitable for publication based on a thesis for which a degree was awarded between Nov. 1972 and Oct. 1973. The application deadline is Nov. 10. Write to address given above to more data.

(103-8) Peterhouse College, Cambridge University, England, invites applications for the Peterhouse Research Scholarship for senior or graduate students wishing to study at the college. Fellows receive 1750 pounds/year (US\$250), a dormitory allowance (US\$100), and a 30% discount on books for three years. Interested men under 30 should write to the Master of the college requesting application forms and instructions. The application deadline is Nov. 15. Research fellowships for men under 25 planning to seek Ph.D. at Cambridge are also available. Further information will be available on request. Write to the college. Application deadline is April 1, 1974. Studentships pay 700 pounds/year plus

University Calendar

November 1-11, 1973

Special Events

Thursday, Nov. 1 — Air Force ROTC program, "What's Air Force ROTC All About?" 7:30 p.m., Black Cultural Center. Film and question and answer period.

Thursday, Nov. 1 — Faculty Women's Club luncheon lecture, 12:30-2 p.m., HUB Dining Rooms A, B, C.

Thursday, Nov. 1 — Artists Series, Leningrad, University of Kentucky, on "Interpenetration in Rabelais's 'Panatagruel'." 8:30 p.m., Music Bldg. recital hall.

Friday, Nov. 2 — Open House, 3-4 p.m., at the Liberal Arts Bldg. to mark dedication of the building.

Friday, Nov. 2 — Penn State Brass Chorus, 8:30 p.m., Music Bldg. recital hall.

Friday, Nov. 2 — Folk and Square Dance Roundup, 7:30-10 p.m., North Gym White.

Friday, Nov. 2 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday-Saturday, Nov. 2-3 — University Theatre, "One Flew Over the Cuckoo's Nest." 8 p.m., The Playhouse.

Friday-Saturday, Nov. 2-4 — Sports: Women's field hockey, Susquehanna Field Hockey Tournament.

Saturday, Nov. 3 — Sports: Rugby, vs. Kent State, 2 p.m.

Saturday-Sunday, Nov. 3-4 — The Press Association Fall Training Conference; registration in HUB lobby 12 noon, Saturday.

Sunday, Nov. 4 — Chapel Service, 11 a.m., Eisenhower Chapel, Charles L. Coleman, Religious Affairs.

Sunday, Nov. 4 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Nov. 4 — Open men's and women's fencing tournament, for members of Amateur Fencers League of America, beginning at 8 a.m., Room 69 Recreation Building.

Tuesday, Nov. 6 — Le Troupe de Paris in Mollere's "L'Avare." 8 p.m., Schwab. Tickets for students are \$2.25, \$3.00 for adults. Sponsored by French Department.

Tuesday-Saturday, Nov. 6-10 — University Theatre, "One Flew Over the Cuckoo's Nest." 8 p.m., The Playhouse.

Tuesday-Wednesday, Nov. 6-7 — Bloodmobile, sponsored by Alpha Phi Omega, 9 a.m.-5 p.m., HUB ballroom.

Wednesday, Nov. 7 — For James, French horn, John McCabe, piano, 8:30 p.m., Music Bldg. recital hall.

Wednesday-Friday, Nov. 7-9 — Five O'Clock Theatre, "Silverstein and Co." Pavilion Theatre, Wednesday and Thursday, 5:20 p.m.; Friday, 7:20 p.m.

Friday, Nov. 9 — Sports: Soccer, vs. Temple, 7 p.m.

Friday, Nov. 9 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday, Nov. 9 — Free-U social event, 7:30-11:30 p.m., HUB ballroom.

Saturday, Nov. 10 — PSU Symphony Orchestra, 8 p.m., Schwab.

Saturday, Nov. 10 — Sports: Football, vs. North Carolina State, 1:30 p.m., Rugby, vs. Chesapeake, 2 p.m.

Sunday, Nov. 11 — Penn State Glee Club, 3:30 p.m., Music Bldg. recital hall.

Sunday, Nov. 11 — Chapel Service, 11 a.m., Eisenhower Chapel, Dr. Richard Jungkuntz, Provost, Pacific Lutheran University, Tacoma, Washington.

Sunday, Nov. 11 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Seminars

Thursday, Nov. 1 — Chemistry, 12:45 p.m., Room 310 Whitmore. Dr. Donald Seacrest, University of Illinois, on "Molecular Scattering."

Thursday, Nov. 1 — French, 8 p.m., Room 112 Kern. Dr. Raymond L. LaCharle, University of Kentucky, on "Interpenetration in Rabelais's 'Panatagruel'."

Thursday, Nov. 1 — Physics, 3:35 p.m., Room 117 Osmond. Moshe J. Lubin, University of Rochester, on "Recent Developments in Laser-Induced Thermo-nuclear Reactions."

Thursday, Nov. 1 — Agronomy, 3:55 p.m., Room 112 Kern. H. R. Fortmann, Agril. Exp. Station, on "Profitable Agriculture and Environmental Issues Are Compatible."

Thursday, Nov. 1 — Statistics, 3:30 p.m., Room 73 Willard. Oscar Kempthorne, Iowa State University, on "The Contradictions on Probability and Inference."

Thursday, Nov. 1 — Physics, 3:45 p.m., Room 119 Osmond. J. D. Whitehead, Queensland University, Australia, on "Looking at Atmospheric Waves by HF Radar."

Thursday, Nov. 1 — Meteorology, 3:55 p.m., Room 26 M.S. Dr. John Clay, aerospace engineering, on "Typhoons and the East China Sea."

Monday, Nov. 5 — Entomology, 4 p.m., Room 204 Patterson. Dr. Roger Ratcliffe,

USDA, Beltsville, Md., on "Host Plant Resistance to Insects."

Monday, Nov. 5 — Biochemistry, 11:10 a.m., Room 101 Althouse. D. Horton, Ohio State University, on "Structural Characterization of Sugars by Physical Methods."

Monday, Nov. 5 — Analytical Chemistry, 1 p.m., Room 310 Whitmore. Winter Term program discussion, organizational meeting.

Monday, Nov. 5 — Genetics, 3:55 p.m., Room 111 Tyson. Susan Sehn on "Evidence for Genetic Control of Aging: Thymic Involution."

Monday, Nov. 5 — Microbiology, 4 p.m., Room 350 Frear. Dr. R. P. Novick, Public Health Research Institute, New York, on "The Plasmid Life Cycle."

Tuesday, Nov. 6 — Astronomy, 4 p.m., Room 405. Dr. Frank Zabriske, on "The New 60-inch Telescope."

Tuesday, Nov. 6 — Geosciences, 4 p.m., Room 26 M.S. Dr. Robert F. Schmalz, geology, on "The Shape of Coeducation in Action."

Tuesday, Nov. 6 — Biochemistry, 11:10 a.m., Room 101 Althouse. D. Horton, Ohio State University, on "Role of Chemical Synthesis in Relation to Carbohydrate Biochemistry."

Tuesday, Nov. 6 — Engineering Mechanics, 4 p.m., Room 215 Hammond. Ralph Leibowitz, Naval Research and Development Center, Bethesda, Md., on "Turbulence Induced Vibration and Acoustic Radiation from Plates."

Tuesday, Nov. 6 — Graduate Air Pollution Control, 2:20 p.m., Room 140 Fenske. Dr. James M. McCabe, associated with the department of physics and chairman, Union of Concerned Scientists, MIT, on "The Energy Crisis — An Environmentalist's Point of View."

Tuesday, Nov. 6 — Physics Solid State 1 p.m., Room 339 Davey. Dr. Daryl Boureaux, Allied Chemicals, Morristown, N. J.

Tuesday, Nov. 6 — Comparative Literature luncheon, 12:15 p.m., HUB Dining Room. A. John McCabe.

Wednesday, Nov. 7 — Ceramic Science, 4 p.m., Room 244 Deike. Professor Jean R. Blaché, University of Pittsburgh.

Wednesday, Nov. 7 — Fuel Science, 4 p.m., Room 341 Deike. Dr. James Stephenson, ceramic arts, on "Design of Primitive and Modern Ceramic Kins."

Wednesday, Nov. 7 — Ecology, 9:30 a.m., Room 101 Kern. Robert L. Butler on "Survival of Fishes in Relation to Cover."

Thursday, Nov. 8 — Meteorology, 3:55 p.m., Room 28 M.S. Dr. Kenneth H. Bergman, National Research Council of Canada, on "Problems of Data Assimilation in the Numerical Weather Predictions."

Thursday, Nov. 8 — Physics-Chemistry, 3:30 p.m., Room 117 Osmond. G. Herzberg, National Research Council of Canada, on "Experimental Tests of the Quantum Theory of Molecular Hydrogen."

Thursday, Nov. 8 — Chemistry, 12:45 p.m., Room 310 Whitmore. T. G. Traylor, University of California, San Diego, on "Mechanisms of Oxygen Transport by 'Heme Proteins'."

Thursday, Nov. 8 — Electrical Engineering, 3 p.m., Room 329 E.E. East. Dr. Martin Buehler, Electronics Technology Div., National Bureau of Standards, on "Detection of Dopants Defects in PN Junctions and MOS Capacitors."

Thursday, Nov. 8 — Agronomy, 3:55 p.m., Room 301 Abt. Agr. Adm. G. E. Schulz, Proj. Engineer, R & D, Cilmox Molybdenum, on "Industry, Air Pollution and Agriculture."

Thursday, Nov. 8 — Philosophy, 4 p.m., Laurel Room, Nittany Lion Inn. Dr. Cyril Welch, Mt. Allison University, and Dr. Theodore Seebom, on "History and Language."

Friday, Nov. 9 — Chemical Engineering, 9:35 a.m., Room 101 Althouse. Dr. Douglas J. Wilde, Stanford University, on "Optimization, Fluidized Reactors, and Machine Tolerances."

Friday, Nov. 9 — Statistics, 4 p.m., Room 73 Willard. Robert Clickner, Temple University, on "Excessive Deviations and Efficiency."

Interest Groups

Alpha Phi Omega, Mondays, 7 p.m., Room 308 Boucke.

Archery Club, Mondays, Wednesdays, Thursdays, 7 p.m., Room 33 White.

Badminton Club, Fridays, 6:15 p.m., Rec Hall.

Chess Club, Wednesdays, 6:30 p.m., HUB card room.

Coed Gymnastics Club, Mondays, 7:30 p.m., Rec Hall South Gym; Thursdays, 7:30 p.m., gymnastics room, White.

Coed-Action, Mondays, 8 p.m., Room 310 Boucke.

Free-U, Mondays, 7:30 p.m., Room 203 HUB.

Gamma Sigma Sigma, Tuesdays, 7 p.m., Room 309 Boucke.

Interludia Folk Dancers, Sundays, 7:30 p.m., HUB ballroom.

Jazz Club, Thursdays, 8:30-9:30 p.m., Room 167 Willard.

Keystone Society, Wednesdays, 7:30-9 p.m., Room 304 Boucke.

S.I.M.S., Wednesdays, 8 p.m., Room 108 Forum; Thursdays, 8 p.m., Room 101 Chambers.

Squash Club, Mondays, 7 p.m., White. Informal competition.

Young Scientists, 7:30 p.m., Mondays, Room 167 Willard; Wednesdays, Room 62 Willard.

Folklore Society, Thursday, Nov. 1, 8 p.m., Room 101 Kern.

PSOC, Canoe division, Thursday, Nov. 1, 7:30 p.m., Room 214 Boucke.

Students Against Fire, Friday, Nov. 1, 7:30 p.m., Room 71 Willard. All students of any major are invited.

Alpha Lambda Delta, Monday, Nov. 5, 7-9 p.m., Room 67 Willard.

Eastern Orthodox Christian Fellowship, Sunday, Nov. 4, 10:00 a.m., HUB assembly room.

Volunteer Service Center, all-volunteer "get-together" and rap session, Monday, Nov. 5, 7 p.m., Room 203 HUB.

Penn State Sports Parachute Club, Tuesday, Nov. 6, 7:30 p.m., Room 362 Willard.

Nittany Grotto, Tuesday, Nov. 6, 7:30 p.m., Room 273 Willard.

PSOC Ski division, Wednesday, Nov. 7, 7:30 p.m., Room 121 Sparks.

Christian Science Organization, Thursday, Nov. 1, 7:30 p.m., Room 201 Rackley.

Pre Vet Club, Wednesday, Nov. 7, 8:10-30 p.m., HUB assembly room. Dr. Joseph Skelly, chairman, Selections Committee, University of Pennsylvania Veterinary School.

Penn State Sports Car Club, Wednesday, Nov. 7, 7:30-9 p.m., Room 365 Willard. Speaker.

PSOC Sailing division, Thursday, Nov. 8, Room 214 Boucke.

Students For State, Tuesdays, 7:30 p.m., Room 71 Willard.

Lectures

Friday, Nov. 2 — Dr. Clark Kerr, chairman, Carnegie Commission on Higher Education and former President of the University of California, will speak on the role of Liberal Arts in the coming decade of higher education at 2 p.m., Room 102 Kern.

Thursday-Friday, Nov. 8-9 — EMS Nelson W. Taylor Lectures by Dr. Linus Pauling, 8 p.m., Room 112 Kern. Thursday: "The Structure of Metals and Alloys;" Friday, "The Structure of Atomic Nuclei."

Saturday, Nov. 10 — Dr. Linus Pauling, sponsored by University Committee on Inter-national Programs, on "Vitamins and International Health," 8:30 p.m., Room 112 Kern.

Thursday, Nov. 8 — (Interdisciplinary) "General Systems Theory and Interdisciplinary Education," 4 p.m., HUB Assembly Room. Dr. Anthony Wilden, U. Cal at San Diego, on "Transdisciplinary Models in the Life and Social Sciences."

Friday, Nov. 9 — (Interdisciplinary) 10 a.m., HUB Assembly Room. Dr. Jere Clark, Center for Interdisciplinary Creativity, in Connecticut, on "Changing Perspectives through General Systems Education." At 2 p.m., Dr. Edwin Laszlo, SUNY at Geneseo, on "Toward an Interdisciplinary Paradigm for Contemporary Philosophy."

ARTISTS SERIES. Guest conductor Mavis Jansons, will direct the Leninrad Philharmonic today (Thursday, Nov. 1) in a Rec Hall concert beginning at 8:30 p.m.

Films

Thursday, Nov. 1 — International Films, 7:15 and 9:30 p.m., HUB assembly room. "Variety Lights," directed by Fellini-Lattuada.

Friday-Saturday, Nov. 2-3 — Student SF Films, 7 and 9 p.m., HUB assembly room. "The 39 Steps."

Saturday, Nov. 3 — Free-U children films, 12:30 and 2:30 p.m., HUB assembly room. Cartoon Festival.

Wednesday, Nov. 7 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern.

Thursday, Nov. 8 — International Films, 8 p.m., HUB assembly room. "Death of a Cyclist," directed by Bardem.

Friday-Saturday, Nov. 9-10 — Student SF Films, 7-9 p.m., HUB assembly room.

Rugby Club develops staunch following

The Penn State Rugby Club is involved with a sport one member calls "legally lethal."

But every member of the Club plays rugby for — such — the pleasure of it. Spectators at a bruising, hard-hitting game at Penn State's rugby pitch (playing field), located near the University Flower Gardens and adjacent to the East Halls intramural fields, might feel secure in the knowledge that a surgeon is on the field at all times, secure, that is, until they discover that the doctor is there to inflict some of the pain. Dr. John Reidell, M.D., of State College, is one of the experienced players for the Club.

Contrary to quick impressions the novice spectator might get, the pain is usually minimal; no serious injuries have been suffered by Rugby Club members. And Dr. Reidell, like the rest, is a "clean" player; there's no room in rugby for any other kind.

To be sure, Penn State's "Rugby For Fun Bunch" is for real.

The decade-old Penn State Rugby Club has made believers out of many who for-

Dr. Robert P. Hunter, professor of mathematics, is one of the few members available to bring experience to the team; students graduate about the time they become seasoned players.

merly looked on rugby as a hard-to-understand version of American football, where there's no forward passing, no time-outs or substitutions, and no blocking. And, the detractors once claimed, the game is played with an overstepped football, at that.

But no longer is rugby an unknown commodity in this country. According to the coach of the Club, Dr. Ian Harrison, assistant professor of materials science, there's been a "rugby boom" in the United States during the past four or five years. He reports that members of the Penn State community have not been immune to the lure of the gruelling sport. This fall, 60 players joined the Club. For their 15

annual dues, they're guaranteed playing time in a game every week during the season.

The Rugby Club is a very open organization; it includes faculty, staff, students, alumni and members of the community, ranging in age from 18 to 42, and in weight from 150 to 240 pounds.

This fall, the Club is playing a weekly schedule, facing 11 teams from other universities and private clubs. Because players have various degrees of skill, the Club fields three teams, A, B, and C. Practices, which include both basic and advanced instruction, begin at 5 p.m. on Tuesdays and Thursdays at the pitch. Newcomers are welcome.

Three games remain on this season's schedule, including two home battles. On Saturday, Nov. 3, Kent State visits, and a week later the Chesapeake Club comes to Penn State. The season closes on Nov. 10 with an away game against Indiana State.

The home games are scheduled for "approximately" 2:30 p.m., but as part of the informality that marks rugby, game times may be changed slightly.

Besides the fall agenda, the Club plays a full spring schedule, highlighted by the annual PhyslT Tournament, in which some of the top teams in the East compete.

While rugby is bruising and tiring, it is mostly fun at Penn State, says Jerry Starobin, president of the Club and a senior majoring in education.

"I like the intensity of the game. But when it's over, it's over," says Starobin, who suffered a slight jaw injury in a recent game. "After the game we forget about the score and drink beer with the other team."

This "intensity while we play, fun afterward" attitude is known as the "rugby philosophy," says Starobin, a Philadelphia native.

A fellow rugger agrees that this attitude has its virtues.

"Rugby is the only true amateur sport left in the world today," says A. Fraser "Scotty" Grigor, production supervisor in housing and food services operations. "We buy our own boots and uniforms and pay our own traveling expenses."

The uniforms worn by rugby players are devoid of shoulder pads, hip pads, and helmets one might expect for a heavy contact sport. A rugby uniform is simply a pair of shoes, knee socks, gym shorts, and the colorful horizontally-striped jersey. Most players these days wear protective mouth pieces, too.

Grigor, a native of Scotland, who grew up in the midst of decade-old rugby rivalries, is fond of the "camaraderie of the game." And though he explains that rugby's minimal rules regarding roughness make the game "legally lethal," Grigor em-

phasizes that "It's only as brutal as you make it."

Starobin feels that he is president of a program that is second to none. He says the pitch (playing field) is the best he's ever seen, and it is one of the few regulation pitches (110 yards long, 75 yards wide) in the East. He is appreciative, too, of the "great cooperation" extended by the College of Health, Physical Education and Recreation.

Penn State does have one disadvantage, and it is a problem shared by all college clubs competing regularly against private teams. A college rugby team loses players every year through graduation, whereas the private clubs maintain the all-important continuity so vital to team sports. And since many rugby players at Penn State are novices when they first arrive, they seem to graduate soon after they become seasoned players.

Rugby players will tell you that the best way to learn about the game's rules and strategies is to attend the contests. Those familiar with British rugby, though, might find things a little different.

Coach Harrison, a native of England and a rugby player since he was 11 years old, observes that tackling in the United States is more fierce than in England.

"Since most of the rugby players are used to playing football (many Penn State players are former high school football stars), the tackling is harder here," he says. "And the game is noisier here, too. In England, you're taught from an early age that only one person on the team talks, and that's the captain. Here, everyone is shouting."

Watching the game is the best way to learn about rugby, so fans and potential supporters are urged to attend the final home battles. For those who want a

simple guide to scoring, here is a brief summary of how points are scored:

TRY — When a player runs the ball over the goal and touches it down (4 points)
CONVERSION — A place kick attempted at least ten yards out from where the ball was touched down on the try (points).

PENALTY KICK — A place kick or drop kick awarded when the opponent is charged with a major rule infraction (3 points).

DROP GOAL — A drop kick attempted while the ball is in play; a very difficult shot seldom seen in American rugby (3 points).

Some other basic facts about rugby which is celebrating its 150th anniversary this year:

15 players make up a team . . . there's no halt to play after a tackle . . . the ball can be advanced by running or kicking.

When a minor infraction occurs, "scrum" restarts play. The "scrum" is the huddle-like formation in which the players locked together try to kick the ball out to their forwards. When a ball goes out of bounds, it is put back into play by a "lineout." The wing of the team did not touch the ball last throw the field between a line of forwards who stand parallel to each other and perpendicular to the spot where the ball fell play.

Though it often might be misleading, spectators might try to imagine rugby as a combination of soccer and football. In fact, the legend has it that rugby was born when a soccer player picked up the ball and started running toward the goal.

Rugby is the only sport with three halves — the two 40-minute halves on the field and the "half" afterward when the team gets together off the field. As any rugger will tell you, they are all equally important. The course, is the rugby philosophy.

University Symphony Orchestra in a concert Saturday, Nov. 10, in Schwab Auditorium, beginning at 8 p.m. The overture to Rossini's opera "Semiramide" will be followed by Schumann's "Spring Symphony" and Tchaikovsky's "Romeo and Juliet" overture.

HELP WANTED

The Office of Residential Life Programs and the Office of Student Activities are seeking the assistance of all members of the University Community in responding to student needs for extra-curricular programming.

If any University employees are willing to speak with a group of students about an academic area, hobbies, travels or special areas of interest, they are asked to complete a form available from and be returned to University Resource Survey, Office of Residential Life Programs, 113 Old Main by Friday, November 6, 1975.

From the information received, a "source list" for use by student groups planning their activities and programs will be developed. Any questions can be directed to Linda Higginson, 865-3495, or to the Office of Residential Life Programs, 865-7973, either of whom will also accept via phone the information sought on the form.

NEWS —

(Continued from page one)

will be from the following areas: Thursday, Nov. 1, The Philippines; Wednesday, Nov. 7, Portugal; Thursday, Nov. 8, Sweden. More information may be obtained by calling 865-7441 during the day.

JOINT CONCERT

The Brass Chorale and members of the Symphonic Wind Ensemble will present a joint concert Friday, Nov. 2, at 8:30 p.m. in the Music Bldg. recital hall. Directed by Smith Toulson, Wind Ensemble groups will perform compositions by Mozart, Telemann, and Bozza during the first portion of the program. The Bozza piece, "Jour D'Été A La Montagne," is one of the few compositions written for flute quartet, and the students performing it were coached by Ovidia Page. The Brass Chorale, conducted by music instructor James Benshoof, will present works by Piston, Merriman, Zindars, and Nellybyel.

PAULING LECTURES

Tickets will be required for the two Nelson W. Taylor Lectures by Dr. Linus Pauling, to be given Thursday, Nov. 8, and Friday, Nov. 9, and may be obtained at the office of the dean of the College of Earth

and Mineral Sciences, Room 116 Deike. He will speak on "The Structure of Metals and Alloys" on Thursday and on "The Structure of Atomic Nuclei" on Friday. His public lecture on the subject of "Vitamins and International Health" will be given Saturday, Nov. 10, sponsored by the University Committee on International Programs. All lectures will be given in Room 112 Kern, the Thursday and Friday lectures at 8 p.m. and the Saturday lecture at 8:30 p.m.

FENCING TOURNAMENT

An open tournament in fencing will be held Sunday, Nov. 4, with competition in women's foil, and in men's sabre, epee, and foil. Competition begins at 8 a.m. in the Fencing Room (Room 69) of Recreation Building.

Any member of the Amateur Fencers League of America may compete in the tournament. The entry fee is \$3.

Invitations have been extended to college and university fencing teams and clubs in Pennsylvania and nearby states.

Nittany Lion statuettes will be awarded as first prize in each weapon and silver and bronze medals for second and third places.

Anyone Interested in competing should

get in touch with Max Garret, men's fencing coach, 865-1851, or Beth Alpin Cramer, 865-7591.

SKATING CLINIC

A "Therapeutic and Recreational Ice Skating Clinic" will be held at the Ice Rink Pavilion Saturday and Sunday, Nov. 3-4, as a continuing education service of the College of Health, Physical Education and Recreation. The program is expected to appeal to physical educators, physical and recreational therapists, students, and others actively involved in ice skating. A final registration (advance registration was encouraged) will be held at the Pavilion Saturday from 8 to 9 a.m., and the Clinic will begin immediately after. A fee of \$5 will be charged.

VOLUNTEERS GET TOGETHER

Volunteer Service Center volunteers — students, faculty and staff currently aiding in VSC projects — will get together Monday, Nov. 5, at 7 p.m. in Room 203 HUB. It is an occasion for volunteers to contribute ideas and carry on a general "rap session" about current projects.

SYMPHONY CONCERT

Dr. D. Douglas Miller, assistant professor of music, will direct the 80-piece

PENN STATE intercom

Volume 3, Number 10

November 8, 1973

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News in brief

DECALS EXTENDED

Parking decals that were originally valid only until March 31 of this year, then were extended to Oct. 31, have been extended once again, until January 31, 1974.

Floating permits with valid dates of June 30, 1973, have also been extended to January 31.

Special and wage payroll permits for windshields which carry the Dec. 31 valid date will be extended to January 31. However, this does not include guest permits, graduate assistant evening permits, or other special permits.

REMINDER

Employees at the University Park Campus are reminded that the Occupational Privilege Tax charged locally will be taken automatically from the paychecks dated Nov. 30 for those paid on a monthly basis and on Nov. 23 for others (technical services, graduate assistants, and wage payers). In previous years the deduction was made in October checks.

MITTANY LION CLOSING

The Mittany Lion Inn food service will be closed Thursday, Nov. 22, Thanksgiving Day, but will resume normal operations

Asian and Latin American studies are legitimate

Dr. Griffith sees need for Black studies in universities

When he was growing up, Cyril E. Griffith used to walk along the north shore of his native island of Bermuda and look at the horizon, wondering what was on the other side of the world.

"In school, the British taught us British and European history but never mentioned anything about our people or where we'd come from," he recalls. "I found that very damaging, even as a child, and I used to think, 'Gee, I couldn't have come from nothing.'"

"If you don't know anything about yourself, you can't respect yourself, and it was this feeling that ultimately led me to study history. I figure that to know what I can about my race and then teach others. It's wrong to write people out of history; it's something that civilized men have a duty to correct."

His experiences have led Dr. Griffith, who is an assistant professor of history at Penn State, to the view that Black Studies should become an integral part of the curriculum in institutions of higher learning. He headed the University committee which reported on the feasibility of such a program here.

"If Asian or Latin American Studies are legitimate," he continues, "then Black Studies are. We have to stop acting as if Black people don't exist and never contributed anything. We are going to get more and more blacks in our colleges and universities, and it's wrong to give them a one-sided education."

In his own research, he is pursuing this philosophy by tracing the activities of the African Methodist Episcopal (A.M.E.) church in Africa during the 19th century in an attempt to demonstrate that black missionaries as well as white played a prominent role in African history.

Dr. Griffith is the third generation of his family to teach school. His grandfather

the following day. This has been the practice in the past few years so that employees at the Inn can enjoy the day with their families.

ART EDUCATION EXHIBIT

Students in Art Education have made a selection of objects sold in State College area stores on the basis of design excellence, local availability and modest cost and made an exhibit of them to demonstrate that good design is sometimes mass produced. The exhibit is on display in Chambers Building and will remain until Nov. 30. The purpose of the exhibit is to encourage viewers to respond to the objects much as they would respond to a painting, sculpture or crafts, especially in evaluating form, function, craftsmanship, and the object's enhancement of aesthetic dimensions of everyday living. Thirty downtown and area merchants cooperated in the development of the exhibit.

ROAD RALLY

Acacia Fraternity, seeking to aid "On Drugs," the community-based drug information and referral service, will hold a road rally Sunday, Nov. 11, at 1 p.m. The rally will begin at the fraternity house, 234 Locust Lane, State College, and will be open to all licensed drivers. A \$5 registration fee per car will be charged. The 30-mile course will test the driver's ability to fol-

low a list of 120 instructions and answer questions on things seen along the way. A navigator is permitted to assist the driver. The best team will receive a \$50 prize. Applications will be accepted until tomorrow (Friday, Nov. 9).

ART STUDENTS EXHIBIT

Twenty-two graduate students in the Department of Art will exhibit their work in Zoller Gallery, Visual Arts Bldg., from Monday, Nov. 12, through Friday, Nov. 30. The Gallery will also house a one-man show by Donald Bruno, a candidate for the MFA degree in graphic design. Included in the show are oils and watercolors, wall and steel sculptures, ceramics, graphics, and photographs.

CELLO-PIANO CONCERT

Leonard Feldman, associate professor of music and cellist with the Alford String Quartet, and Steven Smith, assistant professor of music, will present a concert of sonatas for piano and cello Wednesday, Nov. 14, at 8:30 p.m. in the Music Bldg. recital hall. Featured will be Beethoven's "Sonata in C Major, Opus 102, No. 1," Brahms' "Sonata No. 2 in F," and "Sonata" by Samuel Barber. The latter work is Barber's only sonata for the two instruments, the composer having learned to play the cello expressly to write this piece.

(Continued on page four)

Proposed unit draws criticism at Council meeting

Concern over a proposal for a new administrative structure regarding the Commonwealth Campuses dominated a meeting of the University Council last week at the Berks Campus.

Several members of the Campus faculty expressed displeasure over the proposal which calls for the establishment of a unit whose mission includes lower-division baccalaureate instruction, associate degree programs, continuing education, and community services.

Dr. Russell E. Larson, University provost and Council chairman, told the open meeting that the proposal, currently being reviewed by various groups within the University, is designed specifically for those faculty members principally responsible for instruction of freshmen and sophomores.

"It is the establishment of an arrangement," he said, "where faculty members at the freshman and sophomore level would be better served than at present. If the faculty doesn't read it this way, it won't be pursued."

Dr. Larson said the proposal is an effort to evaluate faculty members in relation to their University assignment.

"Under this proposal," he added, "a faculty member has the alternative to remain with his academic department. There is nothing in the proposal that would push people into the new unit."

Dr. Larson said the proposed plan is patterned after an organizational program which has existed in the College of Engineering for the past 10 years and "has been successful."

One faculty member told the Council there is some support for the proposal at the Berks Campus, but "there are so many issues confronting us such as collective bargaining and a proposal on tenure that our minds boggle. We don't have enough information on anything or clarification of how it all will work."

Other matters discussed at the Council meeting, one of two it holds each year away from University Park, included a University-wide student evaluation of instruction, student representation on faculty organizations and the quality of food service at the Berks Campus.

Institute names four of faculty as research fellows

Four members of the faculty have been awarded Faculty Research Fellowships for the Spring Term, 1974, by the Institute for the Arts and Humanistic Studies:

Dr. Isabelle Armitage, assistant professor of French, will use her grant to prepare a study of Pierre de l'Etoile and the authorship of "la Satire Menippée."

Dr. Gerard J. Brault, professor of French, will ready Volume II in the "Aspillogia" series, the corpus of English medieval rolls sponsored by the Society of Antiquaries of London.

Dr. Anthony Geller, associate professor of art history, will undertake research on late Byzantine psalters in Cairo, Sinai and Jerusalem.

Dr. Yoshio Fukuyama, professor of religious studies, will study the humanistic and social dimensions of Japanese religion.

Dr. Cyril E. Griffith — the third generation of his family to teach.

Honors in Business Administration

Alice E. Werno, research associate in the College of Business Administration Center for Research, was guest of honor October 23 of a 25-Year Service Award party and, as such, cut the cake as CBA Dean Eugene J. Kelley watched. For all of her quarter of a century on the campus, Alice has been associated with the Pennsylvania Business Survey, publication of the College which serves industry, commerce, the government, and the public in the Commonwealth through statistical studies of business conditions and analyses. She began a research position in 1946 in what was then the Bureau of Business Research. She has contributed many monographs and articles on business to the publication and to other journals, as well as serving as editor of the "Survey." She has also made radio tape recordings, prepared newspaper releases, and given talks on the work related to the Survey. A graduate of Cornell College, Columbus University, she worked in New York, at Macy's, with Warner Publications, and with Prentice Hall, in various capacities, before coming to the University. She earned an M.A. degree in labor economics at Penn State in 1956.

Dr. Roger C. Pfaffenberger, Jr., second from right in right photo, selected as "Outstanding Teacher" by the CBA Student Council. Is given the Nittany Lion statuette and \$100 U.S. Savings Bond by Stan Leshner, with Neil Fisher and Dean Kelley looking on. Fisher holds a plaque which is displayed in the Business Administration Building and which has smaller nameplates indicating the winner of the award each year. A similar plaque is used for the "Outstanding Advisor" award. Fisher and Leshner were co-chairmen of the selection committee of the Council which chose Dr. Pfaffenberger and Dr. Coyle for the two awards.

Officers of the College of Business Administration Student Council recently presented Dr. John A. Coyle (second from right), professor and head of the business logistics department, with a Nittany Lion statuette and a \$100 U.S. Savings Bond as an award for his selection by the Council as "Outstanding Advisor" in the College. The award is made possible by the CBA Alumni Association. Presenting Dr. Coyle with the statuette is Neil R. Fisher, tenth term management major, and end of Dr. Coyle's right is Stan A. Lashner, tenth term accounting CBA Dean Eugene J. Kelley is at left.

Deaths

Dr. Charles C. Peters, professor emeritus of education, who retired from the University in 1945 after serving on the faculty for 18 years, died October 26 in Marietta, Ga., at the age of 91. In addition to serving as professor, he was also director of educational research. A graduate of Lebanon Valley College, he received the A.M. degree from Harvard in 1910 and the Ph.D. from the University of Pennsylvania in 1916. In his long academic career, starting in 1906, he taught at Clark'sburg, Mo. College where he was president 1906-07; Westfield, Ill., College; Lebanon Valley; Lehigh University; and Ohio Wesleyan University (1917-1927). He also taught in summer periods at Ohio State, West Virginia, Kansas, California, Minnesota, and Stanford, and he was superintendent of schools in Royersford, Pa., in 1913-16. He wrote eight books and more than 60 journal articles in psychology and education. At one time he was listed in nine different "Who's Who" books. In 1944, he recommended that an all-inclusive educational program for adults as well as for college-age people could make use of the air waves to enable them to combine college work with their jobs. He noted that state-supported schools particularly have an obligation to the public to conduct courses "as fundamental and as systematic as those given in college classrooms" via the radio. The development of television later, he said, would permit demonstrations to supplement lectures.

Dr. Donald G. McGarey, professor of education from 1917 to 1967, died November 1; he was 85. He left Penn State to become professor of education and coordinator at Edinboro State College. A graduate of Thiel College, he received the M.A. degree from Columbia University and D.Ed. from Penn State; he did post-doctoral work at the University of Wisconsin. He served first as teacher and later as principal of the Bessemer High School from 1929 to 1935; was supervisor of instruction at Teaneck, N.J.; and was director of guidance for Sharon, Pa. schools. In 1940, he was appointed head of the department of education and dean of men at Morris Harvey College, Charleston, W. Va., where he served before coming to Penn State. He was consultant on curriculum and in-service education programs for many schools in the eastern U.S. In

1962, he received a special citation from the Governor of Pennsylvania and the State Department of Education for "meritorious service in the improvement of curriculum" in the State's schools. He was a U.S. delegate to the first World Conference of the Teaching Profession in 1946.

Dr. Arthur F. Davis, professor emeritus of physical education, died Oct. 31 after a long illness. He was 77. Considered one of the leaders in the State in the field of health education, he worked with many organizations such as cancer and heart societies as well as health and physical education groups during his 28 years on the faculty prior to his retirement in 1962. He received the Distinguished Service Medal from the Centre County Heart Association, medals in 1956 and 1960 from the Pa. Heart Association, and the Benjamin Rush Award from the Centre County Medical Society in 1955 for outstanding service. A graduate of the University of New Hampshire, after World War I service, he received the M.Ed. degree in 1927 from Harvard, and the doctor of public health degree from the University of Michigan in 1937. Before joining the faculty in 1934, he taught at schools in Pawling, N.Y.; Chestnut Hill, Pa.; Lincoln Park, Mich.; and at Northern State Teacher's College, Marquette, Mich. He also directed health education programs for Upper Michigan Peninsula.

Honors

Dr. Eugene T. McDonald, research professor of speech pathology, received the Humanitarian Award of The Easter Seal Society for Crippled Children and Adults of Pennsylvania at its 50th anniversary convention October 26.

The citation accompanying the award said in part: "Through your wisdom, compassion and sincerity, hundreds of handicapped children, adults, and their families, have benefited from your counsel and leadership. Your broad approach to rehabilitation has influenced programs at the national, state and local levels. Your vision has enlightened the thinking of professional staff, students and volunteer boards of directors, and has also helped shape the philosophy of the Easter Seal Society."

DR. GRIFFITH —

(Continued from page one)

at the Rike-Kumler Department Store in Dayton, where he started out mopping floors, rose to be a watchman and finally a store detective.

"It was a job that makes you very suspicious," he notes. "Everybody kept an eye on everybody else. The store employed seminars students to check the cash register receipts, and we checked on the students. Then there were town detectives to check on us. To this day, I have a sort of sixth sense in a store, so I can usually pick out the floor watchers."

Unknown to Dr. Griffith, however, one of the persons watching him was David L. Rike, the store's owner, and he was sufficiently impressed with his employee to call him in and invite him to apply to the Rike family foundation for a scholarship to graduate school. In this way, Dr. Griffith obtained funds to go on to Bowling Green and study African history. He earned his master's degree in 1965 and got a job at St. Paul's College in Lawrenceville, Va. Dr. Griffith continues:

"To my surprise, the President wrote that since my starting salary was so small, in compensation they would give me \$800 which I could use toward a Ph.D. It was a real stroke of luck, and I started work on my doctorate at Michigan State in June. The arrangement continued for two years, when I obtained an I.B.M.-United Negro College Fund fellowship which enabled me to take a two-year leave."

At the end of this period, Dr. Griffith was awarded a Ford Foundation grant which he used to go to Nigeria and Liberia to do first-hand research for his thesis on Martin R. Delany. Delany, the first black major in the Union Army and later a judge in Charleston, S.C., attempted to move blacks back to Africa on a massive scale. "The African experience was wonderful," Dr. Griffith says. "It was the first time

I'd done any reminiscing about my life as a boy. I had grown up under British colonialism, and so had the Nigerians. We had many things in common — foods, music, education. I felt very much at home, and I'm anxious to take a leave and go back perhaps to do some teaching. The number of West Indians already in Africa in various capacities is impressive."

"I remember as an undergraduate at Wilberforce hearing an African visitor speak. He told us that getting an education is important, and facilities don't matter. You can get an education in a school room or outdoors under a tree. In Nigeria I understood what he meant. You might see a secretaries' school with the students sitting at their typewriters or doing their shorthand outdoors. The African students I met had a healthy curiosity about the outside world, and I came to believe that the future is in their favor. As modernization goes on, they'll do things in their own way instead of following outside models."

Upon his return from Africa, Dr. Griffith spent one more year at St. Paul's, and then came to Penn State. In December 1972, he finished up the requirements for his Ph.D. but put off his graduation to March, 1973.

"My mother had never seen me graduate from any school," he says, "and I wanted her to watch me get my Ph.D. But I didn't want her to travel during the winter since she's not used to it, so I waited till was warmer."

"As I was working my way through school, there were some bad moments when I'd run completely out of money. When that happened, I'd write a letter to my family, asking them to do what they could, and they'd all chip in. My wife's family did, too. So while things were difficult, so many people helped me along that I can look back on the struggle and realize it had its sweet moments."

"As for right now, I'm sitting on top of the world."

Desk Calculator Laboratory

Instructional-Learning Services has established on an experimental basis a self-instructing laboratory equipped with electronic desk calculators. The calculators are in Room 6, Sparks Building, and will remain there through Spring Term, at which time the need for continuing this service to students will be assessed.

Instructors of all courses requiring the use of desk calculators are invited to announce this service to their students. The laboratory is open during the following hours: Monday through Friday 9 a.m. to noon; 1:00-4:30 p.m.; and 7:00-10:00 p.m.; Saturday closed; Sunday 7:00-10:00 p.m.

University Calendar

November 8-18, 1973

The "London Guy," provided by Penn State alumni, is available for special 30-minute Guided Tours of the Campus, scheduled Monday through Friday, departing from the HUB at 12:45 and 3:30 p.m. Reservation tickets at the HUB desk. (Donation of 25 cents is to help compensate the guide.)

Special Events

Thursday-Saturday, Nov. 8-10 — University Theatre, "One Flew Over the Cuckoo's Nest," 8 p.m., The Playhouse.
Thursday-Friday, Nov. 8-9 — Five O'Clock Theatre, "Silverstein and Co.," Pavilion Theatre, Thursday, 5:20 p.m.; Friday, 7:20 p.m.
Thursday, Nov. 8 — John McCabe, lecture-recital, piano, 8:30 p.m., Music Bldg. recital hall.
Friday, Nov. 9 — Sports: Soccer, vs. Temple, 7 p.m.
Friday, Nov. 9 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Friday, Nov. 9 — Free-U! social event, 7:30 p.m., HUB ballroom.
Saturday, Nov. 10 — PSU Symphony Orchestra, 8 p.m., Schwab.
Saturday, Nov. 10 — Sports: Football, vs. North Carolina State, 1:30 p.m.; Rugby, vs. Chesapeake, 2 p.m.
Sunday, Nov. 11 — Penn State Glee Club and Manhattaville College Glee Club, 3:00 p.m., Music Bldg. recital hall.

Sunday, Nov. 11 — Chapel Service, 11 a.m., Eisenhower Chapel. Dr. Richard Jungkuntz, Provost, Pacific Lutheran University, Tacoma, Washington.
Sunday, Nov. 11 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Sunday, Nov. 11 — Road Rally, sponsored by Acadia Fraternity, starting at 1 p.m. from 234 Locust Lane, for benefit of On Drugs. Registration fee \$5; final applications Friday, Nov. 9.
Monday, Nov. 12 — Penn Statesmen Jazz Band Concert, 8:30 p.m., Music Building recital hall.
Wednesday, Nov. 14 — Leonard Feldman, cello, and Steven Smith piano, 8:30 p.m., Music Bldg. recital hall.
Friday, Nov. 16 — Sports: Soccer, vs. Pittsburgh, 7 p.m.
Saturday, Nov. 17 — Sports: Football, vs. Ohio U., 1:30 p.m., Beaver Stadium, Band Day.

Meetings

Thursday, Nov. 8 — Central Pa. Chapter, Association for Computing Machinery, 8 p.m., Room 105 Forum, Thomas E. Kurtz, Dartmouth, on "The Role of the Computer on Campus."
Monday, Nov. 12 — Penrhel Council, 6:30 p.m., Delta Gamma, Shulze.
Monday, Nov. 12 — OTIS, 6:30-7:30 p.m., HUB assembly room.
Tuesday, Nov. 13 — University Faculty Senate, 2:10 p.m., Room 112 Kern.
Tuesday, Nov. 13 — ARHS, 7:30-8:30 p.m., Room 203 HUB.
Wednesday, Nov. 14 — A.W.S., 7 p.m., Room 203 HUB.
Thursday, Nov. 15 — USG Academic Assembly, 7:30-9 p.m., Room 203 HUB.

Official

Thursday, Nov. 15 — Last day for signing Emergency Loans for Fall Term.
Saturday, Nov. 17 — Last day for submitting a petition to graduate in absentia in December.
Saturday, Nov. 17 — Fall Term classes end 12:25 p.m.

Films

Thursday, Nov. 8 — International Films, 8 p.m., HUB assembly room, "Death of a Cyclist," directed by Bergam.
Friday-Saturday, Nov. 9-10 — Student SF Films, 7 and 9 p.m., HUB assembly room.

Seminars

Thursday, Nov. 8 — Meteorology, 3:55 p.m., Room 26 M.S. Dr. Kenneth H. Bergman, National Weather Service, on "Problems of Data Assimilation in the Numerical Weather Predictions."
Thursday, Nov. 8 — Physics-Chemistry, 3:30 p.m., Room 117 Osmond. G. Herzberg, National Research Council of Canada, on "Experimental Tests of the Quantum Theory of Molecular Hydrogen."
Thursday, Nov. 8 — Chemistry, 12:45 p.m., Room 310 Whitmore. T. G. Taylor, University of California, San Diego, on "Mechanisms of Oxygen Transport by Heme Proteins."
Thursday, Nov. 8 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. G. E. Schulz, Prof. Engineer, R. & D. Climax Molybdenum, on "Industry, Air Pollution and Agriculture."
Thursday, Nov. 8 — Philosophy, 4 p.m., Laurel Room, Nittany Lion Inn. Dr. Cyril Welch, Mt. Allison University, and Dr. Thomas Seebom, on "History and Language."
Thursday, Nov. 8 — Slavic and Soviet Language and Area Center, 3 p.m., Room 133 Electrical Eng. East. Dr. Anthony Cutler, art history, on "Byzantine and the Emancipation of Russian Art."
Thursday, Nov. 8 — Biophysics, 4 p.m., Room 617 Life Sciences. R. S. Morgan, on "Detecting Molecular Motion by Diffraction."
Thursday, Nov. 8 — Anthropology, 3 p.m., Room 101 Kern. Geza Teleki on "The Predatory Behavior of Wild Chimpanzees."
Thursday, Nov. 8 — Computer Science, 4 p.m., Room 101 Kern. Dr. Raymond F. Boyce, IBM Research Laboratory, San Jose, on "Specifying Queries as Relational Expressions."
Friday, Nov. 9 — Chemical Engineering, 3:35 p.m., Room 101 Altohouse. Dr. Douglas J. Wilde, Stanford University, on "Optimization, Fluidized Reactors, and Machine Tolerances."
Friday, Nov. 9 — Statistics, 4 p.m., Room 73 Willard. Robert Clickner, Temple University, on "Excessive Deviations and Efficiency."
Monday, Nov. 12 — Genetics, 3:55 p.m., Room 111 Tyson. Lawrence Gaffney on "Transplantation Studies with Parthenogenetic Turkeys."
Tuesday, Nov. 13 — Comp. Lit. luncheon, 12:15 p.m., HUB Dining Room. A. Collin Roderick on "Cook and the Noble Savage."
Tuesday, Nov. 13 — Graduate Air Pollution Control, 2:20 p.m., Room 140 Fenske. Dr. Charles C. Berry, Chief, Standard Support Section, Environmental Protection Agency, Research Triangle Park, North Carolina, on "Establishing Emission Regulations for Stationary Sources."
Tuesday, Nov. 13 — Physics Solid State, 1 p.m., Room 339 Davey. Dr. William Bitler, metallurgy, on "Grain Boundary Segregation."
Tuesday, Nov. 13 — Engineering Mechanics, 4 p.m., Room 215 Hammond. Dr. Werner G. Neubauer, Head Micro-Acoustics Section, Physical Acoustic Branch, Naval Research Lab., Washington, D.C., on "Schlieren Observations of Interactions of Waves with Bodies and Surfaces."

Wednesday, Nov. 14 — English, 8 p.m., Room 101 Kern. Colin Roderick, an Australian scholar, on "The Character of Austen's Literature."
Wednesday, Nov. 14 — Two Cultures Dialogue, noon, Room 169, Materials Research Lab. Theodore R. Vallance, human development, and Robert G. Price, philosophy, on "Technology Assessment and Indicators of the Quality of Life."
Wednesday, Nov. 14 — Ceramic Science, 4 p.m., Room 244 Deike. Dr. B. Brezny, NARCO.
Thursday, Nov. 14 — Electrical Engineering, 3 p.m., Room 329 E.E. East. Dr. Martin Buehler, Electronics Technology Dept., National Bureau of Standards, on "Detection of Dopants Defects in PN Junctions and MOS Capacitors."
Thursday, Nov. 15 — Physics, 3:35 p.m., Room 117 Osmond. Leo Nedelesky, University of Chicago, on "Physics Taught as a Liberal Art."
Thursday, Nov. 15 — Chemistry, 12:45 p.m., Room 310 Whitmore. Ian H. Carlson, University of Wisconsin Hospitals, on "Analytical Chemistry in the Radiomunassay Field."
Thursday, Nov. 15 — Anthropology, 3 p.m., Room 101 Kern. Dr. Brunello Giarelli, visiting professor of anthropology, The University of Toronto, on "Chromosomes and the Taxonomy of Primates."
Thursday, Nov. 15 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. M. R. Herdison, environmental affairs, College of Agriculture, and R. J. Anderson, Jr., Center for Study of Environmental Policy, on "Environmental Policy at Penn State."
Thursday, Nov. 15 — Statistics, 4 p.m., Room 73 Willard. H. D. Knobke, Comp. Ctr., on "Multiple Precision Floating Point Arithmetic: Motivation and Applications."
Thursday, Nov. 15 — Meteorology, 3:55 p.m., Room 26 M. S. Dr. Barry Smith, Bracknell, Berks, England, on "Some Basic Ideas on Diffusion."

Interest Groups

Alpha Phi Omega, Mondays, 7 p.m., Room 308 Boucke.
Archery Club, Mondays, Wednesdays, Thursdays, 7 p.m., Room 33 White.
Badminton Club, Fridays, 8:15 p.m., Rec Hall.
Chess Club, Wednesdays, 6:30 p.m., HUB card room.
Chess Team, Thursdays, 6:30-11 p.m., Room 106 Sackett.
Coed Gymnastics Club, Mondays, 7:30 p.m., Rec Hall South Gym; Thursdays, 7:30 p.m., gymnastics room, White.
Eco-Action, Mondays, 8 p.m., Room 310 Boucke.
Free-U!, Mondays, 7-9 p.m., Room 203 HUB.
Gamma Sigma Sigma, Tuesdays, 7 p.m., Room 309 Boucke.
Interlance Folk Dancers, Sundays, 7:30 p.m., HUB ballroom.
Jazz Club, Thursdays, 8:30-9:30 p.m., Room 167 Willard.
Keystone Society, Wednesdays, 7-8:30 p.m., Room 304 Boucke.
S.I.M.S., Wednesdays, 8 p.m., Room 108 Forum; Thursdays, 8 p.m., Room 101 Chambers.
Penn State Cycling Club, Thursday, Nov. 8, 7:30-8:30 p.m., Room 71 Willard.
Squash Club, Mondays, 7 p.m., White. Informal competition.
Young Socialists, 7:30 p.m., Mondays, Room 167 Willard; Wednesdays, Room 62 Willard.
PSOC, Sailing division, Thursday, Nov. 8, 7:30 p.m., Room 214 Boucke.
PSOC, Equestrian division, Tuesday, Nov. 13, 7:30 p.m., Room 111 Animal Industries.
PSOC, Mountaineering division, Tuesday, Nov. 13, 7:30 p.m., Room 214 Boucke.
Folklore Society, Thursday, Nov. 15, 8 p.m., Room 101 Kern.
PSOC, Canoe division, Thursday, Nov. 15, 7:30 p.m., Room 214 Boucke.

Lectures

Thursday, Nov. 8 — EBS Guest Lecture Series, 4 p.m., Room S-131 Human Development. Dr. Norman Young, president and chairman of the board of ITT Community Development Corporation, will speak on the importance of urban and environmental pre-planning.
Thursday-Friday, Nov. 8-9 — EMS Nelson W. Taylor Lectures by Dr. Linus Pauling, 8 p.m., Room 112 Kern. Thursday: "The Structure of Metals and Alloys;" Friday, "The Structure of Atomic Nuclei."
Thursday, Nov. 8 — (Interdisciplinary) "General Systems Theory and Interdisciplinary Education," 4 p.m., HUB Assembly Room. Dr. Anthony Wilden, U-Cal at San Diego, on "Transdisciplinary Cal at San Diego and the Social Sciences."
Friday, Nov. 9 — (Interdisciplinary) 10 a.m., HUB Assembly Room. Dr. Jere Clark, Center for Interdisciplinary Creativity, in Connecticut, on "Changing Perspectives through General Systems Education." At 2 p.m., Dr. Edwin Laszlo, SUNY at Geneseo, on "Toward an Interdisciplinary Paradigm for Contemporary Philosophy."
Saturday, Nov. 10 — Dr. Linus Pauling, sponsored by University Committee on International Programs, on "Vitamins and International Health," 8:30 p.m., Room 112 Kern.
Tuesday, Nov. 13 — Prof. Anita Furshpan, department of history, University of Connecticut, and organizing member, Cambridge Archaeology Seminars, Boston, on "Excavations in the Dhaul Region, Cyprus, 1971-73." Slide illustrations; reception follows 8 p.m., Room 101 Kern.
Tuesday, Nov. 13 — President Emeritus Dr. Eric A. Walker, on "Putting Research to Work," 3:55 p.m., Room 115 Electrical Engineering West, sponsored by College of Engineering.

Exhibits

Museum of Art — Gallery A, Charles Burchfield, Drawings. Gallery C, selections from Permanent Collection, opening Nov. 18.
Zoller Gallery, Visual Arts — BFA Show, through Nov. 10. Graduate Show, Nov. 11-17. Donald Bruno, graphic design, opening Nov. 12.
Kern Gallery — Phil Schuster, ceramic sculpture, Roger Gramer, pottery, Bill Russell, jewelry, Barry Kirby, prints, Tonio DeFurlo, acrylics, opening Nov. 18.
Pattee Library, first and second floor east corridors — photographic exhibit. Rare Book Room — Australian exhibit honoring the late Dr. A. Bruce Sutherland.
Chambers Gallery — Design Show, a selection of mass-produced objects, through Nov. 16.
Arts Building — Playhouse Gallery, color photos by winners in a national student scenic and costume competition sponsored by the American Theatre Association.

University Theatre

The final performances of "One Flew Over the Cuckoo's Nest" will be given at Playhouse Theatre today (Thursday) through Saturday. The Delo Wasserman adaptation of the Ken Kesey novel was one of the longest running off-Broadway plays in history. It is a "hip morality play" reminiscent of the morality plays of the Middle Ages but in a setting of a computerized age. Curtain time is 8 p.m.

THANKSGIVING DINNER

The HUB Terrace Room catereria will serve Thanksgiving Dinner Monday, Nov. 19, from 5 to 8:45 p.m., featuring roast turkey with dressing, seafood Newburg, stuffed pork chop, roast tipped beef, and chopped steak with mushrooms and entrees and for dessert mince and pumpkin pie, midnight layer cake, and other goodies. Service at the catereria will end with the evening meal on Nov. 21 and resume with breakfast Dec. 2. The snack bar will close after Nov. 20.

DR. WALKER TO SPEAK

President Emeritus of the University, Dr. Earl A. Walker, will address engineering students and faculty members and the general public Tuesday, Nov. 13, at 3:55 p.m. in Room 115 Electrical Engineering West in his first lecture to the College of Engineering since his retirement in 1970. He will discuss "Putting Research to Work," related to the introduction of new products and processes in commercial operations from a research state. He is now vice president for science and technology of the Aluminum Company of America.

DELAWAREELECTION

Judge Louis A. Bloom, of the Delaware County Common Pleas Court, has been re-elected president of the Delaware County Campus Advisory Board. He has been on the Board since 1967, the first year of the Campus's operation, and is beginning his sixth term as president.

ORCHESTRA PERFORMS

Three 19th century orchestral works will be performed by Penn State's Symphony Orchestra, conducted by Dr. D. Douglas Miller, assistant professor of music, Saturday, Nov. 10, at 8 p.m. in Schwab Auditorium. The works are "Overture to Tchaikovsky's 'The Nutcracker,'" "The 'Semiramide' by Rossini," Tchaikovsky's fantasia, "Romeo and Juliet," and "Symphony No. 1 in B Flat, Opus 38," subtitled "The Spring Symphony," by Robert Schumann.

BURCHFIELD OPENING

Drawings by the modern American painter, Charles Burchfield, will be exhibited in Gallery A, Museum of Art from Sunday, Nov. 11, through Dec. 20. Selections from the Permanent Collections will also be shown beginning Nov. 18 in Gallery C. The Burchfield exhibit includes 44 drawings relating to two of the artist's major watercolors, "Solitude" and "The Moth and the Thunderclap," both of which are displayed. Studies for "Solitude" spanned 45 years of the artist's life, while its companion painting was completed in nearly one sitting, and together with the drawings they demonstrate many, different facets of the artist's career. Also included in the exhibit are four other Burchfield paintings.

LIBRARY NOTES

The Undergraduate Library at Pollock South will extend its scheduled hours beginning Monday, Nov. 12, and continuing through Wednesday, Nov. 21. The schedule during that period is as follows:
Monday-Friday, Nov. 12-16 — 9 a.m. to 2 a.m.
Saturday, Nov. 17 — 9 a.m. to 5 p.m.
Sunday, Nov. 18 — 1 p.m. to midnight.
Monday-Tuesday, Nov. 19-20 — 9 a.m. to midnight.
Wednesday, Nov. 21 — 9 a.m. to 5 p.m.
Thursday, Nov. 22 — Closed. Reopen Thursday, Dec. 6, 9 a.m.
The Undergraduate Library at East Halls will remain as usual; the Library will close Thursday, Nov. 22, and remain closed until Dec. 6 at 9 a.m.

The term-break schedule for Pattee Library is as follows: Close Wednesday, Nov. 21, at 5 p.m.; Friday, Nov. 23, open 7:45 a.m. to 5 p.m.; Saturday-Sunday, Nov. 24-25, closed; Monday-Friday, Nov. 26-30, open 7:45 a.m. to 5 p.m.; Saturday-Sunday, Dec. 1-2, closed; Monday-Wednesday, Dec. 3-5, open 7:45 a.m. to 5 p.m.; Thursday, Dec. 6, open 7:45 a.m. to midnight.

LECTURE-RECITAL

Twentieth century British piano works will be the subject of a lecture-recital by British pianist and composer John McCabe tonight (Thursday) at 8:30 p.m. in the Music Bldg. recital hall. The program will include two of McCabe's own compositions, "Aubade, Study No. 4," and "Fantasy on a Theme of Liszt," as well as works by five other English composers. McCabe is visiting the campus with French horn player Ifor James this week under the sponsorship of the Institute for the Arts and Humanistic Studies with the cooperation of the Department of Music.

GLEE CLUBS JOIN FORCES

Under the direction of Bruce Trinkle, assistant professor of music, Penn State's 55-voice Glee Club and the Manhattanville College Glee Club from Purchase, N.Y., will perform Sunday, Nov. 11, at 3 p.m. in the Music Bldg. recital hall. The Penn State will present works by Poulenc, Carissimi, Leisinger, and Handel. The second portion of the program will feature the Manhattanville singers, directed by Gerald Weiss. The visitors will do two Christmas motets by Byrd, and the "Ave Maria" by Brahms and by Holst. Together, the two glee clubs will perform Poulenc's "Gloria."

PLAYHOUSE

Today through Saturday, Nov. 8-10, Penn State audiences can see the Playhouse Theatre production of "The 'Hip morality play'" which Dale Wasserman adapted from Ken Kesey's novel, "One Flew Over the Cuckoo's Nest."

The play, according to its director, Richard Edelman, is reminiscent of the morality plays of the Middle Ages, "a black comedy version of Man's search for salvation in the face of the computerized temptations and punishments of modern society."

Edelman, who is also artistic director for the Summer Festival of American Theatre, considers the play a kind of pop art piece, "with real heroes and villains, but even the villains are forced into their position because of the system."

One of the longest running Off-Broadway plays in history, One Flew Over the Cuckoo's Nest" is recommended for mature audiences. Running time is 2 p.m., and ticket information and reservations can be made by calling 814-865-1884.

ENVIRONMENTAL PRE-PLANNING

Dr. Norman Young, president and chairman of the board of the ITT Community Development Corp., will discuss the importance of urban and environmental pre-planning today (Thursday, Nov. 8) at 4 p.m. in Room S-131 Human Development, in the EBS Lecture Series. He will also talk about the psychological and sociological considerations in planning new communities.

CAMPUS COMPUTER ROLE

The director of the Dartmouth College Computer Center, who co-authored the language BASIC, Dr. Thomas E. Kurtz, will address the meeting today (Thursday, Nov. 8) of the Central Pennsylvania chapter of the Association for Computing Machinery at 8 p.m. in Room 105 Forum. His topic will be "The Role of the Computer on Campus." He says the computer has become comparable to the library in importance, size and diversity of application in the University community. Dartmouth, considered a leader in the computer field, has two large computers which 3,500 students have available through more than 200 typewriter terminals.

WINS RECOGNITION AWARD

James R. Miller, graduate assistant in entomology, is the winner of the Graduate Student Recognition Award of the Eastern Branch of the Entomological Society of America and will receive, in addition to cash of \$100, an all-expense travel award to attend the national meeting of the Society Nov. 26-30, in Dallas, Texas. Considered an outstanding graduate student, with many other awards and recognitions, he has compiled a 3.95 average in graduate school, is vice-president of the Pennsylvania State Entomological Association and is a member of the Pennsylvania Academy of Science.

Pattee exhibit honors Bruce Sutherland

Australian literature subject of talk

The author of more than 20 books, Colin Roderick, professor of English at James Cook University in Australia, will be on campus Nov. 12 through Nov. 16 as a visiting fellow of the Institute for the Arts and Humanistic Studies.

His lecture on "The Character of Australian Literature" at the English Department Colloquium on Nov. 14 will honor the late Dr. A. Bruce Sutherland, professor of English at the University, and the first person to teach courses in Commonwealth literatures in this country. He began Penn State's program in 1942.

Focus centering on what's happening

There's a new focus at Focus, the student magazine at the University.

Ken Chestek, editor of Focus, says the publication will no longer be viewed as a journal of criticism or an "anti-establishment" organ.

"The magazine is now concerned with investigative reporting, not with muckraking," he says. "We are setting out to find out what's happening in certain areas, not what is wrong with something. Our goal is honesty."

The format of Focus will reflect the change. For the first time, the magazine is presented as a tabloid.

Staff vacancies

To make application for the vacancies listed below call 865-1387 (Network 475-1387) no later than:

5 p.m., Thursday, Nov. 15, 1973

ASSISTANT DIRECTOR OF BROADCASTING FOR OPERATIONS AND SERVICES CONTINUING EDUCATION

Responsible to the Director of Broadcasting for the administration of the operations and services section of the Division. Provides assistance in the use of the Division facilities. A Bachelor's degree, or equivalent, and over four years of experience in broadcast program production, other media production, or related fields, plus administrative experience are preferred.

VETERANS OUTREACH ASSISTANT

PERMANENT FOR STUDENT AFFAIRS
Responsible to the Coordinator of Veterans Affairs for the effective implementation of a viable outreach program with all Commonwealth Campuses. The Veterans Outreach Assistant will implement a publicity campaign designed to attract veterans to the Pennsylvania State University system.

Funding Opportunities

For more information, call 865-1372 except where noted below, and enter to the list by its number and the general information provided. People with grants information for dissemination in this column should call the same number.

November 8, 1973

(104-1) The NSF Division of Social Systems and Resources supports applied research research organizations, and the delivery of selected services in metropolitan areas. Goals are: (1) to improve delivery of selected research services by describing, analyzing, and evaluating alternative delivery schemes; and (2) to promote faster use of research results by extensively disseminating them to local governments. One 6-month award may be made in each of five service areas: fire, police, social waste collection and disposal, public health (excluding mental health), and water and sewage management. Proposals must be received by 5 p.m. Jan. 22, 1974. The starting date can be no earlier than April 1, 1974, nor later than June 15, 1974. Guidelines are available.

(104-2) Women who wish to undertake two years of graduate or post-doctoral research at St. Anne's College, Oxford, England, may apply to the Rhodes Scholarship Trust. Travel allowances and a 1,650-pound (about \$3,900) per year stipend will be made during the two-year stay, which will begin Oct. 1974. The applicant must be a U.S. or British citizen and must apply before Oct. 31, 1973. Six copies of a list of qualifications, a brief proposal of research, and the names of two or three people prepared to support the applicant must be sent to the Principal, Rhodes College, Oxford, England, written to the Rhodes Scholarship Trust, c/o W. Barber, Westway University, Middlesex, U.K. 2045.

(104-3) Women who will have passed their comprehensive exam by Jan. 2, 1974, may apply for \$2,500 to \$5,000 annual AAWU fellowships to begin July 1, 1974. Post-doctoral awards (\$5,000/year) are also available from the American Association of University Women. Applications are due extended Oct. 1, 1974, and can be obtained from the AAWU, Fellowship Office, 2401 Virginia Ave., NW, Washington, D.C. 20037.

An exhibit of Australian, also in honor of Dr. Sutherland, who died in 1970, a year after retiring, is on display in the Rare Books Room of Pattee Library until Nov. 30.

Professor Roderick is an authority on the Australian poet Sir Henry Lawson and has published a number of books about him as well as studies of Australian novelists. He is currently on a world tour lecturing on the character of his national literature.

At Penn State, he will also speak to the Comparative Literature Luncheon on Nov. 13 on "Cook's Voyages and the Noble Savage."

Plans call for another issue to appear during the Fall Term, with two issues per term scheduled for the Winter and Spring Terms.

The initial issue, which will be distributed free beginning Nov. 12, highlights the transportation situation in the area. The second issue will be concerned with the question, "Education — Is It a Right or a Privilege?"

Besides the in-depth investigative reporting, the magazine will feature pieces of fiction and poetry. Contributions of articles and other materials are encouraged.

Some positions frequently become available because of the number of employees in them are listed below and will not be filled on an individual basis. Applications for such positions may be made at any time; your interests may be made known only to the Employment Division in consideration when vacancies occur.

AT HERSHY MEDICAL CENTER — Resident Nurse; Practical Nurse; X-ray Technologist; Medical Technologist; Laboratory Technician; Radiology Service Center at each campus within its system. Bachelor's degree preferable with some experience in the area of Veterans Services. The employee should be an honorably discharged veteran with active duty experience.

AT UNIVERSITY PARK — Assistant Food Supervisor.

Applications for staff vacancies are confidential with regard to race, color, creed, sex, or national origin.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

Ington, O.C. 20037. Women who request applications for information, call 1725 S Street, NW, Washington, D.C. 20036. Application deadline for the \$500 stipend and books and tuition costs is Dec. 31, 1973. Write to R. L. Dean, Universities Program, OSU, 7th and D Streets, SW, Washington, D.C. 20590.

(104-6) American Institute of Archival (1735 Pennsylvania Ave., NW, Washington, D.C. 20006) offers graduate, undergraduate and post-doctoral fellowships. Application forms may be secured from address given above until Nov. 15, 1973. For further information, call 202-331-1000.

(104-6) National Wildlife Federation (1611 16th St., N.W., Washington, O.C. 20036) offers doctoral fellowships for research in conservation related fields. The application deadline is Dec. 7. For further information, write to address given above.

(104-7) The Population Council (245 Fifth Ave., New York 10001) offers doctoral research awards in demography and related fields. Application deadline is Oct. 1, 1973.

(104-8) Organization of American Geographers (1100 15th St., NW, Washington, D.C. 20004) offers stipend for doctoral dissertation studies in Latin America. Application deadlines are Nov. 15, 1973, and Jan. 15, 1974.

REMINERS — DEADLINE DATES
Nov. 28 for NSF/NRAN Research on Solar Energy Heating and Cooling Systems (Oct. 15 INTD-73-000000); Oct. 1 for NSF Engineering Research Initiative Grants (Sept. 27 INTD-73-000000); Oct. 7 for NSF Undergraduate Student Research Awards (Sept. 27 INTD-73-000000); Oct. 15 for NSF Graduate Student Training program; and NSF Student Organized Studies program (Sept. 6 INTD-73-000000).
Oct. 15 for preliminary proposals for NSF Research on the Role of the Sun in the Earth's Energy Balance (Oct. 25 INTD-73-000000).
Oct. 15 for preliminary proposals for NSF Research on the Role of the Sun in the Earth's Energy Balance (Oct. 25 INTD-73-000000).
Oct. 15 for preliminary proposals for NSF Research on the Role of the Sun in the Earth's Energy Balance (Oct. 25 INTD-73-000000).

PENN STATE intercom

Volume 3, Number 11

November 15, 1973

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Undergraduate studies head sought; Dec. 1 deadline for recommendations

Recommendations for the position of Director of the new Division of Undergraduate Studies at the University are now being requested by the Search Committee. The Committee will prepare a list of the most qualified candidates for submission to the Vice President for Undergraduate Studies.

The new Division, which began operation on October 1 under an acting director, has the responsibility for advising, enrolling and registering undergraduate students who are not in one of the Colleges of the University. The Division will also provide certain services for adjunct students enrolled in resident education and some others aspiring for degree programs. The testing and counselling program for new undergraduates before they enter their first term will be provided by this unit. The Division is also responsible for improving academic advising throughout the University, by developing an academic information system and providing support and assistance with academic advising at all University locations.

The Director of the Division of Undergraduate Studies will be its principal administrative officer. The Committee is looking for individuals with a keen sensitivity to the needs of students and the ability to work effectively with leaders of the academic units of the University. The candidates should have the qualifications for

faculty rank and experience advising undergraduate students within the past five years. Candidates should have exhibited administrative competence commensurate with the responsibilities of the position and be able to communicate well with all members of the academic community.

In addition, the candidate should probably hold a doctoral degree, have had recent college level teaching experience, have displayed skills in innovating planning and development, and have experience with a multifaceted University.

Candidates may refer themselves, or anyone may submit credentials for individuals currently within or outside the University. The suggestion of a candidate should be accompanied by a resume of academic and professional history and any other data relevant to the qualifications described above. Letters of recommendation or names of people who might be contacted for references should also be supplied.

The Committee would appreciate receiving documents on suggested candidates as soon as possible, and cannot guarantee consideration of material received after December 1.

All material relating to the position of Director of the Division of Undergraduate Studies should be addressed to the Chairman of the Search Committee, Box 901, Room 205, Old Main, University Park, Pa.

It's hard work, but students say it's rewarding

Applications being accepted for Marine Science program

The work is hard, the hours are long, but the satisfactions are many for the Penn State students who schedule the Marine Science Program of 12 credits each spring.

Applications are being accepted now for the three-course session March 18 to May 25, 1974, at Wallops, Va., in which students will study Coastal Biology, Coastal Geology, and Methods in Oceanography, under the guidance of an interdisciplinary faculty coordinated by Dr. Albert L. Guber, associate professor of geology. Application forms may be obtained from Dr. Guber in Room 309 Deike.

The deadline for return of the applications is Dec. 21, and students will be informed of their selection by the time classes resume in January.

Typical comments of students previously enrolled in the courses are:

"I can't remember having worked so long and learning so much with so little drudgery."

"The program was what a university should be all about but usually never is — a place for learning and working together toward a mutual understanding of some process or processes."

"This was one of the few times in my college career that I have had to really think, sort out ideas, or solve a problem."

In the first year of the program, in which the Colleges of Science, Engineering, and Earth and Mineral Sciences cooperate, 40 students studied at Wallops, and last spring 50 students from 20 different majors were enrolled.

The instruction in the course is provided by Penn State faculty members, in departments such as aerospace engineering, geology, botany, biology, microbiology, food science, and the Applied Research

Laboratory, each of whom is on the Wallops site for two or three weeks at a time.

The facilities at Wallops Island, on long term lease from the National Aeronautics and Space Administration, are operated by the Marine Science Consortium, Inc., of which Penn State is a member along with eight Pennsylvania state colleges, Indiana University of Pennsylvania, American University, Catholic University of America, and West Virginia University. Students live and study in dormitories when they aren't out in the coastal waters or on board one of the Consortium's ships, such as the 95-foot research ship used in the program.

The Marine Science Program is open to juniors and seniors from any academic major in the University; this year 38 men and 12 women were enrolled. A majority say they had never really been involved in sail water experiences although they had hoped to study marine science. Applications have exceeded available spaces in the past, and the selection of participants has been based on a good grade-point average, some science background, and a capacity for hard work.

The faculty also has a demonstrated capacity for hard work. Wallops Island is isolated, television and radio reception are not good, social activities are group-generated, and their families are far away, so in effect the faculty members are available to the students 24 hours a day. Witnessing the faculty's enthusiasm, the students become inspired to share in the spirit of learning by doing.

In addition to Dr. Guber, faculty members who expect to teach next spring include: Charles Bursky, assistant professor of biology (Shenango Valley Campus); John P. Clay, research associate in aerospace engineering; William J. Leiss, as-

For 37 years he's made the long trip to the opera

Lord to see 1001st Met performance

Neither snow nor rain nor heat nor gloom of night — can keep Walton J. Lord from the Metropolitan opera.

Lord, associate professor of art history, is just about to celebrate his 1001st night there, a record amassed over a 37-year span during which he has been both spectator and "super" — an extra performer — with the company.

Even with a brand new interstate stretching most of the way between Penn State and New York City, the trip to the Met is rarely less than 4½ hours, and when Lord first started commuting in earnest in the 'forties, the drive could take eight or nine hours each way. Snowstorms and icy highways are added rigors.

None of this stops Lord, who figures that he averages about 60 productions a year, what with weekend doubleheaders at matinees and evening performances and by dint of cramming in 15 to 18 operas at term breaks and after classes end in June.

His infatuation with opera began as a teen-ager after his mother took him to hear "La Boheme."

"She was known as a 'Gerry-flapper' in her day," he notes, "part of the clique that idolized the late Geraldine Ferrar, and she used to tell me about hearing Caruso sing."

Walton J. Lord

Lord started to attend opera regularly as a Penn State undergraduate. He earned a bachelor of science degree in bacteriology in 1939 and then spent six years in the Air Force, returning to take a second degree in art and architectural history. Then he went to Harvard for a master's in art history.

Although the bulk of his opera going has been as a spectator, Lord has supervised for at least 100 performances.

"I knew people who were doing it," he recalls, "and eventually I met one of the Met's assistant stage managers who arranged my debut. It was in 'Aida,' which is quite a workout for the supers. In the first place, you have to cover yourself with a brownish-orange tempera paint to look Egyptian, and it's very hard to remove afterwards."

"Then, Rhadames' army is supposed to seem huge, so the supers come in three times. First I carry a spear, then I exit, drop it, pick up a bow and arrow and go on again. In my final appearance, I march across the stage brandishing an elephant tusk."

"The Met pays me \$5.00 for my efforts, but what they don't know is I'd gladly pay them."

At various times in his operatic "career," Lord has shot Franco Corelli at the end of "Tosca," worn a nightgown and thrown pillows in a scene from "Der Meister-singer," and carried a spear in "Il Trovatore" and bandoliers in "Carmen." He particularly likes his Spanish costume in the latter opera.

"The supers got to meet the stars, and most of them are very friendly," he reminisces. "Of course, you wouldn't dare talk to them just before they go on because they're very tense, but they'll come off stage and ask you, 'How was I?' and you assure them they were marvelous."

He has also witnessed displays of the famous operatic temperament.

"I remember one performance of 'Tosca,'" he says, "when Luisa Welch was supposed to stab Lawrence Tibbett. The two of them were feuding, so after he fell to the floor, she managed to administer a few good hard kicks which he literally had to take lying down, since he was supposed to be dead."

"On another occasion, Grace Moore, one of my favorite singers, and Jan Klepura were feuding. In the first act of 'La Boheme,' there is a love duet, and he used to pick up the chair she was supposed to sit in and move it away to draw attention to himself. That night, when he went to pick it up, he couldn't budge it. Grace Moore had nailed it down."

(Continued on page two)

Computer study

An Introductory Programming Workshop, regularly conducted by the Computation Center between academic terms, will be held the week of November 26.

Basic computer concepts and techniques of programming in the FORTRAN IV language will be studied. The workshop is open to all faculty, staff, and graduate students who have had NO previous computer experience. Lectures will be given each morning and afternoon, Monday, November 26, through Friday, November 30. All sessions will be held in Room 112 Buckhout Laboratory. Each morning session will start at 9 a.m. and each afternoon session at 1:30 p.m.

Sample programs will be studied and practice programs will be assigned throughout the week. In order to gain the maximum benefit, participants should plan to devote the entire week to the workshop.

Registrations will be accepted by Linda Yarnell, Room 229, Computer Building, immediately. A charge of \$3.00 (cash or interdepartmental transfer) for course materials will be made for each registrant. Computer charges will be borne by the Computation Center, and participants can use the computer for practice purposes free of charge for the Winter Term.

Service Award

Louis W. Balmer (center), one of the members of the Behrend College faculty when it was opened, received the University's 25-Year Service Award from Irwin H. Koechel, director of the College, and Chester Reichert, Jr. (left), president of the Behrend Advisory Board. In addition to teaching first and second year courses in chemistry, he has been the College commencement marshal, has served for a number of years as chairman of Engineers Week program, a community-wide effort, and has taught classes on the campus for high school science teachers. He has always been active in the Boy Scouts of America, twice being honored by the national office for his work. He has also served as chairman of the Erie section, American Chemical Society. Now associate professor of chemistry, Balmer joined the Behrend faculty in 1948 as instructor.

Tenure articles by faculty in current JGE

The faculty is well represented in the current (October) issue of the Journal of General Education, which is published by the University Press and edited by Dr. Henry W. Sams, professor of English and associate dean of the Graduate School. Dr. Gerald J. Gladkowski, assistant professor of education at Fayette Campus, contributes an article, "On Becoming Obsolete."

John Haag, associate professor of English, contributes the poem, "Some Accurate Information about Angels."

Six members of the faculty — Drs. Sams, Thomas F. Magner, Forrest J. Denick, Ruslun Roy, Robert K. Murray, and Jacob B. Bartoo — have given short "Faculty Opinions on Tenure" in the book review section, commenting essentially on "Faculty Tenure, A Report and Recommendations of the Commission on Academic Tenure in Higher Education," published by Jossey-Bass Publishers.

Other articles in this issue include "Community College — Source of a Liberally Educated Citizenry," by Richard Magagna, Colville Community College, South Fallsburg, N.Y., and "Empire State College: Fact or Innovation?" by L. Drew Keller, Victor P. Meskill, Nassau County Community College and C. W. Post Center of Long Island U., respectively.

Philip Withim, associate professor of English at Bucknell University, is author of "From Symptom to Process: The Movement of Psychoanalytic Criticism." Scott Edward, associate professor of political science at California State University at Hayward, writes on "Western CIVIL after the Revolution."

Members of the faculty may obtain the Journal at reduced rates. Inquiries should be directed to the University Press, 215 Wagner Blvd.

LORD —

(Continued from page one)

Lord's personal favorites are Mozart operas, but his tastes, he insists, are quite broad.

"It really depends on who's singing," he explains.

His 1001st performance will take place on Dec. 8 when he plans to hear Jost Sutherland in "The Tales of Hoffmann." He saves his old programs and over 10 years estimates he has seen 144 different operas. However, his record is marred by one omission.

He has a colleague and former teacher, Francis Hyatt, who he says, "who years ago in Paris saw a production of an opera called 'Marouf' by a now almost forgotten composer, Robaud. Whenever I tell him about seeing a new opera, he kids me. 'But Jim, you've never seen Marouf.'"

Master's degree in reading, English, or a related field with an exceptionally strong background in a learning specialist both in experience and in training. Should be able to administer diagnostic tests, remedial reading techniques, and study skills techniques.

RESEARCH ASSISTANT — PUBLIC HEALTH
COLLEGE OF AGRICULTURE
University Park

Responsible to the Project Leader for assisting in research by conducting and preparing experiments and for compiling data and reporting results. Bachelor of Science degree, or equivalent, with special emphasis on Biology, including Physiology, Genetics and Botany, and knowledge of chemistry desirable plus twelve months of related experience are preferred.

PUBLIC INFORMATION SPECIALIST
Beaver Campus

Responsible for the development, implementation and coordination of an effective public information program, with emphasis on campus relations. A Bachelor's degree, or equivalent, in journalism, advertising, communications or related fields, and at least two years of related experience are preferred.

ASSISTANT COORDINATOR OF ADMINISTRATIVE SERVICES
COLLEGE OF HUMAN DEVELOPMENT
University Park

Responsible for administering all personnel policies in the College, for liaison with administrative offices and organizations, and for development of management information systems for the College. A Bachelor's degree and over two years of administrative experience are preferred. Applications for staff vacancies are considered without regard to race, color, creed, sex, or national origin.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

Funding Opportunities

For more information, call 855-1372 except where noted below, and refer to the item by its number and the general information provided. People with grants information for dissemination in this column should call the same number.

November 15, 1973

(105-1) The Alternatives In Higher Education Program (AHÉ) of the National Science Foundation focuses on the development of a flexible quality science curriculum geared to equip students with training that will enable them to consider a wide range of careers. It contains three separate approaches for FY 1974, as noted below. Guidelines will be available soon. There are no formal deadlines. . . . **Development of Instructional Materials** and Modes shifting toward "newly emerging, interdisciplinary, problem-oriented subject areas" and "more effective and efficient modes of delivery." Focus will be on "the creation of new instructional materials, and the development of sequences in newly-significant science or engineering-based problem areas" and on-and-off campus delivery systems. . . . **Alternative Degree Programs** for design and implementation of curriculum prototypes that lead to a wider variety of career options in areas of recognized national need. New undergraduate or graduate degrees or the restructuring of existing degree programs may be proposed. . . . **College Faculty Workshops** to combine the talents of college teachers and research scholars to create and test study materials for use by undergraduates.

(105-2) To Improve effectiveness and efficiency in science education, the National Science Foundation will provide support "to assist in the design, development and evaluation of a few major experimental models of new approaches to the organization, education, management, delivery and content of science education." Projects with a reasonably sharp focus and a manageable scope are expected. Three program areas are to be funded: (1) **Experiments in Restructuring the Undergraduate Learning Environment (RULE)**; (2) **Experiments in State, Regional, or Urban Systems of Science Education (SYSTEMS)**; and (3) **Experiments in Pre-Service Education of Teachers of Science (PSTPE)**. Project support may be requested for up to three years. Preliminary proposals or letter of inquiry may be directed to: . . . Experimental Programs Group, Office of Experimental Projects and Programs, NSF, Wash. D.C. (202)282-7770. There are no deadlines. Up to four weeks is required for response to preliminary proposals. About six months for formal proposals.

(105-3) Atomic Energy Commission (AEC) George Emmer, Div. of Physical Research, Contract Admin. Branch, Washington, D.C. 20540, supports M.S. and doctoral theses related to nuclear energy on A.E.C. Laboratories. A stipend of \$3000/year, \$500 dependent plus travel is available for 6-12 months.

(105-4) Woodrow Wilson National Fellowship Program (Box 642, Princeton, N.J. 08540) offers Martin Luther King fellowships for black veterans. Award is for 9 months, may be renewed once. Applicant must be eligible for veteran's benefits. Stipend plus tuition are provided. For further information, write address given above.

(105-5) American Home Economics Association Foundation (Fellowships Committee, 2010 Massachusetts Ave., N.W., Washington, D.C. 20036) awards a variety of fellowships for graduate study and research. Application deadline is Feb. 1, 1974. For further information write address above.

(105-6) American Institute of Steel Construction (Committee on Education, 101 Park Ave., New York 10017) offers fellowships for graduate study to civil and architectural engineers majoring in structural engineering. Application deadline is Feb., 1974. For further information, write address given above.

all areas under his supervision. Requires completion in Power Plant and related Utilities Operations including complete trades or apprenticeship training or equivalent plus four to seven years' effective experience and demonstrated leadership ability.

LIBRARY ASSISTANT — MONOGRAPH RECLASSIFICATION/CATALOGING
UNIVERSITY LIBRARIES
University Park

Responsible to the Monograph Original Cataloging Librarian for the reclassification of non-project monographs and sets from the Dewey system to the Library of Congress system and to the Supervisor, Catalog Division, for the training of cataloging clerks and for other related duties. A Bachelor's degree, or equivalent, with a reading knowledge of at least one foreign language and at least 1½ years of related experience are preferred.

COMMUNICATIONS SPECIALIST
INP
University Park

Responsible to the Director of the Pennsylvania Transportation and Traffic Safety Center for assistance with all types of communications within the University and outside agencies and individuals. A Bachelor's degree, or equivalent, with special knowledge in editing, report production, with an ability to work with highly technical material, and up to two years of related experience are preferred.

FILM COORDINATOR
CONTINUING EDUCATION
University Park

Responsible to provide film services to the Division of Broadcasting production and programming, and coordinate and provide direct supervision of film services. A Bachelor's degree or equivalent and a minimum of three years' professional experience in film production are preferred.

Staff vacancies

To make application for the vacancies listed below call 855-1387 (Network 475-1387) no later than:

5 p.m., Thursday, Nov. 29, 1973

ADMINISTRATIVE ASSISTANT (EXPENDITURE CONTROL)
COLLEGE OF EDUCATION
University Park

Responsible to the Associate Dean for Research for administrative support to include the coordination and control of miscellaneous fund and budgets. A Bachelor's degree with some formal training in data processing, plus at least two years of administrative experience are preferred.

MECHANICAL ELECTRICAL DRAFTSMAN
OFFICE OF PHYSICAL PLANT
University Park

Responsible for design drawings of heating, ventilating, air conditioning systems, plumbing systems, and electrical systems as assigned. A technical school or associate degree in mechanical and electrical drafting and at least two years of related experience, or work experience equivalency and at least four years' additional related experience are preferred.

FOREMAN UTILITIES (POWER PLANT)
OFFICE OF PHYSICAL PLANT
University Park

Responsible for the continuous operation of Power Plant and all utilities facilities and systems on assigned shift. Responsible for supervision and control of electrical and mechanical, and for applying knowledge of work activities involved and the general overall missions and objectives of the Department and University. Responsible for overall character and total performance results of

above.

(105-7) Ralston Purina Company (Public Relations Dept., Checkerboard Square, St. Louis, Mo. 63168, (314) 928-3220) offers fellowships for research in nutrition and physiology. Application deadline is Jan. 15, 1974. For further information, write address above.

(105-8) S. S. Heubner Foundation (2461 Locust Walk, Philadelphia, Pa. 19174) offers doctoral fellowships for study of risk and insurance lending in business and economics. Application deadline is Feb. 1, 1974.

(105-9) National Association of Purchasing Management (11 Park Place, New York 10007) offers dissertation fellowships in the area of industrial purchasing. Application deadline is Feb. 1, 1974.

(105-10) State Farm Companies Foundation (1 State Farm Plaza, Bloomington, IL 61701) offers fellowships for seniors and first-year graduate students in business administration, computer science, economics, mathematics, and statistics. Application deadline is Feb. 1, 1974.

(105-11) Poynter Fund (P.O. Box 625, St. Petersburg, FL 33731) offers fellowships in journalism for students planning careers in newspaper fields. Application deadline is July 1, 1974.

(105-12) Resources of the Future, Inc. (1755 Massachusetts Ave., N.W., Washington, D.C. 20036) offers fellowships and research support in the area of natural resources, involving social sciences and related fields for doctoral candidates who have passed their comprehensive examinations. The application deadline is Feb. 1, 1974.

REMINERS — DEADLINE DATE
Dec. 7 for NSF Undergraduate Research Participation, NSF Summer Student Study Science Training program, and NSF Student Originated Studies programs (NSF-INTERCORE 210-3). Dec. 15 for preliminary proposals EC/EP/PE program (Nov. 1 INTERCORE 210-3). . . . Jan. 15 for Rockefeller and Ford Foundation Population Policy Research (201-256-1200). . . . Jan. 22 for NS Service Division in Metropolitan Areas (Nov. 8 INTERCORE 210-4).

MANAGER, MEDICAL COMPUTER CENTER
COLLEGE OF MEDICINE
Hershey Medical Center

Responsible for the operation and administration of instructional, administrative, and research computer services, specifically, hospital and professional billing, and medical research applications for the Medical Center. A Bachelor's degree, or equivalent, with background in computer science, and administration, plus at least four years' experience in the computer field.

NEUROSCIENCE ASSISTANT
COLLEGE OF MEDICINE
Hershey Medical Center

Responsible to the Chief of Ophthalmology for handling clinical and research duties and performing various ophthalmic examinations. High School graduate, registration with the American Association of Ophthalmology, plus one to two years of experience in an eye clinic or an Ophthalmologist office are desired.

NEUROSCIENCE ASSISTANT
COLLEGE OF MEDICINE
Hershey Medical Center

Responsible to a Neurosurgeon for various diagnostic and therapeutic tests involving patients and assist the surgeon in the operating room as required. A Bachelor's degree plus completion of American College of Surgeons Accredited Course for Surgical Assistants plus at least two years of related experience are desired.

LEARNING SPECIALIST — LEARNING SUPPORT OFFICE
STUDENT AFFAIRS
University Park

Responsible to the Assistant Coordinator, Veterans Affairs Learning Support Office for the effective implementation of the Remedial Core, which includes the Diagnostic Service; Skill Development; and Tutorial Service of the Learning Support Office.

University Calendar

November 15-25, 1973

(Organizations wishing to include information in the Winter Term calendar, to be published during the week of December 3, should send such information immediately to the Department of Public Information, 312 Old Main. Space may require limiting items to those of rather general interest, though every attempt will be made to include as much as possible)

MEETINGS

Thursday, Nov. 15 — USG Academic Assembly 7:30-9 p.m., Room 203 HUB.
Tuesday, Nov. 20 — Liberal Arts faculty 3:35 p.m., Room 121 Sparks.
Tuesday, Nov. 20 — College of Agriculture, 4 p.m., HUB assembly room.
Wednesday, Nov. 21 — Graduate Council 3 p.m., Room 101 Kern.

EXHIBITS

Museum of Art — Gallery C. Selections from Permanent Collection. Gallery A, Charles Burfield, drawings.
Zoller Gallery, Visual Arts — Donald Bruno, graphic design. Graduate Show. Kerl Gallery — Phil Schuster, ceramic sculpture, through Nov. 17. Roger Cramer, pottery. Bill Russell, jewelry. Barry Kirby, prints, through Nov. 17. Tony DeFurio, acrylic paintings, opening Nov. 18.
Chambers Gallery — Design Show, through Nov. 16.
Pattee Library, Rare Book Room — Australiana Exhibit, opening the late Oct. or A. Bruce Sutherland. First Floor East Corridor — three-man photography show, through Nov. 16.
Arts Building, Playhouse Gallery — Color photos by winners in a national student sculpture and costume competition sponsored by American Theatre Association.

News in brief

FIREARMS PROHIBITED

All firearms and offensive weapons are prohibited in developed areas of the campus, the Department of University Safety reminds hunters. This provision applies to faculty, staff, students, and visitors. Persons residing in residence halls who wish to bring weapons to the area for hunting season must store them off campus in a safe and secure place. Hunting is permitted in most undeveloped areas of the campus, except as otherwise posted.

KERN CAFETERIA

The Kern Graduate Building Cafeteria will be closed Thanksgiving Day, Nov. 22, and the following day, Friday. During the period between terms, the facility will be open Monday through Friday, 7:30 a.m. to 2 p.m. (Nov. 26-30).

MAIL BOX REMOVAL

The white mail box at the corner of Curtin and Fraser Roads, which had been damaged in some manner, will be removed Monday, Nov. 9, for repairs. Users of the box, which is marked "For Metered Mail Only," may deposit late mail to be metered in the white boxes at Ferguson Building parking area or behind Willard Building. Repair of the box may take some time.

Women's Club

The Faculty Women's Club will sponsor a Penn State Sorite Saturday, December 1, beginning with dinner at 6:30 p.m. in the Fireside room of the Nittany Inn. Following dinner there will be private small group tours of the new addition to Pattee Library. The Art Museum and Kern Graduate Center Art Exhibit will be open to dinner guests also.

The event is open to Faculty Women's Club and Newcomers Club members, their spouses or a guest. Prepaid reservations are required for the event and may be made with Donna Queney, 520 Ridge Avenue, State College. Reservations are limited and must be made by November 1.

Persons who are interested in and eligible for membership in the Faculty Women's Club and have not yet paid their dues for the year may do so by contacting Mrs. Richard Lundy, 201 Roman Dr., State College.

SEMINARS

Thursday, Nov. 15 — Physics, 3:55 p.m., Room 117 Osmond. Leo Nedelsky, University of Chicago, on "Physics Taught as a Liberal Art."
Thursday, Nov. 15 — Anthropology, 3 p.m., Room 101 Kern. Dr. Brunetto Corelli, visiting professor of anthropology, The University of Toronto, on "Chromosomes and the Taxonomy of Primates."
Thursday, Nov. 15 — Agronomy, 3:55 p.m., Room 301 AB Agri. Adm. M. R. Heddesford, environmental affairs, College of Agriculture, and R. J. Anderson, Jr., Center for Study of Environmental Policy, on "Environmental Policy at Penn State."
Thursday, Nov. 15 — Statistics, 4 p.m., Room 73 Willard. H. D. Knoblich, Comp. Ctr., on "Multiple Precision Floating Point Arithmetic: Motivation and Applications."
Thursday, Nov. 15 — Meteorology, 3:55 p.m., Room 26 M. S. Or. Barry Smith, Blackwell, Berkshire, England, on "Some Basic Ideas on Ostrifion."
Thursday, Nov. 15 — Chemistry, 12:45 p.m., Room 310 Whitmore. Dr. George Birnbaum, North American Science Center, on "Molecular Interactions and Motions from Spectral Band Shapes."
Thursday, Nov. 15 — Biophysics, 4 p.m., Room 617 Life Sciences. Stanley Person on "The Specificity of Mutations Produced by Ultraviolet Light in *E. coli*."
Monday, Nov. 19 — Entomology, 4 p.m., Room 204 Patterson. Dr. Lloyd Knutson, USDA, Beltsville, Md., on "Biological Control of Shale and Schistosomiasis."

Malay University English head teaching S. E. Asian lit course

"East is East, and West is West," Klingling said, but Dr. Lloyd Fernando is finding ways to combine them.

A Malaysian who studied 19th-century British novelists at the University of Leeds, Or. Fernando is using his training in English literature to help foster the growth of his national culture.

Or. Fernando — the family name was bestowed on his grandfather by Portuguese missionaries — is visiting Penn State as a Fellow of the Institute for the Arts and Humanistic Studies to teach a course in modern Southeast Asian literature during Winter Term.

As head of the English Department at the University of Malaysia, Or. Fernando faced the problem of fitting English literature studies into the culture of his native country.

"English was taught in Malaysia partly for historical reasons — because of our colonial past — but is now taught for pragmatic ones," he explains. "It is a door which opens up to us much of the knowledge which has been developed in the West. But in teaching Malaysian students, I have also tried to show how artistic and cultural issues reflected in English literature can be related to similar issues in our own native traditions — and thus relate my own training to my teaching responsibilities."

"I want to make Asian students aware of literary developments in their own country so they can help develop our national

Reading list reservations needed

Unless faculty members notify the library when they assign required reading lists, necessary materials cannot be placed on reserve.

The result is that students who arrive first are allowed borrowing privileges, thereby denying other members of their class equal access to the information.

Various reserve systems operate simultaneously throughout the University Libraries to insure the availability of materials to large numbers of people in a reasonable period of time.

The Undergraduate Library reserve sys-

SPECIAL EVENTS

Friday, Nov. 16 — Sports: Soccer, vs. Pittsburgh, 7 p.m.
Saturday, Nov. 17 — Sports: Football, vs. Ohio U., 1:30 p.m., Beaver Stadium, Band Day.
Sunday, Nov. 18 — Children's concert presented by Orchestra, 1:30 and 3:30 p.m., White Building Gance Theatre.
Saturday, Nov. 24 — Sports: Football, vs. Pittsburgh, 1:30 p.m., Beaver Stadium.

OFFICIAL

Thursday, Nov. 15 — Last day for signing Emergency Loans for Fall Term.
Saturday, Nov. 17 — Last day for submitting a petition to graduate in absentia in December.
Saturday, Nov. 17 — Fall Term classes end 12:25 p.m.
Monday-Wednesday, Nov. 19-21 — Final examinations.

INTEREST GROUPS

Archery Club, Thursdays, 7 p.m., Room 33 White.
Badminton Club, Fridays, 6:15 p.m., Rec Hall.
Chess Team, Thursdays, 6:30-11 p.m., Room 106 Sackett.
Coed Gymnastics Club, Mondays, 7:30 p.m., Hall South Gym; Thursdays, 7:30 p.m., gymnasiums room, White.
Jazz Club, Thursdays, 8:30-9:30 p.m., Room 167 Willard.
Folklore Society, Thursdays, Nov. 15, 8 p.m., Room 101 Kern.
PSOC Canoe division, Thursday, Nov. 15, 1:30 p.m., Room 214 Boucke.
Color Slide Club, Monday, Nov. 19, 7:30 p.m., Room 112 Kern.

literature."

Although something like 100 million persons in Indonesia and Malaysia speak Malay, the language did not enjoy "pride of place" during colonial times, Or. Fernando notes. Accordingly, in addition to encouraging more writers to write in Malay, he is trying to make their best efforts better known through the magazine, "Teng-gara."

This journal, of which he is co-editor, is published in English and consists of stories, poems, and critical articles, some with parallel Malay texts.

Dr. Fernando's literary interests at present involve research on Conrad and Joyce, but his earlier concerns anticipated woman's lib. In 1963, long before it was fashionable, he studied the woman's emancipation movement in fiction and its effect on the art of such novelists as George Eliot, Hardy, Meredith, and Gissing. "It was this research," he recalls, "that showed me there was a close connection between literature and society. The 19th century in England and America was a period of great intellectual ferment and was the source of many of today's ideas."

In his course, Dr. Fernando plans to introduce modern Asian writers from India, Malaysia and Indonesia.

"I chose modern works because I think they will be more useful to American students," he says, "and increase their immediate understanding of ways of life in different parts of the world."

tems serve both undergraduate and graduate courses in these Colleges: Business Administration; Education; Health, Physical Education and Recreation; Human Development; Liberal Arts; Arts and Architecture (below 400 and 500 level); and Agriculture (below 500 level).

Information about placing materials on reserve may be obtained from the Main Undergraduate Library, W11 West Pattee or by phoning 883-0323. The subject branch libraries and special divisions of Pattee also maintain some reserve materials relating more specifically to their disciplines.

AWARD

Dr. John L. Leathers, director of Altoona Campus, received "The 1973 Distinguished Aviation Citizen Award" of the Aviation Council at Pennsylvania from John Maclellan (right), executive director of the Council, recently. A private commercial pilot, Or. Leathers has been engaged actively for several years in promoting general aviation in the State.

La Vie orders

The editors of La Vie, the yearbook of the University, remind students and others that the deadline for ordering books is approaching and that no orders of any kind will be taken after Wednesday, Oct. 19. Only the number of books that are ordered by that time will be published, and there will therefore be no opportunity to purchase additional copies later.

But there is another important deadline: orders will be taken until Nov. 30 (postmark date) at \$9.00 per book; after that deadline the price becomes \$11.00.

No complimentary books will be provided this year.

To order, send a check or money order with full name and address to La Vie, Room 210 Engineering "Q" University Park, Pa. 16802. The check or money order should be made out for \$9.00 if before Nov. 30, \$11.00 if the order is placed between Nov. 30 and Oct. 19.

Saving energy

President Oswald last week notified appropriate officers and departments of the University that the following steps are to be taken to help conserve fuel this winter. The fuel supply crisis plus the rapidly increasing costs of fuel and electricity make these steps necessary, he said.

1. All building heating systems will be set at a maximum daytime temperature of 66 degrees. Overheating temperatures will be reduced beyond that point wherever possible. This resulting will be carried out by the Office of Physical Plant over the next few weeks at the University Park campus, and at all locations other than University Park will carry out similar reductions in settings.
2. Temperature settings in buildings with infrequent use (i.e., storage buildings) will be set at 50 degrees - 55 degrees.
3. Windows are NOT to be opened to relieve "overheating" situations. If such instances occur at University Park, please call the Office of Physical Plant Service Desk (665-4731) and report the situation for corrective action. At other locations notify the Business Office.
4. Portable electric heaters are prohibited. If you believe you have an unusual cold or draft problem, please call the Office of Physical Plant Service Desk to have the problem checked. At other locations notify the Business Office.
5. It is requested that all operators of University-owned motor vehicles will observe the 50 mph suggested maximum speed limit.

Orchestra concert

"The Store" is the theme of the fourth children's concert to be presented by Orchestra, the University Ounce Club, Sunday, Nov. 18, at 1:30 p.m. and 3:30 p.m. in the White Building Gance Theatre.

The dances in the concert are based on the themes and ideas a grocery store brings to mind. The 13 numbers, choreographed by the members of the group, vary in style and encompass the qualities of ballet, modern, and jazz dancing. The themes include the high pressure "bombarding" atmosphere of a grocery store, being lost in the store, and emphasis on all kinds of food — milk, butter, bubble gum, fruit and spaghetti.

Free tickets for the concert are available in Room 105, White Building, from 8 a.m. to noon and 1 to 5 p.m.

Orchestra is sponsored by the Women's Recreation Association. Patricia S. Heigel, instructor in physical education, is advisor to the group.

Senate studies Governance

At the University Faculty Senate meeting this week, reports and working papers prepared by subcommittees of the Ad Hoc Committee to Study the Implications of Collective Bargaining for Faculty Governance were presented for the information of the Senate.

INTERCOM presents these papers, in one case a summary, in the interest of informing the entire faculty on some thoughts concerning the subject as the subcommittee view it. It should be understood that these working papers and reports do not represent a final consensus of the Committee on the merits of collective bargaining discussed by the subcommittees. A final report for the entire Committee will be prepared for the consideration of the Senate at its December meeting.

Input from the entire faculty concerning the work of the Committee is welcomed. Dr. William D. Taylor, chairman, Room 618 Life Science Bldg., 865-2536, will be happy to receive faculty comments.

SENATE AD HOC COMMITTEE TO STUDY THE IMPLICATIONS OF COLLECTIVE BARGAINING FOR FACULTY GOVERNANCE

Working Papers from the Subcommittee on Governance

The attached second progress report is the result of three months of study of the status of faculty involvement in University governance and the probable impact of collective bargaining. The report is presented in two sections:

1. A background paper which traces the rise of University administration in the Penn State setting and the subsequent redefinition of the role of the faculty and Board of Trustees in University governance.
2. A survey of the climate of opinion on Commonwealth Campuses with regard to the status of joint authority, faculty morale, and attitudes toward collective bargaining.

The Committee's immediate charge was to explore the probable consequences of collective bargaining on University governance; however, our research and study led us to some historical analysis in order to establish a context for assessing the impact of unionization. The first progress report submitted in October dealt with the overall conditions which seem to encourage faculty to consider collective bargaining. (These) papers . . . build on this introduction.

SUBCOMMITTEE ON GOVERNANCE

Roy C. Buck, Chairman; Nicholas Gavrilis; Henry Johnson, Jr.

THE ATTITUDES OF THE COMMONWEALTH CAMPUS FACULTY

By Nicholas Gavrilis

From discussions concerning the implications of collective bargaining on governance with the faculty at the Commonwealth Campuses a general pattern of attitudes emerges.

First there is uneasiness, partly from the newness of the prospect of collective bargaining and partly from the faculty's personal experience, and partly from the openness of collective bargaining contracts. What is negotiable and what is not depends in large measure upon the bargainers. Secondly, there is a general reluctance to embrace the concept of collective bargaining as appropriate for the atmosphere and goals of academic institutions. It is not only their self-image as professionals which prompts this reluctance, but more importantly, they sense the real possibility of constraint and uniformity that may result from unionization. But, nevertheless, even though the faculty would not choose collective bargaining as desirable in itself, they see unionization as inevitable and simply a matter of time.

The reasons that are given as an explanation for this undesirable inevitability are based upon the conviction that the grievances that the faculty may have can be eliminated only by the power that collective bargaining gives the faculty in dealing with administrators. Let us emphasize that, although the faculty believe that adversary relationships are undesirable in an intellectual atmosphere, they also believe they are the only ones that seem to guarantee respect. The unfortunate implication is obvious. Administrators will yield power only when confronted by opposing power, that the merits of a case are not enough to guarantee equity. This is a very serious accusation, yet articulated strongly quite often.

For whatever reasons, the faculty believe that important decisions affecting the University have slipped out of their hands into the hands of professional administrators who are somehow out of tune with both the main task of the University, teaching and research, and the ideals which determine policy and development.

With respect to general policy, administrators

tend to be responsive to the external forces playing upon the University than to lead, with faculty support and direction, a dialogue in opposition to those external forces. Therefore, administrators do not look upon the judgment of the faculty, those whose work is indeed the fulfillment of the main task of the University, as decisive, but merely advisory.

Thus, summarizing the faculty attitudes toward governance, we find the essential grievance to be that, although decisions affecting the fate of the faculty made by administrators are binding, those made by the faculty are not. Collective bargaining can create an apparatus for making faculty decisions binding.

The concept of "joint authority" is considered by most to be a myth. Even in situations where faculty members themselves might be involved in the exercise of joint authority, they interpret their contributions and decisions as advisory only. This experience is probably true more for the newer faculty at the lower ranks than for the more established members at the higher ranks, but as a general pattern, the experience is universal. Even those whose counsel is sought and sought often still see themselves in the role of advisors and not determiners of policy. The University Faculty Senate as an instrument of joint authority is regarded as ineffective, since it is not truly legislative in character, except in the case of curriculum decisions. The fact that the Senate can be dissolved and reconstituted by the administration also indicates that the faculty through the Senate cannot counterbalance the authority of administrators. Authority is not jointly held if it exists in one group at the sufferance of the other.

We have tried to present as clearly as we can the attitudes of Commonwealth Campus faculty together with an analysis of the reasons for these attitudes. We make no claim to an exhaustive study. Also, not all points of view have been presented, only those we felt were the prevailing ones. Further, there is no attempt to justify the belief that collective bargaining will indeed bring about the anticipated power over administrators that the faculty may desire, nor that another alternative might not be more advantageous to both faculty and administrators. We are simply reporting what the faculty seem to want and how they think they can get it and why.

(Note: the following is a summary of a longer report prepared by Dr. Henry Johnson, Jr., associate professor of education; it constitutes about one-fourth of the total report)

THE RISE OF UNIVERSITY LEGISLATIVE ADMINISTRATION

The pattern in the development of the governance of the Pennsylvania State University is relatively clear. Beginning from a fairly straight forward arrangement essentially comprised of two elements, a Board of Trustees and a Principal/President-and-Trustees, the University has responded to the pressures which shaped higher education elsewhere, shared in the general thought which magnified the role of the Trustees and the relative passivity of the professorate. Although the faculty was originally charged with the institution's practical management and was at least an equal partner in determining its strategy, the growing complexity and onerousness of that task saw the faculty, and even the Trustees, surrender their functions to a new model, commercial manager-President, who came virtually to embody the whole institution.

As the University burgeoned, no one man, of however heroic proportions, could realize such a function and the role of the "Strong Man" (as Veblen called him) gradually expanded to the point where it required an extensive apparatus. It became in effect a third element, uniting a smaller number of Trustees and an ap-

pointed "faculty leadership" in a presidency which came to be called "The Administration" — a term both lacking in and essentially foreign to the original conception of the University.

This artificial separation of a new corporate entity which made and enforced "policy," subject to review by the Board but not by the faculty, led to a curious anomaly. Rather than freeing the faculty (the constant rhetorical grounds for its being added in the first place), it made them essentially powerless, particularly as they were separated from the crucial bargaining knowledge and authority which both the Board (and the "public," no doubt, in the sense of the interests which really determined university strategy) regarded as true ownership and thus real power. (The notion that power should be construed as ownership rather than competence to perform the University's function was itself an important development, of course.)

Then, with a peculiar institutional legende, the Presidency expanded in scope and concentrated its authority even more in its own hands, on the grounds that it possessed a unique policy-making authority when in fact, if that role had remained in the general faculty, subject to the scrutiny but not the practical dominance of the Trustees, no such vast apparatus would have been necessary in the first place. What might have developed instead might have been an executive staff charged not with creating authority and policy but effecting it — a function which would have undoubtedly been considerably less costly.

As a final chapter, popular disaffection and distrust, stemming from events in the control of neither trustees nor faculties, led toward the open rejection of the principle of real authority to an administrative middle man, the whole covered by an enormous increase in the rhetoric of freedom and participation. When combined with a faculty less and less concerned to accept responsibility or pursue its corporate (as opposed to individual) interests, this expansion and concentration inevitably produced a situation of extreme disability and dissatisfaction among faculty members.

Our purpose in sketching out this pattern of development, as we suggested in the beginning, is neither to praise nor to blame. Still less do we point to any particular individual or group to blame for this miscalculation. Whatever has occurred has usually enjoyed, if not the formal approval, at least the acquiescence of the other parties. Our purpose is to provide an understanding of these developments and the impasse to which they have brought us. But it is also to point out that none of the present postures, policies, and procedures are either fixed by law or made inevitable by some sort of "reality" any alternative to which is implausible, naive, or unrealistic. They have been the result of choices and decisions, all of which not only can but should be constantly reviewed and changed in the light of current practical wisdom.

One thing stands out: most of the concepts and procedures which establish the governance of this University have been the product of individual elements, usually in their own interests. Save for a brief and notably ambiguous "Charter," few decisions and definitions which have elaborated that "Charter" have been the result of truly collegial, let alone broadly communal, judgment (irrespective of the color given them by an advisory rhetoric).

The intervening years have seen both the Trustees and the University Administration formulate their own identity and function more and more clearly as their interests have declined. The faculty has generally decided to do so, or allowed others to do so for it, so that now it can be argued that the student body, though inherently more diffuse and various, has more real effect upon University policy than the faculty, particularly when the student body is viewed as extended in the "alumni."

Two alternatives, at least, seem obvious. The first would be that the University as a whole re-examine its policies and procedures, give equal voices for all its interests, and produce what it has never had, a genuine constitution and a functional legislative and executive elaboration of it which would represent the best thought and the most profound possible commitment of all parties to the common good, a good ultimately undefinable apart from the good of the Commonwealth and the nation itself.

That alternative failing, the faculty would appear to have to choose between continuing its essentially passive role or organizing in its own interests and in terms of its own definitions — i.e., the same course of action which has been followed by the Trustees and the growing administrative presidency.

The trend toward collective organization and bargaining represents one possible mode for accomplishing the latter, an option now protected by law. Whether that mode of purportedly redressing the balance of authority could accomplish more than the amelioration of particular injustices, or would even intend to modify the community as a whole rather than supply faculty interests alone (and thus only address a given balance of power without altering the fundamental relations which appear to have produced the obvious imbalance), is a mixed question. Partly it is a question of fact: What powers or influence could such an organization grasp, given the law, and as evidenced by performance elsewhere? Partly it is a question of intent: What response would it seek in its most other alternatives? To what extent does the faculty wish to accept a more adequate conception of itself and its powers and devote its energies to the administering and supervising of them for itself rather than surrendering these tasks either to an administration whose purposes and accomplishments appear less than satisfactory or to a new embodiment of itself in the "professional" executive of its own organization? (It should, however, be emphasized that the latter would be its own choice, and constitute action subject to its own review and election, as well as to its most other alternatives.) It is a question which make the forthcoming choice all the more fraught with the utmost significance, perhaps the first real choice the faculty has had in the institution's long history.

A Concluding Unsettling Post-Script

It is essential for the faculty to note one further fact, the exact meaning and potential direction of which is admittedly in doubt.

Recent years have witnessed a tendency for more and more University policy and strategy to be fashioned neither in the councils of the Trustees nor in the Administration but in Harrisburg itself. Although the Trustees and the Administration have taken it as their task to deal with the University's public and the government of the Commonwealth, the Legislature has come to exercise more and more control on the direct operation of the University.

The continuing refusal to make budgetary decisions, and the clear meaning of its rhetoric and its acts (as, for example in the Snyder Amendment) suggests strongly that the Legislature intends a still more immediate voice in the operation of the University, down to the very classroom level. In addition, through its own creation of an expanded Secretary and Board of Education (as, for example, in the case of Public Law 224, which permits it to decide if it will encourage wide policy and supervisory powers attached to budget review) the Legislature appears unwilling to remain any longer a silent partner in an essentially autonomous academic enterprise. It seems intent, instead, upon the conscious creation of a new instrument of particular social policies and interests — a decision of monumental importance and novelty if only for its new plainness, and one with obvious but still unclear implications for the future.

In a situation of this scope and potential, determining what sort of faculty or university organization and governance could result in genuine "countervailing power" (to borrow Professor Galbraith's important and apposite concept) may require a wisdom and knowledge to which past experience can contribute only in the most general sense. Clearly, a wise "power base" than can be constructed of the campus seems essential if decisions making has moved away from it. And the least likely time to attempt this is before the faculty is so heavily participated in.

What the events of recent years seem to suggest is that the traditional approach and proposals of all the parties internal to the academic enterprise will require thorough and mutual revision before any and all conceptions of internal management of genuine self-governance — indeed the traditional idea of a university itself — become nothing more than idle rhetoric.

News in Brief

GRADUATION DEC. 1

About 1,500 undergraduates and graduate students will receive degrees at Fall Term Commencement Saturday, Dec. 1. The ceremony will be held in Rec Hall at 10:30 a.m. It is suggested that persons on the campus not a part of the commencement proceedings park in areas away from Rec Hall so that those attending from out of town may find space near the building. President Oswald will present the degrees, assisted by H. R. Riley, member of the Board of Trustees and retired secretary of the Alumni Association. Fifteen of the seniors graduating will be given reserve commissions in the Army, Navy, Air Force or Marine Corps.

PARKING REGULATIONS

The winter schedule of nighttime parking restrictions on the University Park campus went into effect Nov. 15.

All parking areas designated as snow removal areas will have signs: "No Parking, 2:30 a.m. to 6:00 a.m." The restriction applies whether there is snow on the ground or not.

The snow removal areas are the following:

Red A, B, E, F, and H.
Green B, D, E, F, G, H, K, L, and M.
Yellow A, B, D, E, F, G, H, K, and L.
Brown A, C, D, E, F, G, and H.
Blue A, B, D, F, G, H, J, and K.

Orange A, B, D, E, G, H, and L.
In accordance with the current faculty-staff parking rules and regulations, vehicles must be removed by 7 a.m. from the parking areas not listed above unless the car is assigned to the area, when the car has been parked overnight in the area.

ART SALE

Paintings, sculpture, prints, photos, drawings and ceramics by undergraduate art majors and graduate students will be sold during the First Annual Christmas Student Exhibition and Sale at the Zoller Gallery (at the Arts complex on north campus) Dec. 6, 7, and 8. Modest prices will be in order for the sale. The Gallery will be open Saturday, Dec. 8, contrary to general practice, between 8 a.m. and 5 p.m., just for the sale.

BUILDING NAMES

The Board of Trustees revised the policy on the naming of campus buildings at its recent meeting. Buildings used for general purposes at any of the campuses may be named for persons who have contributed to the institution as a whole or who have made a definite contribution to education in Pennsylvania or the Nation, or names may be chosen in honor of historical events, places, or persons indigenous to the specific campus or area. Other changes were made in the policy also.

TOWER BUILDING

The new ten-story building just east of Burrows Building has received the official name of "Liberal Arts Tower Building," by action of the Board of Trustees. Currently the departments of history, labor studies, religious studies and sociology are housed in the \$1.7 million building.

CHRISTMAS CARD FILE

Possibly helpful to Christmas card buyers is a file at the Arts Library on the Fourth Floor of East Palatka where 1973 Museum card and gift catalogs are available for inspection. Catalogs of the Phila-

delphia Museum, the Museum of Modern Art, the Pierpont Morgan Library and others are included in the file.

STUDENT FILM FESTIVAL

Student film makers from Pennsylvania, Maryland, West Virginia, New Jersey, New York, Ohio and Washington, D.C. will display their products in a "Festival" at University Park February 8-10 in Schwab Auditorium.

A jury of three professional judges will select the best films for prizes totalling \$2,050, with two \$500 awards and six other prizes in specific categories. The Graduate Student Association is sponsoring the festival, which is open to all students currently enrolled in a college or university within the region.

INTERNATIONAL EVENT

A Christmas-New Year's program with international flavor will be staged Tuesday, Dec. 11, in the HUB ballroom, from 8 p.m. to midnight. Graduate students working

Neighbors say you can hear them mile away

Bagpipes and drums join the cultural scene

If a dedicated band of professors and students have their way, the Nittany Lion may soon be sporting a Scottish tam-o'-shanter.

It's the appropriate headgear for him to wear while watching the newest musical group to spring up on campus, a "combo" of bagpipers and drummers calling themselves "the Nittany Highlanders."

Attired in tartan kilts, the 10-member band has begun a series of public appearances, attracting crowds at the Hort Show, piping smartly at the 28th Division Shrine near Boalsburg on Sundays, and performing for visitors to a local antiques fair.

The founder of the group is an associate professor of astronomy, Dr. Peter D. Usher, who learned to play the pipes at the age of 15 in his native South Africa.

"Actually, there's a whole bagpipe subculture in the United States," he maintains. "The country has a great many pipe bands, particularly in North Carolina and the Northeast where large numbers of Scots settled. Go to a parade, and it's surprising how often you see one."

Joining Dr. Usher as the nucleus of the group were Dr. Peter B. Shaw, associate professor of physics, and Dr. Alistair B. Fraser, associate professor of meteorology. Dr. Fraser perfected his piping skills when he was growing up in British Columbia. Dr. Shaw is a newcomer to the piping ranks. He decided to learn after hearing Dr. Usher perform one night at a party and has found it even more of a challenge than the black belt he previously earned in karate.

"Fortunately, I live out in the country, so my practicing doesn't bother anyone," Dr. Shaw says, "although some neighbors have mentioned hearing me from as far as a mile away!"

"The bagpipe is an outdoor instrument," Dr. Usher notes. "It originated with the shepherds of the Middle East, and there's evidence that the Roman legions marched to the sound of bagpipes and Nero himself was a piper, not a fiddler."

Numerous types of pipes existed in Europe in the 13th century, and nowadays the Irish, Spanish, French, and Rumanians all have their own forms of bagpipe. In the Highlands of Scotland, the pipes were

President thanks Legislature and Governor

Approve appropriation of \$87,159,000

President Oswald last week expressed his thanks to members of the General Assembly and Gov. Milton J. Shapp for passage and signature into law of the University's \$87,159,000 appropriation bill for 1973-74.

The bill represents a 51 percent increase over the \$82,694,000 appropriated in 1972-73. It provides for monthly rather than quarterly reimbursement, together with a five percent flexibility factor among line items.

"Although the bill falls somewhat below the University's request," he said, "extensive pruning at the beginning of the fiscal year, together with adjustments we are making now based on the amount of the funding, will allow most of our programs to proceed, even though we face sharply increased costs in many areas."

"We are indebted to many individuals

who worked in behalf of our appropriation," President Oswald continued. "They include Rep. Galen Dreibleis and Sen. Joseph Ammerman, in whose legislative districts University Park lies; the leadership of both parties; and the members of the conference committee who worked out the final details of the bill."

By line item, the appropriation includes \$58,372,000 for net cost of instruction, excluding doctor of medicine, and \$1,760,000 for student aid; \$8,913,000 for net cost of extension and public services; \$15,800,000 for net cost of research; and \$2,314,000 for instruction — doctor of medicine only.

The president pointed out that the \$58,372,000 line item for net cost of instruction in effect provides an annual scholarship of approximately \$1200 for each of Penn State's in-state students. Out-of-state students pay the full cost of their education.

from the expertise of Thomas Hinchey, former Pipe Major of the Balmoral Highlanders of Syracuse, who lives nearby in Mill Hill. Two drummers have also been recruited, Lesley Strother and David Hudson, both Penn State students, and Dr. William H. Patton, assistant professor of veterinary science, is practicing on a chanter prior to performing with the Band.

The proverbial one-armed paperhanger has nothing on a piper.

The Scottish version of the instrument has five pipes made up of three drones, a blowpipe, and a chanter from which nine distinct tones can be produced. The drones and chanter are sounded by reeds to which wind is fed by air pressure on a skin bag. The piper inflates the bag by breathing into the blowpipe with a non-return valve.

"It takes good coordination to keep a steady pressure in the bag while you are breathing, marching, and playing at a steady tempo," Dr. Usher points out.

FIVE PIPERS PIPING and two drummers drumming are, left to right, Peter Usher, Alistair Fraser, Lesley Strother, David Hudson, Douglas Gump, Daniel Sloan, and Peter Shaw. The group is now part of a significant bagpiping "subculture" that is growing constantly in this country.

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

For an Experimental Academic Program Center

Academic development group named

An Academic Development Committee for an Experimental Academic Program Center has been formed by Dr. Robert E. Dunham, vice president for undergraduate studies.

Dr. Paul D. Holtzman, professor of speech, has been named chairman of the committee, which will examine the academic dimensions of an Experimental Academic Program Center.

The concept of such a Center has been discussed for some months, and the Committee, if it endorses propositions which have already been put forth, will develop a general academic plan and guidelines for the programming of a residential academic program center.

Dr. Dunham says the Committee will address itself to questions concerning academic program objectives, content, evalua-

tions, interdependencies with other programs, and interactions within a residential environment, as well as more operations questions concerning the selection of program, recruitment of faculty and students, and general logistical arrangements.

In addition to Dr. Holtzman, the Committee includes Dr. Bruce Bullington, assistant professor of law enforcement and corrections; Dr. Robert Gray, head of the department of art; Dr. Steve Goldman, assistant professor of philosophy; Donald Grenaldo, junior majoring in elementary and kindergarten education; Ronald Matlock, sophomore in Liberal Arts; Edward I. Pitts, graduate assistant in philosophy in the office of the Vice President for Undergraduate Studies; and Dr. John R. Whitney, associate professor of religious studies.

Tree thieves problem for research

The most serious problem encountered by researchers in the School of Forestry and allied scientists interested in improving tree yields is the tree pilferer.

It's a problem all year 'round, but it's especially troublesome as Christmas approaches in the stands of evergreen trees both at the University Park campus and at nearby Stone Valley Experimental Forest.

In spite of signs posted at the tree reservations where costly and important research studies are underway, thoughtless persons and vandals have in past years destroyed trees that have a special significance in research work, point out Dr. Henry D. Gerhold and Edgar H. Palpan, of the Forest Resources Laboratory.

"The seriousness of the matter," says Dr. Gerhold, "is magnified a thousand times by the fact that often the best tree in a particular stand, the one we wish to study most carefully, is the tree that is stolen."

"That tree may be worth thousands of dollars in terms of man-hours of labor, and it will take years to come back to that point in our work because tree growth is a slow process."

Tree plantations are kept open as much as possible for the public to enjoy, the

scientists point out, but the privilege doesn't extend to removing trees or marking growing trees thereby damaging them.

In an effort to reduce these losses caused by cutting of trees for Christmas decorations, a stepped-up program of patrolling by law enforcement officers has been initiated. Anyone found removing trees illegally will be prosecuted.

Sixth bibliography conference meeting here

The Pennsylvania State University Conference on Bibliography, established in 1960, will convene for its sixth biennial meeting at University Park November 29-December 1.

Two series of papers will be presented by visiting scholars and by Penn State faculty members. The first series concerns "Problems in American Fiction" and the second, "Problems in General and Comparative Literature."

Philip Young, Research Professor of American Literature, will give the keynote lecture on Thursday evening, November 29, at 8:15 p.m. in the Keller Conference Center, on "Hemingway's Manuscripts: The

News in Brief

ART SALE

Graduate and undergraduate art majors will participate in the First Annual Christmas Exhibition and Sale on Dec. 6, 7 and 8, in Zoller Gallery, Visual Arts Bldg.

Art objects in a wide range of media will be shown and offered for sale, including work by students enrolled in the five Art Department options of ceramics, painting, printmaking, graphic design, and sculpture, and in photography courses offered by the department. Advance jurying of the work is planned to insure a uniformly high quality throughout the show.

A price range for sale pieces has been set, with a limit of \$75.00 on paintings and sculpture, \$25.00 on prints, and \$15.00 on drawings and photographs. Ceramic pieces will vary in price with the nature of the work.

All sales will be on a first-come, first-served basis. Gallery hours of 8 a.m. to 5 p.m. will be in effect for the three-day exhibition.

MLA TRIP

Faculty, graduate students, and members of their families interested in traveling to Chicago by chartered bus to attend the post-Christmas meetings of the Modern Language Association may sign up in the Liberal Arts Research Office, 116 Sparks.

Present plans are for the bus to leave

Wednesday morning, Dec. 26, from the parking lot behind Sparks and return Saturday, Dec. 29. Exact departure times would be fixed according to majority wish.

Assuming a full bus, round trip fare is estimated at about \$30. This compares to \$59.20 for bus fare on the scheduled routes; \$60 train fare from Lewistown; \$64 by air (not including limousines). The chartered bus trip would take nine to ten hours, and passengers would be delivered to the convention hotels.

Single-way reservations are possible for the trip, but preference will be given to round-trip reservations.

PKB PARTY

Phi Beta Kappa members in the community are cordially invited by the local chapter to the merry sherry party at the Nittany Lion Inn's fireside room on Sunday, December 9, three to five o'clock, to celebrate Phi Beta Kappa Founder's Day.

PHOTO SHOW

The exhibit of the photography of Horace Engle, which was prepared by Edward Leos, associate professor of journalism, and displayed at the William Penn Memorial Museum in Harrisburg, will be on display in the Kern Graduate Building until Dec. 20.

Leos reprinted the photos that were taken a century ago, many of them with a "but-tonhole" camera. Engle was a lifelong amateur photographer, but these photos

Vault Reconsidered.

Also presenting papers in this series will be Joseph Katz (University of South Carolina) on "Bibliography and the Rise of American Literary Realism"; G. Thomas Tanselle (University of Wisconsin, Madison) on "Bibliographical Problems in Modern Melville"; Roger Stein (S.U.N.Y., Binghamton) on "American Fiction in the 18th Century"; and Burton Polin (Bronx Community College, C.U.N.Y.) on "Contemporary Reviews of Edgar Allan Poe's Works." Lewis Leary, Research Professor of American Literature at the University of North Carolina, will conclude the series on Saturday morning, December 1, at 10:45 a.m.,

speaking on "Troubles with Mark Twain."

Richard Schoeck, Director of Research Programs at the Folger Shakespeare Library, will keynote the series on General and Comparative Literature with his address, "A Proposed Dictionary of Tudor and Stuart Biography"; David L. Anderson (Penn State) will speak on "Bayle's Dictionary: An Approach to Scholarship and Art"; and J. Max Patrick (University of Wisconsin, Milwaukee) will conclude the series with his paper on "Milton's Penultimate Poem: Samson Agonistes."

Further information may be obtained from Dr. Harrison T. Meserole, chairman of the conference, 117 Burrows Building.

Art museum store has variety

Guatemalan dolls, Ethiopian icons, Greek and Egyptian statues, African loom pulleys, Thai antique Buddhas, and Roman theatre masks are among the art objects brought together from around the world by the Museum Store in the Museum of Art at the University.

Intended as an educational adjunct to the Museum to provide the availability of a wide range of representative art, the store features a large selection of books on art, design, artists, and crafts, many in inexpensive soft-cover editions. In recognition of the store's responsibility to University students, care is taken to offer low-cost items of the best possible quality.

Museum visitors are often surprised at the variety of wares in the little store tucked in a corner of the entrance lobby, just outside Gallery A on the first floor.

One art buff was pleased to find camel hair Ethiopian rug switches to complement the rugs she had brought from that African country. Another found a small Greek statue, commenting that it was similar to

one he had bought several years ago in the Louvre, Paris.

A young woman student marvelled to Mrs. Aviva Gorlow, store buyer and manager, that among the jewelry and ceramics she discovered a "retablo" or painted wood box peopled with figures, which she was certain was identical to those made by natives in a tiny Latin American town where she had studied during a recent term.

Students find the novel and fun aspects of some of the items displayed for purchase. Imaginative minds and nimble fingers have created lovely original jewelry from the intricately hand-blown glass African trade beads sold at the store.

Added to the assortment of folk art and art books are museum calendars, Christmas, greeting, and note cards, and reproductions of objects in famous museum collections.

The Metropolitan Museum of Art and the Museum of Modern Art in New York

(Continued on page two)

Variety is the keynote of wares sold by the Museum of Art store where books and works of art from all over the world are sold, many of which would make excellent Christmas gifts. Aviva Gorlow, store buyer and manager, points out that on hand, too, are greeting and note cards, calendars, and reproductions of famous art works, as well as objects made by students and staff.

Kochel, Behrend celebrate 25 years Calendar

Irvin H. Kochel, center, director of the Behrend Campus, receives the University's 25-Year Service Award certificate from President Oswald. An Advisory Board chairman Chester Reichert looks on.

A quarter century of progress by Behrend College and a quarter century of service by its director, Irvin H. Kochel, are being celebrated this year.

Kochel was honored recently at a surprise luncheon at the Erie Club given by the Behrend Advisory Board to mark the occasion of his 25 years service to the University. Nineteen of those years have been spent as director at Behrend.

On hand for the event were President Dr. John W. Oswald and Mrs. Oswald, T. Reed Ferguson, first administrative head of Behrend (1948-54) and presently vice president for Public Affairs; Kenneth L. Holderman, vice president for Commonwealth Campuses. Members of the Advisory Board, Campus administration, and faculty attended.

Presiding at the ceremony was Chester K. Reichert Jr., Advisory Board president. He had high praise for Kochel and said, "This is indeed an honor for him. Under his leadership Behrend has gained full college status, the first branch of Penn State to attain such rank."

Dr. Oswald presented Kochel with a certificate and a Penn State Chair, awarded for his 25 years service to the University. On behalf of the board, a silver gift was presented by Guy W. Wilson, past board president.

Kochel was named Behrend director in June 1954. Prior to that he held administrative positions at the Penn State Schuylkill Campus in Pottsville and the Harrisburg Campus.

A native of Boyertown, he holds a B.S. and Master's degree from Penn State.

He taught and coached in the public schools of Pennsylvania and holds the rank of associate professor with the university.

ART STORE —

(Continued from page one)
City and Philadelphia's Museum of Art are two of the sources tapped to produce the diversity of offerings found on the little store's shelves.

Art posters and reproductions of paintings are exhibited for sale along with a collection of original works by University artists and craftsmen.

Museum Store hours coincide with the scheduled hours of the Museum of Art, from noon to five p.m. every day but Mondays, when the Museum and store are closed. Browning, the Museum staff adds, is encouraged.

NEWS —

(Continued from page one)
are from 1888-1889, when he used the special camera that had circular glass plates.

The exhibit will go "on the road" after the Kern exhibit, visiting a dozen colleges in Pennsylvania, West Virginia, and Washington, D.C., under the sponsorship of the Art Alliance of Central Pennsylvania, the Association of College Unions International, and the Institute for the Arts and Humanistic Studies, which provided two grants to Leos to carry on the research of the Engle work.

SCENIC DESIGN SHOW

A show of scenic designs by students

Nov. 29-Dec. 9, 1973

SPECIAL EVENTS

Saturday, Dec. 1 — Sports: Men's Gymnastics, vs. Cornell, 8 p.m., Rec Hall. Men's Swimming, Penn State Relays, 8:00 a.m. Men's Fencing, vs. Maryland, 2 p.m., Rec Hall.

Monday, Dec. 3 — Intramural Student Orientation, 4 p.m., Room 115 Kern.

Wednesday, Dec. 5 — ARHS Orientation Jambly, 7:00-9:00 p.m., HUB ballroom.

Thursday-Saturday, Dec. 6-8 — Artists Series, The Swashbucker, Douglas Fairbanks, Sr. films, "The Mark of Zorro," "The Thief of Bagdad," "The Black Pirate," 8:30 p.m., Schwab.

Thursday-Saturday, Dec. 6 — Panholer sorority rushing registration, 10 a.m.-2 p.m., HUB ballroom.

Friday-Saturday, Dec. 7-8 — Free U registration, Friday, 9:30-4 a.m., Saturday, 9:30-4 a.m., HUB ballroom.

Friday, Dec. 7 — Pottery demonstration, 12 noon, Kern lobby.

Friday, Dec. 7 — Graduate Student Association Orientation Social, 8 p.m., Room 103 Kern.

Friday-Saturday, Dec. 7-8 — Sports: Men's Wrestling, Penn State Invitational Tournament, Rec Hall.

In the Department of Theatre Arts will open in the Playhouse Gallery, Arts Bldg., on Monday, Dec. 3, continuing through Dec. 15. Gallery hours are 8 a.m. to 5 p.m. The best designs produced by students in Theatre Arts 150, 180, 350, and 450, represented in sketches and scale models, will be shown. These stage and lighting design courses are taught by Theatre Arts faculty members Anne Gibson, Douglas Maddox, and Robert Barnes.

TELEPHONE CHANGES

Members of the Civil Engineering Department staff and faculty have received new telephone numbers; however, the department office retains the number 865-8391.

Students selling Christmas trees

The Penn State Forestry Society and Xi Sigma Phi, forestry honorary, are cooperating in providing fresh-cut Christmas trees for the University Park Campus.

All trees are priced at \$1.25 per foot and will be delivered to offices on campus between Dec. 10 and Dec. 14. Available will be Scotch pine, white pine, red pine, Austrian pine, Norway spruce, Blue Spruce, Douglas fir and White fir.

Orders can be placed between Nov. 26 and Dec. 7 by calling Carolyn Smith, at 865-4237, during normal working hours, specifying the size and type of tree and the date and the location of delivery. Payment may be made by an interdepartmental transfer (804-14) or by cash or check, payable to the Penn State Forestry Society, on delivery of the tree.

For safety reasons, University officials suggest that artificial greens and trees be used on campus, but if natural materials are used, certain precautions should be taken to insure the safety of persons and property.

If plastic artificial trees are used, it should be determined that they are of noncombustible materials. If aluminum trees are obtained, no electric lights should be used on the trees themselves.

Due to the energy crisis, departments are requested to refrain from using electrically illuminated decorations.

Staff vacancies

To make application for the vacancies listed below call 865-1387 (Nitelux 475-1387) no later than:

5 P.M., THURSDAY, DECEMBER 13, 1973

RESEARCH AIDE

COLLEGE OF AGRICULTURE
University Park
Responsible for assisting in research concerning the effect of pollution on plants by conducting and preparing experiments and for compiling and reporting research results. A bachelor's degree, or equivalent, in a biological or agricultural science with courses in microscopic and biochemical techniques and over one year of related experience.

UTILIZATION REVIEW COORDINATOR

Responsible to the Manager of Medical Records for the planning, organizing, and development of a Utilization Review and Medical Audit Program and to insure compliance with federal, state, and local regulations. A registered nurse with hospital experience plus two to three years of experience in Utilization Review and/or Medical Audit Programs.

UTILIZATION REVIEW NURSE

Hersey Medical Center
Responsible to the Utilization Review Coordinator for the implementation of an effective Utilization Review and Medical Audit Program insuring compliance with existing procedures and policies. Registered nurse with one to two years experience preferably in a Utilization Review or Medical Audit Program.

INHALATION THERAPY TECHNICIAN II

Hersey Medical Center
Responsible to the Chief Inhalation Therapist for various Inhalation Therapy functions and the setting-up and adjusting of various types of oxygen inhalation therapy and ventilation equipment. A high school education plus two to three years effective experience and satisfactory completion of Technicians Certification Test.

PSYCHIATRIC ASSISTANT

Hersey Medical Center
Responsible to the Chief of the Psychiatric Inpatient Unit. Responsibility is delegated on a day by day basis to the Psychiatric Nurse Supervisors and to the nurse team leader on the Psychiatric Inpatient assigned staff. Assist the nursing staff in the management of psychiatric inpatients. An Associate degree or equivalent to two years of college, preferably in a related medical field or in Psychology or equivalent professional experience.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

Applications for staff vacancies are considered without regard to race, color, creed, sex, or national origin.

Funding Opportunities

For more information, call 865-1387 except where noted below, and request an interdepartmental transfer and the general information provided. People with grants information for dissemination in this column should call the same number.

November 29, 1973

(107-1) The National Endowment for the Arts Visual Arts Program contains several programs

... Craftsman fellowships or \$3000 — deadline Oct. 15, 1973 ... Video Artists fellowships of \$5000 — deadline Feb. 1, 1974 ... Photographers fellowships of \$2000 — deadline May 30, 1974 ...

... In Residence institutional grants of \$1500 for artists, critics, photographers, and craftsmen — deadline 6 months prior to departure ... Works of art in public places displays — (1) up to \$50,000 for commissioned work — deadline 6 months before start; (2) up to \$20,000 for purchase work — deadline Jan. 1, 1974; (3) up to \$10,000 for pilot projects — deadline Jan. 1, 1974 ... Photography exhibits of contemporary or historical importance — deadline Jan. 15, 1974. Additional information is available.

(107-2) The National Science Foundation Intergovernmental Science Program supports research aimed at the development of new and improved institutions and activities useful in the application of science and technology to state, regional and local governmental problems. Among the program objectives are: advancement of the

understanding of public issues having scientific and technological content; demonstration of new science and technology planning and decision making processes; stimulation of experimentation with science and technology systems; encouraging the adoption of new systems; and improvement of communications between persons and groups. Proposal deadlines are six months prior to expected start date. Additional information is available.

(107-3) The St. Andrew's Society of the State of New York (Attn. G. L. Barclay, Chairman, Scholarship Committee, 302 Londonderry Road, Londonderry, N.Y. 12111) invites applications for a \$3750 graduate scholarship to attend any Scottish university. Applicant must be of Scottish descent. The application deadline is February 1, 1974.

(107-4) American Institute of Pakistan Studies (144 Tolentine Hall, Villanova University, Villanova, Pa. 19085) offers pre-doctoral and post-doctoral fellowships and grants for research and study in Pakistan in the social sciences and humanities. Graduate students applying must be Ph.D. candidates. The application deadline is February 15, 1974. A vita, an outline of studies proposed, a budget, three letters of recommendation and complete transcripts are required. For further information, write to the address given above or to Assistant Professor Robert LaPorte, 211 Burrows Building.

(107-5) The City of New York (Urban Fellowship Program, A. E. Roach II, Director, Office of the Mayor, 290 Broadway, New York, N.Y. 10007)

On the Artists Series, Douglas Fairbanks, Sr. stars above in a scene from the film "The Mark of Zorro." Below, in a scene from the film "The Black Pirate," is featured Oscar. 6-8, in a three-film series at Schwab Auditorium.

Friday, Dec. 7 — Sports: Men's Swimming, vs. Colgate, 3:30 p.m.

Saturday, Dec. 8 — Sports: Men's Fencing, Collegiate Open, 8 a.m.

Saturday, Dec. 8 — Bahai Club, soccer event, 7-10 p.m., HUB ballroom.

Sunday, Dec. 9 — Young Socialists Jan. meeting, 7:00-9:00 p.m., HUB ballroom.

Sunday, Dec. 9 — Cathryn F. Ulema, vocal recital, 3:30 p.m., Music Bldg. recital hall.

Sunday, Dec. 9 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Dec. 9 — Chapel Service, 11 a.m., Eisenhower Chapel. Dr. John E. White, philosophy, Millersville State College.

FILMS

Thursday-Sunday, Dec. 6-9 — Centre Hall films, "Anne of a Thousand Days," 7:30 and 10 p.m., Room 102 Forum.

Thursday-Sunday, Dec. 6-9 — Arnold A. Society films, "The Wild Bunch," Room 105 Forum.

Friday-Sunday, Dec. 7-9 — North Hall films, "Brian's Song," 7:30 and 9:30 p.m., Room 111 Forum.

OFFICIAL

Saturday, Dec. 1 — Commencement, 10:30 a.m., Rec Hall.

Sunday, Dec. 2 — Arrival of new students, Monday-Wednesday, Dec. 2-5 — Orientation and advising.

Tuesday-Wednesday, Dec. 4-5 — Registration.

Thursday, Dec. 6 — Classes begin, 8 a.m.

Thursday-Friday, Dec. 6-7 — Drop/add, subs, HUB.

LECTURES

Thursday, Dec. 6 — Graduate Student Association Lecture Series, 8 p.m., Room 112 Kern.

MEETINGS

Wednesday, Dec. 5 — A.W.S., 7-9:30 p.m., Room 203 HUB.

EXHIBITS

Museum of Art — Gallery A, Charles Burchfield, Drawings, Gallery C, Sculptures from the Permanent Collection.

Arts Bldg., Playhouse Gallery — PSU Theatre Arts student scenic designs.

Sackett Gallery, Third Floor — PSU Architecture student projects.

Zoller Gallery — First Annual Christmas Student Exhibition and Sale, Dec. 6-8, special hours Saturday, Dec. 8, 8 a.m.-5 p.m.

Kern Gallery — Roger Cramer, ceramics through Nov. 11. Tony De Furio, sculptures, through Dec. 1. Horace Engle photography. Art Education Advancement Ceramics, opening Dec. 1.

invites applications for their Urban Fellowship for seniors and graduate students planning to attend Penn State next year. Application forms are available in 317 Kern Graduate Building or from the person given above. The application deadline is January 31, 1974. Fellows must be enrolled in a graduate program in the social sciences and be located in New York City from September 11, 1973 to June 1975 as interns in city government. They will take part in weekly seminars and their work will be supervised by a faculty member. Fellows must be supported in addition by a fellowship from the University plus a \$2000 grant-in-aid from the Graduate School. Applicants prepared to provide the \$500 fellowship or more of their students may nominate him or her to the Graduate School, which will consider the nominee for a grant-in-aid from the limits of its resources. The Graduate School will usually award a grant-in-aid to fellowship recipients of this type. The nominating department must advise the Graduate School of the student will enroll while engaged in internship experience.

REMINERS — DEADLINE DATES
Oct. 15 for preliminary proposals OE/PIPE (Nov. 1 INTERCOM 105-3) ... Jan. 15 for letter and Ford Foundation Population Policy (Oct. 15 INTERCOM 105-2) and (Oct. 15 INTERCOM 105-1) ... Jan. 22 for NSF Service Delivery in Metropolitan Areas (Oct. 15 INTERCOM 105-1) ... Jan. 22 for NSF Local Government research (Nov. 25 INTERCOM 105-4) ...
Reminder for NSF Alternatives in Higher Education program and Educational Program Research program (Nov. 15 INTERCOM 105-1 and 105-2)

PENN STATE intercom

December 6, 1973

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the cless schedule

News in Brief

INMATE ARTISTS

An exhibition of art works created by inmates at Rockview and Huntington correctional institutions, who were taught for the past year by Stephen Groot, graduate student in art education, opened this week in the Chambers Building Gallery and will remain until Dec. 19. Oil and water colors, ceramics, weavings, models and other works are on display. A reception, to be attended by some of the inmate-artists, will be held in the Gallery Sunday, Dec. 9, from 2 to 4 p.m.

PATTEE EXHIBITS

An exhibit entitled "The Early Photograph, a Penn State Collection Exhibit," is featured in the Penn State Room, Central Pattee, first floor, with unusual photos including a parlor album of "Cartes de Visite," from the personal effects of George W. Atherton, president of the University from 1882 to 1906. In West Pattee

Lobby, until Dec. 16, is a set of ink drawings by Dr. Hans Neuberger, professor emeritus of meteorology. Under the title, "Geometric Abstractions," 17 drawings are on display.

CAPITOL GRADUATES

More than a hundred graduates received degrees at Fall Term Commencement Exercises at Capitol Campus last Saturday. Of the total, 21 were awarded master's degrees. Seventeen undergraduate students were graduated with honors.

OFFICES MOVED

Activities of the Office of Student Affairs at the University have been moved to the Boucke Bldg. The Office of Student Aid and the Student Assistance Center are located on the first floor, the Educational Opportunity Program and the office of the vice president for student affairs on the second floor, Residential Life Programs and International Student Affairs, on the third floor, and the Career Development and Placement Center on the fourth floor.

NITTANY LION INN CLOSING

The Nittany Lion Inn food service will cease for the Christmas break after dinner Wednesday, Dec. 19, resuming for the breakfast meal Wednesday, Jan. 2.

NEW ORGANIZATION MEETS

Returning Student Women, a new organization on campus, will meet Wednesday, Dec. 12, in 101 Kern Building at 7:30 p.m., with a program consisting of a film about the difficulties of returning to college after an extended absence and a talk about adjunct students by Dr. Harvey Wall. The meeting is open to the public.

VOCAL RECITAL

Mezzo soprano Cathryn Utema, candidate for the M.F.A. degree in music, will give a recital Sunday, Dec. 9, at 3:30 p.m. in the Music Building recital hall, singing works of five composers, including two song cycles. She will sing Aron Copland's music on 12 poems by Emily Dickinson as well as Francis Poulenc's "Le Bestiaire."

HERSHEY UNITED WAY

At Hershey Medical Center, the annual drive on behalf of the Tri-county United Way surpassed its goal long before the campaign for funds ended, with a total of \$17,546 by the end of October, an increase of 221 per cent above the 1972 total. The number of employees contributing tripled.

MURAL FOR LIBRARY

An abstract mural designed and created by Jan Riggs, Rona Rothenberg, and Nancy Ziegenfuss, three art education seniors, has been presented to the University Libraries and is on view in the Reserve Reading Room, W11 West Pattee. Yar Chomsky, professor of art education, directed the mural project.

MONOGRAPH PUBLISHED

The University Press has published a monograph, "The Villa Emo at Fanzolo," devoted to the works of the great Italian Renaissance architect, Andrea Palladio. It was prepared by Giampaolo Palladio Favero. Palladio influenced 18th century classical revival greatly, and he made a lasting impression through his theories of proportion in architecture generally and in Roman architecture in particular.

CALENDAR

Dec. 6-16, 1973

(Note: The listings below are in addition to those in the Winter Term Calendar on Pages 2-3.)

SEMINARS

Thursday, Dec. 6 — Chemistry, 12:45 p.m., Room 310 Whitmore. Otto Vogt, University of Massachusetts, on "Polymerization and Copolymerization of Chlorals." Thursday, Dec. 6 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. R. G. Cunningham, Vice President for Research and Graduate Studies, on "Hunkering Down" and Symptoms of the Teaching Institution Syndrome.

Thursday, Dec. 6 — Slavic and Soviet Languages and Area Studies, 2 p.m., Room 124 Sparks. Professor Samuel Kotz, Temple University, on "Evolution of Statistical and Probabilistic Concepts in the Soviet Union and in the West."

Thursday, Dec. 6 — Physics, 3:35 p.m., Room 117 Osmond. Dr. Ernest J. Moniz, University of Pennsylvania, on "High Energy Electron Scattering from Nuclei."

Tuesday, Dec. 11 — Solid State Physics, 1 p.m., Room 445 Davey. Professor Eugene Watson, engineering acoustics, on "Location of Sound Sources by Acoustical Holography."

Thursday, Dec. 13 — Chemistry, 12:45 p.m., Room 310 Whitmore. Charles K. Brodshier, Duke University, on "Polar Cycloadditions."

Thursday, Dec. 13 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. D. E. Baker on "Quality in Graduate Student Research."

Thursday, Dec. 13 — Physics, 3:35 p.m., Room 117 Osmond. Dr. Claudio Teitelboim, Princeton University, on "Space Time as a Derived Concept."

LECTURE

Thursday, Dec. 13 — Central Pennsylvania Chapter, A.C.M., 8 p.m., Room 101 Kern. Frank K. Cassell, E.I. du Pont de Nemours and Co., on "Audit Controls and Trails."

MEETING

Thursday, Dec. 6 — Orientation for veterans, 7:30 p.m., HUB assembly room, to provide information on the "Cranston Amendment" programs.

Wednesday, Dec. 12 — Returning Student Women, 7:30 p.m., Room 101 Kern. Dr. Harvey Wall, speaker; film, Meeting open to public.

EXHIBITS

Chambers Gallery — Multi-media works of inmates at Rockview and Huntington correctional institutions, until Dec. 19.

VEHICLE SPEEDS

In order to comply with President Nixon's policy statement regarding the fuel crisis and to adhere to President Oswald's request at conserving fuel at Penn State University, a 50 mph maximum speed limit has been imposed on all University vehicles. All users of the Fleet vehicles are requested to allow themselves additional travel time in order that they may comply with this speed limit.

It is hoped that this speed limitation will not only save fuel but will also have an additional effect on the safety of the users as well as adding to the life of the vehicles themselves. It is hoped that all users of these vehicles will support this new mandate so that disciplinary action will not be necessary for those who fail to comply.

Five O'Clock and University Theatre productions

Two plays to open next week

During December, the University Theatre will present two productions; one through Five O'Clock Theatre, and another, a full Medieval Christmas pageant, for children (of all ages).

"The Shepherds' Play," the University Children's Theatre holiday production with performances Dec. 15-18 in the Playhouse, is a play with appeal for the entire family.

Originating in England in the Middle Ages as a town pageant performed in the streets, "The Shepherds' Play" is warm, moving and full of Medieval comic types, according to Helen Marfull, assistant professor of theatre arts. She feels the common origins of the play and the free, flowing nature of the action add to its appeal.

Created by townspeople and guilds as a means of understanding the mystical and religious significance of Christmas in terms of their own lives, the play begins with a situation paralleling the Nativity with a lamb as the newborn baby. The final scene is a Christmas pageant, with costumes, mood, and staging drawn from Medieval

paintings, creating a sense of reverence and beauty.

Performances are scheduled for 10:30 a.m. and 2:30 p.m. on Saturday, 2:30 and 7:00 p.m. on Sunday, and 4:00 and 7:00 p.m. on Monday and Tuesday. Ticket information is available from the theatre box office, 865-1884.

Five O'Clock Theatre will present its second full length play in its history on Wednesday, December 12, at 5:20 p.m. "Fat Fell Down," a bitter comedy by Dan Ellenstuck, that concerns itself with the story of an overweight 13-year-old whose parents send him to a "fat farm," and the effect that it has on the boy. The production is being entered in the American College Theatre Festival, and is the last production for Mark Berman, who has headed Penn State's Five O'Clock Theatre for some years.

Other performances will be given Thursday at 5:20 p.m. and Friday at 7:20 p.m. Free tickets will be available at the Pavilion Theatre one-half hour before each performance.

Department heads named for music education, horticulture

Dr. D.W. Hepler

Dr. D. William Hepler, associate professor of plant breeding, has been appointed head of the Department of Horticulture and professor of plant breeding, effective December 1. He has been serving as acting department head since the death of Dr. Darrell E. Walker in July.

A native of Durham, N. H., Dr. Hepler

was appointed to the faculty in January 1970. He earned a bachelor of science degree from the University of New Hampshire, master of science degree from Penn State, and the doctor of philosophy degree from the University of Illinois, all with a major in horticulture.

From 1954 and until coming to Penn State, he was owner of the Hepler Seed Co.; research associate and assistant professor of vegetable crops at the University of Illinois; plant breeder for the California Packing Corporation; and manager of research and foundation seeds for FMC Corporation, San Juan Bautista, Calif.

Dr. Warren E. George, formerly associate professor of music and education and coordinator of undergraduate studies in music at the University of Texas, has been named professor and head of the department of music education.

While at the University of Texas, Dr.

George had responsibility for all undergraduate programs and student affairs.

Earlier in his career, he was director of instrumental music in the public schools of Olathe, Kans., and teaching assistant and research assistant at the University of Kansas.

A native of Kansas, Dr. George is a graduate of the University of Kansas, where he earned the bachelor of music education degree. He holds the master of music degree from Michigan State University and the doctor of philosophy from the University of Kansas.

Active in a number of professional organizations, Dr. George was one of 12 persons from the United States invited to the Second International Seminar on Research in Music Education in Stockholm, Sweden, in 1970.

His research, primarily on musical evaluation and testing in music education, has resulted in a number of papers published in professional journals.

1973-74 Winter Term Calendar

University Park Campus

The Pennsylvania State University

Penn State Wrestling Team
Rec Hall, Dec. 7-8

•WEEK OF DEC. 3-9

Monday, December 3

Intramural Student Orientation, 4 p.m., Room 115 Kern.

Tuesday, December 4

Registration.

Wednesday, December 5

Registration.
A.R.H.S., Orientation Jammy, 7:30-9:30 p.m., HUB ballroom.
The Church of Jesus Christ of Latter Day Saints, 9 a.m.-5 p.m., HUB assembly room. Film: Also Dec. 6, 7.
Sports: Men's basketball, vs. Virginia, 8 p.m., Rec Hall. Graduate Council meeting, 2:40 p.m., Room 101 Kern.

Thursday, December 6

Artists Series, "The Swashbuckler," Douglas Fairbanks, Sr. in "The Mark of Zorro," 8:30 p.m., Schwab.
Drop-Add substitution, HUB.
Parish, 10 a.m.-2 p.m., HUB ballroom. Sorority rushing registration.
Graduate Student Association Lecture Series, 8 p.m., Room 112 Kern.

Friday, December 7

Artists Series, "The Swashbuckler," Douglas Fairbanks, Sr. in "The Thief of Baghdad," 8:30 p.m., Schwab.
Sports: Wrestling, Penn State Intramural Tournament, Rec Hall. Men's Swimming, vs. Colgate, 3:30 p.m., Natatorium.
Drop-Add substitution, HUB.
Free-U registration, 9:30 a.m.-4 p.m., HUB ballroom.
USG film, "The Assassin of Youth," 12:30 and 10:30 p.m., HUB ballroom.
Popey demonstration, 12 noon, Kern lobby.
Graduate Student Association Orientation Social, 8 p.m., Room 102 Kern.

Saturday, December 8

Artists Series, "The Swashbuckler," Douglas Fairbanks, Sr. in "The Black Pirate," 8:30 p.m., Schwab.
Sports: Wrestling, Penn State Intramural Tournament; Men's Fencing, Colgate open, 8 a.m., Rec Hall. Free-U registration, 12 noon to 4 p.m., HUB ballroom. Bahai Club, 7:10 p.m., HUB ballroom.

Sunday, December 9

Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Chapel Service, 11 a.m., Eisenhower Chapel. Dr. John E. Winter, philosophy, Millersville State College.
Young Scientists Jammy, 7:10-9:30 p.m., HUB ballroom.
Cultural F. Ulema, voice recital, 3:30 p.m., Music Bldg. recital hall.
PSU Sport Parachute Club Paraskating, 9 a.m., Stone Valley.

INTEREST GROUPS

Alpha Phi Omega, Mondays, 6:30-9 p.m., Room 308 Boucke.
Campus Crusade for Christ, Tuesdays, starting Jan. 8, 6:45-10 p.m., HUB lounge.
Chess Club, Wednesdays, 8-11 p.m., HUB card room.
Chess Team, Thursdays, 8-11 p.m., Room 106 Sackett.
Eco-Action, Mondays, 8 p.m., Room 316 Boucke.
Environmental Research Mgmt. Club, 7 p.m., Dec. 11, Jan. 8, 22, Feb. 5, Room 309 Boucke.
Free-U, Mondays 7-9 p.m., Room 203 HUB.
Gamma Sigma Sigma, Tuesdays, 7-9 p.m., Room 309 Boucke.
German - Kaffeestunde, Thursdays, 2:30-4:30 p.m., Room 217 Burrard.
Interfaith Folk Dance Jammy, 7:30-10:30, HUB ballroom, (except Dec. 9).
Keystone Society, Wednesdays, 7:30 p.m., Room 304 Boucke.
PSOC Main Club, Dec. 11, Room 10 Sparks, 7:30 p.m.; Hiking Div., Dec. 12 and Jan. 9, 7:30 p.m.; Room 301 Boucke; Sailing Div., Dec. 13, 7:30 p.m.; Room 214 Boucke; Equestrian Div., Dec. 18, Jan. 8, 29, Feb. 12, 7:30 p.m., Room 111 Ave. Ind. Mountaineering Div., Dec. 18, Jan. 8, Feb. 12, 7:30 p.m., Room 214 Boucke; Canoe Div., Jan. 3, Feb. 7, 7:30 p.m., Room 214 Boucke.
PSOC, Ski division, 7:30 p.m., Dec. 12, 106 Boucke; Jan. 9, 121 Sparks; Jan. 16, 214 Boucke; Jan. 23, 121 Sparks; Feb. 6, 20, 121 Sparks.
PSU Sports Car Club, 7:30 p.m., Dec. 12, Jan. 9, 23, Feb. 6, 20, Room 365 Wilard.
Young Scientists, Mondays, 8-11 p.m., Room 301 Boucke.

•WEEK OF DEC. 10-16

Monday, December 10

Drop-Add substitution, HUB.
Volunteer Service Center, 7:30-9:30 p.m., Room 167 Wilard.

Tuesday, December 11

Hill Youth Foundation, 7-10 p.m., HUB assembly room. Film.

Library Notes

Winter Term Instructional Services for faculty and students are being provided currently at various locations within Penn State Library.

General tours, class orientation sessions, up-division and graduate level library instruction, and orientation sessions in agricultural and biological sciences are being offered.

General tours for graduate students begin in the Reference Room on the first floor of East Palace. Two daily sessions are available Monday and Tuesday, Dec. 8-7, at 9:30 a.m. and 1:00 p.m.

Library instruction for up-division and graduate level classes on library resources relevant to each class is also available from the Reference Department. Arrangements for class visits may be made by calling Joan Lee, Reference Department, 865-3465.

The Agricultural and Biological Sciences Library is also offering an orientation program for new faculty and students today and tomorrow. The hour-long sessions will begin each day at 10:00 a.m. and 1:30 p.m. Individual and class arrangements may be made by visiting Vladimir Mucile, at 865-7558.

A schedule of operations of the University Libraries has been announced for future weeks. From now until Dec. 19, the Libraries will be open Monday through Friday from 7:45 a.m. to midnight; Saturday, 7:45 a.m. to 5 p.m.; Sunday, 1 p.m. to midnight. The hours will be 7:45 a.m. to 5 p.m.

Dec. 22-28, closed.

Dec. 29-30, closed.

Dec. 31, 7:45 a.m. to 5 p.m.

Jan. 1, closed.

Jan. 2, 7:45 a.m. to 5 p.m.

Jan. 3-March 2, regular hours of Monday-Friday, 7:45 a.m. to midnight; Saturday, 7:45 a.m. to 5 p.m.; Sunday, 1 p.m.-midnight.

NEWS

(Continued from page one)

SPACE EXHIBIT

The works of 38 architecture undergraduate students are featured in an exhibit, "Space," which is currently on display in the Sackett Building (gallery hours 8 a.m. to 5 p.m.). Each Wednesday, at noon, a slide presentation is given of the mathematical models used in the design programs the students worked with and a videotaped visualization is presented through computer graphics. The spatial models were developed in a course taught by Howard Lawrence, assistant professor of architecture.

LONDON BUS

The London Bus, which makes periodic guided tours of the University Park Campus, will operate on a very much decreased schedule during the winter. Until December 19, the bus will leave from the Hetzel Union Building Monday through Friday at 12:45 p.m. Beginning Friday, January 4, no scheduled tours will be provided Monday through Thursday, each Friday, however, until Feb. 22, a tour will be held starting at 12:45 p.m. from the HUB. A new schedule will be followed in Spring Term.

Staff vacancies

To make application for the vacancies listed below call 865-1387 (Network 475-1387) no later than:

5 P.M., THURSDAY, DECEMBER 13, 1973
COMPUTER OPERATOR
INTER-COLLEGE RESEARCH PROGRAM
University Park

Responsible for operation of computer console and input/output equipment; process computer jobs from submission by users to return to users, providing courteous service and maintaining efficiency for operations. Two years of college mathematics is required; familiarity with computer programming and operation of punched card equipment is desirable.

COORDINATOR, COMPUTER CENTER

Capitol Campus
Responsible to the Assistant Professor/Principal Assistant, Management Information Systems, for the effective and efficient operation of the Capitol Campus computer center. The University Choirs and Symphony Orchestra in program Saturday, Dec. 15, at 8:30 p.m., in Schwab Auditorium.

Music in season, five programs planned

Five major music events are scheduled for Dec. 12-18, just before the Christmas break in classes. The first is the recital by the Alard String Quartet, Wednesday,

Dec. 12, at 8:30 p.m. in the Music Bldg. recital hall, featuring works by Charles Ives and Debussy.

Second of the new term's programs will be by the University Choirs and the University Symphony Orchestra, Saturday, Dec. 15, in Schwab Auditorium at 8:30 p.m. Raymond Brown, professor of music, will direct this program, which will consist of a performance of Ralph Vaughan Williams' "Hodie," with a choir of 250 voices and 90 instrumentalists. Tickets are required; they are free and will be distributed at the main floor of the Hetzel Union Building beginning Tuesday, Dec. 11, at 9 a.m., limited to two per person.

On Sunday, Dec. 16, the Penn State Glee Club and the Brass Choral will perform the annual Children's Christmas Concert, with familiar traditional Christmas songs and melodies. The performance is at 3:30 p.m. in the Music Building recital hall.

On Monday and Tuesday, Dec. 17 and 18, the Orchestral portion of Handel's "Messiah" will be performed by the Pennsylvania Vocal Ensemble and Musica da Camera, at 8:30 p.m. in the Music Building recital hall. The Vocal Ensemble is composed of students, faculty, and area residents, and Musica da Camera is the University chamber orchestra.

Death

Dr. Robert T. Brown, assistant professor of engineering at Capitol Campus, died Nov. 25 as the result of an automobile accident in Hershey, near his home. He was 43. A member of the Capitol faculty since 1970, he had previously served at Southern Methodist University. From 1951 to 1967 he was a pilot with the U.S. Air Force. He obtained both bachelor's and master's degrees at the University of Oklahoma, where he also served as special instructor in electrical engineering; his doctor's degree in electrical engineering was conferred by Southern Methodist. He was the author of many professional publications.

Funding Opportunities

For more information, call 865-1372 (ext. 7) noted below, and refer to the item by its number and the general information provided. People with grants information for dissemination in this column should call the same number.

December 6, 1973

(106-17) The Office of Education has set Dec. 15, 1973, as the closing date for proposals for the Adult Education "Special Projects" and "Teacher Education Projects." The final application date remains Jan. 21, 1974. Research funded under Special Projects should have the goal of strengthening ongoing state adult basic education programs through new teaching methods, programs, techniques, and operational and administrative systems. Teacher Education Programs are to provide training for personnel involved or preparing to work in adult education.

(108-3) Applications for contracts or grants are being accepted by the Office of Education (OE) under the Civil Rights Act for projects of technical assistance, training institutions, and employment of advisory specialists in connection with plans or programs for the desegregation of public elementary and secondary schools. The deadline for receipt of applications for contracts or grant awards is Dec. 26, 1973. Awards will be announced about Feb. 8, 1974. Also in the area of minority projects, but under the Emergency School Aid Act, OE announces applications for grants for four program areas: (1) Basic grants or contracts, pilot projects, and public or nonprofit private projects (Dec. 26, 1973); (2) Bilingual education projects (Dec. 26, 1973); (3) Educational television projects (Feb. 15, 1974); and (4) Special Reading Projects (Feb. 15, 1974). Research under these programs may assist in the elimination, reduction, or prevention of minority group isolation.

(108-3) The National Science Foundation under its Experimental R&O Incentive Program an-

nounces a Medical Instrumentation Experiment. The current experiment deals with sonographic instruments for producing high-quality images of internal tissues and organs. The project has as its objectives: (1) a current state of the art summary; (2) instrument specifications for production within two years; and (3) a pilot study of a second-generation capability. The incentive package to be tested includes: (1) a target specification for firms to achieve; (2) review conference with the sponsor; (3) a list of technical changes recommended; (4) final specification; (5) a clinical validation program; (6) submission of developmental models; and (7) clinical evaluation by hospitals. There will also be a Request for Proposal used for a baseline study of the historical experience in introducing diagnostic medical equipment. The experimental announcement will be released soon (NSF 73-64).

(104-6) The Atomic Energy Commission finances Nuclear Sciences and Engineering Programs administered by NORCUS (The Northwest College and University Association for Science, Richmond, Washington) including Student Traineeships, Thesis Participants, Laboratory Graduate Programs, and Faculty Appointments. Application forms and additional information are available from NORCUS, 103 Spruill Road, Richmond, Washington 98305. Deadlines for receipt of completed applications: Jan. 15, 1974.

(104-6) A new program of fellowship training at the doctoral level in biomedical sciences is being supported in FY1974 by the National Institutes of Health. Awards will be made for advanced training in research in specified shortage areas in biomedical and health-related sciences. The basic stipend will be \$10,000 per year with no dependency allowances. The institution will receive up to \$3,000. There will also be a small number of institutional research fellowships at the

Honors

Dr. Eugene N. Borza, associate professor of history, received the Class of 1933 Award for Outstanding Contributions in the Field of Humanities last week.

Established in 1962, the award, consisting of a plaque and \$300, was presented by Dr. Arthur O. Lewis, assistant dean of the College of the Liberal Arts.

Dr. Borza joined the faculty of the University in 1964. A popular lecturer, he is the author of several articles on Greek history. "Travel and Communications: Classical Times" and "The Impact Alexander the Great" which was recently published by Dryden Press.

In addition to continuing his research on ancient travel and Alexander, he is working on determining problems of continuity and discontinuity in Greek history from antiquity to the present.

Dr. Robert F. Barnes, adjunct professor of agronomy and agronomist of the U.S. D.A. Regional Pasture Research Laboratory, has been named a Fellow of the American Society of Agronomy. Earlier this year he received the Merit Certificate of the American Forage and Grassland Council and in 1970 was given a certificate of recognition for outstanding research in forages by the Indiana Forage Council.

Dr. John L. Lumley, professor of aerospace engineering, was elected Fellow of the American Physical Society recently. He is currently on leave as a Fulbright Senior Lecturer at the University of Liege, Belgium, and as a Guggenheim Fellow at the Ecole Centrale de Lyon and the University of Aix-Marseille.

Dr. Joseph V. Intorre, associate professor of safety education and chairman of the safety education program in the College of Education, has been installed as president of the American Academy of Safety Education for the year. The Academy advises various professional groups concerned with the advancement of safety education. It also recognizes individuals who have contributed in an outstanding manner to the cause of safety education.

Charles H. Ness, librarian and assistant director of Public Services of the University Libraries, has been elected vice-president and president-elect of the Pennsylvania Library Association. At the meeting of the Middle Atlantic Regional Library Federation in Atlantic City, Richard J. Fil Simmons, assistant librarian and head of the Worthington Scranton Campus Library, was also elected second vice-president of the PLA.

postdoctoral level where a critical need is demonstrated. For applications and additional information contact: Office of Research Management, Division of Research Grants, NIH, Bethesda, Md. 20892. (108-6) NATO Senior Fellowships in Science for people five or more years of teaching and research are offered by the National Science Foundation. Tenure overseas is normally 3 to 6 months, travel grants, plus \$200 daily subsistence allowance, are provided. Write to NSF, Office of Higher Education, Washington, D.C. 20555 for application forms, which must be submitted before Jan. 31, 1974.

(Several other "study abroad" programs are available, including research fellowships in the U.S. and abroad; research grants at study institutions.)

(108-7) Smithsonian predoctoral and postdoctoral fellowships in the fields of biology, sciences, anthropology, American history, and material culture, earth sciences, and history of science technology should be applied for, please Jan. 15, 1974. Management Office in the Smithsonian Office to Academic Studies, Washington, D.C. 20560. Postdoctoral candidates receive \$10,000/year; doctoral candidates, \$5,000/year. Two to three awards (\$100,000 in total) to younger graduate students seeking directed research and work experience in some of the fields previously mentioned. Research grants are available to postdoctoral fellows and geophysicists who wish to work at the Smithsonian Astrophysical Observatory's observatory at 60 Garden St., Cambridge, Mass. 02138. (108-7) DEADLINE DATE: Jan. 15, 1974. Dec. 15 and several subsequent for NEA Young Arts Program (Nov. 29 INTERCOM 107-1). Jan. 15 for NEA National Theme. City Opera grants (June 14 INTERCOM 28-1). Jan. 22 for NSF Service Division in Metropolitan Areas (Nov. 8 INTERCOM 410-1). Jan. 24 for National Governmental and International Studies (Nov. 21 INTERCOM 2108-4). Reminder for NSF Assistant in Higher Education Program, Educational Policy Restructuring program (Nov. 15 INTERCOM 2108-2 and 108-2).

Investment plan

Approaching a new calendar year is a time when many people begin thinking about income taxes, and how to reduce them legally. One method is available to faculty and staff members through a tax deferred annuity plan sponsored by the University. Here's how it works to the advantage of many.

A provision of the Federal Income tax law gives employees of certain tax-exempt, non-profit organizations such as Penn State the opportunity to obtain a special current tax benefit under certain circumstances. All full-time regular employees of the University are eligible to participate. When an employee decides to enroll in the plan, he or she elects the amount of a monthly premium (not less than \$40.00) and this amount is not considered or treated as current income for tax purposes. The dollars being saved are then used to purchase a retirement annuity. The net result is a unique opportunity for employees to accumulate a fund for their future security with before tax dollars.

The fund being accumulated may also grow faster than ordinary savings or investments since earnings on the invested money are not subject to current annual taxes. It should be remembered that if the money is withdrawn in a lump sum or

News in Brief

COMPUTATION CENTER SEMINARS

The Computation Center would like to receive suggestions to help set up a series of seminars during the Winter Term.

Several possible topics are: (1) Introduction: Hardware and Basic Concepts of the Operating System, (2) Job Control Language, (3) Library Programs and Facilities, (4) STPAC-Computation Center Statistical Routines, (5) SPSS-Statistical Package for Social Sciences, (6) Computer

Graphics-Overview, (7) Computer Graphics-Static, (8) Computer Graphics-Dynamic, (9) 1970 Census Data Programs, (10) Penn State Remote Job Entry/BAT File System, and (11) APL.

Anyone Interested in these or other suggested topics is requested to contact Mrs. Rosemary Hallenbeck, 863-0422, Room 214 Computer Building, so that sessions may be scheduled at a time most convenient to participants.

COMET WATCH

The Department of Astronomy, assisted by the Penn State Astronomy Club, will hold

"Comet-watch" Open House programs from 5:00 a.m. to 7:00 a.m. Saturday, Dec. 15, weather permitting, and from 5:00 p.m. to 7:00 p.m. Saturdays during January.

"Comet-watch" sessions will be held in the student observatory atop Davey Laboratory on campus. Visitors will be able to see the comet through binoculars in December and through binoculars and telescopes in January, when it will have circled the sun and become visible in the evening sky just after sunset.

The comet-watch program is open to

Philosophy department observes 50th year

The 50th anniversary of the founding of Penn State's Department of Philosophy will be celebrated at a dinner on Monday, Dec. 17, at the Nittany Lion Inn.

The speaker will be Dr. Paul Weiss, professor of philosophy at Catholic University of America.

The invitational dinner will be attended by faculty members of the Department and its graduate students, along with representatives of the University administration. President John W. Oswald will offer some remarks.

Although philosophy courses were first added to the curriculum of what was then The Pennsylvania State College in 1896,

the Department itself came into being in 1923, points out Dr. Carl R. Hausman, the present head.

At that time, the Department of Education and Psychology was transferred from Liberal Arts to the School of Education and was replaced by the Department of Philosophy. Its faculty consisted of Erwin W. Runkle, who served not only as head but also as Librarian of the Carnegie Library, and Ray H. Dotterer.

Between them, they offered seven undergraduate and seven graduate courses.

Since its founding, the Department has awarded 125 master's degrees and 42 doctorates.

Penn State's founders appreciated the values of philosophy, Dr. Hausman notes. As far back as 1859, when the University was known as The Farmer's High School and offered only one curriculum in scientific agriculture, they called for students to acquire a sound education and broad knowledge which would include "moral and intellectual philosophy."

"I am pleased, Dr. Hausman says, "that our department can commemorate its 50 years of existence. Our dinner serves as an occasion to reaffirm our mission as a discipline as well as our commitment to supporting various curricula within the University."

Even though it was one of the milder presentations at Stanford conference

Aspaturian draws ire of Soviet journal for paper on international relations

His views on the roles the Soviet Union, China and the United States will play in the seventies have drawn an attack on Dr. Vernon V. Aspaturian in "Literaturnaya gazeta," the leading Soviet intellectual journal.

An eight-column headline, "Prophecies of Mister Aspaturian: Out of Step with the Times," introduces an analysis by Ernst Genri of an article by the Penn State political scientist which appeared in the British journal "Survey" last Spring.

The Soviet article appears in the Oct. 3 issue of "Literaturnaya gazeta." Dr. Aspaturian, research professor of political science, is director of the Slavic and Soviet Studies Center. A member of the faculty since 1952, he is internationally known as a scholar in the area of Soviet politics and foreign policy and international and comparative politics.

Ernst Genri is the pseudonym for a prominent Soviet commentator on world affairs who is close to the inner circles of power in the Kremlin and is usually assigned the task of aiming his intercontinental literary missiles at Western and Chinese views of Soviet policy that the Soviet leaders feel may be influential in shaping attitudes and responses to Soviet behavior or express the views of "influential circles" in Western capitals or Peking.

In his article, Dr. Aspaturian suggested that "new balances struck between domestic and foreign policies will result in less foreign policy activity on the part of Moscow and Washington and more on the part of . . . China and to a lesser degree, Japan and West Germany. Among the first casualties of the 1970s will be messianic foreign policies and 'global strategies' as the US and USSR reduce their commitments to China and the other states expand their foreign policy horizons."

Discussing China, Dr. Aspaturian noted

Dr. V. V. Aspaturian

that during the coming decade she will decide whether to become an authentic global power or to limit herself to assuming a dominant role in East Asia. It was his next sentences which drew the ire of "Literaturnaya gazeta," which quotes them: "What does seem clear, however, is that China does not intend, in the near future, to develop a missile capability that could reach the continental United States . . . and will instead concentrate on strengthening both her conventional capabilities and building up her stockpile of thermonuclear warheads, short-range and intermediate-range missiles, sufficient to deal with the Soviet Union, Japan, and India . . ."

"As China's power and capability grow, the threat to the Soviet Union's eastern marches will be correspondingly increased. It appears clear that Peking is determined to arrest, diminish, and perhaps even reverse the Soviet presence in East Asia although a full-fledged confrontation may not develop in the 1970s . . ."

"The rapprochement (of the United States, e.g.) with China leaves Peking free to concentrate its fire on Moscow . . . The Chinese have already thrown out many hints of possible cooperation with both Japan and Western Europe."

Soviet policy makers, as represented by Genri, did not care for this analysis by "Mister professor," as they referred to Dr. Aspaturian, attacking it as being contrary to the spirit of détente.

"The playing off of one continent against another is not detente but the potential deepening of international conflicts," Genri states. "But one must take into account that over the ocean — although not only there — there are people who place their cards on just such politics."

"Of course, speaking about the plan of the Maoist leaders 'to concentrate their fire on Moscow,' Mister Aspaturian pretends that he is simply engaged in disinterested research of political perspectives. But it's far from that. The wish of the professor is clearly the father to the

thought. Behind the research' here distinctly appears a political calculation. And Mister Aspaturian is not alone in this in the USA today."

Fearing perhaps that Professor Aspaturian's analysis might persuade "naive" readers by its appeal for greater cooperation between the Soviet Union and the United States, Genri writes that "in the beginning it seems that in the opinion of Mister Aspaturian, all will be well and peaceful." He goes on to say that "if the author of the article . . . had devoted it to scientific proof that all this is now not a rosy dream but a matter completely attainable for the present generation, then we would have applauded the Professor from Philadelphia."

(Continued on page two)

Dr. Vernon V. Aspaturian, research professor of political science, is "out of step with the times" says the October 3 issue of the "Literaturnaya gazeta," leading Soviet intellectual journal. Cover for the unpopularity on the part of Soviet commentator Ernst Genri is a paper Dr. Aspaturian gave at Stanford University in a conference on Soviet foreign policy.

Roy T. Snyder, in the middle between Dean James M. Beattie and Associate Dean Thomas F. King of the College of Agriculture, is county Agricultural Extension representative (county agent) for Perry County, a position he has held since 1953; previously he was assistant county agent. A 1946 Penn State graduate in dairy husbandry, he joined the Extension staff immediately after graduation. Born in Lima, near Reading, Snyder was a pilot and instructor in the U.S. Army Air Corps in 1943-45.

Dr. Peter O. Pfah, associate professor of floriculture (second from right) received 25 Year Service Award certificate from College of Agriculture Dean Dr. James M. Beattie, with Dr. Pfah's wife, Edythe, and new Horticulture Department head Dr. D. William Hepler as part of the ceremony. A Pittsburgh native, Pfah was graduated from Penn State in 1942 and served in the U.S. Army until taking a job in a florist shop in Pittsburgh and entering Ohio State on a research fellowship. He received his master's degree from Ohio State in 1948 and returned to Penn State as instructor in floriculture. He received his Ph.D. from Penn State in floriculture and was named assistant professor. In 1965 he was promoted to associate professor. He has taught general floriculture, flower arranging, greenhouse production, retail florist design, and flower judging courses, and has served as coach of the flower judging team for many years. He is author of a book on retail floral shop management.

Dr. Alfred L. Borries, right with Dean Beattie, has been professor and head of the veterinary science department since 1953, when the department was organized. He came here in 1943 from Michigan State University where he served as instructor and assistant professor of microbiology from 1941 to 1942. Although born in New Hampshire, he attended high school in Pennsylvania and was graduated from Penn State in dairy science in 1939. He obtained a master's degree in safety nutrition and O.V.M. degree at Michigan State.

A. Roger Groat, professor of epicultural engineering extension, joined the Agricultural Extension staff in July, 1948 as assistant county agent at large, coming here from Cornell University. In 1953, he was named instructor in an engineering extension, assistant professor in 1964, associate professor in 1967, and professor this year. A Cornell Graduate in 1948 he received a master's degree from Penn State in 1952 in farm management. With him and Dr. Beattie is Duran S. Horne, also professor of ag engineering extension.

Service Awards in Agriculture

A. Kermil Dirth, professor of agricultural economics extension, second from left above, is a 1942 Penn State graduate in agricultural education. He taught in high school vocational agricultural programs before and after U.S. Navy service in 1944-1946, joining the Ag Extension staff as instructor in 1946. A year later he received his master's degree in agricultural economics. He was named assistant professor in 1953 and full professor in 1972. He is well known throughout the State for his expertise in poultry marketing.

ASPATURIAN —

(Continued from page one)

After mislocating Professor Aspaturian in Philadelphia and confusing Penn State with Penn, he soothingly assures his readers that "Such professors are necessary now and will be necessary tomorrow," and then recalls "that in Philadelphia there lived and worked a great American by the name of Benjamin Franklin who dreamed about a peaceful, just life for all Americans (but) unfortunately we are forced to be disillusioned. Continuing to read the article, we find that Mr. Aspaturian is not at all like Benjamin Franklin. "The new world order" which he foresees in the 70s is not at all like that which the reader might have imagined in the beginning from his words."

Thereupon Genrl (in a translation supplied by Dr. Thomas F. Wagner, associate dean for research in the College of the Liberal Arts) turns his attention to a place in the August "Reader's Digest" by Joseph Alsop titled "Will Russia Attack China?" This article predicts "that there are at least 25 chances out of 100" that the Soviets will loose a nuclear strike against China. "The picture of the future which Alsop would like to see is clear," the Soviet journalist continues. "Asia enveloped in flames! A World storm far from America! The thought is in essence the same as that of Professor Aspaturian. . . ."

At it concludes: "The trouble with Vernon D. Aspaturian and Joseph Alsop lies in the fact that such people simply cannot imagine a world without 'cold' and 'hot' wars, a land without catastrophes, mankind without atomic bombs . . . Alsop, Aspaturian and those who are with them or behind their back, live on ideas of the past. They are always with immense ardor conjuring up newer and newer 'systems' of world catastrophes, newer and newer schemes of international collisions, and only then, when they have thought them up, do they feel normal."

"The cold war" leaves much less behind it. But it's good that the keys to the fate of the world in our time are at least

not in the hands of Mister Vernon D. Aspaturian and Mister Joseph Alsop."

"The paper from which this article was taken," Dr. Aspaturian explains, "was originally presented at a conference on Soviet Foreign Policy in the Seventies sponsored by Stanford University's Center for Russian and East European Studies. It actually was one of the most moderate and mildest of the papers presented there, but the more vicious attacks were ignored by the Russians. I think that's why I was singled out. The Soviets were afraid my paper might be too appealing and plausible to Soviet readers and sympathizers."

Indeed, Genrl's attack is more important for what it omitted commenting upon in Professor Aspaturian's article than for the quotations torn out of context. At the end of his report, Dr. Aspaturian suggested that it was necessary to "construct a more durable and positive international order than one based upon mutual detestation, detente and 'peaceful co-existence' . . . one founded on a new trans-ideological consensus in which different social and ideological systems could interact and cooperate, rather than function as competitors and adversaries."

Professor Aspaturian urged that the United States "unilaterally abandon its competitive stance in dealing with Moscow and . . . exercise self-restraint in its sermonizing and moralizing about the evils of Communism and gloating over Soviet political ineptness and economic failures."

The Penn State professor further warned that a "frontal attack" demanding that the Soviets "open up" their country in return for U.S. economic assistance, "will serve to reinforce the suspicions of the Soviet leaders who interpret . . . the interpretation of ideas as devices for undermining and weakening the communist system." Because "there are too many glaring weaknesses and obvious malfunctions in Soviet society for the Soviet leaders to risk the importation of competing ideas or to allow the expression of dissident and critical views on the part of its own citizens."

Dr. Aspaturian suggested that instead of demanding the Soviets "open up" their country to foreign ideas in return for U.S. assistance, we would be more likely to "open up" the Soviet system by assisting in its efficient operation. He noted:

"Only when the Soviet leaders are convinced that the United States is not interested in undermining or weakening its domestic structures and institutions will they give serious attention to the relaxation of ideological controls. The recent gain deal with Moscow is an illustration of this process; a 'cold war' response would have been to give wide publicity to Soviet agricultural difficulties and refusal to sell grain

in order to aggravate the situation."

In his concluding remarks, Professor Aspaturian suggested that "the United States should strive to help the Soviet system work, assisting it with its technological and economic difficulties rather than hoping and waiting for the system to collapse." The Soviet Union, he adds, "might eventually wish to reciprocate, thus providing a more profound sense of security than that provided by a nuclear stalemate and mutual exhaustion alone," and thus "the Soviet leaders would have less fear from foreign ideas or the dissident views of their own citizens."

Scholarship funds memorialize two

Two scholarship funds have been established memorializing faculty members.

The Darrell E. Walker Memorial Scholarship fund honors the late head of the Department of Horticulture who died July 7, 1973. The fund will aid full-time undergraduate students majoring in horticulture.

Dr. Walker was a member of the faculty for 19 years, appointed as assistant professor in 1954. He became professor of plant breeding and head of the department of horticulture in 1963.

A scholarship has been established to commemorate the late Harold I. Tarpley, who served in the department of electrical engineering for 41 years.

INVESTMENT —

(Continued from page one)

as monthly income, the entire amount becomes ordinary income in that year and would be subject to tax.

Since January will begin a new tax year, it would be advantageous for interested employees to enroll in the tax deferred annuity program as early in the tax year as possible. Application forms and other printed material are available in the Employee Benefits Division, 133 Willard Building. When an employee enrolls on or

The Harold I. Tarpley Memorial Scholarship will aid and recognize electrical engineering undergraduate students who have completed at least two years of study with superior academic records and have a need for funds for college expenses.

The initial principal of the fund will be provided by the families of Mrs. Harold I. Tarpley and Dr. Harold I. Tarpley, Jr., and additional contributions may be made to the Penn State Foundation by other interested individuals and groups.

Prof. Tarpley retired from the University in 1964 as professor emeritus of electrical engineering and returned to his native Kansas, where he lived until his death in August.

before the 20th of a given month, the plan goes into effect the first of the following month.

Although many different companies offer tax deferred annuities, the University program is offered through the Teachers Insurance and Annuity Association (TIAA) and the Equitable Life Assurance Society. Studies have proven that these highly reputable and financially sound companies provide plans as competitive in their benefits as any other being offered in today's annuity market.

Ice skating urged as therapy

You're skating on thin ice if you tell Kurt Oppelt, instructor in physical education, that swimming, weightlifting or some other exercise is the best therapy for sports lovers.

For many years Oppelt has been telling the world that the best way for many disabled people to traverse the road to recovery is on ice skates. Not only is ice skating beneficial to those recovering from serious accidents and illnesses, he claims; it is of great help to children who are physically or mentally handicapped. And the elderly, too, can reap the benefits of skating.

"There are many values of ice skating such as the development of organic strength and vitality, improvement of circulation, more flexible joints and muscles, increased breathing capacity, better body control and balance, and an improved posture," explains Oppelt, a native of Austria. He says no other sport can incorporate so many benefits into a single exercise.

And who should know better about the rehabilitative features of ice skating?

As a two-and-a-half-year-old child in Vienna, Oppelt was introduced to ice skating to help relieve a bronchial condition. Then, at age 14, he broke a kneecap in a skiing accident and intensified his skating regimen at a local club in hopes of regaining strength in the knee. Not only did he build up the knee, he became a superb skater in the process.

It wasn't long before Oppelt was internationally recognized as one of the world's top figure skaters. In 1956, he and partner Sissy Schwarz won the Olympic gold medal as the world's best figure skating tandem, as well as Austrian, European and World titles.

"If I hadn't injured my knee, I probably would never have gone into figure skating," Oppelt comments. "I liked skiing more."

Besides the physical benefits of skating, there are equally effective psychological benefits, Oppelt is convinced.

"Psychologically speaking," he says, "skills present challenge; developed skills carry over. And skating is fun and builds self-confidence through success."

"Skating also has socializing values, and the performance of good maneuvers or skills, moving along on one's own power, makes changes in thinking and helps overcome bad habits and ill feelings."

For five years now, Oppelt has conducted instructional programs at the University Ice Pavilion for physically and mentally handicapped children. Along with student volunteers and helpers from local service organizations who assist the children, Oppelt meets with the classes in

weekly sessions. He is the first man in the country to offer such group instruction. But Oppelt, who has been at Penn State six years, reports that such programs are scarce — a situation he has set out to correct.

He has travelled throughout the United States and Europe in efforts to encourage the implementation of programs which will offer group ice skating instruction to the handicapped. He has also written numerous articles on the therapeutic aspects of skating and has established a method of teaching the handicapped and beginners.

Doctors, Oppelt says, often suggest to patients recovering from automobile accidents, falls, heart attacks and other disabling maladies that ice skating might help them. "Alas, there are extremely few instructors who know how to supervise a rehabilitative ice skating program. Most 'ice skating therapy,' then, is self-administered."

The highlight of Oppelt's crusade to establish training programs for instructors came in early November at Penn State when, for the first time, a clinic was held to train people to conduct ice skating programs for the handicapped. Fifty people from 12 states, including physical educators, physical and recreational therapists, ice skating professionals, and rink managers met here for the two-day clinic. The affair was held as a continuing education offering of the College of Health, Physical Education and Recreation.

Another breakthrough came when Oppelt, the Joseph P. Kennedy, Jr., Foundation and the Ice Skating Institute of America announced plans to sponsor an upcoming "Special Olympics" in ice skating for the retarded. Oppelt, who came to the United States in 1961 to join President John F. Kennedy's physical fitness program, is the chairman of the Kennedy Foundation committee of the ISIA.

Teaching skating to the handicapped is a rewarding experience for Oppelt, who is conducting several research projects in this field.

"The first maneuvers that the children need to learn are walking and gliding on the ice," he explains. "Once they have mastered these, first in rubber-soled shoes, then on skates, most of their fears are conquered."

After this period of confidence building, games and contests are added to the program.

"The competitive factor helps the child forget his handicap and concentrate on the goal of the contest," says Oppelt. "He inadvertently begins to move under his own power and begins to skate."

As might be expected, there are some

Kurt Oppelt, instructor in physical education and former Olympic ice skating champion, has turned his talents to helping disabled and retarded youngsters through ice skating. He is involved nationally in the effort to train more ice skating teachers for special problems.

who think that skating could be too dangerous for a handicapped person since, as we all know, falls are a common part of the learning process. Oppelt admits that the student might, indeed, take a few spills. But very few falls and no injuries have occurred in the clinic. The psychological benefits of a handicapped person "getting back up and staying up" are tremendous, Oppelt adds.

Oppelt makes no claim that skating is a panacea or that it will be helpful in all cases. But he adds, "I really believe that skating can help overcome many pupils' ailments."

The instruction is so important, he emphasizes, that only trained instructors can make the difference between a smooth or rocky road to recovery.

"My experiences have taught me that an effective program for handicapped children depends on a reasonable series of goals tailored to the capabilities of each child and the instructor's ability to make skating the most enjoyable experience in the handicapped child's life," says Oppelt.

"Once I have brought a student as far as forgetting his handicap, if even for a moment, I know he's on the road to rehabilitation. And what's more, he's having fun. And this feeling is the same for beginners of all ages."

SENATE REPORTS

The University Faculty Senate will distribute in mid-January to all members of the faculty copies of reports of its Ad Hoc Committee to Study the Implications of Collective Bargaining for Faculty Governance, from the earliest report in the August, 1973, meeting to the meeting this week (Dec. 11), when the Committee's final report was issued.

Children's classes

Games and gymnastics classes for children of University faculty and staff members and of the surrounding community will be offered again by the College of Health, Physical Education and Recreation, in the White Building facility.

The classes will meet Tuesday afternoon, beginning January 3rd and continuing through February 21st from 4:00 p.m. to 5:30 p.m. Two sections will be scheduled, one for children in first and second grades and a separate section for those in grades three and four.

Those children registered during Fall term need only to call: White Building — 865-7331, Monday, December 17, or Tuesday, December 18 — 9:00 a.m.-11:00 a.m.; 1:00 p.m.-4:30 p.m. and give child's name and grade level.

New registrants may register at 105 White Building, Tuesday, December 18 — 9:00 a.m.-11:00 a.m. or 1:00 p.m.-4:30 p.m.

The number permitted for each class is limited and selection will be in order of registration, which must be done either by the child or by the parents, adults may not register a child of another family.

Staff vacancies

To make application for the vacancies listed below call 865-1383 (Network 475-1357) or later then:

COLLEGE OF ENGINEERING

University Park

Responsible for providing a variety of radiation analysis services to researchers working at the Breazeale Nuclear Reactor and the Nuclear Reactor Ray Facility. A Bachelor's degree in Physics or Chemistry in nuclear or medical technology with at least two years of related experience.

ASSISTANT PLANNING SPECIALIST

OFFICE OF BUDGET AND PLANNING

University Park

Responsible to the Division Head, or other designated supervisor, for assistance in the monitoring of University planning and analysis functions and for preparing special reports and studies assigned. A Master's degree, or equivalent, Business Administration, Higher Education, Economics, or Public Administration, and at least two months of effective experience in planning or analysis activities are preferred. Some knowledge of, and exposure to, University public affairs is desired.

PSYCHIATRIC SOCIAL WORKER

Hersey Medical Center

Responsible for serving as part of the mental health team in providing social work services to mentally and emotionally disturbed patients and their families. A Master's degree in Psychiatric Social Work, or equivalent, and over six months of related experience working in a chemical hospital setting are preferred.

STAFF NURSE

Worthington-Scranton

Responsible for providing nursing care to student body including the treatment of minor and temporary illnesses and accidents. Retirees and employees to a physician or nurse as necessary. Graduate of an accredited school of nursing and possess a current Pennsylvania license as a Registered Nurse. Public health experience or training desirable.

PROGRAMMER

MANAGEMENT SERVICE

University Park

Participate in analysis, program design, coding, documentation, and other programming tasks related to produce reports, make mathematical computations or maintain information files. Bachelor's degree or equivalent. Knowledge of generation computers and programming languages plus 1 to 2 years of effective programming experience is desired.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

Applications for staff vacancies are considered without regard to race, color, creed, sex, or national origin.

NEWS —

(Continued from page one)

the public free of charge. Faculty or staff members may obtain required complimentary tickets at the department office, Room 525 Davey Laboratory, or by calling 865-0416. The general public may obtain tickets by writing to the department and enclosing a self-addressed, stamped envelope, noting the time period when it is desired to view the observatory.

HUB CHRISTMAS DINNER

The HUB Terrace Room Christmas Candlelight Dinner will be held Monday, Dec. 17, with service from 5 to 6:45 p.m. The Bellefonte High School Madrigal Chorus will provide music; the 25-piece group is directed by Vincent Nola. The menu for this dinner will include roast lamb with mint jelly; roast tip of beef; baked stuffed flounder; veal steak Parmigiana; and Planters' beef over noodles.

NAMED EDITOR

Dr. David S. Palermo, professor of psychology at the University, has been named editor of the national bimonthly "Journal of Experimental Child Psychology."

A member of the faculty since 1963, Dr. Palermo is also editor of "Child Development Abstracts and Bibliography" and a member of the editorial board of the "Journal of Verbal Learning and Verbal Behavior."

A very merry Christmas to you

Claire W. Oviatt, secretary to Dr. Harold J. O'Brien, associate dean for Commonwealth Campuses in the College of the Liberal Arts, helps us express our wishes for the Christmas season in a display on the College's Bulletin Board in Sparks Building. According to Dr. O'Brien, the display is an effort to "symbolize the bonds we try to keep established throughout the year," with the entire State. This is the last issue of INTERCOM for the year. The next issue will appear Jan. 3.

PENN STATE intercom

Volume 3, Number 16

January 3, 1974

An internal communications medium for the ecademic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Selections made from among 31 original nominations

Six of faculty named Evan Pugh Professors under new program

Six members of the faculty have been appointed Evan Pugh Professors, effective January 1, 1974, President Oswald has announced. They are the first to be named under the new program approved by the Board of Trustees last June to replace and broaden the program of Evan Pugh Research Professorships that was initiated in 1960.

The six selected were from among 31 nominations made to a special Selection Committee which recommended ten faculty members for the President's final decision. The six are:

Dr. Vernon V. Asaturian, Evan Pugh Professor of Political Science.

Dr. John L. Lumley, Evan Pugh Professor of Aerospace Engineering.

Dr. Howard E. Morgan, Evan Pugh Professor of Physiology.

Dr. Richard R. Nelson, Evan Pugh Professor of Plant Pathology.

Dr. Philip S. Skell, Evan Pugh Professor of Chemistry.

Dr. Philip L. Walker, Evan Pugh Professor of Materials Science.

The professorships, which honor Dr. Evan Pugh, first president of the University, were granted to ten faculty members under the previous program over the period of 13 years. Four currently hold the title in addition to the six newly-appointed professors: Dr. Hans A. Panofsky, atmospheric sciences; Dr. Stuart Patton, agriculture; Dr. Erwin W. Mueller, physics; and Dr. John M. Anderson, philosophy. Drs. Panofsky and Patton were named in 1966, Mueller and Anderson in 1968.

The selection committee included, in addition to Drs. Patton, Panofsky, and Mueller, Dr. Paul T. Baker, anthropology; Dr. Barnes W. McCormick, aerospace engineering; Warren S. Smith, theatre arts; and Dr. John A. Waldhausen, surgery at the Milton S. Hershey Medical Center.

When the new program was approved by the Trustees, Dr. Russell E. Larson, Provost, explained that ultimately the number of professorships would be expanded to 15 to provide a "more realistic program for the recognition of outstanding professors."

The professors are to be selected from "candidates whose research publications or creative work or both have been of the highest quality over a period of time and further to candidates who show evidence of having contributed significantly to the education of students who later

achieve recognition, for excellence in the candidate's discipline or interdisciplinary area."

Dr. Asaturian, who is director of the Slavic and Soviet Studies Center, has been a member of the faculty since 1952, and served as visiting professor at Columbia University, U.C.L.A., the Johns Hopkins School of Advanced International Studies, the Graduate Institute of International Affairs in Geneva, and the Institute of Advanced Studies in Vienna. He is the author of "Process and Power in Soviet Foreign Policy," and is author and co-author of four other books, on Russian and European foreign policy and government. He has visited the Soviet Union and Eastern Europe on many occasions.

Dr. Lumley's field of specialization is turbulence, of a type found in fluids. He is director of the aerospace turbulence research group but is currently on leave as a Fulbright Senior Lecturer at the University of Liege, Belgium, and as a Guggenheim Fellow at the Ecole Centrale de Lyon and the University d'Aix-Marseille, France. The complexity and diversity of the field of turbulence is suggested by the fact that Dr. Lumley, with Dr. Winfried M. Phillips, assistant professor of aerospace engineering, and a graduate student, Steffen Deutsch, has been active in designing an instrument to measure the fundamental properties of particulate fluids, including blood. The National Science Foundation and the Office of Naval Research have provided funds for such projects as the study of small scale structure of atmospheric turbulence and of the phenomenon of the effect of additives in reducing drag in fluids. He is the author of "Stochastic Tools in Turbulence" and "A First Course in Turbulence." He came to Penn State in 1959 from Johns Hopkins, where he was a post-doctoral fellow for two years after receiving his Ph.D.

Dr. Morgan, one of the world's leading experts on the regulation of heart metabolism, is associate dean for research at the Hershey Medical Center. Appointed professor and chairman of the Department of Physiology in 1967, he came from the Vanderbilt University School of Medicine, where his research was concerned with the action of insulin, glucose and other hormones and chemical processes in the body. Some of his research was supported by the Howard Hughes Medical Institute,

V. V. ASATURIAN

J. L. LUMLEY

H. E. MORGAN

R. R. NELSON

P. S. SKELL

P. L. WALKER

and other studies by N.I.H. and the American Heart Association.

Dr. Nelson, editor of the recently published book, "Breeding Plants for Disease Resistance, Concepts and Applications," is known nationally for studies in genetics, the evolution of plant pathogens, disease resistance in plants, experiments with corn diseases and plant disease epidemics. A member of the faculty since 1966, he was elected a Fellow of the American Phytopathological Society in 1971 for his outstanding contributions to the science of plant pathology. He is currently on a six-month leave to do research and write, while at the University of California at Davis.

Dr. Skell is widely known for his research on the behavior of free atoms and free radicals, and for this research has had many honors, including both Guggenheim and N.S.F. post-doctoral fellowships. Not only has he trained many Ph.D. candidates but has also taught undergraduates at all

levels. A member of the faculty for 21 years, he came from the University of Portland. He is a frequent lecturer abroad as well as in this country; recently he was plenary lecturer at the Third International Symposium on Polyhalogen Compounds in Barcelona, Spain.

Dr. Philip Walker has been honored in many ways for his research on carbon, including receiving the Henry H. Storch Award of the American Chemical Society's Division of Fuel Chemistry and the George Skakel Memorial Award, an international honor given to those who have made contributions which have "significantly influenced the progress of science and technology of carbon materials." He came to Penn State in 1948 as a graduate assistant and in 1952 received his Ph.D. in fuel technology. During his tenure here he has authored more than 150 scientific and technical papers, helped to organize several significant congresses and was a national Sigma Xi lecturer.

News in brief

LONDON BUS

The guided tours of the University Park campus, which make use of the London Bus, will be carried out only on Fridays during the rest of the Winter Term and only at 12:45 p.m. The bus leaves from the HUB and makes a complete circle to the campus to point out the highlights of the campus facilities. A special guide accompanies the passengers to provide a running commentary.

PHOTOCOPY EQUIPMENT

The director of purchases, W. E. Buge, has announced a new procedure relative to the evaluation and/or purchase of photocopy equipment.

A department wishing new photocopy

equipment or an evaluation of its present equipment will contact the Purchasing Department (865-7561, Room 219 Shields). Purchasing will review the request and obtain the advice of Printing Service to evaluate the department's needs. All arrangements for demonstrations will be handled by Purchasing.

After review with the department on all aspects of the problem, a selection of the most appropriate equipment will be made to satisfy needs of the department and the University.

TRUSTEES CONFIRMED

Appointment to the Board of Trustees by Gov. Milton J. Shapp of Harry Boyer, of Reading, and re-appointment of William K. Ulerich, of Clearfield, were confirmed by the State Senate in mid-December. Ulerich was first named a trustee in 1951,

serving until 1956, and was re-appointed in 1964. Boyer, president of the Pennsylvania AFL-CIO since 1962, replaces Fletcher L. Byrom, of Pittsburgh.

TRAVEL FOLDER

A new supply of the four-page circular "Travel from Penn State" has been received and departments wishing to replenish their supply may call 865-2501 or write Dr. R. Schuckers, Room 304 Old Main. The folder describes the various methods of reaching Penn State from any direction, lists the University information telephone number, and provides other information for visitors.

AFRICAN SCULPTURES

An exhibit of African sculpture opens Sunday, Jan. 6, in Gallery A of the Museum of Art at the University. The show will

include 21 pieces selected from the Museum of Primitive Art, New York City, and the Permanent Collection of the University Museum, and from a private collection. The sculptures are primarily wood carvings ornamented with paints and other materials. Made by African tribesmen and natives, the figures are symbolic abstractions of human, animal, and mask forms. The show will continue through Feb. 3. Museum hours are noon to 5 p.m., every day but Monday.

CIVIL WAR PAPERS

James P. McNight, a 1921 graduate of the University, has presented to Pattee Library Civil War papers related to the 100th Pennsylvania "Roundhead" Regiment. The papers were collected by his

(Continued on page four)

Honors

Dr. C. Wayne Burnham, professor of geochemistry, recently assumed the presidency of the Geochemical Society, for 1974. He had previously held other posts in the society.

Paul W. E. Gehris, retired associate professor of general engineering at Berks Campus, has received the 1974 Award of Merit of the Society of Manufacturing Engineers. The award is given to recognize "the balanced contributions to the Society's professional activities and growth." The citation acknowledges Gehris' "unusual effort and dedication in service to his chapter, in adding the work of the SME National Committee and in contributing to the society's greater recognition and prestige with industry."

Leaves

Dr. Yoshio Fukuyama, professor of religious studies, is currently on a one-year leave of absence which will include seven months of service as a visiting professor of theology at The Doshisha University and as a research fellow of the Center for the Study of Japanese Religions in Kyoto, Japan. He will also do research in the humanistic and sociological dimensions of Japanese religion; he has been awarded a faculty research fellowship by the Institute for the Arts and Humanistic Studies for the purpose.

Appointments

Dr. Thomas M. Seebom, as professor of philosophy. Formerly professor at the University of Mainz, Germany, he was visiting associate professor at Penn State from 1970 to 1972 and has served as visiting professor at the University of Trier, Germany. His research has been concerned with hermeneutics, phenomenology, and the history of philosophy. His writings include two books, one on transcendental philosophy and another on hermeneutics. He is currently working on a book on logic.

Donald E. Evans, as instructor in agricultural education. He is a 1963 Penn State graduate in agricultural education and received a master of education degree in the same field. He is a D.Ed. candidate in vocational education. He has served as coordinator of the Altoona Area Vocational-Technical School and earlier had taught in the Bellwood-Antis School District and in the Upper Perkiomen district.

Dr. Stanley F. Gilman, as professor of architectural engineering. For the past two years he has served as manager of marketing, International, for American Air Filter Co., Louisville. In 1971-72, he was national president of the American Society of Heating, Refrigerating and Air Conditioning Engineers. He is a graduate of the University of Maine with a degree in mechanical engineering, and has an M.S. and Ph.D. from the University of Illinois, which has honored him with its Distinguished Alumnus award. He also taught, as assistant professor, at Illinois, and in industry has served in a variety of engineering management positions with Carrier Corp. and Climatrol Industries.

Arthur K. Anderson, Jr., as associate professor of architecture. He was a member of the faculty of the University of Miami from 1964 until coming here, serving during that period also as visiting professor at the University of Oregon. He is a 1956 graduate of Penn State, receiving an M.F.A. degree from Princeton University. He was an instructor at Penn State in 1960 and 1961, later working as a draftsman and architect with firms in Minnesota and Norway. He is the son of the late Dr. Arthur K. Anderson, professor of physiological chemistry, who served on the faculty for 32 years until his retirement in 1955.

Dr. David W. Arnett, as assistant professor of biomedical engineering. He was a post-doctoral fellow at California Institute of Technology, doing research in the neurophysiology of vision. He is a graduate of Purdue University with B.S. in electrical engineering and received an M.S. degree in biomedical engineering from the University of Pennsylvania. He received the Ph.D. degree from Cal Tech.

Program began with life insurance 42 years ago

Fringe benefits costs now total \$21 million annually

Fringe benefits, often forgotten until a large hospital bill arises or until children enroll at the University, represent a sizeable salary supplement for University faculty and staff members. They also are a major and growing item in the University budget.

This has not always been so. As a few of the more senior members of the University community will recall, in the early 'thirties there were no fringe benefits.

On April 1, 1932, a new group life insurance program for all full-time employees was announced, and the University was embarked on a long-term commitment to develop a socially responsible fringe benefits program.

Today, many would be hard put to list all the fringe benefits which have become so much a part of the employment picture. In addition to life insurance, retirement, and hospitalization, fringe benefits now properly include major medical insurance, accidental death insurance, social security, workmen's compensation insurance, educational privileges, dependent grants-in-aid, and various policies providing for vacation, sick leave, and other time off.

To carry out this program, the direct benefits costs to the University will total \$21.1 million this year; ten years ago, the cost was less than one-tenth that amount. This article, and others to follow, will examine the total benefits program, answering some questions you may already have raised, adding information that you may have known once but have since forgotten, and, it is hoped, providing an overall picture of how the University and faculty and staff members are working together to provide one of the outstanding benefits programs among the nation's educational institutions.

Rising Social Security Costs

One of the most important Federally-mandated fringe benefits is Social Security (Old Age and Survivors Insurance). In 1963-64, faculty and staff members and

the University each paid into the system at the rate of 3.625 per cent on all earnings up to \$4,800, or a maximum of \$174 each. The earnings base has been increased to \$13,200 for 1974 and will go even higher in future years. At the \$13,200 level, the contribution will be \$772.20 each for individuals at that salary level or above. The University will contribute an equal amount.

In total, the cost to the University for social security participation has risen from \$300,000 to approximately \$6.5 million since 1963-64. This is one of the "mandated" cost increases in the employee benefits program that result from changes or additions to the Federal law.

State Retirement

Most faculty and staff are members of the State Employees Retirement System and make contributions to the System at the rate of five per cent of their salary. The University also contributes to it, but at a rate that has been increasing in the last few years, from six per cent in 1971-72, to seven per cent in 1972-73, and eight per cent in 1973-74. Prior to 1971-72, "employees'" share of SERS was paid directly by the State and was not part of the University budget.

In the past decade, while retirement benefits have improved for many persons, the contributing rate for the individual in most cases has gone down (although the gross amount is larger because salaries have increased in the same period).

Group Insurance

The hospital and medical expense plan (UNICARE) and life insurance are examples of employee-employer financed programs. In the past decade, all have undergone significant changes to improve their relative value to the employee and/or his dependents. There have also been reductions in cost to the employee in that period.

For example, ten years ago the cost of hospitalization to the employee with full

family coverage was \$9.05 per month; it is now \$5.00 per month. The employee, insuring only himself under the plan, formerly contributed \$3.05 per month; now the University bears the full cost. As a result, the University is paying more of the shared cost and has also absorbed 100% of the increased premium costs charged by the insurance company. During the past ten years, the allowable benefits for various hospital and surgical charges have increased greatly. In 1963, allowing for daily room and board during hospital confinement was \$3. Today, under UNICARE, the first \$2,000 of hospital costs is covered completely, so for most illnesses, requiring hospital confinement, the employee's hospital charges are paid in full.

Under Major Medical, the total allowable lifetime benefit has been increased to \$100,000 (in 1963, the amount was only \$10,000) and changes in the rules make it now easier to qualify for a major medical benefit.

The amount of life insurance a faculty or staff member carries depends on his or her salary. The first \$3,000 of life insurance is provided entirely by the University at no cost to the employee (this provision was instituted in 1970).

The life insurance policy contains two provisions in addition to the normal death benefit: an accidental death and dismemberment provision which pays double the face amount of the policy in the event of accidental death and payment of up to \$20,000 in the event of a total and permanent disability.

Some idea of the costs involved in these insurance programs can be gained from these statistics: Group Hospitalization costs paid by the University have increased from \$1,151,967 in 1969-70 to \$3,233,681 in 1972-73; Group Life Insurance costs have risen from \$62,447 in 1969-70 to \$345,022 in 1972-73.

Workmen's Compensation and Unemployment Insurance

The University has, as required by state law, carried Workmen's Compensation Insurance for many years. The costs to the University depend on the gross salary payroll and the lost-time accident experience charges varying considerably from year to year. From the University's budget position, the increase in the total payroll has required an increase in Workmen's Compensation insurance costs from about \$53,500 in 1963-64 to about \$200,000 now.

On the other hand, Unemployment Compensation is a new program, mandated only two years ago when Federal legislation extended coverage to colleges and universities. During the fiscal years 1972-73, total of \$168,330.90 was paid out in claims and it appears that the amount in 1973-74 will be twice that amount.

Other Benefits

The benefits programs noted above all have quantitative and measurable effects on the University's budget; other programs involve costs that are not so easy to decipher.

For example, educational benefits for employees and dependents have undergone important changes in the last decade that are today taken for granted. The dependents of a deceased employee may continue to receive the dependent grant-in-aid benefit if enrolled at the University at a time period based on the employee's length of service prior to death.

Another change in the educational program provides partial tuition reimbursement for faculty and staff members located away from University Park who attend other institutions within reasonable commuting distance. These persons thereby receive educational benefits similar to those available to faculty and staff at University Park.

Other benefits changes in recent years have been made in vacation and sick leave, holidays, time off for death in family, and other policies related to personnel time off, all of which have added to University's costs in the overall.

All these benefits will be discussed in more detail in subsequent articles, with the purpose of answering some of the questions most frequently asked about the benefits.

In writing

Pennsylvanians could use some "consciousness raising" when it comes to their State heritage, says Dr. Philip S. Klein, professor emeritus of American history and co-author of the recent book, "A History of Pennsylvania."

The work, published by McGraw-Hill, Inc., was written with Dr. Ari Hoogenboom, a former Penn State faculty member now at Bryn Mawr College.

"Ask a Texan where he comes from, and he'll almost always say 'Texas,'" Dr. Klein continues. "But a Pennsylvanian is more likely to respond with the name of his home town."

In preparing their history of the Commonwealth, Dr. Klein and Dr. Hoogenboom drew on research contained in more than 500 unpublished doctoral theses written during the past decade. This hitherto unavailable information both confirms and changes some prior ideas people have held about Pennsylvania history.

"It confirms," Dr. Klein explains, "that the State is extremely diverse in its peoples, resources, and geography. It's a microcosm of a little of everything. It's also been a very democratic state in that pressures from its citizens are responded to quickly by the government."

"For its part, the Legislature, ever since early Colonial times, has always been able to hold a hammer over the Governor by refusing to supply tax funds, and this situation exists today."

The new research has affected the cherished concept of Pennsylvania as a melting pot for immigrants to this country, according to Dr. Klein. Within Pennsylvania at least, various ethnic groups have re-

tained their European traditions and associations, with the blessings of the State.

Again, while Pennsylvania has always been thought of as a one-party state — Democratic before the Civil War, Republican afterwards — the two professors found that because of local fragmentation, even the parties that succeeded were never certain of election.

"Boss rule existed, but it was never as firm as historians have assumed it to be," Dr. Klein continues. "The bosses continually had to compromise, and although they usually carried the day, the outcome was never a walk-off."

"Citizens who know their state's history feel part of an enterprise, that they share something with a group," Dr. Klein points out. "Part of the reason for our present tax picture is lack of identity."

"If your club or family asks you to contribute something to them, chances are you'll do it gladly. But when some group for which you have no feeling of belonging asks for money, you're probably going to be irritated."

"To be of real use in the national scene, a state must give its citizens a sense of belonging," Dr. Klein concludes, "and here is where a knowledge of history helps. A community, after all, is a collection of memories of its past. A knowledge of our history can help create the cohesiveness we need."

"Involvement in Sport: A Somatopsychic Rationale for Physical Activity," is a new book by Dr. Dorothy V. Harris, professor of physical education, published by Lea and Febiger, of Philadelphia. The positive influence sport may have on the psychological well-being and behavior of the individual is examined in the book, which is expected to be of interest to physical educators, students of physical education, and psychologists. Chapter headings include motivational factors influencing physical activity; aggression and sport, femininity and athletic involvement; and personality and involvement in physical activity.

Vol. 3, No. 16
January 3, 1974
Penn State INTERCOM is a weekly publication for the academic community of the Pennsylvania State University, published each Thursday. It contains news, news items, general information and items for the calendar should be sent to the editor by Tuesday of the week preceding publication date, Room 315 Old Main.
Editor: W. F. Ackerman Phone 865-5717

University Calendar

January 3-13, 1974

Special Events

Friday, Jan. 4 — Sports: Wrestling, vs. Yale, 8 p.m. Rec Hall.
Friday, Jan. 5 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Saturday, Jan. 5 — Artists Series, Tokyo String Quartet, 8:30 p.m., Schwab.
Saturday, Jan. 5 — Sports: Men's Gymnastics, vs. Springfield, 8 p.m.; Rec Hall; Wrestling, vs. Springfield, 2:30 p.m., Rec Hall.
Sunday, Jan. 6 — Black Christian Fellowship service, 11 a.m., Black Cultural Center.
Sunday, Jan. 6 — Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Mac Sadorris, Methodist Campus Minister.
Sunday, Jan. 6 — Bruce Cockpock, cello, Teri Gemberling, piano, recital, 3 p.m., Music Bldg. recital hall.

Seminars

Thursday, Jan. 3 — Remote Sensing, 1 p.m., Room 225 Electrical Engineering West, L. E. Link, Jr., civil engineering graduate student, on "Remote Sensing Systems and their Application."
Thursday, Jan. 3 — Agronomy, 3:55 p.m., Room 301 Agri. Adm., Yankovich and P. Fletcher, on "Suitability of Flood Plain Soils for Sewage Disposal."
Thursday, Jan. 3 — Chemistry, 12:45 p.m., Room 310 Whitmore, Wayne Burnham, on "Thermodynamics of Silicate Melt-Water Systems."
Thursday, Jan. 3 — Physics, 3:35 p.m., Room 117 Osmond, John A. Tyson, Bell Telephone Laboratories, New Jersey, on "The Search for Weber Pulses: Bursts of Gravitational Radiation."

Films

Friday-Saturday, Jan. 4-5 — U.S.G., "Classic Shorts," 7:30 and 10 p.m., HUB ballroom.
Friday-Sunday, Jan. 4-6 — Centre Halls, "King Kong," 7:30 and 10 p.m., Room 102 Forum.
Wednesday, Jan. 9 — Commonsplace Theatre, "Yankee Doodle Dandy," 8 and 10 p.m., Room 102 Kern.
Thursday-Sunday, Jan. 10-13 — Arnold Air Society, "Super Fly," 7 and 9 p.m., Room 105 Forum.
Thursday-Sunday, Jan. 10-13 — Centre Halls, "Frigid Warm Connection," 7:30 and 10 p.m., Room 102 Forum.
Friday-Sunday, Jan. 11-13 — North Halls, "Two People," 7:30 and 9:30 p.m., Room 105 Forum.
Saturday, Jan. 12 — Free-U children's films, "Fun and Fancy Free," (Wall Disney) 12:30 and 2:30 p.m., HUB assembly room.

Funding Opportunities

For more information, call 865-1372 except where noted below, and refer to the item by its number and the general information provided. People with grants information for dissemination in this column should call the same number.

JANUARY 3, 1974
 (110-1) Studies and Experimental Projects Directed Toward Increasing the Participation of Ethnic Minority Group Members in Careers in Science are being supported by the National Science Foundation. The program seeks to identify and demonstrate effective models that increase participation. Preliminary proposals are required and must be submitted by Jan. 15, 1974.
 (110-2) The National Science Foundation is supporting Studies and Experimental Projects Directed Toward Increasing the Participation of Women in Science Careers. Studies should seek to identify and/or understand existing barriers to participation by women, or programs that promise to remove the barriers. Experimental projects should be aimed at either students at high school or above or the undergraduate level. Preliminary proposals are required and must be submitted by Jan. 20, 1974.
 (110-3) The National Endowment for the Arts has issued Fiscal 1975 guidelines and established the following application deadlines under the NEA Museum Program: Feb. 4, 1975 — museum purchase plan, aid to special exhibitions, festivals, etc. the field, fellowships for museum professionals, etc. . . . June 14, 1974 — museum collections, catalogue . . . June 14, 1974 — museum training, conservation, renovation Feb. 1, 1975 — availability of museums, research grants No deadline — visiting scientists and groups All programs except guidelines are funded on a rolling basis. Guidelines are available. NEA Contact for information

Sunday, Jan. 6 — PSU Sport Parachute Club Paraskaling, 9 a.m., Stone Valley.
Monday, Jan. 7 — League of Oriental Karate, 7-8 p.m., HUB ballroom, Demonstration-Lecture.
Tuesday, Jan. 8 — Hill Foundation, 7-8 p.m., HUB assembly room. Film on Israel.
Wednesday, Jan. 9 — Artists Series, The Films of Luis Bunuel, "Un Chien Andalou," and "Simon of the Desert," 8:30 p.m., Schwab.
Wednesday, Jan. 9 — Thalia Trio, 8:30 p.m., Music Bldg. recital hall.
Wednesday, Jan. 9 — Phi Mu Alpha noon-time concert, 12 noon, Kern lobby.
Thursday, Jan. 10 — Sports Wrestling, vs. Oklahoma, 8 p.m., Rec Hall.
Friday, Jan. 11 — Artists Series, "The Prisoner of Second Avenue," 5:30 and 9:30 p.m., Schwab.

Thursday, Jan. 3 — Meteorology, 3:55 p.m., Room 26 Mineral Sciences, Dr. Richard Cadie, Visiting Professor, National Center for Atmospheric Research, Boulder, on "Recent Studies of Stratospheric Sulfur Layer."
Monday, Jan. 7 — Plant Pathology, 9:45 a.m., Room 22 Buckout, Dr. James Tammen, on "Extension Plant Pathology Now and in the Future."
Monday, Jan. 7 — Entomology, 4 p.m., Room 215 Armsby, Finley Negley, Carl, and Albert Wheeler, Bureau of Plant Industry, Pa. Dept. of Agriculture, on "Entomology Philosophy and Programs in the Pennsylvania Department of Agriculture."
Tuesday, Jan. 8 — Chemical Engineering, 8:50 p.m., Room 140 Fenske, J. L. Katz,

Meetings

Tuesday, Jan. 8 — University Faculty Senate, 2:10 p.m., Room 112 Kern.

Exhibits

Museum of Art — Selections from the Permanent Collection, Galleries B, African Sculpture, from G. B. Gallery A.
Zoiler Gallery — Special projects by Art 411 graduate students.
Kern Gallery — Western State College of Colorado Faculty Art Exhibition. David Tail, photography.

Clarkson College of Technology, on "Homogeneous Nucleation,"
Tuesday, Jan. 8 — Solid State Physics, 1 p.m., Room 445 Cavey, Professor G. Barsch, on "Empirical Facts and Phenomenological Theory of Superconductivity," (second of two talks).
Wednesday, Jan. 9 — Analytical Chemistry, 8:30 a.m., Room 310 Whitmore, Dr. C. David McGlothlin, on "Wavelength-Dependent Luminescence Spectroscopy."
Wednesday, Jan. 9 — Biochemistry, 4 p.m., Room 101 Althouse, P. Casceri, on "Equilibrium of Hemoglobin with Oxygen."
Thursday, Jan. 9 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. W. Busscher, et al., on "Gaining Perspective Through Field Trips."

Friday, Jan. 11 — Campus 4-H Square Dance, 8-11 p.m., HUB ballroom.
Friday, Jan. 11 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Saturday, Jan. 12 — Sports: Women's Rifle, vs. Youngstown State, 9 a.m.
Saturday, Jan. 12 — Free-U Jammy, 7:30-11:30 p.m., HUB ballroom.
Sunday, Jan. 13 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Sunday, Jan. 13 — Chapel Service, 11 a.m., Music Bldg. recital hall. Rev. James O. Stallings, Executive Secretary, N.A.A.C.P., Cleveland, Ohio.
Sunday, Jan. 13 — PSU Sport Parachute Club Paraskaling, 9 a.m., Stone Valley.
Sunday, Jan. 13 — Alpha Chi Omega Sorority, "Greek Sing," 2-4 p.m., Schwab. Benefit.

Clarkson College of Technology, on "Homogeneous Nucleation,"
Tuesday, Jan. 8 — Solid State Physics, 1 p.m., Room 445 Cavey, Professor G. Barsch, on "Empirical Facts and Phenomenological Theory of Superconductivity," (second of two talks).
Wednesday, Jan. 9 — Analytical Chemistry, 8:30 a.m., Room 310 Whitmore, Dr. C. David McGlothlin, on "Wavelength-Dependent Luminescence Spectroscopy."
Wednesday, Jan. 9 — Biochemistry, 4 p.m., Room 101 Althouse, P. Casceri, on "Equilibrium of Hemoglobin with Oxygen."
Thursday, Jan. 9 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. W. Busscher, et al., on "Gaining Perspective Through Field Trips."

WPSX highlights

"A College Education: For The Many or Few?" is the subject of debate on "The Advocates" Thursday, Jan. 3, at 8:00 p.m. on WPSX-TV, Channel 3. Advocate Colette Manoil says that more technical schools, community colleges, and training programs are needed and that graduates of liberal arts colleges are often disappointed because they cannot find well-paying jobs. Opposition advocate John Burgess says that liberal arts education has never meant to guarantee wealth or jobs, but to produce more well-rounded individuals, of which he says we need more.
 Raymond Page, assistant professor of music at Penn State, is featured on "Music at Penn State" Sunday, Jan. 6, at 8:00 p.m. on WPSX-TV. The half-hour concert includes J. S. Bach's Sonata no. 5 for violin,

Official

Thursday, Jan. 3 — Classes resume, 8 a.m.
Wednesday-Friday, Jan. 9-11 — File for Passes, Feb. 1974.
Wednesday-Friday, Jan. 9-11 — Deadline for filing Course Repeat option.
Friday, Jan. 11 — Deadline for filing Course Drops.
Friday, Jan. 11 — Preregistration deadline.

Thursday, Jan. 10 — Mining Engineering, 4 p.m., Room 302 Mineral Industries. A. B. Opperman, E.I. du Pont de Nemours, on "Recent Development in Explosives."
Thursday, Jan. 10 — Chemistry, 12:45 p.m., Room 310 Whitmore, Charles F. Hamer, Georgetown University, on "The Derived Matrix Technique: A New General Spectroscopic Method for the Quantitative Determination of Complex Mixtures."
Thursday, Jan. 10 — Physics, 3:35 p.m., Room 117 Osmond, Edward A. Fagen, Energy Conversion Devices, Inc., Troy, Michigan, on "Recent Developments in Amorphous Semiconductors."

harpischord, and viola de gamba; and Max Rogers' Suite no. 1 for solo viola. Page is accompanied on the Bach section by June Miller, assistant professor of music. The concert may also be seen Monday, Jan. 7, at 10:30 p.m.
 "Religious America," a thirteen-part series that samples the variety of religious experience in America, premieres Sunday at 8:30 p.m. on Channel 3, with a visit to a Pentacostal church service in California. Each program in the series will focus on an example of how Americans express their spiritual values.
 Robert L. Butler, director of the Cooperative Fisheries Unit, and a professional wood sculptor, hosts "Chips of Time," a non-credit television course beginning Tuesday at 7:30 p.m. on WPSX-TV, and may also be seen Saturdays at 6 p.m. and Mondays at 10:30 p.m.

(110-12) Grants of up to \$1000 for scientific investigation in any field are awarded by the Society of the Sigma Xi. Funds may not be used for tuition or stipend reimbursement. Application forms are available in Room 317, Kern Graduate Bldg. or from Sigma Xi National Headquarters, 155 Whitney Ave., New Haven, Conn. 06510.

(110-13) Funds for predoctoral internships and post doctoral fellowships in clinical psychology are available for U.S. citizens. Predoctoral fellowships must be U.S. citizens; stipends range from \$5004-\$7064 per year. Meals are provided. For further information and application forms write to: American Psychological Association, 11 Dupont Circle, N.W., Washington, D.C. 20036.

(110-14) Postdoctoral researchers in the sciences and humanities who are under 28 years of age may apply for fellowships to the Von Humboldt Foundation, Q53 Bonn-Bad 208berg, Schillerstrasse 12, Germany. Applicants should be engaged in university work and have a history of publications. Stipends are 1600-1800 marks/month. There is no application deadline for the 400 annual 6-12 month awards.

REMINERS — DEADLINE OCTOBER
 Jan. 15 for NSF Educational High School Student Project Activity (Oec. 13 INTERCOM #109-1) Jan. 22 for NSF Service Outreach in Metropolitan Areas (Nov. 8 INTERCOM #704-1) Jan. 24 for NSF Local Government Management research (Nov. 22 INTERCOM #105-4) Reminder — NSF Alternatives in Higher Education Program, Educational Planning Restructuring Council (Nov. 15 INTERCOM #705-1 and Nov. 22 INTERCOM #105-4)

Artists Series has films, play, concert

Tickets are on sale today (Thursday, Jan. 3) for the performance Saturday (Jan. 5) by the Tokyo String Quartet at 8:30 p.m. in Schwab Auditorium, the first of several Artists Series programs in early January.

Opening Wednesday, Jan. 9, is a series of Luis Bunuel films to be shown on consecutive Wednesdays until Feb. 20 and with a final film April 3. The first program in the series will include the 1928 film, "An Andalusian Dog" ("Un Chien Andalou") and "Simulacrum of the Desert." The film "Los Olvidados," about a brutal gang of Mexican youths, is the feature Wednesday, Jan. 16.

On Friday, January 11, two performances of the Neil Simon hit play, "The Prisoner of Second Avenue," will be staged in Schwab Auditorium starring Imogene Coca and King Donovan. The performances are at 5:30 and 9:30 p.m.

Tickets for the Bunuel films will be sold at the door in each case (the showings are at 8:30 p.m.). Tickets for the Neil Simon drama are in go on sale to the general public Wednesday, Jan. 9, and to students Tuesday, Jan. 8, in the HUB.

The Tokyo quartet, praised highly by Donal Henahan, New York Times critic, following a performance in November, will perform the Haydn quartet in E-flat major, Op. No. 50, 1; the Bartok Quartet No. 6; and the Beethoven Quartet in E-flat major.

Two music events next week

Bruce Coppock, cellist, a student at the New England Conservatory of Music, and Teri Gemberling, pianist, a June graduate of Penn State and part-time instructor of piano, will present a joint recital Sunday, January 6, at 3 p.m. in the Music Building recital hall.

The program will include works by Brahms, Beethoven, and Copeland, concluding with an unaccompanied cello piece by Gunther Schuller, head of the New England Conservatory.

Wednesday, Jan. 9, at 8:30 p.m. in the Music Building recital hall, the Thalia

Trío will perform Beethoven's "Fourteen Variations for Trío," Mendelssohn's "Trío in C minor," and Brahms's "Five Brief Pieces for Trío." Martin is the ex-patriate Czech composer who came to this country in 1941 and lived here until his death in 1959. The Mendelssohn piece was composed just after he converted to Christianity, and the music reflects his interest in the 14th, 15th and 16th century hymns.

The Thalia Trío is composed of Joanne Zagst, violin; Leonard Feldman, cello; and Robert Baisley, piano.

French publication seeks manuscripts

Articles on French language, literature, culture and comparative studies are being solicited by the editors of "Les Bonnes Feuilles," the literary review published twice yearly by graduate students in the department of French. Additional subscriptions are also being sought.

The editorial staff currently for the publication includes Paul R. Bernard, editor-in-chief; Allan Manning and Fakhri Grine, associate editors; and Drs. David L. Anderson, Isabelle Armitage, and Glenn P. Norton as advisory board members.

Subscriptions may be obtained at \$4 for four issues; single copies are \$1.25. The current issue of "Les Bonnes Feuilles" includes a creative prose piece on Andre Gide, an article on Marguerite Yourcenar, "Moderate Centuries" a study on the structure and composition in a novel of Sade; and a comparative study of two African authors. It also includes two poems and a bibliography.

Manuscripts, in duplicate, should be addressed to the Editor, Les Bonnes Feuilles, Room 5401 Burrows Building.

In chemistry or equivalent and up to one year of effective experience. Experience with an atomic absorption spectrophotometer is desirable.

COUNSELOR CAREER DEVELOPMENT AND PLACEMENT CENTER McKeesport Campus

Responsible for individual and group counseling focusing primarily on educational/vocational concerns; assisting with preemployment testing and counseling program; provide consultation to Campus Community. Master's degree in Clinical Psychology or Counseling or equivalent. Counselor Education or related area and a minimum of three years applicable experience are preferred.

PERSONNEL ASSISTANT PERSONNEL ADMINISTRATION University Park

Responsible for selection and placement of employees for technical-service positions. Interview applicants and refer suitable applicants to departments for consideration. Bachelor's degree or equivalent with at least two years of administrative experience.

LIBRARY ASSISTANT — CCL CATALOGING UNIVERSITY LIBRARIES University Park

Responsible for cataloging publications and adapting them to CCL Cataloging System to provide central cataloging service to Commonwealth Campus Libraries. Bachelor's degree or its equivalent with a reading knowledge of at least one foreign language and a minimum of nine months effective experience.

FINANCIAL AID COUNSELOR OFFICE OF STUDENT AID University Park

Responsible to the Director of Student Aid for administration of the financial aid program. This involves counseling of students, interpretation of guidelines and regulations, and some supervision of clerical staff. Minimum qualifications are a Bachelor's degree or equivalent, in Student Personnel Work, Higher Education, or Social Sciences with one to three years of effective experience.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

Applications for positions are considered without regard to race, color, creed, sex, or national origin.

Bus Ad students to enroll at ESAN

Foreign studies program in Peru added

A new program of study in Lima, Peru, has been approved for students majoring in business administration.

The first group of 20 students will study during the Spring Term at the Escuela de Administracion de Negocios para Graduados, (ESAN), according to Dr. Eugene J. Kelley, dean of the College of Business Administration, which is sponsoring the program under the framework of the University's Foreign Studies Program.

The new program brings to ten the number of countries in which Penn State students study abroad either in areas of general studies or in specialized fields such as architecture, art, education, landscape architecture, mass communications, and practice teaching, in addition to business. The Foreign Studies Program, which since

its inception has been directed by Dr. Dagoberto de Laube, is entering into its 13th year of operation.

At ESAN, the students will enroll in courses in business administration, international business, and economics taught by ESAN faculty members.

One of the advantages of studying in Peru, says Dr. Kelley, is that there will be an increasing demand for business majors who understand the problems of South America commerce and industry.

ESAN, although relatively new, is considered the leading institution for business management and administration programs in the Andean Bloc of nations.

Penn State also has established programs of research, faculty and student exchange and executive development with ESAN.

Dialogues on university values planned

"Two Cultures Dialogue" during the Winter and Spring Terms, will give attention to the area of "Values in American Higher Education" on the premise every university faces the crucial issue of the purpose of its existence and that students are asking the deeper questions of the underlying moral, ethical and spiritual values of a vocation or profession.

The monthly "Dialogues" represent an effort to bridge the divisions separating colleges, department and units, faculty and administrators, through discussions of issues of mutual interest. All faculty and administrative staff members are welcome. The sessions are held in Room 189 Materials Research Laboratory (east campus) with a bag lunch at noon, followed at 12:30 p.m. by talks and open discussion.

For the two terms, the topics and lead-off speakers are the following:

At Delaware County Campus

Meanings of death course to be offered

When students in the beginning psychology course are assigned an open choice term paper, nearly half choose to research and write about suicide.

Suicide and other forms of death are also the topics selected most often for papers written in a course in social problems.

Because of this apparent fascination with death among college students in their classes, two instructors at the Delaware County Campus have developed a new experimental course to be taught at the campus in the Spring Term. The course is entitled "The Meanings of Death."

Kenneth Kinman, assistant professor of sociology and Judith B. Davis, assistant professor of psychology, independently noted the interest in death, particularly suicide, among the students in their classes. Comparing notes, they decided to pool resources and write a course focusing on all aspects of the psychology and the sociology of death.

"Suicide is second only to traffic accidents as the major cause of death among people between the ages of 15 and 24," Davis said. "In our course, we don't know how many deaths officially attributed to single-car accidents and accidental overdose of drugs are actually suicides."

The course will be team-taught by Kinman and Davis and will study death in all its forms from both the individual and societal aspects. Some of the topics to be covered are the preparation for and attitudes toward death among elderly people; death, especially suicide and murder; death as treated in literature and art; euthanasia; death in the family; and the institution of the funeral.

A comparison of death in the United States as compared to how death is viewed in "death-oriented" cultures will also be included.

Students will be asked to write several papers on various topics dealing with death and each will be assigned a special field project. Among the suggested areas of research will be interviews with nursing home personnel regarding the feelings toward death among the aging, and interviews with medical school students regard-

ing what preparation, if any, doctors receive for dealing with death.

"The course is not meant to be therapeutic in terms of assuring people the death is nothing to worry about," Kinman said. "Rather, we hope that by taking the course, students will be able to face more realistically the idea of mortality and will recognize that death is part of living."

Kinman also noted a growing interest in thanatology, the study of death, among sociologists and increased emphasis on the subject in psychology and sociology classes on the college level.

Davis points out that in one branch of psychiatry, the existential therapist treats patients with the viewpoint that the basic fear of death is at the core of most of man's anxieties.

late aunt, Dr. M. Gyla McDowell, who was chairman of the department of English at Geneva College. During and after the war, Dr. Silvia Stevenson, the regimental surgeon, began the collection, and Dr. McDowell continued the work in the decades following the war. About 20 cartons of materials — correspondence, memoirs, manuscript photographs, and pamphlets — were given to the Library. Included was Dr. McDowell's unpublished manuscript of the history of the regiment. Born in 1898, Dr. McDowell died in 1965. Dr. Warren Hassler, professor of American history, negotiated the acquisition of the papers, which are now in the Rare Books Room.

PHOTO HISTORY COURSE

The Department of Art History will be offering a course on the History of Photography during the Spring 1974 term. It will deal with the invention of photography, its influence on journalism and science, the development of photographic styles and the mutual interaction between photography and painting. The course will again be taught by Dr. H. K. Henschel, who has a background in photography. Henschel will retain his concurrent appointments and responsibilities in the Department of Physics and the Materials Research Laboratory.

Staff vacancies

To make application for the vacancies listed below, call 855-1387 (Network 475-1387) no later than:

5 P.M., THURSDAY, JANUARY 10, 1974

SUPERVISOR, ATHLETIC AND RECREATION OPERATIONS

Opportunities for providing and supervising employee services for instruction, intramural, and recreation programs; coordinating publicly and sports information; preparation and set up for athletic, recreation, special, etc., events; coordinating travel; laundry services; dealing with organizations associated with the programs; etc. Associate degree in Recreation and Parks or equivalent in two years of college level training, plus over two years up to and including four years of effective experience.

MANAGER OF HOUSEKEEPING

Responsible for planning, coordinating, reviewing and insuring the efficient operation of the housekeeping services, to include the establishment of various standards such as cleanliness, employee performance, etc. Bachelor's degree or equivalent, plus experience with courses or equivalent in two years up to five years of effective experience in Managing Housekeeping Facilities in a large institution.

BUDGET ACCOUNTANT

Responsible for initiation and implementation of bi-annual control procedures and the preparation of budgets, cost, and analytical reports pertaining to the hospital. Bachelor's degree or equivalent in Accounting plus two to four years effective experience. Hospital experience preferred.

RESEARCH AIDE

College of Agriculture University Park
Responsible for assistance with the conduct of chemical analyses and greenhouse and field experiments. Bachelor's degree with several courses

PENN STATE intercom

News in brief

ALTOONA EXHIBIT

A one-man exhibit of the works of Windsor Cousins, currently a graduate assistant in art history, is featured in the Iydsdale Gallery at the Altoona Campus. The show will remain until Jan. 26. Cousins, a graduate of Princeton University, studied in France for six years, and his art has been exhibited at the Musée d'Art Moderne de Paris. From 1963 to 1971 he lived in Venice, lecturing to American students on Venetian art and architecture. Cousins will lecture at the Gallery Sunday, Jan. 26, at 4 p.m., when a reception will be held for him.

GETS AWARD

Dr. James L. Knestrick, assistant professor of social science and psychology at the Capitol Campus, received an award at the campus commencement exercises in December, just six months after he was

scheduled to receive it. The James A. Jordan Award for Teaching Excellence was to have been presented at the June Commencement exercises, but bad weather shortened the program and Dr. Knestrick had to wait for the honor, which is presented annually to a faculty member for effective teaching, enthusiasm and sincere interest in accomplishing good teaching results.

ART STORE BARGAINS

Reduced prices on all Christmas cards in stock and 1974 calendars are being offered at the Museum of Art store. The items are available at 25 per cent below list price but only limited quantities are available.

EXHIBIT

"Emblems of Seduction," an exhibit of old and new emblems from 16th, 17th, and 18th century books and from modern television, will open on Jan. 14 in the Zoller Gallery, Visual Arts Bldg.

The exhibit includes the display of many of the actual old texts on loan from the

Penn State Room in Pattee and a videotape show of about 100 emblems. It illustrates the symbolic representation of visual-verbal proverbs, according to exhibit organizer William Kinser, an instructor in the Department of Art.

As these emblems symbolically translate the folk wisdom of the age and culture from which they emerged and as the artists who created them shared the concerns of the writers whose texts they accompany, Kinser explained, the exhibit is a display of popular art which functions as a behavior guide in a given culture.

The videotapes will be shown daily in the gallery, from 1 to 4 p.m. weekdays and from noon to 5 p.m. weekends. Gallery hours are 8 a.m. to 5 p.m. Monday through Friday; noon to 5 p.m. Saturday and Sunday. "Emblems of Seduction" will continue in the Zoller Gallery through Jan. 26.

BOOK HONORED

The book, "Eight Thirteenth-Century Rolls of Arms in French and Anglo-Norman Bilingual," by Dr. J. H. Hill, is the recipient of the 1973-74 award for best book in the field of medieval history.

(Continued on page four)

Deadlines near for fellowships

The following information concerning Graduate School Fellowships has been provided by Dr. Benjamin F. Howell, Jr., associate dean of the Graduate School.

1. The deadlines for submitting applications for the approximately 30-40 Graduate School Fellowships for 1974-75 is February 4 for students currently enrolled as a graduate student at Penn State and February 19 for incoming students. The complete application must reach 317 Korn Graduate Building by these dates for the student to be eligible for an award.
2. Each applicant must be nominated by his Penn State graduate major. Provision for this nomination is made on page 4 of the application. No application will be considered until page 4 of the application has been completed and signed by the person in charge of the major.
3. Each major may nominate no more than three incoming and three already enrolled applicants. If more nominees are received, those first received will be considered and subsequent applicants turned down without review of their application.

Nutrition consultation service now available

A Nutrition Consultation Service has been opened in two locations at the University to offer individual and group counseling for those wishing to adjust food intake to meet health needs.

Services of one center, located in the Myra Dock and Catherine Beecher houses, are available to University faculty and staff and Central Pennsylvania residents.

The other center, located in Room 215-B Ritenour Health Center, provides services to undergraduate and graduate stu-

dents on direct referral from a University physician or on a walk-in basis.

The service is being offered by the Nutrition Program of the College of Human Development. Both clinics are staffed by registered dietitians qualified to prescribe diets and consult on a variety of nutritional problems, including diabetes, overweight, underweight, ulcerative colitis, hypoglycemia, vegetarian diets, and the nutritional needs of pregnant women.

Students with special dietary needs must

offer written referral from a University physician, while others must provide written referral from their family physician or obstetrician. Consultation on normal nutrition problems and financial management of food does not require such referral.

The clinics are open from the second through the tenth week of each term with varying hours. Persons seeking additional information or an appointment at either center may call 665-1751 from 8:00 a.m. to 5:00 p.m. Monday through Friday.

Engineers will have bigger part

Energy crisis will affect building designs

The uncertainty of the stockmarket is minor compared to that faced by the building industry in the current energy crisis, according to C. Herbert Wheeler, professor of architectural engineering.

"If you think about it, a new building often isn't essential," Professor Wheeler says. "I visualize many buildings being stopped until the rules of the game become clearer. Until now, construction has been based on energy-wasting procedures aimed at providing a 'low first cost' building, with very little thought given to the life cycle cost of operating it."

Wheeler, who teaches the courses in professional practice and directs the seniors' projects in his department, has been asking his students to design their buildings on the basis of energy conservation.

"That means doing away with big glass walls and an end to poorly insulated walls and roofs," he explains. "Designers will have to plan air vestibules to keep building heat from escaping when outside doors are opened and utilize the heat generated by lights and people more efficiently."

"Energy conservation is going to do more to make the design professions and the construction industry build better buildings than any other situation in my lifetime. In fact, the great challenge ahead of educators like myself is to lead, by education and by research, in preparing students for a more energy-conscious society."

"In the immediate future, shortages of materials and transportation of them will be a problem. But in the distant future, I'm confident that new materials and tech-

niques will come forward to make it possible to design buildings that use less energy."

An architect by education and an engineer by experience, Wheeler believes that the time has passed when a single genius like Frank Lloyd Wright could design a building alone.

"With mechanical-electrical systems accounting for such a large share of construction costs, a building becomes an

engineering end-product," he points out. One of Wheeler's principal goals is the harmonious wedding of the capabilities of architects and engineers.

"Put up a building without an engineer, and it will probably fall down," he notes. "Build one without an architect, and you'll probably want to tear it down."

Penn State is the only university which has a department of architectural engineering offering a five-year ECPD accredited curriculum, but there is a handful of four-year schools. Many institutions backed off from the field as the result of a 1950 mid-century architectural report rejecting the concept of architectural engineering. But Wheeler profoundly disagrees with the report, and he has set out to make architectural engineering a profession.

Hailed as the nation's leading authority on architectural practice, he is a consultant to

(Continued on page four)

Sports centers directors named

Two appointments have been made of directors of specific centers within the Sports Research Institute of the College of Health, Physical Education and Recreation.

Dr. Kenneth S. Clarke, professor of health education, will be director of the Center for Health Aspects of Sport, and Dr. Dorothy V. Harris, professor of health and physical education, will serve as director of the Center for Women and Sport.

The Sports Research Institute, established in 1969 within the College, serves as an administrative structure within which research and graduate study are developed in the area. A variety of problems related to athletic performance are studied, combining the interests of persons working in the areas of physiology, biomechanics, medicine, psychology and sociology as they relate to athletic performance.

Dr. Robert J. Scannell, dean of the College and director of the Institute, says the new centers will serve to expand research interests in the areas of health and the female athlete.

Project guidelines are currently being developed by Dr. Clarke and Dr. Harris, and advisory board members for the Centers will be announced soon.

C. Herbert Wheeler

Assistant provost candidates sought

The position of assistant provost is being established in the office of University Provost Russell E. Larson to provide administrative support in matters involving faculty, academic programs, and the administration of various academic units of the University.

Specifically, Dr. Larson said, the assistant provost will assist with coordinating, supervising or monitoring such activities as academic policy, procedures and program analysis, advancing program and personnel effectiveness and efficiency in instruction, research, public service and scholarly achievement.

Further, the assistant provost will be concerned with faculty welfare, rights and responsibilities, and faculty affairs, with studies to promote and foster excellence in the academic programs of the University, and will handle such responsibilities as may be assigned.

Basic qualifications of the position include the highest degree in the discipline or professional field, recognized achievement in the field or discipline, and experience in undergraduate instruction and in the supervision of graduate student research. Preference will be given to candidates with superior professional rank and with some experience or training in academic administration.

Nominations and applications for the position should be submitted to the Office of the University Provost, 205 Old Main prior to Feb. 1, 1974.

Service Awards at ARL

Four members of the faculty who are on the staff of the Applied Research Laboratory received 25-Year Service Awards from Dr. Richard G. Cunningham, (far right) vice president for research and graduate studies, at annual Lab honors ceremonies in December. At left is Arnold Addison, Personnel Director who is also professor of industrial relations. A native of England, he came to the U.S. in 1924 and received both bachelor's and master's degrees from West Virginia University. He worked for the Federal Government and for RCA before joining the Lab staff. Second from left is Robert J. E. Herman, associate professor of engineering research, who works in the area of torpedo development and evaluation. He is a graduate of Illinois Institute of Technology,

where he taught for two years before military service. He worked for Reynolds Electric Co. before joining the staff. Edward J. Tracy, Jr., assistant professor of engineering research, was graduated by the University of Notre Dame, with a degree in chemical engineering. At the Lab he has been in charge of the chemistry laboratory and has several patents to his credit. With Dr. Cunningham in the picture is Nelson F. Wood, assistant professor of engineering research, who is one of the fluids engineering unit. He is a retired Commander in the Naval Reserve. He received a B.S. degree at Fitchburg State Teachers College and attended Columbia University's Midshipman's School. During World War II, he served as a lieutenant in the submarine service.

Deaths

Dana K. Merrill, who retired in 1955 as professor emeritus of American literature after 39 years on the faculty, died Dec. 21 at the age of 83. He was graduated from Bowdoin College in 1915 and came to the campus the following year as teaching fellow. In 1917 he received the M.A. degree from Penn State and in 1919 was named assistant professor of English literature. He became full professor in 1927 and in 1954 his title was changed to professor of American literature. He wrote the book "The Development of American Biography" and was author of various articles on American biography and the literary history of Bowdoin College.

Dr. Gerald L. Wendt, who was dean of the School of Chemistry and Physics at Penn State from 1925 to 1929, died Dec. 24-25 in New York, at the age of 82. He was head of the publications center of the United Nations Educational, Scientific, and Cultural Organization when he retired in 1967, after 15 years in the position.

Retirement

Dr. Louise Kline Kelly, senior assistant librarian and curator of the Penn State Room collection in Pattee Library, retired Dec. 31. She served on the Library staff for nearly 12 years. The widow of Dr. James P. Kelly, geneticist and botanist who retired in 1950 after serving on the

faculty for 36 years, Mrs. Kelly was at one time professor and chairman of the English department at Elizabethtown College, serving in that capacity for seven years. A graduate of Skidmore College, she earned her master's degree in English at Penn State and completed her doctorate work in 1951, majoring in American literature.

Appointments

Dr. Keith Roe, as senior assistant librarian and assistant agricultural and biological sciences librarian, effective Dec. 17. He has been serving as bibliographer for natural sciences and mathematics at St. Mary's College of Maryland. A graduate of Iowa State University, with a B.S. degree in horticulture, he earned the M.S. and Ph.D. in botany at the University of Wisconsin. He was granted an M.L.S. degree by the University of Oregon. Before entering the library profession, he was assistant professor of botany at the University of Northern Colorado.

Michael J. Smith, as research associate and manager of programming of the Library Information Access System in University Libraries. He is a Penn State graduate, with B.A. in mathematics, and received his M.A. in logic from Bucknell last month. He served as manager of the Library Information Systems Project at Bucknell and previously worked for Computer Access Corp. and HRB-Singer, both in State College.

Ellen K. Garber, assistant director of Cooperative Extension Service and associate professor of Home Economics Extension, received the 25-Year Service Award from College of Agriculture Dean James M. Beattie, with Associate Dean Thomas B. King as witness. Miss Garber's first assignment for Extension was as assistant Home Economics Extension Representative in Indiana County. In 1955 she was appointed assistant State leader and in September of last year received her present title. She is a 1940 Penn State graduate and received her Master's degree from the University of Wisconsin.

Or. Ira V. Brown (center), professor of American history, recalled some personal history when he received the 25-Year Service Award certificate from College of the Liberal Arts Dean Stanley F. Paulson. Dr. Kent Forslar, history department head, who has also received a Service Award, added to the reminiscing. Appointed to the faculty in 1947 as instructor, Dr. Brown came from Mary Baldwin College where he had served as associate professor of history. Previously he was instructor at Phillips Exeter Academy. A graduate of George Washington University, he received an M.A. degree from the University of Virginia in 1942 and M.A. from Harvard in 1943. Harvard also conferred the Ph.D. degree on him in 1946. The author of monographs and papers for the Pennsylvania Historical Association, he was also editor of the book, "Joseph Priestley: Selections from his Writings."

Funding Opportunities

For more information, call 855-1372 except where noted below, and refer to the item by its number and the general information provided. People with grant applications for distribution in this column should call the same number.

JANUARY 20, 1974

(111-1) NIE Grants for Research in Education have a January 26, 1974 prospectus deadline. The National Institute of Education will focus its research on five issues: (1) Essential skills — specialized research in learning and instruction; (2) Relevance of Education to Work — factors influencing occupational attainment and socioeconomic success; (3) Diversity, Pluralism, and Opportunity in Educational Systems — educational variability and their consequences for student learning; (4) Production and Utilization of Knowledge — examining the production of research results; and (5) Efficiency and Productivity in Education — research on improved measurements. Guidelines have been ordered for each College research dean.

(111-2) Penn State faculty and students are eligible for AEC-supported research appointments to the Argonne Center for Educational Attitudes of the Argonne National Laboratory. Research Participation Awards programs have been announced for 1974. Faculty Research Participation for the summer (limited basis for academic year) (2/1/74 deadline); Laboratory — Graduate Participation — for periods of 3 months to 1 year and extendable for doctoral participants; Thesis Parts Appointments — from a few days to 6 months; Biology Research Institute — must begin prior to 5/24/74, for 12 continuous weeks (2/1/74 deadline); Mathematics and Computer Science Research Institute — must begin prior to 6/17/74, for 12 continuous weeks (2/1/74 deadline); Materials

Science Research Institute — must begin prior to 6/17/74, for 12 continuous weeks (2/1/74 deadline). Program announcements and contracts are available.

(111-3) The National Eye Institute will award postdoctoral fellowships for full-time academic and research training in clinical and laboratory sciences related to vision. Periods are one to three years, stipends are based on years of experience in related postdoctoral research training. Application deadlines are Jan. 15 and May 1. Application material is available from Office of manpower Research, Div. of Research Grants, NIH, Bethesda, MD. 20014.

(111-4) Proposals based on an improved intermediate instructional program in one or more of the sciences through the purchase of scientific equipment will be consistent with National Science Foundation Instructional Science Equipment Program objectives. Proposals are limited to requests for funds to purchase, fabricate, or rent scientific equipment, itemized expenditures, teaching aids, reference materials, tools, and minicomputers. Limited funds (\$25 million) are available for this program. Awards will be made on a 50/50 matching basis up to \$50,000 in Federal Funds. Overmatching is allowed. Guidelines were distributed earlier; closing date for applications is Feb. 15.

(111-5) To broaden the instructional objectives of faculty and thereby improve science instruction, NSF will offer faculty the opportunity of conducting problem-oriented research for national interest in an industrial setting. Proposals for such projects of the Faculty Research Participation Program will be invited from industrial organizations, independents, and laboratories under con-

tract to government or university agencies. Information is available (pamphlet E74-17) and from Program Manager, Instructional Improvement Implementation Section, Office of Higher Education, Science, NSF, Washington, D.C. 20550 (202)282-7760. Proposal deadline is expected to be Feb. 15, 1974.

(111-6) The Oance Program of the National Endowment for the Arts announces the following program deadlines: Feb. 1, 1974 — Choreography Fellowships and Production Grants, Management and Administration, and Services to the Field — June 1, 1974 — Resident Professional Oance Companies. Grants are usually matching with the exception of five fellowships categories. Partial salary support and training support is offered under Management and Administration. In addition, projects in Dance Films and Video will be supported in FY 1975 on a pilot basis. One-page project description and budget summaries are required. General Programs are also supported by NEA where the above categories do not fit — deadlines Feb. 1 and Nov. 30, 1974. Guidelines and program descriptions are available or contact Oance Program, NEA, Washington, D.C. 20506. (202)382-8853.

(111-7) Following are notices of fellowship opportunities. For more information, write to listed addresses. (111-7) American Society for Engineering Education (c/o F. S. Bradley, Jr., Suite 400, 1 DuPont Circle, Washington, O.C. 20036) coordinates summer faculty fellowships in NASA laboratories to develop collaboration and competence in engineering systems design. Stipends are \$275-\$300/week plus a travel allowance. Application deadline is Feb. 15.

(111-8) United Nations Association of the United States of America (Bunche Fellowship Fund), 345 East 46th St., New York 10017 offers research fellowships for black Americans under 35 in international affairs and improvement of quality of life on a global basis. One-year fellowships include a stipend of \$5000. Application deadline is March 1.

(111-9) Society of Exploration Geophysicists (Scholarship Committee, P.O. Box 3088, Tulsa, 74101) offers scholarships for undergraduate and graduate students planning careers in geophysics. Application deadline is March 1.

(111-10) American Accounting Association (Attn: P. L. Gerhardt, 653 S. Orange Ave., Suite 311, 60620) offers fellowships for doctoral students accounting and related fields. Application deadline is March 1.

(111-11) American Institute of Public Administrators (Chairman, Committee on Relations with Universities, 665 5th Ave., New York 10019) offers grants for students in accounting for post-comprehensive examination dissertation research. Application deadline is March 1.

(111-12) Arthur Anderson & Co. (Attn: Claude Rodgers, 69 W. Washington, St. Paul, Minn. 55102) offers dissertation year fellowships in accounting. Application deadline is March 1.

(111-13) National Center for Community Education (Mont. Leadership Program, 1011 St. Flint, Michigan 48003) offers fellowships community education. Master's candidates must apply by 30.

(111-14) American Sociological Association (Attn: Joan Harris, 1722 N. Street, N.W., Arlington, O.C. 20036) is initiating new graduate fellowship program for ethnic studies.

University Calendar

January 10-20, 1974

Special Events

Thursday, Jan. 10 — Sports: Wrestling, vs. Oklahoma, 8 p.m., Rec Hall.
Friday, Jan. 11 — Artists Series, "The Prisoner of Second Avenue," 5:30 and 9:30 p.m., Schwab.
Friday, Jan. 11 — Campus 4-H Square Dance, 8-11 p.m., HUB ballroom.
Friday, Jan. 11 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.
Saturday, Jan. 12 — Sports: Women's Rifle, vs. Youngstown State, 9 a.m., White Bldg.
Saturday, Jan. 12 — Free-U Jammy, 7:30-11:30 p.m., HUB ballroom.
Sunday, Jan. 13 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Sunday, Jan. 13 — Chapel Service, 11 a.m., Music Bldg. recital hall, Rev. James O. Stallings, Executive Secretary, N.A.A.C.P., Cleveland, Ohio.
Sunday, Jan. 13 — PSU Sport Parachute Club Paraskating, 9 a.m., Stone Valley.
Sunday, Jan. 13 — Alpha Chi Omega Sorority, "Greek Sing," 2-4 p.m., Schwab.

Monday, Jan. 14 — Sports: Men's Basketball, vs. Princeton, 8 p.m., Rec Hall.
Monday, Jan. 14 — Coaly Society, 7-9:30 p.m., HUB assembly room.
Monday, Jan. 14 — Overda Page, lute recital, 9:30 p.m., Music Bldg. recital hall.
Wednesday, Jan. 16 — Artists Series, The Films of Bunuel, "Los Olvidados," 8:30 p.m., Schwab.
Wednesday, Jan. 16 — Sports: Men's Basketball, vs. Delaware, 8 p.m., Rec Hall.
Wednesday, Jan. 16 — Coaly Society, 7-9:30 p.m., HUB assembly room.
Wednesday, Jan. 16 — Alard String Quartet, 8:30 p.m., Music Bldg. recital hall.
Wednesday-Friday, Jan. 16-18 — 5 O'Clock Theatre, "Cowboys and Indians," by Lawrence Lebin, Wednesday and Thursday at 5:20 p.m., Friday at 7:20 p.m., Pavilion Theatre.
Friday, Jan. 18 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym. Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.
Friday, Jan. 18 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday-Sunday, Jan. 18-20 — IFC Dance Marathon, HUB ballroom.
Saturday, Jan. 19 — Penn State Singers, (An Evening of Gilbert and Sullivan), 8:30 p.m., Schwab.
Saturday, Jan. 19 — Chinese Student Association New Year Celebration, (dinner and entertainment), dinner served between 6 and 7:30 p.m., Rooms 102 and 104 Kern.
Saturday, Jan. 19 — Sports: Women's Basketball, vs. Edinboro State, 1 p.m., Men's Gymnastics, vs. Syracuse, 8 p.m., Rec Hall; Wrestling, vs. Syracuse, 2:30 p.m., Rec Hall; Men's Swimming, vs. Pittsburgh, 2 p.m.; Men's Rifle, vs. Villanova-West Virginia, Women's Fencing, vs. Ohio State, 10 a.m.
Sunday, Jan. 20 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Sunday, Jan. 20 — Chapel Service, 11 a.m., Eisenhower Chapel, Doris M. Seaward, executive assistant to the president.
Sunday, Jan. 20 — PSU Sport Parachute Club Paraskating, 9 a.m., Stone Valley.

In the current exhibit in Gallery A, Museum of Art, is this wood sculpture, "Standing Man with a Gun," from Nigeria, West Africa. The show, which continues until Feb. 3, includes 21 pieces from the Museum of Primitive Art, New York, the University's permanent collection and private collection.

Seminars

Thursday, Jan. 10 — Agronomy, 3:55 p.m., Room 301 Agri. Adm., W. Busscher, et al., on "Gaining Perspective Through Field Trials."
Thursday, Jan. 10 — Mining Engineering, 4 p.m., Room 302 Mineral Industries, A. B. Oppermann, E.I. du Pont de Nemours, on "Recent Development in Explosives."
Thursday, Jan. 10 — Chemistry, 12:45 p.m., Room 310 Whitmore. Charles F. Hammer, Georgetown University, on "The Derived Matrix Technique: A New General Spectroscopic Method for the Quantitative Determination of Complex Mixtures."
Thursday, Jan. 10 — Physics, 3:35 p.m., Room 117 Osmond, Edward A. Fagen, Energy Conversion Devices, Inc., Troy, Michigan, on "Recent Developments in Amorphous Semiconductors."

Thursday, Jan. 10 — Statistics, 4 p.m., Room 75 Willard, Leo Breiman, private consultant, on "Analyzing Finite Sample High-Dimensional Data."
Thursday, Jan. 10 — Psychology and Indiv. Fam. Studies, 8 p.m., Room 111 Chambers, Dr. Hayne Reese, West Virginia University, on "Educational Implications of Research in Mnemonics Imagery."
Friday, Jan. 11 — Microbiology, 4 p.m., Room 350 North Frear, Dr. Robert Benhr, University of Minnesota Medical School, on "Cyclic GMP and Catabolite Repression in *Bacillus*."
Friday, Jan. 11 — Population Issues Research, 2:30 p.m., Room 244 Deike, Robert H. Weller, sociology, Florida State University, Tallahassee, on "Race, Socioeconomic Status and Fertility."
Friday, Jan. 11 — "Two Cultures Dialogue," 12:30 p.m., Room 199 Materials Research Lab., G. L. Anderson and W. E. Toombs, (education), on "The Historical and Current Context."

Monday, Jan. 14 — Plant Pathology, 9:45 a.m., Room 213 Buckhout, Dr. A. A. MacNab, on "Extension Plant Pathology: Programs and Program Development for Small Fruits and Vegetables."
Tuesday, Jan. 15 — Geosciences, 4 p.m., 1 p.m., Stephen J. Gould, geology, Harvard University and The Museum of Comparative Zoology, on "Stochastic Simulations of Evolution."
Tuesday, Jan. 15 — Solid State Physics, 1 p.m., Stephen J. Davey, Barry Bouddreaux, Allied Chemicals, on "Amorphous Materials: Atomic Structure and Electric Properties of Random Networks."
Tuesday, Jan. 15 — Chemical Engineering, 3:50 p.m., Room 140 Fenske, T. Fort Jr., Carnegie-Mellon University, on "Adsorption at the Metal-Hydrocarbon Interface."
Wednesday, Jan. 16 — Analytical Chemistry, 8:30 a.m., Room 210 Whitmore, D. G. Dube, on "Lewis Base Reactions with Methylated Diboranes."

Wednesday, Jan. 16 — Biochemistry, 4 p.m., Room 101 Altohouse, T. Casceri, on "Kinetics of Oxygen Binding by Hemoglobin."
Thursday, Jan. 17 — Philosophy, 4 p.m., Room 251 Willard, Dr. J. T. Price, Tuskegee Institute, and Dr. Joseph Kochelmann, on "The Nature of Language."
Thursday, Jan. 17 — Chemistry, 12:45 p.m., Room 310 Whitmore, Barry Trost, University of Wisconsin, on "Innovations in Organic Synthesis."
Thursday, Jan. 17 — Physics, 3:35 p.m., Room 117 Osmond, James K. Watson, Ohio State University, on "Recent Developments in Theoretical Spectroscopy."
Thursday, Jan. 17 — Agronomy, 3:55 p.m., Room 301 Agri. Adm., J. H. Stern and R. Cole, on "Techniques at Rothamsted Experiment Station."

Exhibits

Museum of Art — Selections from the Permanent Collection, Gallery B, until Jan. 13. African Sculpture, Gallery A. Prints and Drawings from Central Pennsylvania Collectors, Gallery C, opening Jan. 20.
Zoller Gallery — Special projects by 41 graduate students, until Jan. 12. Emblems of Seduction, opening Jan. 12.
Kern Gallery — Western State College of Dental Faculty Art Exhibition, David Tall, photography, Christopher Weiland, pottery.
Pattee Library — Gail Anderson, water-colors, Circulation Room, until Jan. 15. Jean Furth, prints, West Pattee Lobby. Peter Kauffman, paintings, East Pattee Lobby. The Energy Crisis, display, Main Undergraduate Library. Postage Stamps from New Zealand, Main Entrance Lobby.

Films

Thursday-Sunday, Jan. 10-13 — Arnold Air Society, "Super Fly," 7 and 9 p.m., Room 105 Fern.
Thursday-Sunday, Jan. 10-13 — Centre Halls, "The French Connection," 7:30 and 10 p.m., Room 102 Fern.
Friday-Sunday, Jan. 11-13 — North Halls, "Two People," 7:30 and 9:30 p.m., Room 108 Fern.
Saturday, Jan. 12 — Free-U children's films, "Fun and Fancy Free," (Walt Disney), 12:30 and 2:30 p.m., HUB assembly room.
Wednesday, Jan. 16 — Commonsplace Theatre, "Sahara," 8 and 10 p.m., Room 112 Kern.
Thursday-Sunday, Jan. 17-20 — Arnold Air Society, "Fritz the Cat," 7 and 9 p.m., Room 102 Fern.
Friday-Sunday, Jan. 18-20 — North Halls, "Little Big Man," 7:30 and 9:30 p.m., Room 105 Fern.
Saturday, Jan. 19 — Free-U children's films, "Melody Time," 12:30 and 2:30 p.m., HUB assembly room.

Lectures

Thursday, Jan. 10 — Populations Issues Research, 4 p.m., Room 64 Willard, Robert H. Weller, sociology, Florida State University, Tallahassee, on "Family Planning Programs and the Limitation of Population Growth."

Meetings

Tuesday, Jan. 15 — College of Agriculture, 4 p.m., HUB assembly room.
Tuesday, Jan. 15 — College of Liberal Arts, 3:55 p.m., Room 121 Sparks.
Wednesday, Jan. 16 — Biology Society, 7:30 p.m., Room 8 Life Sciences I, Dr. Edwin L. Cooper, co-sponsor.
Thursday, Jan. 17 — College of Engineering, 4 p.m., Room 26 M. S.
Thursday, Jan. 17 — College of Business Administration, 10 a.m., Room 201 Business Adm.
Thursday, Jan. 17 — College of Arts and Architecture, 4 p.m., Room 302 Engineering A.

WPSX highlights

"Gas Rationing: Yes or No?" Is the subject of debate on "The Advocates" Thursday, Jan. 10, at 8:00 p.m. on WPSX-TV, Channel 3. The hour-long debate centers around whether or not gas rationing is preferable to increasing the price of gasoline to rise beyond ordinary people's ability to buy it. The "yes" side calls for rationing as the most equitable means of controlling gas sales. The "no" side maintains that rationing will only postpone the inevitable and that the free market should be allowed to take its course. The program can also be seen on Saturday at 2:00 p.m.
"The Killers," a series of five national documentaries about the major causes of death in America, examines "Pulmonary Disease: The Hidden Enemy" Monday, Jan. 14, at 8:00 p.m. on Channel 3. The 90-minute documentary surveys major lung disorders from the common cold to lung cancer, explores occupational diseases such as black lung, and looks at new re-

search and methods of treatment for various pulmonary diseases. At 9:30 p.m., "Pulmonary Disease — Close to Home" examines occupational lung diseases in Central Pennsylvania, looks at smoking clinics in Central Pennsylvania, and surveys other community services available for area residents. Both "The Killers" and the WPSX-TV follow-up program may also be seen on Saturday, Jan. 19, at 2:00 p.m. and again at 10:30 p.m.

5 o'clock theatre

"Cowboys and Indians," the 5 O'Clock Theatre production of a bitter comedy about a Park Avenue couple who invite a cowboy and an Indian to lunch, opens at 5:20 p.m., Wednesday, Jan. 16, in the Pavilion Theatre.
Written by Lawrence Lebin, a part-time theatre arts graduate student, the play will be directed by Peter Lesnick, also a graduate student in theatre. Additional performances are scheduled for 5:20 p.m., Thursday, Jan. 17, and 7:20 p.m., Friday, Jan. 18. "Cowboys and Indians" is suggested for an adult audience.

Artists Series

Imogene Coca and King Donovan are starred in the Neil Simon comedy play, "The Prisoner of Second Avenue," which will be performed twice Friday, Feb. 11, at 5:30 and at 9:30 p.m. in Schwab Auditorium.

Tickets were on sale this week in the HUB and if any remain will be sold at the door five minutes before curtain to fill the auditorium.

The play has been a smash hit on Broadway, evoking "tons of laughter" from the problems of urban living.

Also upcoming in the Artists Series is the second program in the series of Luis Bunuel films, "Los Olvidados," Wednesday, Jan. 16, at 8:30 p.m. in Schwab. Tickets for all of these films are sold at the door prior to the showing.

King Donovan stars with Imogene Coca in the touring production of Neil Simon's hit play, "The Prisoner of Second Avenue," at the Artists Series Friday, Jan. 11, two performances, at 5:30 and 9:30 p.m. in Schwab.

Official

Thursday-Friday, Jan. 10-11 — Deadline for filling Course Repeat option.
Thursday-Friday, Jan. 10-11 — File for Pass/Fail option.
Friday, Jan. 11 — Deadline for filling Course Drops.
Friday, Jan. 11 — Preregistration deadline.

HUB specials

The HUB Terrace Room has initiated daily special meals for both lunch and dinner at prices much below customary cafeteria prices at cafe. No substitutions are permitted to benefit from these reduced prices. For the next week, the features (all accompanied with appropriate side dishes and beverages) are:

Sunday, January 13 — lunch, baked ham, \$1.51; dinner, Welsh rarebit, \$1.11.
Monday, January 14 — lunch, grilled beef pattee, 5.53; dinner, planters beef w/noodles \$1.49.
Tuesday, January 15 — lunch, grilled cheese sandwich, \$1.02; dinner, franka & kraut \$1.35.
Wednesday, January 16 — lunch, meat pinwheel, \$1.11; dinner, turkey ala king \$1.59.
Thursday, January 17 — lunch, apple fritters w/ bacon, \$1.72; dinner, hot beef sandwich \$1.41.
Friday, January 18 — lunch, egg cutlet, 5.85; dinner, cream w/rice \$1.49.
Saturday, January 19 — lunch, macaroni & cheese, 5.81; dinner, meatloaf \$1.39.

PARKING DECAL VOID STRIPS BEING ISSUED

New void strips for parking decals are being issued to extend the validity of parking decals until September 30, 1974.

The new void strip is a 1/2-inch red and white vinyl strip that fits over the bottom half inch of the existing parking decal. The decal must be clean for the void strip to adhere. The void strips of a dated vinyl material, and care must be taken when handling them. A thin paper-like backing on the void strip must be removed before affixing it to the decal.

The new void strips may be affixed to parking decals anytime during the month of January, 1974. They must be displayed by January 31, 1974, after which time any vehicles, not displaying them, will be subject to a violation.

Anyone not receiving the new void strips by January 23, 1974, should contact his college or department parking chairperson or call the University Parking Coordinator, 865-1412.

Void strips, extending the use of decals for a longer period, help to insure that University faculty and staff members have parking privileges.

Four music programs planned in week

Four programs of music will be offered by Music Department faculty members and others next week, beginning Monday, Jan. 14, with a recital by Overda Page, part-time instructor in music, with other members of the faculty, as well as the State College Symphony.

Wednesday, Jan. 16, the Alard String Quartet will perform on campus again, before embarking on a tour which will include a featured performance this month in the annual string quartet program at Middlebury College, Vt., and in February a 14-concert Southern jaunt that will include stops in Atlanta, Miami, Charleston, and the University of Florida.

Friday, Jan. 18, the Symphonic Wind Ensemble will present a "Festival of Modern Wind Music," with Smith Toulson, assistant professor of music, directing the 42-member wind and percussion group.

Those three programs will all be performed in the Music Building recital hall, starting at 8:30 p.m.

Saturday, Jan. 19, in Schwab Auditorium, the Penn State Singers, directed by Raymond Brown, will feature a pot pourri of Gilbert and Sullivan highlights in performances at 3 p.m. and 8:30 p.m. It will include three scenes from "The Mikado,"

a scene from "Ruddigore," and the entire "Trial by Jury," the first successful Gilbert and Sullivan opera, performed originally in 1875.

No tickets are required for these performances. Stage director for the opera scenes is Jerry James, theatre arts graduate student, and production designer is John Roslevich.

The Monday (Jan. 14) program will include five works by major composers, including a Prokofiev sonata for flute and piano, Ravel's "The Enchanted Flute," and Grilles' "Poem for Flute and Orchestra."

Among those featured will be Page in the program will be Philip Delano, piano; June Miller, harpsichord; Karen Cain, soprano; the Claremont Woodwind Quintet (Christen and William Dole, Gregory Donovetsky, Mrs. Page, and Toulson).

The Alard quartet will play Webern's "Five Movements for String Quartet"; Schubert's "Quartettsetzt"; Brahms' "Quintet for Clarinet and Strings"; and "Quartet No. 8," an autobiographical piece by Dimitri Shostakovich.

Original pieces for band, all by modern British and American composers, will be featured by the Symphonic Wind Ensemble in its program Friday.

COMPUTATION SEMINARS

The Computation Center is still receiving suggestions for a Winter Term Seminar Series and welcomes additional ideas for seminars as well as expressions of interest in topics already noted (see Intercom on Dec. 13).

Contact Rosemary Hallenbeck, 863-4022, Room 214 Computer Bldg.

CAPITOL SERIES

The second program in the series, "Symposium on American Music and Culture — Rural Tradition," will be held at the Capitol Campus Tuesday, January 15, when Jo Belle, Bud and David Reed will perform.

The series, funded by a \$3,400 grant from the Penn State Foundation, will include performances and lectures during the Winter Term highlighting the folk/ethnic area of American music and focusing on authentic traditions. The series is being sponsored by the Cultural Program Committee in conjunction with the American Studies and Humanities program.

Afternoon workshops will be held in which performance techniques, the history and manufacture of folk instruments, traditions of American song, and the myths, stories and superstitions of rural America will be demonstrated or discussed.

Beginning January 17 and running each Tuesday through February 21 will be a special film series on American music and culture, supplementing the symposium program.

group of senior students on a two-day tour of New York's World Trade Center last month. Earlier in the Fall, his class observed the workings of two large architect-engineer firms in Detroit and Toledo.

Bringing education and practice together is another goal of Wheeler's, so he places particular importance on his students' senior projects. Under his supervision, they have developed comprehensive plans for structural design from an airplane passenger terminal to a medical research library. When they are finished, there is the added benefit of having a concrete project to show a prospective employer, and Wheeler spends many hours outside of class consulting students in career planning and showing them how to create attractive resumes.

His own career began at the University of Pennsylvania where he received a bachelor's of architecture degree in 1937, winning awards for the highest record in the five-year design course and for all-around ability. At M.I.T., where he earned a Master's in architecture, he garnered ad-

Course repeat filing period extension made

University students who missed the filing deadline for course repeat forms because of misinformation about the rule may appeal for an extension of the filing period.

The Administrative Committee for Resident-Edication Procedures has established a subcommittee to review appeals from students who missed the filing deadline during the 1973 Spring, Summer or Fall terms.

Appeals for courses previously repeated during any one of these three terms will be considered by the committee if received before Feb. 27.

Under present rules, a student may repeat a course in which he receives a grade of D or F, with the later grade used to calculate his grade-point average. All grades earned, however, remain on the student's academic record.

According to Martha A. Adams, subcommittee chairman, a written description of the reason for appeal should be submitted by the student to his dean or campus director with a completed "Course Repeat Notice" form.

If approval is granted, the approval statement should be forwarded, along with the student's written appeal, completed course repeat form and a \$3.00 filing fee, to Miss Adams, Room 275, Recreation Bldg.

The student and the appropriate dean or director's office will be informed of the committee's final review by the Records Office. If the appeal is not granted, the filing fee will be returned.

Students will follow the normal University procedures for filing course repeat forms for courses repeated during the current Winter Term.

Bus service

Bus service was resumed at University Park last Thursday using routes similar to those of last year, providing service at 15 minute intervals on each of two routes.

The fare, for the present, will continue at 10 cents.

Service on the Inner Loop will start at the East Halls area at 7:30 a.m. and run until 10:15 p.m., Mondays through Fridays, and until 12:15 p.m. on Saturdays. On the Outer Loop, buses will leave Graduate Circle and also the Hetzel Union Bldg., starting at 7:30 a.m. They will run until 6 p.m., Mondays through Fridays. There will be no buses on Saturdays. There are no Sunday buses on either route.

The Inner Loop, with buses leaving East Halls area on Bigler Rd., provides for the bus to run south on Bigler Rd., west on Pollock Rd., south on Shortridge Rd., west on College Ave., north on Burrows Rd., east on Curtin Rd., north on Shortridge Rd., and east on Park Ave., to Bigler Rd. at East Halls.

The Outer Loop, starting at Graduate Circle, provides for the buses to travel east on Hastings Rd., north on Porter Rd., west on Curtin Rd., south on Burrows Rd., east on Pollock Rd., north on Bigler Rd., east on Curtin Rd., south on Porter Rd., and west on Hastings Rd. to Graduate Circle.

Most of his professional experience was obtained with engineering firms. He has designed such structures as a \$46 million power plant, a \$20 million turbine generator industrial plant, an army surgical hospital, a nuclear reactor building, and an international airport terminal building.

Curtis-Wright brought him to Central Pennsylvania to work at the Quakertown plant, and he joined Penn State's faculty in 1954. During his nine years here, enrollments in his senior class have grown from seven students to 29, and he has found himself increasingly involved in student problems — to the point where most of his leisure time hobbies have gone by the board.

"In my teaching, I never criticize anyone openly in class," he concludes. "I think my job is to build up a student's confidence so that he may come to feel he has a great role to play. I think of myself as an educational coach helping each student realize his greatest possible potential."

Library Notes

Self-help guides to library research in more than 200 subject and interdisciplinary areas are now available in the Undergraduate Library.

The series, titled Pathfinders, was developed as a part of Project Interact at Massachusetts Institute of Technology and now is published and revised by the Addison-Wesley Company. The guides are meant to aid library users as they need to locate research resources for term papers, speech reports, or more advanced research. Designed by subject librarians, the guides are one-page briefs annotated with references to the Undergraduate Library.

at library has produced "Guides to library search in selected subject areas, a bibliography."

The guides are considered a breakthrough in reference services for library users and capability designed into the series will enable library users to save time in the initial stages of library research.

The Pathfinders may be duplicated, the publisher having approved this copy service.

The Main Undergraduate Library now has college catalogs on microfiche. The fiche collection is from Microfiche in Denver, Colorado, and includes graduate and undergraduate catalogs. The microfiche is available for use with the microfiche in the library. Since the collection represents a new type of service, a study is being made to evaluate student use of the collection and the quality of the materials in the collection.

The Circulation Department announces a change in procedures for personal reserves and locales. A personal reserve is a request by a prospective borrower for notification of the availability of a book. The request is charged out at the time the request is made. A loan may be placed on an item that is not found in its regular place in the library and is charged out. All the time the request is made. Notices concerning the locales will no longer be sent to the patron. Patrons must now check back at the Circulation Desk for a report on items being located.

Pattee Library now offers two brief (audio) taped units on the card catalog. The first, titled "How to Use the Card Catalog," introduces the user to the card catalog, an explanation of the difference between Dewey and Library of Congress call numbers. The second tape explains how to determine the proper terms to use when searching the subject catalog. Each unit consists of an audio tape and an illustrative notebook. Both are available at the Information Desk in the Card Catalog Room, Central Palace.

Staff vacancies

To make application for the vacancies listed below call 865-1387 (Network 475-1387) or refer to:

THURSDAY, JANUARY 24, 1974

BOOKSTORE MANAGER VICE PRESIDENT FOR BUSINESS University Park

Responsible for the effective and efficient operation of the University Park Bookstore, including revision of bookstore personnel. Responsible for financial aspects of the bookstore. A Bachelor's degree, or equivalent, and acquired knowledge, books, and seven to ten years of effective bookstore experience, preferably in the management of a large and extensive University bookstore operation, are preferred.

SUPERVISOR, AGRICULTURAL COMMUNICATIONS OFFICE

COLLEGE OF AGRICULTURE
University Park

Responsible for the operation of the Agricultural Communications office, including training and supervision of clerical and technical support employees, processing of press, radio, television, and publications, and making surveys to improve educational systems. High school education with two to two years of business school training and at least three years' experience are preferred.

INSTRUCTIONAL TELEVISION PRODUCTION SPECIALIST

UPDS
University Park

Responsible for assisting faculty and departments in developing educational materials for presentation on television. Responsible for personnel directing color television productions. A Bachelor's degree, or its equivalent in related training and experience, and two to two years of effective television in open- or closed-circuit television production are preferred.

ADMINISTRATIVE ASSISTANT MANAGEMENT SERVICES

University Park

Responsible for assisting in the selection, planning and coordination of departmental personnel. Also responsible for assisting with departmental project budgeting, performance reviews, administrative services. A Bachelor's degree, Accounting, Education, or Business, and one to two years of effective experience are preferred.

PROGRAMMER ANALYST C

COLLEGE OF AGRICULTURE
University Park

Responsible for the development of new computer programs and the maintenance of existing programs. A Bachelor's degree with a major in math, statistics or computer science, or equivalent, and one to two years of effective programming experience are preferred.

zon," by Dr. Gerard J. Brautl, professor of French, has been awarded the "Prix Paul Adam-Even" by the Académie Internationale d'Héraldique. The international society of heraldic specialists, it is awarded every two years to recognize outstanding achievement in heraldic research.

Dr. Brautl's book, which was published early last year by the University Press, is his second book on medieval coats of arms, and he has written many articles on the subject as well.

CHILDREN'S GAMES

The games and educational gymnastics class for children of University faculty and staff members and of townpeople still has opened. The class meets in White Bldg. every Thursday from 4 p.m. to 5 p.m. Anyone interested may call 865-7591 or bring children to class on Thursday at 4 p.m.

FACULTY WOMEN

The 25th anniversary of the Faculty Women's Club at the University Park campus will be observed Saturday, Jan. 19, with a Brunch at the Nittany Lion Inn, from 10 a.m. to noon. A short musical program will be presented by the Hy-Los, a singing group within the Penn State Glee Club. All Faculty Women's Club members are invited to attend. Reservations may be made by contacting Mrs. Audrey Key, 923 McKee St., State College, through Jan. 14.

ENERGY

(Continued from page one)

on architectural practice, he is a consultant to a number of firms in this country and Canada, has received several research grants from the American Institute of Architects, and authored two books on emerging techniques of practice. Through his efforts, 19 conferences have been held at Penn State on such specialized topics as practice management, documentation systems, and architect-engineer coordination. He also brings professionals in on a one-shot basis to speak to his classes, being careful to involve students with all his visitors as much as possible.

"I've tried to create a greater awareness at Penn State in the architectural and engineering professions," he explains, "because the better known we are, the easier the time our students will have finding jobs."

Student field trips are an important part of an architectural engineer's education, Wheeler believes, which is why he led a

January 17, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Members of Select Committee on Governance announced

President tells Senate of increased appropriation request

The University's 1974-75 State appropriation request represents an 11 per cent increase over the current appropriation, President Oswald told the University Faculty Senate last week.

Dr. Oswald said the request is based on an anticipated 1% to 2 per cent enrollment increase and places "overwhelming emphasis" on salaries and staff benefits.

Noting that the University has been under pressure to bring tuition to \$1,000 annually, he said there has been no discussion about next year's tuition but anticipates there will be "a modest kind of increase in the direction of the \$1,000 level."

Dr. Oswald reported that a developmental year to aid educationally disadvantaged students will be offered beginning in the Fall Term, 1974. The program, developed in cooperation with the State Department of Education, provides for individual curricula designed to help alleviate academic deficiencies.

Pointing out that 47 per cent of the students who entered Penn State four years ago under the Educational Opportunity Program will graduate this spring, Dr. Oswald said this compares with a 64 per cent graduation rate for regularly admitted students.

Concerning the energy crisis, Dr. Oswald told the Senate that the University

has received "great response and tremendous cooperation" to guidelines relating to the crisis, with an Energy Conservation Committee presently analyzing the situation and taking necessary steps.

"We are not in a position where we see any need for critical or precipitous action, but are taking steps to augment the committee with appropriate academic officials so they can interrelate."

He assured the Senate that no action that affects academic programs will be taken without contacting the academic committee involved.

In clarification of a proposed tenure policy, Dr. Oswald said the proposal suggests a University-wide system of peer review in place of review by individual colleges.

In formal action, the Senate approved appointment of a joint Senate-Administrative Select Committee to study the faculty's role in University governance.

Approval of the motion, proposed by Dr. Arthur O. Lewis, came after discussion in which a number of senators criticized the Senate's role in University governance. Under a unanimously adopted amendment, the committee is to be appointed jointly by the Senate chairman, who will select four senators, and the University president, who will name four administrators.

The committee is to pay special at-

tention to the role of the Senate, is to recommend means for improvement of the role of the faculty and the Senate "if necessary," and is to recommend "means for better communications within the University community."

COMMITTEE NAMED

President Oswald and Dr. E. L. Borgman, Faculty Senate chairman, have announced the composition of the joint Select Committee noted in the Senate report will be the following:

Prof. Robert S. Friedman, political science, chairman.

Prof. Ernest E. Fryer, psychology, Behrend Campus.

Prof. Morris E. Schroeder, agricultural engineering.

Prof. Helen I. Snyder, educational psychology.

Dr. James B. Bartoo, dean of the Graduate School.

William J. David, director, Hazleton Campus.

Dr. Stanley O. Kenberry, senior vice president for development and relations.

Dr. Stanley F. Paulson, dean, Liberal Arts.

The special committee would present its report and recommendations to the Senate not later than the May, 1974, meeting.

News in brief

PHILOSOPHY DINNER

Because near blizzard conditions last month forced the cancellation of the 50th anniversary dinner of the Department of Philosophy, the event has been rescheduled for Wednesday, Jan. 30.

The invitational affair, to be held at the Nittany Lion Inn, will be attended by faculty members from the Department, its graduate students, and representatives of the University administration, including President Oswald.

The guest speaker of the evening will be Dr. Paul Weiss, professor of philosophy at Catholic University of America.

FACULTY WOMEN

The Faculty Women's Club of Penn State at University Park Campus will celebrate its 25th Anniversary with a Brunch at the Nittany Lion Inn, Saturday, January 19, from 10 a.m. to noon. A short musical program will be presented by the Hy-Los, 12 members of the Penn State Glee Club. All members of the Faculty Women's Club are invited to attend. Reservations may be made by contacting Mrs. Audrey Key, 923 McKee Street, State College, through January 14. There will be no refunds after January 16.

QUESTIONNAIRE

More than 35,000 questionnaires will be mailed this week to faculty, staff members, and students to obtain information about travel to and from the University.

The data collected will be used by the researchers conducting the University-sponsored transportation study and the Centre Region Area Transportation Study (CRATS) to help forecast the need for highway, parking, transit, bicycle and pedestrian facility improvements.

TERRACE ROOM DINNER

An International Candlelight Dinner will be staged at the HUB Terrace Room Wednesday, Jan. 23, with appropriate menu, decorations, and entertainment. Service, as usual, is from 5 p.m. to 6:45 p.m. The menu will include veal Cordón Bleu, corned beef and cabbage, Swedish meat balls, French fried chicken, and shrimp curried with rice. Marilyn Grochowicz, senior majoring in voice and a part-time helper at the HUB, will sing; she is capable in four languages. The Hy-Los, select group singing in the Penn State Glee Club, will also sing.

COMET WATCH

The Department of Astronomy's Comet Watch Program, tickets for which are still available for Jan. 19 and 26, has new hours, since the change to Daylight Savings Time. The watch is now held from 6 to 8 p.m. Tickets are issued for half-hour intervals and faculty and staff members wishing to take advantage of the Observatory's offer may call 865-0418.

AAUW BOOK COLLECTION

The method of collecting books for the AAUW benefit drive has been changed, recognizing limitations imposed by the current gasoline problem. Henceforth, AAUW members living near the donor will be advised that a donation is to be made and, combining that trip with other errands, the member will pick up the donation. This avoids the problems of driving over a wide area on a regular monthly tour of collecting, as done in the past. However, donors are still urged to deliver

(Continued on page four)

Interest in major in teaching exceptional children has mushroomed

Special help needed by many children, not only retarded

The head of Penn State's special education department, Dr. Joseph L. French, found his research thrust early by helping exceptional children do the unexpected.

As a graduate student, first at Illinois State and later at Nebraska, he developed an intelligence test which has salvaged youngsters once regarded as uneducable.

"Working with exceptional children, I was frequently called on to determine whether they had the intellectual potential to profit from various training programs," Dr. French explains. "I found that sometimes even the most severely handicapped could be helped, so I began to work on a test to determine the general mental ability of children under eight who couldn't talk."

The test, which has been published by Houghton Mifflin, utilizes pictorial shapes. A trained examiner asks the child questions about geometric figures and line drawings printed on cards spread out before them. Even a child who is unable to talk or strapped to a bed can respond by eye movements, thus enabling the examiner to assess his intelligence.

"Most of the severely retarded can be better than they are," Dr. French points out. "They can be taught such self-help skills as eating or toileting and learn how to protect themselves from traffic, to make simple purchases, and perhaps attend the movies. Our goal is to try to help them live more normal, natural lives."

"Too many people, however, still think mental retardation and special education are synonymous. That's just not true. Lots of children who aren't mentally retarded need special help."

"This fact is now beginning to be recognized in Pennsylvania, and programs have been formulated to deal with children who

are emotionally disturbed or neurologically impaired. The term 'learning disabled' is catching on to identify children of average intelligence who have disabilities which cannot be explained by sensory impairment, mental retardation, or language problems."

Dr. French's entry into the field of special education was serendipitous. Right after the close of World War II, the discipline began to grow, and Illinois State, which he was then attending, obtained funds to build an outstanding laboratory school facility. People with handicapped children came from all over the State to use the new school's services, and Dr. French got a job there as a psychologist.

"Part of the reason they hired me," he recalls, "was because I was also a sports-

writer! I had worked on the local paper as an undergraduate, and Illinois State needed someone to do sports publicity. The clinic only wanted to pay a psychologist half time, so I got the chance because they could give me salary with the publicity department."

Despite the fact that he managed to place his stories regularly in the Chicago papers — the goal of all Illinois publicists — Dr. French gradually began to devote more and more time to the clinic and to teaching psychology. He remained on the staff five years (although two of them were spent on leave for military service in Germany during the Korean war) before moving on to Nebraska for his doctorate in

(Continued on page two)

Dr. Joseph L. French — "Sometimes even the most severely handicapped could be helped."

Honors

Dr. Henry S. Albinski, professor of political science, has been awarded a Fulbright-Hays Senior Scholar grant to Australia, the main purpose of which is to conduct a major, book-length study of foreign and defense policy under the new Australian Labor Party government, which was elected to office in December of 1972. The host institutions in Australia are the University of Sydney and the Flinders University of South Australia. At both institutions, on a visiting professorship basis, he will be offering special seminars and lectures on Australian foreign policy and political process.

The Fulbright to Australia represents a continuing interest and activity in Australian politics and foreign policy for Dr. Albinski. In 1963-64 he was Visiting Fellow in International Relations at the Australian National University, and in 1970 a Visiting Professor of Political Science at the University of Queensland. Among five

published books, two deal with Australia as such, and a third with Australia and Canada. He has also published three major monographs on Australian politics, as well as a number of book essays and journal articles.

Dexter N. Putnam, professor of dairy science extension, has been named winner of the 1973 Pennsylvania Dairymen's Association Award of \$100 and an inscribed plaque "for valuable and noteworthy contributions to the state's dairy industry." The award was presented to him January 8 at the Association's 103rd annual meeting in Harrisburg as part of the 58th Farm Show. Established in 1922, the awards program is designed to give recognition to a member of the Cooperative Extension Service staff for aid to the Commonwealth's largest agricultural enterprise.

Dr. Judith Mottet, assistant professor of English at the Behrend Campus currently on leave in Stockholm, was notified that her two poems in the March, 1973, issue of "Poetry" magazine gained her the Eunice Tjeltens Memorial Prize. She has received two grants from Swedish

foundations to support her work translating Swedish poetry; she also received a Fulbright-Hays scholarship to enable her to study in Sweden.

James H. Miller, transportation specialist and research assistant at the University, and Dr. John C. Rea, who was assistant professor of civil engineering at Penn State before assuming a position with the Canadian Transportation Commission, will receive the Ryke J. Kuykendall Award of the National Highway Research Board for the best paper in the area of administration and planning of transportation facilities. The award will be given at the Board's annual meeting later this month.

Dr. Rea and Mr. Miller studied six transportation models, primarily in the area of busing, and a low non-rail transit systems, to determine which was the best.

Dr. Sigmund S. Birkenmeyer, professor of Slavic Languages, has been elected President of the newly founded Association for the Advancement of Polish Studies. He presided over the first meeting of the charter members of the Association, held in Chicago on December 28, 1973.

Students enrolled from all counties

Ninety three per cent of the students enrolled at Penn State this year are from Pennsylvania, and they represent every county of the State. The 2,786 from out of the state but from this country represent every other state and the remaining 6.4 most of them graduate students, represent a variety of other countries.

The annual summary of enrollment during the current academic year includes 6,658 Continuing Education students to whom a county designation is not listed. Allegheny County with 5,279 students more than 10 per cent of the Pennsylvania total, tops the list of Pennsylvania counties followed by Centre with 3,977; Philadelphia with 3,418; Montgomery with 2,420; and Delaware County with 2,102.

Others among the 16 counties with enrollments exceeding 1,000 are: Westmoreland 1,604; Erie 1,597; Blair 1,539.

Among the out-of-state students, there are 794 from New York and 703 from New Jersey.

Appointments

Dr. John J. Romano has been named assistant dean for undergraduate studies in the College of the Liberal Arts and assistant professor of social science at the University. He succeeds Jack H. Vincent, who retired as assistant dean on Jan. 1.

Dr. Romano, who obtained his doctorate in counselor education at Penn State in 1972, had served as a residence hall staff coordinator and administrative assistant to the dean at the University from 1970 to 1972.

During the past year, he has been assistant to the vice president for student affairs and an assistant professor of education at the University of Delaware.

Dr. Romano earned his master's degree at Springfield College in guidance and counseling and his bachelor of science in secondary education and physics at the State University of New York at Oswego.

Elizabeth Rawson, a fellow of New Hall at Cambridge University, is serving as a visiting lecturer in classics and political

science for the Winter Term and a part of the Spring Term.

Her visit is sponsored by the Department of Classics and the Department of Political Science.

The author of numerous articles and books on topics ranging from Greek tragedy to Greco-Roman political thought, Miss Rawson wrote the widely acclaimed study, "The Spartan Tradition in European Thought," analyzing the influence of the Spartan political system on later political thinkers, including the Fathers of the American Revolution.

During her stay at Penn State, Miss Rawson will teach a course in Cicero and "Directed Reading in Political Science: Greco-Roman Political Theory." She will also conduct several faculty seminars in the Department of Political Science.

Gaylene P. Doucette, as instructor in physical education at the Shenango Valley Campus. A graduate of Kent State University, Miss Doucette is a candidate for the master's degree at Youngstown State University. She was a teacher in the schools of Youngstown, O., and Austintown, Ohio.

SPECIAL HELP NEEDED —

(Continued from page one)

education and a year on the faculty there. Penn State claimed his services in 1964, and he became a department head five years later in addition to holding the title of professor of special education and educational psychology.

Student interest in the education of exceptional children major has mushroomed recently, partly as a result of decreasing job opportunities in such fields as elementary and secondary education. Enrolling some 15 students six years ago, the major at the University has now grown to over 400.

"To keep handicapped children in a regular classroom setting, the field more and more is going to the use of itinerant teachers," Dr. French comments. "Peer group stimulation is recognized as very important for exceptional children, and an itinerant can either work in the classroom or remove the child only briefly to a resource room in the same school."

In addition to identifying children with the potential to do more than society thought they could, Dr. French's research has also involved the education of the gifted child. President of the Association for the Gifted, a division of the Council for Exceptional Children, he helped draft and testified in favor of the Gifted and Talented Children Education Assistance Act which was passed by Congress in 1970.

As chairman of the Advisory Committee to the National Regional Resource Center in Pennsylvania, he helps direct State efforts to seek new delivery systems for special education in the Commonwealth. He is also a member of the State Advisory Committee for Special Education, a general policy making body which makes recommendations to the Bureau of Special Education in Harrisburg.

Because he enjoys mixing activities, Dr. French serves as a consultant to a

home for crippled children in Philadelphia and as a hearing officer throughout the State in cases where parents have protested their child's school assignment — usually in a room for the mentally retarded.

Among other activities, he is an elected member of the board of directors of the "Journal of School Psychology" and was elected a member-at-large of the American Psychological Association's Division of School Psychology Executive Committee. On campus, he is chairman of the interdisciplinary graduate program in school psychology and a member of the University Senate.

The father of four children, Dr. French has been active in scouting in the community, and, concerned over the lack of activities for teen-agers in State College, he for a time leased a house and turned the ground floor into a youth center. He enjoys sports and recently took up jogging, averaging three miles a day several times weekly.

Although he works in a field where the layman would quickly become discouraged, Dr. French doesn't look at it that way.

"The big thing to keep in mind," he says, "is to find ways in which children can have a breakthrough to do things their teachers or parents or they themselves never thought possible. If we can help them accomplish this, it's very satisfying."

SAFETY SUGGESTION

While local fire officials have not yet reported a case where a motorist, carrying extra gasoline in a container in his trunk, has had a fire, such reports have come from other towns and cities, which prompts University Safety Division personnel to warn that such a practice could disaster.

The explosive nature of gasoline is so violent that a car could be demolished within seconds if the gasoline is ignited by a spark, occurring in one of many ways.

Houp, English, retires after 33 years

Kenneth W. Houp, associate professor of technical writing, retired from the Department of English January 1. Professor Houp earned his undergraduate and graduate degrees at the University of Pittsburgh and came to Penn State as an instructor in English composition in 1939, was named assistant professor in 1945, and associate professor in 1949. Originally interested in grammar and exposition, he wrote two books in these areas: "Elementary Grammar and Workbook" (1946) and "Explanatory Writing" (1949). The research involved in both undertakings, together with a growing concern over the need for better communications in business and industry, accelerated his concentration on a new interest: technical writing. Subsequently he published "The Writer's Resource Book" (1954), and, working with Margaret D. Bickle, "Reports for Science and Industry" (1958). His most recent publication, "Reporting Technical Information," written in collaboration with Thomas E. Pearsall of the United States Air Force Academy, is now in its third printing. In a part-time ca-

capacity, he is an advisor to industry in technical writing and editing. In addition to a 19-year association with HRB Singer, Inc., State College, he acted as a consultant to the U.S. Army Ballistics Research Laboratories at the Aberdeen Proving Ground, to the Vertol Division of the Boeing Aircraft Company, the Westinghouse Nuclear Research Laboratory, the Scott Paper Company, and the Calgon Corporation in Pittsburgh.

In writing

Dr. Leon F. Lyday, associate professor of Spanish at the University, has edited a text anthology of one-act plays for Spanish America. Entitled, "En un acto. Nueve piezas hispanoamericanas," and in collaboration with Prof. Frank Dauster, Rutgers University, the volume was published by D. Van Nostrand Co. and is signed for use at the Intermediate and advanced levels.

Funding Opportunities

For more information, call 865-1372 except where noted below, and refer to the item by its number and the general information provided. People with grants information for this column should call the same number.

January 17, 1974

(112-1) The non-profit National Center for Housing Management created by Executive Order 11658 in 1972, wants to help colleges and universities either develop curricula or adapt curricula already developed by the Center. Future research activities may be subcontracted through the Center's housing management clearinghouse now being planned. The field of housing management for the elderly is emphasized. For additional information contact Chis Gilling, Office of Federal Programs, Washington, D.C. (202)293-7070.

(112-2) The NIH Postdoctoral Individual Research Fellowship and Postdoctoral Institutional Research Fellowship Programs (Div. 6 INTERCOM 110-5) have extended the application deadline date from Jan. 15 to Feb. 1, 1974. No applications past that date will be accepted for this competition.

(112-3) Grants for basic research in systematic and environmental biology are awarded by the Smithsonian Institution's Joseph Cummings Program (SFCP). Organized with an annual deadline of March 1, the program supports international and domestic travel, salaries, food, lodging, and scientific equipment costs in a country where the U.S. Treasury has determined that the U.S. holds currency in excess of its needs as a result of commodity sales. Other SFCP program deadlines are: museum programs — Sept. 1; and ecology related disciplines — Nov. 1; geophysics and earth sciences — Jan. 1. Contact Mr. Kennedy Schmeitz, Program Director, Smithsonian Institution, Joseph Cummings Program, Office of International Activities.

The problem of fire with gasoline is made more acute because many people store or transport gas (for example for their power mowers) in cans without adequate safety guards. Unfortunately many types of gas cans commonly sold are "unapproved" and so do not contain such provide proper protection, you must shop around. There is certainly should contain a spark arrester screen, among other provisions. Gasoline should be stored inside the house under any circumstances, because gas vapor buildup in an enclosed area is potentially very destructive.

ties, Smithsonian Institution, Washington, D.C. 20560 (202)381-5118.

(112-4) The new Alcohol Drug Abuse and Mental Health Administration (ADAMHA) (Div. 6 INTERCOM 210-3) supports Mental Health Research Grants in basic, clinical and applied research in toxicology, experiments, demonstrations, and studies. Areas of special interest include alcoholism prevention, early child care, crime, delinquency, narcotics, and drug abuse. Specific grants are supported in the areas of: 1. Techniques and for exploratory studies. The deadlines are Feb. 1, June 1 and Oct. 1. Contact Dr. Robert C. Petersen, Chief, Center for Research on Alcoholism and Drug Abuse, ADAMHA, 5600 Fishers Lane, Rockville, Maryland 20852 (301)443-1555.

(112-5) The Newberry Library (Committee on Awards, 40 W. Walton St., Chicago, Ill. 60610) offers fellowships for work in the library. Fellows ship typically pay \$350/month for students for their comprehensive examinations. Postdoctoral fellowships in History of the American Indian pay \$1,000 for 11 months and require a \$2000 contribution by applicant's home institution. Application deadlines are April 15 and Nov. 1. For further information write to address given above.

(112-6) Rotary Foundation (Rotary International, 1600 Ridge Ave., Evanston, Ill. 60201) offers fellowships for study abroad in fields except medicine for persons under 28. Application deadline is March 15. For further information contact your nearest Rotary Club or dress given above.

(112-7) Twelve-week student summer fellowships in marine policy, ocean management, ocean study will be awarded by the Woods Oceanographic Institution (application deadline March 1). The same organization will award postdoctoral grants in the same fields, the grants available by special arrangement. Apply before Jan. 15 for post doctoral fellowships in study and before March 15 for marine policy fellowships. For information on postdoctoral fellowships apply before Feb. 1. Write to the Dean of Graduate Studies, Woods Hole, Mass. 02543.

REMINISCES — DEADLINE DATES

Jan. 22 for NSF Service Fellowships in Metropolitan Areas (Nov. 8 INTERCOM #10-1). . . . Jan. 22 for NSF Local Government #10-1. . . . Jan. 22 INTERCOM #10-1 for NIE Grants for Research in Education (Jan. 10 INTERCOM #11-1). . . . Feb. 4 and several subsequent dates for NEA Museum Programs (Jan. 3 INTERCOM #11-1).

University Calendar

January 17-27, 1974

Special Events

Thursday-Friday, Jan. 17-18 — Five O'Clock Theatre, "Cowboys and Indians," by Lawrence Lebin. Thursday, at 5:20 p.m., Friday, at 7:20 p.m., Pavilion Theatre.

Friday, Jan. 18 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.

Friday, Jan. 18 — Penn State Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Friday, Jan. 18 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday-Sunday, Jan. 18-20 — JFC Second Annual Dance Marathon for the benefit of Central Pa. chapter, American Heart Association, HUB ballroom, beginning Friday at 11 p.m. Entry, \$15 per couple; prizes \$500, \$300, \$100.

Saturday, Jan. 19 — Penn State Singers, Gilbert and Sullivan, 3:00 and 8:30 p.m., Schwab.

Saturday, Jan. 19 — Chinese Student Association New Year Celebration, (dinner and entertainment), dinner served between 6 and 7:30 p.m., Rooms 102 and 104 Kern.

Saturday, Jan. 19 — Sports: Women's Basketball, vs. Edinboro State, 1 p.m.; Women's Fencing, vs. Ohio State, 10 a.m.; Men's Gymnastics, vs. Syracuse, 8:30 p.m.; Rec Hall; Wrestling, vs. Syracuse, 2 p.m.; Rec Hall; Men's Swimming, vs. Pittsburgh, 2 p.m.; Men's Rifle, vs. Villanova-West Virginia.

Sunday, Jan. 20 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Jan. 20 — Chapel Service, 11 a.m., Eisenhower Chapel. Doris M. Seward, executive assistant to the president.

Sunday, Jan. 20 — PSU Sport Parachute Paraskaling, 9 a.m., Stone Valley.

Monday, Jan. 21 — William Thomas, cello recital, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Jan. 22 — Christian Science Organization, lecture, 7:30 p.m., HUB assembly room. Lecturer Harvey W. Wood, C.S.B., Chicago, on "Grow We Must."

Tuesday, Jan. 22 — Alpha Sigma Alpha, 8:30-11:30 p.m., HUB ballroom.

Wednesday, Jan. 23 — Artists Series, The Films of Luis Bunuel, "Nazarin," 8:30 p.m., Schwab.

Wednesday, Jan. 23 — Renaissance-Baroque Concert, 8:30 p.m., Music Bldg. recital hall.

Wednesday-Friday, Jan. 23-25 — 5 O'Clock Theatre, "Now That Ed's Gone," by Malt Cutugno. Wednesday-Friday at 5:20 p.m., Friday at 7:20 p.m., Pavilion Theatre.

Thursday, Jan. 24 — Sports: Women's Basketball, vs. Gettysburg, 3 p.m.; Women's Bowling, vs. Gettysburg, 3 p.m.

Thursday, Jan. 24 — Benefit concert, sponsored by L'Ailliance Francaise, 8 p.m., Music Bldg. recital hall, with pianist Phyllis Trio, violinist Claire de Chevill-

ly, and flautist Nancy Hadden. Tickets required; may be purchased at door.

Friday, Jan. 25 — Artists Series, Contemporary Chamber Ensemble, 8:30 p.m., Schwab.

Friday, Jan. 25 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Saturday, Jan. 26 — Sports: Men's Gymnastics, vs. Navy, 2 p.m.; Rec Hall; Women's Fencing, vs. Madison, 10 a.m., Schwab.

Sunday, Jan. 27 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Jan. 27 — Chapel Service, 11 a.m., Eisenhower Chapel. Jean T. Bowman, Christian Science practitioner, Pittsburgh.

Sunday, Jan. 27 — FSU Symphony Orchestra Young People's Concert, 3:30 p.m., Schwab.

Sunday, Jan. 27 — PSU Sport Parachute Club Paraskaling, 9 a.m., Stone Valley.

Sunday, Jan. 27 — Alpha Chi Omega Greek Sing, 1-4 p.m., HUB ballroom.

Seminars

Thursday, Jan. 17 — Philosophy, 4 p.m., Room 251 Willard. Dr. J. T. Price, Tuskegee Institute, and Dr. Joseph Kochele, "The Nature of Language."

Thursday, Jan. 17 — Chemistry, 12:45 p.m., Room 310 Whitmore. Barry Trost, University of Wisconsin, on "Innovations in Organic Synthesis."

Thursday, Jan. 17 — Physics, 3:35 p.m., Room 117 Osmond. James K. Watson, Ohio State University, on "Recent Developments in Theoretical Spectroscopy."

Thursday, Jan. 17 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. J. H. Siern and R. Cole, on "Techniques at Rothamsted Experiment Station."

Friday, Jan. 18 — Population Issues, 2:30 p.m., Room 244 Deike. Dr. W. J. Kahley, economist, Lafayette College, and R. T. Gillaspay, on "Contraceptive Choice Among Family Planning Acceptors in Bogota: A Preliminary Analysis."

Monday, Jan. 21 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Dr. R. A. Krause, on "Extension Plant Pathology: Programs and Program Development for Agronomic Crops."

Monday, Jan. 21 — "Current Issues in Food and Agriculture," 1 p.m., Room 202. Bernard James P. Wiggins, animal industry, on "Animal Agriculture: Promise and Problems."

Tuesday, Jan. 22 — Operations Research, 3:45 p.m., Room 267 Willard. Dr. Matthew Rosenshine, on "Linear Systems Analysis of Markov Chains—1."

Tuesday, Jan. 22 — Geosciences, 4 p.m., Room 26 M. S. Thomas Wright, U. S. Geological Survey, Washington, D.C., on "The Columbia River Basalts."

Tuesday, Jan. 22 — Solid State Physics, 1 p.m., Room 445 Davey. Professor G. Whitfield physics, on "The Peierls Instability and the Frohlich One Dimensional Superconductors."

Tuesday, Jan. 22 — Chemical Engineering, 3:50 p.m., Room 140 Fenske. J. A. Tallmadge, Drexel University, on "Studies of Coating Processes and Drainage."

Tuesday, Jan. 22 — Entomology, 4 p.m., Room 215 Armsby, College of Agriculture Dean James M. Beattie, on "Outlook and Role of Land Grant Colleges in the Seventies."

Wednesday, Jan. 23 — Biochemistry, 4 p.m., Room 101 Althouse. N. Schroedl,

on "Studies of Hemoglobin Structure in Solution."

Wednesday, Jan. 23 — Analytical Chemistry, 8:30 a.m., Room 310 Whitmore. R. G. Whitely, on "Determination of First Row Transition Metals in the Aqueous Environment."

Thursday, Jan. 24 — Chemistry, 12:45 p.m., Room 310 Whitmore. Charles Johnson, University of North Carolina, on "Magnetic Resonance Studies of Tunneling and Rotation in Solids."

Thursday, Jan. 24 — Physics, 3:35 p.m., Room 117 Osmond. Peter D. Barnes, Carnegie-Mellon University, on "Nuclear Physics with K-Mesonlike Atoms."

Thursday, Jan. 24 — Mining, 4 p.m., Room 302 M. L. R. Elmore Grim, Mining Specialist, Mine Drainage Pollution Control Agency, Cincinnati, on "Contour Stripping Techniques."

Thursday, Jan. 24 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. G. W. McKee, on "Interdisciplinary Approach to Agronomy Research."

Thursday, Jan. 24 — Central Pa. Section, AIAA, 4 p.m., Room 232 Hammond. Dr. William George ARL, on "Special and Temporal Resolution in Dynamic Flow Measurement."

Jon Taylor, one of the soloists in the Penn State Singers performance of the Gilbert and Sullivan opera "Trial by Jury" Monday, Jan. 19, at 9 p.m. and 8:30 p.m., in Schwab Auditorium.

Films

Thursday-Sunday, Jan. 17-20 — Arnold Air Society, Fritz the Cat, 7 and 9 p.m., Room 102 Forum.

Friday-Sunday, Jan. 18-20 — North Halls, "Little Big Man," 7:30 and 9:30 p.m., Room 105 Forum.

Saturday, Jan. 19 — Free-U children's films, "Melody Time," (Walt Disney), 12:30 and 2:30 p.m., HUB assembly room.

Wednesday, Jan. 23 — Commonsplace Theatre, "Mr. Smith Goes to Washington," 8 and 10 p.m., Room 112 Kern.

Thursday-Sunday, Jan. 24-27 — Arnold Air Society, "Stop the World," 7 and 9 p.m., Room 105 Forum.

Thursday-Sunday, Jan. 24-27 — Centre Halls, "My Fair Lady," 7:30 and 10 p.m., Room 102 Forum.

Friday-Saturday, Jan. 25-26 — U.S.G., "The Yellow Submarine," 7:30 and 10 p.m., HUB ballroom.

Saturday, Jan. 26 — Free-U children's films, "Jack and the Beanstalk," 12:30 and 2:30 p.m., HUB assembly room.

Exhibits

Museum of Art — African Sculpture, Gallery A. Prints and Drawings from Central Pennsylvania Collectors, Gallery C, opening Jan. 20.

Zoller Gallery — Emblems of Seduction. Kern Gallery — Western State College of Colorado Faculty Art Exhibition. David Latt, photography, until Jan. 24. Christopher Weiland, pottery. Central Pennsylvania Scholastic Art Exhibit, opening Jan. 25.

Pattee Library — Jean Furst, prints, West Pattee Lobby. Robert Kaufman, paintings, East Pattee Lobby. The Energy Crisis, display, Main Undergraduate Library.

HUB specials

The HUB Terrace Room has introduced daily special meals for both lunch and dinner at prices much below customary cafeteria prices ala carte. No substitutions are permitted to benefit from these reduced prices. For the next week, the features (all accompanied with appropriate side dishes and beverages) are:

Sunday, Jan. 20 — dinner, roast pork w/dr. \$1.95; supper, tuna potato chip casserole \$1.30.

Monday, Jan. 21 — lunch, Chili con carne \$7.35; dinner, spaghetti w/meat sauce \$1.95.

Tuesday, Jan. 22 — lunch, chicken chow mein \$1.30; dinner, lamb hot pot \$1.43.

Wednesday, Jan. 23 — lunch, Welsh rarebit w/ 1st \$1.15; dinner, corned beef & cabbage \$1.65.

Thursday, Jan. 24 — lunch, lasagne \$1.11; dinner, meatloaf \$1.25.

Friday, Jan. 25 — lunch, fish cakes \$1.22; dinner, French fried chicken \$1.45.

Saturday, Jan. 26 — lunch, beef potpie w/onions \$1.95; dinner, Maryland chicken steak \$1.59.

WPXS highlights

Should we stop the construction of nuclear power plants? Or, are they the only present guarantee of power for the future? These are the questions Thursday, Jan. 17, at 8 p.m. on WPXS-TV, Channel 3, when "The Advocates" debate "Nuclear Power: Plans: Yes or No?"

Phyllis Diller, Shelley Berman, George Kirby, and Ann Landers all appear when "Religious America: Things No One Presents" "Your Health Follies" Friday, Jan. 18, at 7:30 p.m. on WPXS-TV, Channel 3. The half-hour program combines songs and comedy with information on five serious health problems: hypertension, emergency medical care, dental care for young children, accidental household poisoning, and lack of exercise. The program, produced by WOED-TV, Pittsburgh, may also be seen Sun., Jan. 20, at 6:30 p.m.

The Chabad Lubavitch community, an orthodox, mystical sect of Judaism that thrives in New York City, is the subject of "Religious America," Sunday, Jan. 20, at 8:30 p.m. on WPXS-TV. The half-hour program includes scenes of an Hasidic wedding and other events in the lives of the community's members.

American convicts serve longer sentences than in any other Western country. Does this mean that they are better prepared for parole? This and other questions about the institution of parole are explored on "Parole" Monday, Jan. 21, at 8 p.m. on Channel 3. The hour-long documentary is an in-depth cinema verite study of prison life and marks the first time that national television cameras have been permitted to film actual parole proceedings in their entirety. The program, filmed at the Washington State Penitentiary, focuses on the case histories of two convicts who are eligible for parole.

Maxim Gorky's "Enemies" is the premiere performance of "Theatre in America" Wednesday, Jan. 23, at 8:30 p.m. on WPXS-TV. The drama, censored in 1906 by Russian authorities because it "forecast violence for the workers," was also long-neglected in Russia after the revolution. The two-hour performance by the Repertory Theatre of Lincoln Center stars Clara Nye, Frances Sternhagen, and Ellis Rabb.

On the Artists Series, Friday, Jan. 25, in Schwab Auditorium, the Contemporary Chamber Ensemble will feature Arnold Schoenberg's "Pierrot Lunaire" and George Crumb's "Ancient Voices of Children." Tickets are sold to students Tuesday, Jan. 22, and to the general public Wednesday, Jan. 23, in the HUB.

Wind ensemble, Singers, cello, and Baroque music planned

Modern wind music, Gilbert and Sullivan, cello music, and a Renaissance-Baroque recital are features of the music offerings for the next week.

Friday, Jan. 18, the Symphonic Wind Ensemble, directed by Smith Toulson and composed of 42 student musicians from all the colleges, will perform six compositions that British and American composers wrote for the band. Aaron Copland, Gustav Holst, and Dello Joio are among the composers whose works will be played. The program will be given in the Music Building recital hall at 8:30 p.m.

Saturday, Jan. 19, in performances at 3 and 8:30 p.m. in Schwab Auditorium, the Penn State Singers, directed by Raymond Brown, will perform the Gilbert and Sullivan

opera, "Trial by Jury," in entirety, along with excerpts from the collaborators' popular operas, "The Mikado" and "Ruddigore." The "Trial by Jury" opera was the first opera written. Stage director for the performance here is Jerry James, theatre arts graduate student, and John Roslevich is production designer. Edward Steele, Sheila McCarthy, Tommie Irwin, Dean Waller, John Taylor, and Donald Shell are featured singers.

William Thomas, graduate student in music, will give a cello recital Monday, Jan. 21, at 8:30 p.m. in the Music Building. He will perform sonatas by Franck and Debussy, accompanied by Philip Deitra, assistant professor of music, and Ros-

sinis' "Duet in D Major for Contrabasso and Violoncello," with Robert Mellin, part-time music instructor, performing on the bass. Wednesday, Jan. 23, also at 8:30 p.m. in the Music Building, vocal and instrumental music of the Renaissance and Baroque periods will be the feature. Nancy Hadden, part-time music instructor, and Douglas Miller, assistant professor of music, will sing works by Bach, Schuetz, and Caccini. An ensemble which includes Mrs. Hadden, John Hadden, graduate students Erin Headley and John Shannon, and undergraduate Charles Metz, will do works by Georg Telemann and Jean Baptiste Loeili, using gamba, recorders, harpsichord, natural horn, and flute appropriate to the period.

Benefit music program for travel grant

French music will be highlighted in a benefit concert Thursday, January 24, at 8 p.m., in the Music Bldg, sponsored by L'Alliance Francaise, an organization of University and other area residents interested in things French.

Phyllis Triolo, concert pianist. French violinist Claire de Chevilly, and Nancy Hadden, flautist, will be featured. Mrs. Triolo, well known locally, has performed on many campuses in the East and later this year will perform with the State College Symphony both here and at Lock Haven State College.

Claire de Chevilly, who lives in Aix-en-Provence, was graduated with honors from the Conservatory of Music at Brest and has studied with Jean Fournier, now professor at the Paris Conservatory. She has given many public concerts with organ

or piano in concert halls, churches and cathedrals in southern France and for Radio Lyon.

Mrs. Hadden, part-time instructor at the University, has performed frequently on campus in ensembles of baroque music and solo.

Money derived from the program will be combined with receipts from last year's program by Mrs. Triolo to provide for a travel grant to France in the Summer of 1974. The grant will go to a student in any college at University Park or at one of the Commonwealth Campuses. Alliance Francaise of Paris will aid the grantee in housing and travel arrangements.

Tickets, at \$1 for students (with ID card) and \$2.50 for non-students, will be obtained at the HUB desk from Jan. 21 to the afternoon of Jan. 24, or at the box office the night of the performance.

Artists Series features chamber group

Tickets for the Artists Series program by the Contemporary Chamber Ensemble will go on sale to the general public Wednesday, Jan. 22, at 9 a.m., and to students Tuesday, Jan. 22, at 9 a.m. at the HUB. The performance by the Ensemble will be given Friday, Jan. 25, in Schwab Auditorium, at 8:30 p.m.

Conducted by Arthur Weisberg, the Ensemble was founded in 1960 for the basic purpose of performing 20th century music composed for ensembles smaller than full symphony-sized orchestras. The group of 15 instrumentalists now plays an average

of 30 programs a year and last summer held its first European tour.

Featured with the Ensemble will be mezzo-soprano Jan de Gaetani, who will sing, with her daughter Francesca, George Crumb's "Ancient Voices of Children," and will be heard in the other work to be played, "Pierrot Lunaire" by Arnold Schoenberg. One of the most active singers of the 1972-73 season, Jan appeared in all of the major cities in chamber concerts and recitals and with the New York Philharmonic, San Francisco, Cincinnati, New Orleans and Atlanta symphonies.

5 O'clock Theatre has one-act play

The second 5 O'clock Theatre presentation in the Winter Term will be "Now That Ed's Gone." Written by recent Penn State graduate Matt Cutugno, this original one-act play will open on Wednesday, January 23 at 5:20 p.m., and is described by the author as a "basement comedy."

The play concerns two lamenting individuals who sit in a basement and discuss the loss of their late comrade, Ed. An-

other person joins the group, and the play studies the interactions and dynamics of triangle relationships.

Directing "Now That Ed's Gone," is Christine Littleton (undergrad, Theatre Arts) and associate director Richard Fall.

"Now That Ed's Gone" will also be presented in the Pavilion Theatre on Thursday, January 24 at 5:20 p.m. and Friday, January 25 at 7:20 p.m.

Art lectures

A three-part lecture series related to Medieval art will be inaugurated today (Thursday, Jan. 17) at 3 p.m. in the HUB assembly room when Dr. Reiner Hausscher, University of Bonn, West Germany, will speak on "The Bible Moralisee Text and Miniatures in a Group of French Illuminated Manuscripts of the 13th Century." Dr. Hausscher is currently a visiting fellow at the Princeton Center for Advanced Study.

The lectures were arranged by Dr. Jan van der Meulen, professor of art history, in conjunction with the Interdisciplinary Seminar on "Artist and Poet in the 12th and 13th Centuries," conducted by the art history and French departments. The seminars seek to explore the principles guiding Medieval art and literature and are receiving the support of the Institute of Arts and Humanities and the Interdisciplinary Program in the Humanities.

The other lectures will be held Feb. 7 and Feb. 14.

Museum show

The Museum of Art will open a show Sunday, Jan. 20, of prints and drawings from Central Pennsylvania collectors, the first of a planned series of exhibits selected from the holdings of area collectors.

The 110 works include etchings, drawings, woodcuts, serigraphs, lithographs, and watercolors, and are highly varied in subject and style. Spanning a period of time from the sixteenth century to the present, the works in the exhibit are by such masters as Albrecht Duerer, Marc Chagall, Paul Cezanne, Auguste Renoir, Pablo Picasso, and many others.

The selection of works was made by Benjamin Williams, curator of the North Carolina Museum of Art. The show is accompanied by an illustrated catalog.

Prints and Drawings by Pennsylvania Collectors will continue in Gallery C of the Museum through Mar. 3. In Gallery A, the African sculpture show will be on display through Feb. 3. Museum hours are noon to 5 p.m. every day but Monday, when the Museum is closed.

NEWS —

(Continued from page one)

books if they can, to one of the following points: 528 E. Hamilton Ave. (rear); 424 Douglas Drive (garage); 2-E Graduate Circle; 617 W. Main St., Boalsburg; or 130 E. Linn St., Bellefonte. Call 237-8088 if unable to deliver books.

BUS TOKENS

The Department of Transportation has available bus tokens for use on the University buses which began running again January 3. The tokens may be purchased by other departments at the rate of \$4.00 per roll (of 40 tokens), through Interdepartmental Transfers. It would be helpful to make the IDT out to the attention of Becky Hubler.

Affirmative action program refinements

Further refinements in the University's affirmative action program are being made following recent conferences with representatives of the Office of Civil Rights, Department of Health, Education, and Welfare.

During the conferences, OCR representatives recommended that the University further expand upon its statements of University policies as they specifically apply to equal employment opportunities for minorities and women.

Also recommended was incorporation into the affirmative action plan of a description of how the University recruits, employs, promotes and terminates personnel, how it corrects deficiencies in employment practices, and similar procedural matters covered by other University regulations but not presently incorporated in the affirmative action program.

Library Notes

Reserve reading lists for Spring term 1974 are to be submitted to the Main Undergraduate Library on or before January 31, to allow enough time for processing. Lists received after the deadline will be accepted if the material requested is not needed until the beginning of the third week of classes.

The January 31 deadline provides a reasonable amount of time to order books and to prepare available materials for reserve.

Only required readings, which will circulate either for a two-hour period or for an overnight loan period, will be placed on reserve.

Lists should be submitted on reserve form which are available by mail or in person from the Undergraduate Library, 1011 Patton. Lists should be typewritten and contain full bibliographical information, including the author's name, title, publisher and the date of publication.

The Reference Department of Patton Library is offering additional help in students this term. Any student who is writing a paper who has problems finding information in the library should register the topic of the paper at the Reference Department Desk, First Floor, East Patton. Librarians will then meet with students at any one of the following times: January 16, 17, 23 and 24 at 2:00 p.m. Registration in advance is required.

Faculty resource

The Faculty Resource List that the Offices of Student Activities and Student Residential Life Programs have been compiling is now ready for distribution. The List is divided into three sections: (1) alphabetical listing of titles/topics with faculty names arranged in forty categories; (2) alphabetical listing of faculty names with titles/topics; and (3) names, addresses, and telephone numbers of University administrators.

The list will be distributed to resident assistants, residence hall student government, sororities, fraternities, major student organizations, and the dean's office. Additional copies will be available in the Office of Student Activities, 202 Helms Union, and the Office of Residential Life Programs, 330 Boucke Building.

The generosity of faculty and staff in responding to the survey that was mailed to them in October is most appreciated.

A total of 250 usable responses from as many as New Delhi, India, were received.

The purpose of the Faculty Resource List is to aid student organizations, organizational advisors, and all other members of the University community in preparing extra-curricular programs and in fostering meaningful interaction between students and faculty members.

Staff vacancies

The following vacancies for positions classified as staff or nonexempt have been listed with the University Employment Division for filling. This announcement is made so that University employees who are interested in promotion or application by calling the Employment Division, 665-1171 (Network Line 475-1387). Applications for the staff vacancies will be accepted until 5:00 p.m. Thursday, January 24, 1974.

5 P.M., THURSDAY, JANUARY 24, 1974

COUNSELOR, CAREER DEVELOPMENT AND PLACEMENT
Altoona Campus

Responsible for individual and group counseling, focusing primarily on educational/vocational concerns; assisting with pre-registration testing; personal counseling and orientation; provide consultation to other members of the Student Affairs staff; and to the campus community. Master's degree in Clinical Psychology or Counseling or equivalent. Counselor Education or related area and a minimum of three years applicable experience preferred.

MANAGER, FOOD SERVICE
Hershey Medical Center

Responsible for planning, organizing and directing Food Service Department of the Medical Center. Bachelor's degree or equivalent with 1-4 years experience in Food Service.

Application for such vacancies are considered without regard to race, color, creed, sex, or national origin.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

Thomas Hammonds (left), retiring Jan. 31, presented to the University, Continuing Education in particular, his framed "rub" of a brass floor plate in a cathedral in Gloucester, England. The rub was made by Newwood A. Hedden, who retired from the University two years ago. Hammonds framed the rub. With the "rub" is Hammonds' wife, Dorothy. Tom was special assistant to the director of Continuing Education for media learning resources. The rub will hang in the J. O. Keller Building.

Problems seen in plan for administrative structure

U. Council rejects Commonwealth Campus proposal

The University Council last week suggested that alternate means might better achieve the goals sought by the Proposals for New Administrative Structures to Implement Provisions of the Academic Policy Plan Relating to Commonwealth Campuses.

In accepting the report of a sub-committee appointed to prepare recommendations to the University Administration, the Council indicated the very diversity of the University made it difficult for a single model to serve in all cases.

The Council sub-committee was especially concerned with the development of a system that would assure equality of eval-

uation of all faculty members regardless of location or assigned duties. This is also a major objective of the proposal.

Two problems in particular concerned the Council sub-committee. One was the "conglomerate" effect of placing associate degree work, continuing education and lower level baccalaureate programs within the same administrative framework. Pointing out the growing role of continuing education and the likelihood that senior and graduate faculty would become increasingly involved in it, the Council found the separation inappropriate. Moreover, it was pointed out that in many departments at University Park, senior and graduate

faculty also teach at the beginning course level, which would be separated administratively by the proposed structure from upper level and graduate work.

The Council also sensed problems in placing faculty in more generalized discipline categories. This has been an excellent model in the College of Engineering, where the General Engineering Department is in charge of all associate degree courses in engineering. The faculty has a strong community of interest, even though its members come from different engineering fields. The same cohesiveness probably would not be present, for ex-

Penn State officials had major role in development

Higher education financing plan revealed by PACU

University officials played a key role in development of a comprehensive proposal for financing higher education in Pennsylvania in the next decade, which was unveiled in Harrisburg last week.

The plan, including support for both public and independent institutions and direct student aid, was disclosed at a news conference by the Pennsylvania Association of Colleges and Universities, which represents 17 public and private universities and colleges in the State.

It is believed to be the first time that a State association embracing all sectors

of higher education agreed on a single overall State financing plan.

President Oswald serves as association secretary-treasurer and represented the four State-related universities at the news conference. Dr. Stanley O. Kenberry, senior vice president for University development and relations, and Dr. Larry L. Leslie, professor of education, were members of the document-writing team.

Besides recommending State aid to private colleges, the plan calls for expansion of State grants to low and middle-income students.

Noting that tuitions at public colleges and universities in the State are among the highest in the nation, the report said they should not be raised "for the foreseeable future." It also recommended that independent institutions make "concerted efforts to control tuition increases."

Specific proposals involving aid to students and institutions included.

—Raise the maximum Pennsylvania Higher Education Assistance Agency grant from \$1,200 to \$2,000 and fix the family income ceiling at \$20,000 annually rather than the

(Continued on page four)

Kardos has second career in living filter project

To the layman, it may be just a bunch of dirt, but Dr. Louis T. Kardos has devoted most of his life to soil and its chemistry, so he sees things somewhat differently.

"Soil is the matrix in which all our staple foods are grown," he says, "the reservoir for our water, the habitat for a tremendously complex microorganic population. It is an extremely complicated system which has developed as the result of tens of thousands of years of physical, chemical, and biological processes."

Ever since his first acquaintance with

soil chemistry — as an undergraduate at Rutgers in the early 'thirties — Dr. Kardos has been investigating soil's fertility, its structure relations, irrigation, and management. His extensive experience laid the groundwork for what in the past 12 years has become a second and almost entirely new career as one of the founding fathers of Penn State's "living filter" project.

Widely publicized, the living filter is a method of disposing of sewage effluent by spraying it on agricultural or forest lands. There the effluent not only acts as a fer-

tilizer but is also completely purified and cleansed by the soil by the time it has returned to the ground water. Recently, the project has also been experimenting with returning sewage sludge to the land.

Dr. Kardos has been actively involved in the project from its inception and in 1968 became coordinator of the Waste Water Renovation and Conservation Research Program as it is formally known.

"All of a sudden, I've had to learn about sanitary engineering and waste water treatment plants," he notes. "There have been a number of new consulting activities as other universities, industries, and municipalities have sought to learn about the project."

Last year alone, for example, Dr. Kardos lectured on the waste water project at Connecticut, Massachusetts, Michigan State, and Missouri universities.

Although his studiousness as a boy earned him the nickname, "Doc," Dr. Kardos's decision to enter graduate school and the field of soil chemistry was based solely on economic considerations — specifically, the chance to earn an extra \$12.50 a month.

"I started college in 1928," he recalls, "and by the time I was ready to graduate in 1932, two of my brothers were on W.P.A., and my parents' savings account had been wiped out. I had majored in chemistry and also sandwiched in enough education credits to be certified for teaching, but there were no jobs in either industry or the schools."

"From my junior year on, I had worked part time doing analytical chores for a soil chemist at Rutgers, and he offered me an assistantship at \$37.50 a month. I could have had one in analytical chemistry,

Board reelects Baker chairman

Michael Baker, Jr., of Beaver, was re-elected to his second term as president of the Board of Trustees last week, and Willem K. Ulerich, of Clearfield, was named vice-president for his second term, both for one-year terms.

Mr. Baker, chairman of the Board, Electronics Systems Corp., Beaver, was first elected to the Board of Trustees by alumni in 1964. Mr. Ulerich, who is president of Progressive Publishing Co., Clearfield, serves as an appointee of the Governor. He was first named to the Board in 1951, served until 1956, and then again was appointed in 1964.

Re-elected to the Executive Committee were H. Jesse Anelle, San Francisco, Calif.; Frederick J. Close, North Madison, O.; Dr. Helen Davies, Philadelphia; Charles T. Douds, Camp Hill; Ralph Hetzel, Jr., Hudson, O.; J. Lin Huber, St. Thomas; Charles P. Neidig, Haverford; Ridge Riley, Boalsburg; Hardy Williams, Philadelphia; J. Lewis Williams, Uniontown; and Dr. Helen D. Wise, Stato College.

Trustee actions

Among other actions taken by the Board of Trustees last weekend at its meeting at University Park were the following:

Approved a change in name for the Pennsylvania Transportation and Traffic Safety Center to the Pennsylvania Transportation Center, to more clearly define the mission of the research center which is directed by Dr. Thomas D. Larson, professor of civil engineering.

Designated Thursday, May 30, as the date for delegate election of trustees and the date for counting ballots for alumni trustees election.

Approved sketch plans for a business services building at University Park and authorized employment of an architect to finalize the plans. A one-story building to be located west of the Air National Guard Armory north of the main campus will provide space for printing services, addressing services, mail services, and offices of the Department of General Services, now located in the Service Buildings on west campus where the new Environmental Sciences Bldg. will be constructed.

Approved final plans for construction of two additional floors to the north wing of Chandler Laboratory. The original design of the building contained these two additional floors but changes were made for cost reasons.

Approved final plans for the Evelyn G. Frederick Health Center, at Millersburg, to be operated by the Hershey Medical Center. This will be an ambulatory care cen-

Dr. Louis Kardos — "Soil . . . is an extremely complicated system."

Fox, Burnham appointed to new posts

Dr. C. Wayne Burnham

Dr. Thomas G. Fox

Dr. C. Wayne Burnham, professor of geochemistry, has been named head of the Department of Geochemical Sciences, succeeding Dr. Arnulf Muan who has returned to full-time teaching and research.

Dr. Burnham has served on the University faculty since 1955. His research in petrology and the geochemistry of ore deposits has gained national and international recognition. He was invited by the Australian-American Educational Foundation to lecture throughout Australia in 1970, and was chosen by the Society of Economic Geologists to be the Distinguished Lecturer of the Society for 1971. Last June, he was invited to visit the U.S.S.R. as a special guest of Russia's Academy of Sciences.

He is currently serving as a president of the Geochemical Society, an international scientific organization with more than 1,500 members, and as chairman of the advisory screening committee in geology of the Committee for the International Exchange Persons (Fulbright-Heys).

Dr. Thomas G. Fox, associate professor of economics, has been named dean of faculty at Behrend College in Erie. He will serve also as associate professor of

economics.

His appointment, to become effective March 15, was approved last week by the Board of Trustees.

A Penn State faculty member since 1966, Dr. Fox also has served as a member of the University's Institute for Research on Human Resources.

Dr. Fox will serve as the chief academic officer and will be responsible for the planning, implementation and evaluation of programs of resident instruction, continuing education and research in areas of study approved for Behrend.

For administrative matters, Dr. Fox will report to Irvin H. Kochel, Behrend College director, and as chief academic officer, he will report to the Provost, Dr. Russell E. Larson.

A graduate of Salina Senior High School, Salina, Kan., Dr. Fox received his bachelor of arts degree in business administration and economics at Kansas Wesleyan University in Salina.

His master of arts degree with a major in economics was conferred by Syracuse University, where he also received his Ph.D. in economics.

Duties combined in C.C. system office

Academic and administrative affairs of the Commonwealth Campus system will be consolidated in a single University unit in July, 1974.

The consolidation was approved by the University Board of Trustees on Saturday in recommendation of President Oswald, to take effect on the retirement of Kenneth Holderman, vice president for Commonwealth Campuses, who has been in charge of administrative affairs at the campuses.

Administrative functions will be added to the academic responsibilities already assigned to Dr. Robert G. Quinn, dean of academic instruction for the Campuses, thus paralleling the responsibilities assigned to other deans within the University. Directors of the Campuses will report directly to Dean Quinn.

The Trustees further established two new positions effective July 1, in the consolidated office — an administrative director of the Commonwealth Campuses and an associate dean for academic instruction.

The administrative director of the Commonwealth Campuses will be responsible under Dean Quinn for administrative and development matters. The associate dean, whose appointment will be based on the recommendation of a faculty search committee, will work with Dean Quinn on academic affairs. As in the past, Dr. Quinn will report to the University Provost, Dr. Russell E. Larson, and through him to the President.

Data on variety of social indicators

Study of State's elderly completed

An in-depth study of elderly persons in Pennsylvania, using selected social indicators from the 1970 census, has been made by a task force in the Department of Agricultural Economics and Rural Sociology, directed by Dr. J. Patrick Madden, professor of agricultural economics, and John Gerweck, associate director.

The study was made for the Bureau of Aging of the Pennsylvania Department of Public Welfare.

Data books, providing a variety of information uncovered in the study, were published for each county of the Commonwealth, the data itself being tabulated by minor civil division within the county.

The books include tables and computer maps summarizing data by civil division on persons 65 and over in the areas of hous-

ing, poverty, minority status, and whether living alone.

Robert C. Benedict, director of the Bureau of Aging, says in the foreword, "The indicators presented in this book should prove useful in identifying the numbers and priority needs for a broad range of social services. It is hoped that publication of the information in this form will contribute to the development of comprehensive and coordinated service systems in every community throughout the Commonwealth."

Data concerning Centre County includes the following:

Of the total population of 99,267 (1970) 6370 were 65 or older, 1807 of these (6370) had incomes below the poverty level; 21 of the 1921 non-white County residents were 65 or older; 1722 of those 65 or older lived alone and 615 persons 65 or older lived in places that lacked complete plumbing facilities.

The task force included, in addition to Dr. Madden and Gerweck, John C. Mullin, chief programmer; M. Hosterman, research assistant; Jacqueline Sobel, regional planner; C. Peter Pulo, regional planner; and Margaret M. Geelan, geropsychologist.

Copies of data books for all counties will be on file in the Documents "Department, Room 203 Central Palace, of the University Library, and in the Gerontology Working Collection, Room S-18, Human Development.

Individual copies may be purchased at cost from the Department of Agricultural Economics and Rural Sociology, Room 103 Weaver.

Deaths

Rebecca Doerner, who retired in 1963 as administrative assistant in the International Student Affairs office, died January 16. She was 73. Known as a "mother hen" for international students, Mrs. Doerner served the University for 21 years, being named director of international student affairs in 1949 after serving in the Registrar's office.

Dr. Sylvester K. Stevens, who served on the faculty in the history department from 1927 to 1937 and as State historian from 1937 to 1956, died Jan. 16 at the age of 69. From 1956 to 1972, when he retired, he was executive director of the Pennsylvania Historical and Museum Commission. He was named Distinguished Alumnus of the University in 1966. He earned the B.A. degree in 1926 and M.A. in 1927, in arts and letters. In 1945 he received a Ph.D. degree from Columbia University and later was given honorary doctorates by Lebanon Valley College, Susquehanna University, and Moravian College.

Honors

Dr. Herschel W. Leibowitz, professor of psychology, organized a Seminar on the Perception of Space and Motion that was sponsored by the National Science Foundation as part of the U.S. Japan Cooperative Science Program. Eight Japanese and seven American scientists participated in the seminar, the first to deal with a topic in psychology or the social sciences under the Program's sponsorship. It was held in Honolulu in December.

Appointed

Dr. Andrew Pytel, associate professor of engineering mechanics, has been named assistant to Dr. Robert G. Quinn, dean of academic instruction for Commonwealth Campuses.

Dr. Pytel, who will serve on a temporary basis until September, 1974, will have offices in 205 Old Main, phone 865-3468. He replaces Dr. John Irbly, who has accepted the position of regional director of cooperative extension service and regional coordinator of continuing education and public service at the University of Illinois.

Book on medieval rhetoric by Benson

"Readings in Medieval Rhetoric," a book co-edited by Dr. Thomas W. Benson, associate professor of speech, has been published by Indiana University Press.

The book presents treatises from nearly every century of the period between 430 and 1416 A.D. to illustrate the diversity of interest as well as the continuity of approach which marked the rhetoric of the Middle Ages. Many of the 36 treatises are

translated into English for the first time.

All important developments in rhetoric as well as key treatises on preaching and dictamen, the medieval art of letter writing, are surveyed in the anthology and prefaced by brief commentaries.

Joseph M. Miller and Michael H. Prosser compiled the book along with Dr. Benson, who also co-edited an earlier volume, "Readings in Classical Rhetoric."

Funding Opportunities

For more information, call 865-1372 except where noted below, and refer to the item by its number and the general information provided. People with grants information for dissemination in this column should call the same number.

January 24, 1974

(113-1) The NSF/FRAN program (Research Applied to National Needs) is organized into three major parts one of which is Advanced Technology Applications. This further divided into: energy research and technology, disaster and natural hazard research, and technological opportunities. Energy research includes: energy system, resources, and conversion; solar energy and energy fuel transportation. Disaster research includes earthquake engineering and fire research. Technological opportunities includes: advanced industrial processing, excavation and tunneling technology and instrumentation technology. More information is available (phone 865-1372). Three to six months are required for proposal review.

(113-2) Application from College Teachers to Seminar Directors for (NEH) Summer Seminar programs must be postmarked no later than Feb. 11, 1974, according to the National Endowment for the Humanities. For a list of Summer Seminars, contact Marjorie Berlincourt at NEH (202)382-5827.

(113-3) NEH Education Project Grants have a March 15 deadline. Project grants will be made to researchers who wish to develop and test imaginative approaches to humanities education — especially models for other institutions. Specific areas of research priority include: experiments in humanities education, development of teaching materials, educational use and library training institutes or conferences and development of interdisciplinary courses and programs. Ten percent cost sharing is required. Grants range from \$1000 to \$300,000 and average \$42,000.

(113-4) To help scientists identify problems of interest to both themselves and to the U.S. Air Force, the Air Force Office of Scientific Research (AFOSR) has issued a *Proposer's Guide to the AFOSR Research Program*. Six scientific directorates make up the Office: Aerospace, Chemical, Electronic and Solid State, Life, Mathematical and Information Sciences and Physics. The Guide lists subject areas and provides descriptions of the research areas. Also available are brochures for proposal guidelines for Grants for Basic Research, Contracts for Basic Research, and Air Force Systems Command (AFSC) Guide for Unsolicited Proposals.

(113-5) Creative writers may apply to the National Endowment for the Arts for 1975 \$5000 fellowships. Applicants must have published a novel, two or more shorter works, or a play that has been produced. Write to the NEA, Grants Office, Washington, D.C. 20506 for more information. **REMINISCENTS — DEADLINE DATES**

Jan. 20 for NIE Grants for Research in Education (Jan. 1974 INTERCOM #111-1) . . . Feb. 1 (extended) for NIH Research Fellowships (Dec. 6 and Jan. 17 INTERCOM #108-5 and #112-2) . . . Feb. 1, June 1 and Oct. 1 for ADAMA research grants (Jan. 17 INTERCOM #112-4) and for all other NIH research and resource grants . . . Feb. 4 and several subsequent for NEA Museum Programs (Jan. 3 INTERCOM #101-3) . . . Feb. 15 for NSF Instructional Scientific Equipment Program (Jan. 20 INTERCOM #111-4) . . . March 1 for Smithsonian research grants (Jan. 17 INTERCOM #112-3).

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Weaver), or 475-1387. Applications for these vacancies will be accepted until:

5 p.m., February 7, 1974

HOME HORTICULTURAL ADVISOR

Eric County Extension
Responsible for the development and implementation of an effective home horticultural program to provide current and accurate home horticulture information to Erie County home owners. Associate degree or equivalent training in horticulture field related to home grounds and garden maintenance. One to two years' effective experience in home horticultural practice is required.

Applications for staff vacancies are considered without regard to race, color, creed, sex, or national origin.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

News in brief

ART WORK EXHIBITED

Paintings by Yar Chomicky, professor of art education, and George Zorelich, professor of art, are being displayed in an exhibit at the Susquehanna University Campus Center. The show is the 13th annual Mid-State Artists Exhibit, which continues through January.

ON TODAY SHOW

Dr. Stanley Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies will appear on the NBC-TV "Today Show" Tuesday, Jan. 29. His book, "Whistler is to be released the day before. In Central Pennsylvania area, Channel 15 WJAC, Johnstown, carries the program from 7 to 9 a.m.

BERKS FENCING

The Berks Campus physical education program now includes the sport of fencing, and students have responded with enthusiasm to the teaching of Susan Monk, instructor in physical education. Several students are enrolled in the three sessions in the Winter Term, more than ten percent of the total enrollment at the Camp. Miss Monk is a Penn State graduate in psychology with a master's degree in physical education.

OGONTZ COURSE

"Energy, the Problems of Today," is a new physics course to be offered at the Ogontz Campus during the Spring Term. Written by Eleanor D. Wilson, assistant professor of physics, the course aims to develop a basic vocabulary and understanding related to current energy problems, including geographic, economic and environmental considerations.

University Calendar

January 24-February 3, 1974

Special Events

Thursday-Friday, Jan. 24-25 — 5 O'Clock Theatre, "Now That Ed's Gone," by Matt Cugugno. Thursday at 5:20 p.m., Friday at 7:20 p.m., Pavilion Theatre.

Thursday, Jan. 24 — Sports: Women's Basketball, vs. Gettysburg, 3 p.m.; Women's Bowling, vs. Gettysburg, 3 p.m.

Thursday, Jan. 24 — Benefit concert, sponsored by L'Ailliance Francaise, 8 p.m., Phyllis Bldg. recital hall, with pianist Sherryl Trilio, violinist Claire de Chevilly, and flautist Nancy Madden. Tickets required; may be purchased at door.

Friday, Jan. 25 — Artists Series, Contemporary Chamber Ensemble, 8:30 p.m., Schwab.

Friday, Jan. 25 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, Jan. 26 — Chinese Student Association New Year Celebration (dinner and entertainment) Rooms 102 and 104 Kern, dinner served, 6-7:30 p.m. Postponed from last week.

Saturday, Jan. 26 — Sports: Men's Gymnastics, vs. Navy, 2 p.m., Rec Hall. Women's Fencing, vs. Madison, 10 a.m., White.

Sunday, Jan. 27 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Jan. 27 — Chapel Service, 11 a.m., Eisenhower Chapel. Jean T. Bottman, Christian Science practitioner, Pitts-burgh.

Sunday, Jan. 27 — PSU Symphony Orchestra Young People's Concert, 3:30 p.m., Schwab.

Sunday, Jan. 27 — PSU Sport Parachute Club Paraskating, 9 a.m., Stone Valley.

Sunday, Jan. 27 — Alpha Chi Omega Greek Sing, 14 p.m., HUB ballroom.

Monday, Jan. 28 — June Miller organ recital, 8:30 p.m., Music Bldg. recital hall.

Tuesday, Jan. 29 — Hillel Foundation, film on Israel, 8:10 p.m., HUB assembly room.

Tuesday, Jan. 29 — Colloquy Festival of the Arts, Stanley Kunitz, poet, 8 p.m., HUB ballroom.

Wednesday, Jan. 30 — Artists Series, The Films of Luis Bunuel, "Viridiana," 8:30 p.m., Schwab.

Wednesday, Jan. 30 — Sports: Men's Basketball, vs. Syracuse, 8 p.m., Rec Hall.

Wednesday, Jan. 30 — University Theatre Preview, "Saint Joan," 7:30 p.m., Playhouse Theatre.

Wednesday, Jan. 30 — Claremont Wood-

wind Quintet, 8:30 p.m., Music Bldg. recital hall.

Friday, Feb. 1 — Artists Series, William Windom as "James Thurber," 8:30 p.m., Schwab.

Friday, Feb. 1 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday-Saturday, Feb. 1-2 — University Theatre, "Saint Joan," 7:30 p.m., Playhouse Theatre.

Saturday, Feb. 2 — Sports: Women's Bowling, vs. Cornell, 1 p.m.; Women's Rifle, vs. Drexel, Rider, Philadelphia College of Pharmacy, 9 a.m. Men's Fencing, vs. Army, 2 p.m.; Men's Rifle, vs. Navy.

Saturday, Feb. 2 — WHRA Record Hop, 8 p.m., Simmons Lounge.

Saturday, Feb. 2 — Colloquy Festival of the Arts, Jimmy Breslin, author, 8 p.m., Schwab.

Sunday, Feb. 3 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Feb. 3 — Chapel Service, 11 a.m., Eisenhower Chapel. Rabbi Chaim E. Schertz, B'nai B'rith Hillel Foundation, State College.

Sunday, Feb. 3 — Music Guild, An Evening of Classical Music, 8 p.m., Room 112 Kern.

Artists Series

Actor William Windom brings humorist James Thurber to life in his characterizations on the Artists Series, Friday, Feb. 1, at 8:30 p.m. in Schwab. Tickets go on sale in general public Wednesday, Jan. 30, to students Jan. 25, at the HUB.

Seminars

Thursday, Jan. 24 — Nuclear Engineering, 4 p.m., Room 111 Breazeale Nuclear Reactor Facility. Dr. Edward H. Klevans, on "Controlled Fusion."

Thursday, Jan. 24 — Chemistry, 12:45 p.m., Room 310 Whitmore. Charles Johnson, University of North Carolina, on "Magnetic Resonance Studies of Tunneling and Rotation in Solids."

Thursday, Jan. 24 — Physics, 3:35 p.m., Room 117 Osmond. Peter D. Barnes, Carnegie-Mellon University, on "Nuclear Physics with K-Meson Atoms."

Thursday, Jan. 24 — Mining, 4 p.m., Room 302 Min. Ind. Mr. Elmore Girm, Mining Specialist, Mine Drainage Pollution Control Agency, Cincinnati, on "Contour Stripping Techniques."

Thursday, Jan. 24 — Agronomy, 3:55 p.m., Room 301 Agrl. Adm. G. W. McKee, on "Interdisciplinary Approach to Agronomy Research."

Thursday, Jan. 24 — Central Pa. Section, AIAA, 4 p.m., Room 232 Hammond. Dr. William George, ARL, on "Special and Temporal Resolution in Dynamic Flow Measurement."

Thursday, Jan. 24 — Mechanical Engineering, 4 p.m., Room 103 Mechanical Eng.

Bldg. Brent Zarienga, Graduate Asst., and David Czarnetzki, DuPont Fellow, on "In Vitro Evaluation and Comparison of Two Methods of Left Heart Asst."

Thursday, Jan. 24 — Engineering Acoustics, 4 p.m., Room 71 Willard. Gerald C. Lauchie, Research Assistant, Applied Research Lab., on "Acoustical Diffraction by Spheroidal Baffles."

Thursday, Jan. 24 — Meteorology, 3:55 p.m., Room 26 Min. Sci. Dr. John A. Dutton on "Some Problems in Global Thermodynamics."

Monday, Jan. 28 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Dr. D. D. Davis on "Extension Plant Pathology: Programs and Program Development for Air Environment Quality."

Monday, Jan. 28 — "Current Issues in Food and Agriculture," 1 p.m., Room 202 Bortland. Carol A. Long, Graduate Asst. food science, on "Land Use and Food Production."

Monday, Jan. 28 — Biochemistry, 4 p.m., Room 101 Althouse. Robert Drummond, on "L-Glutamic Acid Decarboxylase in Non-Neutral Tissues of the Mouse."

Tuesday, Jan. 29 — Geosciences, 4 p.m., Room 26 Min. Sci. Bruce Julian, Lincoln Laboratory, M.I.T., on "Three Dimensional Structure of the Earth's Mantle: Sels-

logical Data Relating to the Driving Mechanisms of Plate Tectonics."

Tuesday, Jan. 29 — Solid State Physics, 1 p.m., Room 445 Davey. Dr. Walter King, Applied Research Laboratory, on "Theoretical Analogies of Flow Generated Noise in Fluids."

Tuesday, Jan. 29 — Chemical Engineering, 3:50 p.m., Room 140 Fenske. E. E. Klaus on "Chemical Aspects of Lubrication."

Tuesday, Jan. 29 — Comparative Literature Luncheon and Discussion, 12:15 p.m., HUB Dining Room A. Manfred Keune.

Wednesday, Jan. 30 — Analytical Chemistry, 8:30 a.m., Room 310 Whitmore. B. L. Arnold on "A New Approach to Liquid Phases in Gas-Liquid Chromatography."

Wednesday, Jan. 30 — Biochemistry, 4 p.m., Room 101 Althouse. P. Nix on "Three Dimensional Structure of the Hemoglobin Crystal."

Thursday, Jan. 31 — Meteorology, 3:55 p.m., Room 26 Min. Sci. Dr. Richard A. Anthon on "Initial Data Requirements for Operational Hurricane Prediction as Revealed by Dynamic Initialization."

Thursday, Jan. 31 — Remote Sensing, 1 p.m., Room 225 E. West. A. David

Wilson, graduate in agronomy, on "Agricultural Land Use Mapping Using ERTS-1 Data."

Thursday, Jan. 31 — Mechanical Engineering, 4 p.m., Room 103 Mechanical Eng. Bldg. Charles Hendricks, graduate asst., on "The Prediction of Turbulent Confinement Flow."

Thursday, Jan. 31 — Chemistry, 12:45 p.m., Room 310 Whitmore. Melvyn R. Churchill, University of Illinois, on "Recent Structure Studies on Organometallic Complexes."

Thursday, Jan. 31 — Agronomy, 3:55 p.m., Room 301 Agrl. Adm. L. Steckler and R. Cunningham on "Variability in Soil Mapping Units."

Thursday, Jan. 31 — Mining, 4 p.m., Room 302 Min. Sci. Dr. H. R. Hardy, Jr., mining engineering, on "Rock Mechanics and Mining Research in Europe."

Thursday, Jan. 31 — Physics, 3:35 p.m., Room 117 Osmond. Judah W. Eisenberg, University of Virginia, on "Recent Developments in Nuclear Physics."

Friday, Feb. 1 — "Two Cultures Dialogue," 12:30 p.m., Room 189 Materials Research Lab. C. R. Hausman, philosophy, and T. H. Rogers, English, on "Value Considerations in the Humanities."

WPSX highlights

"The Humanities Film Forum," a series of ten major international films, begins Thursday, Jan. 24, at 9 p.m. on WPSX-TV, Channel 3, with British director Tony Richardson's unorthodox version of "Hamlet," starring Nicol Williamson and Marianne Faithfull. Williamson's portrayal of the Prince has been called "revolutionary" and "a Hamlet for today." Following the film, host James Billington and his guests examine the film's humanistic values in terms of the time it depicts, the time it was made, and today. The series may also be seen Saturdays at 8:30 p.m.

The little-known, but warlike Kreen-Akrore tribe of Brazil's Amazon jungle is the subject of "The Tribe That Hides from Man" Monday, Jan. 28, at 8 p.m. on WPSX-TV. The hour-long documentary records the search for the tribe by Claudio and Orlando Villas Boas, Brazil's almost legendary explorers. Their purpose: to find and relocate the Indians in a protected jungle refuge before the Indians fall victim to prospectors and developers who have invaded the jungles.

Journalist Bill Moyers talks with union leader Harry Bridges in a special hour-long edition of "Bill Moyers' Journal" Tuesday, Jan. 29, at 8 p.m. on WPSX-TV. Bridges, the longtime President of the International

Longshoremen's and Warehousemen's Union, was a central figure in American labor struggles in the 1930s. In this rare television interview, the 78-year-old union leader recalls the early days of unionism in the United States, reflects on the current state of the American working man, and talks about his life.

Estelle Parsons and Jack Cassidy star in "June Moon," an American comedy classic by George S. Kaufman and Ring Lardner, Wednesday, Jan. 30, at 8:30 p.m. on WPSX-TV, Channel 3.

Exhibits

Museum of Art — African Sculpture, Gallery A. Prints and Drawings from Central Pennsylvania Collectors, Gallery C. Selections from the Permanent Collection, Gallery B.

Zoller Gallery — Emblems of Seduction, 16th century to present, through Jan. 26. Opening Jan. 28, BFA Show.

Chambers Gallery — Paintings and drawings by Yar Chocky. Fiber bags and other constructions by David B. Van Dommelen.

Kern Gallery — Central Pennsylvania Scholastic Art Exhibit Opening Feb. 2, Paul Harcharik, prints.

Pattee Library — Jean Furth, prints, West Pattee Lobby. Peter Kaufman, paintings, East Pattee Lobby. The Energy Crisis, display, Main Undergraduate Library.

Meetings

Monday, Jan. 28 — PSU Society of Student Social Workers, 7:30 p.m., Room 260 Willard. All interested welcome.

Lectures

Wednesday, Jan. 30 — Dr. Barry L. Zoumas, Hershey Foods, on "Nutritional Labeling," 7:30 p.m., Room 117 Bortland, sponsored by Food Science Club.

HUB specials

The HUB Terrace has initiated daily special meals for both lunch and dinner at prices much below university cafeteria prices ala carte. No substitutions are permitted to benefit from these reduced prices. For the noon price, the features (all accompanied with appropriate side dishes and beverage) are:

Sunday, Jan. 27 — dinner, roast turkey w/dr. \$1.99; supper, sausage paltie/pa. tilt. \$2.99.

Monday, Jan. 28 — lunch, lasagne \$1.11; dinner, chicken tetrazzini \$1.47.

Tuesday, Jan. 29 — lunch, chicken beef w/ist. \$1.19; dinner, hot meat sandwich \$1.47.

Wednesday, Jan. 30 — lunch, grilled ham & cheese sandwich \$1.35; dinner, macaroni & cheese \$1.69.

Thursday, Jan. 31 — lunch, turkey turnover \$1.19; dinner, Italian spaghetti \$1.19.

Friday, Feb. 1 — lunch, tuna noodle casserole \$1.11; dinner, hot cakes \$1.19.

Saturday, Feb. 2 — lunch, chicken chow mein/rice \$8.99; dinner, frank's & beans \$1.29.

Films

Thursday-Sunday, Jan. 24-27 — Arnold Air Society, "Stop the World," 7 and 9 p.m., Room 105 Forum.

Thursday-Sunday, Jan. 24-27 — Centre Halls, "My Fair Lady," 7:30 and 10 p.m., Room 102 Forum.

Friday-Saturday, Jan. 25-26 — U.S.G., "The Yellow Submarine," 7:30 and 10 p.m., HUB ballroom.

Saturday, Jan. 26 — Free-U children's films, "Jack and the Beanstalk," 12:30 and 2:30 p.m., HUB assembly room.

Wednesday, Jan. 30 — Commonsplace Theatre, "Notorious," 8 and 10 p.m., Room 112 Kern.

Thursday, Jan. 31 — Colloquy, "Seven Year Itch," 8 p.m., HUB ballroom. Discussion by Ellis Grove, theatre arts.

Thursday-Sunday, Jan. 31-Feb. 3 — Centre Halls, "Love Story," 7:30 and 10 p.m., Room 102 Forum.

Friday-Saturday, Feb. 1-3 — North Halls, "Pete and Tillie," 7:30 and 9:30 p.m., Room 105 Forum.

Friday, Feb. 1 — Colloquy, "The Gang that Couldn't Shoot Straight," 8 p.m., HUB ballroom.

Saturday, Feb. 2 — Free-U children's films, "Festival of Folk Heroes," 12:30 and 2:30 p.m., HUB assembly room.

Barbara Hyslop, graduate student in theatre arts, as "Puck" in the University Theatre production of "The Shaw play."

"Puck," by Pietro Annigoni, in Museum of Art exhibit.

Music program for the week is varied

Dr. D. Douglas Miller, assistant professor of music, will conduct the University Symphony Orchestra in the fifth annual Young People's Concert Sunday, Jan. 27, at 3:30 p.m. in Schwab Auditorium. Tickets are free, are required and if still available may be obtained at Room 232 Music Bldg., as well as the Music Mart in State College and Purnell's News Agency, Bellefonte.

June Miller, assistant professor of music, will play Baroque, Romantic and Contemporary organ works in her recital Monday, Jan. 28, at 8:30 p.m. in the Music Building recital hall. Four noels by Dandrieux, works by Rameau, Widor, and Dupre, and Olivier Messiaen's "The Ascension Suite" and "Meditations on the Mystery of the Holy Trinity" will be included in the program.

The Claremont Woodwind Quintet, directed by Smith Toulson, assistant professor of music, will give a recital Wednesday, Jan. 30, at 8:30 p.m. in the Music Building recital hall.

Broadening the offerings of the Kern Graduate Building, a program of classical music performed by members of the State College Music Guild will be given Sunday, Feb. 3, at 8 p.m. in the Kern Auditorium. A coffee hour will follow the program so

that members of the audience may meet and talk with the musicians.

Many of those performing are either full-time or part-time members of the University faculty. The program will include, for example, a Eugene Bozza "Aria" for alto saxophone, played by William Dole, part-time instructor in music and a member of the Claremont Woodwind Quintet. He will be accompanied by Jill Olson, a Music Academy piano teacher.

Nona Uhler, an M.F.A. candidate in voice, will be accompanied by Robert Trehy, associate professor of music, her voice teacher, when she sings two songs by Richard Strauss, an aria from Mozart's "Marriage of Figaro," and Mimmi's aria from "La Boheme."

Nancy Hadden, part-time music instructor, will join with her husband, John, a computer programmer at the University, and Erin Headley, graduate student in music, in Renaissance music using recorders, flute, krumphorn, gambas, and voice.

A quartet of Mary Aliza Graetzer and Ruth Hughes, violins, Pam Fennar, viola, and Gilbert Ward, cello, will play Mozart's String Quartet in B-flat, K. 458. Mrs. Fennar is part-time teaching assistant in sociology, and Dr. Ward is associate professor of physics.

present limit of \$15,000.

—Develop reciprocal arrangements with other states, thus enabling students to carry State scholarships to out-of-state institutions.

—Increase total expenditures from higher education over the next decade "To gain parity with the national norm." The report noted Pennsylvania ranks 42nd among the states in per capita amount directed to higher education.

—Provide direct institutional aid for private colleges and universities in the form of "student-following grants" of \$600 for each student admitted with a PHEAA scholarship.

—Increase the \$400 per student State

Approved a change in the name of the Department of Theatre Arts to the Department of Theatre and Films.

Approved a change in the designation of the graduate program in speech to the graduate program in speech communication, to conform with the renaming of the department recently.

Gave preliminary approval for a \$4,000, 000 addition to the outpatient services at the Milton S. Hershey Medical Center. The addition will help to meet the critical need of the hospital for more outpatient facilities. Sketch plans were also approved for the addition, which will be built to the east of the hospital wing, as well as sketch plans for a cardiovascular research laboratory and the employment of the Philadelphia architectural firm of Harbeson Hough Livingston and Larson as the architects for both projects.

subsidy to community colleges to help cover the rising costs of relatively expensive career programs they offer.

The report did not include estimates of the costs of the proposals. Several PACU officials, including Dr. Oswald, said the report is intended more as a set of long-range goals than as an immediate legislative program.

"This report," Dr. Oswald said, "is not a document of what should happen next year. It is a program for the future, a set of policies under which judgments should be made relating to private and public higher education in the state."

Dr. Oswald cited the recommendation for \$500 institutional grants for each PHEAA recipient enrolled in a private college, noting that 42 per cent of all college students in Pennsylvania are enrolled in private

the many extra books I read was on the physics of the air, so I didn't have any trouble keeping two jumps ahead of my students in climatology."

Dr. Kardos returned to Rutgers to defend his thesis on the summer of 1936, and at the same time renewed his acquaintance with the secretary in the soils department who had to type it. Two years later, she became Mrs. Kardos. The couple remained in Pullman until 1943 when Dr. Kardos accepted a job at the University of New Hampshire.

At Washington, in addition to work in soil water quality, fertility and structure relations, Dr. Kardos demonstrated an early concern with the environment, doing studies of locusts in orchard soils sprayed with lead arsenate against insects.

He continued his basic studies in soil chemistry at New Hampshire and also worked on problems of runoff, erosion and irrigation management. As the northeastern representative on the National Soil Test Work Group, he served on the body which undertook the first comprehensive survey and critical analysis of soil testing systems in the U.S. For five years, he was north-

COUNCIL —

(Continued from page one)

ample, in the College of Liberal Arts, where a teacher's strongest allegiance may be to his individual discipline rather than to a more generalized academic area.

Rather than recommending a single model, the Council suggests that an appropriate administration for Commonwealth Campuses be developed within each college. It occurred in the Academic Policy Plan goals of stronger Commonwealth Campus administration and faculty organization, greater responsiveness to unique community needs in the areas served by the campuses, and increased responsibility for program participation by Commonwealth Campus faculty. It noted that some of the goals already had been realized through increased participation by Commonwealth Campus faculty members in the University Senate and in department and college committee work.

Dr. John J. Coyle, professor and head of the department of business logistics, was chairman of the subcommittee. Other members were Dr. Ronald J. Harshbarger, assistant professor of mathematics at the Beaver Campus, and Dr. Charles Holser, dean of Life and Mineral Sciences.

In a press briefing following the Council meeting, Dr. Russell E. Larson, Provost and Council Chairman, said that responses had been received both pro and con on the proposal, which is being reviewed throughout the University. Dr. Larson said it was hoped that decisions on the proposed new administration could be made within the next four to six weeks.

The Council also approved a report from Dr. William L. Harkness, professor and head of the department of statistics and chairman of the Senate subcommittee of the Academic Affairs Committee which is considering student evaluations.

Dr. Harkness said the subcommittee would ask the Senate to approve a 10-question survey to be used on a University-wide basis. Five of the questions would relate to course content and the other five to the quality of instruction, with results to be made available to the course instructor and the department or program head.

If approved by the Senate, it is expected that the survey will be used for the first time during the spring term.

schools; the figure nationally is 25 per cent.

He said the PACU proposal was designed to put higher education in Pennsylvania on sound a financial basis as possible and was not offered as a means of developing new programs.

"All institutions, public and private, recognize that new academic programs in the years ahead will essentially have to be developed out of a reallocation of our resources," he said, adding that "funds we receive will be those necessary to keep up with inflation and salary increases."

Concerning Penn State tuition, he said "we're going to make every effort to hold down tuition. We've resisted anything more than a modest tuition increase."

Gov. Shapp received the report at the opening of the conference and said it will be studied closely.

Dr. Kardos represented the Soil Science Society's Membership, Organization and Policy Committee and in 1952 began his still continuing service as an associate editor of "Soil Science Society of America," a well-known international journal in the field. In 1953, along with 12 other scientists, he was invited to participate in the preparation of an American Chemical Society monograph on "Chemistry of the Soil."

In 1954, Dr. Howard Sprague, then head of the Department of Agronomy, invited Dr. Kardos to join the faculty as professor of soil technology, a title which was changed recently to professor of soil physics. He is also an environmental scientist in the Institute for Research on Land and Water Resources.

"I had a son and two daughters who were avid skiers and loved New Hampshire," Dr. Kardos recalls. "They had visions of having to live among steel mills and coal mines in Pennsylvania. They adjusted to the Nittany Valley very happily, however, and all three were graduated from the University. John in chemical engineering and Mary and Ann in medical technology."

At Penn State, Dr. Kardos has taught

Shaw's Joan opens Friday at Playhouse

George Bernard Shaw's "Saint Joan" will open at Playhouse Theatre Friday, Jan. 1, for a seven performance run, plus student preview. The production by University Theatre commemorates the 50th anniversary of the Shaw classic that was written at about the same time that Joan was being canonized.

Warren S. Smith, who directs the General Education in the Arts program and one of the foremost scholars in the area of Shaw and religion, directs the play.

"It was no problem at all," Smith says, "to find elements in the production which are relevant to today's campus audience which was one of my concerns."

"To begin with, Shaw was a devout feminist, and Joan is an excellent example of a woman who transcends society's limitations," said Smith. He explained the Joan lived and died at an entirely different and more profound level than any man or woman of her time, representing a complete fulfillment and self-realization of a human life.

Prof. Smith says that Shaw's interest in Women's Rights was a much greater involvement than merely the suffrage movement by which women received the right to vote in the 1920's. "Shaw really treated women as people and not just as suffragists, although he is very sensitive to the 'role' men would force them to play," he explains.

"For instance, one of the worst things that Joan did to her French foes was to don men's apparel. This was a crushing blow to images held by the military as the church. Of course, her real threat to the establishment arose out of her ability to 'out-general' the generals and beat men at their own game," Smith added.

Another area that Professor Smith felt in Shaw's work that transcended time was his philosophy and belief in "The Life Force." Meeting many of the same specifications as the omnipotent black moon in Stanley Kubrick's "2001: A Space Odyssey," Smith described the Life Force as an intangible impetus that drives Shaw's characters, and particularly Joan, to the heroic and occasionally irrational things they do to fill this need of a "higher passion."

A special student preview of "Saint Joan" will be presented on Wednesday, January 30, at 7:30 p.m., and the play will open on Friday, February 1, at 7:30 p.m. and on February 2, 5, 6, 7, 8 and 9.

The University Theatre asks patrons to note that the curtain for "Saint Joan" one-half hour earlier than usual. Tickets for both "Saint Joan" and for the American premiere of Polish playwright Stanislaw Mrozek's "Blasted" will go on sale Jan. 28 at the box office. Ticket information and reservations can be obtained by calling the University Theatre box office (814) 865-1884.

KARDOS —

(Continued from page one)

but it only paid tuition, and an opening in sanitary engineering carried a \$25 monthly stipend. Naturally, I took the higher bidder.

By 1936, Dr. Kardos had completed the research for his doctorate and accepted a job at Washington State University.

"My practice teaching experience at Rutgers included a sixth grade arithmetic class," he continues, "and one with high school seniors who were supposed to be studying chemistry. However, it was the seniors' last three weeks in school, and I can't say I got much work out of them. At Washington State, however, I had the chance to teach a broad range of courses, including an unexpected one in climatology, because the agronomy department there happened to keep the weather instruments."

"Fortunately, as a boy growing up in Perth Amboy, I became a copious reader. I used to go to the library every Saturday and get out as many books as possible. If some of them were short, I'd read them in the morning and then go back for new ones in the afternoon. While in college, one of

undergraduate classes in soil conservation and a graduate course in soil physics. Much of his time now, though, is spent in research connected with the living soil of a symposium on Recycling Treated Municipal Wastewater and Sludge through Forest and Cropland, co-edited the published proceedings and co-authored four of 32 papers involved.

Active in professional organizations has been vice-president and president of the Northeastern Branch of the American Society of Agronomy and held similar posts in the Keystone Chapter of the same society. He also served as secretary, vice-chairman and chairman of the Northeast Soil Research Committee. The American Society of Agronomy made him a fellow, and the Conservation Society gave him a Fellowship Award.

In his spare time, Dr. Kardos enjoys outdoors. Although he gave up on country skiing, he still likes to hike. He also enjoys fishing in Pennsylvania trout streams has substituted surf casting on his native Jersey seashore.

News in brief

DANCE COMPANY

The Contemporary Dance Company will give its premiere concert Thursday, Jan. 31, and performances Friday and Saturday, Feb. 1 and 2, all at 8:30 p.m. in White Hall Dance Theatre. There will also be a matinee at 2:30 p.m. on Saturday.

Sponsored by the College of Health, Physical Education and Recreation, the Company was formed last fall to offer concerts, tours and master classes for those interested in modern dance.

The directors and choreographers of the Company are Patricia Heigel and Lynne Anne Blom, instructor and assistant professor of physical education, respectively, and LaRue Allen, director of the Central Pennsylvania Dance Workshop. George Holley, graduate student in theatre arts, is scenic and lighting designer and technical director.

For the concert, Bruce Trinkley, assistant professor of music, has composed two original works.

ORANGE L

The parking area near Shields Building but east of University Drive is now an open faculty and staff parking area, set aside to provide flexibility in parking that can be used as an alternate parking area when the assigned area is filled. It is not necessary to call Police Services when parked in these areas as long as a valid faculty-staff parking permit or decal is displayed. Red A, at Foods Building, Blue E at the Computation Center, and Orange H at the Research Buildings on East Campus are also open areas.

SENATE REPORT AVAILABLE

The University Faculty Senate's report of the considerations in the past five months on the subject of collective bargaining have been published, and distribution to members of the faculty began this week.

ART LECTURE

The second of three lectures planned in conjunction with the art history and French department seminars exploring the principles guiding Medieval art and literature will be given by Dr. Benjamin Bart, Thursday, Feb. 7, at 3:00 p.m. in the Assembly Room of the Hetzel Union Bldg.

Dr. Bart, professor of art history at the University of Pittsburgh, will speak on "The Invention of a Saint: Julian the Hospitaller in Art and Literature." He is currently engaged in a study of the relationships between the earliest French language versions of the original Latin legend of St. Julian and the representations of these legends in the stained glass of the cathedrals of Chartres and Rouen.

Support for the series has been provided by the Institute for the Arts and Humanistic Studies and the Interdisciplinary Graduate Program in the Humanities.

DILWORTH DEATH

Richardson Dilworth, who died Jan. 23, served for seven years from 1955 to 1963, as a member of the Board of Trustees of the University. The former mayor of Philadelphia, Dilworth was appointed to the Board by Gov. George M. Leader, and during his tenure he was a member of the Executive Committee of the Board.

ARCHAEOLOGIST TO TALK

Daniel J. Geagan, professor of history at McMaster University, will speak on "The Renewal of a City: Hadrian's Plan for Athens" Thursday, Feb. 7, at 8 p.m. in 101 Kern Bldg. The illustrated public lecture and a reception following it are sponsored by the Central Pennsylvania Society of the Archaeological Institute of America. Dr. Geagan will describe Hadrian's interest in the "urban renewal" of the eastern half of the Roman Empire. Athens became the queen city of this revival, and the Emperor's attempts to revitalize civic life there, to reconstruct and expand the city's physical facilities and to reestablish the great athletic and artistic festivals, offer instructive contrasts and comparisons with similar problems today.

FILM SHOWINGS

The First Penn State Film Festival, sponsored by the Graduate Student Association, will feature student films from colleges and universities in six states. Public showings will be held Friday-Sunday, Feb. 8-10, beginning each evening at 8 p.m. in Schwab Auditorium, with no admission charge. The films are also to be judged by a panel including Holle Alpert, film critic, Arthur Barron, producer-director, and Willard Van Dyke, director of the Museum of Modern Art's film department.

FOCUS ON SALE

A 20-page issue of Focus magazine, featuring an interview with Governor Milton J. Shapp, goes on sale Monday, Feb. 4. Ken Cheslet, editor of the student publication, says this is the first of two issues to be offered during Winter Term. Plans call for six issues in Spring Term.

SHOW OPENS

The public is invited to a cabaret party featuring a band and free soft drinks and snacks to open the Nina Rosenblum Invitational Saturday, Feb. 2, at 9 p.m. in Zolter Gallery, Visual Arts Bldg.

Art on the subject of human experience is the theme, representing a new slant in student shows. All exhibits will be art with a subject matter and content, according to art instructor Rosenblum, who will jury all submitted works in advance on the basis of their quality of expression and relevance to the theme. About 40 graduate and undergraduate students are expected to participate in the show, which will continue through Feb. 9.

SURVIVAL SEMINARS

"Survival: The Choice is Yours" is the topic selected by the Faculty Women's Club for its February seminars. Don Kepler, instructor in physical education, will talk on "Survival on Land and Sea," Tuesday, Feb. 5, at 9:30 a.m. in the HUB Assembly Room. Speaking Tuesday, Feb. 12, at the same hour and place will be Dr. G. Lynn Brinkman, assistant professor of nutrition science. His topic is "American Food: Health and Hoax." A luncheon lecture on "Human Adaptability to the Environment" will be presented Thursday, Feb. 21, at noon in 101 Kern Bldg. by Dr. Paul T. Baker, professor of anthropology, and Thelma S. Baker, instructor in anthropology. Prepaid luncheon reservations must be made before Feb. 13 with Mrs. Marilynn Hollis at 466-7397.

MUSIC

Four concertos for oboe from the works of the most famous Baroque composers

(Continued on page four)

West Germany awards to outstanding U.S. scientists

Skell, deMaine get Humboldt grants

Dr. Philip S. Skell, Evan Pugh professor of chemistry, and Dr. Paul A. D. deMaine, professor of computer science, have received Senior Scientist Awards from the Alexander von Humboldt Foundation of West Germany, which are granted to outstanding U.S. scientists to promote closer scientific cooperation between the United States and West Germany.

Dr. Skell will spend the academic year 1974-75 at the Technical University in Munich, West Germany, working with 1973

Nobel Laureate Ernst Otto Fischer on a cooperative research program in atom chemistry.

Dr. deMaine will conduct research on the JOBLIST computer language and its applications to chemical information at the Technical University with Prof. I. K. Ugi, and work at the Max Planck Institute.

In addition, both will lecture at universities and research institutes throughout Europe and participate in the educational programs of the von Humboldt Foundation.

Their problems different from young coeds'

Returning student women form group

Not all the coeds of the seventies are wearing blue jeans and work boots. Surveys prove that a half million older women are attending college, too.

"For us, the first term paper can be as traumatic as the first baby," says one of their number, Iran Mohsenin, who is currently working for her doctorate in higher education.

Her own experiences convinced Mrs. Mohsenin that older coeds face special problems on campuses which are primarily geared to the needs of the young, single, full time student. The result is a new organization, Returning Student Women, which she helped found and Penn State's Undergraduate Student Government has agreed to charter and fund.

"Isolation is one of the main problems of our members," Mrs. Mohsenin says. "Freshmen pick up a lot of necessary information just by living on campus with their peer group. Our average member is a housewife with children. She comes to

campus maybe three times a week, pays an expensive babysitter, and leaves as soon as her classes are over. She has no way to find out what's going on. Such basic information as how to drop and add courses or even what courses to take is hard for her to come by.

"When we had our first workshop, we put up a few signs, and over 30 women showed up. After the meeting was over, they were so eager to share experiences they couldn't bear to leave. Since then our attendance has steadily increased."

The group limits its meetings to one a term, because most of its members are too busy to get out more. Similarly, it has no standing committees, only action groups. Concerns range from trying to set up baby sitting services to instituting procedures which would allow part time students fuller use of University facilities or permit them to exempt required physical education and health courses designed for a different student population.

(Continued on page two)

Class includes doctoral candidates, too

Writing clinic gives 'first aid'

The Writing Clinic, under the direction of Lynn Christy, associate professor of English composition, offers "rhetorical first aid" for students deficient in writing English.

The successor to what used to be called "English Zero," a non-credit remedial English course, the Writing Clinic tutors students who have problems with grammar, punctuation, word usage, sentence construction and paragraph organization.

About one-third of the students enrolled in the clinic were advised as freshmen to seek special help upon the receipt of the results of their English placement tests. The remaining two-thirds were sent to the clinic by the English I professors or their course advisors.

Professor Christy, who is aided by four graduate assistants, starts the students with a grammar test. This is a diagnostic technique which reveals the amount of help a student needs and the areas in which he needs direction.

"Most students have problems with verb/noun arrangement and with pronoun/antecedent agreement," Professor Christy says. After progressing through six stages of simple grammar, the student is re-introduced to sentence structure, relative clauses, punctuation, paragraph organization, and even some spelling.

Currently, there are 95 students enrolled in the clinic, ranging from freshmen to doctoral candidates.

"We average about two doctoral candidates per term," Professor Christy added.

The sessions, which are generally run on a one-to-one teacher/student ratio, are scheduled twice weekly for each student for as long as he still needs assistance.

Most students, although resentful at first about attending the clinic, return to thank Professor Christy and his staff for the improvement that the tutoring has afforded them.

"Although some students take the clinic for granted," Professor Christy said, "many of them appreciate the fact that they are getting free tutoring and individual attention."

John P. Keegan, freshman in engineering, said, "I thought that having to go to the clinic would be a pain. But now, I do feel it's worthwhile since it has helped me a lot with my grammar."

Alba N. Cuevas, freshman in education, who is now in her second term with the clinic, said, "I didn't know anything about grammar or punctuation until I came to the clinic. Now I'm really improving."

For students who can't get their verbs and nouns to agree or who are at a loss to manipulate commas and colons, the Writing Clinic's "rhetorical first aid" may be able to patch them up.

The Writing Clinic is located in the Liberal Arts Building in Rooms 903, 904, and 905.

University calendar

January 31-February 10, 1974

Special Events

Thursday, Jan. 31 — Colloquy Festival of the Arts, film, "Seven Year Itch," 8 p.m., HUB ballroom. Discussion, Ellie Grove.

Thursday-Saturday, Jan. 31-Feb. 2 — The Humberband Dance Company, 8:30 p.m.; Saturday matinee at 2:30 p.m., White Hall Dance Theatre.

Friday, Feb. 1 — Artists' Series, William Windom as "James Thurber," 8:30 p.m., Schwab.

Friday, Feb. 1 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday, Feb. 1 — Colloquy Festival of the Arts, film, "The Gang That Couldn't Shoot Straight," 8 p.m., HUB ballroom.

Friday-Saturday, Feb. 1-2 — University Theatre, "Saint Joan," 7:30 p.m., Playhouse Theatre.

Saturday, Feb. 2 — Sports: Women's Bowling, vs. Cornell, 1 p.m.; Women's Rifle, vs. Drexel, 9 a.m. Philadelphia College of Pharmacy, 9 a.m. Men's Rifle, vs. Navy.

Saturday, Feb. 2 — Clinic for prospective swimming and diving judges for national collegiate women's swim championships, 9:30 a.m.-12:30 p.m. White Building pool. Call 865-7591 for additional information.

Saturday, Feb. 2 — WHRA Record Hop, 8 p.m., Simmons Lounge.

Saturday, Feb. 2 — Colloquy Festival of the Arts, Jimmy Breslin, author, 8 p.m., Schwab.

Saturday, Feb. 2 — Opening reception and cabaret, Nina Rosenblum Invitational, 9 p.m., Zoller Gallery.

Sunday, Feb. 3 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Feb. 3 — Chapel Service, 11 a.m., Eisenhower Chapel. Rabbi Chaim E. Scheiner, Rosh Hashana Brith Hill Foundation, Stone College.

Sunday, Feb. 3 — Music Guild, An Evening of Classical Music, 8 p.m., Room 112 Kern.

Sunday, Feb. 3 — Colloquy Festival of the Arts, film, "Gentlemen Prefer Blondes," 8 p.m., HUB assembly room. Discussion, George Bowman.

Monday, Feb. 4 — Colloquy Festival of the Arts, Alan Schneider, director, 8 p.m., HUB ballroom.

Tuesday, Feb. 5 — Colloquy Festival of the Arts, film, "Bus Stop," 8 p.m., HUB assembly room.

Tuesday, Feb. 5 — Film Strip presentation of Spring Fashions by Butterick representative, sponsored by Fashion Industry Interest Group, College of Human Development, 7 p.m., Living Center, Human Development Bldg.

Tuesday, Feb. 5 — Sports: Women's Gymnastics, vs. Lock Haven, SUNY-Cortland, University of Maryland-Baltimore County, 7:30 p.m.

Tuesday-Wednesday, Feb. 5-6 — Alpha Phi Omega Bloodmobile, 9 a.m.-5 p.m., HUB ballroom.

Tuesday-Saturday, Feb. 5-9 — University Theatre, "Saint Joan," 7:30 p.m., Playhouse Theatre.

Tuesday, Feb. 5 — Peace Corps films and discussion, 7:30 p.m., Room 419 Boucke. "Do You Speak Agriculture" and "Not Enough."

Wednesday, Feb. 6 — Informal discussion on regional planning and the law, by Charles Zaleski, lawyer and planner, 7:30 p.m., Room 216 Willard, sponsored by Graduate Student Association and Regional Planning.

Wednesday, Feb. 6 — Artists Series, The Films of Luis Bunuel, "The Exterminating Angel," 8:30 p.m., Schwab.

Wednesday, Feb. 6 — Sports: Men's Basketball, vs. Temple, 8 p.m., Rec Hall.

Wednesday, Feb. 6 — Gregory Donovesky, oboe recital, 8:30 p.m., Music Bldg, recital hall.

Thursday, Feb. 7 — Colloquy Festival of the Arts, Hollis Apple, film critic, 8 p.m., HUB ballroom.

Thursday, Feb. 7 — Air Force Lt. General Daniel James, Jr., principal deputy as-

sistant secretary of defense (public affairs), on "Power of Individual Excellence," 8 p.m., Schwab.

Friday, Feb. 8 — Music program by guitarist Richard Jackman, 8 p.m., Room 112 Kern. Music of the past 400 years.

Friday-Sunday, Feb. 8-10 — Invitational Student Film Festival, Schwab, 8 p.m. Admission free.

Friday, Feb. 8 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.

Friday, Feb. 8 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday, Feb. 8 — Free Jazz Jammy, 7:30-11:30 p.m., HUB ballroom.

Saturday, Feb. 9 — Sports: Women's Basketball, vs. Shippensburg, 1:30 p.m.; Women's Gymnastics, vs. Ohio State, Kent State, Youngstown State, 2 p.m.; Women's Rifle, vs. Kutztown, 10 a.m.; Women's Swimming, vs. Shippensburg, 2 p.m.; Wrestling, vs. Navy, 8 p.m., Rec Hall; Men's Swimming, vs. Bucknell, 2 p.m.; Men's Fencing, vs. Newark, 2 p.m.; Men's Rifle, vs. Army.

Sunday, Feb. 10 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Feb. 10 — Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Charles L. Coleman, program director, Religious Affairs.

Seminars

Thursday, Jan. 31 — Meteorology, 3:55 p.m., Room 26 Min. Sci. Dr. Richard A. Anthes on "Initial Data Requirements for Operational Hurricane Prediction as Revealed by Dynamic Initialization."

Thursday, Jan. 31 — Remote Sensing, 1 p.m., Room 225 E. E. West. A. David Wilson, graduate in agronomy, on "Agricultural Land Use Mapping Using Remote Data."

Thursday, Jan. 31 — Mechanical Engineering, 4 p.m., Room 103 Mechanical Eng. Bldg. Charles Hendricks, graduate asst., on "The Prediction of Turbulent Confined Jet Mixing."

Thursday, Jan. 31 — Chemistry, 12:45 p.m., Room 310 Whitmore. Melynn R. Churchill, University of Illinois, on "Recent Structure Studies on Organometallic Complexes."

Thursday, Jan. 31 — Agronomy, 3:55 p.m., Room 301 Agr. Adm. L. Steckler and R. Cunningham on "Variability in Soil Mapping Units."

Thursday, Jan. 31 — Mining, 4 p.m., Room 302 Min. Sci. Dr. H. R. Hardy, Jr., mining engineering, on "Rock Mechanics and Mining Research in Europe."

Thursday, Jan. 31 — Physics, 3:35 p.m., Room 117 Osmond. Judan W. Eisenberg, University of Virginia, on "Recent Developments in Nuclear Physics."

Thursday, Jan. 31 — Population Issues Research, 3:30 p.m., Room 341 Deike. Thomas R. Ford, University of Kentucky,

on "Mission Impossible? Population Growth and Family Planning in Colombia." (Informal session on "Evaluation of Procedures for Predicting Net Migration," 11 a.m., Room 22 Burrows)

Thursday, Jan. 31 — Slavic and Soviet Language and Area Center, 3 p.m., Room 17 Willard. Dr. Juris G. Gragins, psychology, on "Psychology in the Soviet Union."

Thursday, Jan. 31 — Statistics, 4 p.m., Room 75 Willard. Robert F. Heckard on "Data Analysis Using the Penn State Computer System."

Friday, Feb. 1 — "Two Cultures Dialogue," 12:30 p.m., Room 189 Materials Research Lab. R. C. Hausman, philosophy, and T. H. Rogers, English, on "Value Considerations in the Humanities."

Monday, Feb. 4 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Dr. P. J. Kuest, Dr. L. C. Schiefer, Dr. L. R. Kneebone, on "Extension Plant Pathology: Programs and Program Development for Mushrooms."

Monday, Feb. 4 — Current Issues in Food and Agriculture, 1 p.m., Room 202 Borden. Francis Maniere, graduate assistant in food science, on "Marine and Other Food Resources."

Monday, Feb. 4 — Genetics, 3:55 p.m., Room 111 Tyson. Leslie Raffel on "The Enzyme Involvement in Galactose Metabolism: Studies of Possible Induction Effects in Cultured Human Fibroblasts."

Monday, Feb. 4 — Entomology, 4 p.m., Room 215 Armsby. Richard Colburn,

Bureau of Plant Industry, Pa. Dept. of Agriculture, Aransville, on "The Pennsylvania Pilot Apple Root Management Project. Yesterday, Today and Tomorrow."

Tuesday, Feb. 5 — Chemical Engineering, 3:50 p.m., Room 140 Fenske. M. E. Demer, University of Delaware, on "Instabilities in Polymer Processing Operations."

Tuesday, Feb. 5 — Comparative Literature Luncheon and Discussion, 12:15 p.m., HUB Dining Room A. Christopher Salvenson.

Tuesday, Feb. 5 — Operations Research, 3:45 p.m., Room 267 Willard. Dr. Matthew Rosenblum on "Linear Assistance Analysis of Markov Chains — II."

Tuesday, Feb. 5 — Aerospace, 3:55 p.m., Room 232 Hammond. Dr. Alek Mikolajczak, Pratt & Whitney Aircraft, East Hartford, Conn., on "Current Research in Compressor Aerodynamics and Noise."

Wednesday, Feb. 6 — Analytical Chemistry, 8:30 a.m., Room 310 Whitmore. R. W. Liddell on "Computerized Learning Machines Applied to Infrared Spectroscopy."

Wednesday, Feb. 6 — Geosciences, 4 p.m., Room 22 Deike. Thomas F. Bates, mineralogy, on "Geosciences and Land-Use Planning: the Need for Trained Geopolicitians."

Wednesday, Feb. 6 — Psychology, 8 p.m., Room 69 Willard. Dr. Lila Gleitman, University of Pennsylvania, on "Teaching Reading by the Use of Syllabary."

Wednesday, Feb. 6 — Biochemistry, 4 p.m., Room 101 Althouse. L. Stong on "Molecular Basis of Hemoglobin Cooperativity and the Role of Permethylation."

Thursday, Feb. 7 — Chemistry, 12:45 p.m., Room 310 Whitmore. Charles F. Hamer, Georgetown University, on "The Derived Matrix Technique: A New Generation Spectroscopic Method for the Quantitative Determination of Complex Mixtures."

Thursday, Feb. 7 — Meteorology, 3:55 p.m., Room 26 Min. Sci. Dr. Hans A. Panofsky on "Environmental Problems of Supersonic Transport."

Thursday, Feb. 7 — Mechanical Engineering, 4 p.m., Room 103 Mechanical Eng. Bldg. Osluša Oksuneide, graduate student, and Thomas L. Wright, air quality engineer, on "Measurements of Flow Separation in Confined Mixing."

Thursday, Feb. 7 — Engineering Acoustics, 4 p.m., Room 17 Willard. H. Tenkes, aerospace engineering, on "Turbulence: Edbles, Large and Small."

Thursday, Feb. 7 — Mining, 4 p.m., Room 302 Mineral Industries. Dell Adams, Room 301 Agr. Adm. G. Peterson, G. May, D. Henninger, and A. D. Wilson on "Remote Sensing Techniques in Agronomy Research."

Lectures

Thursday, Feb. 7 — Central Pennsylvania Society of the Archaeological Institute of America, 8 p.m., Room 101 Kern. Daniel J. Gegan, professor of history, McMasters University, on "The Renewal of Old Hadrian's Plan for Athens."

Thursday, Feb. 7 — Medieval Art, Lecture Series, 3 p.m., HUB assembly room. Dr. Benjamin Barr, University of Pittsburgh, on "The Invention of a Saint: Julian the Hospitaller."

HUB specials

The HUB Terrace Room has initiated daily special meals for both lunch and dinner at prices much below customary cafeteria prices ala carte. No substitutions are permitted to benefit from these reduced prices. For the next week, the features (all accompanied by appropriate side dishes and beverages) are:

Sunday, Feb. 4 — dinner, baked ham w/sauce \$1.61; supper, wheat rabbit w/slt. \$1.11.

Monday, Feb. 4 — lunch, grilled beef steak \$3.99; dinner, planters beef w/noodles \$1.49.

Tuesday, Feb. 5 — lunch, grilled cheese sandwich \$1.09; dinner, frank & knish \$1.69.

Wednesday, Feb. 6 — lunch, meat pie/cheese \$1.11; dinner, turkey ala king/lt. \$3.29.

Thursday, Feb. 7 — lunch, apple fritters w/sauce \$1.12; dinner, hot beef sandwich \$1.41.

Friday, Feb. 8 — lunch, egg cutlet/alm. sauce \$3.59; dinner, shrimp creole w/rice \$1.49.

Saturday, Feb. 9 — lunch, macaroni & cheese \$3.81; dinner, meatloaf \$1.59.

Meetings

Thursday, Jan. 31 — Central Pennsylvania Chapter of the ACM, 8 p.m., Room 101 Althouse. Panel discussion on the use of computers and data processing, followed by a question and answer period. The public is invited to attend.

Wednesday, Feb. 6 — Graduate Council Meeting, 2:40 p.m., Room 101 Kern.

Films

Thursday-Sunday, Jan. 31-Feb. 3 — Centre Halls, "Love Story," 7:30 and 10 p.m., Room 102 Fern.

Friday-Sunday, Feb. 1-3 — North Halls, "Pete and Tillie," 7:40 and 9:30 p.m., Room 105 Fourn.

Saturday, Feb. 2 — Free-U children's films, "Festival of Folk Heroes," 12:30 and 2:30 p.m., HUB assembly room.

Wednesday-Thursday, Feb. 6-7 — Commonsplace Theatre, "Greetings," 8 and 10 p.m., Room 112 Kern.

Thursday-Sunday, Feb. 7-10 — Centre Halls, "Bless the Beasts and Children," 7:30 and 10 p.m., Room 105 Fourn.

Saturday, Feb. 9 — Free-U children's films, "Hunting Instinct," (Walt Disney), 12:30 and 2:30 p.m., HUB assembly room.

Exhibits

Museum of Art — African Sculpture, Gallery A, through Feb. 3. Prints and Drawings from Central Pennsylvania Collectors, Gallery C.

Zoller Gallery — Nina Rosenblum Invitational, June student art work on the theme of human experience. Mary Lou Thompson, MFA Show, Feb. 4-5.

Kern Gallery — Central Pennsylvania Scholastic Art Exhibit, through Feb. 8. Paul Hirschbach, prints; Jack Shaub, watercolors, opening Feb. 9.

Chambers Gallery — Paintings and drawings by Yar Chomicky. Fiber bags and other constructions by David Van Domelen, through Feb. 11.

Pattee Library — Jean Furst, prints, West Pattee Lobby. Peter Kauffman, paintings, East Pattee Lobby. The Energy Crisis, display, Main Undergraduate Library. Sharon Gray, oil paintings, Circulation Lobby.

Black Cultural Center — John Pettus, pen and ink drawings and black prints.

Official

Tuesday, Feb. 5 — First day for signing NDSL (National Direct Student Loans), SEOG (Supplemental Educational Opportunity Grants), BEOG (Basic Educational Opportunity Program), and University Loans for Spring Term.

WPXS highlights

"Umberto D," Italian director Vittorio de Sica's portrayal of the struggles of old age will be shown on The Humanities Film Forum Thursday Jan. 31, at 9 p.m. on WPXS-TV. Made in 1951, the film goes beyond the theme of old age to make a specific comment on Italian society after World War II. Following the film, satirist James Billington and his guests examine "Umberto D" in terms of the time it was made and its relevance for today. "The Humanities Film Forum" may also be seen Saturday, Feb. 2 at 8:30 p.m.

Metropolitan Opera star John Reardon and the late Jennie Tourel star in "Queen of Spades" Monday, Feb. 4, at 8 p.m. on "The PBS Special of the Week." The Tchaikovsky opera is based on a story by Pushkin and tells of an aged countess who knows the secret of a winning three-card combination that assures its owner of winning any card game.

Bruce Catton, Civil War historian and editor of American Heritage magazine, joins Bill Moyers for a half-hour conversation on "Bill Moyers' Gallery" Tuesday, Feb. 5, at 8 p.m. on WPXS-TV. Topics include Catton's perspective on the current Constitutional crisis.

"Cyranoe de Bergerac," Edmond Rostand's romantic play about the man "with the longest nose in Christendom" and his love for the beautiful Roxanne, is the "Theatre in America" presentation Wednesday, Feb. 6, at 8:30 p.m. on WPXS-TV, performed by the New Haven Conservatory Theater of San Francisco.

Women's varsity sports program is expanding

The constantly expanding women's varsity athletics program will be in full force at University Park facilities in the next week, with events and contests scheduled in gymnastics, basketball, bowling, swimming, and rifle.

The gymnasts, for example, have a four-way meet Tuesday, Feb. 5, at 7:30 p.m. (in White Bldg.) with Lock Haven State College, Cortland (N.Y.) State, and University of Maryland. They follow up with a meet Saturday, Feb. 9, at 2 p.m. against Ohio State, Kent State, and Youngstown State.

The bowling team meets Cornell at 1 p.m., Saturday, Feb. 2, and the same day, at 8 a.m., the rifle team goes against Philadelphia College of Pharmacy, Drexel, and Rider College. The swimmers will be hosts to the team from Shippensburg Saturday, Feb. 9, at 2 p.m., at the White Building pool.

Also on Feb. 9, the basketball team will play Shippensburg at 1:30 p.m. in White Building.

All of which is to point out that women

Karen Schuckman, one of the accomplished women's gymnastics team members, dismounting from uneven parallel bars. Team has two quadrangular meets upcoming.

athletes appreciate spectators as much as their male counterparts, and events are open to the public. In mid-March, a major event will be staged here when the national women's collegiate swimming championships will be held with several Olympic swimmers among the many outstanding performers who will compete.

Free-U seeks Spring Term faculty

The Free-U Instructional program for the Spring Term is being organized at this time, and members of the faculty are requested to make known their willingness to help in the program. A deadline for receiving information, including the subject matter to be covered in the course, has been set for Tuesday, Feb. 19. Forms are available at the Free-U office in the HUB for providing the information to publish the course in the Spring Term Free-U schedule, 1983-0038.

Free-U courses, which are of course free to those who schedule them, cover any subject the instructors want to give, within the limitations of State and local laws. Many instructors teach courses entirely unrelated to their customary field, perhaps getting the information for the course from

a hobby; however, many others teach some aspect of their major field not covered in the formal University courses.

Classes range from 90 minutes to 150 minutes, as the instructor desires; the specific evening or evenings (some courses meet more than once a week) are also the choice of the instructor. Attendance ranges from eight of 40 persons.

Children's courses (for those in the kindergarten to sixth grade range) were offered for the first time this term, with subjects like biology, pottery, French language, dance, and how to care for a horse.

University faculty members are particularly invited to join the Free-U instructional staff; the informal contact with students is, Free-U officers point out, quite a change from the formal classroom.

Air Force general to lecture Feb. 7

Air Force Lt. Gen. Daniel James, Jr., principal deputy assistant secretary of defense (public affairs), will speak at the University next week.

Lt. Gen. James, the highest ranking black officer in the military, will speak on "Power of Individual Excellence" at 8:00 p.m., Thursday, Feb. 7 in Schaeffer Auditorium. His appearance is sponsored by the combined Departments of Military Science in conjunction with the Black Cultural Center.

A graduate of Tuskegee Institute, Gen.

James has seen service in Korea, where he flew 101 combat missions, at various bases in the U.S. and England, in Thailand, where he flew 78 combat sorties, in Libya and again in the U.S. He was named deputy assistant secretary for defense for public affairs in 1970, was promoted to brigadier general in 1970, major general in 1972, and lieutenant general last May. He received his present position in April of last year.

He holds two honorary doctor of laws degrees.

Humanitarian award to Lita Schwartz

Dr. Lita Linzer Schwartz, associate professor of educational psychology at Osgood Campus, has received the Humanitarian Award of the New York Philanthropic League, United Order of True Sisters, Inc. She was cited for "her rare qualities as a young leader in the world of Special Education" and as one who "brings to her task a deep sense of academic responsibility and commitment to the emotion-

ally impaired and handicapped child."

Author of two texts, "American Education: A Problem-Centered Approach" and "Educational Psychology: Focus on the Learner," she is currently conducting research to stimulate creativity in prospective teachers and to help in the diagnosis and remediation of mathematical skills for prospective elementary teachers.

CHANGE IN SOCIAL SECURITY TAX BASE

The Social Security tax base, which was \$10,800 in 1973, has been increased to \$13,200 in 1974. The tax rate of 5.85% is not being changed at this time.

Therefore, a payroll deduction of 5.85% will be taken on the first \$13,200 of University earnings for each faculty and staff member during the calendar year 1974.

Similarly, since each dollar of tax paid by an employee is matched by the University's contribution will be increased by the same amount.

No experience required; clinic Feb. 2

Judges needed for swim championship

In March, Penn State will play host to some 500 women swimmers and divers for the national collegiate championships, and for the three-day event a great many judges are required. The assistance of many local people, faculty and staff and other area residents will be needed.

Some of the judges will undoubtedly have to come from among those who have never judged a swim meet before but are willing to lend a hand. To help them understand judging better, a clinic will be held

this Saturday (Feb. 2) from 9:30 a.m. to about 12:30 p.m. at the White Building Pool, and any adult interested is urged to attend this clinic.

In the area are, undoubtedly, some who have had experience in judging, perhaps holding a certificate from a YMCA, YWCA or swim club activity. They are urged to make their capability known to the planners of the meet by calling 865-7591; they are not being asked by this time to attend the clinic.

Breslin, Schneider among speakers

Colloquy arts festival in full swing

The program of the Colloquy "Festival of the Arts" for the next week includes a variety of films and discussions.

Today (Thursday, Jan. 31), the film "Seven Year Itch," starring Marilyn Monroe, will be shown at 8 p.m. in the HUB ballroom, following which Ellis Grove, associate professor of theatre arts, will lead a discussion of the film.

Friday (Feb. 1), the film "The Gang that Couldn't Shoot Straight" will be shown at 8 p.m. in the HUB ballroom.

Jimmy Breslin, internationally syndicated columnist and author of "The Gang that Couldn't Shoot Straight" and other books, will speak Saturday, Feb. 2, at 8 p.m. in Schaeffer Auditorium.

The film, "Gentlemen Prefer Blondes," will be shown Sunday, Feb. 3, at 8 p.m. in the HUB assembly room, and following the showing, George H. Bouwman, professor of theatre arts, will discuss the film.

Monday, February 4, Alan L. Schneider, theatre director, lecturer and teacher, will answer the question, "The Theatre — Is It Dead?" at 8 p.m. in the HUB ballroom. Schneider, Russian-born, has won the Tony Award, Outer Circle Award (for "Who's Afraid of Virginia Woolf?"), OBIE Award, Prix Special Du Jury (Tours, France), and

(Continued from page one)

will comprise the recital by Gregory Donovetsky, instructor of music, Wednesday, Feb. 7, at 8:30 p.m. in the Music Bldg. recital hall.

Violinist Raymond Page, associate professor of music, will join Donovetsky in the performance of Bach's "Concerto for Oboe and Strings." Works by Telemann and Vivaldi and Handel's "Concerto in G Minor" are on the program, and harpichordist June Miller and a small string orchestra of music faculty and students will also assist at the recital.

A member of the Claremont Woodwind Quintet, Donovetsky has performed extensively, most recently with the Susquehanna Valley Symphony last November.

other awards in Germany and Italy in direction of stage productions or film. He has been a free-lance director on an off-Broadway, throughout the U.S., in England and Israel since 1941.

Tuesday, Feb. 5, the film "Bus Stop" will be shown at 8 p.m. in the HUB assembly room.

The week's activities will conclude with a talk by civil rights activist Alpert Thursday, Feb. 7, at 8 p.m. in the HUB ballroom on the subject, "Art, Commerce, and the American Movie."

ALTOONA PLAYERS

Two one-act plays, "Lysistrata" and "The Golden Fleece," will be performed by the Ivyville Players of Altoona Campus Feb. 14, 15 and 16, with curtains at 8:15 p.m. Carol Ramsey, instructor in speech, is directing "Lysistrata," in which Leslie Marshall, assistant professor of English, will play the title role. Dr. Fred B. Cipriani, assistant professor of chemistry, is member of the cast also.

FOLK MUSIC

Russell Fluharty is to be featured guest lecturer and artist Tuesday, Feb. 5, at 8 p.m. in the Capitol Campus as part of continuing Symposium on American Music and Culture-Rural Tradition.

Select committee on governance seeks views of University

The following statement has been made by the Joint Senate-Administrative Select Committee on Faculty Participation in University Governance, appointed recently. The same statement will also be mailed directly to faculty members.

The Joint Senate-Administrative Select Committee on Faculty Participation in University Governance is eager to obtain, from all segments of the University community, views and opinions on the existing problems in faculty-administration relationships as well as opinions about changes and improvements that can be made in those relationships. The Committee would welcome written communications addressed to the Chairman of the Committee, Robert S. Friedman, 111 Barrows Building. Individuals wishing to make oral statements should contact Professor Friedman in order to arrange for a meeting with the Committee. It would also be helpful to the Committee if individuals making oral presentations would provide the Committee with a copy of their text or an outline of the issues they wish to raise.

The Committee has already begun its delibera-

tions and has set out some guidelines for purposes of discussing a number of issues that its members have identified as problem areas. Members of the University community may be interested in responding to any or all the questions that the Committee has identified. They may also wish to raise additional issues.

The Committee has identified the following process areas in which the faculty and its Senate may perform legislative, advisory, and consultative functions: 1) academic personnel policies; 2) academic program initiation, change, and review; 3) establishment of priorities, planning, and budgeting; and 4) participation and/or consultation in administrative appointments. In some of these areas, the Senate plays a role at Penn State. In others, advisory groups, ad hoc groups, and the University Council participate. And, perhaps, in some there is no regular faculty role at present. In examining the faculty's role in these processes, a list of questions for Committee deliberations has been developed as follows:

1) How can faculty administration consultation be strengthened to assure both groups of effective representation of faculty views?
a) Are there new mechanisms needed in areas where they do not currently exist?

c) Is greater clarification of the division of responsibility needed among the faculty, the Senate and its committees, and the administration?

d) How can the skills of the faculty, in all its diversity, best be employed?

e) Does the feedback mechanism, following consultation, need to be improved?

f) Are all elements within the faculty adequately represented?

g) How can communications between the faculty, the Senate, and the administration, on issues of special importance to faculty members, be made more effective?

h) Are there mechanisms to improve communications between the Senate and its constituents? (There may be special issues with respect to campuses other than University Park.)

i) Are there mechanisms to improve communications between the Senate and outside agencies of the University — i.e., Graduate Council, faculty organizations, administrative committees, etc.?

j) Is there need for change in the internal structure of the Senate to enable it to perform its functions more effectively?

k) Can confidence in the work of Senate committees be strengthened?

l) Should the Senate itself place greater emphasis on major policy questions and defer authority to its committees on lesser questions?

m) Is further clarification needed in delineating the advisory, consultative, and legislative functions?

n) Are Senate committees sufficiently accessible? What techniques can be used to speed up the Senate decision-making process?

o) Is the Senate sufficiently representative of all elements in the University community?

p) Is there need for new mechanisms to strengthen the University's internal decision-making process?

q) Should formal relationships be developed between the Senate and particular administrative offices?

r) Is the Senate's internal structure organized to deal adequately with the major issues facing the University and the structure created to deal with those issues?

PENN STATE intercom

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Governance

The Joint Senate-Administrative Select Committee on Faculty Participation in University Governance will hold an open meeting at 1:30 p.m. Thursday, Feb. 21, in Room 112, the Assembly Room, Kern Graduate Bldg., to hear from any member of the University community — administration, faculty or students — regarding faculty participation in governance. To assist in scheduling, persons wishing to appear are asked to contact the committee chairman, Dr. Robert S. Friedman, 118 Burrows Bldg., 853-5544.

Polish writer has Pavilion play opening Feb. 15

Polish playwright Slawomir Mrozek, a Fellow of the Institute of the Arts and Humanistic Studies in residence at the University for the Winter Term, has had his plays produced in the major capitals of the world and published in many languages, and he has worked and visited around the globe.

Hailed as one of Europe's most inventive young playwrights, a master of political and moral satire, he was writer-in-residence at the Stratford Festival Theatre in Ontario in 1969. Since then, he has had similar theatre connections in Ottawa, New York, and Washington, D.C., the last on a Ford Foundation grant, participated in a theatre festival in Iran, and lectured at the Drama School in Zurich, Switzerland. At Penn State, Mrozek is busy. He is

Teacher has the experience, students have intellectual capacity

Professors should face class with some trepidation—Jordan

Graduate school can be a "neurotic experience" for many students, according to a chemistry professor who has supervised some 40 advanced degree candidates.

"The neuroticism," says Dr. Joseph Jordan, "arises from the fact that graduate students are still in school and are told what to do at an age when they are physically and intellectually fully developed.

The solution is a system in which we could identify persons qualified for graduate work at an early age and compress their education into fewer years. Then, by 19 or 20, they would be ready to go out into the world and offer the leadership of which

they're capable. Unfortunately, nobody seems to be doing anything about the problem."

Another unsolved problem which Dr. Jordan identifies is the selection process that operates when graduate students choose a research preceptor.

"Too often," he points out, "the choice has little or no connection with the student's research interests. One person may be looking for a strong father figure and picks out an advisor to fulfill this need. Another is seeking independence and uses this criterion as the basis of choice. Inevitably, a number of students are going to wind up in the wrong field."

The concerns of students are very important to Dr. Jordan. During his 20-year career at the University, he has authored more than 100 papers, pioneered new methods of electrochemistry and thermochemical analysis, and become internationally recognized as a pioneer in the new field of bioelectrochemistry. But teaching is as vital to his functioning as research.

"Like everyone else," he notes, "I'm squeezed between my teaching and scientific interests, so every summer I try to catch up on my research. But by the time fall approaches, I'm really looking forward to meeting my graduate and undergraduate classes again.

I've taken sabbaticals in Switzerland and France, and each time I've had teaching involvements. It gives you contact with people you wouldn't otherwise have. In Zurich, most foreigners find the Swiss very closed and reserved, but I taught a graduate course there, and by the end of the term, students were regularly stopping by my office to talk to me.

"I think we as professors should face a class of students with some trepidation. Studies have shown that we reach our full intellectual development at about 19, after which we either decline or remain stationary. So when a person my age teaches a class, it's a bit paradoxical. I have more experience, but the students have a fuller intellectual capacity!"

Dr. Jordan spent his own student days in what was then the British Mandate in Palestine. Born in Rumania, he lived briefly in the Middle East as a very young child when his physician father was hired to provide medical services to a remote village in Northern Galilee. The family moved back to Rumania when his father contracted

county fair is depicted in a documentary. In all, some 50 films have been entered in competition, with five from Penn State.

A special video taping will be done Feb. 9, to be shown later, of George Bouwman, professor of theatre arts, with the judges (Alpert, Barron, and Van Dyke) discussing three of the films.

and place for documentary, dramatic and experimental films.

Admission to the film showings is free. The entries in the festival include cartoons, documentaries, dramatic productions, and artistic expressions. Many are directed toward social problems — Old Age, Appalachia, etc. An original comedy is entered in the drama classification, and a

Students to help with tax questions

For many Penn State students, the mysteries, and miseries, of filling out a Federal Income Tax form for the first time will be eased to a degree by members of Beta Alpha Psi, accounting honorees fraternally, who are offering their services free to students to answer tough questions the "customer" can't answer for himself.

The free tax information service will be provided from the start of classes for the Spring Term (March 14) until April 15 (deadline date for filing) at a special table in the HUB and perhaps at restricted times in residence halls, depending on the number of volunteers available and the number of problems presented.

BAP officers emphasize that students with career aspirations in accounting, and tax work in particular, can gain valuable

experience by volunteering to help in the service, and they need not be members of the honor society. They will also accept the aid of faculty members and graduate students who wish to be active in the service.

The service is not intended to include tiling out of tax forms but only the answering of difficult questions, and it is intended only for students. If the question is too difficult for those providing the help, Dr. John P. Devereaux, assistant professor of accounting, will help the workers to research tax regulations for an answer.

For further information, and also to volunteer as a worker, call Ted Backman, 238-7383, or Joni Alexander, 855-8359, both members of Beta Alpha Psi and coordinators of the project.

malaria, returning to Palestine in 1938.

"I went through college and graduate school at the Hebrew University in Jerusalem," Dr. Jordan continues. "Astoundingly, the years between 1938 and 1944 were relatively quiet. World War II bypassed the British Mandate, so it was one of the few places where schooling continued on an essentially normal schedule."

Dr. Jordan remained in Israel through the 1948 war of independence, finally leaving in 1950 to become a research fellow at Harvard and later at Minnesota. At the latter university, he met and married his wife Colina, a Dutch social worker.

Throughout Dr. Jordan's professional career, the fundamental and applied aspects of his research have been intimately interwoven. This double aspect, he notes, is what attracted him to the field of analytical chemistry in the first place, and he has always tried to maintain a balanced program in two areas: electrochemistry and thermochemistry.

During the last ten years, he has picked up an interest in bioelectrochemistry, which involves the study of the transfer of electrons in biological systems. The capability of many molecules and living organisms to transfer electrons rapidly or slowly is very important for their function.

For example, hemoglobin's ability to carry oxygen is based on the property of the basic complex of heme to transfer electrons very slowly. But nature also uses the same iron complex in cells to transfer electrons quite rapidly. Dr. Jordan and his group are trying to discover under what circumstances heme is a fast electron transfer and when it is a slow one. If this were understood, it might help chem-

(Continued on page two)

Dr. Joseph Jordan, with polarograph, in studies of electron transfer in biological systems.

March 31 deadline for medical claims

March 31, 1974, is the last date on which the Employee Benefits Division will accept charges for a 1973 major medical claim from University employees or their dependents.

A major medical claim is established once an employee reports \$100 of eligible, out-of-pocket medical expenses during the claim year period of January through December. If a major medical claim was not established in 1972, but charges were incurred in October, November, or December of that year, these charges may also be included in the reporting of expenses for a 1973 claim.

JORDAN —
(Continued from page one)
ists make synthetic substances to replace natural ones, e.g., artificial hemoglobin. "The original feature of our program is that we are not trying to study how this electron transfer occurs in reactions between two chemicals like iron and oxygen," Dr. Jordan explains. "I feel that one can learn more about the properties of heme itself by isolating it and studying it alone. We do this by supplying its properties directly with an electric current."

Thermochemistry and thermochemical methods of analysis are long standing interests of Dr. Jordan's. In this research, he is trying to measure slight temperature changes (1/1000°) which occur in chemical reactions in very dilute solutions to learn why some reactions produce heat and others absorb it.

"By developing means of automatically measuring the cooling and heating of solutions," he adds, "we would also improve the instrumenting of immunological analysis in the clinical tests done in hospital laboratories — an analysis which is still more of an art than a science."

In pursuit of his research interests, Dr. Jordan has now crossed the Atlantic 30 times and the Pacific on three separate occasions.

"Clearly, I like traveling," he says, "but I'm always ambivalent about it because of the catch-up pressures when I return. However, it's necessary since my scientific interests are quite specialized, and the relatively few people with similar ones are spread around the world."

Dr. Jordan's work for the International

Some of the charges that are acceptable for a claim are doctors' office calls and other doctor charges not reimbursed by UNICARE, prescribed drugs, insulin, physiotherapy, and special equipment and appliances. Itemized receipts should be obtained for these charges; cancelled checks and cash register receipts are not acceptable. Among charges not covered are general physical exams, routine dental work, eye exams and lenses.

Claim forms and other information on how to report major medical expenses are available at the Employee Benefits Division, 133 Willard Bldg.

Union of Pure and Applied Chemistry (IUPAC) also adds to his travel schedule. He is currently U.S. representative to IUPAC's Commission of Electroanalytical Chemistry, having served as Commission chairman from 1967 to 1971.

A member of the advisory board of "Talents," an international journal of analytical chemistry, Dr. Jordan also serves on the editorial board of "Analytical Letters" and spent three years doing similar chores for "Analytical Chemistry." He has held visiting professorships at Berkeley, Cornell, and the Swiss Federal Institute of Technology and was awarded a Fulbright lectureship in Paris.

In 1972, the Hebrew University named him its first I. M. Kolthoff Lecturer in Analytical Chemistry, and he was able to take his family back visit the places he had known as a student.

Dr. Jordan and his wife love children, and they have four of their own, ranging in age from nine to 19. Despite his commitment to his profession, he manages to spend a lot of time with them. One of his efforts in this direction resulted in his becoming the owner of a horse when he took up riding after his oldest daughter became interested in it.

"A few years later, her interests changed," he recalls ruefully, "and I found myself exercising the horse alone. Needless to say, I sold it."

"Sometimes, I really feel quite frustrated by my roles as a part-time father, husband, scientist and educator. Maybe," he says smiling, "it would be better if one could divide one's life up and spend five or ten years pursuing one role at a time!"

independent study by students in the course on horticultural plants and their environment.

Dr. Werner J. Mueller, professor of Euryology, will visit laboratories in Europe where leading work on calcium metabolism is being carried out. He also plans to prepare a chapter on egg shell formation and skeletal metabolism for the book, "Avian Physiology." He will be on leave from Mar. 15 to Aug. 31.

Dr. Lee C. Schisler, professor of plant pathology, will be in British Columbia for a year beginning July 1, to study fleshy fungi in the rain forest climate there. He will attempt to identify mushrooms with a potential for commercial production, collecting various species for the purpose of making cultures and determining how to fruit them.

(1152) NSF announces a program of Faculty Fellowships designed to help teachers broaden their perspective in the applications of science to societal problems. University and college applicants in the sciences, mathematics, and engineering disciplines must have had "five or more years of full time teaching." About 50 awards will be made by May 31, 1974. Application deadline is April 1, 1974. Stipends for the 3- to 9-month fellowships will be based on the salary paid during the preceding years. Travel is paid, and the fellowship institution will be given a tuition allowance. Applications will be available from the Faculty Fellowship in Science Program, Division of Higher Education, NSF, Washington, D.C. 20559 (202)281-7595.

(1153) The NSF Div. of Social Systems and Human Resources (SSHHR) will provide up to \$2 million to support research in (1) equipment technology and (2) computer program utilized by social scientists. Equipment technology research will be aimed at the improvement of information available to local government officials who want to specify and select equipment technologies. Computer program research will provide information regarding the characteristics of existing computer pro-

Extension personnel develop "manure power"

Methane generator a Farm Show hit

One of the busiest attractions of the 1974 Pennsylvania State Farm Show in mid-January was the "Methane Gas Generator," a display which was as timely as the daily news. It had its impact because it was related to the energy crisis.

Many of the people attending the Farm Show are, it goes without saying, from farming areas. They are interested in fuels of any kind but at their entire operation, and anything showing promise of relieving the crisis in the fuel field is bound to be of interest. The display added further interest: hamburgers and coffee were heated by methane produced by the generator that was the focal point of the display.

Being more specific, the methane gas was produced from cow manure, and the generator was devised by Lebanon County Agent Glen Miller and the Agriculture of Lebanon, Fair, and Area Resource Development agent Donald Harter. It was first displayed during Agricultural Progress days last year and since then has gained attention from national news services, various publications, and Voice of America. In addition to the Farm Show audience.

Since then, additional attention has been directed toward the Miller-Bair-Harter device in that the State has provided the College of Agriculture with a grant of \$12,700 for the period of February 1, 1974, for the purpose of conducting additional research on the device.

Harter reports that to date about 150 letters and phone calls, from 36 states and from England and Canada, have come to the Extension Service Office in Lebanon to obtain more information about the methane gas generator, but no one is yet ready to make sweeping claims for the usefulness of the device; there isn't any question about the fact that the generator works.

In fact, the specific method for producing the methane gas is not new. Based simply on the natural process of digestion of the manure in an anaerobic atmosphere, the generator is used in India where there are said to be more than 2,500 devices of this general nature in rural villages and farms.

What brings the generator into focus at this time is economics; the cost of other fuels is now reaching the point where the operating and fixed costs of producing methane gas on the farm by this method may become competitive.

No one questions that the potential for producing methane on the farm in Pennsylvania is significant, and the use of manure as a fuel it could be used. Presumably a storage tank would be needed and some kind of pump to build up the gas pressure in the tank. The digester, while relatively simple, requires a heating device, possibly electric, to heat a mixture of manure and water (equal parts) to about 100 deg. F. (During summer months, little extra heat would be necessary.)

What research data is available indicates that about 10 cubic feet of methane can be generated from two or three pounds of dry animal waste. It is said that the State's 700,000 milk cows produce an esti-

mated 1.75 million tons of dry organic wastes yearly, but not all of this could ever be put to use economically to produce methane gas. Just how much could be also a subject for economic analysis.

Miller and Bair obtained a how-to-do-it manual for a generator from the director of the Gobar Gas Research Station in Ajmalpura, India. They started with three steel drums, 30 and 40 gallons, some gas pipe fixtures, an electric heating element and some other scrounged parts, obtained some bacterial starter from the Lebanon Sewage Disposal plant, and began their operation. Three weeks later they got their first ignitable gas (about 72 per cent methane, 18 per cent CO₂, and 10 per cent other gases).

To use the gas in practical ways, it was necessary to devise a pressure tank, pump, and control valves, which Miller and Bair mounted on a garden tractor. Then they designed a carburetor for the tractor, which Bair uses to mow his law. It works.

As a side benefit, the nitrogen in the manure is not removed in the digesting process so that the manure can be used as fertilizer — and has the extra bonus of being practically odorless on the land. There are certain hazards in an operation of this kind, and engineers will study the safety aspects of the generator.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-3471 (Network Line 475-3837). Applications for these vacancies will be accepted until:

5 P.M., THURSDAY, FEB. 21, 1974

STAFF EMPLOY — DISPENSARY RITENOUR HEALTH CENTER STAFF NURSES

University Park
Responsible for assigning physicians by providing nursing services and administering emergency treatment. Registered Nurse plus nine to twelve months effective experience.

MONOGRAPH ACQUISITIONS ASSISTANT UNIVERSITY LIBRARIES University Park

Responsible for coordinating the functions involved in monograph acquisition, for effecting changes in procedures and processes to provide more effective acquisition service. Bachelor's degree, preferably in Business Management, or equivalent, with the working knowledge of the book trade, including the special duties of outprints and antiquarian dealers and one to two years effective Library experience. Knowledge of publishing procedures of the United States and foreign countries necessary.

AREA REPRESENTATIVE CONTINUING EDUCATION Altoona Campus

Responsible for the functions of development, organization, operation, and administration of Continuing Education programs and services within an assigned geographical district. Bachelor's degree with one to three years effective experience in business, industry or education.

Applications for staff vacancies are considered without regard to race, color, creed, sex, or national origin.
THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

Educational Research and Development Programs

Research Foundation, 1000 West 49th St., New York 10020 (212)974-2273.
(1155) To support policy and program studies aimed at full utilization of the National Science Foundation's research and development program, the U.S. Department of Labor's Manpower Administration will fund "research and evaluation of new and existing manpower knowledge." Studies of limited or special areas are supported where they can be shown to provide a basis for generalized conclusions or wide applicability. Grants range from \$25,000 to \$150,000 and may be awarded for up to 18 months. For more information, contact: Robert Manfield, Div. Chief, Office of Research Grants, Manpower Administration, Room 3705, 1000 West 49th St., New York 10020 (212)978-7255.
RESEARCH AND EVALUATION OF NEW AND EXISTING MANPOWER KNOWLEDGE
Feb. 15 for seven NSF research and evaluation projects (Jan. 31 INTERCOM 4114-2) — Feb. 15 for NSF Instructional Scientific Equipment Program (Jan. 31 INTERCOM 4115-2) — Feb. 15 for Smithsonian Institution Grants (Jan. 31 INTERCOM 4116-2) — March 1 and several subsequent for NEA Museum Programs (Jan. 31 INTERCOM 4117-2) — March 15 for Smithsonian Institution research grants (Jan. 17 INTERCOM 4118-2) — March 15 for NEH Education Project Grants (Jan. 24 INTERCOM 4119-2).

Funding Opportunities

For more information, call 865-1372 except where noted below, and refer to the item by its number and the general information provided. People with previous information for distribution in this column should call the same number.

February 7, 1974
(1151) The NSF Office of Science Information Service (OSIS) supports programs aimed at improving the dissemination and use of scientific and technical information. Activities support research, development, and demonstration projects. Priority areas include: education of information transfer, user support, information systems, and foreign science activities. Research is emphasized; OSIS will fund studies that advance information science, applied studies, and applications of technology that improve existing services. Other NSF offices support scientific and technical information and communications, e.g., publishing of research results, education course and curriculum development, information interchange in RANN programs, and accumulation of scientific information and data. Internal inquiries are encouraged prior to formal proposals. Contact Lee G. Burchinal, Head, OSIS, NSF, 1900 Pennsylvania Ave. N.W., Washington, D.C. 20559 (202)352-5824.

University Calendar

February 7-17, 1974

Special Events

Thursday, Feb. 7 — Colloquy Festival of the Arts, Hollis Alpert, film critic, 8 p.m., HUB ballroom.

Thursday, Feb. 7 — Air Force Lt. General Daniel James, Jr., principal deputy assistant secretary of defense (public affairs), on "Power of Individual Excellence," 8 p.m., Schwab.

Thursday-Sunday, Feb. 7-9 — University Theatre, "Saint Joan," 7:30 p.m., Playhouse Theatre.

Friday, Feb. 8 — Music program by guitarist Richard Jackman, 8 p.m., Room 112 Kern. Music of the past 400 years.

Friday-Sunday, Feb. 8-10 — Invitational Student Film Festival, Schwab, 8 p.m. Admission free.

Friday, Feb. 8 — Folk and Square Dance Roundup, 7:30-9:30 p.m., North Gym.

Friday, Feb. 8 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday, Feb. 8 — Free-J Jammy, 7:30-11:30 p.m., HUB ballroom.

Saturday, Feb. 9 — Sports: Women's Basketball, vs. Shippensburg, 1:30 p.m.;

Women's Gymnastics, vs. Ohio State, Kent State, Youngstown State, 2 p.m.; Women's Rifle, vs. Kutztown, 10 a.m.; Women's Swimming, vs. Shippensburg, 2 p.m.; Wrestling, vs. Navy, 8 p.m., Rec Hall; Men's Swimming, vs. Bucknell, 2 p.m.; Men's Fencing, vs. Newark, 2 p.m.; Men's Rifle, vs. Army.

Sunday, Feb. 10 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Feb. 10 — Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Charles L. Coleman, program director, Religious Affairs.

Sunday, Feb. 10 — Reception for the opening of "Charles Sheeler: The Works on Paper," 3-5 p.m., Museum of Art.

Monday, Feb. 11 — Margaret Smith, violin recital, 8:30 p.m., Music Bldg. vocal recital.

Tuesday, Feb. 12 — Faculty Women's Club seminar, 9:30-11 a.m., HUB assembly room. Dr. Lynn Brinkman, nutrition science, on "American Food: Health and Hoax."

Tuesday, Feb. 12 — Sports: Women's Basketball, vs. East Stroudsburg, 2:30 p.m.; Basketball, vs. John Driscoll, gallery

talk on "Charles Sheeler: The Works on Paper," 10:30 a.m., Gallery A, Museum of Art.

Tuesday, Feb. 12 — Student panel discussion, film, and talk by Dr. S. R. Gelman on mental institutions, 7:30 p.m., Room 101 Chambers, sponsored by Society of Student Social Workers.

Wednesday, Feb. 13 — Representative to State legislature, Mr. Belomoni, on lowering the drinking age, 8-10 p.m., Pollock Lounge, sponsored by the Pollock N.R.H.A.

Wednesday, Feb. 13 — Artists Series, The Films of Luis Bunuel, "Tristana," 8:30 p.m., Schwab.

Wednesday, Feb. 13 — University Theatre student preview, "Blessed Event," by Slawomir Mrozek, in U.S. premiere, 7:30 p.m., Pavilion Theatre.

Wednesday, Feb. 13 — Musica da Camera, 8:30 p.m., Music Bldg. recital hall.

Thursday, Feb. 14 — "Mandabi" color feature-length film, 7:30 p.m., Black Cultural Center. Sponsored by the Black Cultural Center and the French Department.

Thursday, Feb. 14 — Talk on general crafts by Sue Weltman, freshman in education,

8 p.m., Room 101 Kern. Officers Society. Also election of new officers.

Friday, Feb. 15 — Colloquy, Dan Rather, 7:30-10:30 p.m., HUB ballroom.

Friday, Feb. 15 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday-Saturday, Feb. 15-16 — Artists Series, Lotte Goslar's *Pantomime Circus*, Friday at 8:30 p.m.; Saturday, children's performance at 10:30 a.m., Schwab.

Friday-Saturday, Feb. 15-16 — University Theatre, "Blessed Event," 7:30 p.m., Pavilion Theatre.

Saturday, Feb. 16 — Sports: Women's Basketball, vs. Wilson, 1:30 p.m.; Women's Gymnastics, vs. Towson State, 2 p.m.; Women's Swimming, vs. Underkuffler, 2 p.m.

Sunday, Feb. 17 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Feb. 17 — Chapel Service, 11 a.m., Eisenhower Chapel. Very Rev. Demetrius Dunn, O.S.B., Rector, St. Vincent Seminary, Latrobe, Pa.

Sunday, Feb. 17 — Fashion Show, 3 p.m., HUB main lounge, sponsored by Fashion Industry Intercollegiate Council, Inc. Development. "Clothing Coordination for Spring," Butterick representative.

Seminars

Thursday, Feb. 7 — Chemistry, 12:45 p.m., Room 310 Whitmore. Charles F. Hammer, Georgetown University, on "The Derived Matrix Technique: A New General Spectroscopic Method for the Quantitative Determination of Complex Mixtures."

Thursday, Feb. 7 — Meteorology, 3:55 p.m., Room 26 Min. Sci. Dr. Hans A. Panofsky on "Environmental Problems of Superstorm Transport."

Thursday, Feb. 7 — Mechanical Engineering, 4 p.m., Room 103 Mechanical Eng. Bldg. Olusola Okunseinde, graduate student, and Thomas L. Wright, air quality engineer, on "Measurements of Flow Separation in Confined Mixing."

Thursday, Feb. 7 — Engineering Acoustics, 4 p.m., Room 71 Willard. H. Tennekens, aerospace engineering, on "Turbulence: Eddies, Large and Small."

Thursday, Feb. 7 — Mining, 4 p.m., Room 302 Mineral Industries. Dell Adams, Vice-President (Exploration), Consolidated Coal Co., Pittsburgh, on "Planning and Engineering of Large Surface Coal Mines."

Thursday, Feb. 7 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. G. A. Peterson, G. May, D. Henninger, and A. D. Wilson on "Remote Sensing Techniques in Agronomy Research."

Thursday, Feb. 7 — Geography, 3 p.m., Room 107 Social Science Bldg. Dr. Roger L. Downs on "Cognitive Mapping and Spatial Behavior."

Thursday, Feb. 7 — Statistics, 4 p.m., Room 75 Willard. Lee C. Wensel, University of California at Berkeley (visiting adjunct professor), on "The Relative Efficiency of Ratio and Regression Estimators in Finite Populations."

Thursday, Feb. 7 — Biophysics, 4 p.m., Room 310 Whitmore. Walter W. Karakawa, biochemistry, on "Cellular and Humoral Interaction in Staphylococcal Immunity."

Friday, Feb. 8 — Physical Chemistry, 4 p.m., Room 310 Whitmore. Thomas E. Dykstra, University of Rochester, on "Microwave Spectra and Structure of H₂O Dimer and HF Dimer."

Monday, Feb. 11 — Computation Center RJE/BAT File System, 7:30 p.m., Room 201A Business Administration.

Monday, Feb. 11 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Dr. D. H. Peterson on "Extension Plant Pathology: Programs and Program Development for Deciduous Fruits and Grapes."

Monday, Feb. 11 — Current Issues in Food and Agriculture, 1 p.m., Room 202 Board. A. George Maklad on "The Energy Crisis and Food Production."

Monday, Feb. 11 — Genetics, 3:55 p.m., Room 111 Tyson. Y. S. Park on "Genotype-Environmental Interaction in Douglas Fir in Pa. Nurseries."

Tuesday, Feb. 12 — Center for Study of David Roessner, Office of Research Development and Assessment, National Science Foundation, on "Innovation in Public Organizations."

Tuesday, Feb. 12 — Aerospace, 3:55 p.m., Room 232 Hammond. G. W. Warren Hall, Calspan Corporation, Buffalo, N.Y., on "Control in Flight Simulator Technology."

Tuesday, Feb. 12 — Black Studies Committee and College of Arts and Architecture, 7 p.m., Zoller Gallery. Dennis G. Duerden, on "The Hunter in African Art."

Tuesday, Feb. 12 — Geosciences, 4 p.m., Room 26 M. S. Harold Marsusky, Civil Scientist, Center of Astrogeology, U.S. Geological Survey and AAPG Distinguished Lecturer, on "Mars Geological History and Geology."

Tuesday, Feb. 12 — Chemical Engineering, 3:50 p.m., Room 140 Fenske. C. R. Hartzell on "Electrochemical Reactions in Biological Systems."

Tuesday, Feb. 12 — Solid State Physics, 1 p.m., Room 445 Davey. Dr. George Whitfield on "Introduction to BCS Theory of Superconductivity," (first of two talks).

Tuesday, Feb. 12 — Comparative Literature Luncheon and Discussion, 12:15 p.m., HUB Dining Room. A. Eugene A. Borza.

Wednesday, Feb. 13 — Biochemistry, 4 p.m., Room 101 Althouse. R. Shaw on "Molecular Basis of Hemoglobin Cooperativity B. Other Models."

Wednesday, Feb. 13 — Analytical Chemistry, 8:30 a.m., Room 310 Whitmore. H. A. Clark on "Graph Theory in Analytical Chemistry."

Wednesday, Feb. 13 — Computation Center RJE/BAT File System, part II, 7:30 p.m., Room 201A Business Administration.

Wednesday, Feb. 13 — Speech Communication, 8 p.m., Room S209 Human Development. Dr. Gerald R. Miller, Michigan State University, on "Persuasion and Social Control: A Paradigm."

Thursday, Feb. 14 — Chemistry, 12:45 p.m., Room 310 Whitmore. Martin Semmelhack, Cornell University, on "Transition Metals as Agents for Carbon-Carbon Bond Formation in Organic Synthesis."

Thursday, Feb. 14 — Physics, 3:55 p.m., Room 117 Osmond. Heinz R. Pagels, Rockefeller Institute, on "Chiral Symmetry and Hadron Dynamics."

Thursday, Feb. 14 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. T. L. Watschke on "Solving Turfgrass Problems Through Research."

Thursday, Feb. 14 — Mechanical Engineering, 4 p.m., Room 103 Mechanical Engineering Bldg. Michael Volk on "Aerosol Coagulation in an Aqueous Field."

Thursday, Feb. 14 — Remote Sensing, 1 p.m., Room 222 Electrical Eng. West. Darrel Williams on "Computer Analysis for Mapping of Gypsy Moth Defoliation Levels in Northeastern Pennsylvania, Using ERTS-1 Data."

Thursday, Feb. 14 — Slavic and Soviet Language and Area Center, 3 p.m., Room 117 Willard. Robert McIntyre, economics, on "Pro-Natalist Policy in Eastern Europe."

Thursday, Feb. 14 — Computer Science, 4 p.m., Room 101 Althouse. E. C. Horvath, Princeton University, on "An Efficient In-Place Stable Sorting Algorithm."

Lectures

Thursday, Feb. 7 — Central Pennsylvania Society of the Archaeological Institute of America, 8 p.m., Room 101 Kern. Daniel J. Geagan, professor of history, McKeesport University, on "The Renewal of a City: Hadrian's Plan for Athens."

Thursday, Feb. 7 — Medieval Art Lecture Series, 3 p.m., HUB assembly room. Dr. Benjamin Bart, University of Pittsburgh, on "The Invention of a Saint: Julian the Hospitaller."

Monday, Feb. 11 — "What We Can Learn from African Art," by Dennis G. Duerden, managing editor, "Cultural Events in Africa," 8 p.m., Room 112 Kern, sponsored by University Black Studies Committee and the College of Arts and Architecture.

Thursday, Feb. 14 — Medieval Art Lecture Series, 3 p.m., HUB assembly room. Dr. Wilfrid von Kries, University of Massachusetts, on "Thomasin's Weischer Gast: An Interpretation of the Discreet Lover of the Text and Miniatures of a Vernacular Poem."

Exhibits

Museum of Art — Prints and Drawings from Central Pennsylvania Collectors, Gallery C. Charles Sheeler, The Works on Paper, opening Feb. 10, Gallery A.

Zoller Gallery — Nina Rosenblum International, jury student art work, through Feb. 9. Mary Lou Thompson, MFA Show, through Feb. 9. Arnold Bittelman, drawings, and Dolores Bittelman, weaving, opening Feb. 11.

Kern Gallery — Central Pennsylvania Scholastic Art Exhibit, through Feb. 8. Paul Harcharik, prints. Jack Shaub, watercolors.

Pattee Library — Jean Furst, prints, West Pattee Lobby. Peter Kaufman, paintings, East Pattee Lobby. Postage Stamps from New Zealand, Main Entrance Lobby. Sharon Gray, oil paintings, Circulation Lobby, until Feb. 15.

Black Cultural Center — John Pettus. Pen and ink drawings and black prints, until Feb. 15.

Films

Thursday-Sunday, Feb. 7-10 — Centre Halls, "Bless the Beasts and Children," 7:30 and 10 p.m., Room 105 Forum.

Thursday, Feb. 7 — Commonsplace Theatre, "Greetings," 8 and 10 p.m., Room 112 Kern.

Thursday-Sunday, Feb. 7-9 — PSU College Young Democrats, "On the Waterfront," 7 and 9:30 p.m., Room 209 Human Development.

Saturday, Feb. 9 — USG, "The Point," 8-12 p.m., HUB assembly room.

"Hanging by the Neck" — Free-U Children's films, 2 and 3 p.m., HUB assembly room.

Wednesday, Feb. 13 — Commonsplace Theatre, "Destiny Riders Again," 8 and 10 p.m., Room 112 Kern.

Thursday-Sunday, Feb. 14-17 — Centre Halls, "Sound of Music," 7:30 and 10 p.m., Room 105 Forum.

Friday-Sunday, Feb. 15-17 — North Halls, "Slaughterhouse Five," 7:30 and 9:30 p.m., Room 108 Forum.

Friday-Saturday, Feb. 15-16 — USG, "Festival of Laughter," 7:30 p.m., HUB assembly room. Launa and Hardy, The Stooges, Bugs Bunny, Road Runner, others.

Saturday, Feb. 16 — Free-U Children's films, "Sammy, the Way Out Gal," (Walt Disney), 12:30 and 2:30 p.m., HUB assembly room.

HUB specials

Sunday, Feb. 15 — dinner, roast pork w/d.r., \$1.99; supper, tuna potato chick casserole \$1.39.

Monday, Feb. 16 — lunch, chili con carne \$7.95; dinner, spaghetti w/cheese sauce \$1.95.

Tuesday, Feb. 12 — lunch, chicken chow mein \$1.95; dinner, lamb hot pot \$1.43.

Wednesday, Feb. 13 — lunch, Welsh rarebit w/flat \$1.16; dinner, corned beef & cabbage \$5.69.

Thursday, Feb. 14 — lunch, lasagne \$1.11; dinner, chopped steak \$1.89.

Friday, Feb. 15 — lunch, fish cakes \$1.22; dinner, French fried clams \$1.49.

Saturday, Feb. 16 — lunch, beef pattie w/onions \$5.99; dinner, Maryland chicken steak \$1.59.

WPSX highlights

"The Cranes are Flying," a 1957 Russian film that focuses on the sordid as well as the glorious side of the Russian experience during World War II, is presented on "The Killers," a series of five monthly documentaries about the major causes of death in America, focuses on death by trauma Monday, Feb. 11, at 8 p.m. Trauma is the main cause of death for Americans under the age of forty. "The Killers" program examines the nature of trauma and new research into how it can be treated. It also stresses the importance of every citizen having an emergency medical care system and the increasing role of paramedics in treating trauma patients. Following "The Killers," WPSX-TV is presenting "Meeting the Emergency" — Close to

Home." This WPSX-TV special looks at emergency care systems in Central Pennsylvania and other emergency services available to area residents. Both "The Killers" and "Meeting the Emergency — Close to Home" may also be seen Saturday, Feb. 16, at 2 p.m. and again at 10:30 p.m.

Genevieve Bujold, Stacy Keach, and Fritz Weaver star in "Antigone," Jean Anouilh's tragic drama based on the Sophocles classic, on "Theatre in America" Wednesday, Feb. 13, at 8:30 p.m. Anouilh maintains Sophocles' original theme of the conflict and universal struggle between passion and reason.

Emmett Dedmon, editorial director of the Chicago Sun-Times/Daily News, gives his personal account of a visit to the People's Republic of China, and he is Robert Crome's guest on "Book Beat" Wednesday, Feb. 13, at 10:30 p.m. Dedmon, one of the first American journalists to be allowed into the People's Republic, is the author of "China Journal."

RJE/APL computer seminar topics for winter term

The Computation Center's series of seminars on facilities and their uses will begin next week and continue through the Spring Term. The seminars will begin at 7:30 p.m. but use various meeting rooms; they will be noted in the INTERCOM calendar.

Two of the seminars will be held before the end of the Winter Term, those related to "Penn State RJE/BAT File System" and "Introduction of APL." The first is a two part series, the second is in three parts.

RJE (Remote Job Entry) is a system whereby a person may use a typewriter terminal to create and modify files containing information such as programs, data, text, etc. One or more files may be submitted as a job, and the output from such a job may be directed back to an RJE file or to any line printer. The BAT (Batch and Terminal) system permits the inclusion of one or more RJE files in a job submitted as a card deck, and the direction of specified parts of job output to a special form of RJE file. (2 sessions).

A "Programming Language," APL, is an interactive system accessed solely through typewriter terminals. APL uses a unique character set especially powerful for operations on arrays. Besides interactive programming, APL provides a "desk calculator" mode that immediately evaluates arithmetic expressions as they're typed.

For a full, one graduate student interested in APL are encouraged to obtain a "user identification code" — application forms are available in Room 229, Computer Building.

Architecture has role in edition on San Leucio

San Leucio, the most significant of the social experiments undertaken under the Bourbon reign in Naples in the 18th century, is the subject of a limited edition folio of documents published recently, which resulted from a project of the Department of Architecture in collaboration with the architecture faculty of the University of Milan, Italy.

"San Leucio: Traditions in Transition," published in conjunction with an exhibit last summer on the same subject held in San Leucio in commemoration of the bi-centennial of first construction there, is the first English language introduction to this experiment. The publication, together with the exhibit, is the culmination of three years of research by architecture faculty and students.

Described is the Utopian city of Ferdinandopolis, whose first sector, San Leucio, was realized as an industrial colony for the manufacture of silk. In the folio is the first English text of the original constitution of the colony, a document both radical and influential in Europe when it was written in 1789.

A total of eight documents provide extensive written and graphic detail of San Leucio, including the historical documents leading to its inception, the transformations it has undergone, and its present-day configuration. Among the materials are a comprehensive history written by Richard Plunz, project director and assistant professor of architecture, and an addendum, "San Leucio As Utopia," by Eugenio Battisti, professor of art history.

The Arts: exhibits opening; music programs

"Charles Sheeler: The Works on Paper" opens in Gallery A of the Museum of Art at the University Sunday, Feb. 10, with a reception from 3 to 5 p.m. Sheeler, who died in 1965, was "among the first to create an art of universal significance and international consequence" in the United States, according to John Driscoll, a graduate student in art history, who selected the works for the show and wrote its catalog. About 60 watercolors and drawings produced between 1914 and 1959 will be shown.

The popular appeal of Sheeler's works is rooted in the Bucks County barns, industrial landscapes and urban cityscapes he portrayed, Driscoll claims.

The show will close on March 24. In Gallery C, "Prints and Drawings from Central Pennsylvania Collectors" continues through March 3.

A show of large drawings by Arnold Billeman, artist-in-residence and lecturer in the arts at Union College, and weavings by Olores Billeman will open Monday, Feb. 11, in Zoller Gallery with a reception for the artists at 7 p.m.

Mr. Billeman has had three one-man shows in Boston, and his works have been bought or exhibited at the Museum of Modern Art, the Whitney

Museum, the Boston Museum of Fine Arts, and the Zabriskii and Borgegna galleries in New York among others. Mrs. Billeman's works have been included in every major weaving show. Their exhibit will continue through March 7.

MUSIC PROGRAMS

Musica da Camera, The University chamber orchestra conducted by Dr. D. Douglas Miller, assistant professor of music, will feature works by four composers from the Bach family in a concert Wednesday, Feb. 12, at 8:30 p.m. in the Music Building recital hall.

Compositions in the Baroque style by Johann Sebastian and Johann Bernard Bach will be played, along with those by the younger Carl Philip Emanuel and Johann Christian, who wrote in the pre-Classical period. Johann Christian's "Symphony in D Major," a double orchestra symphony written for two string groups in anthophoral arrangement, is of a special interest.

Works by Beethoven, Perichelli, Sarasate, Leclair, and Suk will be played by violinist Margaret Smith, M.F.A. candidate, in a recital Monday, Feb. 11, at 8:30 p.m. in the Music Building recital hall. She will be assisted by Jill Olsen, piano, and William Thomas, cello.

Seek volunteers to aid retarded

The Pennsylvania Fellowship Plan, through its local coordinator, William Cave (444 E. College Ave., Suite 350, State College, 237-5396) has asked that the Plan be made known to the University faculty.

Briefly, PFP is a statewide program to recruit volunteer citizen advocates to match them one-to-one with mentally retarded persons of all ages. Such an advocate is viewed as a mature, competent volunteer representing the interests of another citizen with impaired ability to learn in dealing with practical problems of adapting to the community.

Called "Fellows" with PFP, these advocates receive general guidelines and orientation and are encouraged to attend PFP workshops, but relationships in each specific case develop from the needs and potential evidence. The essential component is friendship — the Fellow helps his Friend become a member of a community, participating in its activities, and taking advantage of its opportunities.

PFP was established just last year, funded in part with a three-year grant from the Penna. Dept. of Public Welfare through a subcontract with the Penna. Association for Retarded Citizens, Inc.

Mr. Cave will be happy to provide more information to interested faculty and staff members.

POLISH WRITER —

(Continued from page one)

participating in the development of the University Theatre production of the American premiere of his "Blessed Event" on Feb. 15, 19 and 19-23, directed by assistant theatre professor Archie Smith, and this month he will travel to the New Kensington campus of the University for the performance of his best-known play, "Tango," under the direction of theatre arts instructor Peter Grego. He is teaching advanced playwrighting in the Department of Theatre and Film and is involved in dramatic literature courses taught by Stephen Grecco, assistant professor of English.

Mrozek says he enjoyed the one Five O'Clock production he had the opportunity to see and that rehearsals for "Blessed Event" are going well. He is especially impressed by the theatre facilities at the University, referring to them when he said

News in brief

INSTITUTE TITLED

At the meeting of the Board of Trustees in January, approval was given for a change in the name of the Pennsylvania Transportation and Traffic Safety Center to the Pennsylvania Transportation Institute (not Center as reported in the Jan. 24 issue of INTERCOM). The new name, in addition to more clearly defining the functions of the work, also avoids confusion with similarly-named organizations elsewhere. The Institute is part of the Institute for Science and Engineering and is directed by Dr. Thomas D. Larson.

VETERANS ENTERTAINED

Members of Chi Gamma Iota fraternity at Capitol Campus visited and entertained hospitalized Vietnam veterans of the Costeview Veterans Administration Hospital, Jan. 26, delivered more than 2,000 paperback books and magazines, and provided cakes, cookies and doughnuts baked by wives of the fraternity members. The same fraternity organizes and maintains records for the Blood Bank at Capitol Campus and provides admission consultations with other veterans on campus. The fraternity members are all Vietnam veterans themselves.

CLASSICAL GUITAR

Richard Jackman, classical guitarist currently teaching guitar privately in State College, will play a variety of music writ-

he finds "more theatre here than in many big cities in many countries."

He finds teaching stimulating and interesting. After a few weeks of instructing, he notes, he found that he had to refine his ideas and make them precise in order to communicate them to his students, forcing him to give shape to thoughts which otherwise might be undefined and shapeless.

"Blessed Event," also currently in production in Poland, is a three-act farce in which much of the set is a gigantic bed. It features a monstrous baby born to a liberal, democratic couple forced to conspire with a boarder of anarchist persuasion for a moment of privacy to conceive the child away from the ever watchful eye of the husband's tyrannical, reactionary old father.

Stressing that any play is liable to several valid interpretations, Mrozek resists

ten over the past four centuries in a concert Friday, Feb. 8, at 8 p.m. in the Music Bldg. auditorium. There is no admission charge. Jackman, Australian-born and trained, moved to the U.S. in 1968 and last year completed B.S. degree work in mathematics at Penn State. He has given a number of recitals during his four years here and during the past three years has attended master classes in Europe, including those of Andres Segovia and Renzo Lazzare. He plans to go to Munich, Germany, next year to further his career as a concert artist.

AFRICAN ART

"What We Can Learn from African Art" will be discussed by Dennis G. Duerden, director of the Transcription Center in London, England, and managing editor of "Cultural Events in Africa," in an illustrated lecture Monday, Feb. 11, at 8 p.m. in Room 112 Kern. He will also give a seminar Feb. 12, at 7 p.m. in the Zoller Gallery. Duerden will be given sponsored by the Black Studies Committee and the College of Arts and Architecture. He is the author of "African Writers Talking" and "African Art" and has several other books in progress.

ALTOONA CONCERT

Classical pianist James Fields, from Occidental College, will give a recital at Altoona Campus Thursday, Feb. 7, at 8 p.m. in the Slep Student-Faculty Center. The recital is part of the Student Altoona Series open to the public.

the inevitable political exile-turned-theater protester motive often attributed to his selection of themes for this and other plays. He does not address himself to contemporary problems, he says, but writes primarily to amuse and meditate, with character creation and plot invention and always with the primary concern of the stage productions of the players.

"Every director chooses a play with his own image already formed of what the play should be," Mrozek continues, "and I welcome his interpretations. I am a writer, not a theatre man."

With a cast of four graduate theatre students, Matthew Faison, James McDade, Steven Pudenz, and a recent M.F.A. graduate, Mrozek says he has been in Guttenplan, "Blessed Event" will be the final production of the University Theatre this term. Tickets are available now at the box office, 865-1884.

WPSX wants help on programs

Faculty and staff help is being sought by WPSX-TV and the Pennsylvania Public Television Network, in part through a questionnaire published on this page. The purpose: to determine what needs the station and the network have in the future. PLEASE RETURN THE QUESTIONNAIRE TO WPSX-TV, 202 Wagner Building, University Park, Pa. 16802.

Network vice chairman John O. Hershey announced the project in January, pointing out that it will include interviews with state legislators, community leaders, television public hearings, and the questionnaire, which will involve all seven network stations.

The project has special application for Penn State University. "As a continuing education service of the University," says Dr. Floyd B. Fischer, president for Continuing Education, "WPSX-TV has the responsibility to provide quality educational and instructional programs to a potential audience of one million Central Pennsylvania residents. Through the surveys and the public hearings, we can discover what these many people feel are the most important needs that educational/public television can serve. We will then be able to focus our attention on these specific educational television services."

David L. Phillips, director of the Division of Broadcasting in Continuing Education, adds that "in the past we have done several scientific audience studies through Planning Studies at Penn State. These have shown us who our audiences are. This new project will, we hope, give us more detailed information about the kinds of programs we should provide and what emphasis should develop in the next few years."

What do you consider to be the most important problems and needs facing your community, Pennsylvania, and the nation today?

Educational/public television has the ability to bring a wide variety of specialized programs to many specific interest groups. To help us judge which kinds of programs are most important to our area, please respond to the following program types by circling the appropriate number:

1 Very Important 2 Important 3 Not Important

Classical music	1	2	3	A	I
Popular music (rock, jazz, etc.)	1	2	3	A	I
Serious dramatic productions	1	2	3	A	I
Programs about the visual arts	1	2	3	A	I
Debates on public issues	1	2	3	A	I
Town meeting-type discussions giving the general public the opportunity to question public officials	1	2	3	A	I
Coverage of public hearings, meetings, etc.	1	2	3	A	I
Appearances by candidates for public office prior to elections	1	2	3	A	I
Formal credit courses applicable to some form of certificate or diploma	1	2	3	A	I

Then, indicate whether or not you think the current WPSX-TV program schedule offers an adequate amount of these programs by circling one of the following:

A Adequate I Inadequate

Vocational education courses designed to upgrade the skills of employees	1	2	3	A	I
Noncredit adult instruction courses in the crafts	1	2	3	A	I
Informal adult education for avocational or recreational enhancement	1	2	3	A	I
Instructional programs for use in public schools	1	2	3	A	I
Programs for children during out-of-school hours	1	2	3	A	I
Programs for specialized interest groups (businessmen, educators, etc.)	1	2	3	A	I
Programs for minority groups	1	2	3	A	I

PENN STATE intercom

Volume 3, Number 22

February 14, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

News in brief

THIRD PLACE WINNER

The American Institute of Landscape Architects has awarded third place in its seventh annual student design contest to a senior design project from the University's Department of Landscape Architecture. Members of the student team, which won a cash award of \$150, were Joseph F. DeChico, Leittown; Dennis T. Gerdovich, Coalville; Lowell D. Savage, Erie; and Edward P. Schmidt, Glenside. Their project was developed in classes taught by three landscape architecture faculty members: associate professors Glenn E. Steyers and James R. DeTuerck, and assistant professor William G. King.

FILM CLASSIC

The 1959 film, "Hiroshima Man Amour," of Alain Resnais and Marguerite Duras will be shown Monday, Feb. 18, at 8 p.m. in the Auditorium of Human Development South. The film, with English subtitles, is sponsored by the French Department in connection with the experimental course, "Women in Modern French Literature," but the showing is open to the University community. A contribution of 50 cents toward the expense of the film would be appreciated.

DUPONT AWARDS

Three departments of the University have received grants under the DuPont Company's 1974 educational aid program. Chemistry and Chemical Engineering each was given \$10,000, and Mechanical Engineering was awarded \$50,000, along with an additional grant of \$20,000 to support research by young faculty members.

TERRITORIALITY

Oscar Newman, author of "Defensible Space" and president of The Center for Residential Security Design, Inc., will speak on "Territoriality and Housing Design," Friday, Feb. 15, at 4 p.m. in Room 26 Mineral Sciences. This is the third presentation in the Guest Lecture Series of the Division of Man-Environment Relations, College of Human Development.

BELL TELEPHONE REPAIR

The "repair service" number of Bell Telephone Co. in the University Park-State College-Bellfonte area, listed in current Faculty-Staff directories as 355-0114, has been changed to 234-0211. The number is correctly listed in the most recent Bell Telephone directories.

INTERNATIONAL SYMPOSIUM

Sponsored by the Pennsylvania Transportation Institute, the Federal Highway Administration, and the Journal, Transportation Research, an international symposium will be held in mid-May at University Park to look at the effects of the energy crisis on transportation balance. Dr. Frank Haght, professor of statistics, is organizing the symposium, which will look into a variety of subjects ranging from long range effects on transportation balance to special problems facing specific communities.

FOR THE WOMEN

A fashion show of spring clothes will be held in the HUB main lobby lounge on Sunday, Feb. 17, sponsored by a student organization in the College of Human Development. In addition to modeling of clothes, pamphlets on patterns and sewing will be distributed.

Institute awards nine research fellowships

Nine Research Fellowships have been awarded by the Institute for the Arts and Humanistic Studies for the coming Summer Term. The recipients include:

Dr. Charles D. Ameringer, associate professor of history, who will continue work on a political biography of Jose Figueres.

Dr. Caroline Eckhardt, assistant professor of English, and Dr. Robert B. Eckhardt, assistant professor of anthropology, to develop a biography of Franz Weidenreich.

Dr. Paul B. Harvey, assistant professor of history, for preparation of a commentary on the "Oratoriones Illi de lege agraria" of the Roman orator Cicero.

Dr. Michael T. Kiernan, assistant professor of English, who is preparing a critical edition of the "Essays" of Francis Bacon.

Linda Plotkin, assistant professor of art, for the creation of a series of color, lithographs of Pennsylvania settings.

Dr. James M. Rambeau, assistant profes-

sor of English, to study the later works of Henry James.

Dr. Bruce Rosenberg, professor of English and comparative literature, for travel to Finland and Wales to present a paper at the Sixth International Congress of the Society for Folk-Narrative Research and to study Chaucer papers in the National Museum of Wales.

Dr. Beno Welss, assistant professor of Italian, to pursue continuing research on the Theatre of Italo Svevo.

March 1 is deadline for nominations

University libraries award program is announced

March 1 is the deadline for nominations for the first Pennsylvania State University Libraries award.

The Award for Outstanding Contribution to Pennsylvania State University Libraries will be presented annually in the third week of May to a Pennsylvania State University Libraries staff member, a benefactor of the Libraries, or a member of the University teaching faculty, administrative or research staff.

Nominees must meet one or more of the following selection guidelines:

Has made a professional contribu-

tion which has a significant influence on the operations of the Pennsylvania State University Libraries.

Has made a significant professional contribution which earns the recognition of the University community for the Pennsylvania State University Libraries.

Has shown excellence of service to the Pennsylvania State University Libraries as evidenced by continuous leadership and innovation.

Selection of the recipient of this award will be made by an award jury of three members of the Libraries' staff chosen by the Library Faculty Council.

The award will consist of a cash stipend and a Nittany Lion statue.

Nominations are solicited from the University community before March 1 and should be submitted on forms obtained from: Personnel Librarian, Room E-505 Pattee Library, University Park, Pennsylvania 16802. Telephone 865-0451. On the Commonwealth Campuses, nomination forms may also be obtained from the librarian.

Changes would affect most faculty, staff

Retirement system legislation passes Senate

On January 29, 1974, an important piece of State legislation affecting University faculty and staff who are members of the State Employees' Retirement System cleared the Senate by a vote of 45-1. The bill (Senate Bill #472) has now been referred to the House where some observers anticipate ultimate passage. If the bill passes in its present form, there are several major changes involving the status of active members as well as a cost-of-living increase for members who retired prior to July 1, 1972. The intent of this article is to acquaint active faculty and staff members with the proposed changes. It should be recognized that this article may not accurately reflect the final provisions of the bill since it still may be amended in the House. Moreover, the legal interpretation of the legislation may differ from the interpretation in this article.

The main provisions of Senate Bill #472 appear to be as follows:

MEMBER'S BASIC CONTRIBUTION RATE

Everyone joining the State Employees' Retirement System after the new legislation is passed would contribute at the rate of five per cent of total earnings.

Current members who have already elected the provisions of Act 230 (passed in 1968) will continue to contribute to the retirement plan at their current rate on their total earnings, and if their salary is higher than the social security taxable base (for 1974, the base is \$13,200), they also pay five percent of their salary which is in excess of that base. Because of this, they obtain higher retirement benefits than those who did not choose to accept Act 230 provisions, the amounts depending on their salaries and the social security taxable base.

However, Act 230 permitted members to delay making an election of its provisions. If the provisions of Senate Bill 472 remain intact through passage and signing by the Governor, it will not be possible for current members to make that election, if they have not done so as of the date the legislation becomes effective.

MILITARY CREDIT

The present retirement act permits a member who has joined the retirement system within three years of date of separation from active military duty to purchase a maximum of five years of retirement

credit for military service provided that a military pension will not be payable for the same time. The cost is based partially on the member's salary when he first joined the system.

The new bill provides for the purchase of a maximum of 5 years of retirement credit for military service regardless of the date of entry into state (or University) service. The cost would be partially determined by the average of the first three years of salary. In addition, there is a provision which would require the faculty or staff member to pay the statutory interest

(Continued on page two)

Seek Education dean nominees

Nominations for the position of Dean of the College of Education of the University are now being requested by a Search Committee chaired by Edward R. Fagge, professor of secondary education. The Committee will prepare a list of the most qualified candidates for submission to the University Provost, Russell E. Larson, who appointed the search committee.

Besides the general qualifications and duties for University deans as described on page 22 of the University's "Faculty Handbook," (doctoral degree, recent administrative experience, experience with a multi-faceted university), candidates for Dean of the College of Education should have demonstrable experience and competence in the supervision of university policies; budget; faculty, clerical, and student personnel; research curricula; physical plant and faculty affairs. The candidate should also have the ability to represent the College at State, Regional and National meetings; to coordinate teacher education programs; to consider and approve continuing education programs after due consultation with those charged for developing such programs, to offer advice and consent on College and department publications and such other qualifications as are pertinent to the position.

Candidates may refer themselves, or anyone may submit credentials for individuals either within or outside the University. The suggestion of a candidate should be accompanied by a resume of academic and professional experience and any other data relevant to the qualifications described above. Letters of recommendation or names of people who might be contacted for references should also be supplied. The Committee would appreciate receiving documents on suggested candidates as soon as possible, and cannot guarantee consideration of material received after April 20.

All material relating to the position of Dean of the College of Education should be addressed to the Chairman of the Search Committee, Box 50, Rackley Building, University Park, Pa. 16802.

Nominations may also go to any member of the search committee. Members in addition to Dr. Fagge are:

Kenneth R. Beittel, professor of art education; Asa J. Berlin, associate professor of speech pathology; Karen E. Bloom, 9th term student in education of exceptional children; Marjorie East, professor and department head, home economics education; Merlin J. Joyce, 9th term student in secondary education; Ernest H. Ludwig, associate dean of the graduate school; Eugene R. Melander, assistant vice president for undergraduate studies; Stanley F. Paulsen, dean of the College of Liberal Arts; and Joe L. Salazar, graduate student in higher education. Robert L. Kidder, manager, employment division, personnel administration, is an ex officio member.

University Calendar

February 14-24, 1974

Special Events

Thursday, Feb. 14 — "Mandabi," color feature-length film, 7:30 p.m., Black Cultural Center, sponsored by the Black Cultural Center and the French Department.

Thursday, Feb. 14 — Talk on general crafts by Sue Weltman, freshman in education, 8 p.m., Room 101 Kern, Folklore Society. Also election of new officers.

Friday, Feb. 15 — Colloquy, Dan Rafter, 7:30-10:30 p.m., HUB ballroom.

Friday, Feb. 15 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday-Saturday, Feb. 15-16 — Artists Series, Lotte Goslar's Panomime Circus, Friday at 8:30 p.m., Saturday, children's performance at 10:30 a.m., Schwab.

Friday-Saturday, Feb. 15-16 — Pavilion Theatre, "Blessed Evening," 8 p.m., University Theatre.

Saturday, Feb. 16 — Sports: Women's Basketball, vs. Wilson, 1:30 p.m.; Women's Gymnastics, vs. Tewson State, 2 p.m.

p.m.; Women's Swimming, vs. Ursinus and Elizabethtown, 2 p.m.

Sunday, Feb. 17 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Feb. 17 — Chapel Service, 11 a.m., Eisenhower Chapel. Very Rev. Demetrius Dumm, O.S.B., Rector, St. Vincent Seminary, Latrobe, Pa.

Sunday, Feb. 17 — Fashion Show, 3 p.m., HUB main lounge, sponsored by Fashion Industry Interest Group, Human Development. "Clothing Coordination for Spring," Butterick representative.

Sunday, Feb. 17 — Eastern Orthodox Divine Liturgy, 10 a.m., HUB assembly room.

Sunday, Feb. 17 — Penn State Jazz Club concert by jazz saxophonist Eric Kloss, 8 p.m., Schwab. Free workshop conducted by Kloss, 3 p.m., Findlay Union Bldg.

Monday, Feb. 18 — Vocal recital, Karen Cain and Robert Trehy, 8:30 p.m., Music Bldg. recital hall.

Monday, Feb. 18 — Film, "Hiroshima Mon Amour," 8 p.m., Auditorium, Human

Development (South). Presented by the French Dept. in connection with the course "Women in Modern French Literature," open to the University community.

Tuesday-Saturday, Feb. 19-23 — University Theatre, "Blessed Evening," 8 p.m., Pavilion Theatre.

Wednesday, Feb. 20 — Artists Series, The Fillins of Luis Bunuel, "Belle de Jour," 8:30 p.m., Schwab.

Wednesday, Feb. 20 — Sports: Men's Basketball, vs. West Virginia, 8 p.m., Rec Hall.

Wednesday, Feb. 20 — "A Watcher in the Wilderness," slide presentation by Mike Ondik, Supervisor of the Deer Research Program, for Pre-Vet Club meeting, 7:30 p.m., Room 301 Agri. Adm. Bldg. Also elections of officers.

Thursday, Feb. 21 — Faculty Women's Club luncheon lecture, 12:30 p.m., Room 101 Kern. Mrs. Thelma S. Baker and Dr. Paul T. Baker, anthropologist, on "Human Adaptability to the Environment."

Thursday, Feb. 21 — Film, "Malcolm X Speaks," 7:30 p.m., Black Cultural Center.

Friday, Feb. 22 — Penn State Brass Chorus, 8:30 p.m., Music Bldg. recital hall.

Friday, Feb. 22 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.

Friday, Feb. 22 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday, Feb. 22 — HOPS lecture by Troy D. Perry, founder, Universal Fellowship of Metropolitan Community Church and National Gay Liberation Leader, 8 p.m., Room 44, Willard.

Saturday, Feb. 23 — Sports: Wrestling vs. Pittsburgh, 4 p.m.; Men's Swimming vs. West Virginia, 2 p.m.; Men's Basketball, vs. Pittsburgh, 1 p.m.; Men's Gymnastics, vs. So. Connecticut, 8 p.m.; Women's Basketball, vs. Indiana U. of Pa., 1 p.m.; Women's swimming, vs. East Stroudsburg, Clarion State, Slippery Rock, 5:30 p.m.

Sunday, Feb. 24 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, Feb. 24 — Chapel Service, 11 a.m., Eisenhower Chapel. Jon P. Gunne-man, religious studies.

Seminars

Thursday, Feb. 14 — Chemistry, 12:45 p.m., Room 310 Whitmore. Marlin Semmehack, Cornell University, on "Transition Metals as Agents for Carbon-Carbon Bond Formation in Organic Synthesis."

Thursday, Feb. 14 — Physics, 3:35 p.m., Room 117 Osmond. Heinz R. Pagels, Rockefeller Institute, on "Chiral Symmetry and Hadron Dynamics."

Thursday, Feb. 14 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. T. L. Watschke on "Solving Turfgrass Problems Through Research."

Thursday, Feb. 14 — Mechanical Engineering, 4 p.m., Room 103 Mechanical Engineering Bldg. Michael Volk on "Aerosol Coagulation in an Acoustic Field."

Thursday, Feb. 14 — Remote Sensing, 1 p.m., Room 225 Electrical Eng. West. Darrel Williams on "Computer Analysis for Mapping of Gypsy Moth Defoliation Levels in Northeastern Pennsylvania, Using ERTS-1 Data."

Thursday, Feb. 14 — Slavic and Soviet Language and Area Center, 3 p.m., Room 117 Willard. Robert McIntyre, economics, on "Pro-Natalist Policy in Eastern Europe."

Thursday, Feb. 14 — Computer Science, 4 p.m., Room 101 Althouse. E. C. Hor-

vath, Princeton University, on "An Efficient In-Place Stable Sorting Algorithm."

Thursday, Feb. 14 — Central Pennsylvania Chapter of the Acoustical Society of America and Engineering Acoustics, 4 p.m., Room 71 Willard. Dr. G. K. Strother, biophysics, on "Echo Location by Bats."

Thursday, Feb. 14 — Mathematics, 4 p.m., Room 104 McAllister. Professor Curt Meyer, University of Maryland and University of Colorado, on "Some Applications of Elementary Field Invariants of Realquadratic Number Fields."

Thursday, Feb. 14 — Nuclear Engineering, 4 p.m., Room 111 Brazeeale Nuclear Reactor. Dr. S. E. Eaton, vice-president, Breeder Reactor Division, Burns and Roe, Inc., New Jersey, on "Cost Benefit Analysis of Advanced Power Reactor Systems."

Monday, Feb. 18 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Dr. L. P. Nichols on "Extension Plant Pathology: Programs and Program Development for Floricultural and Ornamental Plants."

Monday, Feb. 18 — Current Issues in Food and Agriculture, 1 p.m., Room 202 Bolland. John C. Weaver on "The World's Food Market and Conflicting Interests."

Monday, Feb. 18 — Genetics, 3:55 p.m., Room 111 Tyson. Dr. Richard Craig on

"What a Difference a Gene Makes — the Development of the Semidwarf Seed Propagated Geranium."

Monday, Feb. 18 — Entomology, 4 p.m., Room 215 Armsby. William Ellinger on "Dentic Insect Species Composition in Relation to Water Quality in Sinking Creek, Centre County, Pa."

Monday, Feb. 18 — Biochemistry, 4 p.m., Room 101 Althouse. K. Miller, on "Isolation of Rabbit Antibodies Directed Against Galactosyl and Lactosyl Moieties of a Cell Wall Carbohydrate from *Streptococcus Faecalis*, Strain N."

Monday, Feb. 18 — Microbiology, 4 p.m., Room 250 North Frear. Dr. Luther Williams, Massachusetts Institute of Technology, on "Theonine Deaminase: Its Role of an End Product Inhibition in Regulation of its Specific Enzyme Formation."

Tuesday, Feb. 19 — Chemical Engineering, 3:50 p.m., Room 140 Fenske. F. M. Fowkes, Lehigh University, on "Interfacial Interactions in Polymer Reinforcement."

Tuesday, Feb. 19 — Geosciences, 4 p.m., Room 26 M. S. Films, "Across the Cordillera — The Development of a Geosyncline," and "The Subalpine Chains."

Tuesday, Feb. 19 — Solid State Physics, 1 p.m., Room 445 Davies. Dr. Eugen

Skudrzyk on "New Experimental Techniques of Measuring Acoustical Absorption of Thin Fluid Layers and Droplets in the Megahertz Range."

Tuesday, Feb. 19 — Aerospace, 3:55 p.m., Room 232 Hammond. Mr. William Walls, Boeing/Verol Company, Morton, Pa., on "Helicopter Development."

Wednesday, Feb. 20 — Biochemistry, 4 p.m., Room 101 Althouse. R. Hilpaka on "Oxygen Binding by Mutant Hemoglobins."

Wednesday, Feb. 20 — Analytical Chemistry, 8:30 a.m., Room 310 Whitmore. Dr. Howard Pickering on "Electrochemical Conditions within Cavities for Imposed Anodic and Cathodic Control at the Outer Surface."

Thursday, Feb. 21 — Chemistry, 12:45 p.m., Room 310 Whitmore. Stuart P. Cram, National Bureau of Standards, on "Physico-Chemical Measurements by Gas Chromatography."

Thursday, Feb. 21 — Physics, 3:35 p.m., Room 117 Osmond. Leo Esaki, Thomas J. Watson Research Center, IBM, on "Recent Developments in Surface Physics."

Thursday, Feb. 21 — Agronomy, 3:55 p.m., Room 301 Agri. Adm. R. Pfeiffer and G. W. McKee on "Revegetation of Strip Mine Spoils."

Lectures

Thursday, Feb. 14 — Medieval Art Lecture Series, 3 p.m., HUB assembly room. Dr. Wilfrid von Kries, University of Massachusetts, on "Thomas's Welsher Gast: A Interpretation of the Diabolic Levels of the Text and Miniatures of a Vernacular Poem."

Friday, Feb. 15 — The Division of Man-Environment Relations Guest Lecture Series, 4 p.m., Room 26 Min. Sci. Oscar Newman, author and president of the Center for Residential Security Design, Inc., New York, on "Territoriality and Housing Design."

Films

Thursday-Sunday, Feb. 14-17 — Centre Halls, "Sound of Music," 7:30 and 10 p.m., Room 105 Forum.

Friday-Sunday, Feb. 15-17 — North Halls, "Slaughterhouse Five," 7:30 and 9 p.m., Room 108 Forum.

Friday-Saturday, Feb. 15-16 — USG, "Festival of Laughter," 7:30 p.m., HUB assembly room. Laurel and Hardy, Three Stooges, Bugs Bunny, Road Runner, others.

Saturday, Feb. 16 — Free-U Children's films, "Sammy, the Way Out Gal," (Walt Disney), 12:30 and 2:30 p.m., HUB assembly room.

Sunday, Feb. 17 — O.T.I.S., "Dial M for Murder," and "Topaz," 7-11 p.m., HUB assembly room.

Wednesday, Feb. 20 — Commonsplace Theatre, "The Thief of Bagdad," 8 and 10 p.m., Room 112 Kern.

Thursday-Sunday, Feb. 21-24 — Centre Halls, "Ten Commandments," Thursday and Sunday at 7 p.m., Friday and Saturday at 7 and 11 p.m., Room 105 Forum.

Saturday, Feb. 23 — U.S.G., "The Pit and the Pendulum," 7:30 and 10 p.m., HUB assembly room.

WPSX highlights

"More Accurate Nuclear Missiles: Safety or Suicide?" is the subject on "The Advocates" Thursday, Feb. 14, at 8 p.m. on WPSX-TV, Channel 3. The debate centers around whether or not we should develop more accurate nuclear weapons which would give us the capability to wage a limited nuclear war. Advocates for the missiles say that their development could save the world from a major nuclear war. Opponents maintain that the capability of limited nuclear attack only increases the chances that someone will use it. "Parenting," a four-part informal television course with correspondence study materials for the parents of pre-school children, begins Sunday, Feb. 17, at 6:30 p.m. on WPSX-TV. Hosted by Dr. Carol Cart-

wright, associate professor of adapted curriculum instruction at Penn State, the series focuses on how parents can help further their child's physical, intellectual, and emotional development. Registration forms for the course are available by writing to Independent Study by Correspondence, 3 Shields Bldg., University Park, Pa. 16802.

"Black or White Superiority?" is the subject on "Black Journalists" Tuesday, Feb. 19, at 9 p.m. on WPSX-TV. The program features a debate between Professor William Shockley of Stanford University, who recently said that blacks are genetically inferior to whites, and Dr. Frances Welsing, a black psychiatrist from Howard University.

James Earl Jones stars in Shakespeare's "King Lear" Wednesday, Feb. 20, at 8:30 p.m. on "Theatre in America." Appearing with Jones are Douglas Watson, Rene Auberjonois, and Lee Chamberlain.

Meetings

Monday, Feb. 18 — USG Senate, 7:30-10:45 p.m., HUB assembly room.

Monday, Feb. 18 — OTIS, 6:30-8 p.m., Room 203 HUB.

Monday, Feb. 18 — College of Education Student Council, 7-8:30 p.m., Room 67 Willard.

Tuesday, Feb. 19 — A.R.H.S., 7:30-9:30 p.m., Room 203 HUB.

Tuesday, Feb. 19 — College of Business Administration Student Council, 6:30 p.m., Room 208 Business Adm. Bldg.

Wednesday, Feb. 20 — College of Science Student Council, 7 p.m., Room 116 Osmond.

Wednesday, Feb. 20 — USG Academic assembly, 7:30-9:30 p.m., Room 232 Hammond.

Wednesday, Feb. 20 — College of Earth and Mineral Sciences Student Council, 6:15 p.m., Room 244 Delke.

Wednesday, Feb. 20 — American Welding Society, 7:30 p.m., Room 232 Hammond. Robert H. Foxall, National Vice President, American Welding Society, on "Resistance Welding Applications."

Friday, Feb. 21 — Student Assistance Center, 7:30-9:30 p.m., Room 213 HUB.

HUB specials

Sunday, Feb. 17 — dinner, roast turkey w/dr. \$1.95; supper, sausage patty/pineapple slice \$3.89.

Monday, Feb. 18 — lunch, lasagne \$1.11; dinner, chicken terrazini \$1.47.

Tuesday, Feb. 19 — lunch, chipped beef w/tst. \$1.15; dinner, hot meat sandwich \$1.41.

Wednesday, Feb. 20 — lunch, grilled ham & cheese sandwich \$3.00; dinner, macaroni & cheese \$1.59.

Thursday, Feb. 21 — lunch, turkey turnover \$1.15; dinner, Italian spaghetti \$1.19.

Friday, Feb. 22 — lunch, tuna noodle casserole \$1.11; dinner, fish cakes \$1.19.

Saturday, Feb. 23 — lunch, chicken chow mein rice \$3.89; dinner, beans & beans \$1.29.

Lotte Goslar's Panomime Circus is the Artists Series feature this week in Schwab, with performances Friday evening and Saturday morning.

R. R. Murphy dies

Dr. R. Russell Murphy, professor emeritus of poultry science, died February 3; he was 74. As an undergraduate and graduate student and as a member of the faculty until his retirement in 1966, he was associated with Penn State for 40 years. He earned an M.S. degree at Kansas State University but returned to Penn State to complete work for a Ph.D. in agricultural biochemistry. During World War II, he was a major in the U.S. Army, serving as a nutrition officer from 1943 to 1946. His principal research interest was in nutrition and poultry management.

Engineers to hear Dixy Ray, Goddard

Dixy Lee Ray

Dr. Dixy Lee Ray, chairman of the Atomic Energy Commission, and Dr. Maurice K. Goddard, secretary of Pennsylvania's Department of Environmental Resources, will be the featured speakers during National Engineers Week at the University.

Dr. Ray, the first woman to hold the Commission chairmanship, will discuss nuclear reactors and reactor safety as the University's ninth annual Honorary Engineering Lecturer Tuesday, Feb. 26, at 4 p.m. in Schwab Auditorium. Her talk, although geared primarily to engineering seniors, will be open to the public. It is titled "Nuclear Safety and Public Understanding."

Dr. Goddard is scheduled to address the Engineers' Winter Banquet, Saturday, Feb. 23, at the Nittany Lion Inn. The former director of Penn State's School of Forestry, he will talk on "The Three E's—Environment, Energy and Engineering."

Dr. N. J. Palladino, dean of the College of Engineering, will serve as master of ceremonies at the banquet, which will be attended by engineers from Central Pennsylvania.

Library Notes

The New York Times Book Review Index, 1986-1976, located in the Undergraduate Library Periodical Section, contains virtually everything printed in the Book Review except advertisements and queries to the editor. Entries for reviews contain the title of the book reviewed, the author, and the reviewer's name. Entries for other items contain a brief summary of the item itself. The index is divided into author, title, byline, subject, and category indexes, and a description of their use appears in the introduction to each of the five volumes. Annual supplements are compiled, and they will be compiled every ten years and offered as supplements to the five-volume index.

An Oploscope Better Vision Lens System Mark V has been acquired by the Special Collections Department. Although primarily for use as an aid in reading manuscripts, it is available in the Labor Archives to faculty members and the visually handicapped for reading books and magazines. For use, contact Lee Stout, 865-1793.

Current exhibits

Museum of Art — Charles Sheeler: The Works on Paper, Gallery A. Prints and Drawings from Central Pennsylvania Collectors, Gallery C. Selections from the Permanent Collection, Gallery B.

Zoller Gallery — Arnold Bittelman, drawings. Dolores Bittelman, paintings.

Kern Gallery — Paul Harcharik, prints. Jack Schaub, watercolors. Linda Stredebeck, abstract oils, opening Feb. 24.

Jewelry by John C. Mason, until Feb. 28. Stained glass sculpture by John Runner, until Feb. 28.

Chambers Gallery — An exhibit of art by graduate students in art education.

Pattee Lobby — Jean Furey, prints. West Pattee Lobby. Peter Kaufman, paintings. East Pattee Lobby. Postage Stamps from New Zealand, Main Entrance Lobby.

Computer program

For the first time, an introductory programming workshop teaching the PL/1 computer language will be held the week of March 4, at the same time as the regularly conducted FORTRAN IV workshop.

Basic computer concepts and techniques of programming will be studied at both workshops, which are open to all faculty, staff, and graduate students with no previous computer experience. Lectures will be given each morning and afternoon. Monday, March 4, through Friday, March 8, FORTRAN sessions will be held in Room 112, Buckhout. And PL/1 sessions in Room 213, Buckhout. Both morning classes will start at 9 a.m. and afternoon at 1:30 p.m. Sample programs will be studied, and practice programs will be assigned throughout the week. To gain the maximum benefit, participants should plan to devote the entire week to their workshop.

Registrants will be accepted immediately by Linda Yarnell, Room 229, Computer Bldg. A charge of \$3 for course materials is made for each registrant. Computer charges will be borne by the Computer Center, and participants can use the computer for practical purposes free of charge during Spring Term.

Artists Series

Pantomime takes many forms and delights both adults and children. It's done well. That explains why the Artists Series has scheduled two performances of "Lotte Goslar's Pantomime Circus," with a show Friday, Feb. 15, at 8:30 p.m., and a children's show Saturday, Feb. 16, at 10:30 a.m. in Schwab Auditorium.

Tickets for both performances have been on sale this week in the HUB and some tickets may remain.

Through poses, expressions, dances, leaps and many other techniques of mime, Lotte and her troupe weave humor, pathos, and whatever emotions she can get from the audience into little vignettes or stories.

The Arts: exhibits and music recital

Watercolors by Jack Schaub, a Lancaster County artist, went on display in Kern Graduate Commons recently and will remain until March 1. Schaub is currently with the York County Juvenile Probation staff, but his interest in painting began when he was a youngster, accompanying his father on painting trips through Lancaster County countryside. He had his first one-man watercolor show in 1967 and since then has had many one-man exhibitions in Pennsylvania and Virginia. His paintings are for sale.

When the Penn State Brass Chamber holds its concert Friday, Feb. 22, tour guest musicians will also play, including Dr. Warren George, head of the music education department; Christine Ode, instructor of music; Karl Kerpel, graduate student in computer science; and Stephen Smith, assistant professor of music.

Agriculture aids

College of Agriculture faculty and staff will act as technical "backstops" for Peace Corps volunteers serving in a new program on the island of Jamaica.

FARM — Future Agriculture Resources Manpower — is a Peace Corps activity designed to step up efforts to meet the need for persons trained in agriculture. It is said that about one third of all the requests made to the Peace Corps in the 47 countries served are for people to serve in various agricultural capacities.

Dr. Robert E. Swope, assistant dean for resident education in the College, will serve as program coordinator for the Jamaica project and plans to present illustrated talks to agricultural clubs or interested groups of students concerning the FARM activity.

Students in a variety of majors — agricultural education, engineering, extension, animal husbandry, horticulture, plant pathology — will be sought as Peace Corps volunteers not only for Jamaica but for other countries as well.

African film

"Mandabi," a color, feature-length film by one of Africa's leading writers and cinematographers, Ousmane Sembene, will be shown today (Thursday, Feb. 14) at 7:30 p.m. in the Black Cultural Center, under the sponsorship of the Center and the French Department. The sub-titled film, which is open to the public, has won a number of prizes, including the International Critics' Prize at the 1968 Venice Biennale.

In writing

The latest writing of Dr. Joseph Jay Rubin, professor of American literature, "The Historic Whitman," has been published by the University Press. It is a biography that took years of research, to trace the forces that shaped Walt Whitman from his long island boyhood to the publication in 1855 of the first edition of "Leaves of Grass." One of the highlights of the book is the series of eleven "Letters from a Travelling Bachelor," which Dr. Rubin discovered in the course of his research through the newspapers and journals of the early Whitman era. The letters were written in 1849 when Whitman was a political outcast, and he had left Brooklyn to seek sanctuary in the countryside, sending his impressions back to the Sunday "Dispatch" in New York. In sum, Whitman came out a "greater man" than Dr. Rubin had envisioned before he began his research. The book was preceded by an earlier study by Dr. Rubin, which was titled "Walt Whitman of the New York Aurora."

Lecture series honors Althouse

A memorial to the late Dr. Paul M. Althouse, University Provost at the time of his death in 1972, has been established in the form of an annual Althouse lecture at Hershey Medical Center.

The endowed lecture series has been made possible through contributions made to the Althouse Memorial Fund and by a recent matching gift from the Althouse family. Other Althouse memorial contributions will be added to the fund to further endow the series.

"This is an especially appropriate way to honor the memory of Paul Althouse," Dr. Russell E. Larson, current provost, said. "Those who worked with him over many years were keenly aware of his interest in medicine. Although a layman in the field,

Dr. Edwin L. Herr, professor and head, department of counseling education, and acting dean for graduate studies at the College of Education, is the editor, and one of the authors of "Vocational Guidance and Human Development," published by Houghton Mifflin. The 596-page volume commemorates the Sixtieth Anniversary of the National Vocational Guidance Association and is Dr. Herr's sixth book.

Comprised of 22 chapters written by Dr. Herr and 21 other theorists and researchers, the book addresses such topics as characteristics of the human environment and implications for individual choice; modeling in career development theory; professional techniques of vocational guidance including computer applications; vocational career planning, assessment; vocational guidance of girls and women; disadvantaged, minority and handicapped populations; American vocational guidance techniques in world wide perspective; and emerging trends in manpower development, planning for work, and vocational guidance as viewed from an international perspective.

his knowledge of medicine and medical affairs was extensive, springing in part from a serious interest in biochemistry but also from a scientist's interest in the marvelous complexity of the human body."

The annual Althouse lecturer will be selected by a committee of Hershey and University Park faculty members to be appointed by Dr. Harry Prysowsky, dean of the College of Medicine and provost of the Medical Center.

In recognition of Dr. Althouse's service to the University, the Board of Trustees on September 22, 1972, named the new biochemistry building on the University Park campus in his honor. It was dedicated on November 6, 1972.

The Choral, which is directed by James Benshoof, instructor of music, will include a new work, "Toccata for Brass and Percussion," by a candidate for the M.F.A. in composition, Stephen Stone. The program is to be given in the Music Building recital hall, beginning at 8:30 p.m.

Karen Cain, instructor of voice, and Robert Treby, associate professor of music, will sing selected works from a variety of opera and operetta works in their program Monday, Feb. 18. Mozart operas such as "The Marriage of Figaro" and "The Magic Flute" will be represented as will George Gershwin's "Porgy and Bess." Resnick's "The Barber of Seville" and Verdi's "La Traviata" and other operas are also on the program. Philip Coetzer, assistant professor of music, will accompany the singers. The program is at 8:30 p.m. in the Music Building recital hall.

Student evaluation proposal also discussed

Senate approves repeat rule changes

The University Faculty Senate has approved changes in the course repeat rule for students.

Rule M-3-b, which has been the object of discussion since it was implemented in Spring Term, 1973, was altered at the Feb. 5 Senate meeting to permit students to repeat only courses in which they received an "F" grade. If the student receives a grade of "C" or better in the repeated course, only the last grade will be used to calculate his grade-point average. All grades earned, however, remain on the student's permanent academic record.

The revised rule, which is expected to be in effect by Spring Term, sets a limit of four petitions a student may make for repeating courses. If a student fails the same course more than four times, it also provides that only one "F" will be included from grade-point average calculations.

The Senate also approved a change in the rule involving grade-point average to bring it into line with the revised M-3-b. Also approved were recommendations from the Credit Acquisition Subcommittee aimed at standardizing ways students may receive advanced placement or earn credits other than in resident education.

The recommendations, dealing with various programs ranging from military service school and correspondence courses to the College Level Entrance Examination, are designed to provide standardization with emphasis on standards.

The Senate also discussed a proposal for student evaluation of instruction.

Dr. William L. Harkness, chairman of the

subcommittee which developed the proposal, said it is diagnostic in nature and emphasizes the development of courses and teaching.

Action on the plan, which involves use of a University-wide questionnaire, is expected at the March 5 Senate meeting. In other business, the Senate heard report from Dr. Donald C. Rung, chairman of the Subcommittee on Fringe Benefits on Senate Bill 472.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1331 (Network Line 475-1387). Applications for these vacancies will be accepted until:

5 P.M., THURSDAY, FEB. 21, 1974
PRODUCER — DIRECTOR, GENERAL EDUCATION CONTINUING EDUCATION University Park

Responsibilities for the planning and coordination of all phases of production projects in the area of General Education. Bachelor's degree or equivalent with one to two years of effective experience in general education or information broadcasting. Candidates must be capable of film production in addition to television.

UNOERGAUO STUDIES ADVISOR/CONSULTANT
Faculty Center

Responsible for the conduct of programs in the field of Undergraduate Studies. Ph.D. or O.E.D. in counseling psychology, counselor education or related training, or Master's degree plus two to three years of relevant academic experience.

Have experience in developing sites with restraints

Architects selected for Faculty Club

A Penn State Faculty Club is about to move from dream to drawing board with the selection of the Philadelphia firm of Venturi and Rauch as architects for its building.

Because it will be built from private rather than State funds, the Club was able to choose its own architect, according to Louis Insera, associate professor of architecture who headed the selection committee.

Five architects with international reputations were considered as finalists by the committee (which also included Dean Walter H. Walters and Dr. James Tammen), and several of them came to campus to examine the site at first hand and talk with Faculty Club officers.

Several criteria dictated the decision to hire Venturi and Rauch, Insera says.

"The firm has a reputation for design innovation and excellence and previously demonstrated competence in developing sites with severe restraints," he continues. "They won a national competition to de-

sign an addition to a mathematics building at Yale; a Virginia Polytechnic Institute committee selected them to add on to an older library building there; and they are now designing an art museum addition at Oberlin.

"The problem in all these projects is that of accommodating modern additions to buildings of earlier historical styles, a problem facing Penn State's Faculty Club which will be built either as an addition to or in the general area of the Nittany Lion Inn."

Beyond this experience in sympathetically adding new construction to existing structures, Insera reports, Venturi and Rauch are familiar with the needs of university clients and building types. Venturi has taught at Yale and Penn, and the firm is currently doing two buildings for SUNY at Purchase.

Venturi and Rauch also have a good record for technical performance and cost control, both very important factors in the present inflationary crisis, Insera says. "And finally, this is a small, young firm

whose principals are actively involved in all phases of the work."

Although considered a small building project, the site of the Faculty Club challenged the architects who saw it.

"Historically in this country," Insera explains, "we have preferred to tear down rather than add on to existing structures. How to save older buildings and make them usable today is an architectural problem which has been handled very sensitively in Europe and one which is beginning to intrigue good American architects. All of the architects who visited the campus were interested by the problem."

Where does the Faculty Club building program stand now?

Insera notes that University President John W. Oswald has given valuable support both to the concept of a faculty club and in helping expedite planning which must be approved by the Board of Trustees.

"At this point in time," Insera continues, "we have a square foot figure and

News in brief

CAPITOL SHOW

Art works of Oliver LaGrone, special assistant to the vice president for undergraduate studies, are on display this week at Capitol Campus, where he was formerly lecturer-artist. Among the works on display is his sculpture of Harriet Tubman, who through the underground railroad in the first half of the 19th century led some 300 slaves from the south to freedom. LaGrone is visiting the Behrend College this week for lectures and informal sessions.

FACT CARDS

A new supply of updated "Penn State Fact Cards" has been received, and departments or faculty members may obtain supplies of these useful information cards by calling 855-5701 or writing to D. R. Schuckers, Room 304 Old Main. The wallet-size cards include historical and current information about the University in a concise but detailed way for distribution to the general public.

(Continued on page two)

Accountants now trained to deal with human behavior impact

People who think of accountants as number pushers — albeit highly valuable ones with April 15 approaching — have no conception of how broad gauged the profession is today.

"If you pursue accounting only as applied economics, you're dealing with a very shallow field," says Dr. William L. Ferrara, professor of accounting. "There's a lot more to it than gathering the kinds of data necessary to implement pricing and output decisions or cost-benefit analyses."

"Man has many goals, and to get him to

help you attain organizational objectives takes more than just facts. You can give an employee or manager theoretically perfect data and still not get the desired results. So a new aspect is added: applied psychology which becomes inseparable from applied economics."

Dr. Ferrara explains how this might work by using as an example a company with two grades (firsts and seconds) of manufactured products, each with the same production costs.

"The company's salesmen may push

firsts," he says, "because they bring the highest commissions based on profit contribution. So that's where a common procedure comes into play: adjust the cost of each grade of product more closely to its market price. By keeping profitability the same, the incentive the salesmen had to push the higher priced goods is removed."

"Of course, I'm not saying that all accountants have to be super psychologists. Typically, the training of an accountant involves a great deal of economics, but in recent years, we have also begun to train students to recognize and deal with the impact of human behavior. It makes accounting a much more exciting field."

Certainly, Dr. Ferrara has never found accounting dull. He has so combined his activities in research, teaching, and professional societies that he finds it hard to distinguish among them.

"People bring me real life problems," he notes, "and in the process of resolving them, I enlarge my own understanding of theory and contribute to the education of my students. I'll walk into my advanced classes with an unsolved problem, give them the facts leading up to it, and see what they can come up with. It's amazing what they'll do."

"The same holds true with the groups of practitioners I meet at the management seminars Penn State sponsors. I like to build up to the two or three real problems of the day in my field and just drop them on these men. It's been a very successful teaching technique."

"At the same time, one of my recent papers on leasing decisions, a particular research interest of mine, benefited from bouncing my ideas off practitioners who were dealing with the same issue in their own companies."

Although Dr. Ferrara finds accounting a highly rewarding field, his entry into the profession was accidental.

"I was finishing high school in Chicago with no idea of what I wanted to do," he recalls, "when a classmate casually said he'd heard Certified Public Accountants did well financially and the work was enjoyable. I didn't even know what a CPA was (although five years later I became one myself). At about the same time, a cousin of mine enrolled at DePaul, and I thought, 'What the heck, I might as well go, too.' After I got there, I found I enjoyed college so much, I decided to become a professional student."

From DePaul, he went to Michigan State

Calendar comments sought

A Presidential Commission, with membership drawn from administrators, faculty, and students, and representing a range of campuses, is studying the University Calendar. The Commission is reviewing not only the length of time from registration to final grades ("terms," "semesters," "trimesters," etc.), but also length of contact periods ("classes"), frequency of meetings, relationship to holiday times, use of the summer, etc.

The Commission would like to invite comments at this time from faculty members, students and staff who feel they have solutions for problems in Penn State's current calendar pattern. Also, in a large university such as this, there are undoubtedly some learning experiences that would benefit from unique and innovative scheduling patterns. The Commission is interested in exploring the possibility of maximum individual flexibility which can be implemented without serious hardship on any segment of the University.

Therefore the Commission is looking for thoughtful, detailed comments about problems, with constructive criticisms and alternative solutions. Comments should be sent to the Calendar Commission at 405 Old Main. Preferably, communications should be signed so the correspondent may be contacted for additional information, if necessary.

Philip Allison Shelley dies

Dr. Philip Allison Shelley, who retired last July 1 as professor emeritus of German and comparative literature, died February 14; he was 66.

In 1971, Dr. Shelley gave the University Libraries his collection of Anglica Americana Germanica, containing nearly 10,000 volumes comprising British and American translations of German works, as well as hundreds of records of German art songs, pictorial art and manuscripts and autograph letters of American, English and German authors. He became curator of the Allison-Shelley Collection in the Libraries and, in recognition of his contributions, he was named a member of the Presidential Associates of the University.

A 1929 graduate of Penn State, he obtained an M.A. degree in comparative literature at Harvard University in 1930 and a Ph.D. in Germanic philology in 1933. Then, with the aid of an Ottendorfer Memorial

Fellowship, he studied at the German universities in Berlin and Göttingen in 1933 and 1934. He became a member of the Penn State faculty in 1939, headed the German department from 1942 to 1946, was chairman of the Comparative Literature Program from 1952 to 1970, director of the General Education Program in Humanities and Social Sciences 1964-71, and curator of the Allison-Shelley Collection for the past three years. He was active in the University Senate for 20 years, serving for ten years as chairman of the Courses of Study Committee.

The author of many scholarly articles and reviews, he was co-author "An Outline-History of German Literature" which has been revised and reprinted a number of times and was senior editor of three volumes of "Anglo-American and American-German Crosscurrents."

Memorial gifts may be made to the University for The Allison-Shelley Collection.

A student-faculty group

Black Studies committee formed

A student-faculty Black Studies Committee has been appointed as part of a continuing effort to recognize and strengthen the University's Black Studies Program.

The new program is a consolidation of the present African Studies Option and new Black Studies offerings under an inter-college administration in the Office of the Vice President for Undergraduate Studies.

Dr. Robert E. Durham, vice president for undergraduate studies, said the committee, chaired by Dr. Cyril Griffitts, assistant professor of history, will serve as the academic program committee for Black Studies in co-operation with the program director and teaching faculty.

Committee members, besides Dr. Griffitts,

are Roy L. Austin, assistant professor of sociology; Dr. Leland L. Beik, professor of marketing, vice chairman; Lancelot Braithwaite, assistant professor of English; Elizabeth G. Ellis, associate librarian, and chief, Undergraduate Libraries; Dr. Edward R. Fagan, professor of education; Dr. Grant N. Farr, professor and head of the department of economics; Oliver LaGrone, special assistant to the vice president for undergraduates; Dr. Charlotte W. Mangold, associate professor of German at the O'gonz Campus; Dr. Warren T. Morrill, professor and head of the department of anthropology.

Student members of the committee are Lee A. Colfer and Alfred D. Harrell, both of Philadelphia.

venworth, Kans. A freshman computer science-mathematics major, Miss Rutledge is America's reigning Junior Miss. Miss McLernan is a freshman enrolled in liberal arts. Both are members of the NROTC Rifle and Pistol Team and Basic Drill Team.

BERKS VISITORS

Seventh grade students of a junior high school in the Reading area visited the Berks Campus recently as part of the "Community Languages Learning Experience" program, a unique approach to improve reading abilities of seventh and eighth grade students. The junior high school's teachers participating in the program were trained through the Berks Continuing Education office. The Reading School District and the Model Cities Agency are cooperating in the program, which uses the city itself as a classroom; a previous trip was taken to a bank. Dr. Deno Thevas, professor of education and psychology at University Park, directed evaluation of the program last year, and Kutztown State College faculty members are doing the evaluation this year.

SOLAR ENERGY HOUSE

As a feature of the Berks Campus activities for "National Engineers' Week," the Pennsylvania Power and Light Co. is demonstrating the operation of a solar energy home today (Feb. 21). The company began construction of the home last October in the Lehigh Valley; designed for mass marketing and valued in the \$30-\$35, 000 range, the house has supplemental energy sources available. Supervisor of research and technical services for PP and L is a 1961 Penn State graduate, Robert Romancheck, who also taught in Penn State's evening school in Scranton and Allentown from 1962 to 1969.

(Continued from page one)

STUDENTS SELECTED

Roger J. Adams and R. Clark Maines, both candidates for the Ph.D. degree in art history, have been selected by the Southeastern Institute of Medieval and Renaissance Studies to participate in six-week seminars this summer. Adams, who will get his degree at commencement Mar. 9, was named a Fellow in the "Medieval Virtues and Virtues" seminar and Maines will be an alternate Fellow in the "Sacred and Secular Attributes" sessions. The Institute, funded in part by the National Endowment for the Humanities, makes available resources of Duke University and the University of North Carolina to scholars and teachers in art history for the advancement of scholarship and teaching improvement.

SAFETY MEASURES

Additional measures were taken last week to improve the security of the campus in light of recent problems. The steps announced were improved lighting, establishment of a rumor control center, operation of campus bus loops at night with student security personnel aboard, increasing day and night security patrols. Other changes are being discussed with student leaders.

MUSEUM TOURS

Beginning today (Thursday), the Museum of Art will conduct tours of current exhibits each Thursday at 1:30 p.m. Interested persons should assemble in the lobby of the Museum. Volunteer docents will lead the tours.

LADY MARINES

The Marine Corps has accepted applications for the first female Marine Option students at Penn State's Navy ROTC Unit. Accepted were Patricia McLernan of Quantico, Va., and Linda S. Rutledge, Fort Lea-

Library course added to schedule

A new Library Science course will be offered beginning with the Spring Term devoted to "Alternative/Fugitive Information Sources" and will be in the charge of Miriam D. Pierce, senior assistant librarian.

Lt. Col. 498 has been designed to explore in depth the information sources not readily available through the catalog. Spec-

ial attention will be given to the individual student; the course has a maximum enrollment limit of 15. Librarians working with Mrs. Pierce are Bruce Bonta, Nancy Cline, Ruby Miller, June Morrison and Charles Mann.

For more information, Mrs. Pierce can be reached at 865-7951; W211 West Palace.

Others yet to be announced

More research, study leaves

Dr. Carroll C. Arnold, professor of speech communication, June-November, 1974, to undertake a philosophical analysis of the act of listening to rhetorical speech and to write.

Dr. Elton Awtaler, professor of political science, September, 1974-February, 1975, to work on a book dealing with the economic, social, and decolonization programs of the United Nations.

In writing

A new look at the American journalistic tradition of muckraking appears in a book by John M. Harrison, professor of journalism and American studies, and Harry H. Stein, visiting scholar at Penn's Annenberg School of Communications. "Muckraking, Past, Present, and Future," published by the University Press, contends that muckraking is an enduring phenomenon, not a movement limited to the early-century Progressive Era. The authors say that consumers or advocates like Ralph Nader and writers like Jack Anderson are today's muckrakers, and that publication of the Pentagon Papers and the development of the Watergate story are examples of muckraking journalism in the 1970's. The book features chapters by other authors, pointing out muckraking's role in the Twentieth Century. Chapter topics range from "Muckraking and Middle America" to "Some Reflections on Muckraking in the Contemporary Best-Seller."

"Exercises in Sociology" by Dr. Joseph E. Faulkner, associate professor of sociology, and Dr. Rex H. Warland, associate professor of rural sociology, have been published by Charles Merrill. In a new approach, the students themselves supply the data used in the exercises by means of a questionnaire completed at the first class session. Interest of students in the study of sociology is thus heightened, the authors believe, since they are analyzing their own collective response to the important questions facing society. The 17 exercises deal with such problems as the effects of class position upon voting behavior, the new roles of men and women in society, and anticipated family sizes as a function of religious identification.

ACCOUNTANTS —

(Continued from page one)

in 1954, emerging five years later with a master's and doctorate in accounting and a wife, the former Carol Ann Williams. He taught for three years at Illinois before coming to Penn State in 1962. The Ferraras are the parents of seven children, ranging in age from eight to 18, and Dr. Ferrara notes that after "normal" working hours, it's pretty hard to get him to come back to school evenings, since he likes to spend time with his family.

Despite this restriction, he manages to maintain a heavy schedule of professional commitments. He has been particularly active in three societies, the American Institute of Certified Public Accountants, the American Accounting Association, and the National Association of Accountants.

From 1967 through 1971, he was one of nine members comprising AICPA's Board of Examiners, a group responsible for preparing the two-and-one-half day exam all CPAs must pass.

"Accounting is one of the few professions which really has uniform national standards for its practitioners, and being on the Board was a great responsibility," Dr. Ferrara says. "Thousands of people take the exam each year, and you're always conscious of how much you may be affecting their lives."

For AAA, Dr. Ferrara chaired the Advisory Committee to the Director of Education from 1971 to 1973. Prior to that, he headed the CPA Examination Committee and was a member of the Doctoral Consortium Committee.

He has held a variety of posts in NAA, including service as National Vice President, as a member of the National Board of Directors and on the National Research Committee. He was chairman of the National Education Committee and a member of the National Executive Committee.

Dr. Janice A. Egeland, associate professor of behavioral science, Hershey, Pa., January-June, 1974, to serve as visiting associate professor in the department of psychiatry, University of Miami School of Medicine.

Robert H. Farson, associate professor of journalism, December, 1974-May, 1975, to study mass media performance in England, particularly public affairs reporting and interpretive journalism on the new British commercial radio stations.

Dr. Robert E. Ginsberg, associate professor of philosophy, Delaware County, July, 1974-June, 1975, to write a philosophical study of the place of ethical values in the conduct of democratic government.

Dr. David S. Palermo, professor of psychology, December, 1974-May, 1975, to the University of Sydney, Australia, to pull together research on the relations among the developing and developed cognitive capacities of child and adult for a book on "The Psychology of Language."

Dr. Il Chul Park, assistant professor of philosophy at the Beaver Campus, Sept. 15 to March 15, 1975, to do post-doctoral study at either Cologne University or Free University of West Berlin in a study of a constructive technique of sociology.

William S. Pierce, chief of facilities planning and associate librarian, July-December, 1975, to prepare a book on the planning and furnishing of library interiors.

Walter L. Royall, associate professor of English at Wilkes-Barre Campus, Fall Term 1974, to prepare the plays of John Bunyan for possible presentation on campuses during the nation's Bicentennial Year, and during the Spring Term, 1975, to explore the possibility of producing a musical comedy from "Magee," by John Cassavetes.

Dr. Lita L. Schwartz, associate professor of educational psychology at the O'gonz Campus, Sept. 1 to Nov. 30, to visit teacher training and special education facilities in Israel and speak at a teacher training college, during October, and to work on a part-time basis at the pre-school intervention project at the Franklin Institute, Philadelphia, during the remainder of her leave.

However, he has now asked to be excused from all other NAA duties in order to concentrate for the next three years on his chairmanship of the NAA Advisory Committee concerned with a study of "Business Decision Models."

"I think this study has a tremendous potential," Dr. Ferrara says. "There will be two different groups of researchers, one studying normative theory and the other practice in managerial decision-making, and their conclusions will be combined in a final report which would have a great impact on the field."

As an educator, Dr. Ferrara's own impact has been profound. He was one of 15 persons chosen to participate in the Pike Waterhouse Foundation project which developed a comprehensive outline for new introductory courses in accounting. Two courses resulted from the group's work, one of which had a trial run, and the results were published in a book, "A New Introduction to Accounting."

He is now involved in a second Pike Waterhouse project, a major effort to enhance the level of accounting education, particularly the curriculum for advanced courses in financial and managerial accounting.

He is the co-author of a book, "Management Accounting for Profit Control," which has written a number of papers, three of which were designated as Merit Award Manuscripts by the NAA.

At the same time, Dr. Ferrara has accepted the job of serving on a task force for external affairs in the College of Business Administration to develop new programs and. And he manages to keep his squash or paddleball a few times a week "in shape."

Obviously he has something to contribute outside his field too — In the area of efficiently budgeting one's time.

February 21-March 3, 1974

Special Events

Thursday, Feb. 21 — Tour of Museum of Art, assemble in lobby of Museum at 1:30 p.m.
Thursday-Saturday, Feb. 21-23 — University Theatre, "Blessed Event," 8 p.m., Pavilion Theatre.
Thursday, Feb. 21 — Faculty Women's Club luncheon lecture, 12:30-3 p.m., Room 101 Kern. Mrs. Theima A. Baker and Dr. Paul H. Baker, anthropology, on "Human Adaptability to the Environment."
Thursday, Feb. 21 — Film, "Malcolm X Speaks," 7:30 p.m., Black Cultural Center.
Friday, Feb. 22 — Hetzel Union Board, ple sitting concert for Washington's birthday, 8-9 p.m., Cardroom, HUB.

Friday, Feb. 22 — Penn State Brass Choral, 8:30 p.m., Music Bldg. Recital hall.
Friday, Feb. 22 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.
Friday, Feb. 22 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Friday, Feb. 22 — HOPS lecture by Troy D. Perry, Universal Fellowship of Metropolitan Community Church and National Gay Liberation Leader, 8 p.m., Room 64 Willard.
Saturday, Feb. 23 — Sports: Wrestling vs. Pittsburgh, 4 p.m.; Men's Swimming vs. Pittsburgh, 2 p.m.; Men's Basketball vs. So. Connecticut, 8 p.m.; Women's Basketball vs. Indiana U. of Pa., 1 p.m.; Women's swimming vs. East Stroudsburg, Clarion State, Slippery Rock, 5:30 p.m.

Sunday, Feb. 24 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Sunday, Feb. 24 — Chapel Service, 11 a.m., Eisenhower Chapel. Jon P. Gurneman, religious studies.
Monday, Feb. 25 — Veterans Affairs Office, film on job opportunities for veterans, 3-5 p.m., HUB assembly room.
Monday, Feb. 25 — Nancy Hadden, Baroque music recital, 8:30 p.m., Music Bldg. recital hall.
Tuesday, Feb. 26 — Sports: Men's Basketball vs. Ohio University, 8 p.m., Rec Hall.
Wednesday, Feb. 27 — Debra Fatula, voice recital, 8:30 p.m., Music Bldg. recital hall.
Saturday, March 2 — Sports: Men's Basketball vs. Rutgers, 8 p.m., Rec Hall.

Lectures

Monday, Feb. 25 — Inter-Science Series, Dr. Hans W. J. Margardt, Memorial Sloan-Kettering Cancer Center, on "Mechanism of Hydrocortisone — Induced Malignant Transformation in Tissue Culture," 4 p.m., Room 130 Whitmore.
Tuesday, Feb. 26 — Dr. Dixy Lee Ray, chairman of the Atomic Energy Commission, on "Nuclear Safety and Public Understanding" during National Engineering Week, 4 p.m., Schwab.
Wednesday, Feb. 27 — Environmental and Energy Policy Series, 8 p.m., Keller Conference Center, Harry Perry, Resources for the Future, on "Determining a National Energy Policy."

Seminars

Thursday, Feb. 21 — Chemistry, 12:45 p.m., Room 310 Whitmore. Stuart P. Gram, National Bureau of Standards, on "Humano-Chemical Measurements by Gas Chromatography."
Thursday, Feb. 21 — Agronomy, 3:55 p.m., Room 301 Agrl. Adm. R. Pfeiffer and G. W. McKee on "Revegetation of Strip Mine Spoils."
Friday, Feb. 21 — Physics, 3:55 p.m., Room 117 Osmond. Leon E. Esaki, Nobel Laureate, IBM Watson Research Center, on "Recent Developments in Surface Physics."
Thursday, Feb. 21 — Anthropology, 3 p.m., Room 107 Social Science. Dr. Bennett Olyan on "The Social Behavior of Artificial Animals."

Friday, Feb. 22 — Physical Chemistry, 4 p.m., Room 310 Whitmore. Vincent Madson, Harvard Medical School, on "Special Studies of Cyclic Peptide Ion Binding Conformation."
Monday, Feb. 25 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Panel discussion, Dr. W. Merrill on "Extension from the Researcher's Point of View" and Dr. D. H. Petersen on "Research from the Extension Point of View."
Monday, Feb. 25 — Current issues in Food and Agriculture, 1 p.m., Room 202 Board. Mrs. Ligea A. Hsu, CAPES Scholar in Food Science, on "Food Supplies for Hard Times."
Monday, Feb. 25 — Genetics, 3:55 p.m., Room 111 Tyson. Dr. Guy McKee on "Release and Multiplication of Plant Varieties Developed by the Pa. Agriculture Experiment Station."

Monday, Feb. 25 — Computation Center Series on "Introduction to APL, Part 3," 7:30 p.m., Room 201A Business Administration.
Tuesday, Feb. 26 — Solid State Physics, 1 p.m., Room 101 Osmond. Peter Downey, University of Washington, on "Metastability and Hysteresis: Catastrophy in Growth of Liquid Films."
Tuesday, Feb. 26 — Two Cultures Dialogue, 12:30 p.m., Room 189 Materials Research Lab. Attorney John Gilliland and J. C. Psychalakis (business administration), on "Value Considerations in Law and Business Education."
Tuesday, Feb. 26 — Aerospace, 3:55 p.m., Room 232 Hammond. Dr. Alek Mikolajczak, Pratt and Whitney Aircraft Company, on "Current Research in Compressor Air Dynamics and Acoustics."

Tuesday, Feb. 26 — Computer Science, 4 p.m., Room 601 Altshouse. Peter Downey, Harvard University, on "Formal Languages and Recursion Schemes."
Wednesday, Feb. 27 — Analytical Chemistry, 8:30 a.m., Room 310 Whitmore. Spring Term Program Discussion (organizational meeting).
Wednesday, Feb. 27 — Biochemistry, 4 p.m., Room 101 Altshouse. D. Zolock on Oxygen Binding by Chemically Modified Hemoglobins.
Thursday, Feb. 28 — Statistics, 4 p.m., Room 75 Willard. Dr. George H. Weiss, Chis, Physical Sciences Laboratory, PHS, Bethesda, Maryland, on "A Bacterial Random Walk."

Official

Wednesday, Feb. 27 — Last day for signing Emergency Loans for the Winter Term.
Wednesday, Feb. 27 — Classes end, 9:55 p.m.
Thursday-Saturday, Feb. 28-March 2 — Final Exams.

Exhibits

Museum of Art — Charles Sheeler, The Works on Paper, Gallery A. Selections from the Permanent Collection, Gallery B. Prints and Drawings from Central Pennsylvania Collectors, Gallery C.
Zoller Gallery — Arnold Bittelman, drawings, and Dolores Bittelman, weavings.
Chambers Gallery — Multi-media exhibit of art works by 30 graduate students in art education, ending Feb. 27.
Pattee Library — Jean Furst, prints, West Pattee Lobby. Peter Kaufman, paintings, East Lobby. Postage Stamps from New Zealand, Main Entrance Lobby.
Black Cultural Center — Nina Gilbert, fifth-floor industrial education and art major exhibit of charcoal drawings, watercolors, lithograph drawings, acrylic paintings, scratchboard drawings, and photographs; continuing until Feb. 28.
Hammond Gallery — Engineers' Week exhibit, concluding Feb. 23. Gallery hours, 9 a.m. to 5 p.m.

WPXS highlights

"Medical Experiments on Prisoners: Are the Cons Being Used?" is the subject of debate on "The Advocates" Thursday, Feb. 21, at 8 p.m. on WPXS-TV, Channel 3. The debate centers around the use of prison "volunteers" in the testing of new drugs. One side says that prisoners are actually coerced into volunteering for money or to better their chances for parole. The other camp maintains that the prisoners perform a vital and necessary service to society, regardless of their motives. The hour-long debate may also be seen Saturday, Feb. 23, at 2 p.m.
"Alexander Nevsky," Russian director Sergei Eisenstein's 1938 film classic, is presented on "The Humanities Film Forum" Thursday at 9 p.m. Made just prior to Russia's involvement in World War II, the film is set in 1242 A.D. and depicts the struggle of Russian Prince Alexander Nevsky to unite Russia to combat invaders from both East and West. The film features soundtrack music by Prokofiev.

Julian Bond, Democratic member of Georgia's House of Representatives, and John Lewis, chief of the Atlanta-based Federal Education Project, discuss "Politics and Black Progress" on William F. Buckley's "Firing Line" Sunday, Feb. 24, at 2 p.m.
"The Unquiet Death of Julius and Ethel Rosenberg," a full-scale documentary re-examination of the controversial Rosenberg-Sobell atomic spy case of the early 1950s, is featured on "The PBS Special of the Week" Monday, Feb. 25, at 8 p.m. The 90-minute documentary is the most comprehensive current work on the subject in any medium. Twenty people who were directly involved in the case or whose lives were affected by it will speak publicly for the first time on the subject during the program. Included is Morton Sobell, who was sentenced as a co-conspirator with the Rosenbergs and who has since been freed for the first time on the documentary. Also appearing are the two Rosenberg sons, prosecutor Roy Cohn, two FBI agents involved in the investigation, and five members of the original jury, along with other key figures in the case.

Films

Thursday-Sunday, Feb. 21-24 — Centre Halls, "Ten Commandments," Thursday and Sunday at 7 p.m., Friday and Saturday at 7 and 11 p.m., Room 105 Forum.
Saturday, Feb. 23 — U.S.G., "The Pit and the Pendulum," 7:30 and 10 p.m., HUB assembly room.

Meetings

Thursday, Feb. 21 — Student Assistance Center, 7:30-9:30 p.m., Room 213 HUB.

Funding Opportunities

For more information, call 855-1372 except where noted below, and refer to the item by its number grants and the general information provided. People with grants information for dissemination in this column should call the same number.

FEBRUARY 21, 1974
(117-1) The Council on International Exchange of Scholars has issued a "Supplementary Announcement of Available Senior Fulbright-Hays U.S. Citizens and Scholars." Applicants must be persons and foreign nationals, have university teaching experience and foreign language competency in order to qualify for foreign appointments. To qualify for local degree or have "recognized professional standing." A list of openings is available. To request, write to the Council on International Exchange of Scholars, 2101 Conventions Ave., Washington, DC, 20018 (202)991-1647. July is the deadline for 1975-76 research applications and is also supported for research applications.
(117-2) The Ames Laboratory of the U.S. Atomic Energy Commission, located at Iowa State University, is sponsoring two summer programs. It is an opportunity for visiting faculty to learn something about the Ames Laboratory and to contribute to AEC Physical Research Division. The second program is called the Summer Student Training Program and is organized for college juniors in chemistry, metallurgy, mathematics, computer science,

physics, ceramic engineering, and chemical engineering. Students will receive \$125 per week. U.S. citizenship is required for both programs. March 1, 1974, is the application deadline date. More information is available from: Curtiss S. Reberg, Personnel Officer, Room 127 Speeding Hall, Ames Laboratory, USAEC, Ames, Iowa 50010.
(117-3) The National Institutes of Mental Health is sponsoring a Continuing Education Training Program and announces an April 1, 1974, deadline date for the receipt of preliminary proposals. The next thing date for new applications is June 1, 1974. Through its Division of Research and Training Programs, NIMH has supported continuing education projects that upgrade the skills of physicians, nurses, behavioral scientists, social workers, clergy, teachers, aides, "counselors," and others in related professional and allied roles. Top priority will be given to projects which stress the "instrumental means by which confound education programs in mental health may foster social problems." Within these priorities, objectives include: (1) "development of continuing education programs integral to mental health plans and systems for delivery of mental health services;" (2) "increased knowledge and involvement in matters of manpower development on the part of key decision makers;" (3) "development of continuing education specialists for the mental health field;" and (4) "national and regional organizational efforts for the development of continuing education in mental health."
(117-4) The Center for Population Research is interested in research grant proposals on the be-

havioral-social aspect of population, family planning, and reproductive behavior. Some suggested research ideas are: (1) economic analysis of fertility — trends, determination, regulation, model development; (2) economic factors in marriage, divorce, family formation, competition, and dissolution; (3) economic analysis of morbidity and mortality; (4) economic aspects of population distribution, regionalization, suburbanization, rural depopulation, mobility; (5) economic analysis of the antecedents and consequences of population growth and change; and (6) policy issues. Other research ideas are encouraged. The next two deadlines for research grant proposals are June 1 and Oct. 1, 1974. Details are available from M. R. Kohler, 855-1372. For other information contact: S. H. Newman, Technical Scientific Administration, Population and Reproduction Grants Branch, Center for Population Research, Nat. Inst. of Child Health and Human Development, Bethesda, Md. 20014 (201)960-5195.
(117-5) Three fiscal year 1975 Budget information releases are available: (1) The Federal Budget for Science and Technology — FY1975; including tables and graphs; (2) A Federal Budget Digest; and (3) a Statement of FY1975 Budget for the Nat. Science Foundation. For copies call M. R. Kohler, 855-1372.
(117-6) Although the NSF Guide to Programs for FY 1974 (NSF 73-75) is not yet available, copies of Section II, Research Applications have been obtained. Section III has been distributed to research deans and intercollege directors and is available. Call your Research Dean or M. R. Kohler, 855-1372.
(117-7) The Research Applications Directorate of the National Science Foundation has published Abstracts of FY 1973 RANN (Research Ap-

plied to National Needs) Awards. Five volumes are on hand, one each for the award areas of: (1) Energy Research and Technology — energy conversion, energy systems, energy resources, fuel end transportation, and solar energy; (2) Production — instrumentation technology, industrial processing, excavation and tunneling technology, municipal services and human resources and services, social data and evaluation; (3) Environmental — weather modification, regional environmental systems, environmental aspects of trace contaminants, fire research, earthquake engineering; (4) Interorganizational Science and Research Utilization — governmental science assistance, local government science assistance, research utilization activities, legislative body assistance; and (5) Exploration — Research and Problem Assessment — technology and the economy, human needs, alternative futures and institutional innovation, technology assessment, other societal problems. Each of the five volumes is available for circulation. Call M. R. Kohler, 855-1372.
REMEMBER—DEADLINE DATES
March 8 for EO Environmental Education Projects (Feb. 14 INTERCOM 116-1) . . . March 1 and June 1 for Exxon Educational RAO Program (Feb. 14 INTERCOM 116-2) . . . March 15 for NEH Education Projects Grants (Feb. 14 INTERCOM 116-3) . . . March 25 for NSF Energy Related Graduate Traineeships (Feb. 14 INTERCOM 116-4) . . . March 31 for NSF Latin American Cooperative Science Program (Feb. 14 INTERCOM 116-5) . . . April 1 for NSF Faculty Research Grants (Feb. 14 INTERCOM 116-6) . . . April 8 for NSF Decision Related Research on Technology Utilized by Local Government (Feb. 7 INTERCOM 116-7).

Barbell Club continues growth

Quoting a Penn State Barbell Club member: "After a day of being knocked out by the outside world, it's a welcome switch to take refuge in Rec Hall and spend a few hours in control of the iron."

Iron is the main ingredient of the weight lifters recipe for body development, and on any given weekday you can find a hundred or more young and middle age men moving iron vertically from one place to another, in various poses and using a variety of muscles to accomplish their goals. For the past year, a petite psychology major, Rosalyn Weller, body weight 110 pounds, has also "controlled the iron" and with considerable success.

Many, but not all, of those using the Rec Hall weight lifting equipment and facilities are members of the Club, which has grown steadily since it was organized in 1948 and, considering the state of weight lifting generally, spectacularly. Some of them are faculty and staff members. Weight lifting is not only for the young; in fact, competitively men reach their peak in the 35-40 year age range, if they follow the necessary course of development for the 20 years or so that it takes.

The Barbell Club members came by their interest in weight lifting in a variety of ways and for a variety of reasons. Some experienced their first taste of lifting in physical education classes or sports lecture classes; others were curious enough to go with a friend "to see what it was all about."

"But seldom," says Lee Stover, president of the Club and a graduate student majoring in solid state science, "do you find someone who had weight lifting experience in high school. That's one of the areas we're working on now, by going out to the schools and demonstrating and talking about weight lifting. And already one school in the area has put in a program as the result of our visit."

Weight lifters look on their activity as a means of body development, and if Stover were indicative of all those who take the sport seriously, no one could deny its potential. In four years, Lee has increased his body weight by 70 pounds, seemingly all muscle, and now has a goal of another 15 pounds so he can lift his true "super-heavyweight" (over 242 pounds). Stover is not the largest in the Club but he is certainly one of the strongest.

At the other extreme is Rosalyn, the

Club's first woman powerlifter, who in a relatively short time has made significant gains in her lifting capacity. Last November, she competed in a novice 122-lb. class at a contest in Norristown, Pa., and won second place in a bench press deadlift competition, giving away quite a bit of weight advantage to others in her class.

In addition to working out regularly, Rosalyn conducts a weightlifting class for women as part of the Free-U program. She is now secretary of the Club and fully intends to continue her interest, which started "out of curiosity" and without any prior training. In fact, she reports, her family was not particularly athletic.

"She didn't have any fear about getting too muscular looking," Lee points out, "because if she follows the proper program, she won't have those bulges that the Mr. America types show, but instead will have a well conditioned and feminine body."

About 15 of the Club members take part in competition, inevitably off-campus; the rest compete against themselves, in a manner of speaking.

"Weight training, or progressive resistance exercise, is a method of achieving greater strength by gradually conditioning the body to handle increasingly heavy weights through a specific motion," Stover explains.

"The gains aren't made overnight, but one of the psychological advantages of weight lifting is that you can see what progress you're making by the weights you are able to handle. There's a certain satisfaction in conquering new and heavier weights, and that can be enough motivation for most lifters. They don't have to have contests to get their kicks."

"But competition does stimulate some, and for them there are enough opportunities around the country to give them all the urging they need to keep on working."

There are two styles of lifting: Olympic and power lifting. Olympic lifting involves putting the weight overhead; power lifting does not. Powerlifting techniques are easier to master, but even so it takes years of work to develop into a national class power lifter.

Olympic competition lifts are the snatch — completed in one motion — and clean-and-jerk, which includes a pause at the chest level before lifting overhead.

Powerlifting involves three distinctively different techniques: bench press, squat,

Lee Stover, president of the P. S. Barbell Club, demonstrates a deadlift of 505 pounds, seemingly without strain — but only seemingly. He is a graduate student in solid state science.

Rosalyn Weller, secretary of the Club, equals 110 pounds, with ease. She says the Club members treat her kindly, offer suggestions. She also teaches a weightlifting class in Free-U.

and deadlift. The bench press is performed by lowering then raising the weight while lying on the back on a bench. The squat involves draping the weight across the back, squatting until the thighs are parallel to the floor, and returning to a standing position. Deadlifting is accomplished by raising the weight from the floor to the standing position.

In contests, the lifter competes in a weight class (seven classes in Olympic lifting and nine in powerlifting). Club members have done well in tournaments, last year winning the National Collegiate Olympic Lifting Championships, held at York, Pa. Currently there are three Master class powerlifters training with the Club, and Allan Treaster, research assistant in the Applied Research Laboratory, and Club adviser for the past eight years, was ranked in the top ten in the superheavyweight class deadlift competitors in 1971.

The Club's membership of 125 includes students from every College (oddy enough,

Ronald Hipp, an active member of the Barbell Club for four years, shows how to bench press 300 pounds, he is in the 180-lb. class in bodyweight, is interested in general bodybuilding.

Richard Burkhardt, who is chairman of the City Olympic Lifting Committee, demonstrates the "snatch and jerk" lift with 235 pounds of iron. He is in the 180-pound weight class.

few from Health, Physical Education and Recreation) and such diverse majors as Biochemistry, English, Pre-Med, Civil Engineering, Environmental Resource Management. Varsity athletes and other non-members use the facilities, which are open to anyone in the University community.

The Club was developed as a way of bringing together those with a common interest, one which could be very lonely some. As in most sports, there are certain plateaus in development, and it helps to go over those periods of seeming stagnation; another Club member is around to lend encouragement and advice. Without special coaches, weightlifters are accustomed to "teaching" each other, knowing full well that it is pretty much up to the individual to progress in his own way. (Sometimes, a lifter develops a bad habit which only another lifter can detect.)

That, in a way, may be the key to the satisfaction weightlifters get out of the sport — that they got where they are most completely on their own.

Beaver consortium aids county's educational service

The Beaver Campus recently participated in the Second Annual Joint Seminar of the Faculties, a consortium sponsored by the Beaver County Council of Higher Learning. The Council is comprised of the faculties and staff of the Community College of Beaver County, Geneva College, and the Beaver Campus.

This year's seminar, held on the Community College Campus, was highlighted by the evening address of a national lecturer, teacher and syndicated columnist Dr. Max Lerner, speaking on "America and Its Discontents."

Nearly 300 educators were involved in

the afternoon sessions of the seminar which featured three interface panel discussions: "The Faculty Member and His Peer Group," "The Faculty Member and the Student Body," and "The Faculty Member and the Administration."

In summarizing the panels' reports, Dr. J. P. Giusti, director of the Beaver Campus, called attention to the innovative suggestions brought to light in the panel discussions and related that the Council would continue to explore new avenues of better educational service to the County.

The Beaver County Council of Higher Learning was established in 1971 to more

fully utilize the unique contributions offered by a community college, a denominational college, and a two-year university campus. One of the initial co-operative efforts was jointly sponsored cultural events. At present the three institutions are also participating in a limited cross registration of students in low enrollment courses and in the sharing of certain facilities — such as the availability of the three libraries and their resources to each student. The very real possibility also exists for a community service program provided by the faculties' combined efforts.

With appropriate University offices, and development of a central information office as an aid to appropriate aspects of the program. Bachelor's degree or equivalent, with five to seven years effective experience in areas such as journalism, marketing, advertising, or related fields. Experience in public relations, public speaking and an appreciation for cultural arts. A thorough knowledge of University policies and procedures necessary.

ATOMIC ENERGY SPECIALIST
COLLEGE OF ENGINEERING
University Park

Responsible for presenting "This Atomic World Program" to students in assemblies and in classroom sessions and for effectively lecturing, demonstrating, and informing students and the public on the peaceful applications of nuclear power. Bachelor's degree or equivalent in Science or related areas. Some teaching experience desirable.

UNDERGRADUATE STUDIES ADVISOR
DIVISION OF UNDERGRADUATE STUDIES
University Park

Assist with the conduct of the academic advising and counseling programs and services of the Division of Undergraduate Studies. Ph.D. or M.A. or equivalent with over one year effective experience, or M.A. or equivalent with two to three years effective experience.

ARCHITECTS

(Continued from page one)

certain defined functions. We know we want dining rooms, meeting rooms, perhaps a library and other facilities in a certain amount of space. The next stage in program development, defining each space exactly. How many dining rooms do we want, for example, and how large should they be? The architect must come to understand the uniqueness of the facility and how they feel about the building they are actually going to get.

To further this understanding, a committee headed by Robert H. Gray, professor and head of the department of art, drawing up a questionnaire which will be input from Faculty Club members.

University faculty and staff interested in joining the Club can send their membership fee of \$25 to Room 109 Commons Bldg.; checks should be made payable to the Penn State Faculty Club.

CREDIT LIMIT

Commencing with Summer Term 1974, no student will be allowed to register for complete final registration in Rec Hall for more than 13 credits. A student may, however, with approval of his College Dean, elect to add courses during the ten-day add period of the term so that the total number of credits being attempted in a given term exceeds 13.

This action is being taken to assure maximum course scheduling opportunities for the maximum number of students by eliminating over-load scheduling (over 13 credits) during the registration period.

Staff vacancies

The following vacancies for positions classified as staff exempt or staff nonexempt have been filled with the University Employment Division for filling. Two announcements are made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Network Line 475-3387). Applications for these vacancies will be accepted until:

5 P.M. MARCH 7, 1974

PROGRAMMER

OFFICE OF BUDGET AND PLANNING
University Park

Participate in program design, coding and other programming tasks required to produce reports, make data computations, and maintain information files. Bachelor's degree or equivalent with training in basic computer systems and one to two years' effective experience in data processing.

SUPERVISOR, OFFICE AND ACCOUNTING

Physical Plant
University Park

Responsible for the direct supervision and coordination of a clerical staff and the overall function of the Physical Plant accounting system. Assist with and/or develop new accounting and administrative procedures to increase the efficiency and ef-

fectiveness of the accounting and support clerical functions as necessary. Associate's degree in accounting or equivalent, plus three to four years of related work experience including office supervision and the establishment and maintenance of accounting and budgeting systems and procedures.

SYSTEMS PROGRAMMER

OFFICE OF BUDGET AND PLANNING
University Park

Responsible for conducting analysis and developing decision models and preparing computer programs which will incorporate the decision models and provide useful information. Bachelor's degree or equivalent in Engineering, Business Administration, Economics, Computer Science, or Mathematics and one to two years experience in Computer Programming, Systems Application or related areas.

ASSISTANT TO THE

UNIVERSITY ARTS SERVICES
COLLEGE OF ARTS AND ARCHITECTURE
University Park

Responsible for the promotion, development, and operation of services and procedures related to promotion of the arts and cultural programs at the University, coordination of fund raising and development with foundations, corporations, organizations, associations, state and federal agencies, and private individuals in support of these offerings. Coordination of fund raising and promotional efforts

PENN STATE intercom

Volume 3, Number 24

February 28, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Proposal on CC faculty withdrawn

Dr. Russell E. Larson, Provost of the University, has notified various Commonwealth Campus and University Park committees, councils, and administrative officers that the report dated October 2, 1973, "Proposal for New Administrative Structures to Implement Provisions of the Academic Policy Plan Relating to Commonwealth Campuses" has been withdrawn, after wide and careful review.

It was noted that a large majority of responses for organizations and individuals indicated a strong preference for achieving the goals outlined in the report by

proper modifications within the present administrative structure. The major objective of the proposal was to maintain and improve the quality of lower division baccalaureate and associate degree programs and to effect proper recognition to personnel engaged in these efforts.

Dr. Larson noted that a number of suggestions were made concerning tenure and academic rank. He said that copies of these suggestions will be given to the committee which will be responsible for drafting the revised reports on these matters.

Nine faculty members, one student

Senate forms external affairs group

Nine faculty and staff members and one student have been appointed to the newly created External Affairs Committee of the University Faculty Senate.

The committee, whose establishment was approved by the Senate at its December meeting, is to maintain an interest in current events, report to the Senate on external issues which may have present or future impact on the University, and advise the Senate on proposed statements to officials outside the University.

Dr. Thomas B. King, associate dean of the College of Agriculture, is committee chairman, while Dr. Robert H. Hamilton,

professor of biology, is vice chairman.

Other committee members are Dr. Vernon V. Aspaturian, Evan Pugh Research Professor of Political Science; Dr. Robert A. Conover, associate professor of engineering at the Capitol Campus; T. Reed Ferguson, vice president for public affairs; Mervin Hostetler, assistant professor of engineering at the Altoona Campus; Dr. Nunzio J. Palladino, dean of the College of Engineering; Dr. Marvin E. Rozen, professor of economics; Francis J. Spreng, instructor in economics at the Beaver Campus; and Dion C. Stewart, graduate assistant in the College of Earth and Mineral Sciences.

Hearings planned

The Joint Senate-Administrative Select Committee on Faculty Participation in University Governance, which conducted an open hearing Feb. 21 in the Kern Graduate Building, is planning several other hearings.

Committee representatives will meet at the Berks Campus March 14 and the Shenango Valley Campus March 28. The full afternoon sessions will begin at 1:30 p.m. The Hershey Medical Center to hear from representatives of the medical center and the Capitol Campus in Middletown. A date for the session has not yet been set.

Survey approved

The University Council last week approved a final form to be used by baccalaureate degree seniors graduating in June in evaluating their course work.

In brief the survey form asks seniors to designate the two courses inside their major field of studies that had contributed the most and the least to their major program. Seniors will be asked also to designate the two courses outside their major which contributed the most and the least to their education.

Evaluation is to be in terms of content, mode of instruction, quality of instruction, and usefulness of the course.

News in brief

BOOK SALE

With thousands of books already at collection centers being readied for AAUW's April 1 Annual Book Sale, the group is still eager to acquire more hardback and paper works, including those in such specialized areas as children's books, cookbooks, and hobby and crafts books. Quality magazines such as Gourmet or Arizona Highways are also in demand. To arrange for book pick-ups, call Miss Sarah E. Croll, 237-8069. Collection points were listed in INTERCOM, Jan. 17.

NOTE — GRADES

The Records Office reminds faculty that Winter Term grade cards for degree candidates are due at 2 p.m. Tuesday, March 5.

Grade cards for all other students are due no later than 9 a.m. Wednesday, March 6. All cards are due in the appropriate dean's office.

NUCLEAR CONFERENCE

The Northeast American Nuclear Society Student Conference will be held at Penn State March 21-23, with about 40 scientific papers to be presented by students from 11 colleges and universities in the area as the main feature of the conference.

Robert H. Arnold, graduate student in nuclear engineering and president of the Penn State student section of ANS, says that the conference is intended to open intercollegiate communication at all levels of the nuclear engineering and science fields by giving students the opportunity to present papers and meet leading figures in the field.

Dr. Herbert J. C. Kouts, director of the Division of Reactor Safety and Research, Atomic Energy Commission, will be the banquet speaker Friday, March 22.

Among Penn State students presenting papers at the conference will be Paul Rose, Philip Rensen, David Tilley, Theodore Bessman, Richard Sider, James Neyman, George Imel, Michael Cenko, and Jerry Saggiocca.

CREDIT UNION

New officers were elected by Penn State Federal Credit Union members at their annual shareholders meeting recently. They include:

Board of Directors — James C. Wambold, president; Raymond R. DiMeo, vice president; Norman H. Suhr, treasurer; M. Geraldine Gage, secretary; Richard A. Keppeler, Anthony V. Williams, Bernard J. Wydra, directors.

Supervisory Committee — George E. Olson, chairman; Bruno J. Martini, secretary; John E. Olson, Henry E. Boch, Albert E. Stolte, members.

Credit Committee — William E. Toombs, chairman; Ralph H. Locklin, secretary; Frank D. Dachille, Diane S. Bernd, and Francine Deutsch, members.

CAPITOL EXHIBIT

An exhibition of ceramics and wall hangings will be displayed at the Capitol Campus until March 20, featuring the works of Karl Beamer, Bloomsburg State College, and Margrit Schmitke, a professional. Both have exhibited widely in Pennsylvania.

NEW COURSE

A course on Comparative Communism will be offered for the first time by the department of political science during Spring Term. Teaching chores will be handled by a team of three professors, including Dr. Vernon V. Aspaturian, Dr. Trond Gilbert, and Dr. Parlis H. Chang. Communist systems in the Soviet Union, Eastern Europe, and China will be compared.

FRENCH CHEMIST

Dr. J. Badoz-Lambing, of the National Science Foundation of France, will visit the University Park campus Tuesday, Mar. 11, and she will include a lecture at 1 p.m., Room 335 Whitmore, in her activities. She will speak on "Chemistry and Electrochemistry in Nonaqueous Solvent."

HUB FOOD CLOSING

All food operations in the HUB at University Park will be closed from March 3 through March 10, resuming a normal schedule with breakfast on March 11.

Rec Hall problem

The population explosion — specifically, the increasing numbers of students, faculty and staff who have become interested in physical fitness — has created a problem for Rec Hall's facilities.

And an additional burden has been put on the limited facilities by the presence of youngsters, grade school and high school age, who have been taking over basketball courts, etc., excluding those who rightly may use the gym.

So the College of Health, Physical Education and Recreation, which administers the athletic facilities at the University, is calling on parents to help in the efforts to keep children and young people not members of the University community out of Rec Hall except when specifically invited. In addition to overcrowding, there is a safety factor involved, because some children are not aware of the potential dangers in certain activities, and proper supervision is not available.

The University's Department of Safety will ask children to leave the building if they are using any of the athletic facilities.

Engineers honor five members of faculty

Volz

Samuels

Chapin

Davids

Holl

Five faculty members of the College of Engineering were honored at the annual Engineers Week banquet last Saturday.

Excellence in Teaching Awards, which included \$500 checks made possible by the College's Alumni Association, were presented to:

Dr. Carl Volz, Sr., professor of electrical engineering.

Dr. John M. Samuels, Jr., assistant professor of industrial engineering.

Jack F. Chapin, associate professor at the Berks Campus.

Other awards were given to: Dr. Norman Davids, professor of engineering mechanics, cited for outstanding achievement in research.

Dr. J. William Holl, professor of aerospace engineering, presented the Outstanding Engineer of the Year Award of the Central Pennsylvania chapter of the American Society of Mechanical Engineers.

Also honored at the banquet were Stephen J. Junper, of Carlisle, a senior majoring in aerospace engineering who received the American Institute for Aeronautics and Astronautics award, and Lance B. Wilson, a senior at DuBois Area high school, presented the Melvin W. Isenberg Student Engineer of Tomorrow Award of the Central Chapter of the Pennsylvania Society of Professional Engineers. Wilson plans to enroll in chemical engineering.

Service Award

Edward A. Sukowski, assistant professor of health and physical education, was given the University's 25-Year Service Award plaque recently by College of Health, Physical Education and Recreation Dean Robert J. Scannell, and Charles E. Medler, also assistant professor and head of the training group of which Sukowski has been a part. Sukowski joined the staff in 1948 as instructor and as head boxing coach, with duties as trainer also. In addition to teaching physical education courses, he has been trainer for many athletic teams over the years. A Penn State graduate, he also obtained an M.Ed. degree here in 1954.

Gehris, Belasco receive honors

Paul W. E. Gehris, retired professor of general engineering at the Berks Campus, has received another honor (he was given the 1974 Award of Merit by the Society of Manufacturing Engineers last month) in being named "Engineer of the Year" by the Reading chapter, Penna. Society of Professional Engineers. The announcement of the award was made at the society's dinner Feb. 13. Nominees, who must be registered professional engineers, are judged for the award on the basis of occupational, professional and technical achievements, civic and humanitarian activities, and technical and professional societal activities. He becomes eligible for

state and national society honors through his selection by the Reading group.

Dr. Simon Belasco, professor of Romance linguistics and chairman of the linguistics program, is one of 43 scholars to be awarded a grant-in-aid by the American Council of Learned Societies. He is conducting a study of Provencal dialects, the Romance languages spoken in southeast France, recording them in such centers as Arles, Nîmes and Mâillane. Mâillane is especially important as the home of Frederic Mistral, promoter of Provencal as a literary language and co-winner of the 1904 Nobel prize for literature.

Simmons award

Nominations will be accepted until March 4 for the Loretta V. T. Simmons Graduate Scholarship to be awarded to an outstanding woman student in the Graduate School. The local chapter of A.A.U.W. sponsors the award.

The nominations are to be sent to Dr. B. F. Howell, Jr., Room 317 Graduate Building, along with a copy of the nominee's graduate transcript, copies of all previous transcripts, an evaluation of her work as a graduate student, financial need evaluation, two or more letters of recommendation, including one from her thesis advisor, GRE scores, and other supporting data.

The award is based on past scholarly accomplishments and the promise of future achievement.

Funding Opportunities

For more information, call 865-1372 except where noted below, and refer to the item by its number and the general information provided. People with funding information for dissemination in this column should call the same number.

February 28, 1974

(114-1) The OHEW Office of Child Development (NICHD) is seeking research and demonstration Grants Program is soliciting research and demonstration project applications in: (1) Children at Risk and the Child Welfare System; (2) Television and Children; and (3) Child Development and the Family. Program mission and guidelines are available for the preparation and submission of proposals. Non-solicited proposals outside the areas listed above have low priorities. The deadline for application is Mar. 22, 1974. The agency contact is: Barbara Rosengard, research coordinator, Research and Evaluation Office, Office of Child Development, P.O. Box 1162, Washington, D.C. 20013 (202-755-7758).

(114-2) The planning, establishment, and operation, of ethnic heritage studies programs will be supported by the U.S. Division of International Education. The Office of Education reports that the purpose is to "afford students opportunities to learn about the nature of their own cultural heritage and to study the contributions of the cultural heritage of other ethnic groups of the nation." Curriculum materials are to be developed for elementary, secondary, and higher education, and these are to relate to history, economics, geography, society, literature, art, music, drama, language, and general culture. The dissemination of curriculum materials will be supported by the Office of Education. The deadline for proposals is Apr. 16, 1974; guidelines should be available within a few days. For more information,

Africare unit

Africare, a two-year-old, non-political, non-profit organization, will be seeking students and faculty interested in starting a campus chapter of this national group.

A meeting will be held at 3 p.m. on Saturday, Mar. 16, in the lounge of the Hotel Union Bldg. for all interested students and faculty.

John E. Phillips, a student at Penn State and one of the organizers of Africare on campus, urges all interested in forming a chapter at Penn State to attend the meeting.

Africare is dedicated to the improvement of health in rural Africa. Currently, it is responding to the tragic famine in six West African countries — Senegal, Mauritania, Mali, Upper Volta, Niger, and Chad.

Although an independent corporation, Africare has participated with other relief groups, such as CARE, Catholic Relief Services, and Church World Services in raising funds to support their famine relief programs in West Africa.

Orientation change

Because of travel problems due to the closing of gas stations on holidays, new students scheduled to report for Fall Term orientation on Monday, Labor Day, Sept. 2, will be advised to arrive Sept. 3. More than 12,000 freshmen will be enrolled, about 4,200 at University Park and the remainder at the Commonwealth Campuses and Behrend College. Spring Term freshmen will be allowed to report on Monday, Mar. 11, rather than Mar. 10 if Sunday travel conditions pose problems for them.

Pattee Library and all its branches will observe the break schedule from Saturday, March 2 through Wednesday, March 13. The Libraries will close at 5 p.m. Monday through Friday, March 4-8 and Monday through Wednesday, March 11-13. The Libraries will be closed Sunday, March 3, Saturday, March 9, and Sunday, March 10. Regular hours will resume Thursday, March 14.

All Undergraduate Library branches will be closed from Saturday, March 2, at 5 p.m. until Thursday, March 14, at 9 a.m. when their normal hours resume.

Student jobs

Student services at the University will be implementing an information centralization of all on-campus part-time student employment openings. This new service will assist the more than 2,000 students who each month seek part-time employment.

The Student Employment Office, which now has a full-time director and increased office staffing, is making a complete listing of all part-time job openings on the campus. The job openings information will be posted in the Student Employment Office, 105 Boucke Bldg., and referrals will be made to interested students.

contact: Ethnic Heritage Studies Branch (All: Information Office), Division of International Education, Office of Education, USOHEW, Washington, D.C. 20002 (202) 424-2551.

(114-3) The National Institute of Mental Health (NIMH) has published an annotated and cross-referenced list of foundations and other private organizations which support mental health research. Entitled "Private Funds for Mental Health Research," the report is available for circulation from the Resource Information Service (M. R. Kohler 865-1372) or may be ordered from NIMH, 5600 Fishers Lane, Rockville, MD 20852 as OHEW Publ. No. (HS)75-0081.

(114-4) A full scale search of potential funding sources can be made for research, continuing education, and instructional projects of the Office of Federal Programs, the Penn State Foundation, and the Resource Information Service. Such a search can be made by filling out a single-page Preliminary Proposal Outline (PPO) available from M. R. Kohler, Room 5 Old Main. Completed PPO's are sent to the Office of Federal Programs or to the Penn State Foundation, or both. These units will return a list of potential sponsors selected from state and federal agencies, industries, and foundations. The list of interested sponsors can save time in the proposal writing process.

(114-5) Phi Kappa Phi Honor Society will have two full-time grant-in-aid, one for Spring and one for Summer, 1974. The recipient is selected from among those Graduate School grant-in-aid applicants who will be graduating in Spring or Summer. The grant-in-aid will be awarded to the qualified applicant who shows the greatest potential as a scholar will be awarded the award. Summer grant-in-aid applicants wishing to be considered for the award should submit their applications by Mar. 26. Please note that this

Calendar

Feb. 28-Mar. 10, 1974

SPECIAL EVENTS

Saturday, March 2 — Sports: Men's Basketball, vs. Rutgers, 8 p.m., Rec Hall.

SEMINARS

Thursday, March 28 — Statistics, 4 p.m., Room 75 Willard, Dr. George H. Weiss, Chief, Physical Sciences Laboratory, PHS, Bethesda, Maryland, on "A Biostatistical Random Walk."

Monday, March 4 — Current Issues in Food and Agriculture, 4 p.m., Room 202, Borland, Melvin M. Eckhaus, animal industry, on "International Food and Agriculture Programs."

OFFICIAL

Thursday-Saturday, Feb. 28-March 2 — Final exams.

Saturday, March 9 — Winter Term Commencement, 10:30 a.m., Rec Hall.

EXHIBITS

Museum of Art — Charles Sheeler, The Works on Paper, Gallery A. Selections from the Permanent Collection, Gallery B. Prints and Drawings from Central Pennsylvania Collectors, Gallery C, until March 3.

Zoller Gallery — Arnold Bittelman, drawings, and Dolores Bittelman, paintings, until March 2.

Pattee Library — Jean Furst, prints, West Lobby. Peter Kaultman, paintings, East Lobby. Postage Stamps from New Zealand, Main Entrance Lobby.

Kern Gallery — Jack Shaub, watercolor, Linda Strideck, abstract oils.

WPSX highlights

"Pennsylvania Town Meeting," a series of special programs produced by the stations of the Pennsylvania Public Television Network, begins Thursday, Feb. 28, at 8 p.m., with a "town meeting" on the energy crisis. The program is designed to provide participants from all parts of the state with the opportunity to exchange perspectives and ideas on the energy crisis. Included are documentary reports from each of the seven PPTN member stations, a discussion of the energy situation as it affects Central Pennsylvanians, and an interaction between participants in the WPSX-TV studio and residents of other parts of the state. Also featured is an interview with John Sawhill, deputy director of the Federal Energy Administration.

"Potemkin," Sergei Eisenstein's 1926 classic Russian film, is featured on The Humanities Film Forum* Saturday, March 2, at 8:30 p.m. on WPSX-TV. The film, originally a masterpiece of masterpieces, classically re-creates the 1905 rebellion of sailors aboard the ship Potemkin in Odessa harbor.

"Nova," a new series of hour-long "scientific adventures for curious growing minds," premieres Sunday, March 3, at 7:30 p.m. on Channel 3, with the award-winning "The Making of a Natural History Film." The film, produced by Britain's BBC, has won several British and international awards.

Application date is prior to deadline for spring grant-in-aid applications. All Phi Kappa Phi applicants will also be considered for Graduate School grant-in-aid. Applications must be picked up at Room 317 Kern.

(114-6) The National Endowment for the Humanities (NEH) is soliciting proposals for Grants in the Humanities, funding projects directed and conducted by students and other young persons. Grants are awarded for research, education, and public programs in history, philosophy, language, linguistics, literature, archaeology, law, prehistory, art history and criticism, and humanistic social sciences. Six-month projects are given priority. Grants for individual projects are normally under \$2,000, but grants for group projects may range up to \$10,000. A preliminary proposal of funding is given to projects which have a publication deadline. The next three formal deadlines are Apr. 1, Aug. 1, and Nov. 15, 1974.

(114-7) Continuation grants under the Language and Area Centers Program will be accepted by CEI, Room 105, Feb. 28, 1974.

(114-8) Research proposals are now being accepted by The International Space Research Federation, Inc., relating to the utilization of space technology in projects which have their primary objective an increase in the benefits which super provides to society and thus promote the utilization of space technology in the development of space and other super-technological studies of super and other super-technological public health issues; technology related to the improvement of space-containing processed foods; space studies of crops and other super-technologies; development of products resulting from research and by-product utilization. Applications for research proposals should be submitted to the agency contact is: International Space Research Federation, 7314 Wisconsin Ave., Suite 400, Bethesda, MD 20814. Applications must be received by Mar. 30, 1974. Project awards will be made by Sept. 1, 1974.

Leaves

Dr. Luther H. Harshbarger, professor of humanities and religious studies and head of the department of religious studies, Winter and Spring Terms, 1974-75, to make an historic-theological analysis of characteristic religious ideas and strands in the Romantic era, analyzing its influence on the mind and spirit of the period.

Philip Klass, associate professor of English, Fall and Winter Terms, 1974-75, to study the subject of Mark Twain as a pioneering science fiction writer.

Staff vacancies

The following vacancies for positions classified as staff assistant or staff nonexempt have been listed with the University Employment Division for filling. This announcement is made so that all University employees who are interested in promotion may apply by calling the Employment Division, 865-1387 (Network Line 475-1387). Applications for these vacancies will be accepted until:

5 P.M. MARCH 7, 1974

MAINTENANCE FOREMAN

Yup Campus

Responsible for the maintenance, repair and upkeep of the York Campus physical plant and facilities. High School education with two years vocational training or equivalent and two to four years effective experience in buildings and grounds maintenance/or construction. Supervisory experience required.

VOLUNTEER COORDINATOR

University Medical Center

Assists in developing and administering a volunteer program designed to obtain and retain an adequate, competent, and satisfied volunteer staff. Must have knowledge of hospital functions and relations and be familiar with hospital community relations.

PLANNING ANALYST

INSTITUTE OF STATE AND REGIONAL AFFAIRS

Capitol Campus

Provide technical for identifying, formulating, and examining community services projects, and participating in research projects. Master's degree in Regional Planning or equivalent or one to two years of effective experience.

ENGINEERING AIDE

University Park

Provide technical assistance to Project Engineers in the design of integrated circuits, layout, fabrication, assembly, and calibration of electronic equipment. Also prepare drawings and reports for electronic design and technical institute graduation or equivalent and four years related experience.

PENN STATE intercom

Volume 1, Number 25

March 7, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Among the speakers, Robin Morgan, Daniel Elsberg

Colloquy has series on politics and justice

"Politics and Justice" will be the theme of a COLLOQUY series at the beginning of the Spring Term, with U.S. Rep. Paul McCloskey, R. of California, the leadoff speaker Monday, March 18, at 8 p.m. in Schwab Auditorium. He will speak on "Current Politics in Washington."

All the lectures are free and open to the public.

The series will continue with Victor Gold, former press secretary to Spiro T. Agnew and a conservative political columnist, Tuesday, March 19; Robin Morgan, feminist editor, Thursday, March 21; and Daniel Elsberg, Friday, March 22.

In addition, a video-tape film, "The Murder of Fred Hampton," will be shown Wed-

nesday, March 20, at 8 p.m. in the HUB main lounge, and a discussion will follow.

Gold, whose talk will be given in the Kern Building assembly room, will speak on "Politics —The Conservative View." Now writing a book on his Washington experiences and working as a political commentator for Metromedia Broadcasting Co., Gold writes a political column which is carried by most of the major newspapers.

Robin Morgan is author of "Sisterhood Is Powerful," a comprehensive anthology of the writings from the Women's Movement, and the royalties from the anthology have been channeled into the Women's Movement through the Sisterhood Is Pow-

erful Fund, which she founded. She is also a poet, and her first collection, "Monster," published in 1972 by Random House, was called "genius" by one reviewer. In her lecture here, in the HUB ballroom, she will discuss "Feminist Tactics."

Elsberg, whose personal story is still on the front pages, will discuss "The Pentagon Papers Trial and Beyond," at 8 p.m. in Recreation Building Friday, March 22.

The leadoff speaker, Congressman McCloskey, Jr., is from the San Mateo/Santa Clara counties, California, district. He is a member of the Government Operations and Merchant Marine and Fisheries committees in Congress. He is known as something of an Independent.

1600 to graduate at ceremonies this Saturday

Winter Term Commencement Exercises will be held Saturday, March 9, at 10:30 a.m. in Rec Hall, when about 1600 students will receive degrees, including 1,272 bachelor's degrees, 259 master's, and 74 doctor's.

President Oswald will make the presentation of the degrees, and A. Wayne Readinger, of Fleetwood, Pa., will represent the Board of Trustees at the ceremony.

Some 255 seniors will graduate with honors, 38 with highest distinction. Of the doctoral candidates, 11 will receive D.Ed. degrees and 63 will be granted Ph.D. degrees.

Faculty who plan to attend and take part in the processional, in academic dress, will meet under the south balcony in Rec Hall at 10:15 a.m. Other faculty members may wish to attend and a special seating section is provided.

Thirteen seniors who have completed the Reserve Officer Training Corps program will be commissioned Saturday at 8:30 a.m. in the HUB Assembly Room. Four will be commissioned as second lieutenants in the U.S. Army and one in the U.S. Army Reserve; four will receive commissions as ensigns in the U.S. Navy, one in the U.S. Navy Reserve, and one in the U.S. Marine Corps; and two will be commissioned as second lieutenants in the U.S. Air Force.

Special course for correctional staff given by Berks

The Berks Campus has extended its associate degree program in community services, with emphasis in administration of justice, to correctional personnel of Graterford State Correctional Institution, Graterford, Pa.

This program will allow officers and staff members who work at the Graterford facility to obtain their college credits by attending classes held within the Institution. Classes will be scheduled so they can be accommodated either before or after a work shift.

Nearly 50 persons signed up for the first course according to Bill Solley, assistant professor of criminal justice, who travels to Graterford two days a week to teach the class, "Introduction to Law Enforcement and Corrections."

All of the 62 hours required for the two-year associate degree to be awarded from the Berks Campus will be taught at Graterford, Solley said.

The administration of justice program is designed to train and upgrade career and in-service personnel in police departments, probation and parole agencies, correctional institutions and district magistrate offices.

Candlelight dinner at HUB Mar. 14

The Hi-Los singing group will entertain at the St. Patrick's Day Candlelight Dinner at the HUB Terrace Room Thursday, March 14. The special entrees for the dinner will include corned beef and cabbage, baked ham, stuffed chicken breast, and flounder stuffed with crab meat. As always, there will be special decorations, and service is from 4:45 to 6:45 p.m.

Heart screening examinations scheduled

A Heart Risk Screening Program, designed to discover those individuals prone to coronary heart disease, will be conducted on the University Park Campus March 26 and 27 and April 23 and 24 for anyone wishing to take advantage of the opportunity to have a specialized examination. The program is being sponsored by the University through Continuing Education and the Central Pennsylvania Heart Association.

The program also includes assisting those found to be prone to heart disease to set up a health improvement program

through their physicians, to reduce the risk associated with factors that can be controlled.

While not restricted to faculty and staff members and their families, the heart screening examination is directed toward each person. A donation of \$3 is being asked from each person to help defray the high cost of the program, which is aided financially by the Association.

Each person will be screened for blood pressure, cholesterol, blood sugar, skin fold, height and weight, and additional information will be obtained concerning the

person's age, medical history, heredity, weight, smoking habits, and exercise, because each of these factors is said to be some indication of whether a person is prone to heart disease.

The examinations will be given from 9 a.m. to 12 noon and 1 to 5 p.m. on each of the scheduled days, in Room 301 Agricultural Administration Building.

Similar screening programs have been carried out in the area for several years, with considerable success and significant public acceptance of the benefits from the program.

described by the guides. Visitors to the campus find it especially interesting.

BERKS ENVIRONMENT SERIES

A month-long seminar during March was launched last week by the Berks Campus Continuing Education office centering on the subject of "Energy and its Impact on Man's Environment," with evening sessions scheduled each Thursday and with three Saturday field trips. The sessions are being held at the Noble Forest State Park Environmental Education Center, near Reading. Dr. Richard D. Schein, director of the University's Environmental Quality Programs, was the first speaker, on Feb. 28, discussing "Energy Production vs. Ecology."

COLLECTION GIVEN

The manuscripts, proofs and copies of the books of Bernard Gilbert Guernsey, publisher and translator of Russian literature, were officially presented to the University Libraries by him Feb. 27 on the occasion of his 79th birthday. The collection is on display in the Rare Books Room in Patten Library. Guernsey, born in the Ukraine, came to the U.S. when he was ten; and at the age of 22 he published his first short story. Later he translated such authors as Gorki and Pasternak, and he edited a number of other works. He founded the Blue Faun Book Shop in 1922, in New York. He has donated his entire collection, including the display materials, to the Patten Library Slavic Collection, which is now the sixth largest Slavic Collection in the U.S., with some 50,000 volumes.

ENGINEERING AWARD

A graduate student in aerospace engineering, Basile Robbins, of Bloomsburg, has won a national student paper award of the American Institute of Aeronautics and Astronautics. His paper, on "Turbulence

Induced Noise in Turbomachinery," received the top award in the AIAA competition's graduate division. He received a plaque, a \$500 cash award, and an expense-paid trip to the International Astronautical Federation Congress in Amsterdam, to represent the U.S. in competition for an International award. His research was carried out in the Applied Research Laboratory for a master's thesis, supervised by Dr. Budugar Lakshminarayana.

METEOROLOGY AWARDS

Two current students in meteorology and one who is a recent graduate received 1974 national awards of the American Meteorological Society. Last year, two other Penn State students were AMS winners, so that five out of the last eight student award winners have been from the University. This year's awards went to John A. Tolth, senior from Throop, Pa.; Daniel Koyser, junior from Elkins Park; and David B. Gilhousen, of Hastings-on-Hudson, N.Y., a 1973 graduate who won an award for a paper he wrote while an undergraduate. Tolth received the 1974 Howard T. Orville Scholarship, given for academic excellence and achievement. Koyser was given the Howard W. Hanks, Jr. Scholarship for scholastic achievement.

FIRST POLYMER DEGREE

The bachelor of science degree in polymer science will be conferred for the first time at Penn State Saturday to John S. Trent, of Pittsburgh. He was a ceramic science major when the program was initiated two years ago and transferred into the new program. The first freshman entered the program last September. Trent, who held the Educational Opportunity Program Scholarship, won the 1973 Alan R. Davidson Memorial Award. He worked part time as a laboratory technician.

News in brief

BALLET COMPANY

The Pennsylvania Ballet Company, including 32 dancers and musicians of the Pennsylvania Orchestra, will be in residence on the University Park Campus July 23-August 18, made possible by grants from the National Endowment for the Arts, Pennsylvania Council on the Arts, and the Penn State Foundation.

In addition to performances by the Company and Orchestra, the visitors will be involved in open lecture-demonstrations, concerts, and a ballet study program. Two world-premiere dances will be performed.

A Distinguished Alumna of the University, Barbara Welsberger, is the artistic director of the Pennsylvania Ballet.

During the period, fifty advanced-level ballet students, selected from across the nation, will participate in intensive study.

NEW COURSE

A new and unique course, "Seminar in the History of the Olympic Games," will be offered during the Spring Term as Ph. Ed. 550 by the College of Health, Physical Education and Recreation.

Dr. John A. Lucas, professor of physical education, will teach the course, the first of its kind in North America. He has done extensive research on the Olympic Games for 15 years and has attended five games.

The class will meet Tuesdays and Thursdays at the 14th period.

LONDON BUS

This week the University's "London Bus" tour resumed a Monday-Friday schedule. The bus, with a tour guide on each run, leaves from the HUB at 12:45 p.m. in a 30-minute tour of the campus, most of the significant features of the campus are

Mozart's "Cool Fan Tutte" on Artists Series.

Artists Series

Mozart's romantic comedy in opera, "Così Fan Tutte," will be performed by the Canadian Opera Co. Saturday, March 16, at 3 p.m. and at 8:30 p.m. in Schwab Auditorium.

Tickets for both performances are on sale at the HUB today, Friday, and, if any remain, Saturday morning.

The opera, which has a full title of "Così Fan Tutte, Ossia La Scoula Degli Amanti," was among Mozart's last operas. It was not well received in Vienna during Mozart's lifetime, where it premiered in 1790, although it did subsequently attain acceptance in other European cities shortly thereafter. Beethoven thought Mozart had wasted his time on a trivial opera with immoral tones. Although performed in London in the 1820s, it was not until 1922 that it was performed in this country.

The Canadian Opera Co., which did "The Barber of Seville" at Penn State in 1970, was formed 20 years ago and started touring in 1958. Its tours through the United States now cover 15,000 miles a year. Dr. Herman Geiger-Torel has been general director since 1958, he had directed in South America for 12 years and before that in European countries before taking the Canadian post.

Two casts will perform the opera here, with orchestra that travels with the singers. John Fenwick is music director and conductor.

Leaves

Dr. William T. Sanders, professor of anthropology, Sept. 1 to Feb. 28, 1975, to write a synthesis volume to the major archaeological research in the Valley of Teotihuacan, Mexico. He will also assist the Instituto Nacional de Antropología e Historia in the organization and expediting of a seminar in advanced training of the Instituto's field archeological staff.

Dr. Elton Altwater, professor of political science, Fall and Winter Terms, to work on a book dealing with the economic, social and decolonization programs of the United Nations.

Dr. Edward D. Bellis, professor of biology, for six months, beginning March 1, to study the ecology and behavior of roe deer in the Highlands of Scotland.

S. Leonard Rubinstein, professor of English, Spring and Summer Terms, 1975, to work on a novel.

Dr. John D. McAulay, professor of education, Sept. 2 to March 2, 1975, to serve as a consultant with the educational faculty of the University of Rhodesia and assist in lecturing and tutorial work.

Deaths

Robert Moffat Fleming, who held the special title of Professorial Lecturer in Mining Engineering from 1950 to 1963, died Feb. 24 at the age of 80. A 1917 Penn State graduate, with a master's degree from Columbia University School of Mines in 1926, he was manager of the Ebsenbugh Coal Co. of Colver (Cambria Co.) from 1929 to 1949 before joining the faculty. For many years he published a monthly article for the magazine, "Mechanization."

JGE winter issue published

The Winter issue of the Journal of General Education, edited by Dr. Henry W. Sams and published by the University Press, contains a Calhoun's index of the Journal articles published since 1946, when it was founded. Dr. John B. Smith, assistant professor of English, compiled the index.

Dr. Thomas F. Magner, professor of Slavic languages and associate dean for research and graduate studies of the College of the Liberal Arts, contributed an article, "The Rise and Fall of the Ethics," and Deborah Austin, professor of English, composed the poem, "Cyclops," for this issue.

The lead article is "Living and Learning in College," by S. Stewart Gordon, executive vice president for planning of SUNY at Binghamton; he is also a member of the JGE Board of Editors.

Robert Hoffman, author of "Language, Minds, and Knowledge" and member of the editorial board of "Philosophia," has contributed the article, "Reflections of an Epistémologist." The reflections are concerned

Orlton E. Dolson, Instructor in General Engineering at New Kensington Campus from 1958 to 1969, when he retired, died Feb. 19. He was a graduate of the University of Toledo, with an A.B. degree in chemistry, he also attended the University of Pittsburgh in 1948-49 for programs in physics and mathematics. He was an instructor in technical institute programs in Pittsburgh in the early 'fifties, then became senior draftsman for the P. F. Loftus Co., Inc., in charge of electrical drafting and design. At other points in his career he was with Westinghouse Electric Corp. and Owens-Illinois Glass Co.

with certain shibboleths about college education, and (oversimplified, perhaps) his attitude might be summed up in his statement, "Their (the students') business, according to the language in the activities set for them so that they may be initiated into a distinctive form of life—Intellectual life. The relationship between teachers and students is hierarchical and strictly tutorial." "Confessions of an Honors Graduate" has a special meaning here since it was written by Donald L. Shanks, who was graduated with honors from Penn State in General Arts and Sciences last June.

Other articles are by F. Champion Ward, Ford Foundation; Nancy G. Westerfield, Kearney State College, Neb. Books reviewed are "Minor Cures in New England" by Gal. Thain Parker, revised by Dr. Charles N. Coker, "With the Darwins' Children," by David J. Garm, reviewed by John Balaban.

Members of the Penn State faculty may receive JGE at special rates. Inquiries should be made to the University Press, Room 215 Wagner.

Women's swim championships

Penn State's Natatorium will get its first major test as a championship swim facility when the National Swimming and Diving Championships of the Association for Intercollegiate Athletics for Women (AIAW) will be held here March 14, 15 and 16.

Featuring among the 500 entrants from colleges all over the country such Olympic team members as Cathy Carr, Karen Moe, Dana Schoenfeld, Ann Simmons, and Jennifer Bartz, the meet will have a heavy schedule of events all three days.

Tickets are now available at the Recreation Building box office (Room 236).

A single ticket for all sessions is \$36.00; for Thursday or Friday (all day), \$20.00; and for Saturday morning and afternoon \$2.00 and Saturday evening, \$2.00. Thus, an all-events ticket saved \$2.00 over the price of the individual tickets combined.

The AIAW banquet at the Elks Country Club on Thursday, March 14, will feature a special appearance by Don Dowd, the ABC television network commentator and former Olympic swimming gold medalist. Tickets for the banquet cost \$5.25.

Staff vacancies

University faculty or staff members who are interested in any of the staff opening or staff non-exempt jobs listed below may apply by calling Employment Division, 101-2000 (Ext. 155-1870). Do not contact the area having the vacancy. Applications will be accepted until:

5 P.M., Thursday, March 21, 1974

SENIOR PROGRAMMER, BUDGET AND PLANNING — UNIVERSITY PARK
Responsible for preparing procedures and specifications of the project schedule. Participate in project organization and scheduling. Bachelor's degree or equivalent plus three to four years of effective experience in programming.

PROGRAMMER — HERSEY MEDICAL CENTER
Responsible for analyzing the requirements of various systems and will be given priority of computer programs to fulfill these requirements. Bachelor's degree or equivalent with knowledge of third generation computers and programming plus one to two years of effective experience in computer programming or equivalent in Data Processing plus two to four years of effective experience.

ACCOUNTING TRAINEE, CONTROLLER'S OFFICE — UNIVERSITY PARK
Responsible for training on a rotation basis in a variety of operations which fall under the direction of the Controller. Bachelor's degree in Accounting or equivalent and over three months of effective experience.

For more information and application forms contact Ms. Victoria Fern, program specialist, Visual Arts Program, NEA, Washington, O.C. 20506 (202)392-7958 (Rel. CFDA 45-009).

(119-4) The Division of Public Programs, National Endowment for the Humanities (NEH) Film/TV Grant Program is desirous to encourage and support production of high quality films for nationwide broadcast and distribution. Films must entail the use of knowledge from humanistic fields such as history, biology, business, economics, linguistics, and literature. Films should be of major educational substance and attractive to adults. Proposals which focus on material central to the humanities will be given priority. Major production or series proposals usually proceed through a Development Grant phase to finance the research and writing of a script. Development grants have a July 1, 1974 deadline (see List 1, 1974-1975). The next deadline for Film/TV Grants is June 1, 1974 (Oct. 15, 1975) next. Contact: Jeanne Mulcahy, assistant director, Div. of Public Programs, Film/TV Grant Program, NEH, 605 15th St., N.W., Washington, O.C. 20506 (202)382-5537.

(119-5) The U.S. Department of Labor supports Manpower, Research and Development Projects that are aimed at new ideas and improved techniques. These projects should be designed to demonstrate the effectiveness of specialized methods in meeting manpower, employment, and training problems of particularly disadvantaged work groups. Grants overall average about \$30,000 with research grants averaging somewhat less than demonstration grants. There are no firm deadlines. Proposal review time runs between 60 and 90 days. For information, contact Office of Research and Development, U.S. Dept. of Labor, Washington, O.C. 20210 (202)961-4176. Rel. CFDA 17-233.

(119-6) An Index to the Monthly Report of the Office of Federal Personnel Management (OFPM) is available. The indexing system began with Report 17 (July 1973) and the index which is available through Report No. 22 (Jan. 1974). For information, call M. R. Kohler, 665-1372.

Calendar March 7-17, 1974

SPECIAL EVENTS
Saturday, March 9 — Winter Term Commencement, 10:30 a.m., Rec Hall. Graduation exercises for ROTC. Graduates, 8:30 a.m. HUB assembly room. Donald R. Ford, dean, College of Human Development, speaker.

Monday-Wednesday, March 11-14 — ROTC orientation, advising, and registration.

Thursday, March 14 — Spring Term classes begin, 8 a.m.

Friday, March 15 — Vocal recital by Gwynne Davey, 8:30 p.m., Music Bldg. recital hall.

Friday, March 15 — GSA orientation 8:30 p.m., Room 102 Kern.

Saturday, March 16 — Artists Series, Canadian Opera Company, 3 and 8:30 p.m., Schwab.

Saturday, March 16 — Folklore Society concert, "The Stuarts," 8 p.m., Room 102 Kern.

Sunday, March 17 — Recital by Beth Shaw, flute, and Russel Shipley, 8:30 p.m., Music Bldg. recital hall.

LECTURE
Friday, March 15 — Gretchen Walker, Alaska Women's Health Collective, 7 p.m., Room 220 Loucke, sponsored by Women's Literature.

FILM
Saturday, March 16 — Free-U Children's film, "Big Red," 12:30 and 2 p.m., HUB assembly room.

SEMINAR
Monday, March 11 — Computer Science, 4 p.m., Room 101 Altitude. Richard J. Fennell, Carnegie-Mellon University, the "System Organization for Speech Understanding." Hearsay II.

Art ed exhibit

An Art Education Alumni Exhibit, featuring the works of several members of the faculty of the art education department along with those of more than 10 alumni now teaching art throughout Eastern U.S., will be on display in the Chambers Gallery from March 11 through March 29.

The exhibit is a feature of the 50th Anniversary Celebration of the College Education.

Faculty members taking part in the exhibit include Dr. Kenneth Bellitt, Mr. Chomicki, Dr. Robert Ott, and Dr. Hal Hoffa, department chairman.

Gallery hours are 9 a.m.-5 p.m., Monday through Friday, 9 a.m. to noon, Saturday.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For more information, call 865-1372.

March 7, 1974

(119-1) Science students aged 15 to 21 years who would like to experience leading scientists in developing countries can apply to NEH's Exploration Scholarship Program. Sponsored jointly by the Educational Expedition International of Belmont, Mass., and the Office of Education's Gifted and Talented Program, the exploration program will give students the opportunity to study archaeology, astronomy, ecology, geology, and the marine sciences. They will be instructed in the use of field instruments, tools and equipment, surveying and mapping, collecting, sampling, observation, excavation, photography, and documentation. Winners will be selected on the basis of demonstrated competence and potential for careers in the various scientific fields. Evidence of good health, physical prowess, recommendations by community leaders, and an essay will also be used to judge competitors. Deadline for submission of applications is March 15; apply to Norlette Gifford, State Dept. of Education, P.O. Box 911, Harrisburg, Pa. 17126. (717)787-8474. (Con-

tinued on page 15)

(119-2) The Division of Research Grants, National Endowment for the Humanities (NEH) considers applications for research grants that contribute to the understanding of the humanities. Interpretive writing in the humanities is also supported. Projects bearing on major issues of contemporary public concern are of special interest. Are projects contributing to the American Revolution Bicentennial. Few grants exceed \$30,000. The next two deadlines are May 6 and Nov. 16, 1974. Early contact with the Division is encouraged through Dr. William R. Emerson, director, Division of Research Grants, NEH, 605 15th St., N.W., Washington, O.C. 20508 (202)382-5537. (Rel. CFDA 45-009).

(119-3) The National Endowment for the Arts (NEA) Photographer's Fellowship Program has been organized to advance the careers of photographers of exceptional talent and to help them purchase material for their work. This program is a portion of the NEA Visual Arts Program (Nov. 29 INTERCOM 2107-1). Fellowships are usually \$3,000. Applications must be postmarked by May 30, 1974.

AREA REPRESENTATIVE, CONTINUING EDUCATION —

BERKS CAMPUS AND DELAWARE COUNTY CAMPUS
Responsible for the functions of development, operation, and administration of Continuing Education programs and services within an assigned geographical district. Bachelor's degree or equivalent with two to three years of relevant experience in business, education, or administration.

PROGRAMMER, UNIVERSITY LIBRARIES — UNIVERSITY PARK
Responsible for the analysis, program design, coding, documentation, and other programming tasks required to develop a bibliographic data base for operational systems supporting online access to the library's holdings. Computer Science or related field, plus one to two years of effective experience in bibliographic data base design of an operational system supporting online access, and development of programs for processing nonproprietary information based upon the Library of Congress standards.

In addition to the above vacancies, certain positions frequently are available because of the number of employees in them. They are listed below and are not to be listed on a Individual basis. Application may be made at any time. We are welcome to make your interests known now to the Employment Office for future consideration.

Staff Nurses, Licensed Practical Nurses, Radiology Technicians, Junior Research Technicians, Research Technicians, Medical Technologists, all of Health Services.

Applications for staff vacancies are considered without regard to race, sex, creed, sex, or national origin.

ing problems of particularly disadvantaged work groups. Grants overall average about \$30,000 with research grants averaging somewhat less than demonstration grants. There are no firm deadlines. Proposal review time runs between 60 and 90 days. For information, contact Office of Research and Development, U.S. Dept. of Labor, Washington, O.C. 20210 (202)961-4176. Rel. CFDA 17-233.

(119-6) An Index to the Monthly Report of the Office of Federal Personnel Management (OFPM) is available. The indexing system began with Report 17 (July 1973) and the index which is available through Report No. 22 (Jan. 1974). For information, call M. R. Kohler, 665-1372.

(119-7) NEH Faculty Fellowships (Feb. 7-1974 COM 115-2). April 8 for NSF Developmental Research on Technology Utilized by Local Communities (Feb. 7 INTERCOM 2115-2). April 15 for NEH Museum Programs' Exhibition and Continuing Education Grants (Sept. 13 INTERCOM 217-1). April 15 for OE Ethnic Heritage Studies Program (Feb. 28 INTERCOM 2118-2).

PENN STATE intercom

Volume 3, Number 26

March 14, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Many interested groups invited to participate

Senate to hold collective bargaining session April 2

Collective bargaining will be discussed at the April 2 meeting of the University Faculty Senate.

Dr. Ernest L. Bergman, Senate chairman, announced at the March 5 meeting that the Senate Council voted to hold a forensic session on collective bargaining.

Interested groups, including the American Association of University Professors, Open Options, Pennsylvania State University Professional Association, and the Graduate Student Association, have been invited to take part in the April 12 session.

In action at the last meeting, the Sen-

ate, after a lengthy discussion, rejected most of the recommendations of the Subcommittee on Student Evaluations.

The Senate passed an amended proposal which establishes a permanent subcommittee to be responsible for developing comprehensive policy statements on evaluation of courses, programs and instructors. The subcommittee also would monitor and review continuously such policy statements and their implementation.

In other action, the Senate returned to committee proposed guidelines for stu-

dent participation in academic affairs and approved the following:

—Criteria to be used by the Senate Committee on Curricular Affairs for undergraduate program review.

—Continuation of the program of experimental courses for another three years.

—Clarification of a rule concerning use of remedial work at other institutions for reinstatement at Penn State.

—Modified reinstatement guidelines for veterans.

—A rule change involving election of Senate officers.

To aid Commonwealth Campus instruction program

Nominations sought for new associate dean position

Dr. Robert G. Quinn, Dean of Academic Instruction for Commonwealth Campuses, has appointed an advisory search committee to assist him in appointing an individual to the newly established position of Associate Dean of Academic Instruction for Commonwealth Campuses, effective July 1, 1974.

The advisory search committee is chaired by Dr. Eugene R. Skaski, assistant professor of history (Allentown).

Other committee members are Willard W. Gregory, associate professor of chemistry (Mont Alto); Arthur J. Marsicano, assistant

professor of engineering (Schuylkill); Dr. Jacqueline G. Wells, assistant professor of mathematics (McKeesport); Dr. Guy E. Rindone, chairman of Ceramic Science Section and chairman of Intra-University Relations Committee; Dr. James D. Gallagher, assistant dean for Commonwealth Campus Programs, College of Health, Physical Education, and Recreation; Dr. Jacqueline Schoch, assistant director for Resident Instruction (DuBois); Dr. David H. Stewart, head of department of English; and a representative of the Council of Presidents, the federation of presidents of Student Govern-

ment Associations at the Commonwealth Campuses.

The advisory search committee is to identify qualified candidates who have experience within or related to the Commonwealth Campus system. Nominees should recognize that the position requires full time residency at University Park. The committee will receive suggestions and nominations from sources within the University.

These should be forwarded to Dr. Eugene R. Skaski, 205 Old Main Building, University Park, Pennsylvania 16802, no later than April 15, 1974.

Among features, film on Fred Hampton

Colloquy program on politics, justice

In addition to lectures by four people in the news, a video-tape film, "The Murder of Fred Hampton," will be a feature of the Colloquy week-long program on "Politics and Justice," March 18-22.

The film, to be shown at 8 p.m. in the HUB main lounge, will be followed by a discussion on "Perspectives on Justice: Black and White," with Dr. Herbert Jacobs, professor of political science, Northwestern University; Dr. James Eisenstein and Dr. Robert O'Connor, of the political science department at Penn State; and Roy Austin, sociology.

The tape film, which will be shown throughout the week as a feature of the new Video Tape Network (described elsewhere in this issue), is a documentary about Black Panther Fred Hampton, with films of him before his death in Chicago and the investigation which followed. It won acclaim at the Cannes Film Festival.

The lectures in the Colloquy series, all open to the public, and all beginning at 8 p.m., are by U.S. Rep. Paul McCloskey (R. of California) on Monday, March 18 in Schwab Auditorium; Victor Gold, columnist, Tuesday, March 19 in Room 112 Kern; Robin Morgan, feminist editor, Thursday, March 21, in the HUB ballroom; and Daniel Ellsberg, Friday, March 22, in Rec Hall.

Governor signs retirement bill

Governor Milton S. Shapp, on Friday, March 1, signed into law Act 31 of the 1974 Pennsylvania Legislature, and the provisions of the act became effective on that date. This is legislation which was described as Senate Bill 472 in the February 14 issue of INTERCOM. The new act provides for

changes in the State Employees Retirement System, affecting most University staff members. Some provisions of the act will require some clarification and State officials plan on providing more information on the act in the near future. The Employee Benefits Division will make this information available.

Calendar Mar. 14-24, 1974

(Note: The following items are in addition to those listed on the Spring Term calendar in this issue.)

Lectures

Monday, March 18 — Douglas Way, Harvard University, on aerial photography, 12:30 p.m., Room 115 Electrical Engineering West, sponsored by department of landscape architecture.

Tuesday, March 19 — Speech Science Lecture, Dr. C. A. Wood, physiologists, University of Arizona, on "Objective Measures of Normal Voice," 7:30 p.m., Room 271 Willard.

Wednesday, March 20 — S&H Environmental and Energy Policy Lecture, Joseph Brennan, National Coal Association, on "The Future of Coal as an Energy Source with Special Attention to Environmental Concern," 8 p.m., Room 112 Kern.

Special Events

Tuesday, March 19 — First of five Lenten Services, Helen Eakin Eisenhower Chapel, 12 noon and 12:35 p.m., The Rev. Mac Sadoris, on "The Self at Crossroads."

Seminars

Thursday, March 14 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern, Thomas Larson, civil engineering and head, Pennsylvania Transportation Institute, on "Overview: Forces Which Are Changing Urban Transportation."

Thursday, March 14 — Chemistry, 12:45 p.m., Room 310 Whitmore. Ronald J. Gillespie, McMaster University, on "The Preparation and Structures of New Polyatomic Cations of Sulfur, Selenium, Tellurium, and Mercury."

Thursday, March 14 — Remote Sensing, 1 p.m., Room 225 EE West. Seon J. Chung on "Introduction to GIS: Aircraft Digital Data for Earth Resources Analysis."

Thursday, March 14 — Agronomy, 3:30 p.m., Room 301B Ag. Adm. J. Hook on "Effects of Site and Management on Nitrogen Movement in Land Disposal of Sewage Effluent."

Friday, March 15 — Individual and Family Studies, 7:30 p.m., Room S200 Human Development. Dr. Alfred M. Baldwin and Dr. Clare P. Baldwin, Cornell University, on "An Empirical Study of Mother-Child Interaction."

Monday, March 18 — Inter-Science, 4 p.m., Room 310 VHS. Dr. Frank W. Putnam, Indiana University, on "Structure and Genetic Control of Human Immunoglobulins."

Monday, March 18 — Analytical Chemistry, 1 p.m., Room 333 Whitmore. Scheduling meeting.

Monday, March 18 — Computer Science, 4 p.m., Room 101 Altohouse. Joel Seiferas, MIT, on "Refining Some Time and Space Complexity Hierarchies."

Monday, March 18 — Computation Center, 7:30 p.m., Room 100 Osmond. Hardware/Basic OS Concepts (1), Introductory Programming.

Monday, March 18 — New Communities, 2 p.m., Room 322 Sackett. Evan Clinchy, President, Education Planning Associates, Inc., on "Innovations in Educational Systems in New Communities."

Monday, March 18 — Entomology, 3:50 p.m., Room 204 Patterson. Jay Ellenberger on "The Distribution of Egg Masses of the Oak Leafroller, *Archips semiferus*, on its Primary Host Trees."

Tuesday, March 19 — Genetics, 3:55 p.m., Room 111 Tyson. Charles Boyer, horticulture, on "Morphological and Chemical Characterization of Mutant Starch Granules from Developing Endosperms of Zea Mays L."

Tuesday, March 19 — Speech Science, 7:30 p.m., Room 271 Willard.

(Continued on page four)

News in brief

LENTEN SERVICES

A series of Tuesday noon Lenten Meditation Services will be held, beginning March 19 in the Helen Eakin Eisenhower Chapel. Two services will be held each Tuesday, at 12 noon and at 12:35 p.m.

The service March 19 will be led by the Rev. Mac Sadoris, who will speak on "The Self at the Crossroads." Other services will be conducted by the Rev. Don Davis, the Rev. Irgart Soltan, the Rev. Bob Boyer, and the Rev. Ned Weller.

Ray M. Martin, administrative assistant in the sociology department, will be organizer for all the services.

BLACK LEADER

Dr. Eugene D. Levy, associate professor of history at Carnegie-Mellon University and author of the book "James Weldon Johnson," Black Leader, Black Voice," will discuss Johnson in a seminar Thursday, March 21, at 4 p.m. in the Rare Books Room of Pattee Library. The Black Cultural Center is sponsoring the seminar and a Smithsonian Institution exhibition concerned with Johnson's life and works, to be displayed at the Center until April 9. Johnson, born in 1871, became a lawyer, politician, poet and diplomat.

CROP FAST

A 30-hour fast for the hungry of the world is being sponsored by United Campus Ministry and CROP, the Church World Service Hunger Appeal. The fast will be held in the Helen Eisenhower Chapel from March 29, to 6 p.m. March 30. Details and sponsor sheets will be available between 11 a.m. and 2 p.m. March 18-29 at a table in the HUB ballroom.

Spring Term 1974 Calendar

University Park Campus

The Pennsylvania State University

•Week of Mar. 11-17

Thursday, March 14

AIAW National Swimming and Diving Championships, Natorium.
Classes begin for Spring Term, 8 a.m.
Free-U jammy, 7:00 p.m., HUB ballroom.
USG film, "Ben," 6:15, 8:15, and 10:15 p.m., HUB assembly room.

Friday, March 15

Gwen Davey, voice recital, 8:30 p.m., Music Bldg. recital hall.
Women's Liberation, 7 p.m., Room 220 Boucke Gretchen Walker, Altoona Women's Health Collective.
USG film, "Ben," 6:15, 8:15 and 10:15 p.m., HUB assembly room.
GSA Orientation School, 8:30 p.m., Room 102 Kern.
AIAW National Swimming and Diving Championships, Natorium.

Saturday, March 16

Artists Series, Canadian Opera Company, "Cosi Fan Tutte," 3 and 8:30 p.m., Schwab.
Free-U children's films, "Make Mine Music," 12:30 and 2 p.m., HUB assembly room.
USG film, "Ben," 6:15, 8:15 and 10:15 p.m., HUB assembly room.
Folklore Society Concert, "The Stuarts," 8 p.m., Room 112 Kern.
AIAW National Swimming and Diving Championships, Natorium.

Sunday, March 17

Rebecca Shaw, flute, and Russel Shipley, clarinet, 8:30 p.m., Music Bldg. recital hall.
IFC social event, 8 p.m., HUB ballroom.
Chapel Service, 11 a.m., Eisenhower Chapel.
Rev. Glenn E. Schuit, Co-Pastor St. John's United Church of Christ, Chambersburg, Pa.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

•Week of Mar. 18-24

Monday, March 18

Free-U registration, 7:30-10:30 p.m., HUB assembly room.
Daniel Ragone, piano recital, 8:30 p.m., Music Bldg. recital hall.
Colloquy lecture, U.S. Rep. Paul McCloskey, (R, of California), on "Current Politics in Washington," 8 p.m., Schwab.

Tuesday, March 19

Free-U registration, 10:30 a.m.-4 p.m., HUB assembly room.
Penn State Karate Club demonstration, 7:45 p.m., Room 106 White.
Colloquy lecture, Victor Gold, on "The Uses of Skepticism," 8 p.m., Room 112 Kern.
College of Agriculture faculty meeting, 4 p.m., Room 301 Agri. Adm.

Wednesday, March 20

Lecture — demonstration of the PLATO system, Donald L. Biltzer, U. of Illinois, 8 p.m., Room 102 Kern. Sponsored by Computation Center.
Smith Toulson, clarinet recital, 8:30 p.m., Music Bldg. recital hall.
Elot Porter, informal talk on his photography, 5 p.m., Zoller Gallery.
Commonplace Theatre, "Sands of Two Jims," 8 and 10 p.m., Room 112 Kern.
Noontime Concert, 12:15 p.m., lobby of Kern.
Colloquy film, "The Murder of Fred Hampton," 8 p.m., HUB main lounge, followed by discussion.

Thursday, March 21

Labor Studies Club and USG Dept. of Labor, 10:30 a.m., HUB assembly room, films; noon to 3 p.m., HUB ballroom, workshops; 3:30 p.m. talk by Michael Johnson, Penna AFL-CIO, HUB ballroom.
USG films, "What Do You Say to a Naked Lady?" 6:30, 8:15 and 10 p.m., HUB assembly room.
Colloquy lecture, Robin Morgan, feminist editor, on "Feminist Tactics," 8 p.m., HUB ballroom.
College of Engineering faculty meeting, 4 p.m., Room 26 Min. Sci.

Friday, March 22

Army ROTC Dinner-Dance, 7 p.m., Elks Country Club.
Folk and Square Dance Roundup, 7:30 p.m., North Gym, White.
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.
USG films, "What Do You Say to a Naked Lady?" 6:30, 8:15 and 10 p.m., HUB assembly room.
Colloquy lecture, Daniel Ellsberg, 8 p.m., Rec Hall, on "The Pentagon Papers and Beyond."

Saturday, March 23

Artists Series, Alvin Ailey City Center Dance Theatre, 8:30 p.m., Rec Hall.
Free-U children's films, "Make Mine Music," 12:30 and 2 p.m., HUB assembly room.
USG films, "What Do You Say to a Naked Lady?" 6:30, 8:15 and 10 p.m., HUB assembly room.

Sunday, March 24

Erin Headley, cello recital, 3:30 p.m., Room 112 Kern.
Chapel Service, 11 a.m., Eisenhower Chapel.
Rev. Richard R. Hicks, United Ministries in Higher Education, Richmond, Virginia.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

•Week of Mar. 25-31

Monday, March 25

Yasuko Koya Ohmoto, organ recital, 8:30 p.m., Music Bldg. recital hall.
Deadline for adding courses.

Tuesday, March 26

GSA resume and vita workshop, 7:30 p.m., Room 101 Kern.

Wednesday, March 27

Commonplace Theatre, "The Treasure of Sierra Madre," 8 and 10 p.m., Room 112 Kern.
Noontime Concert, 12:15 p.m., Lobby of Kern.

Thursday, March 28

Eco-Action, Student Environmental Conference.
Nutrition Workshop on Mothers and Babies, 8 p.m., Room 101 Kern.

Friday, March 29

P.S.U. Symphony Orchestra, 8:30 p.m., Schwab.
Eco-Action, Student Environmental Conference.
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.
Penn State YMCA swimming championships, Natorium.

Saturday, March 30

Artists Series, Preservation Hall Jazz Band, 8:30 p.m., Rec Hall.
Eco-Action, Student Environmental Conference.
Sports: Men's lacrosse, 2 p.m., football practice field.
Penn State YMCA swimming championships, Natorium.

Sunday, March 31

Cheerleading squad tryouts, 5-11 p.m., HUB ballroom.
Sharon Brook, piano recital, 3:30 p.m., Music Bldg. recital hall.
Chapel Service, 11 a.m., Eisenhower Chapel.
Rev. Douglas Akers, The United Methodist Church, Dallas, Pa.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Preservation Hall Jazz Band, on Artists Series, March 30.

•Week of April 1-7

Monday, April 1

File for Pass-Fail.
File for Repeat Course.

Tuesday, April 2

College of Business Administration faculty meeting, 10 a.m., Room 201 Business Administration Bldg.
File for Pass-Fail.
File for Repeat Course.

Wednesday, April 3

Five O'Clock Theatre, "What If," and "Bivalue," 5:20 p.m., Pavilion Theatre.
Sports: Men's Golf, vs. Villanova, 1 p.m.; Men's Lacrosse, vs. Pennsylvania, 3 p.m.
Artists Series, Films of Bunuel, "The Discreet Charm of the Bourgeoisie," 8:30 p.m., Schwab.
Gregory Donovetsky, oboe recital, 8:30 p.m., Music Bldg. recital hall.

Chapel Service, 11 a.m., Eisenhower Chapel.
Rev. Raymond Dibble, pastor, State College Christian and Missionary Alliance.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

•Week of Apr. 29-May 5

Monday, April 29

John Shannon, organ recital, 8:30 p.m., Music Bldg. recital hall.

Tuesday, April 30

Alpha Phi Omega Bloodmobile, 9 a.m.-5 p.m., HUB ballroom.
Sports: Women's lacrosse, vs. Millersville, 2:30 p.m.; Women's tennis, vs. East Stroudsburg, 3 p.m.

Wednesday, May 1

Alpha Phi Omega Bloodmobile, 9 a.m.-5 p.m., HUB ballroom.
Thelma Tro, 8:30 p.m., Music Bldg. recital hall.
University Theatre, student preview of "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.
Commonplace Theatre, "Time Machine," 8 and 10 p.m., Room 112 Kern.
Noontime concert, 12:15 p.m., lobby of Kern.

Friday, May 3

Free-UY Jammy, 7:30-11:30 p.m., HUB ballroom.
University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.
Sports: Men's lacrosse, vs. Lehigh, 8 p.m.
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, May 4

Keystone Doll Meet, 8 a.m.-5 p.m., Ice Pavilion.
University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.

Sunday, May 5

Marcus Chubbuck, piano recital, 3:30 p.m., Music Bldg. recital hall.
IFC social, 8 p.m., HUB ballroom.
German Club play, 8 p.m., Room 112 Kern.
Chapel Service, 11 a.m., Eisenhower Chapel.
Rabbi Theodore H. Gordon, Main Line Reform Temple, Beth Elohim, Wymannwood, Pa.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

EXHIBITS

KERN GALLERY:

Lee Ann and Dennis Kennedy, pottery, through March 31.
Jured Student photography prints, March 17-30.

MUSEUM OF ART

Charles Sheeler: "The Works on Paper, through March 24, Gallery A.
Selections from the Permanent Collection, through Mar. 31, Gallery C.
Eight Dublin National Print and Drawing Competition Exhibition, March 17-April 10, Gallery B.

Selections from the Permanent Collection, March 31-June 23, Gallery A.
Bill Hanson: Harvard Paintings, April 7-May 5.

Graphics by Six Swiss Sculptors, April 14-May 12, Gallery B.
Quilts, May 12-June 23, Gallery C

ZOLLER GALLERY

Eliot Porter, photography, March 13-23
BFA Show, March 25-29
Contemporary Chinese Paintings, March 31-April 13

MFA Show, April 15-May 3
Annual Jured Student Show, May 6-25.

HAMMOND GALLERY

Photo exhibit of the architecture of William Wurster, through March 24.

SACKETT GALLERY

Student Architecture Projects, March 13-29

CHAMBERS GALLERY

College of Education 50th Anniversary Exhibition, March 11-29
Children's Art Exhibition, March 30-April 19
Art Education Undergraduate Exhibition, April 20-May 10.
John Wahling, textiles, and Jenny Floch, ceramics, May 11-22.

•Week of May 6-12

Monday, May 6

First day for signing NDSL (National Direct Student Loans), SEOG (Supplemental Educational Opportunity Grants), BEOG (Basic Educational Opportunity Program), and University Long Term Loans for Summer Term.
Preregistration for Fall Term, for those not attending Summer Term.
Sports: Men's tennis, vs. Lehigh, 3:30 p.m.
College of Health, Physical Education and Recreation faculty meeting, 7 p.m., Room 109 White.

Tuesday, May 7

Preregistration for Fall Term, for those not attending Summer Term.
University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.

Wednesday, May 8

Preregistration for Fall Term, for those not attending Summer Term.
University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.
Sports: Men's lacrosse, vs. Cortland, 7 p.m.
Commonplace Theatre, "Roaring 20's" 8 and 10 p.m., Room 112 Kern.
Noontime Concert, 12:15 p.m., lobby of Kern.

Thursday, May 9

ROTC Awards Day, 4 p.m., Ice Pavilion.
University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.
Preregistration for Fall Term, for those not attending Summer Term.
Grauate School — sponsored Thesis Workshop, 7:30 p.m., Room 101 Kern.

Friday, May 10

Free-UY Jammy, 7:30-11:30 p.m., HUB ballroom.
Last day for signing NDSL, SEOG, BEOG, and University Long Term Loans for Spring Term.
University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.
Preregistration for Fall Term, for those not attending Summer Term.
Commonplace Coffeehouse, 8 p.m., Room 102 Kern.
Artists Series, The Pittsburgh Symphony Orchestra and University Chorus, 8:30 p.m., University Auditorium.

Saturday, May 11

Artists Series, The Pittsburgh Symphony Orchestra and University Chorus, 8:30 p.m., University Auditorium.
Model Railroad Club Annual Auction, 2 p.m., Room 203 HUB.
University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.
Preregistration for Fall Term, for those not attending Summer Term.
Sports: Men's track, vs. Michigan Women's lacrosse, vs. Wilson, 1 p.m.

Sunday, May 12

Penn State Glee Club, 3:30 p.m., Schwab.
Sports: Men's baseball, vs. Colgate, 2 p.m.
Chapel Service, 11 a.m., Music Bldg. recital hall.
A Service of Music and Homily, the University Chapel Choir.
Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

•Week of May 13-19

Monday, May 13

Charles Metz, piano recital, 8:30 p.m., Music Bldg. recital hall.
Preregistration for Fall Term, for those not attending Summer Term.

Tuesday, May 14

Preregistration for Fall Term, for those not attending Summer Term.
College of Liberal Arts faculty meeting, 3:55 p.m., Room 121 Sparks.
College of Agriculture faculty meeting, 4 p.m., HUB assembly room.

Wednesday, May 15

Penn State Brass Chorus, 8:30 p.m., Music Bldg. recital hall.
Student preview of Jazz Dance Theatre in Concert, 8 p.m., Playhouse Theatre.
Preregistration for Fall Term, for those not attending Summer Term.
Sports: Men's baseball, vs. Indiana, Pa., 3 p.m.
Women's softball, vs. Ursinus, 3:30 p.m.
Noontime concert, 12:15 p.m., lobby of Kern.
College of Engineering faculty meeting, 4:30 p.m., Room 26 Min.Sci.

Thursday, May 16

Jazz Dance Theatre in Concert, 8 p.m., Playhouse.
Pre-registration for Fall Term for those not attending Summer Term.
Oliver LaGrone gallery talk and demonstration, noon, Kern Lobby.
College of Engineering faculty meeting, 4 p.m., Room 26 Min.Sci.

Jazz Dance Theatre, May 16-16, Playhouse

Friday, May 17

Teri Gemberling, piano recital, 8:30 p.m., Music Bldg. recital hall.
Jazz Dance Theatre in Concert, 8 p.m., Playhouse Theatre.
Folk and Square Dance Roundup, 7:30 p.m., North Gym, White.
Preregistration for Fall Term, for those not attending Summer Term.

Penn State Springboard and Tower Diving Clinic.

Saturday, June 1

Spring Term Commencement.

To make an appointment for the Heart Screening Examinations announced in last week's INTERCOM, call the Central Pennsylvania Heart Association of office, 238-1301. The exams, to be given March 26 and 27 and April 23 and 24 on the University Park campus, will provide information concerning the person's likelihood of developing coronary heart disease, based on a number of factors. These exams, while intended primarily for faculty and staff members and their families, will be given to anyone; a donation of \$3 per examination is asked.

"Getting Into College: Should Minority Groups Have a Better than Equal Chance?" is the subject of an hour-long "Advocate" special on the PBS network, airing on WPSX-TV, Channel 3. The "no" side maintains that quotas violate the fourteenth amendment to the Constitution, while the "yes" side argues that the quotas are necessary to correct the damage done by the 14th amendment in protecting the rights of the disadvantaged.

"Whales, Dolphins, and Men" is the subject of "Novel" Sunday, March 17, at 7:30 p.m. on PBS. The program is a documentary explores how whales and dolphins communicate with each other and how men are trying to communicate with them.

"The PBS Special of the Week" presents "The Whale" on the "Novel" Sunday of " " an hour-long documentary that looks at the first year of U.S. Army operation without a draft. Included is a comparison with the British system of raising voluntary army.

"The Curious Case of Vitamin E," a half-hour documentary about the medical and nutritional roles of vitamin E, is presented on "Today" on WPSX-TV, Channel 3 on WPSX-TV. Featured on the program are Adele Davis, well-known author and lecturer on nutrition and various physicians who discuss the pros and cons of vitamin E. Davis has even called the "wonder drug" of the 1970s.

(Continued from page one)

Thursday, March 21 — Black Cultural Center, 4 p.m., Rare Books Room, Pattee Library. Dr. Eugene D. Levy, Carnegie-Mellon University, on James Weldon Johnson.

Black Cultural Center — Smithsonian Travelling Exhibit on James Weldon Johnson, Black lawyer, politician, poet and diplomat. Continuing until April 9.

Sackett Gallery — Thirty student projects in beginning architecture course, continuing through March 29. Each Wednesday noon, discussions and demonstrations in gallery.

The H.U.B. Terrace Room has initiated daily menus for breakfast, lunch and dinner at prices aimed to keep both customers and caterers prices as low as possible. These reduced prices are: For the next week, the featured luncheon (all accompanied with baked ham, sliced turkey and beverages) are:

Monday, March 19 — dinner, broiled ham w/sauces and applesauce \$9.99, supper, Welsh rarebit w/str. beef \$11.99, lunch, grilled beef pattie \$9.99, beef w/noodles \$14.99.

Tuesday, March 20 — lunch, beef w/sauces and noodles \$10.99, dinner, franks and kraut \$9.99.

Wednesday, March 20 — lunch, meat platters w/bacon \$11.99, dinner, turkey ala king \$11.99.

Thursday, March 21 — lunch, beef w/sauces and noodles \$10.99, dinner, beef w/sauces and noodles \$11.99, hot beef sandwich \$11.49.

Friday, March 22 — lunch, egg cult/alm. soc. \$9.99, dinner, shrimp cocktail w/ macaroni & cheese \$11.99, shrimp \$13.99.

Mozart's popular romantic comedy opera, "Così Fan Tutte," will be performed by the talented Canadian Opera Co. twice on Saturday, March 16, at 3 p.m. and 8:30 p.m., in Schwab Auditorium.

"Così Fan Tutte" has become one of the standards for all opera companies because of its popularity, although it was not performed in this country until 1922, more than a century after it was composed.

The Opera company, which performed at

In conjunction with the exhibit of color photographic prints by Eliot Porter which will be on display until March 23 in the Zoller Gallery, the artist will hold an informal discussion of his work, some of which is done with the Sierra Club. The informal session will be held Wednesday, March 20, at 5 p.m. in the gallery, located in the Visual Arts Building.

Porter, a wildlife and nature photographer, has taken many color photographs, one of which, "In Wilderness is the Preservation of the World," gave the Sierra Club an international reputation.

The show has 60 photographs, 8 by 10-inch, obtained in Maine, Utah, Michigan, and other Eastern states.

Students majoring in music will give three recitals this weekend. Gwen Davey, M.F.A. candidate, will sing works by Handel, Buxtehude, Schumann, and Dvorak in a recital Friday, March 15, at 8:30 p.m.

Rebecca Ann Shaw, flutist, and Russel Shipley, clarinetist, in a recital Sunday, March 17, at 8:30 p.m., will include in their program a suite by Darius Milhaud, in which they will be joined by a woodwind quintet.

One of the features of the Berks Campus week-long "Salute to the Arts Program" will be the unveiling Sunday, March 17, of the sculpture of a dolphin, one of two to be placed on the roof of Reading's famous landmark, The Pagoda.

The Pagoda is a nationally registered historical site atop Mt. Penn, a good reproduction of Japanese pagodas. However, the structures in Japan are traditionally decorated with gilded dolphins, so citizens of Reading, reminded of this fact, campaigned to raise enough money to have two dolphins

The next Artists Series program will be given by the Alvin Ailey American Dance Theatre Saturday, March 23, at 8:30 p.m. in Rec Hall. Tickets will go on sale Wednesday, March 20, at 9 a.m. in the HUB.

And on Monday, March 18, Daniel Ragono, an undergraduate, will give a piano recital featuring sonatas by Prokofieff, Scarlatti, and Schubert, and three works by Chopin.

Wednesday March 20, Smith Toulson, clarinetist, will give a recital at 8:30 p.m. in the Music Bldg recital hall in which he will be joined by Steven Smith, Raymond Page, vocalist Karen Cain, William Dole and other members of the Claremont Quintet in music by Mozart, Vaughan Williams, Poulenc, Beethoven and Bartok.

Selected works of San Francisco Bay Area architect William Wilson Wurster, 1969 recipient of the profession's highest honor, the American Institute of Architects Gold Medal, will be on display until Mar. 24 in the Hammond Gallery, sponsored by the Department of Architecture. The photographic exhibit, which features 16 projects spanning a period of 40 years, was designed and produced by the California Redwood Association in honor of Wurster's life-long achievements.

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Division, 865-1387 (Network Line 475-1387). Do not contact the area having the vacancy. Applications will be accepted until: **5 P.M., Thursday, March 21, 1974.**

Funding Opportunities

MAY 14, 1974

(120-1) Information has been distributed concerning a new National Bureau of Standards (NBS) Fire Research Program which has a March

29, 1974 proposal deadline. NBS proposal solicitations include preliminary studies: (1) on the mechanism of flame retardants, (2) on the effect of smoke and its products on human behavior, (3) on the environment of a fire including the firefighter's

physiological responses, and (4) on the mechanisms of water extinguishment. Also solicited are research proposals (1) on the nature of smoke and aerosols resulting from fires, (2) on alarm and communication systems, and (3) on smoke movement and the development of models for design criteria. Model development proposals to predict the level of safety to life in a building equipped with "alter-

... **Curriculum Studies** — develop performance oriented curricula, and identify emerging occupations and basic skills for occupational cluster areas

... **Disadvantaged, Handicapped, and Minority** — improve their vocational education opportunities the image of vocational occupation to them, and provide a basis for improved access to those fields of employment.

... Alternate Work Experience Programs — Identify more creative approaches, improve satisfaction in work experience programs, clarify legal and other barriers, establish standards for programs and identify alternative programs and project cost benefits.

... Guidance, Counseling, Placement, and Student Follow-up Services — support applied studies

(120-2) The NSF grants proposals that design an experiment or package of experiments to test the usefulness of two-way cable communications for improving the delivery of local urban social services and the administration of local institutions such as school systems. The best designs will be selected for execution during a second phase. Full costs will be supported in both

VIDEO TAPE FACILITY
The Office of Student Affairs this week initiated a new service making use of Video Tape Network (VTN) films which will be shown at various "high traffic" areas such as the Hetzel Union Building, the Kern Graduate Commons, and the union buildings of the residence halls.

The first week's films are categorized as "entertainment." From March 16 to March 22, the documentary film will be "The Murder of Fred Hampton," which will be the subject of a panel discussion at the HUB, Wednesday, March 20. In the Colloquy series on "Politics and Justice," the film "The Politics of the

The system will ultimately have use not only for entertainment but for various educational purposes. VTN has films bearing directly on academic programs.

The Penn State Branch of the American Nuclear Society will be host to students from the Northeast U.S. March 21-23, at a conference that is viewed as a learning experience for the students attending, although many papers on current research will be featured. Along with the department of nuclear engineering, the ANS Student Section and the Atomic Energy Commission are sponsoring the meeting. The principal speaker will be Dr. Herbert C. Kouts, director, Division of Research, Safety and Research, Atomic Energy Commission, at the annual banquet Friday.

Two prints, "Luxembourg VII" and "Path III," by Harold Altman, professor of art at the University of Maryland, will be included in the Davidson National Print and Drawing Competition Exhibition at Stowe Gallery, Washington, D.C., on display March 17 to April 19. "Luxembourg VII" has been selected to receive the Jefferson-Pilot Corporation Purchase Award, and "Path III" the Knight Publishing Co. Award.

The department of Art Education will be providing eight art classes for children and teenagers during the Spring Term, ending Saturday at 8:45 a.m. beginning March 1. Enrollment has been underway for about a week and some classes may already be filled, but inquiry may be made by calling 865-6570, the same number to call for the roll. The classes include: arts and crafts, ages 6 and 7; drawing-paintings, ages 8 and 9; sculpture, ages 10 and 11; drawing and sculpture, ages 12 and 13; drawing and sculpture, ages 14 and 15; drawing and sculpture, ages 16 and 17; and drawing-painting, ages 18 and 19.

Responsible for the operation of the Coffee Shop, and for the supervision of banquets and catered events, as required. Responsible for monthly inventory of food items. Compiles monthly food costs. Associate degree in Food Service or equivalent with one to two years effective experience in food production and dining service.

of satisfying information needs of educational administrators, planners, and other users. The program will provide a basis for matching job requirements with skills, improve the accuracy of manpower projections, translate manpower forecasts, and find interlinkage for a vocational education and employment development groups. Additional announcements about these programs and submission dates and information is expected this summer.

(120-4) The 1973-74 Senior Fellowship
program of the National Endowment for the Humanities has a June 17, 1974 deadline. Matters of current national interest are stressed. Includes confessional studies. More traditional studies also of interest. Fellowships will be awarded to experienced writers, interpreters, scholars, in fields of languages; and experts in linguistics, literature, history, jurisprudence, philosophy, comparative religion, archaeology, arts, social sciences, and humanities. Stipends will be a minimum of \$1,500 per month for 6 to 12 months. Contact Division of Fellowships, NEH, 806 15th N.W., Washington, O.C. 20506 (202)362-5427

From fund for support of research, other creative work

Research initiation grants for 29 projects announced

Twenty-nine research initiation grants ranging from \$2,000 to \$6,500 have been awarded to University faculty members from a fund approved by President John W. Oswald for the encouragement and support of research and other creative work.

And ad hoc committee appointed by Dr. R. G. Cunningham, vice president for Research and Graduate Studies, consisting of Dr. Paul H. Rigby (chairman), Dr. E. R. Buskirk and Dr. E. L. Miller received 69 proposals. Those receiving grants include:

R. G. Anthony, Forest Resources, Accumulation of Heavy Metals and Characteristics of Muskrat Populations in Relation to Water Quality in Pennsylvania.

D. W. Arnett, Bioengineering, Prototype Model of the Mammalian Dorsal Lateral Geniculate Nucleus.

R. W. Christina, Physical Education, Proprioception Versus Motor Outflow in the Timing of Skilled Movements.

Frank Clemente, Sociology, Life Satisfaction of the Black Aged.

S. L. Dachter, Biology, Regulation of Enzyme Synthesis by Testosterone.

M. M. Dupuis, Special Education, The Close Procedure as a Predictor of Success in Reading Literature.

J. L. Farr, Psychology, The Effects of

Some Motivational and Personality Variables.

D. L. Garwood, Horticulture, Effects of Genetic Alterations in Maize (ZEA MAYS L.) on the Digestibility of the Grain.

H. L. Gilmore, Capitol Campus, An Empirical Research Study into the Quality Motivational Programs of Selected U.S. Consumer Product Manufacturing Firms.

D. W. Grouard, Landscape Architecture, The Development of Techniques and Policies which will Aid in the Reclamation and Reuse of Bituminous Strip Pits in Pennsylvania.

T. M. Joys, Microbiology, The Antigenic Specificity of *Salmonella* Flagella.

Daniel Katkin, Community Development, Use of Social Investigation Reports in Juvenile Court.

Jayne Kribbs, English, Bibliography of American Literary Periodicals from 1741-1850.

F. R. Kuss, Physical Education, Response of Certain Forest Symptoms to Recreational Use Intensities.

J. B. Li, Physiology at Hershey, Protein Turnover in Skeletal Muscle.

D. P. Madaci, Physics at Shenango Valley, Paramagnetic Defects in G.O.

R. J. Masters, Architecture, Developing a Space Description for Planning the Sequential Experience of Architectural Space Utilizing Computer Graphics.

R. D. Minard, Chemistry, Heteropolypeptides from Hydrogen Cyanide and Water.

D. A. Nelson, Mechanical Engineering, Radiation Properties of Atmospheric and Combustion Gases.

J. C. Olson and A. A. Mitchell, Marketing, Mass Communication Effects on Attitude Formation and Change Processes.

R. A. Pitts, Management Science, Internal Management of Multi-Business Firms.

D. M. Roberts, Educational Psychology, Investigation of the Reliability and Validity of Methods of Assessing Partial Knowledge on Multiple-Choice Tests.

Ravi Sehi, Computer Science, Machine Generation of English Text.

J. L. Sibert, Geography, The Impact of Mixed Land Use on Urban Property Values.

K. A. Thielen, English, Folklore Field Survey in Central Pennsylvania.

Henri Tinelli, French, Corsican Morphophonemics.

F. C. Trutt, Electrical Engineering, Non-linear Flux Plotting of Magnetic Fields in Electromechanical Energy Conversion Devices.

P. K. Warme, Biochemistry, Oxygen Binding to Semi-Synthetic Analogs of Myoglobin and Hemoglobin.

D. L. Webster, Anthropology, Archaeological Survey in the Lowland Maya Region of Mexico and Guatemala (Yucatan Peninsula).

Administrators

Dr. John L. Leathers, director of the Altoona Campus, has been appointed to the new position of Administrative Director of the Commonwealth Campus system, effective July 1. The post was created by the Board of Trustees in January, when academic and administrative responsibilities for Commonwealth Campus operation were consolidated in the office of the Dean of Academic Instruction for Commonwealth Campuses, who is Dr. Robert G. Quinn.

Dr. Leathers, who succeeded the late Robert E. Elche as director of the Altoona Campus in 1969, is a 1954 graduate of Clinton State College; he earned advanced degrees at Penn State. Before taking the Altoona post, he was assistant professor of psychology and chairman of the division of student personnel services at Muskingum College.

Dr. Harvey W. Well has been named director of the Division of Undergraduate Studies, which was established last fall as an academic unit to improve student advising and to enroll students unsure of their academic goals. The division will serve as a University-wide academic information and support system for student advising. Dr. Well, who has been serving as acting director of the Division, is also assistant professor of human development. He received all three degrees, in psychology, from Penn State. He has been a member of the staff since 1954, when he was appointed assistant to the director of the Division of Inter-mediate Registration.

Faculty Forum

The following "Comments for the Good of the University" were made by Murray S. Martin, associate director of University Libraries, at the University Faculty Senate meeting of March 5, 1974.

Today I am not speaking to you as a librarian, nor as an Administrator, but as a fellow senator and a member of your Curriculum Affairs Committee. You have today considered recommendations from that Committee on criteria for use in Undergraduate Program Review. One thing which we felt had to be included was called University Interaction. It included that very important matter of service courses.

It is one aspect of those service courses that I wish to bring before you today. Eons ago, or so it seems now, we agreed on some general baccalaureate degree requirements. Included among them were some knowledge of "communication" and "quantification." In practice, these terms mean a group of courses such as English 1, Speech 200, Math 61. This is the practical way of measuring whether students do indeed have some facility in writing, speaking and calculating.

The brute fact is that students coming into the University very frequently are unable to undertake any of these activities, certainly not with any high standard of accomplishment. It came as a shock to me to hear that as many as half the freshmen entering Commonwealth Campuses achieve scores on the English Placement Test which suggests failure. A similar situation exists in Mathematics. Recently I was informed that each year at least 400 students enrolling in Speech 200 have problems so severe that a simple conversation is a traumatic experience. Other conversations

have brought to my attention severe preparation deficiencies in Chemistry and Physics, while a colleague in one language department reported that, distressed by evident inability of students to construct sentences in that language, he offered one essay question in English, only to find that the students were equally unable to construct sentences in English.

This situation is not one of which we can be proud, nor is it one which we can blame on "them." Such deficiencies strike at the root of education. If I, may, for a moment, adopt my persona as librarian, I would have to say that I am equally concerned at the widespread bibliographic illiteracy evident on campus, and I refer not to difficulties with complicated bibliographic records, but the simple inability to read a catalog card or an entry on a list, to understand it or to transcribe it properly.

It is impossible to sweep an academic problem of such proportions under the rug, nor is it an adequate response to seek out scapegoats. This is not simply a matter for the Department of English or the Department of Mathematics. It is for the whole University. It is a situation that will not go away. In fact, it is likely to get worse. It must, therefore, be faced and a solution found. For years English has been operating a kind of clinic using resources that should go into other parts of the instructional program. The Department has reached the end of that road. It now proposes a 3-credit course, English II, since credits generate income. Mathematics, which has for some years taught Math 4, 5 and 10 as remedial courses, proposed Mathematics I to cover simple numerical skills.

Such proposals present your Committee with a nice academic problem. "Should credit be given for remedial work?" The answer "no" solves the academic conscience and keeps the catalog clean, but it does not provide the practical answer to the question "how are we to ensure a basic education for our students?" The course may not be of "University" level, though I have doubts that several other courses on examination would qualify any better. We are, however, committed to mass education, and the use of English, for example, is a basic, necessary skill. English II is therefore a practical alternative for a hard-pressed department which feels it will serve the University's mission better by seeking a positive way to help students than by taking a purist stance. Is it better simply to let students fail English I and in fact turn them away from the University, or perhaps, without telling, to lower the standards and let them through anyway, secure in the knowledge that for the most part they will then become another department's problems? When a de-

(Continued on page 16a)

Seek nominations for department head

The College of Agriculture is seeking nominations for the position of Head of the Department of Agricultural Economics and Rural Sociology. The incumbent, Dr. Lee Day, has asked to be relieved of administrative duties effective July 1, 1974.

The qualifications for the position include a Ph.D. in Agricultural Economics, Rural Sociology, or a closely related field, and demonstrated administrative ability.

The department is one of the largest in the College of Agriculture, having some 60 full-time faculty positions. Activities include resident instruction, extension education and research. Currently there are 68 candidates for M.S. and Ph.D. degrees, and there are about 80 four-year undergraduates and 40 two-year (associate degree in agricultural business) candidates.

Applicants for the position are asked to provide detailed biographical data and the names of three references when the nomination committee may contact.

Additional information regarding the position may be obtained from Dr. R. F. Hutton, chairman of the Screening Committee, Room 229 Agricultural Administration Bldg., University Park, Pa. 16802. Deadline for applications is April 15, 1974.

Burton S. Horne, professor of agricultural engineering extension, has been given the Merit Certificate Award of the American Forage and Grassland Council, for his contributions in support of grassland agriculture, by developing procedures to analyze the performance of forage harvesting equipment under field conditions. He was honored at the Council's Seventh Research and Industry Conference.

Mrs. Ruth Ann Wilson, assistant professor of clothing extension, was awarded second highest honor, in the form of a plaque, by the Men's Retail Association and Men's Fashion Association for her television program on men's fashion. The program, "Men's Fashion," Barbara Walters, WNBC, N.Y., was a feature presentation on men's winter fashions and how to economically update wardrobes. It was shown on the Farm, Home and Garden program, which is aired by WPXV-TV and two other educational television stations and four commercial stations in Pennsylvania. Film photographer and producer for the film portion of the program was Eugene Bentley, of the Philadelphia area, and president of the Pension Service. The award was given Feb. 8 in Dallas, Texas, where the associations were meeting.

Dr. Angelo C. Gillie, professor of vocational education, is the author of "Principles of Post-Secondary Vocational Education," a textbook published Feb. 1 by Charles E. Merrill Book Co. The book presents a comprehensive description of post-secondary vocational education and the training of the middle level worker and his occupational role in society.

A description of vocational education and its role in American education is provided in the first part of the book. An occupational core curriculum approach is described; such a program first provides broad preparation for a variety of jobs, followed by specific training after the student has accepted employment.

Dr. Gillie proposes that the "universal college," incorporating two-year colleges, vocational schools, and the last two years of high school, would benefit the prospective middle worker.

In addition, other considerations for the future include curriculum planning, assessing the need for present and new programs, coordination and articulation among private and public institutions concerned with vocational education, and the importance of institutional research in avoiding educational and vocational obsolescence.

A textbook, "Management: A Contingency Approach," published by Addison-Wesley Publishing Co., was co-authored by **Dr. Don Hellriegel** and **Dr. John W. Slocum, Jr.**, associate professor and professor respectively, of organizational behavior in the College of Business Administration. As the book's title suggests, the authors provide the student with a comprehensive systems approach to management in a contingency context, wherein management decisions are based on variables involved in a specific situation.

A new associate degree program in community service with emphasis in administration of justice is being offered jointly this Spring by the Berks Campus and Lebanon Valley College.

In anticipation of the joint Institutional arrangement, classes began last September with over 40 students enrolled from the Lebanon area.

Courses in the field of administration and justice will be taught by Penn State personnel, according to William Solley, assistant professor of criminal justice at Berks, while Lebanon Valley faculty will handle classwork in the liberal arts area.

The administration of justice program designed to train and upgrade career and in-service personnel in police departments, probation and parole agencies, correctional institutions, and district magistrate offices.

At its meeting last weekend in Hershey, the Board of Trustees took the following actions:

Approved a cooperative arrangement between Gettysburg College and the University for a liberal arts and engineering degree program, to become effective with the Fall, 1974, Term. Students will spend three years at Gettysburg enrolled in liberal arts and pre-engineering courses in the basic sciences, then two years at Penn State in the specific engineering field. Baccalaureate degrees will be conferred by both institutions upon successful completion of the five-year program. Similar programs are already carried out with nine other colleges.

Approved a University-wide graduate program for dual title degrees in operations research. The program provides recognition for graduate students who have completed a planned course of training in op-

(Continued from page one)

partment which offers required service courses is operating on a fixed, finite budget, its options are severely limited. Drawing teaching time away from regular instruction is not the answer. Some reorganization of priorities is needed and the department can make a contribution, but a greater University-wide commitment is needed too, including a recognition that adequate budgetary support must be provided to cope with the results of a basic policy decision.

If we are committed to offering our students the best education possible, we must find a more satisfactory solution than the extensive use of remedial courses.

As a faculty we are prone to say that we can make only academic decisions, but we also want to have some say in the administrative decision-making process. We say that we cannot influence, cannot interfere with the academic prerogatives of an

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Division, 865-1387 (Network Line 475-1387). Do not contact the area having the vacancy. Applications will be accepted until 5 p.m., Thursday, April 4, 1974.

FOREMAN — SERVICE DESK DISPATCH (EVENING), PHYSICAL PLANT — University Park

Responsible for supervision and coordination of the activities of the Service Desk and service workmen during the evening shift. Associate degree or equivalent technical training in the mechanical trades and two to four years effective experience in mechanical construction and maintenance work.

MANPOWER AND INFORMATION SPECIALIST, STUDENT AFFAIRS —
University Park

Responsible to collect, analyze and interpret information relating to local, regional and national manpower needs for college graduates and the relationships to academic programs offered at Penn State; assist with the development of manpower needs programs, information, delivery system, and related academic programs.

Instruction—Research—Continuing Education—Fellowships

March 21, 1974

(121-1) Contract proposals for the design of a study of undergraduate preparation of U.S. education personnel are being solicited from qualified organizations by the OE's National Center for Educational Statistics (NCES). The Center wants to improve the base for data systems regarding teacher education, and to contribute to more effective planning and policymaking. The contract work will include a survey and case study design, a pilot survey design including an OMO approval package, and the conduct of a pilot survey with preliminary case studies. The project period is 24 months at a live man year level. The RFP due date is April 8, 1974.

(112-1) Applicants are being accepted by the Office of Education under its **Library Resource and Demonstration Program** for grants relating to the development of library training programs for training for librarians. Special consideration will be given to proposals dealing with (1) activities designed to improve the training of librarians and librarianship in the United States; (2) the needs of communities into new patterns of service emphasizing target groups such as the employed, undereducated, or culturally isolated groups; (3) the development of new techniques and resources; (3) studies assessing the above activities needs; (4) studies developing new techniques for the above activities; and (5) investigation of the needs of communities into new patterns of service emphasizing target groups such as the employed, undereducated, or culturally isolated groups. Applications must be received by April 8, 1974. Also accepted with the same deadline date are library training fee and travel grants. These grants are normally awarded to institutions with ALA accredited library training programs.

(121-3) In order to make competition more equitable for all applicants, the National E

erations research as an option in approved graduate programs. Nineteen graduate programs in eight colleges have been approved for participation in the operations research program, which is to be managed by an eight-member faculty.

Approved dates of Board meetings during 1975: Jan. 17-18 at University Park; March 14-15 at Hershey; May 29-30, July 18, Sept. 12, and Nov. 7, all at University Park.

Approved final plans for multi-purpose buildings for the Altoona and Schuylkill campuses; both are G.S.A. projects. Also approved paving or construction of parking areas at University Park, Hazleton, Wilkes-Barre, and Worthington Scranton campuses.

Approved of the hiring of an engineering firm to conduct a study of the main power plant at University Park, especially concerning the plant's needs for the future.

Individual dialogue or of a Department yet by not making decisions outside "our own field," however we define that, we do make decisions, even by the simple act of not deciding. We need also to say that the "academic" concern is not an "academic," that we are not charged with implementation, which is an administrative concern. If, however, we believe in the validity of our academic judgements how can we fail to be concerned in the matter of their implementation. Moreover, such a concern carries with it a need to be concerned with the future of the library as well as at the root of our failure to grapple with governance. I am reminded of the statement from a recent Cornell Library report, which stated flatly that the library staff had reached the end of its ingenuity in dealing with budget cuts and wanted desperately alternative suggestions and that no member of the staff said you cannot do it, someone else said you cannot do it, but also an abrogation of authority, to pass the problem on to "them" whether

providing consultation to other University divisions when requested; conducting follow-up studies of Penn State graduates. Master's degree in economics with emphasis in labor relations; 10 years experience in labor relations, counseling, communications or equivalent and two to four years experience in manpower planning information delivery systems, or career information.

Responsible for a variety of accounting functions with emphasis on Accounts Payable and Property Accounting. Bachelor's degree in Accounting or Business Administration or equivalent and two to three years effective experience.

In addition to the above vacancies, certain positions frequently become available because of the number of employees in them. They are listed below and will not be listed on an individual basis. Application for such positions may be made at any time and your interests may be made known now to the Employment Division for future consideration when vacancies occur. These positions are:

ASSISTANT FOOD SUPERVISOR, HOUSING & FOOD SERVICE

Applications for certain vacancies are considered without regard to race, creed, sex, or national origin.

Scientist — Fellow Program must be submitted before April 5, 1974. Stipends of more than \$12,000/year will be granted according to experience and number of dependents. Further information is available from: Dr. R. A. Scribner, Director, American Association for the Advancement of Science, Congressional Scientific Fellow Program, Dept. T, 2776 Massachusetts Ave., N.W., Washington, D.C. 20036.

(112) The National Institute of Mental Health (NIMH) has announced the availability of grants for **Mental Health Categorical Training Programs** for 1974-1975. Applications for these grants must be submitted by **April 1, 1974**. For contacts for specific application procedures for each program are: Psychiatry Training Center, Walter W. Shervington (301)443-2126; Behavioral Science Training Center, Robert L. Spitzer (301)443-3136; Work Training Center, Milton Wiltman (301)443-4187; and Psychiatric Nurse in Training Center, Mrs. Theklaugh Dumas (301)443-4423. The mailing address for all correspondence is: **NIMH, P.O. Box 12000, Bethesda, Md. 20812**. **5000 Flaxers Lane, Rockville, Md. 20850**. **FFY1973 carry over applications** which have been recommended for approval will be included in **FFY1974 funding competition**. **Conferences** will also be held in **Rockville, Md. on April 1, 1974**, deadline date.

Dr. John D. Lewis, as visiting professor of political science, for the Fall, 1970, Term. He is professor emeritus of political science at Oberlin College, having served as its 11th president from 1957 to 1970. He has taught at Oberlin from 1935 to 1970.

Dr. George G. Wilson, as professor of education, effective with the Summer, 1974, Term. He has been head of the education area at the University of Iowa for the past 12 years.

Dr. Maurice Gross, as adjunct professor of chemistry, effective with the Summer, 1974, Term. He is a member of the faculty of the University of Strasbourg, France, and his appointment initiates an arrangement under which he will make two-week visits to University Park several times each year to collaborate with Dr. Joseph Jordan, professor of chemistry, in the study of chemical reaction modeling project, trying to chemically simulate important life processes. A grant from NATO is supporting the studies.

University Calendar

March 21-31, 1974

Special Events

Thursday, March 21 — Labor Studies Club and USG Dept. of Labor, 10:30 a.m.; HUB assembly room, films; noon to 3 p.m., HUB ballroom, workshops; 3:30 p.m., talk by Michael Johnson, Penna. AFL-CIO, HUB ballroom.

Thursday, March 21 — Colloquy lecture, Robin Morgan, feminist editor, on "Feminist Tactics," 8 p.m., HUB ballroom.

Friday, March 22 — Army ROTC Dinner-Dance, 7 p.m., Elks Country Club.

Friday, March 22 — Folk and Square Dance Roundup, 7:30 p.m., North Gym, White.

Friday, March 22 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday, March 22 — Colloquy lecture, Daniel Ellsberg, on "The Pentagon Papers and Beyond," 8 p.m., Rec Hall.

Saturday, March 23 — Artists Series, Al-

vin Ailey City Center Dance Theatre, 8:30 p.m., Rec Hall.

Sunday, March 24 — Ernie Headley cello recital, 3:30 p.m., Room 112 Kern.

Sunday, March 24 — Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Richard R. Hicks, United Ministries in Higher Education, Richmond, Va.

Sunday, March 24 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Monday, March 25 — Yasuko Koya Ohmoto, organ recital, 8:30 p.m., Music Bldg. recital hall.

Monday, March 25 — Department of Recreation and Parks Banquet, 6:30 p.m., Elks Club. Dr. Max Kaplan, University of South Florida, speaker. Open to the public.

Tuesday, March 26 — G.S.A. resume and vita workshop, 7:30 p.m., Room 101 Kern.

Tuesday, March 26 — "Crossroads," Lenten Meditations, 12 noon and 12:35 p.m., Eisenhower Chapel. The Rev. Don Davis on "The Campus at the Crossroads," and Debra Fatula, soloist.

Wednesday, March 27 — Noontime concert, 12:15 p.m., lobby of Kern.

Thursday, March 28 — Nutrition Clinic Workshop, "Mothers, Fathers and Babies," 8 p.m., Room 101 Kern.

Thursday-Saturday, March 28-30 — Eco-Action Student Environmental Conference.

Thursday, March 28 — Returning Student Women, 7:30 p.m., lounge, Eisenhower Chapel. Dr. Helen Meahl, sociology, on the subject of changing family roles and family conflicts. Open to the public.

Friday, March 29 — P.S.U. Symphony Orchestra, 8:30 p.m., Schwab.

Friday, March 29 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday-Saturday, March 29-30 — Sports: Penn State YMCA swimming championships, Naticum.

Saturday, March 30 — Artists Series, Preservation Hall Jazz Band, 8:30 p.m., Rec Hall.

Saturday, March 30 — Sports: Men's lacrosse, 2 p.m., football practice field.

Sunday, March 31 — Cheerleading squad tryouts, 5-11 p.m., HUB ballroom.

Sunday, March 31 — Sharon Brook, piano recital, 3:30 p.m., Music Bldg. recital hall.

Sunday, March 31 — Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Douglas Akers, United Methodist Church, Dallas, Pa.

Sunday, March 31 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Seminars

Thursday, March 21 — Agronomy, 3:30 p.m., Room 3012 Ag. Adv. J. B. Powell, research geneticist for Plant Genetics and Germplasm Institute, on "Morphological and Anatomical Considerations for improved Degradation of Plant Tissue by Rumens Microorganisms."

Thursday, March 21 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Robert Amero, Gulf Research and Development Co., Pittsburgh, on "Transportation Fuels and Source Emissions."

Thursday, March 21 — Chemistry, 12:15 p.m., Room 310 Whitmore. William J. Ray, Purdue University, on "Mechanism of Phosphoglucomutase Action."

Thursday, March 21 — Physics, 3:35 p.m., Room 117 Osmond. Daniel Zwaniger, Courant Institute, New York University, on "Theory and Practice of Magnetic Monopoles."

Thursday, March 21 — Philosophy, 4 p.m., Room 231 Willard. Dr. James Morrison, University of Toronto, and Dr. Alfonso Lingis, on "The Relation of Husserl and Heidegger."

Thursday, March 21 — Black Cultural Center, 4 p.m., Rec Books Room, Pattee Library. Dr. Eugene D. Levy, Carnegie-Mellon University, on "James Weldon Johnson: Black Leader, Black Voice."

Thursday, March 21 — Anthropology, 3 p.m., Room 107 Social Sciences. Dr. Warren T. Morrill, on "Cognitive Anthropology: God's Truth."

Monday, March 25 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Robert Spotts, on "The Biomechanical Concept."

Monday, March 25 — Inter-Science, 4 p.m., Room 310 Whitmore. Dr. Matthew W. Scharff, cell biology, Albert Einstein College of Medicine, on "The Synthesis and Assembly of House Immoglobins: A Biochemical and Genetic Approach."

Monday, March 25 — Computation Center, 7:30 p.m., Room 110 Osmond.

Monday, March 25 — Analytical Chemistry, 1 p.m., Room 333 Whitmore. Dr. Peter Gund, Merck, Sharpe & Dohme Co., on "Computer Graphics Applications in Chemistry and Biology."

Monday, March 25 — New Communities, 2-5 p.m., Room 322 Sackett. Drayton S. Bryant, community planning and housing

consultant, on "Low and Moderate Income Housing in New Communities."

Monday, March 25 — Genetics, 3:55 p.m., Room 111 Tyson. James Hoerter, biology, on "Gene Dosage Effects on the Expression of Pigmentation in the Axolotl."

Tuesday, March 26 — Operations Research, 3:45 p.m., Room 267 Willard. Dr. Micha Hori, computer science, on "Markov Chain Analysis of a Multiprogramming Queue."

Tuesday, March 26 — College of Health, Physical Education and Recreation, 2 p.m., Room 101 Kern. Dr. Max Kaplan, director of Leisure Studies Program, University of South Florida, on "The Significance of Leisure in Future Perspective."

Tuesday, March 26 — Astronomy, 4 p.m., Room 445 Davey. Allen Parks on "Electron Impact Excitation Cross Sections and Rates for the Isolelectronic Series at Helium and Other Light Elements."

Wednesday, March 27 — Two Cultures Dialogues, 12:30 p.m., Room 159 Materials Research Lab. Dr. E. A. Vastyan, Hershey Medical Center, and Dr. Joseph Kockelman, philosophy, on "Value

Considerations in Engineering and Technology."

Thursday, March 28 — Chemistry, 12:45 p.m., Room 310 Whitmore. John Deutsch, M.I.T., on "Aspects of the Hydrodynamic Behavior of Macromolecules in Solution."

Thursday, March 28 — Agronomy, 3:30 p.m., Room 301B Ag. Adv. R. Sidle on "Heavy Metals Application and Plant Removal in the Wastewater Renovation Project."

Thursday, March 28 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Lester Hoei, civil engineering, Carnegie-Mellon University, on "Technological and institutional Innovation for Improving Urban Transportation."

Thursday, March 28 — Engineering Acoustics, 4 p.m., Room 71 Willard. Mahlon D. Burkhardt, Industrial Research Products, Inc., Elk Grove Village, Ill., on "Hearing and Acoustics."

Thursday, March 28 — Remote Sensing, 1 p.m., Room 225 Elec. Eng. West. L. Edwin Link on "Simulation Model for Optimization of Remote Sensor Data Acquisition."

Exhibits

(Tours of the Museum of Art are conducted each Thursday at 1:30 p.m., with volunteer guides familiar with the current exhibits.)

Museum of Art — Charles Sheeler: The Works on Paper, Gallery A, through March 24. Eighth Dublin National Print and Drawing Competition Exhibition, Gallery B. Selections from the Permanent Collection, Gallery C.

Zoller Gallery — Eliot Porter, photography, through March 23. BFA Show, March 25-29. Contemporary Chinese Paintings, opening March 31.

Kern Gallery — Juried student photography prints, through March 30. Lee Ann and Dennis Kennedy, pottery.

Sackett Gallery — Student architecture projects, through March 30. Each Wednesday noon, discussions and demonstration in gallery.

Chambers Gallery — College of Education 50th Anniversary Exhibition, through March 29. Children's art exhibition, opening March 30.

Black Cultural Center — Smithsonian Traveling Exhibit on James Weldon Johnson, Black lawyer, politician, poet and diplomat.

Color photo by Eliot Porter, of birch trees, is one of features of exhibit in Zoller Gallery, closing Saturday.

Films

Thursday-Saturday, March 21-23 — USG films, "What Do You Say to A Naked Lady?" 6:30, 8:15 and 10 p.m., HUB assembly room.

Saturday, March 23 — Free-UC children's films, "Make Mine Music," 12:30 and 2 p.m., HUB assembly room.

Monday, March 25 — Graduate Commons America Film Series by Alistair Cooke, "America: The First Impact," 12:05-1 p.m., Room 112 Kern.

Wednesday, March 27 — Commonsplace Theatre, "Treasure of Sierra Madre," 8 and 10 p.m., Room 112 Kern.

Meetings

Thursday, March 21 — College of Engineering faculty meeting, 4 p.m., 26 Min. Sci. Room.

Wednesday, March 27 — Academic Assembly, 7:30 p.m., Room 351 Willard.

Mondays — USG Senate, 7:30 p.m., HUB assembly room.

Mondays — OTIS, 6:30 p.m., Room 203 HUB.

Tuesdays — A.R.H.S., 7:30 p.m., Room 203 HUB.

HUB specials

The H.U.B. Terrace Room has initiated daily special meals for both lunch and dinner at prices much below customary cafeteria prices also carries. No substitutions are permitted to benefit from these reduced prices. For the next week, the features (all accompanied with appropriate side dishes and beverages) are:

Sunday, March 24 — dinner, roast pork w/d., \$1.99; supper, tuna potato chip casserole, \$1.59.

Monday, March 25 — lunch, chili con carne, \$79; dinner, spaghetti w/meat sauce, \$1.59.

Tuesday, March 26 — lunch, chicken chow mein/ rice, \$93; dinner, lamb hot pot, \$1.43.

Wednesday, March 27 — lunch, Welsh rarebit w/ris., \$1.16; dinner, conch bowl a cabbage, \$1.69.

Thursday, March 28 — lunch, lasagne, \$1.11; dinner, meatloaf, \$1.59.

Friday, March 29 — lunch, fish cakes, \$1.22; dinner, French fried onions, \$1.49.

Saturday, March 30 — lunch, beef steak w/onions, \$.99; dinner, Maryland chicken pie, \$1.59.

Dance company

The Alvin Ailey City Center Dance Theatre company will serve a dual purpose in its three-day residency on campus this weekend (March 21-23).

Featured on the Artists Series Saturday at 8:30 p.m. in Rec Hall, the company is also here to take part in technique classes in intermediate and advanced levels for both jazz and modern dance Thursday and Friday. Master classes are scheduled for the evening hours.

The Alvin Ailey company, formed in 1958, made a highly successful European tour in 1970 that included six Russian seasons, a two-week London stop, and a guest engagement at the International Festival of the Dance in Paris. In 1972, after sell-out engagements at the City Center 55th St. Theatre, the company became a constituent of the City Center of Music and Drama. Inc.

Ailey, whom Walter Terry of "Saturday

Review" called "one of America's most experienced, most successful and most honored dance leaders," did the choreography for the staging of Leonard Bernstein's "Mass."

Tickets for the performance Saturday evening are currently on sale at the HUB.

Following this dance performance, the Artists Series will feature the Preservation Hall Jazz Band, Saturday, March 30, also in Rec Hall. Tickets will go on sale for performance Wednesday, March 27.

Lectures

Thursday, March 28 — S&H Environmental and Energy Policy Lecture, A. Myrick Freeman III, Bowdoin College, on "The Role of Benefits in the Analysis of Water Pollution Control Policy," 8 p.m., Keller Conference Center.

Chapel addition plans receive approval

CHAPEL ADDITION — This model drawing of the Helen Eakin Eisenhower Chapel shows the addition, at the left (west) end of the building, the sketch plan for which was approved by the Board of Trustees at its meeting last week. The addition will include meeting rooms, offices, a lounge area, and a multipurpose room below ground in the courtyard area. Funds provided by gifts from friends of the Eisenhower family will be used in the construction. The existing building was constructed nearly two decades ago; it was named for the wife of the president of the University from 1950 to 1955.

MRL to sponsor art purchase program

The Materials Research Laboratory, with assistance from the Penn State Foundation, is once again sponsoring an exhibition and purchase program in the arts, inviting artists to submit sculptures, paintings, collages, original graphics, creative photos, and works in mixed media to be exhibited and judged.

The theme of the exhibition, to be hung during the Central Pennsylvania Festival of the Arts, July 11-14, is "Beauty in Science, Science in Art." It is part of M.R.L.'s continuing interest in the meeting between science and engineering on the one hand and arts and humanities on the other.

Artists planning to submit works are asked to provide a notice of their intention by May 15 and submit the work by June 15.

The jury will include William Hull, the

University's director of exhibitions; Charles Lupton, executive director of the Penn State Foundation; George L. Maurer, professor of art history; Robert Gray head of the department of art; Rustum Roy, professor of the solid state and director of M.R.L.; Heinz K. Henisch, professor of physics and associate director of M.R.L.; and C. Mitze, National Endowment of the Arts.

All accepted work will be displayed in the exhibition. Leading entries may be purchased, although the jury is not obliged to recommend the purchase of any items. Honorary prizes will be awarded to the best three entries, however.

The exhibition, it is pointed out, will concern itself with works of art based directly or indirectly (but somehow recognizably) on scientific forms and concepts.

Report on China trip March 25

A report to the University community by some of those who made the recent trip to China will be made Monday, March 25, at 7:30 p.m. in Room 112 Kern Graduate Building. The meeting is open to the general public.

With Dr. Stanley F. Paulson, dean of the College of the Liberal Arts, acting as moderator, President Oswald and five others will give short talks, and a question and answer period will follow.

President Oswald will discuss "The Organization and Control of Higher Education in China." Other talks are titled:

"Political Trends in China," by Dr. Parris H. Chang, associate professor of political science.

"Living Standards of Chinese Workers and Peasants," by Dr. Jan S. Prybyla, professor of economics.

"Land Utilization in North China," by Dr. Alan Rodgers, professor of geography.

"Science and Technology in China," by Dr. Thomas Wartik, dean of the College of Science.

"China and the Soviet Union," by Dr. V. Aspaturian, Evan Pugh Research Professor of Political Science.

The Arts: exhibits, music

A cello recital, organ program, and piano performance will be given within the week by music students. Erin Headley, graduate student, will give the cello recital Sunday, March 24, at 3:30 p.m. in Kern Auditorium. Undergraduate Yasuko Koya Ohmoto will give the organ program Monday, March 25, at 8:30 p.m. in the Music Building. And Sharon Brook, graduate student, will give the piano recital Sunday, March 31, at 3:30 p.m. in the Music Building. All events are open to the public.

Oil paintings by Stephen DeSanto, currently a senior student at Huntingdon (Ind.) College, will be displayed in the Kern Graduate Commons until March 30. The paintings are mostly in a flat, realistic style, done on masonite panel, somewhat in the Wyeth style, bordering on monochromatic. DeSanto, who has exhibited in many

juried shows, has also studied at Long Haven State College, Sterling (Kan.) College, and Nottingham College of Education, in England.

When the University Symphony Orchestra gives its concert Friday, March 28, in the Schwab Auditorium (at 8:30 p.m.), two young soloists, a pianist and a soprano vocalist, will be featured, both winners of the Young Artists competition staged by the department of music last fall. Mike Chubbuck, soprano in music, will perform Beethoven's "Piano Concerto No. 1" and graduate student Shirley Fease Donovan will sing "Salce" and "Maria" from Verdi's "Otello." The orchestra, directed by Dr. D. Douglas Mills will play Dvorak's "New World Symphony" and Rimsky-Korsakov's "Russian Easter Overture."

CC officers attend conference

About 80 Commonwealth Campus administrative and chief academic officers took part in a conference this week at University Park on the role and importance of scholarly and creative activity.

The conference is the third in a series of annual meetings, the first of which focused on a review of the University's academic policy plan and organizational structure for

Commonwealth Campuses. Chief academic officers last year visited the campuses in a group as a means of improving communications and their knowledge of the campus system.

At the conference this week, a subcommittee of the Council of Academic Deans presented two working papers, and panel and general discussions were held.

News in brief

CONCERT BLUE BAND

The Penn State Concert Blue Band is preparing for a two-day tour of the Milliford-Pottsville-Sunbury-Selkingsgrove areas to give four concerts April 6-9. Also, on April 28, the band will give its annual spring term concert in Schwab Auditorium at 3 p.m.

LEISURE TIME

"The Significance of Leisure in Future Perspective" is the title of a colloquium talk to be given by Dr. Max Kaplan, director of the University of South Florida's Leisure Studies Program Tuesday, March 26, at 2 p.m. in Room 101 Kern. He will also be the banquet speaker, the evening before, for the Department of Recreation and Parks. Banquet tickets, priced at \$5 for students and \$6 for faculty and alumni, may be purchased at Room 257 Rec Hall. (Call 865-1851 for more information. Friday, March 22, at 5 p.m. is the ticket deadline.)

AMERICA FILM SERIES

The Alistair Cooke "America Film Series" will be shown weekly at the Kern Graduate Building (Room 112) from 12:05 p.m. to 1 p.m. The first film, "America: Making a Revolution," was shown Monday.

"America: The First Impact" is the second in the series and it will be shown Monday, March 25. This is Cooke's tribute to the things which have appealed to him most in America's past. New England foliage, New Orleans jazz, San Francisco, and H. L. Mencken.

The series will continue through May 20.

HIGHLIGHTS FILM

The film of highlights of Penn State's 1973 football season, titled "A Perfect Season — Penn State Football '73," is available for group showing, and student and faculty groups may obtain a copy for use without a charge (a service charge of \$10 is usually made). The film, which is narrated by ABC-TV announcer Chris Schenkel, may be obtained by faculty or student groups through the Athletic Department, Room 235 Recreation Building, 863-0351.

BUS FARES

This week riders of Campus Loop buses learned that they will in the future have to have the exact fare to ride the buses; no change will be available from drivers. The policy was instituted because drivers were occupied so much with making change, they had a hard time making their schedules. Also, it was announced that the Inner Loop buses will operate on a longer schedule, but the Mini-loop will not be in operation. Instead, an additional bus will be added to the Inner Loop as needed.

SCHOLARSHIP ADDED

The Southern Education and Production Region of Shell Oil Co. has established a scholarship at Penn State in the field of petroleum engineering. Amounting to \$750 annually, the scholarships will be awarded on the nomination of the department of petroleum and natural gas engineering.

UNIVERSITY COUNCIL

At its meeting March 14, the University Council agreed to ask the University Faculty Senate to move as quickly as possible in the establishment of a permanent subcommittee to develop comprehensive policy statements on evaluation of courses, programs and instructors.

The council also asked that a study be made of the travel habits of faculty and students that might lead to establishment of direct air travel between University Park and several major cities in the East.

ALTOONA PROGRAMS

The Student Affairs office at the Altoona Campus has scheduled a series of cultural events for the near future: a program of modern dance by the Penn State Contemporary Dance Co., Thursday, March 28, at 8 p.m.; a print exhibition by Bruce Shoben, March 30-April 14, at the Ivy-side Gallery; and a performance by the Alpha-Omega Players of Mark Twain's "The Diary of Adam and Eve," Thursday, April 4, at 8 p.m. An additional special event is a talk by Gregory Strong, of the U.S. Dept. of State, who will discuss the current Mid-East situation Monday, March 25, at 7:30 p.m.

BEHREND PLAYERS

John Guaré's "The House of Blue Leaves" will be performed by The Behrend Players May 2, 3, 4, 8, 9, 10 and 11 at the Behrend College Studio Theatre. The play, which opened off-Broadway in 1971, earned both the Ohio and New York Drama Critics Circle Awards.

CHILDREN'S GAMES

Games and gymnastics classes for kindergarten-fourth grade children of University Park and state members and other area residents will be offered again by the College of Health, Physical Education and Recreation in the White Building facility.

The classes will meet Thursday afternoon from 4:00 p.m. to 5:00 p.m., beginning March 28 and continuing through May 16.

Registration will be held on the first day of the class in White Building at the South Gym.

DELAWARE AND EXORCISM

A talk on "Exorcism" will be given at the Delaware County Campus tomorrow (Friday, March 22) by Father Eugene B. Gallagher, S.J., who is a lecturer and teacher at Old St. Joseph's National Shrine, Philadelphia. While professor of theology at Georgetown University in 1950, he was a teacher of William Peter Blatty, who wrote the film version of the book, "The Exorcist."

DELAWARE SERIES

The new District Alumni Club in the area of the Delaware County Campus is cooperating with the Campus in a series of community lectures on subjects of public interest, the first of which is to be given today (March 21) by James L. Everett, president of the Philadelphia Electric Co., who will discuss "The Energy Crisis." Everett, class of 1950, earned both bachelor's and master's degrees at Penn State. He began as a junior engineer at the company, was named the executive vice president in 1968, and was elected president in 1971. He has been honored on many occasions, receiving the University's "Distinguished Alumnus Award" in 1971.

NUTRITION WORKSHOPS

Two nutrition workshops, sponsored by the Penn State Nutrition Clinic, will be conducted on the University Park campus the near future. Thursday, March 28, 8 p.m. in Room 101 Kern, a workshop "Mothers, Fathers and Babies" will discuss topics as normal nutrition during pregnancy, breast feeding and bottle feeding, and food for the infant. The second clinic, to be held April 4, will be "Weight Control: The Vicious Cycle."

TRANSPORTATION SEMINARS

The seminar series, "Urban Transportation and Air Pollution Control," continues today (March 21) with Robert Ameri, Sr., Research and Development Co., speaking on Transportation Fuels and Source Emission. Held each Thursday, the seminars meet during the fifth period (2:20 to 3:50 p.m.) in Room 112 Kern, and they are open to the public.

ARTISTS SERIES

The Artists Series has scheduled an additional event for the current term: a film version of Chekhov's "Uncle Vanya" the production of the Chichester Festival Theatre by Sir Laurence Olivier. Tickets on sale April 2 and 3, will be 50¢ for students and \$1.00 for non-students. If any tickets remain after the HUB they will be available at the door. Schwab Auditorium on the night of performance.

CHANGING FAMILY ROLES

Dr. Helen Meahl, assistant professor of sociology, will discuss changing family roles and family conflict at a meeting of the newly-organized group, Returning Student Women, Thursday, March 28, at 8 p.m. in the Helen Eakin Eisenhower Building. Anyone interested in the subject may attend the meeting.

PENNSYLVANIA RUGBY

The Penn State Rugby Football Club has opened its Spring season and will next in Pittsburgh and at Villanova. Next home contests, when the B and C teams will play Franklin and Marshall, will be held Saturday, April 6, at the Rugby field east of the Flower Gardens. Players are always welcome; practices are held Tuesdays and Thursdays at 5 p.m.

A variety of activities from dance to pottery

East Asian Festival in April spotlight

An East Asian Festival, sponsored generally by the East Asian Subcommittee and the East Asian Study Society during the month of April, will be highlighted by an art exhibit and lecture, an evening of Asian dance, a talk on Japanese porcelain potters, a lecture on Chinese land programs, and two Japanese films.

"Contemporary Chinese Painting and Calligraphy," an exhibit sponsored by the Yale-in-China Association and featuring works of the fine arts faculty at New Asia College in Hong Kong, opens April 1 at the Zollner Gallery, continuing through April 13. In connection with the exhibit, Walton

J. Lord, associate professor of art history who is serving as coordinator for the exhibit, will give an illustrated lecture in the Gallery at 8 p.m., Thursday, April 4. Lord points out that the exhibit includes works by artists who, though born in this century, work in traditional styles and by other contemporary artists whose paintings show marked European expressionist influence, while drawing on traditional Chinese themes. Others have abstract themes, but, Lord notes, the Chinese have been doing abstract paintings since the 13th century.

Thursday, April 11, three professional

dancers — from Korea, China, and Japan — will demonstrate folk, theatrical, court, and religious dances in an "Evening of Dance" at 8:00 p.m. in Room 112 Kern. The Institute for the Arts and Humanistic Studies is also a sponsor of this event.

Dr. Kenneth R. Beitler, professor of art education, will describe and demonstrate the techniques he learned from traditional potters of Japan. The lecture is scheduled for Wednesday, April 24, at 8 p.m. in Room 101 Kern.

Dates and times for other events planned will be announced later.

Retirees obtain increased benefits in SERS changes

On March 1, 1974, Governor Shapp signed legislation which provided sweeping changes in the State Employees' Retirement System including substantial increase in the monthly retirement benefit for members who retired on or before June 30, 1972. A fact sheet summarizing the changes is being distributed to all faculty and staff members who are members of the State Employees' Retirement System. The major changes in the plan were outlined in the February 14, 1974 issue of INTERCOM.

Each retired member who is eligible for a pension increase will receive his or her increased monthly amount beginning with the July, 1974 retirement check. The percentage which is to apply in the determination of the increase shall be determined on the basis of the effective date of retirement as follows:

EFFECTIVE DATE OF RETIREMENT	PERCENTAGE INCREASE FACTOR
July 1, 1971 — June 30, 1972	5%
July 1, 1970 — June 30, 1971	10%
July 1, 1969 — June 30, 1970	15%
July 1, 1968 — June 30, 1969	20%
July 1, 1967 — June 30, 1968	25%
Prior to July 1, 1967	30%

The July 1, 1974 Increase in Retirees' pensions is the second such Increase to take place since 1968 and further enhances the generous annuity provisions of the retirement plan.

Each retiree will receive information about the increase with his or her retirement check for March to be mailed by the Retirement Board at the end of March. All questions pertaining to the increase should be directed to the Secretary, State Employees' Retirement Board, Department State, Harrisburg, Pennsylvania, 17120.

News in brief

AMERICA FILM SERIES

The Alistair Cooke-narrated "America Film Series" being shown at the Graduate Commons and in the HUB weekly will feature the program "A Fireball in the Night" on Monday, April 1, at 12:05 p.m. in the Kern Graduate Building assembly room and at 2:15 p.m. in the HUB assembly room. This film examines the antagonisms responsible for the Civil War and the era of Reconstruction which followed it.

APPOINTED TO PARNEL

Dr. Joseph Jordan, professor of chemistry, has been appointed to a review panel of the U.S.-Israel Binational Science Foundation, which was established two years ago to support and promote cooperative research and related activities, for peaceful purposes, conducted principally in Israel, financed with Israeli currency, and involving scientists and institutions from Israel and the U.S. Dr. Jordan and other U.S. and Israeli scientists will review proposals for research projects funded by the Foundation.

ORGANIC GARDENING

Victor Kulvinskis, co-director of the Hippocrates Health Institute and author of three books and many articles on body ecology, will give a lecture with demonstration on indoor organic gardening Saturday, March 30, at 3 p.m. and Sunday, March 31, at 2 p.m., in the HUB assembly room.

(Continued on page four)

Sponsored by Religious Studies and Learned Societies Council

Six lectures scheduled on the Pilgrimage process

Victor Turner, professor of social thought and anthropology at the University of Chicago, will give a series of six lectures on the theme, "The Pilgrimage Process: American Lectures in the History of Religions," April 2-9, sponsored by the Department of Religious Studies and The American Council of Learned Societies.

The lectures, times and places are:

"Pilgrimage as Paradigm and Process: Ritual Work or Ritualized Leisure," April 2, at 4 p.m. in Eisenhower Lounge, with the co-sponsorship of the Philosophy Department.

"Myth and Politics in Mexican Pilgrimages," April 3, at 4 p.m. in Eisenhower Lounge.

"Pilgrimage and Communities: Pilgrimage from the Inside," April 4, at 3 p.m. in Eisenhower Lounge, with the co-sponsorship of the Anthropology Department.

"Iconophily and Iconophobia in Western Christian Pilgrimages: Pilgrimage Types and Dynamics," April 5 at 4 p.m. in 26 Deike Bldg., with the co-sponsorship of the Geography Department.

"Localism and Universalism: The Case of St. Patrick's Purgatory in Ireland," April 8 at 4 p.m. in Eisenhower Lounge.

"Merlin Pilgrimages: Sacred Motherhood in Five Epochs," April 9, at 4 p.m. in Eisenhower Lounge.

Professor Turner is the author of "Schism and Continuity in an African Society," "The Forest of Symbols," "The Drums of Affiliation" and "The Ritual Process." He has done fieldwork among the Ndembu of Zambia, the Gisu of Uganda, and in Mexico and Ireland.

Before joining the faculty of Chicago in 1968, he was a senior lecturer in social anthropology at the University of Manchester and professor of anthropology at Cornell University.

With a remembrance of the Depression era

Pray brings enthusiasm to his many interests

Soon after Wilkes-Barre-Scranton's new FM radio station asked listeners for programming suggestions, friends of Alfred R. Pray were not particularly surprised to tune in and find him "Chatting about Science."

His idea for a ten-minute weekly program was typical of the enthusiasm he has brought to many similar projects, his interests encompassing everything from non-aqueous chemistry and Go to ballroom dancing and watch repairs.

A professor of chemistry at the Worthington-Scranton Campus, Dr. Pray probably appreciates his present life-style more fully than some of his younger colleagues. For, like others of his generation, he still vividly remembers the 1930s and the Depression.

"I grew up in Ohio," he recalls. "My father was a self-taught metallurgist who became fascinated with gasoline engines and finally wound up working for the Peerless Motor Car Company in Cleveland. When the time came for college, I enrolled at Case Institute of Technology and had two years there before my father died quite suddenly. My mother took his insurance money and put it in the bank — unfortunately, the time was 1932, the year when Roosevelt closed the banks.

"We were wiped out. The house was taken — I remember the repossessors coming to claim the new mechanical refrigerator which had replaced our icebox. I couldn't find any steady work, so I took occasional janitorial jobs in a factory where my pay envelopes averaged about \$1.75 a week."

Finally, in 1936, Pray found a steady job as a water meter reader for the city

of Cleveland and enjoyed a brief period of prosperity, which ended when he was hit by a car and hospitalized for six months. He spent another six months at home before he was able to resume his meter reading. Eventually, as the effects of the Depression receded, he obtained a scholarship, reentered Case, and graduated with his B.S. in chemical engineering in 1941. The following year, he earned a master's in analytical chemistry and was awarded a fellowship at Syracuse which granted him a Ph.D. in inorganic chemistry in 1946.

Dr. Pray then tried his fortunes at the University of Minnesota, where he taught

and conducted research in the field of non-aqueous chemistry, eventually writing the second half of a volume of the "Encyclopedia of Comprehensive Inorganic Chemistry" on the subject. He left Minnesota on a sabbatical leave to conduct research at the Rockefeller Institute and remained there working with electrochemist Duncan McGuinness to redetermine the numerical value of the Faraday. When their grant ran out, he accepted a job at U.S. Plywood.

"Their research lab was more for show than blow," he notes. "We mainly did de-

(Continued on page four)

Dr. Alfred R. Pray, Worthington Scranton Campus — "... never stop developing new interests."

Leaves

C. Herbert Wheeler, Jr. professor of architectural engineering, has been granted a six-month leave, beginning in September, to visit progressive architectural engineering firms and building industries in the U.S. and Canada to observe new developments in the profession. He also expects to do some writing on the need for coordination between architects and engineers.

Dr. Glen Phillip Cartwright and Dr. Carol A. Cartwright, both associate professors of education, will be on leave in England for a year, beginning Sept. 1, to evaluate the effectiveness of CARE projects directed toward the retraining of regular classroom teachers and child care workers to enable the workers to identify and deal with exceptional children. The Fall Term will be spent at Plymouth, England, the Winter and Spring Terms at the University of London, and the Summer Term at Durham. He is assistant director of the University's Computer-Assisted Laboratory.

Honors

Dr. Gerard J. Brault, professor of French, has been elected Fellow of the Society of Antiquaries of London, which was founded in 1707 to promote the study of archaeology and early history. The Society will publish a volume of the sixteen rolls of arms of the reign of Edward I (1272-1307) which Dr. Brault will edit.

Appointments

J. Raymond Hawthorn, as visiting professor of classics for the Spring Term. He recently retired as head of the classics department at Bradford College, near Reading, England, where he was instrumental in keeping alive the Greek play tradition and took charge of the company which played the "Philocetes" in the ancient theatre at Salamis, in Cyprus. Among the books he has written is "Roman Politics 80-44."

In writing

"G. W. F. Hegel: An Introduction to the Science of Wisdom," by Dr. Stanley Rosen, professor of philosophy, has been published by Yale University Press. The book is a general study of Hegel, which, according to Dr. Rosen, attempts to relate his work to his predecessors in the history of philosophy and to show that fundamental elements in his teaching are developed by him from a critical assimilation of the main philosophical positions of the past. The technical aspect of Hegel's dialectical logic is also examined. The book develops themes from Dr. Rosen's two previous works, "Plato's Symposium" and "Nihilism: A Philosophical Essay." The relationship between Plato and Hegel is emphasized as a central philosophical alternative in the enduring quarrel between the ancients and the moderns, and Hegel's treatment of the problem of modern Nihilism is also developed.

"Controlling and Analyzing Costs in Food Service Operations" is the title of a book co-authored by James R. Keiser, associate professor of hotel and institution administration, and just published by John Wiley and Sons, Inc. The book is designed for both students and professionals, and it includes extensive discussions of accounting, budgeting, decision making, their control, labor cost analysis, and data processing in the field of food service.

The co-author is Elmer Kallio, who was a partner in the accounting firm of Laven- thorn Krekstein Horwath and Horwath at the time of his death in 1971.

March 31, 1974, is the last date for submitting charges for a 1973 Major Medical claim to the Employee Benefits Division, 133 Wilford.

The Arts: exhibits, music

Chamber music played on wind instruments will be featured in a concert Wednesday, April 3, performed by members of the Clermont Wind Quintet, faculty members and students. The program begins at 8:30 p.m. in the Music Bldg. recital hall, Smith Tower, Gregory Osofsky, Christen Dole, Overde Page, and William Dole, all members of the Clermont group, will be joined by Raymond Page and June Miller and by five music students in practicing songs by composers of four different periods, ranging from Vivaldi to Malcolm Arnold, and including Dvorak's "Serenade."

An exhibit of the works of art completed by William Hansen, assistant professor of art, while serving as a visiting artist at Harvard University in 1972-73, will go on display at the Museum of Art, Gallery C, April 7 and continue on exhibit until May 5. Hansen, who has exhibited in New York and Boston galleries, among others, last had a one-man show on campus in 1969. The current works are acrylics.

The Alard Quartet, which recently made a recording for Sable Records of works by Benjamin

Britten and Sales, will give a recital on campus Friday, April 5, at 8:30 p.m. in the Music Bldg. recital hall, featuring three works by Vivaldi, in which June Miller, assistant professor of music, will take part as pianist and organist. Also to be performed are a string quartet by William Walton and a Mozart quartet considered to be his most difficult and complex. The Alard group recently returned from a 14-city European tour.

The annual spring concert by the Penn State Singers, directed by Raymond Brown, professor of music and director of choral music, will feature two motets by Anton Bruckner and "The Circus Bred" by Charles Ives. Bruckner was born in 1824 and lives in 1874, so the performances of their works are in the nature of an anniversary celebration. Musica De Cembra and the Penn State Brass Chorus will collaborate with the Singers in the Ives' work. A capella performances of works by Vaughan Williams, Brahms, Bruckner, Monteverdi, Billings, and P.D.O. Bach will also be given. The program will be performed Saturday, April 6, at 8:30 p.m. in Schwab Auditorium (doors open at 8 p.m.).

"Along an Inner Shore," is the title given to this 3 by 4-foot acrylic painting on canvas by Bill Hansen, whose one-man show opens at Gallery C of the Museum of Art April 7. The painting is one of many he completed while on leave at Harvard University.

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment

PROFESSOR GROUP AIDE, APPLIED RESEARCH LABORATORY—University Park
Design and specify propeller blades. Write, run, and debug computer programs for propeller manufacture and test evaluation. Supervise and inspect manufacture of blades. Perform tests of design models. Perform data reduction. Prepare reports of experimental results. Associate degree or equivalent in Mechanical Engineering or DDT plus Computer Science training or experience.
COMPUTER OPERATOR (2 POSITIONS), INTER-COLLEGE RESEARCH PROGRAM—University Park
Responsible for operation of computer console and input/output equipment; process computer jobs from submission by users to return to users, providing courteous service and maintaining alertness for error conditions. Two years of

Division, 865-1387 (Network Line 475-1387). Do not contact the area having the vacancy. Applications will be accepted until 5 p.m., Thursday, April 4, 1974.

college mathematics is required; familiarity with computer programming and operation of punched card equipment is desirable.

STAFF NURSE—Behrend College
Responsible for providing nursing care to the student body. Includes the training of minor and temporary illnesses and accidents, making appointments and referring students to a physician or hospital when necessary, and will provide general medical service within the limits of standard nursing practice on NSF's science education activity with Pennsylvania State University. 10 p.m. Monday thru Friday. Registered nurse required.

Applications for staff vacancies are considered without regard to race, color, creed, sex, or national origin.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For more information and funding source information, call 865-1372.

MARCH 16, 1974
(122-1) The Office of Education (OE) will provide about \$15 million for field initiated, applied research, and research-related activities aimed at improving the education of handicapped children. The four objectives are: (1) appropriately designed education, (2) career educational training relevant to the job market, career aspirations, and full potential; (3) teacher competency; and (4) enrollment of pre-school handicapped children in day care programs. Applications will be considered from all fields of study including applied research on cognitive functions, improved teaching and learning environments, communication media and teaching systems, and counseling. Federal Register information has been distributed and is available (OEFR8659-2/137-74). Applications must be received by April 16, 1974.

OE also finances Student Research in Education, Physical Education, and Recreation for the Handicapped. Under this program, OE hopes to stimulate entry of new personnel into the named research areas. Of particular interest are proposals that outline methods of promoting independence of severely handicapped children and youth so as to reduce institutional care. Applications must be received by April 16, 1974.

(123-2) The National Institute of Education plans to issue multiple contracts for an investigation of methodological problems and issues in educational research. Investigators are needed to develop "user-oriented" solutions to problems in: (1) longitudinal methodology, (2) causality in non-experimental research, (3) the role of experimental methodology, and (4) data pooling and aggregation. RFP NIE-R-74-009 is available from: DHEW/Nat-

ional Institute of Education, Contracts/Grants Management Division, Room 720, Main Bldg., 1832 M Street, N.W., Washington, D.C. 20038 (Attn: John Holmgren).

(123-3) NSF is soliciting statements of qualification from organizations having the background and capability of providing scientific and research information on a quick reaction basis through basic ordering agreements (BOAs). Following are the subject areas: (1) Science Policy, including international science and technology (S&T); world food, agricultural and industrial productivity; social sciences, intergovernmental S&T, and urban problems; achievement of national goals through civilian S&T (2) Science Information, including science information systems and services, sources, processing technology and procedures, bibliographic and data retrieval services, international information exchanges, and user requirements for scientific and technical information— (3) Energy Policy and Research, including conventional and solar, geothermal and other nonconventional, programs related to energy R&D including energy supply technologies, energy demand and conservation, energy related areas of environmental, economic, and sociological research. Each organization soliciting qualification for BOAs will be performance rated under the following activities: policy analysis, research results, analysis; systems analysis; cost/benefit analysis; identifying environmental impacts; economic analysis; literature searches and studies; symposia conferences and meetings; planning/scheduling and program/project monitoring; modeling and forecasting, and preparation of presentation and display material and aids. Qualification statements must be addressed to one of the three enumerated subject areas above (or more than one but separately). The general contact is: National Science Foundation, Contract Branch, Room 620, 1800 G

Appointed

Dr. Barbara A. Underwood has been named director of the Division of Biological Health in the College of Human Development, effective June 1. She has been a member of the faculty since 1972 and is associate professor of nutrition. The Division supports education and research programs in the general fields of nutrition, health planning and administration, and nursing. Dr. Underwood, a graduate of the University of California at Santa Barbara, received an M.S. degree from Cornell University, and a Ph.D. in nutritional biochemistry from Columbia University. She was a member of the faculty at Columbia 1968-72 and at the University of Maryland 1962-68.

Dotterer lecture

The annual Ray H. Dotterer Lecture in Philosophy will be given April 11 by Dr. Josiah Thompson, of Haverford College, who will discuss the question "Who Wrote Kierkegaard's Books?" Dr. Thompson has written three books on Kierkegaard, including a biography. He is also author of "Six Seconds at Dallas." The lecture will be given at 8 p.m. in Room 101 Kern and be followed by informal discussion.

Street, N.W., Washington, D.C. Attn: James Will (Ref. CBO 3/12/74, p. 4).

(122-4) To utilize its record \$388.2 million budget (up from \$546.4 million last year), NSF program contains four major features: (1) the largest program of basic research in the social disciplines in NSF history, (2) more emphasis on basic and applied research focusing on the Nation's energy needs, (3) continued concentration on NSF's science education activity with emphasis on the development of energy-related manpower sources, and (4) increased emphasis on international cooperative scientific efforts with East and West European countries and with Pacific and Eastern countries. A new NSF Guide to Program NSF 73-35 will be available soon. Inquiries are invited regarding projects funding needs related to the above areas.

(122-5) The Office of Education has announced April 15, 1974, as the deadline for submitting applications for grants or contracts to train community support teams to establish and/or maintain drug abuse programs in their communities. (Ref. CFDA 13,420).

REMINDERS—DEADLINE DATES

April 6 extended for OE Environmental Education Projects (Feb. 14 INTERCOM #116-1) . . . April 6 for OE Library Research and Demonstration Projects and fellowships, traineeships and internships (March 21 INTERCOM #119-2) . . . April 15 for NEH Museum Programs Exhibition and Community Education Grants (Sept. 13 INTERCOM #117-1) . . . April 15 for NSF Two-Way Exchange Grants Experiments (March 14 INTERCOM #120-2) . . . May 5 extended for OE Ethnic Heritage Studies Program (Feb. 28 INTERCOM #118-2) . . . May 6 for NSF Two-Way Exchange Grants Experiments (March 21 INTERCOM #119-2) . . . May 6 for NEH Research Grants June 17 for NEH Fellowship Grants (March 21 INTERCOM #121-3) . . . June 1 for NEH Research Grants (March 7 INTERCOM #120-2) . . . June 1 for NEH Senior Fellowship Program (March 14 INTERCOM #120-4).

University Calendar

March 28-April 7, 1974

Special Events

Thursday, March 28 — Nutrition Clinic Workshop, "Mothers, Fathers and Babies," 8 p.m., Room 101 Kern.

Thursday, March 28 — Returning Student Women, 7:30 p.m., lounge, Eisenhower Chapel. Dr. Helen Meahl, sociology, on importance of changing family roles and family conflicts. Open to the public.

Thursday-Saturday, March 28-30 — Eco-Action Student Environmental Conference.

Friday, March 29 — P.S.U. Symphony Orchestra, 8:30 p.m., Schwab.

Friday, March 29 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday-Saturday, March 29-30 — Sports: Penn State YMCA swimming championships, Natatorium.

Saturday, March 30 — Artists Series, Preservation Hall Dance Jazz Band, 8:30 p.m., Rec Hall.

Seminars

Thursday, March 28 — Central Penna. section, A.I.A.A., 4:00 p.m., Room 232 Hammond. Dr. R. R. Parkin, on "Problems in Unsteady Hydrodynamics."

Thursday, March 28 — Population Issues Research Office with Agricultural Economics and Rural Sociology, 3:30 p.m., Room 158 Willard. Dr. Glenn V. Fugitt, University of Wisconsin, on "Residential Preferences of Contemporary Americans: Research and Implications."

Thursday, March 28 — Chemistry, 12:45 p.m., Room 310 Whitmore. John Deutsch, M.I.T., on "Aspects of the Hydrodynamic Behavior of Macromolecules in Solution."

Thursday, March 28 — Agronomy, 3:30 p.m., Room 201B Ag. Adm. R. Side on "Heavy Metals Application and Plant Removal in the Wastewater Renovation Project."

Thursday, March 28 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Lester Hool, civil engineering, Carnegie-Mellon University, on "Technological and Institutional Innovation for Improving Urban Transportation."

Thursday, March 28 — Engineering Acoustics, 4 p.m., Room 71 Willard. Mahlon D. Burkhart, industrial Research Products, Inc., Elk Grove Village, Ill., on "Hearing-Aid Acoustics."

Thursday, March 28 — Geography, 11:15 a.m., Room 369 Willard. Sister Mary

Saturday, March 30 — Sports: Men's lacrosse, 2 p.m., football practice field.

Saturday-Sunday, March 30-31 — Lecture-demonstration on indoor organic gardening by Victor Kuvinskas, author and co-director of the Hippocrates Health Institute, HUB assembly room; Saturday at 3 p.m., Sunday at 2 p.m.

Sunday, March 31 — Cheerleading squad tryouts, 11 p.m., HUB ballroom.

Sunday, March 31 — Sharon Brock, piano recital, 3:30 p.m., Music Bldg. recital hall.

Sunday, March 31 — Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Douglas Akers, United Methodist Church, Dallas, Pa.

Sunday, March 31 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Tuesday, April 2 — "Crossroads," Lenten Meditations, 12 noon and 12:35 p.m., Eisenhower Chapel. The Rev. Imgart Soltan on "Mary Under the Cross," and Richard Jackman, classical guitarist.

Wednesday-Friday, April 3-5 — "Five O'Clock Theatre, "What If," and "Bivalve,"

Annette, geography, Clark University, on "Rationality and Ecology: The Geographer's Dream for Tomorrow."

Thursday, March 28 — Biophysics, 4 p.m., Room 617 Life Sciences. Thomas McIntosh, Carnegie-Mellon University, on "X-ray Diffraction Analysis of Nerve Myelin."

Thursday, March 28 — Meteorology, 3:55 p.m., Room 26 Min. Sci. Dr. John Norman on "National Center for Atmospheric Research Joint Meteorological Observations."

Friday, March 29 — Solid State Physics, 2:15 p.m., MRL auditorium. Professor B. J. Mathias, University of California at San Diego, on "Systematic of Superconductivity."

Monday, April 1 — Entomology, 4 p.m., Room 204 Patterson. Kamal Rashid on "Mutagenicity of Pesticides and Some of their Degradation Products."

Monday, April 1 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Robert Palne on "A Mastery Learning Experiment and a Computer Learning Aid for the Epidemiology and Control of Plant Disease."

Monday, April 1 — Computation Center, 7:30 p.m., Room 110 Osmond. JCL (3); Room 228, Computer Bldg., Graphics

Monday, April 1 — New Communities, 2 p.m., Room 322 Sackett. Dr. Larry L. Hickie, South Presbyterian Church, on "Religious Planning in New Communities: Meaning and Institutions."

Monday, April 1 — Genetics, 3:55 p.m.,

Room 111 Tyson, Gordon Buswell, horticulture, on "Color Inheritance of Tetraploid Geraniums."

Monday, April 1 — Microbiology, 4 p.m., Room 350 North Frear. Dr. Lawrence A. Caliguri, Albany (N.Y.) Medical College of Union University, on "The RNA Replication Complex of Poliovirus."

Tuesday, April 2 — Physical Chemistry, 4 p.m., Room 333 Whitmore. Peter N. Lewis, Portsmouth Polytechnic, England, on "Conformations of Histones and Nucleobases: Histone Polymers."

Tuesday, April 2 — Religious Studies of Philosophy, 4 p.m., Eisenhower lounge. Victor Turner, Professor of Social Thought, University of Chicago, on "Pilgrimage as Paradigm and Process: Ritual and the Ritualized Leisure."

Wednesday, April 3 — Animal Nutrition and Nutrition, 3:55 p.m., Room 111 Animal Industries. Paul J. Wangness, on "Relationship between Obesity and Food Intake."

Wednesday, April 3 — Victor Turner, Professor of Social Thought, University of Chicago, on "Myth and Politics in Mexican Pilgrimages," 4 p.m., Chapel lounge.

Thursday, April 4 — Agronomy, 3:30 p.m., Room 301B Ag. Adm. Bldg. R. Stutzman on "No Tillage: A Method of Seeding Legumes Into a Grass Sward."

Thursday, April 4 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Wolfgang Meyer, mechanical engineering and head Automotive Research Program, Pennsylvania Trans-

Friday, April 5 — University Readers performance, 8 p.m., Room 112 Kern.

Friday, April 5 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, April 6 — Penn State Singers concert, 8:30 p.m., Schwab.

Saturday, April 6 — Sports: Men's golf, vs. Navy-Columbia 1 p.m.; Men's track, vs. Villanova; Men's rugby, vs. F & M; Women's lacrosse, vs. Froburg, 1 p.m.; Women's tennis, vs. Wilson, 10 a.m.

Sunday, April 7 — Sports: Men's baseball, vs. Ithaca, 1 p.m.

Sunday, April 7 — Artists Series, Chekov's "Uncle Vanya," film, 8:30 p.m., Schwab.

Sunday, April 7 — University Readers Performance, 8 p.m., Room 112 Kern.

Sunday, April 7 — Graduate Commons Improvisational Theatre, 8 p.m., Room 112 Kern.

Sunday, April 7 — Chapel Service, 11 a.m., Eisenhower Chapel. Donald M. Crider, Religious Studies.

Sunday, April 7 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

portation Institute, on "Emission Control Problems and Solutions in the Auto Industry."

Thursday, April 4 — Chemistry, 12:45 p.m., Room 310 Whitmore. Gary M. Hieffle, University of Indiana, on "Basic and Practical Investigations of Flame Spectroscopy."

Thursday, April 4 — Statistics, 4 p.m., Room 169 Willard. Emanuel Parzen, SUNY at Buffalo, on "The Stationary Time Series: Modeling Problem and its Solution."

Thursday, April 4 — Meteorology, 3:55 p.m., Room 26 Min. Sci. Dr. John Norman on "National Center for Atmospheric Research Joint Meteorological Observations."

Thursday, April 4 — Engineering Acoustics, 4 p.m., Room 71 Willard. Kenneth P. Roy on "Sound Power Measurements in Reverberant Rooms."

Thursday, April 4 — Remote Sensing, 1 p.m., Room 225 Electrical Engineering West. Captain James D. Turnell, Griff Air Force Base, Rome, N.Y., on "Remote Sensing Image Enhancement Techniques."

Thursday, April 4 — Anthropology and Religious Studies, 3 p.m., Chapel lounge. Victor Turner, University of Chicago, on "Pilgrimage and Communities: Pilgrimage from the Inside."

Friday, April 5 — Religious Studies and Geography, 4 p.m., Room 26 Deike. Victor Turner on "Iconophony and Iconophobia in Western Christian Pilgrimages: Pilgrimage Types and Dynamics."

Lectures

Thursday, March 28 — Slavic and Soviet Language and Area Center, 3 p.m., Room 174 Willard. Dr. Robert J. Maddox, American history, on "Woodrow Wilson and American Intervention in the Russian Civil War."

Thursday, March 28 — S&H Environmental and Energy Policy Lecture, A. Myrick Freeman III, Bowdoin College, on "The Role of Benefits in the Analysis of Water Pollution Control Policy," 8 p.m., Keller Conference Center.

Thursday, March 28 — Division of Biological Health series, 8 p.m., Room S209 Human Development. Dr. Howard A. Schroyer, Institute of Nutrition, University of North Carolina, on "Health, Medicine and Other Fantasies."

Thursday, April 4 — Walter J. Lord, art history, "Chinese Painting Yesterday and Today," 8 p.m., Zoller Gallery. Illustrated.

Meetings

Tuesday, April 2 — College of Business Administration faculty meeting, 10 a.m., Room 201 Business Administration Bldg.

Wednesday, April 3 — O.T.I.S., 7:30 p.m., Room 271 Willard.

Thursday, April 4 — College of Arts and Architecture faculty meeting, 4 p.m., Room 122 Music Bldg.

Sundays — U.S.G. Supreme Court, 7:30 p.m., Room 203 HUB.

Mondays — O.T.I.S., 6:30 p.m., Room 203 HUB.

Mondays — USG Senate, 7:30 p.m., HUB assembly room.

Thursdays — Hetzel Union Board, 7 p.m., Room 206 HUB.

HUB specials

The HUB Terrace Room has initiated daily special meals for both lunch and dinner at prices much below customary cafeteria prices ala carte. No substitutions are permitted to benefit from these reduced prices. For the next week, the features (all accompanied by appropriate side dishes and beverage) are:

Sunday, March 31 — dinner, roast turkey w/drf, \$1.98; supper, sausage pizza w/ slt, \$3.99.

Monday, April 1 — lunch, lasagne, \$1.99; dinner, chicken tetrazzini, \$1.47.

Tuesday, April 2 — lunch, chilled beef w/sl, \$1.19; dinner, hot meat sandwich \$1.41.

Wednesday, April 3 — lunch, grilled ham & cheese sandwich, \$1.39; dinner, macaroni and cheese, \$1.19.

Thursday, April 4 — lunch, turkey turnover, \$1.19; dinner, Italian spaghetti \$1.19.

Friday, April 5 — lunch, tuna noodle casserole, \$1.11; dinner, hot cakes, \$1.19.

Saturday, April 6 — lunch, chicken chow mein/rice, \$8.99; dinner, franks & beans \$1.29.

Films

Friday-Sunday, March 29-31 — "Cries and Whispers," Bergman film, 7:30 p.m., HUB ballroom, sponsored by University Union Board.

Monday, April 1 — Graduate Commons America Film Series by Alistair Cooke, "America: A Firebell in the Night," 12:05 p.m., Room 112 Kern. Also HUB assembly room, 2:15 p.m.

Wednesday, April 3 — Commonsplace Theatre, "The Producers," 8 and 10 p.m., Room 112 Kern.

Thursday-Saturday, April 4-6 — USG film, "Alice's Restaurant," 6:15, 8:20 and 10:30 p.m., HUB assembly room.

Saturday, April 6 — Free-U Children's film, "Charlie, the Lonesome Cougar," 12:30 and 2 p.m., HUB assembly room.

WPSX highlights

"Basic Education — Time for a Change?" Is the subject of "Pennsylvania Town Meeting" Thursday, March 28, at 8:00 p.m. on WPSX-TV, Channel 3. The program, produced by member stations of the Pennsylvania Public Television Network, focuses on three issues raised by the Citizens' Commission on Basic Education: the concept of "openness," the control of the schools, and school financing. The "town meeting" will include documentary reports on each of the three issues, a discussion of the issues featuring educators, state officials, and concerned residents from all parts of the state, and a local discussion of the issues as they affect Central Pennsylvania. Among those appearing on the program is Dr. Gordon Godbey, associate dean for Continuing Education in the College of Education at Penn State.

"The Mystery of the Maya" Is the subject of an hour-long "PBS Special of the Week" Monday, April 1, at 8:00 p.m. on WPSX-TV. The documentary explores the culture of the highly developed Central American Indian civilization which ended mysteriously in about 889 A.D. Included is a view of several Maya religious and cultural practices that have survived into modern times. The program is climaxed by film of the actual rediscovery of "Temple B," a Maya temple that was discovered — then lost again — in 1912. "The Mystery of the Maya" may also be seen Saturday, April 6, at 10:00 p.m. on Channel 3.

"Black World" presents an hour-long look at a "lost" tribe of Africans Tuesday, April 2, at 9:00 p.m., on WPSX-TV. The program features two black Harvard professors who recently discovered the tribe

In Surinam, South America, where they have survived since being transplanted by Dutch settlers in the 17th century.

"A Memory of Two Mondays," Arthur Miller's account of the black lives of blue-collar workers during the Depression, is featured on "Theatre in America" Wednesday, April 3, at 8:30 p.m. on WPSX-TV. Estelle Parsons and Jack Warden star in the play.

Exhibits

Museum of Art — Eighth Dull National Print and Drawing Competition Exhibition, Gallery B. Selections from the Permanent Collection, Gallery C. (thru March 30), from March 31, Gallery A. B. J. Hanson, Harvard Paintings, opening April 7, Gallery C.

Zoller Gallery — Contemporary Chinese Paintings, opening April 1.

Kern Gallery — Juried student photography prints, through March 30. Lee Ann and Dennis Kennedy, pottery, through March 31.

Black Cultural Center — Smithsonian Travelling Exhibit on James Weldon Johnson, Black lawyer, politician, poet and diplomat.

HUB, Art Alley — Until April 1, photos of John Hummel and George Imel. April 2-15, Ukrainian Church Exhibit.

Official

Monday-Wednesday, April 1-3 — File for Pass-Fail.

Monday-Wednesday, April 1-3 — File for Repeat Course.

Wednesday, April 3 — Preregistration deadline.

Wednesday, April 3 — Deadline for dropping courses.

Seven Alumni Fellows named

Seven Penn State alumni will return to the campus during the Spring Term to serve, for varying periods, as Alumni Fellows, an activity of the Penn State Alumni Association. The Fellows will take part in formal and informal contacts with students, faculty, and administrators.

Those invited include:

C. Lee Rumberger, of Mt. Lebanon (near Pittsburgh), retired vice president for development, H. J. Heinz Co. and past president of the Heinz Alumni plant in Mexico, April 1-3.

Fletcher L. Byrom, Pittsburgh, chairman of the board and chief executive officer of Koppers Co., Inc., April 2-4.

John Troan, Pittsburgh, editor of the Pittsburgh Press, April 2-5.

Vernon D. Garger, Madison, Wis., professor of physics, University of Wisconsin, April 7-11.

J. David Lockard, College Park, Md., professor of science teaching and associate professor of botany, University of Maryland, April 10-12.

Ronald R. Oveson, Pittsburgh, dean of the Duquesne University law school, April 22-24.

Don Taylor, Hollywood director and actor, May 4-11.

Nine alumni have served previously in the program. Each participant receives the permanent title of Alumni Fellow and is given a plaque and certificate signed by the president.

For benefit of Cancer Society

Mike Reid plays piano in Rec Hall

Penn State's All-American football player, pianist of note, and now a star of the Cincinnati Bengal's football team, will give a piano program, suited to all ages of listeners, for the benefit of the American Cancer Society Thursday, April 11, at 7:30 p.m. in Rec. Hall.

Tickets, which may be obtained for a \$2 donation, are currently available at the HUB desk, at the Cancer Society office, 336 S. Fraser St., and at all McLaughlin and Danks stores.

Reid, who has given many public performances, intersperses his piano playing with stories about his football playing days, and entertains to sellout crowds. Beta Sigma Rho fraternity is sponsoring the event for the Cancer Society benefit. Out-of-town patrons may obtain tickets by mail from Beta Sigma Rho, P. O. Box 828, State College, Pa., 16801, without any postage or handling charge.

Mike Reid, All-American, pianist.

NEWS—

(Continued from page one)

Free-U is sponsoring his visit. Kulvinkas gave up a career in teaching of computer programming at the age of 29 in order to study the healing arts, natural living, and yoga disciplines. He is the author of "Love Your Body" and "Survival in the 21st Century."

POSTERS ABROAD

The Fifth International Poster Biennale in Warsaw, Poland, will have three posters by Lanny Sommese, assistant professor of graphic design, department of art. The posters will also be included in a two-day travelling exhibit and in the competition display in the Zacheta Art Gallery, Warsaw. The three posters were designed for various University functions.

IN INSTITUTE

Harry S. Coblenz, associate professor of urban planning, is one of 42 scholars invited to take part in the Third Advanced Studies Institute in Regional Science, as part of the European Regional Science Congress at Karlsruhe, Germany, in August. The Institute will center on "Frontiers of Regional Science: Theory-Problems-Planning" and will attract economists, planners, and others in geography, political science, and systems engineering.

WEAVERS DEMONSTRATION

A variety of weaving techniques, on looms and spinning wheels and in primitive styles, will be demonstrated by the State College Weavers Thursday, April 4, from 11 a.m. to 3 p.m. In the Kern Graduate Building lobby, Madeline Vonsada will show an off-loom technique of primitive weaving on a spinning loom; Char Gregg and Carol Brubaker will show four-harness looms; and Jean Giddings and Carol Stickell will use a spinning wheel. A display of contemporary yarns of brilliant colors and fine texture will be shown.

HERSHEY FACULTY

Drs. Alphonse E. Leure-duRue, assistant professor of anatomy, and Lynnard J. Slaughter, postdoctoral fellow in comparative medicine at the Hershey Medical Center, have been appointed to the Faculty Fellowship Program for Minority Group Members by the Josiah Macy Jr. Foundation, which established the Program in 1970 for Black, Mexican-American, mainland Puerto Ricans, and American Indians

who are full-time faculty members in schools of medicine and public health. The purpose is to identify and aid young medical scientists who have a demonstrated potential for leadership in academic medicine and public health.

MICROFORM HOURS

The Microforms Department, Room 6 East Pattee, of the University Libraries, is now observing the following schedule of hours: Monday to Thursday, 7:45 a.m. to 10 p.m.; Friday, 7:45 a.m. to 5 p.m.; Saturday, 1 p.m. to 5 p.m.; Sunday, 2 p.m. to 10 p.m.

BERKS SUMMER THEATRE

Musical shows are being planned by the Berks Campus for its summer theatre program. Directed by William Angstadt, a 1972 Penn State graduate who was active in Penn State Players and Thespians, the summer theatre program will run from June 18 through Sept. 1, with such shows as "Oklahoma" and "Anything Goes." Local performers will be augmented by professional actors and actresses from New York.

PRAY —

(Continued from page one)

velopment work, investigation of glues and varnishes, rather than research."

While working in New York, he took up a new hobby — ballroom dancing — and upon transferring to a school where Latin dance was taught, he met a friend of his instructor, a young Cuban girl named Carmen who soon after became Mrs. Pratt.

About this time, Pratt Institute in Brooklyn had job openings, and Dr. Pray, who had become enamored of New York, accepted it.

"The students were absolutely wonderful," he continues. "My freshman classes were reminiscent of graduate seminars at Minnesota, and I had difficulty finding a first-year chemistry book that was challenging enough for them. The trouble was that as the years passed, living in the city became more and more difficult. My son, Alfred, was about six by this time, and I was paying more for his kindergarten at a private school than I had paid to attend college. Then my neighbor's first grader was robbed on the way home from school, and my wife and I decided we didn't want Alfred to have to cope with this sort of thing. We decided to look for a sociologi-

Town Day

University students, through the Organization of Town Independent Students, seeking to promote a better understanding between students and the community, have invited 60 community leaders to take part on April 9 in "Town Day," during which they will visit the campus and interact with students.

The program was developed as a result of the realization that the only interaction between students and townspeople has been within the limits of the downtown businesses, offices and organizations. Plans call for the visitors to arrive on campus in mid-morning where they will meet with the student escort assigned to them. After lunch in several dining hall areas, they will visit buildings and classrooms in the general area of the residence halls.

An evening banquet is scheduled in the Terrace Room of the Hetzel Union Bldg. Guests will include Dr. John W. Goswold, University president; Thomas M. Switzer, of Lock Haven, OTIS president, and other University officials and OTIS representatives.

Hazleton has TV science quiz

The Hazleton Campus's fourth annual "Science Countdown Quiz Series," which is broadcast over WVI-TV, the public television station in northeastern Pennsylvania, began last week, designed to stimulate interest in the sciences.

An elimination-type science quiz for high school students, the production of the series is under the guidance of M. Leonard Shaevel, assistant professor of physics, and Ernest F. Haessler, assistant professor of mathematics. The entire science faculty is involved in the production.

Schools, represented by three students

Gym workshop

A workshop related to the judging of women's gymnastics events will be conducted April 20 as a Continuing Education activity of the College of Health, Physical Education and Recreation to acquaint high school girls' gymnastics coaches, physical education teachers, students, team members, and anyone else interested with the rules for girls' gymnastics event judging as adopted by FIG and the PIAA.

Elizabeth Hanley, instructor of health and physical education, is director of the workshop and demonstrations will be provided by members of the Penn State women's gymnastics team, which has been enjoying good success this year in collegiate competition.

The final registration for the event will take place from 9 a.m. to 10 a.m. April 20, but pre-registration may be accomplished by completing a form available from the conference coordinator, Patricia Ewing, at 865-7557. A registration fee of \$5 is charged to the general public but a special student fee is \$2.

each, vie for the right to compete in the Grand Final Round, which will be held June 21. Members of the winning school's team will each receive a \$500 educational scholarship to the college or university of his choice; students of the second and third place teams will receive \$200 and \$100 scholarships. Trophies will be given to each of the top three schools.

Twenty seven high schools will be represented in the series. The funds for the scholarship awards and operating expenses were donated by local industries, banks, professional people and organizations in the area.

Conference on law at Delaware

"The Rule of Law: Reflections on American Society" is the topic of the Second Conference of the Colloquium for Social Philosophy to be held at the Delaware County Campus April 16-17.

The Conference will relate to such questions as: "Should law primarily protect the structure of society or provide the peaceful means for social change?" "Can morality be legislated?" "Can law educate men to a life of justice," with a variety of speakers, discussants, and general participants.

The principal speaker at the first session Tuesday, April 16, at 1 p.m. at the Campus will be Dr. King V. Cheek, Jr., president of Morgan State College, on the subject "Education, Law and Society." Aaron Duckman, associate professor of philosophy at University Park, will be chairman of the session, and respondents will include Dr. Gladys Ritchie, associate professor of speech communication at the Delaware County Campus, Dr. Martin W.

Sharp, Jr., assistant professor of elementary and secondary education.

At the session Wednesday at 9 a.m. Dr. Beryl H. Levy, professor of philosophy and social sciences at Hofstra University, will present "Justice, Law and Order," and one of the respondents will be Dr. Landon C. Burns, professor of English at Delaware. Another respondent will be Ambassador Richard L. Kearney, Office of the Legal Adviser, U.S. Dept. of State.

The closing remarks for the conference will be by Dr. Donald P. Verene, associate professor of philosophy at the University Park Campus.

The Colloquium, which is sponsoring the conference, was developed in 1972 by the Delaware County Campus, "to facilitate regional scholarly activities in the broad field of social philosophy." Not only are academic people of the area involved, but so are community leaders and other citizens, to work on problems of man and society.

how to clean, oil and repair them. Of course, that made me an expert! Then one night at a party, a faculty wife asked me about a treasured wristwatch her father had given her when she was a little girl. Unfortunately, she had washed it in the machine and then mashed it in the wringer. When she brought it to me, it was flat as the proverbial pancake and completely rusted out.

"I sent it to someone who remade watches and refinished dials and ordered several hand replacement movements. When I actually handed it back to her, the metal of the dial and the case was all that was left from her father, but as far as she was concerned, it was a miracle worker! People still bring me watches or clocks to me but I'd rather just diagnose the trouble instead of actually doing the repairs."

Dr. Pray has one further hobby of note—bookbinding, which he stumbled into because his technical manual on watches wouldn't lie flat when open. While he was contemplating this problem, Minnesota's library happened to be getting rid of some old bookbinding equipment, so he bought it and began to try his skills.

"I like keeping a lot of things going," he says. "I'm sure I'll never stop developing new interests."

PENN STATE intercom

Volume 3, Number 29

April 4, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Dr. Howard E. Morgan, Evan Pugh Professor of Physiology, with perfusion apparatus, which keeps rat hearts beating while they are being studied, in research on ischemia.

A full-time job, 24 hours a day, for Dr. Morgan

Teacher, researcher, administrator

In 1944, when he was a junior in high school, Dr. Howard E. Morgan decided that since he wasn't very busy, he might as well finish up the same year. Although the LeRoy, Illinois, school refused to give him his diploma early, he was allowed to enroll that summer at Illinois Wesleyan.

The College let him take 20 credits a term, so by the time he'd finished his first year, Hershey's new Evan Pugh Professor of Physiology needed only about 20 more hours of science to enter medical school. He sent in just one application, to Johns Hopkins, was interviewed by the dean of Northwestern's Medical School, and a week later had an acceptance.

That summer, he finished up all of organic chemistry, half of the physics requirement, and embryology. He graduated from high school in May, 1945, and entered Johns Hopkins in September.

Although some students who have compressed college and medical school into a five-year program later report feeling they've missed out on essential areas of education, Dr. Morgan has no such regrets.

"It there's a subject you really want to learn about, you can pick it up on your own eventually," he says. "I think kids get turned off by lengthy training programs which never seem to let them tackle the job they want to do."

Dr. Morgan's career proves his point. Although he is now one of the world's leading experts on the regulation of heart metabolism, he started out in clinical medicine practicing obstetrics and gynecology. He took his residency in this area at Vanderbilt after graduating from Johns Hopkins at 21 and continued in it during the two years he spent in the Army.

"Obstetrics in the fifties was not a research-oriented specialty," he points out. "The people running departments didn't have that kind of background."

Dr. Morgan got started on the research side in 1957 after returning to Vanderbilt where he took a fellowship under physiologist Charles Rawlinson Park in order to study diabetes and the action of insulin. That led him into the work on the biochemistry of the heart which has occupied him ever since.

By 1966, he was a full professor of physiology at Vanderbilt himself, but he was eager to run his own department.

"Although I had had offers and looked around," he recalls, "I found that most of the older schools had faculties who had been there a long time, and the freedom to develop one's own department was limited. When Hershey made me an offer, I accepted because it was a new medical school and could offer me that freedom."

Dr. Morgan received the first research grant made to Hershey — \$29,700 from the Life Insurance Medical Research Fund.

"When Hershey was first established, it did not have a research-oriented image," he notes. "The biomedical research community envisioned us sitting in the middle of a cornfield training general practitioners. I believe that a medical school has an obligation to train physicians whose backgrounds allow them a wide range of career choices, including family practice and other forms of health care and not excluding good Ph.Ds. Family care and research are both important, and they don't have to be mutually exclusive."

Dr. Morgan helps foster the research side of Hershey's image through a wide range of outside activities. He is editor of "Physiological Reviews," the most frequently quoted journal in the biological literature, a member of the editorial board of the "Journal of Biological Chemistry," and president of the Association of Chairmen of Physiology Departments. Last year, among the many trips which he took to pro-

(Continued on page two)

News in brief

NAMED FELLOW

Dr. Robert K. Murray, professor of American history and a member of the faculty since 1949, has been named Fellow of the Institute for the Arts and Humanistic Studies. The election is considered symbolic of the national or international reputation that a scholar or artist has acquired in his discipline, and it permits the faculty member to continue his work with the support and sponsorship of the Institute.

Dr. Murray has written three books: "The Red Scare: A Study in National History 1919-20"; "The Harding Era: Warren G. Harding and His Administration"; and "The Politics of Normalcy."

TICKET APPLICATIONS

Faculty and staff members have received in the mail applications for tickets for Penn State's 1974 football season. Six home games are scheduled. Those who did not receive an application may obtain one from the Athletic Ticket office, 237 Recreation Building, University Park, Pa. 16802. Applications for single game tickets will not be accepted until after May 15.

TRAVEL GRANT

Graduate students planning to spend a month or more in France this summer or fall might be encouraged to apply for a \$500 travel grant to be provided by L'Alliance Francaise, the local area organization interested in things French.

The grant will be made to a graduate student on the basis of the significance of the activities planned in France during the stay, the person's general scholarly competence, and need.

In making application, the student should supply a letter of application, describing the planned activities, itinerary, transcripts, two letters of recommendation,

and a letter of nomination from the department head of the student's major field.

Deadline for receipt of these materials is April 15; they should be sent to Room 317 Kern.

L'Alliance Francaise will announce the award in May.

BOWLING TOURNAMENT

Stall members, faculty and students are eligible to compete for trophies in the Second Annual Rec Hall Bowling Tournament April 27 to May 25. Entries are due by April 17 at the Rec Hall lanes for team, doubles, singles, and all-events competition. A \$2 entry fee per event will be charged (\$10 per team, \$4 per doubles team, \$2 for singles, and \$2 for all-events). Both handicap and scratch prizes will be awarded; handicaps must be certified, based on 180 score, but may be from any of the area lanes, not necessarily Rec Hall. Last year's event, the first, brought in 29 teams, 45 doubles, 68 singles, and 40 all-events entries.

HAZLETON FESTIVAL

The 16th annual Oral Interpretation Festival of the Hazleton Campus will be held Friday, April 5, at 7:15 p.m. This event, sponsored by the Belles-Lettres Literary and Cultural Student Society, attracts senior high students from Luzerne, Carbon, Columbia, Northumberland, and Schuylkill counties each year. Anyone wishing free tickets may call Prof. Andrew Kafka, faculty advisor to the Society, at (717) 454-8731.

CAPITOL EXHIBIT

The work of nine young artists is currently on display at Capitol Campus (re-opening until April 19). The artists, all of whom have received awards at various juried exhibitions throughout Pennsylvania, are represented by their paintings, drawings, prints, and sculptures selected for the exhibit by Maya Schock, part-time art instructor at the campus.

The International Student Program

Statement of President Oswald regarding programs and services for international students:

President Oswald met March 29 with three of Penn State's international students, Jose Bashbush, Seewoonundun Bunjun and Evan Davis who were representing a large number that had expressed their concern about separating the services afforded to the international students from the program center for foreign students at the Kern Building.

After discussion, the President indicated to the three students that he would ask Vice-President Raymond O. Murphy to re-establish the service aspect of the international student program in the Kern Building, on a temporary basis during the Spring Term. This would provide a period during which Vice-President Murphy and the Acting Director of the program, Dr. Craig Miller, could meet with Mr. Bashbush, Mr. Bunjun and Mr. Davis and members of the International Student Council (presidents of the foreign student groups) to consider each of the services and how best these could be organized for the benefit of the students. Dr. Oswald asked that the students consider the several services, not only for those foreign students living in McKee Hall but for those living in Atherton Hall and off campus as well.

The President encouraged the foreign student delegation to make active use of the International Student Center in the Kern Building for programs of their respective clubs and also emphasized to the representatives the importance of strengthening programs that would maximize the opportunity for interchange between foreign student groups and American students. In this connection, he indicated that he was asking Vice-President Murphy and Dr. James B. Bartoo, Dean of the Graduate School, to consider jointly with the foreign student advisory group and appropriate representatives of the Graduate Student Association ways and means of enhancing the use of the Center in this regard. It is very important, the President said, for our students to have opportunity to learn and understand from foreign students about their cultures, and also of foreign students to learn as much as possible of the American culture.

Dr. Oswald asked that both of these considerations be completed and recommendations prepared by the end of the Spring Term so that permanent decisions could be made prior to the beginning of the Fall Term of 1974.

In writing

Ernest R. Weidhaas, assistant dean for Commonwealth Campuses in the College of Engineering, is author of "Architectural Drafting and Construction," published by Boston Publishing House, Allyn and Bacon, Inc. The text is intended for the technical institute student studying architectural drafting, and it includes chapters on the drafting, design and construction of residential and commercial buildings of wood, masonry, concrete or steel. It is one of the first of the publications based on new softwood lumber standards and the new AISC structural steel standards. Concurrently an Instructor's handbook, keyed to the textbook, has been published; it includes lists of available movies, slides, demonstration models and wall charts. Weidhaas, who is also head of the Department of General Engineering, is author of five other books.

Dr. Graham B. Spanier, assistant professor of human development in the Division of Individual and Family Studies, and Robert F. Winch, professor of sociology at Northwestern University, are co-editors of "Selected Studies in Marriage and the Family," 4th edition, recently published by Holt, Rinehart, and Winston.

The volume is a collection of the best available research articles and essays on the sociology and the social psychology of the family. Preceding the selections is an introductory essay by the editors on the methodology of social science, followed by a general theory of the family that gives the student the appropriate background needed to understand the selections.

The volume contains a particularly timely discussion on changing and emerging family patterns in America and a selection containing systematic coverage of socialization with respect to sex-roles.

More than one-fourth of the articles in this collection have a cross-cultural emphasis.

Auditorium

The opening of the University Auditorium, the new 2600-seat facility on Curtin Road north of Pollock Road, is planned for May 8, 10 and 11, to accommodate what are expected to be large audiences for the performances by the Pittsburgh Symphony, the University Chorus, and four guest soloists of Beethoven's Ninth Symphony.

Complete ticket information for these performances will be given later, but the box office at the Auditorium will open Monday, April 23, for the sale of these tickets, with a schedule of Monday through Saturday, 10 a.m. to 6 p.m. The event is sponsored by the Artists Series.

Dr. Walter H. Walters, director of University Arts Services, says that procedures for the scheduling and use of University Auditorium currently are being formulated, and the complete details will be published in INTERCOM when completed.

Service Awards in Engineering

Dr. Arthur D. Bruchman, (above center) professor of mechanical engineering, joined the faculty as instructor in July, 1946 (he was on leave several times). He was graduated in 1942 from the University of Minnesota, with high distinction, earned his M.S. degree at Penn State, in 1946, and M.E. degree at M.I.T. in 1956. His Ph.D. was conferred by the University of Michigan in 1963. He won the C. R. and Mary F. Lindback Award, Penn State's highest honor for excellence in teaching, in 1967; two years earlier he had been honored by the Allegheny Section of A.S.E.E. for the same reason. He has taught both undergraduate and graduate courses in machine dynamics and automatic controls and is co-author of "Mechanical Measurement and Instrumentation." With him, as Engineering Dean N. J. Palladino makes the presentation of the University's Service Award, is Dr. Donald R. Olson, head of the mechanical engineering department.

Julius De Carolis, associate professor of mechanical engineering, (also with Drs. Olson and Palladino), was appointed to the Engineering Experiment Station staff in 1946 as research assistant, accepted a position at the University of Illinois a year later, then returned to Penn State in June, 1949, as assistant professor of engineering research. He was placed in charge of the mechanical engineering laboratories in 1966. A 1939 graduate of Penn State, he received the M.S. in mechanical engineering in 1946.

William A. Dunn, associate professor of General Engineering, is assistant to Robert E. McCord (left) assistant dean for Continuing Education in Engineering. Dunn has also held staff positions in administration at the NSF. Academic year teaching in engineering. He is a subject matter specialist for development in quality control in the Continuing Ed program in engineering for the entire state, is concerned with in-plant programs, correspondence courses, and seminars. He is a 1948 graduate in industrial engineering and joined the Allegheny Campus staff in 1948 as assistant professor for associate and baccalaureate degree programs in math and engineering.

TEACHER—

(Continued from page one)

fessional meetings and to deliver papers, he also visited the Soviet Union under the auspices of the National Heart Institute to set up a collaborative effort in myocardial metabolism between Russia and the U.S.

Along with his administrative duties at Hershey and an active career as a researcher, this regimen adds up to what Dr. Morgan calls "almost a full time job — like 24 hours a day."

In his research, Dr. Morgan is studying two problems. The first involves factors regulating the growth of the heart, particularly in response to increased work. This situation may occur in people with hypertension where the heart enlarges or among those who lose part of their heart muscle because of myocardial infarct. The remaining muscle must then hypertrophy to maintain normal function.

"We are investigating the factors that control the synthesis of proteins in the heart and also their breakdown," Dr. Morgan explains. "If the heart is going to grow, it has to make the constituents at a faster rate than it degrades them. The average life of a protein in the heart is only about six days, so every two to three weeks, the heart has been replaced by new protein. It's a very dynamic process.

"Our other principal interest lies in trying to protect muscle that does not get normal blood flow as in coronary artery disease. This is called ischemia of the heart. We hope to identify changes that lead to death in the cardiac muscles and to find ways to allow the muscle cells to survive or maintain better function after a person has had a heart attack."

Dr. Morgan and his associates study heart metabolism through perfusion, in a process where the heart is removed from a rat and kept alive for several hours on an apparatus outside the animal's body. In the area of ischemia, this research has shown that a reduced flow of blood to the heart is much more destructive than reduced delivery of oxygen. Oxygen can be reduced and normal coronary flow still maintained.

"The real key lies in finding the stimulus which connects increased work by the heart to its growth," Dr. Morgan points out. "This is still not understood on a biochemical level. If we could understand it, we would have the ability to help the heart form more muscle protein and thus be able to compensate for an increased workload in patients who have had heart failure. If part of the muscle was lost during an attack and turned into scar tissue, the remaining muscle could grow and take over its functions."

Appointment

Dr. Walter G. Braun has been appointed assistant dean for instruction of the College of Engineering, succeeding Dr. Otis E. Lancaster, who will retire June 30 as associate dean but is expected to remain as George Westinghouse Professor of Engineering Education. In his new position, Dr. Braun has been serving as assistant dean for student instruction (University Park), will be in charge of the instructional program for engineering throughout the entire Penn State System. He is professor of chemical engineering and has been a member of the faculty since 1947. He has a graduate of Cornell University and holds advanced degrees in chemical engineering from Penn State.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For more information and funding source information, call 865-1372.

April 4, 1974

(123-1) Student to synthesize and interpret existing educational and development knowledge will be supported by the National Institute of Education (NIE). Priority topics include: testing and evaluation, early childhood education, school finance, individualizing instruction, career development, teacher education, student learning, adult and continuing education programs, equal educational opportunities and new approaches to education, and planning. NIE wants to improve existing school programs and implement new ones, by furnishing education practitioners and decision makers with appropriate R&D information. Proposals should be aimed at specific audiences (for example, administrators or teachers), should describe key R&D findings, describe relevant, on-going programs, discuss program risks, practices, and alternative theories; or describe demonstration projects in which research results were applied. Proposals will require about six months to complete and may start as late as Sept. 1974. The proposal deadline is expected to be April 23, 1974. For additional information contact: Milburn J. Thorne, Office of Dissemination and Resources, NIE,

Washington, D.C. 20038 (202)254-6560. (Ref: CFAO 13.575) (NSFR 10639-3-1/74)

(123-2) The National Institute of Education (NIE) intends to open a competition for grant awards based on the study of potential of various organizational arrangements that continually improve urban schools. Proposals must deal with public schools or clusters having a 50% student enrollment from low income families located in a large city. Philadelphia and Pittsburgh are included in the list of 50 cities cited. The NIE Research Program on Organizational Strategies for Improving Urban Schools will initially support programs to accomplish this objective. In a follow-on program, contracts will be laid for documentation and evaluation analysis in order to assist other schools considering similar problems. Under the grant program, "problem-solving" activity will be supported such as: problem identification, devising solutions, implementing solutions, and monitoring performance. Proposals which extend, re-focus, or add components to existing activities will be favored. NIE anticipates 3-year projects. The proposal deadline is April 22, 1974. For additional information, contact: Mrs. Judith Cherrington, Philadelphia on Local Problem-Solving, Room 639, NIE, Washington, D.C., 20038 (202)254-6497. (Ref: CFAO 13.575) (NSFR 10640-3-1/74)

erty on Local Problem-Solving, Room 639, NIE, Washington, D.C., 20038 (202)254-6497. (Ref: CFAO 13.575) (NSFR 10640-3-1/74)

(123-3) Under its Experimental Projects and Problem Assessment (EPPA) program directed toward the improvement of science education, the National Science Foundation has issued a two-part guide (E-74-27) — for preparation of formal proposals and for operation of experimental projects and problem assessment studies. As a first step, preliminary proposals must be submitted to NSF. Those found eligible may proceed to the formal proposal process. EPPA studies are formulated to solve problem-identified problems in science education. The same projects may be designed to test the mechanisms for increasing the availability of high school project activity as part of the curriculum.

(123-4) The Special Action Office for Drug Abuse Prevention issues requests for proposals (RFPs) for three major drug abuse prevention programs: Pharmaceutical Research, Planning and Coordination Functions, and Incentives Program

(Special Fund). Pharmacological research is long-term effort geared to develop non-addictive agents, new agents, and substitute alternatives; present analyses; planning and coordinating research; and applying research results to drug abuse prevention. The incentives program (special fund) is to finance special studies and evaluations to improve programs and service in drug abuse prevention. The incentives program (special fund) is to finance special studies and evaluations to improve programs and service in drug abuse prevention. The incentives program (special fund) is to finance special studies and evaluations to improve programs and service in drug abuse prevention. REMINDERS — DEADLINE DATES: April 15 for NEH Museum Programs' Exhibition Program (March 7 INTERCOM #119-4). April 15 for NSF Two-Way Communications Experiment (May 14 INTERCOM #120-2). April 15 and 16 for OE Shugart's research Field Initiated Research for Handicapped Children (March 28 INTERCOM #122-1). May 5 extended for OE Ethnic Heritage Study Program (Feb. 26 INTERCOM #118-2). June 1 for NEH Research Grants (March 9 INTERCOM #119-2). May 6 for NEH Research Grants (March 17 for NEH Fellowship Grants (March 3 INTERCOM #121-3). June 1 for NEH Film/TV Program (March 7 INTERCOM #119-4). June 1 for FOD Food Research Training Grants and Programs (March 21 INTERCOM #120-4). June 1 for NEH Selective Fellowship Program (March 14 INTERCOM #120-4).

University Calendar

April 4-14, 1974

Items to be included in this calendar should be sent to the editor, Room 312 Old Main, by Thursday of the week preceding publication.

Special Events

Thursday, April 4 — Sports: Men's tennis, vs. Georgetown, 3 p.m.
Thursday-Saturday, April 4-6 — Sports: NCAA gymnastics championships, Rec Hall.
Thursday-Friday, April 4-5 — 5 O'Clock Theatre, "Sunset Inn," Thursday at 5:20 p.m., Friday at 7:20 p.m., Pavilion Theatre.
Thursday, April 4 — Premiere of film, "Jazz Dance," 8 p.m., Room 112 Kern.
Thursday, April 4 — Nutrition Workshop on Obesity, 8 p.m., Room 101 Kern.
Thursday, April 4 — Weaving demonstration, State College Weavers, 11 a.m.-3 p.m., lobby, Kern.
Friday, April 5 — Alard String Quartet, 8:30 p.m., Music Bldg, recital hall.
Friday, April 5 — University Readers performance, 8 p.m., Room 112 Kern.
Friday, April 5 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Saturday, April 6 — Penn State Singers concert, 8:30 p.m., Schwab.
Saturday, April 6 — Sports: Men's golf, vs. Navy-Columbia, 1 p.m.; Men's rugby,

by, vs. F&M. Women's lacrosse, vs. Frostburg, 1 p.m.; Women's tennis, vs. Wilson, 10 a.m.

Sunday, April 7 — Sports: Men's baseball, vs. Ithaca, 1 p.m.

Sunday, April 7 — Artists Series, Chekov's "Uncle Vanya," film, 8:30 p.m., Schwab.
Sunday, April 7 — University Readers performance, 8 p.m., Room 112 Kern.

Sunday, April 7 — Graduate Commons Improvisational Theatre, 8 p.m., Room 112 Kern.

Sunday, April 7 — Chapel Service, 11 a.m., Eisenhower Chapel. Donald M. Crider, Religious Studies.

Sunday, April 7 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, April 7 — Eastern Orthodox Divine Liturgy, 10 a.m., HUB assembly room.

Monday, April 8 — Sports: Women's lacrosse, vs. Hartwick, 2 p.m.

Monday, April 8 — Graduate Commons Improvisational Theatre, 8 p.m., Room 112 Kern.

Tuesday, April 9 — Sports: Men's lacrosse, vs. Franklin and Marshall, 8 p.m.; Men's tennis, vs. Columbia, 3 p.m.

Tuesday, April 9 — GSA Workshop on Vegetable Gardening, 7:30 p.m., Room 112 Kern.

Tuesday, April 9 — "Crossroads," Lenten Meditations, 12 and 12:35 p.m., The Rev. Bob Boyer.

Tuesday, April 9 — East Asian Festival film, "The Bad Sleep Well," 7:30 p.m., Room 215 Hammond. Free.

Wednesday, April 10 — Musica da Camera, 8:30 p.m., Music Bldg, recital hall.

Wednesday, April 10 — Talk, "The Art of Lighting," by Gerald B. Ewing, 8 p.m., Schwab, with film, slides, readings, and dances.

Wednesday, April 10 — Sports: Men's tennis, vs. Bucknell, 3 p.m.

Wednesday, April 10 — Nonline Concert, 12:15 p.m., lobby of Kern.

Wednesday-Friday, April 10-12 — Five O'Clock Theatre, "Temple of Gold," Wednesday and Thursday, 5:20 p.m., Friday, 7:20 p.m., Pavilion Theatre.

Thursday, April 11 — Sports: Women's softball, vs. East Stroudsburg (scrimage), 3 p.m.

Thursday, April 11 — East Asian Festival performance, "An Evening of Asian Dance," traditional dances from China,

Japan and Korea, 8 p.m., Room 112 Kern.

Thursday, April 11 — "An Evening of Music and Conversation with Mike Reid," 7:30 p.m., Rec Hall. American Cancer Society benefit presented by Beta Sigma Rho.

Thursday, April 11 — "Crossroads," Lenten Meditations, 12 and 12:35 p.m., Eisenhower Chapel. A special Maundy Thursday "Celebration," The Rev. Ned Weller, celebrant.

Friday, April 12 — Campus 4-H Square Dance, 8 p.m., HUB Ballroom.

Friday, April 12 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday, April 12 — Folk and Square Dance Roundup, 7:30 p.m., North Gym White.

Saturday, April 13 — Sports: Men's baseball, vs. Rutgers, 1 p.m.; men's tennis, vs. Rochester, 2 p.m.; rugby, vs. Maryland; Llantion Llytton craft and field displays.

Sunday, April 14 — Chapel Service, 11 a.m., Music Bldg, recital hall. Service of Music and Lessons by Chapel Choir.

Sunday, April 14 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Seminars

Thursday, April 4 — Agronomy, 3:30 p.m., Room 301B Ag. Adm. Bldg.; R. Stutzman on "No Tillage — A Method of Seeding Legumes into a Chaps Sward."
Thursday, April 4 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Wolfgang Meyer, mechanical engineering and head, Automotive Research Program, Pennsylvania Transportation Institute, on "Emission Control Problems and Solutions in the Auto Industry."

Thursday, April 4 — Chemistry, 12:45 p.m., Room 310 Whitmore. Gary M. Heflie, University of Indiana, on "Basic and Practical Investigations of Flame Spectrometry."

Thursday, April 4 — Meteorology, 3:55 p.m., Room 26 Min. Sci. Dr. H. Tennekes, aerospace engineering, on "2-D and 3-D Turbulence."

Thursday, April 4 — Engineering Acoustics, 4 p.m., Room 71 Willard. Kenneth P. Roy on "Sound Power Measurements in Reverberant Rooms."

Thursday, April 4 — Anthropology and Religious Studies, 3 p.m., Chapel lounge. Victor Turner, University of Chicago, on "Pilgrimage and Communities: Pilgrimage from the Inside."

Thursday, April 4 — Remote Sensing, cancelled.

Friday, April 5 — Religious Studies and Geography, 4 p.m., Room 26 Deike. Victor Turner on "Iconophily and Iconophobia in Western Christian Pilgrimages: Pilgrimage Types and Dynamics."

Monday, April 8 — Computation Center, 7:30 p.m. JCL (5), Room 110 Osmond, Graphics (5), Room 228 Computer Bldg.

Monday, April 8 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. James Meyer on "Localization of Plant Infection."

Monday, April 8 — New Communities, 2 p.m., Room 322 Sackett. Peggy Wireman, Office of New Communities, HUD, on "Issues in Social Planning of New Communities."

Monday, April 8 — Religious Studies, 4 p.m., Eisenhower lounge. Victor Turner, Professor of Social Thought, University of Chicago, on "Localism and Universalism: The Case of St. Patrick's Purgatory in Ireland."

Monday, April 8 — (Special) Meteorology, 3:55 p.m., Room 26 Min. Sci. Dr. John A. Reagan, University of Arizona, on "Optical Remote Sensing of Aerosols at the University of Arizona: An Update."

Tuesday, April 9 — Comparative Literature luncheon, 12:15 p.m., HUB dining room "A". Gregory Rabassa, visiting fellow,

Institute for the Arts and Humanistic Studies, on "Negritude in Brazilian Literature."

Tuesday, April 9 — Operations Research, 3:45 p.m., Room 267 Willard. Dr. Barbara Ryan, statistics, on "The Bus Paradox and Other Waiting-Time Phenomena."

Tuesday, April 9 — Religious Studies, 4 p.m., Eisenhower lounge. Victor Turner, Professor of Social Thought, University of Chicago, on "Marian Pilgrimages: Sacred Motherhood in Five Epochs."

Tuesday, April 9 — Solid State Physics, 1 p.m., Room 339 Davey. Dr. James Bray, University of Illinois, on "Quasi One Dimensional Systems and Paraconductivity."

Tuesday, April 9 — Translation, 8 p.m., Room 101 Kern. The seminar is sponsored by Comparative Literature and English Colloquium; the participants: In-Louis Hyslop, French; David Stewart, English; Gregory Rabassa, Visiting Fellow, Institute for the Arts and Humanistic Studies; Robert Lima, Spanish and comparative literature, Interceptor.

Tuesday, April 9 — Microbiology, 4 p.m., Room 52 Frear. P. Wais on "Host-Bacteriophage-Graduate Student Interaction with Agrobacterium tumefaciens."

Wednesday, April 10 — Computation Cen-

ter, 7:30 p.m. JCL (6), Room 110 Osmond; Graphics (6), Room 228 Computer Bldg.

Thursday, April 11 — Agronomy, 3:30 p.m., Room 301B Ag. Adm. A.D. Wilson on "Development of Analysis Techniques for ERTS-1 Digital Data."

Thursday, April 11 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Robert Piper, LEX Systems, Inc., Menlo Park, California, on "Transportation, Air Pollution, and Urban Form: Is This Trip Necessary?"

Thursday, April 11 — Chemistry, 12:45 p.m., Room 310 Whitmore. Waldemar Adam, University of Puerto Rico, on "The Chemistry of Blotuminescence."

Thursday, April 11 — Engineering Acoustics, 4 p.m., Room 71 Willard. Walter F. King, Applied Research Lab., on "Flow Acoustics Studies in the Garfield Thomas Water Tunnel."

Friday, April 12 — Analytical Chemistry, 11:10 a.m., Room 333 Whitmore. Chih-Yuan C. Ting on "Charge Transfer Spectra and Ion Pairing of Cyclopentadienyl Salts."

Friday, April 12 — Geosciences, 1 p.m., Room 22 Deike. Ted Irving, Chief, Magnetism Division, Department of Energy, Mines and resources, Ottawa, on "Green-ville Paleomagnetism."

Exhibits

Museum of Art — Eighth Dulin National Print and Drawing Competition Exhibition. Gallery B, through April 10. Selections from the Permanent Collection, Gallery A. Bill Hanson, Harvard Paintings, opening April 7.

Zoller Gallery — Contemporary Chinese Paintings, through April 13.

Black Cultural Center — Smithsonian Traveling Exhibit on James Weldon Johnson, black lawyer, politician, poet and diplomat.

Chambers Gallery — Children's Group Show, through schools, until April 19.

HUB: Art Alley — Ukrainian Club exhibit, until April 15.

Films

Thursday-Saturday, April 4-6 — USG film, "Alice's Restaurant," 6:15, 8:20 and 10:30 p.m., HUB assembly room.

Thursday, April 4 — Free-J film, "Forbidden Games," 8 p.m., HUB ballroom.

Monday, April 8 — Graduate Commons America Film Series by Alistair Cooke, "America: The Promise Fulfilled and the Promise Broken," 12:05 p.m., Room 112 Kern. Also HUB assembly room, 2:15 p.m.

Wednesday, April 10 — Commonsplace Theatre, "David Copperfield," 8 and 10 p.m., Room 112 Kern.

Thursday, April 11 — Free-J film, "Day at the Races," 8 p.m., HUB ballroom.

Thursday-Saturday, April 11-13 — USG film, "Three in the Cellar," 6:15, 8 and 10 p.m., HUB assembly room.

Meetings

Monday, April 8 — College of Health, Physical Education and Recreation faculty, 7 p.m., Room 109 White.

Sunday — U.S.G. Supreme Court, 7:30 p.m., Room 203 HUB.

Mondays — O.T.I.S., 6:30 p.m., Room 203 HUB.

Mondays — USG Senate, 7:30 p.m., HUB assembly room.

Wednesdays — Academic Assembly, 7:30 p.m., Room 351 Willard.

Thursday — Hetzel Union Board, 7 p.m., Room 206 HUB.

Lectures

Thursday, April 4 — Walton J. Lord, art history, "Chinese Painting Yesterday and Today," 8 p.m., Zoller Gallery. Illustrated.

Thursday, April 11 — The Annual Ray H. Dotterer Lecture on Philosophy, 8 p.m., Room 101 Kern. Dr. Josiah Thompson, Haverford College, on "Who Wrote Kierkegaard's Books?"

Tuesday, April 9 — I.E.E.E. lecture, 7:30 a.m., Room 329 Electrical Engineering East. Kirby Watson, Reliance Electric Co., Pittsburgh, on "The Automatic 32 Programmable Controller." Displays also.

Tuesday, April 9 — Gregory Rabassa, visiting fellow, Institute for the Arts and Humanistic Studies, on "Beyond Magical Realism — Thoughts on 100 Years of Solitude," 8 p.m., Room 101 Kern.

Monday, April 8 — Gamma Pi Epsilon, women's pre-medical society, lecture, 8 p.m., McElwain plant lounge. Dr. Ira Klemens, health education, on "Getting Through Medical School and Loving It."

Penn State Singers

When the Penn State Singers, directed by Raymond Brown, professor of music, (at right) gives its annual Spring Concert Saturday (April 6), the program will include not only a variety of composers but diverse themes and combination of singers to sing them. Two medleys by P. D. Q. Bach will be included, one of them being "My Bonnie Lies with the Smiths," but then there will also be motets by Monteverdi and choral compositions by William Billings and four songs by Brahms. In all, the evening's music (in Schwab, doors open at 8 p.m., program at 8:30) will provide something for just about everybody who likes choral singing in the Renaissance-Baroque mode as well as that of the more contemporary Vaughan Williams.

The Arts—Chekhov film, lecture, theatre, dance

One of the greatest achievements of British 20th century theatre, the production of Chekhov's "Uncle Vanya," directed by Sir Laurence Olivier, will be presented in a filmed version as an Artists Series Special Event Sunday, April 7, at 8:30 p.m. in Schwab Auditorium.

Universally acclaimed by the critics when it was presented at the Chichester Festival, the production includes Sir Laurence, Michael Redgrave, Joan Plowright, Rosemary Harris, Sybil Thorndike, Max Adrian, Lewis Casson, and Fay Compton.

"No other production in England, or probably elsewhere, reaches so high a mark on so many different scores," the critics said, hailing it as "a living work of art perfect in every conceivable shade of detail."

Tickets are 50 cents for students, \$1.00 for non-students, and those not sold at the HUB Booth will be available at the door the night of the performance.

The current Five O'Clock Theatre production at Pavilion Theatre is "Sunset Inn," a one-act play by Michael Shapiro, senior

in English, directed by MFA candidate Tom Leak, graduate student in theatre arts. The play opened yesterday and continues today (Thursday, April 4) at 5:20 p.m. and tomorrow at 7:20 p.m.

Next week, April 10-12, the play will be "Temple of Gold," which was adapted from a William Goldman novel by Jill Landis, graduate student in theatre arts. Rodney Kemerer, also theatre arts graduate student, and Steve Hubickas, of WPSX-TV, will be performed Wednesday and Thursday at 5:20 p.m. and Friday at 7:20 p.m.

A 20-minute film, produced and directed by film instructor Christian Stoianovich and featuring Jean Sabatine's Jazz Dance Theatre will premiere today (Thursday) at 8 p.m. in Room 112 Kern.

Written by David Samuelson, the film documents rehearsals and warm-up sessions with jazz dance classes, culminating in a performance of "Angles of Impact" by the troupe.

Charles Shoemaker, a 1973 University graduate, directed the cinematography, and

narration is supplied by Carla White and David Aston-Reese. Film undergraduate Robert Fisher co-edited with Stoianovich. "A Portrait of Contemporary Jazz Dance" was made through the Department of Theatre and Film as a continuing education service of the College of Arts and Architecture.

Gerald B. Ewing, noted international authority on lighting and color theory will present an illustrated public lecture on "The Art of Lighting" Wednesday, April 10, at 8 p.m. in Schwab Auditorium. The psychological problems of lighting and its practical applications in visual design, psychology, and ecology are among the subjects Mr. Ewing will discuss. A frequent speaker at international conferences, his design credits include New York's Time-Life Building, Washington's Watergate, and Colonial Williamsburg.

The talk, which is sponsored by the Department of Architecture, will also include readings, live dance, and lighting demonstrations.

lion problems, Monday and Tuesday, April 29 and 30.

Dr. Mayer has served as a member of the Nutrition Division of the Food and Agriculture Organization of the United Nations (FAO), and as a consultant to FAO, World Health Organization (WHO) and UNICEF in technical missions in various continents. In particular, he led a technical mission to wartime Biafra in 1969. He is presently a member of the Protein Advisory Group of the United Nations System. He is also head of the United Nations Task Force on Child Nutrition.

As the Chairman of the National Council on Hunger and Malnutrition in the U.S., Dr. Mayer had a major role in calling the Nation's attention to the nutritional problems of the poor in America. In 1969, he was appointed Special Consultant to the President of the U.S., entrusted with directing the organization of the First White House Conference on Food, Nutrition and Health, which he chaired. He has since served as Chairman of the Nutrition Division of the White House Conference on the Aging. He is presently a member of the President's Consumer Advisory Council and Chairman of its Health Committee.

Lectures—literature, classics, nutrition

Gregory Rabassa, professor of Romance languages and comparative literature at Queens College will be Visiting Fellow of the Institute for the Arts and Humanistic Studies during the week of April 8th. His visit will be co-sponsored by the Department of Spanish, Italian and Portuguese and the Comparative Literature Program.

Rabassa's early work was in the field of Brazilian literature, dealing with the Black contribution to Brazilian letters. An outstanding translator of Latin American writing, Rabassa's credits include "100 Years of Solitude, Leaf Storm and Other Stories."

His major lecture, scheduled for the evening of Wednesday, April 10, at 8:00 p.m., in 101 Kern Graduate Building, is titled "Beyond Magical Realism: Thoughts on 100 Years of Solitude." On Tuesday, April 9th, he is scheduled for a talk to the Comparative Literature Luncheon Group on the theme of "Negritude in Brazilian Literature."

A round table discussion under the auspices of the English Colloquium has been planned to cover translation problems, market, uses of translation, etc. This event is scheduled for Tuesday, April 9th, at 8:00 p.m., in 101 Kern Graduate Building.

Rabassa will also participate in courses on Latin American Literature during his stay at Penn State.

J. Raymond Hawthorne, currently visiting professor of classics and retired head of the classics department at Bradford College, England, will discuss "The 1973 Production of the Bradfield Greek Play, Euripides' 'Bacchae'." Tuesday, April 9, at 8 p.m. in Room 111 Forum. The Bradfield productions of Greek classics, done by the students in Greek, are well known in Europe, and Hawthorne was language director for the Euripides play. During various stages of the production, films were taken, and the talk April 9 will follow a 20-minute showing of some of these scenes. The talk, therefore, may have interest not only to those concerned with the classics but to theatre production majors and faculty.

Dr. Jean Mayer, professor of nutrition at Harvard University and this year's Biological Science Lecturer, will present a series of three talks at the University Park Campus on the regulation of food intake, domestic, and international food and nutri-

Entrees sought for charity beer-race

A new "Masters" division has been added to the annual Phi Psi 500 race, a contest sponsored by Phi Kappa Psi fraternity for the benefit of a local charity. The race will be run April 27.

This year's "500" will aid the Centre County Day Care Program. In the previous five races, proceeds went to the Centre County Community Hospital, and the contribution in 1973 amounted to \$1,100.

Phi Psi "500" is a beer-drinking-running race, in which each contestant runs a course of 1.1 miles, stopping at six local bars and refreshing themselves with eight ounces of beer at each stop. The race ends at Phi Kappa Psi fraternity, 403 Locust Lane.

The rules state that cola may be substituted for beer, but, nevertheless, entrants must be 21 and able to show an LCD card. The "Masters" division was added this year — there are fraternity, sorority, and independent divisions also — to encourage more members of the faculty to participate, especially the joggers and those who have conditioned themselves by running. A "Master" is anyone 30 years or older. A total of 80 runners completed in 1972; the goal is to top 100 this year.

Each participant must have a sponsor (or sponsor himself) who pays \$10 for the privilege. Many downtown merchants take out a sponsorship, either for a specific runner or for a runner that Phi Kappa Psi will match. An additional incentive, each runner is given a Phi Psi T-shirt.

Trophies are awarded to the first three finishers in each division.

The winning time last year was 5:46, but the Masters' winner will be undoubtedly somewhat slower.

Those wishing to donate to the cause will be welcomed, especially at the foot of The Mall, on the day of the race, where a table will be set up to receive contributions.

Tax help program off to good start

The income tax information program instituted by Beta Alpha Psi, accounting honor fraternity, and the Accounting Club got off to a good start in March, not only first of the semester, but also the beginning of the 34 students to serve as sources of tax help, but also from the number of "customers."

Intended to help students by providing answers to income tax puzzles, the program demonstrated the need for such a service when in the first week the two of three information "specialists" manning the table in the HUB at any one time were busy almost constantly.

Beta Alpha Psi and the Accounting Club will continue the service until April 30 and may expand it to other areas of the campus, says Ted Backman, one of the project coordinators, in order to give more students the opportunity to obtain help.

The service does not include filling out income tax forms, but it does provide answers to some pretty tough questions. The accounting majors don't have the answer, they seek help from the advisor to the project, Dr. John P. Devereaux, assistant professor of accounting.

The service, on the first floor of the HUB, is provided Monday, third through sixth periods; Tuesday, two through sixth; Wednesday, three through sixth; and Thursday, two through sixth periods.

An odd place for picture-taking

George Bouwman, of the department of theatre and film, is riding a horse so he can get a "shot" for a mini-western, "Hangman," written and directed by film student Phil Stark. The "western" action took place in Brush Valley, with actors John Metzler, Oave Winter, and (behind horse), Clark Bouwman. "I'm not usually cameraman for a student film," Bouwman declares, "but it is my horse, and she wouldn't stand still for anyone else to make this shot from the henge's point of view." The film is expected to premiere later in the Spring Term, along with other new student films.

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment

JUNIOR RESEARCH AIDE, APPLIED RESEARCH LABORATORY — University Park

Responsible for providing routine engineering assistance with a variety of ARL projects. High school education plus equivalent of graduation from electronic technical institute plus one to two years of experience.

SPEECH CLINICIAN — Hershey Medical Center

Responsible for performing a wide variety of duties in the diagnosis, treatment and evaluation of persons with various speech difficulties and defects. Master's degree or equivalent in Audiology and Speech Pathology with adequate course

Owison, 655-1357 (Network Line 454-1357). Do not contact the ones having the vacancy. Applications will be accepted until 5 p.m., Thursday, April 4, 1974.

credits in speech-hearing to be certified by the American Speech and Hearing Association, plus one to two years effective experience.

MANAGER OF PATIENT ACCOUNT SERVICES — Hershey Medical Center

Responsible for establishing and directing patient account functions to include billing, credit, collection, and related activities involving third party and billing problems. Bachelor's degree or equivalent in accounting or business administration plus five to seven years of experience in hospital-patient accounts are included in directing collection.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

General Stores

The many new items now stocked at General Stores can be seen in a new catalog which General Stores has had printed and distributed to all departments on campus.

Because of the long delivery time needed for electric typewriters, General Stores has ordered a supply of commonly used models and colors from IBM, and they will be available by June 1. They can be requisitioned with the standard "Requisition-Invoice" form G2.22. Because the supply is limited, all requests should be placed by May 1 to assure delivery by July 1.

Faculty, Staff Salary Planning

STATEMENT BY PRESIDENT OSWALD ON SALARY PLANNING FOR 1974-75

When Governor Shapp announced the proposed state budget to the Legislature three weeks ago, President Oswald indicated that the University's highest priority would be funds for salary increases for its employees and for significant additional costs for staff benefits, in particular state retirement and Social Security.

Planning is now underway to make salary increases effective July 1. Toward this end, each administrative area is tentatively being allocated means needed to fund an average of 6.5 percent increase on all filled faculty and staff positions. An additional one percent will be reserved for further allocation after it has been determined where University-wide equity adjustments are needed between disciplines, between different pay plans, between campuses, or in reference to other factors such as affirmative action. Thus, the University is attempting to achieve an overall average salary increase for faculty and staff at 7.5 percent for 1974-75. An additional allocation will be provided for basic faculty promotions.

In planning for these salary increments, vice presidents, deans, campus provosts and directors have been given procedural guidelines which call for an allocation of approximately 55 percent of the estimated funds available for basic increases to help meet general inflation, with the remaining 45 percent to be allocated on a merit basis.

Similarly, planning is underway for increasing clerical salaries.

Salary schedules for technical service employees are presently under negotiation.

66 Fulbright-Hays scholars here from 25 countries for education conference

The University will be host to 66 senior Fulbright-Hays scholars from 25 countries April 17-20, when the visiting scholars will attend a conference on higher education sponsored by the University Committee on International Programs (UCIP).

The conference is one of three regional programs for Fulbright-Hays scholars being held in the United States this year through the sponsorship of the Committee on International Exchange of Persons and supported by a grant from the Department of State.

Fifteen of the visiting scholars are physicians, and a special program has been developed for them in conjunction with the College of Medicine at Hershey. They will attend specialized sessions at the Hershey Medical Center as well as participate in conference activities at University Park.

President Oswald will be the keynote speaker when the group has its first formal meeting on April 17. Dr. Russell Larson, provost, is general chairman for the conference, and additionally, he will be one of the major speakers.

The UCIP, under the chairmanship of Dr. Joseph Alessandro, has major responsibility for program development and arrangements. Conference arrangements and administrative details are handled by Continuing Education Conference Center staff.

UCIP planned the conference with the intent of heightening the participants' awareness of contemporary issues in higher education and to provide them an opportunity to meet with Americans and other scholars from abroad for scholarly discussions of international concern.

Members of the faculty may attend the major addresses and discussion group sessions on an "available space" basis. The program, other than social activities, will take place in the Conference Center of the J. O. Keller Bldg. Thursday morning's session will consider "A Look at Higher Education in the U.S." (at 9:15 a.m.), and discussion groups will consider (at 10:30 a.m.) "Alternate Learning Plans."

The Thursday afternoon session, on the theme "What Education Can Do," will have two addresses, on "Links between Food and People" and "Links between Education and Problem Solving: Energy and Pollution."

Friday morning, the group will hear an address on "Links between Resources and Human Benefits: Maximizing Human Benefits," at 9 a.m. During the afternoon, the participants will visit various University facilities on the campus.

More information may be obtained about the program from the office of the UCIP, 865-9549.

Video tapes of forensic session available

Senate hears discussion on collective bargaining

The University Faculty Senate at its meeting April 2 got a detailed look at collective bargaining.

In a special 90-minute forensic session, senators heard from representatives of the American Association of University Professors (AAUP), the Pennsylvania State University Professional Association (PSU PA), the Graduate Student Association, and Open Options, another faculty group.

Robert Scholten, president of the Penn State AAUP Chapter, said his group believes unionization is the faculty's "best hope to hold on to what we have gained and regain what we have lost."

Faculty influence has steadily de-

News in brief

EMS OPEN HOUSE

Exhibits, demonstrations, films, slide shows, and tours will be featured in the "Energy-Man-Environment Exposition" Open House program of the College of Earth and Mineral Sciences, April 20 and 21, from 1 to 5 p.m. both days.

The Student Council is sponsoring the exposition, which will include tours of the meteorology department's weather station on Deike Bldg. and the mining engineering section's ventilation tunnel under the Mineral Industries Bldg. Glassblowing will be demonstrated, as will the making of glass fibre. A piece of moon rock will be displayed.

Elementary school children, as well as adults, will be interested in the many exhibits.

SPEECH HONORARY

Members of the faculty who are members of the speech honorary society, Delta Sigma Rho-Tau Kappa Alpha, but not affiliated with the local chapter, are urged to make their membership in the society known to Jean Lutz, 865-7751, between 8 a.m. and 5 p.m., or John Pharr, president of the local chapter, at 865-4903.

EXHIBITS IN NEW YORK

Two exhibits — "Three Swiss Painters" and "Charles Sheeler: The Works On Paper" — which were organized by the University's Museum of Art, are currently on display in New York Galleries. The Swiss Painters show, which was here Sept. 23-Nov. 4, is at the Guggenheim Museum and will remain there until June 23. The Sheeler paintings will be at the Terry Dintenfuss Gallery until April 20. Graduate student John Driscoll organized the Sheeler exhibit here; the Swiss Painters show was organized by Dr. George Mauner, professor of art history, and William Hull, Museum director.

CONSERVATION LECTURE

"Conservation Planning — A Growing Public Concern" will be discussed by a prominent authority on conservation, Dr. Norton H. Nickerson, botanist, ecologist, and Tufts University faculty member, Monday, April 15, in Room 60 Willard. Dr. Nickerson is president of the Massachusetts Association of Conservation Commissioners and many other groups related to the subject.

SEMIOTICS LECTURE

Juan Pablo Bonta, Ball State University, will lecture on "Design Semiotics," Tues-

day, April 16, at 7:30 p.m. in Room 62 Willard Bldg. The departments of architectural engineering, architecture, landscape architecture, man-environment relations, and regional planning are cooperating in presenting Bonta, who is the John R. Emery Distinguished Professor of Architecture at Ball State. Semiotics is the general science of signs, and Bonta's lecture will consider the meaning of signs in design, and will review major efforts to formalize an architectural or environmental semiotics. Bonta, born in Hungary, obtained his Master of Architecture degree from the University of Buenos Aires. After private practice in 1959-61, he served as advisor to the Argentine Presidency in 1961-64. He served on the faculty of the University of Buenos Aires in 1964-69 and 1971-73.

LESAGE ARTICLES

Dr. Laurent LeSage, professor of French, has contributed seven articles to the new *Encyclopaedia of World Biography*, concerning twentieth century French poets. McGraw Hill publishes the encyclopedia. He has written articles for several other encyclopedias on various aspects of French literature.

KNEEBONE PROGRAM ADVISOR

Dr. Leon Kneebone, professor of botany and plant pathology, has been invited by the National Organizing Committee of Japan for the Ninth International Congress on the Cultivation of Edible Fungi to serve as International Program Advisor. He will aid the committee to make final plans for the Congress during a two-week stay in the country. The Congress will be held Nov. 4-13.

BEHREND FACULTY AWARDS

Dr. John Free and Wayne H. Scott, of Behrend College faculty, have both received National Endowment for the Humanities awards. Dr. Free, assistant professor of English, received a grant to participate in a summer seminar at the Santa Cruz campus of the University of California. The seminar is on "Studies in the Renaissance imagination." Dr. Scott, also assistant professor of English, won a stipend to pursue research in "Popular Culture and the American Revolution, 1760-1780."

RECORDS POETRY FOR LIBRARY

Dr. Judith Moffett, assistant professor of English, Behrend College, recently recorded her poetry for the Library of Congress, to be placed in the Archive of Recorded Poetry and Literature. The Archive includes the works of more than 700 poets who read their poems. Dr. Moffett recently returned

(Continued on page four)

Ask nominations for Walker award

Nominations for the annual Eric A. Walker Award will be received in the office of Jane McCormick, Assistant to the Vice President for Student Affairs until April 22, Room 235 Bouck.

The president of the undergraduate (college) councils will make the final nomination, as Dr. Walker has requested, from among the suggestions presented to them by the faculties and deans of the several colleges, and this will be sent to President Oswald for final approval. Graduating seniors, from September, 1973, through June, 1974, are eligible for the award, which is given to the person "who has enhanced the public esteem and renown of" the University.

In writing

Dr. Carol A. Cartwright and Dr. G. Philip Cartwright, both associate professors of education, are the authors of "Developing Observation Skills," published last month by McGraw-Hill. The paperback book, designed for teachers in all areas and at all levels, is intended for use in early exposures to observation and the role observation plays in instructional decision-making. It is designed in a workbook format, with perforated pages that can be removed after classroom projects are completed.

The book is part of the McGraw-Hill Series in Special Education. Dr. Robert M. Smith, professor of special education at the University, is consulting editor of the series.

Dr. Richard C. Bradt, associate professor of ceramic science, is co-editor of two books, "Fracture Mechanics of Ceramics," which have just been published by Plenum Publishing Company.

The other co-editors are Dr. D. P. H. Hasselman, of Lehigh University, Bethlehem, and Dr. F. F. Lange, of Westinghouse Research Laboratory, Pittsburgh.

The books are the proceedings of an international symposium on the fracture mechanics of ceramics, held at Penn State last summer under the sponsorship of the Office of Naval Research. The first volume is subtitled "Concepts, Flaws, and Fractography," while the second is "Microstructure, Materials, and Applications."

Death

Anne Forbes, who served in Home Economics Extension work at the University from 1921 to 1947, died in San Diego on March 3. She was named instructor in 1921 to serve in the Lancaster County Agricultural Extension Association office and was made Extension Representative in Home Economics some years later. She was 86 at the time of her death.

Leaves

Hubert C. Smith, assistant professor of aerospace engineering, will work on his doctoral degree at the University of Virginia during a leave of absence of one year beginning in September.

LIBRARY NOTES

The Reference Department of The University Libraries will offer special individual sessions for students in the social sciences and humanities having problems locating information to write a paper or prepare a speech.

Sessions began yesterday, April 10, from 1 to 3 p.m. and will be offered on any Tuesday morning (10 to 12), or Wednesday afternoon (1 to 3), from now on. Special arrangements can be made for other times.

It is necessary to register topics in advance of a session at the Reference Department Desk, first floor, East Pattee, or by calling 865-6368.

College of Education plans convocation May 5

The College of Education will climax its year-long celebration of its 50th anniversary with a convocation May 5 that will feature a panel discussion by three distinguished graduates of the College.

Chairman of the 50th Anniversary Committee is Dr. Ned C. Deihl, professor of music education, and other members of the

Committee are Dr. Paul W. Bixby, professor of education; Dr. Gordon C. Godeby, associate dean for Continuing Education; and Jean W. Wald, secretary. The panel includes:

Dr. Michael H. Kean, '66, executive director for research and evaluation, Philadelphia School District.

Lecture series honors late head of philosophy

Dr. Ray H. Dotterer, who was the first head of the Department of Philosophy, organized in 1933, is honored by a memorial lecture series in which Dr. Josiah Thompson, Haverford College faculty member, will speak today, (Thursday, April 11) at 8 p.m. in Room 101 Kern.

Dr. Thompson will raise the question, "Who Wrote Kierkegaard's Books on Philosophy and Religion?"

Dr. Dotterer joined the faculty on a part-time basis in 1919 while he was serving in the ministry of the Reformed Church. He taught rhetoric, at the time of the Student Army Training Corps program during World War I. In 1920 he was appointed assistant professor of philosophy and in 1923 was named associate professor. Three years later he accepted appointment as professor of philosophy at Franklin and

Marshall College, remaining for four years before returning to Penn State in 1930 as professor of philosophy. He continued his work of the department of philosophy until retiring in 1947. He died in 1967 at the age of 87.

The lecturer, Dr. Thompson, has written three books on Kierkegaard, including a definite biography. He is also author of "Six Seconds at Dallas."

The Arts: Artists Series, music, theatre, shows

having completed a tour of the principal cities of Japan.

Parkening now plays an average of 60 concerts a year, has made many recordings, and is given high praise by music critics everywhere.

Among the composers whose works he will play in Schwab are John Dowland and Alonso Mudarra, 16th century; Bach, Handel and Sylvius Weiss, 18th century; Debussy, Ravel, Antonio Luro, and Isaac Albeniz of the 19th and 20th centuries.

The current Five O'Clock Theatre production in Pavilion Theatre (Thursday and Friday) is "Temple of Gold," an adaptation of the William Goldman novel. Jill Landis is director. The curtain time is 5:20 p.m. Thursday, 7:20 p.m. Friday. Free tickets are distributed beginning a half hour before curtain.

A one-woman show with more than 40 paintings by Eleanor Zygler, associate professor of art at the University, will open Sunday in the Hammond Gallery. The exhibit, entitled "Images, Places and Seasons," will be on display until April 28. An opening reception will be held from 3 to 5 p.m. April 14 in Hammond Gallery. The show represents the work accomplished while Miss Zygler was on leave and traveled in Guatemala, Costa Rica and the Canary Islands. A graduate of Carnegie-Mellon University, Miss Zygler received her master of arts degree at Mills College.

Dr. John Reich, currently serving as visiting professor in the department of theatre and film, is directing the production of Arthur Schnitzler's "La Ronde," that opens at Playhouse Theatre Friday, April 19, to the general public, with performances also April 20 and 23-27.

Dr. John Reich, currently serving as visiting professor in the department of theatre and film, is directing the production of Arthur Schnitzler's "La Ronde," that opens at Playhouse Theatre Friday, April 19, to the general public, with performances also April 20 and 23-27.

Theatre productions, will open April 15 (at Playhouse Theatre, Arts Building). Ticket information and reservations may be obtained by calling 865-1884.

Dr. Reich retired in 1972 as director of the Goodman resident professional theatre and the School of Drama of the Institute of Chicago. While there, he produced and/or directed 93 major productions, 53 plays for children, and 87 stage productions, all in 15 years. This followed a long career as director in Europe, New York, Hollywood and for various festivals, as well as for CBS television. He was also Columbia University professor while with television and off-Broadway theatres.

Liturgical music of the season will be presented by the Penn State Glee Club and the choir of Immaculate College, Mondak, April 15, in the Music Bldg. recital hall. Directed by Bruce Trinkley, assistant professor of music, the Glee Club will sing three lauds by Francis Poulenc, organ choruses by Beethoven and Mussorgsky and several American spirituals. The visitors will sing a spiritual and works by Verdi and Niccolò Porpora. Then the 16 groups will join in "How Lovely is the Dwelling Place" by Brahms.

Graphics by Six Swiss Sculptors — Alberto Giacometti, Le Corbusier, Max Bill, Jean Tinguely, Robert Mueller, and Bernhard Luginbuhl — will be on display in Gallery B, Museum of Art, April 14 to May 12. The graphics, by artists known primarily for their sculpture, are nevertheless complete art works in themselves. Six works are to be exhibited, organized by the Smithsonian Institution Traveling Exhibition Service. Museum hours are noon to 5 p.m., every day except Monday. Tours of the exhibits are conducted at the Museum every Thursday at 1:30 p.m.

Service, Health Services Administration, Faculty Studies and Planning Grants include both study to determine the feasibility of establishing (by expansion or otherwise) or operating emergency medical services systems and planning the establishment and operation of such systems. Establishment and Initial Operation and Expansion and improvement grants are self explained. Proposals for these grants have been distributed and are available and available 3/29/74, 3/29/74.

(124-5) Research into the delivery of emergency medical services in rural areas is proposed by the Public Health Service. The project will research the delivery of emergency services, methods, devices and delivery. The proposed research was announced in Federal Register (39FR1550, 3/29/74). The information was included and is available 3/29/74.

(124-6) A full scale search of potential funding sources can be made for projects in research, research, continuing education, and follow-up. You may begin a search by filling out a single-page Preliminary Proposal (PPO) form available from M. R. Kohler, Room Old Main (655-214). Completed PPOs will be passed through the PSU Research Information Office, the Office of Federal Programs, and the State Foundation or some combination of them depending upon the kind of program described. List of potential sponsors is selected from newspapers and state agencies, foundations, and industries. Interested sponsors can save time in proposal processing.

Instruction—Research—Continuing Education—Fellowships

For more information and funding source information, call 865-1372.

April 11, 1974

(124-1) The Research Applications Directorate of the National Science Foundation (NSF) intends to make awards in two categories of research under its Office of Research and Development. Category A is a system analysis and engineering evaluation of concepts for ocean thermal energy conversion, including study and formulation of a test program leading to the conceptual design of test facilities. One award is contemplated for Category A at a 60 professional-year level for nine months. The deadline for Category A proposals is May 7, 1974. Category B is advanced research and technology on key elements of the program. Five awards, each in a separate subcategory, are contemplated for Category B. The award periods are 12 months, and the deadline for proposal submission is July 9, 1974. Proposals solicited under Category B can include research plans to design and fabrication of components and subsystems, studies of energy delivery systems, environmental assessment studies, and research on biofouling, corrosion, and materials compatibility. The NSF solicitation NSF 74-7 has been distributed and is available. Also in the energy conversion area, NSF solicitation NSF 74-11

has been distributed. Under this research, NSF is seeking to stimulate research on the definition of requirements and advancing the technologies of wind energy conversion systems. For both programs the contact is: Distribution Section, Administration Services Office, NSF, 1800 G Street, N.W., Washington, D.C., 20555 622-6328-4216.

(124-2) The Office of Education has announced an April 29, 1974 closing date for Fulbright-Hays Training Grants which consist of four separate programs: Doctoral Dissertation Research Abroad with preference given to foreign languages and areas critical to the national interest; Faculty Research Abroad relating to institutions developing programs in foreign languages and area studies; Professional Research Abroad also relating to the development of foreign language and area studies programs in American education, and Foreign Curricula Consultants to help develop foreign language and area studies programs. Visits by foreign teachers are also financed for the above purposes. Funding criteria have been published in the Federal Register (39FR1216, 3/26/74), was distributed and is available. The program contact is: International Studies Branch, Division of International Education, Office of Education, ROB-3,

Room 3923, 7th and O Streets, S.W., Washington, D.C. 20222.

(124-3) The U.S. Department of Commerce, National Bureau of Standards (NBS) is seeking information from organizations having the capability and facilities to perform research in the field of Fire Technology in the following areas of interest: mechanism of flame retardancy; to formulate new compounds; nature of smoke and aerosols resulting from smoldering or burning fires; studies of the effects of smoke on human behavior — behavioral physiological leading to guide criteria; alarm and communication systems, for guidance in emergency situations; smoke movement for building design criteria; studies on the environment of a fire, impact on the firefighter, physiological responses, design criteria for protective clothing; and development of models to predict study to the options, cost-benefit analyses, and studies on the mechanism of water extinguishment leading to design criteria for sprinklers to control fire and hatched designs. This request for information is being issued by the Fire Research Program announced earlier (March 14 INTERCOM #1201) for which there was a March 28 proposal deadline date. The current request was made through Commerce Business Daily, March 29, 1974, p. 18, copies of which were distributed and are available.

(124-4) Grants for feasibility studies and planning for establishment and operation and expansion end improvement of Emergency Medical Services Systems are supported by the Public Health

University Calendar

April 11-21, 1974

Special Events

Thursday-Friday, April 11-12 — Five O'Clock Theatre, "Temple of Gold," Thursday, 5:20 p.m.; Friday, 7:20 p.m.; Pavilion Theatre.

Thursday, April 11 — Sports: Women's softball, U.S. East Stroudsburg (scrimgage), 3 p.m.

Thursday, April 11 — East Asian Festival performance, "An Evening of Asian Dances," traditional dances from China, Japan and Korea, 8 p.m., Room 112 Kern, Free.

Thursday, April 11 — "An Evening of Music and Conversation with Mike Reid," 7:30 p.m., Rec Hall. American Cancer Society benefit presented by Beta Sigma Rho.

Thursday, April 11 — "Crossroads," Lenewhor Chapel, A special Maundy Thursday "Celebration," The Rev. Ned Weller, Celebrant.

Friday, April 12 — Campus 4-H Square Dance, 8 p.m., HUB ballroom.

Friday, April 12 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday, April 12 — Folk and Square Dance Roundup has been cancelled.

Saturday, April 13 — Sports: Men's baseball, vs. Rutgers, 1 p.m.; Men's tennis, vs. Rochester, 2 p.m.; rugby, vs. Maryland; Nittany Lion track and field relays.

Sunday, April 14 — Chapel Service, 11 a.m., Music Bldg. recital hall. Service of Music and Lessons by Chapel Choir.

Sunday, April 14 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Monday, April 15 — Sports: Men's golf, vs. Georgetown, 1 p.m.

Monday, April 15 — Glee Club Concert, 8:30 p.m., Music Bldg. recital hall.

Tuesday, April 16 — Bloomsburg Baroque Ensemble, sponsored by French Department, 8 p.m., Room 112 Kern.

Tuesday, April 16 — East Asian Festival film by Kon Ichikawa, "Flies on the

Plan," 7:30 p.m., Room 209 Human Development South. Free.

Wednesday, April 17 — Marilyn Grochowski, voice recital, 8:30 p.m., Music Bldg. recital hall.

Wednesday-Thursday, April 17-18 — University Theatre, student previews of "La Ronde," 8 p.m., Playhouse Theatre.

Wednesday, April 17 — Nontime Concert, 12:15 p.m., lobby of Kern.

Wednesday, April 17 — Sports: Men's golf, vs. Lehigh, 1 p.m.

Thursday, April 18 — Sports: Men's baseball, vs. Gettysburg, 3 p.m.

Thursday-Saturday, April 18-20 — Naiaid Show, 218 Computer Bldg.

Friday, April 19 — Artists Series, Christopher Parkening, guitarist, 8:30 p.m., Schwab.

Friday, April 19 — P.S.U. Society of Student Social Workers, Mr. Glenn Allison, National Association of Social Workers, Lobbyist, 9:30 a.m. and again at 12:45 p.m., HUB assembly room.

Friday, April 19 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday-Saturday, April 19-20 — University Theatre, "La Ronde," 8 p.m., Playhouse Theatre.

Saturday, April 20 — Sports: Women's tennis, vs. Maryland, 2 p.m.

Sunday, April 21 — Sports: Men's baseball, vs. George Washington, 1 p.m.; men's tennis, vs. George Washington, 2 p.m.

Sunday, April 21 — Richard Jackman and Richard Brown, concert, 8 p.m., Room 112 Kern.

Sunday, April 21 — Chapel Service, 11 a.m., Music Bldg. recital hall. Dr. King V. Cheek, president, Morgan State College, Baltimore.

Sunday, April 21 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Seminars

Thursday, April 11 — Psychology, 8 p.m., Room 111 Chambers. Dr. Tom Trabasso, Princeton University, on "Transitive Reasoning in Children."

Thursday, April 11 — Agronomy, 3:30 p.m., Room 301B Ag. Adm. A.D. Wilson on "Development of Analysis Techniques for ERTS 1 Digital Data."

Thursday, April 11 — Urban Transportation and Air Pollution, 2:20 p.m., Room 112 Kern. Robert Piper, LEX Systems, Inc., Menlo Park, California, on "Transportation, Air Pollution, and Urban Form: Is This Trip Necessary?"

Thursday, April 11 — Chemistry, 12:45 p.m., Room 310 Whitmore. Waldemar Engel, University of Puerto Rico, on "The Chemistry of Bismuthinescence."

Thursday, April 11 — Engineering Acoustics, 4 p.m., Room 71 Willard. Walter F. King, Applied Research Lab., on "Flow Acoustics Studies in the Garfield Tunnel."

Thursday, April 11 — Physics, 3:35 p.m., Room 117 Osmond. George E. Unenbeck, Rockefeller University, on "Recent Developments in Statistical Mechanics."

Thursday, April 11 — Slavic and Soviet Language and Area Center, 3 p.m., Room 174 Willard. Dr. Thomas F. Magner, on "Slavic Languages in China."

Thursday, April 11 — Nuclear Engineering,

4 p.m., Room 111 Nuclear Reactor. Dr. Jeffrey D. E. Jeffries, Project Engineer, Carolina Power and Light Co. on "The Changing Role of Electric Utilities."

Friday, April 12 — Analytical Chemistry, 11:10 a.m., Room 333 Whitmore. Chih-Yuan C. Ting on "Charge Transfer Spectra and Ion Pairing of Cyclopentadienyl Salts."

Friday, April 12 — Geosciences, 1 p.m., Room 22 Delke. Ted Irving, Chief, Magnetism Division, Department of Energy, Mines and Resources, Ottawa, on "Greenville Paleomagnetism."

Monday, April 15 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. P. G. Moghe on "Some aspects of inhibition of infection and replication of Plant Viruses."

Monday, April 15 — Entomology, 4 p.m., Room 204 Patterson. Elizabeth Brown on "Morphology and Spectral Sensitivity of the Compound Eye of the Gypsy Moth Male."

Monday, April 15 — Chemical Engineering, 3:45 p.m., Room 105 Ferguson. Brian Vincent, University of Bristol, on "The Equilibrium Aspects of Reversible Coagulation in Colloidal Dispersions."

Monday, April 15 — New Communities, 2 p.m., Room 322 Sackett. Jerry L. Bailey, Landscape Architect Principal, Bailey & Associates, on "Open Space Development and the Quality of Social Environment in New Communities."

Monday, April 15 — Computation Center,

7:30 p.m. Library Progress and Facilities, Room 110 Osmond. Graphics (7), Show, 218 Computer Bldg.

Monday, April 15 — Genetics, 3:55 p.m., Room 111 Tyson. Dr. Fred Ferguson, veterinary science, on "Histocompatibility Antigens and Placental Cells."

Tuesday, April 16 — Microbiology, 4 p.m., Room 32 Great D. Balkwill on "Fine Structure Survival for Indigenous Soil Microorganisms Subjected to Soil Sterilization."

Wednesday, April 17 — Computation Center, 7:30 p.m. STPA (1), Room 110 Osmond. Graphics (8), Room 228 Computer Bldg.

Wednesday, April 17 — Chemical Engineering, 3:45 p.m., Room 160 Willard. Asge Fredenslund, Danmarks Tekniske Højskole, Visiting Professor, University of Wisconsin, on "Thermodynamics of Solutions."

Wednesday, April 17 — Biochemistry, 4 p.m., Room 101 Althouse. Kristi Chappman on "The Mitchell Hypothesis of Electron Transport and Oxidative Phosphorylation in Mitochondria."

Wednesday, April 17 — Geosciences, 4 p.m., Room 28 Mineral Sciences. Thomas L. Thompson, Staff Research Scientist, Amoco Production Co., Tulsa, Okla., AAPG Distinguished Lecturer, on "Application of Plate Tectonics to Petroleum Exploration at Continental Margins."

Thursday, April 18 — Chemistry, 12:45 p.m., Room 310 Whitmore. Donald Levy, Uni-

versity of Chicago, on "Why the Sky is Brown: The Excited Electronic States of NO₂."

Thursday, April 18 — Physics, 2:35 p.m., Room 117 Osmond. Les L. Foddy, Case Western Reserve University.

Thursday, April 18 — Agronomy, 3:30 p.m., Room 301B Ag. Adm. J. Alpert on "Beneficial Use of Soil for Thermal Discharge."

Thursday, April 18 — Meteorology, 3:55 p.m., Room 541 Delke. Dr. John Norman on "Radiative Transfer in Vegetation."

Thursday, April 18 — Anthropology, 3 p.m., Room 107 Social Science Bldg. G. Alnsworth Harrison, Visiting Professor of Anthropology at Harvard University and Reader in Physical Anthropology, on "Demo-genetics in Oxfordshire and New Guinea."

Thursday, April 18 — Landscape Architecture, 7:30 p.m., Room 124 Sackett. Dr. Thomas Bates, Geosciences Dept., on "Land Use Planning." Sponsored by Student Society of Landscape Architects.

Thursday, April 18 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Richard H. Lyon, mechanical engineering, M.I.T., on "Urban Noise — Generators, Propagation, Effects."

Friday, April 19 — Analytical Chemistry, 11:10 a.m., Room 333 Whitmore. Andrew J. Stuper on "Psychotropic Agents and Pattern Recognition."

WPSX highlights

Joel Weisberg, director of Pennsylvania's Bureau of Consumer Protection, discusses two new pieces of consumer legislation when he is the guest on "People, Places, Things, Now" Friday, April 12, at 7:30 p.m. on WPSX-TV, Channel 3. Weisberg explains legislation that would establish new standards for debt collection and which would outlaw unfair trade practices in the State.

"King of Kings," Cecil B. DeMille's classic 1927 film of the life of Jesus, is presented Saturday, April 13, at 6:30 p.m. on Channel 3. H. B. Warner and Sally Rand star in the film, which can also be seen Sunday at 2:00 p.m.

"The White-Haired Girl," a unique film produced by the Peoples' Republic of China, is "The PBS Special of the Week" Monday, April 15, at 8:00 p.m. on Channel 3. The program combines ballet and music with the story of the struggles that led to Mao Tse-Tung's revolution.

"The Ceremony of Innocence," Ronald Ribman's play about the newibility of Wednesday, April 17, at 8:30 p.m. on WPSX-TV, Richard Kiley stars in the play as his nation out of war brings tragedy to his court. The play is based loosely on the 11th century reign of King Ethelred.

"Should Newspapers be Required to Give Reply Space to Political Candidates?" This is the subject of a court-room-style debate at 10 p.m. on WPSX-TV.

"War and Peace," the popular nine-part television adaptation of Tolstoy's epic novel, returns Thursday, April 18, at 9:00 p.m. Hopkins, Alan Dobie, and Morag Hoad star in the series, produced by the BBC.

Exhibits

Museum of Art — (Tours conducted Thursdays, 1:30 p.m.) Selections from the Permanent Collection, Gallery A. Graphics by Swiss Sculptors, Gallery B, opening April 14. Bill Hanson, Harvard Paintings, Gallery C.

Zoller Gallery — Contemporary Chinese Paintings, through April 13. MFA Show, opening April 15.

Chambers Gallery — Childrens Art Exhibition, through April 18. Art Education Undergraduate Exhibition, opening April 20.

Hammond Gallery — Forty paintings by Eleanor Zygler, associate professor of Art, until April 28. Opening reception, Wednesday, April 14, 4:45 p.m. at Gallery.

HUB: Art Alley — Ukrainian Club exhibit, through April 15. HUB Arts Committee — selected pieces preveiwng Arts and Crafts Festival, April 16-19.

Films

Thursday, April 11 — Free-U film, "Day at the Races," 8 p.m., HUB ballroom.

Thursday-Saturday, April 11-13 — USG film, "Three in the Cellar," 6:15, 8 and 10 p.m., HUB assembly room.

Monday, April 15 — Graduate Commons America Film Series by Alistair Cooke, "America: The Arsenal," 12:05 p.m., Room 112 Kern. Also HUB assembly room, 2:15 p.m.

Wednesday, April 17 — Commonsplace Theatre, "The African Queen," 8 and 10 p.m., Room 112 Kern.

Meetings

Tuesday, April 16 — O.T.I.S., 7 pm., Room 108 Forum.

Thursday, April 18 — College of Earth and Mineral Sciences faculty, 4 p.m., Room 26 Mineral Sciences.

Sundays — U.S.G. Supreme Court, 7:30 p.m., Room 203 HUB.

Mondays — O.T.I.S., 6:30 p.m., Room 203 HUB.

Mondays — U.S.G. Senate, 7:30 p.m., HUB assembly room.

Wednesdays Academic Assembly, 7:30 p.m., Room 351 Willard.

Thursday — Hetzel Union Board, 7 p.m., Room 206 HUB.

Lectures

Thursday, April 11 — The Annual Ray R. Dotterer Lecture on Philosophy, 8 p.m., Room 101 Kern. Dr. Josiah Thompson, Haverford College, on "Who Wrote Kierkegaard's Books?"

Monday, April 15 — Dr. Norton H. Nickerson, Tufts University, on "Conservation Planning — A Growing Public Concern," 8 p.m., Room 60 Willard, sponsored by department of landscape architecture.

Tuesday, April 16 — Juan Pablo Bonta, John R. Emers Distinguished Professor of Architecture, Ball State University, on "Design Semiotics," 7:30 p.m., Room 62 Willard Bldg. Sponsored by the Departments of Architectural Engineering, Architecture, Landscape Architecture, Man/Environment Relations, and Regional Planning.

Asian festival

Sung Hae Oh, Korean dancer, is to be one of the featured performers in the program of the current East Asian Festival. The "Evening of Asian Dance," with Japanese and Chinese dancers as well, will be held in Room 112 Kern today (Thursday, April 11) at 8 p.m.

Invitation to join open to all faculty

International Soccer Club has players of all skills

Angel Magana is a graduate student in industrial engineering from El Salvador. At home he loved to play soccer; when he came to the Penn State Campus he wasn't eligible for the varsity soccer team so he turned instead to one of the newer "club" teams, the International Soccer Club.

"I play for the exercise and the opportunity to continue in soccer," he says.

Perhaps none of the "club" teams at Penn State — the sports groups open to undergraduate and graduate students, faculty, staff, etc. — are more diverse in their membership than the International Soccer Club. Not only do its members come from a variety of countries — the name is well suited — but there are players of all skills (one even now has professional ambitions and ability), of all levels in academic development, and of a great assortment of professional fields.

For example, the dynamic coach and leader of the Club at this point is Tim Conley, a graduate student in English from St. Louis, Mo. His home city is the "hotbed" of soccer in this country, and before he came to the campus he had a great amount of competitive experience in the game. Nick Prodanovich, born in England, played two years at Beaver Campus, but when he transferred to the University Park campus found that practice sessions for the varsity team took too much time. He joined the Club so he could spend more time on his Business Administration major and still have the fun of competing.

Many members of the Club feel that the prime reason for continuing is the friendly social atmosphere, built around a love for the game. They point out that past members formed friendships that continue even though thousands of miles now separate the individuals.

The Club was formed in the summer of 1970, and most of the initial effort was in just getting organized, although the team did win the State College Recreation League Championship last has, every year since) and made trips to Maryland and Lewisburg. In 1971, the Club won the University of Pittsburgh Invitational Tournament, led by Norwegian graduate student Tor Lofali, who won the most valuable player trophy. In Spring, 1972, the Club won matches with area clubs, but it was not until fall that an extended schedule was played. Games with local clubs and with St. Francis College preceded a trip by 20 players to Columbus and Delaware, Ohio, for games against varsity teams of Ohio State University and Ohio Wesleyan. With that experience, the Club then defeated the Penn State junior-varsity team and the club

Members of the International Soccer Club, for picture purposes only, kick the ball around in front of Old Main. Their practices are held Tuesdays and Thursdays at 5:30 p.m. on Jeffrey Field, and any faculty or staff member or student may join in. League play starts April 16 and the Club will conduct a tournament May 10-12. In the picture are Nick Prodanovich, economics undergraduate; Tim Conley, coach, graduate student in English; Evan Davis, also grad student in English; and Ricardo Medina, of Mexico, a player of professional skill, currently a graduate assistant in industrial engineering.

teams of the University of Delaware and Temple.

Last spring, in addition to competing in, and winning, the Recreation League championship, the Club staged a spring tournament, with teams from Pitt and Shippensburg State College as well as the Penn State varsity. It was a weekend of games, picnic, and a World Cup film, along with a tournament contest. The fall highlight was a 1-1 tie with Mackenzie University of Sao Paulo, Brazil.

Two months ago, the Club staged an indoor tournament, the first on campus, with eight teams competing. The Penn State varsity, No. 2 team won, but Ricardo Medina, of Mexico, a member of the Internationals, won the most valuable player trophy. Recently, two Club teams competed in a 32-team tournament at the University of Indiana (Pa.).

Conley emphasizes that the Club is open to anyone in the University, regardless of experience or ability, and some members got their first taste of soccer through the Club. By developing two teams, and devising appropriate schedules, the level of prior experience isn't much a factor in the enjoyment of participating. Fernando Robles, a Business Administration graduate student from Lima, Peru, played at home; here he finds the game "more physical than in South America, but I enjoy the competition."

"The College of Health, Physical Education and Recreation," says Conley, "particularly Dean Scannell, varsity coach Herb Schmidt, and Hal White, the coordinator of non-varsity activities, has helped us in many ways. We are trying to supplement the varsity program. We make an special appeal to international and graduate students, but any interested player may join us, faculty, staff or student."

There are currently 30 members working hard in preparation for the State College league race, which opens April 15. The Club can accommodate as many as want to try, with competition for any skill level. And age makes no difference; conditioning certain will, though.

Naiads show April 18-20

Tickets are being sold at the Athletic Ticket Office in Rec Hall and in Room 105 White Bldg. for the annual Naiads water show, to be held in the Natatorium Thursday-Saturday, April 18-20. Tickets are \$1 for adult non-students, 50 cents for children, and free to University students.

The show will have 13 numbers, all choreographed by students, on the theme of "Aerials," five of which were entered in the recent Eastern Intercollegiate Synchronized Swimming competition. Based on a theme of flying, the routines include solo performances, such as "Soaring," and large-group numbers of 12, like "Migration" and "Space Flight."

The annual Naiads show of synchronized swimming by women students is always well attended, and tickets should be obtained early.

SYSTEMS ANALYST, MANAGEMENT SERVICES — University Park

Assists in the analysis of data processing and customer systems problems and the development of problem solutions. Bachelor's degree or equivalent with training in IBM basic computer systems and system planning plus two to four years experience in data processing. Applications experience in accounting or processing is desirable.

COORDINATOR, EDUCATION TECHNOLOGY UTILIZATION, CONTINUING

EDUCATION — University Park

Responsible for the development and coordination of continuing education systems and programs utilizing new and/or innovative educational technologies. O.E.D. in educational/instructional media, technology/systems or equivalent plus two to four years effective experience. Master's degree or equivalent with six to eight years effective experience.

Responsible for assistance in grading research, and identification and control of wine grape diseases and predators. Bachelor's degree or equivalent in biology or related agricultural areas plus six months effective experience or two to three years college, with one or two years effective experience.

PROGRAMMER, MANAGEMENT SERVICES — University Park

Responsible to participate in analysis, program design, coding, documenting and program testing, and program reports, make mathematical calculations or maintain information files. Bachelor's degree or equivalent in Computer Science or related field plus one or two years effective experience.

APPLICATIONS ANALYST/PROGRAMMER, MANAGEMENT SERVICES — University Park

Responsible for conducting analysis of data processing and customer problems, determining detailed requirements to solve problems, formulating logical statements of systems problems, and preparing computer programs to satisfy desired results. A Bachelor's degree or equivalent in basic computer systems plus one to two years effective experience in computer programming and analysis. Programming or analysis experience with optical character readers is desirable.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER

NEWS —

(Continued from page one)

from six months in Sweden where she completed translation of poems by Hjalmar Gullberg.

SAILING SEMINAR

A seminar of high-performance, single-handed sailboat racing will be presented at Room 214 Bouck today (April 11) at 7:30 P.M. by Bill Noble, of A.M.F. Alcott Division, under the sponsorship of the Sailing Division of Penn State Outing Club and Penn State Intercollegiate Sailing Team. All interested sailors are invited to attend.

The new Force 5 single handed racing sailboat from the Alcott Division of A.M.F. will be used to demonstrate Junior Series for getting maximum speed under all sailing conditions. Among the training aids will be two motion pictures, some 80 slides, as well as an actual Force 5 boat.

BERKS CAMPUS FUND

A telephone campaign was waged March 26 at the Berks Campus to contact some 2,100 University graduates in the Berks County area, with a goal of raising \$10,000 for use in beautifying the campus by planting trees and plants, building gateways, walkways, benches and flagpoles. Graduates were asked to donate \$10 plus \$1 for every year since graduation.

SPRAY CAMPAIGN

The annual spraying of American elm trees on the University Park campus has begun and will be continued for several weeks, as weather permits. If spray should settle on an automobile, it is suggested that the spray be removed as soon as possible with detergent and water. Questions about the spraying may be directed to the Office of Physical Plant, 865-4731.

STONE VALLEY OPENS

The Stone Valley Recreation Area (in Huntingdon Co., about 12 miles from campus) will open Saturday, April 13. The lake has been stocked with 4,000 rainbow and brown trout. Boats are available for rental.

REGATTA PLANNED

The Seventh Annual Regatta and Picnic organized by the Sailing Division of the Penn State Outing Club, will be held Saturday, May 18, with a rain date of May 19. Races in a variety of boats will be conducted, starting in the morning. More information will be made available in "Intercom" at a later date.

BLUE BAND MAJORETTES

Tryouts for the Penn State Blue Band Majorettes will be held April 20-21. Application forms and other information may be obtained at Room 217 Chambers Bldg.

China night

The Chinese Student Association at the University is sponsoring a "China Night" program today (Thursday, April 11) at the Senior High School Auditorium on Western Parkway.

A reception at 8 p.m. will be followed by performances in the arts by a Chinese Youth Goodwill Mission from Taiwan, Republic of China. Instrumental music, folk dances, opera, painting demonstrations will be staged.

The 24-member group of students and faculty from various universities in Taiwan is visiting 50 college campuses in the U.S. in its tour.

The reception and program are free and open to the public.

SENATE —

(Continued from page one)

It's the best possible solution for faculty at Penn State.

"The purpose of Open Options is to seek out all available information. We insist on all sides of the story and don't advocate a quickie election."

In a 45-minute question-and-answer session following the formal presentations, Scholten said strikes are most impractical, noting "most of us are not inclined toward strikes."

In other business, the Senate approved a statement of basic admissions policies submitted by its Committee on Academic Admissions Standards.

Mary McCammon, committee chairman, said the new policies were developed to keep pace with changing conditions.

The Senate also heard an informational report from the Subcommittee on Academic Standards on guidelines for the retroactive dropping of courses.

WITHHOLDING REMINDER—W4E

The Controller's Office wishes to remind those employees who filed a Withholding Exemption Certificate — Form W-4E for 1973 that this certificate will expire on April 30, 1974 for taxpayers on a calendar year basis. The exemption claimed on Form W-4E must be renewed annually.

If you qualify and wish to continue your exemption, or if you are applying for the first time you must file a new Form W-4E for 1974. You may claim the exemption from withholding if you had no income tax liability for 1973. You must designate no income tax liability for 1974. Forms are available from the Payroll Department, 301 Shields Building.

In general the elimination of the withholding applies to only those working part-time. The principal advantage is that it will eliminate the need to file an income tax return at the end of the year to obtain a refund of money withheld.

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Questions, 865-1347 (Office Line 475-1377). Do not contact the area having the vacancy. Applications will be accepted until: 5 p.m., April 18, 1974.

PSYCHOLOGIST/COUNSELOR — Hazelton Campus

Responsible for conducting counseling programs on the campus. Ph.D. or Ed.D. in counseling or counseling psychology, counselor education or equivalent training plus applicable professional experience in educational/vocational counseling of students, or similar experience.

ENGINEERING SYSTEMS ANALYST, MANAGEMENT ENGINEERING — University Park

Responsible for analyzing and developing solutions for computer controlled physical systems and manpower scheduling systems in the Office of Physical Plant. Bachelor's degree in Engineering or equivalent plus one to two years of effective experience in computerized applications development. An interest in physical plant maintenance and operations necessary.

LIBRARY ASSISTANT — SET, SERIALS, AND ANALYTICS, UNIVERSITY LIBRARIES — University Park

Responsible for sets, serials, and analytic cataloging of serial publications to catalogue and adapt them to the Pennsylvania State University library so as to facilitate easy use by library patrons. Bachelor's degree or equivalent, with at least nine months effective experience. Knowledge of at least one Slavic language preferably Russian required.

ASSISTANT SUPERVISOR OF MAINTENANCE, HOUSING AND FOOD SERVICE — University Park

Responsible for assistance in eliminating and coordinating maintenance functions in housing and food service areas such as residence halls and dining halls. High school plus formal trades training or equivalent plus one to two years effective experience. Requires knowledge of upholstery, carpentry, plumbing, electricity and other mechanical skills.

PENN STATE intercom

News in brief

Cavett

CAVETT HERE

Television personality Dick Cavett will speak in Rec Hall Sunday, April 21, at 8 p.m., sponsored by Colloquy. The talk is open to the public and free.

ALTOONA ARTS SHOW

The annual arts and crafts exhibition, "Arts '74," will open at the Altoona Campus Friday, April 26, at 7:30 p.m., continuing through Sunday. More than \$700 in prize money will be awarded in various arts, crafts, and photography categories. At the same time, Altoona Campus students will stage their annual spring show. Various demonstrations of the performing arts will also be given by students. Residents of seven counties contributed art and crafts to the exhibit last year. Ken Kuhn, assistant professor of art, is coordinator of "Arts '74."

STUDENTS PARTICIPATE

Fifteen undergraduate students are currently (April 18-20) participating, by giving papers, in the 28th annual Eastern Colleges Science Conference at Worcester (Mass.) Polytechnic Institute. Stanley J. Shepherd, associate professor of physics, is faculty coordinator for the group.

FACULTY PAPERS

Sixteen faculty members from the Departments of Chemistry, Biochemistry, Microbiology, and Meteorology, along with 13 postdoctoral candidates and graduate students in chemistry, are represented in papers to be presented at the 1974 American Chemical Society Middle Atlantic Region meeting, April 24-26, in Wilkes-Barre. The meeting commemorates the discovery of oxygen by Joseph Priestley, two hundred years ago.

SINGERS IN HARRISBURG

The University Choirs, directed by music professor Raymond Brown, will perform in concert with the Harrisburg Symphony April 23 in Harrisburg, and during the same trip selected members of the Choirs will perform in the rotunda of the Capitol.

DAIRY SCIENCE SHOW

The annual Dairy Cattle Judging Contest, sponsored by the Dairy Science Club, will be held Saturday, April 20, at the Dairy Production Center north of Park Road near the Maintenance Buildings. The contest is part of the 49th Annual Dairy Exposition, which will include the crowning of the Dairy Princess April 24 and the annual fitting and showing contest May 4. Show Day

(Continued on page four)

PRESIDENT OSWALDO admires the "Phi Psi 500" T-shirt on John Steigewald and Cathy Krouse (left) who advertise the big beer-reece April 27, staged by Phi Kappa Psi fraternity for a charity each year. This year's recipient of the proceeds of the race is the Centre County Day Care Center, of which Mrs. Susan Dangel, far left, and Mrs. Rose Woodring, far right, are directors. Standing next to President Oswald is John Eagen, chairman of the race for the fraternity. A Master's Division has been added to the race this year, and anyone over 30 may enter this division, to compete for trophies. Each entry receives a T-shirt of the type being worn by John and Cathy.

Ten Alumni to be honored

Ten graduates of the University will be honored June 8 as Distinguished Alumni, bringing to 164 the number so honored since 1951 when the program was initiated.

To be honored this year are:

—William Bellano, Beverly Hills, Calif., coal and petroleum executive who for more than a decade has been warning of the coming energy crisis. Native of Scranton.

—Samuel B. Casey, Jr., of Chicago, Ill., president, Pullman, Inc., and director of other industrial firms, insurance companies, and banks. Native of Pittsburgh, Pa.

—Martha M. Dohner, Harrisburg, Pa., institutional principal, Pennsylvania State Hospital for Crippled Children, Elizabethtown, Pa. Native of Enola, Pa.

—Roosevelt Grier, Los Angeles, Calif., professional football player with New York Giants and later Los Angeles Rams, now an entertainer and television personality. Formerly of Linden, N.J.

—The Reverend Philip R. Jones, Milton, minister and moderator of United Presbyterian Synod of Pennsylvania-West Virginia. Native of Scranton.

—Lucella Parker Kennedy, Paoli, actress, singer, teacher, and speech consultant, a native of West Newton, Pa. She is a former University trustee.

—Dr. Max S. Peters, Boulder, Colo., dean of engineering, University of Colorado. Native of State College, Pa.

—Frank P. Smeal, Rumson, N.J., executive vice-president and treasurer, Morgan Guaranty Trust Co. of New York. Native of Sykesville, Pa.

—Capt. Paul J. Weitz, native of Erie, Pa., now living in Houston, Tex., astronaut of Skylab 2.

—Dr. Donald Wyman, Weston, Mass., former president and director of the American Horticultural Society and horticultural emeritus of Harvard University's Arnold Arboretum. Native of Philadelphia.

Faculty Club elections near

Ballots will be mailed April 26 to all current members of the Penn State Faculty Club for the election of officers, including president, vice president, secretary, and directors-at-large.

The Club, which has already enrolled nearly 375 members, is working with the architectural firm of Venturi and Rauch, Philadelphia, and expects a preliminary report on design plans before the end of the Spring Term. The Building Planning Subcommittee includes Drs. Robert Gray, chairman, Samuel Guss, Louis Inerra, William Steele, Walter H. Walters, and Doris Seward.

New members are being enrolled from among faculty, administration and staff except personnel of the entire University community. An informational brochure and

membership form may be obtained from Dr. Richard D. Schein, current president, Room 109 Carnegie Bldg.

The nominations for officers for the upcoming election are: president, Dr. Schein; vice president, Dr. Donald R. Olson; secretary, Dr. Robert L. Clewett. All are incumbents.

For directors-at-large, the nominations (eight will be elected) include incumbents Peter D. Bennett, Ralph W. Condee, Marjorie East, Ross B. Lehman, Arthur O. Lewis, Jr., Robert F. Lima, Jr., Thomas F. Wagner, and R. William Millman, and also Joseph C. Flay, Stuart Forth, Audrey B. Harsanyi, Louis P. Inerra, Lucille I. Magnusson, Colleen M. McCann, and Karl E. Spear.

The election procedure ends May 10.

Director, Center for Environment Policy Sought

Recommendations for the position of Director, Center for Environmental Policy at the University, are being requested by the Search Committee. The Committee will prepare a list of the most qualified candidates for submission to the Vice President for Research and Graduate Studies.

Candidates should be highly qualified social scientists with strong interests and experience in environmental fields. He or she should have substantial training in research, have a meritorious record of research output, and be qualified for graduate faculty membership. The individual should have the credentials necessary for appointment (presumably as Associate Professor or Professor) in the academic department representing his or her discipline. The position is split between teaching and research in the academic department and research and administration as Director of the Center. The person should have substantial academic experience and knowledge about the organization and functioning of a University.

Candidates may refer themselves, or anyone may submit credentials for individuals. The suggestion of a candidate should be accompanied by a resume of academic and professional history and any other data relevant to the qualifications described above. Letters of recommendation or names of people who might be competent for reference should also be supplied.

The Committee would appreciate receiving documents on suggested candidates as soon as possible.

All material relating to the position should be addressed to the Chairman of the Search Committee, 206 Liberal Arts Tower, University Park, Pa. 16802.

Physics plans conference on education

"Tradition and Change in Physics Graduate Education" is the theme of a conference to be held at University Park August 19-23, 1973, sponsored by The Forum on Physics and Society of the American Physical Society, The American Association of Physics Teachers, and the Committee on Education of the American Physical Society.

Dr. Roland H. Good, Jr., professor and head of the physics department, is co-chairman of the conference along with Dr. Martin L. Peri, of SLAC. Also members of

the organizing committee are Dr. Roger M. Herman and Stanley J. Shepherd, of the physics department.

The conference will aim to review the graduate education process in physics, its current state, the environment it faces, and what, if any, changes should and can be made. Morning sessions will be devoted to contributed and invited papers and afternoons to individual discussions. Summary lectures and discussions of recommendations will be held in the evenings.

Lillian Preston wins playwrighting award

Dr. Lillian E. Preston, associate professor of speech communication, has won a first place award in the National Playwriting Contest conducted by the Children's Theatre of Richmond, Inc.

The award was given for her children's fantasy, "Magic Land of Caliban," and it is the seventh award for plays that Dr. Preston has received since she joined the

faculty in 1962. The Children's Theatre will produce the play in the 1974-75 season.

The W. H. Baker Co., of Boston, Mass., will publish Dr. Preston's new, one-act play, "Services Rendered," in the fall. The company has already published four of her plays. Also, her short science-fiction story, "The Dollhouse," appears in the April issue of "Young World."

Zyglar exhibit

"FIVE PEARS AND A GRAPE LEAF" is one of the 40 paintings by Eleanor Zyglar, associate professor of art, currently on display in Hammond Gallery. The exhibit is titled "Images, Places and Seasons," and it will continue on display until April 28.

RESERVE READING LISTS

Reserve reading lists for Summer Term 1974 should be submitted to the Main Undergraduate Library on or before April 25, to allow ample time for processing. Lists received after the deadline will be accepted only if material requested is not needed until the beginning of the third week of classes.

The April 25 deadline provides a reasonable amount of time to order books and to prepare available materials for reserve use.

Only required readings, which will circulate either for a two hour period or for an overnight loan period, will be placed on reserve.

Lists should be submitted on reserve forms which are available by mail or in person from the Undergraduate Library, W 11 Patten. Lists should be typewritten and contain full bibliographical information, including the author's full name, title, publisher and the date of publication.

In writing

"Life-Span Developmental Psychology — Personality and Socialization," a book containing the papers presented at a conference sponsored by the Department of Psychology at West Virginia University, has been published by Academic Press, edited by Dr. Paul B. Baltes, associate professor of human development and director of the Division of Individual and Family Studies in the College of Human Development at the University, and by Dr. K. Warner Schaie, associate director of research and professor of psychology at the University of Southern California's Ethel Percy Andrus Gerontology Center. The book includes 14 papers and Dr. Baltes and Dr. Schaie have contributed an epilogue "On Life-Span Developmental Research Paradigms: Retrospects and Prospects."

The Arts: music, theatre, exhibits

"Music for Prague," by Pulitzer Prize-winning composer Karel Husa, will be featured in the spring concert of the Penn State Wind Ensemble at 8:30 p.m. Friday, April 26, in the Music Bldg. recital hall. Written in 1968, the work by the Czech composer is a four movement composition significant for being written in the year of great political dissent in Czechoslovakia.

Also chosen for performance by the Wind Ensemble, directed by Smith Toulson, assistant professor of music, are marches by Prokofiev and Hansen, Grainger's "Lincolnshire Posy," a collection of English folk songs set for band, and works by Mozart and Hartley, the latter with Samuel D'Aversa, music undergraduate, playing saxophone.

The Wind Ensemble will travel to the Mont Alto campus of the University for a similar concert on April 22. The group's annual Pops Concert in the Arts Courtyard is scheduled for Sunday, May 19.

Prints, ceramic bottles, and welded steel sculpture will be exhibited by three art graduate students beginning Monday, April 22, in Zoller Gallery, Visual Arts Bldg. George Sam Gardner, sculptor, Mary Louise Thompson, printmaker, and Dean Lichtman, potter, will show work done in partial fulfillment of the requirements for the master of fine arts degree which the three will receive in May.

Gardner, who was awarded the bachelor of arts degree in art from the University in 1968, will display five large steel sculptures. A graduate of Middlebury College, Vermont, Miss Thompson will show etchings and intaglias. Seven thrown ceramic bottles by Dean Lichtman, a graduate of East Carolina University, will be exhibited. The MFA show will continue in Zoller Gallery through May 3.

A composition written for Steven Smith, assistant professor of music, by an award winning composer will be premiered by Smith in a piano recital at 8:30 p.m. Monday, April 22, in the Music Bldg. recital hall, "Aria and Variations for Piano," by John Beall, a graduate of Eastman School of Music now teaching at West Texas State University, is reminiscent of a vocal aria

THE YOUNG GENTLEMAN and the maid in the Arthur Schnitzler play, "La Ronde," are played by Robert E. O'Quinn and Marilyn McIntire. The play opens Friday, April 19, at Playhouse Theatre, with other performances April 20 and 22-27. Guest director for the play is John Reich, who recently retired as director of Chicago's Goodman Theatre. Reservations for the various performances may be made by calling 555-1581.

followed by 14 variations. Beethoven's "Waldstein" sonata, dedicated to one of the composer's greatest patrons and numbered among his most spectacular sonatas, will also be performed. Bach's "Prelude and Fugue in E" and three Schubert impromptus will complete Monday's recital.

The Alard String Quartet will present three popular string quartet compositions in its final concert of the season at 8:30 p.m. Wednesday, April 24, in the Music Bldg. recital hall. Haydn's quartet in D major, "The Lark," Dvorak's quartet in F major, "American," and a quartet in G major by Schubert have been selected for Wednesday's concert. The Dvorak quartet, utilizing Indian themes, Negro spirituals, and other native American musical qualities, is among the composer's works inspired by his travel to a Bohemian colony in Iowa during his stay in the United States.

The annual spring concert of the Penn State Concert Blue Band, with Dr. James W. Dunlop conductor and Dr. Ned C. Deihl as associate conductor, will be held Sunday, April 28, at 3 p.m. in Schwab Auditorium.

One of the features of the program,

which has a variety of composers and styles, will be Mozart's "Romance" from Concerto No. 3 in E-flat, K.V. 447, in which senior student Richard Fries will be soloist. Familiar band music such as Sousa's "The Stars and Stripes Forever" will be included as well as unexpected numbers like "Australian Up-Country Tune" by Percy Grainger and Robert Russell Bennett's "Sanctus of Old American Dances," with the tempos and styles of the cello walk, schottische, Western one-step, Wallflower Waltz, and rag.

Drs. Dunlop and Deihl are members of the music education faculty.

George Izenour, one of the foremost figures in theatre consultation and engineering during the past quarter century, will present a lecture at 2:00 p.m. Tuesday, April 23, in the Playhouse Theatre, sponsored by the Institute for the Arts and Humanities Studies in cooperation with the theatre and film department.

Among developments pioneered by Izenour, professor of theatre design and technology at Yale University, are the electronic multi-preset lighting control system, which revolutionized the art and practice of the lighting throughout the world.

Trustee Rowland, Lethbridge die

Berry B. Lethbridge, Jr., who retired as assistant dean emeritus of the College of Business Administration in July, 1973, died April 10, at the age of 66.

Prior to joining the Penn State faculty in 1955, Dean Lethbridge had completed a two-year tour with the U.S. Embassy in Turkey as an advisor to the U.S. AID program. Earlier he was an advisor to the U.S. military government in Japan and worked for the State Department in the Philippines, Hong Kong, Taiwan, Indonesia, and Thailand. He had served more than three years in the U.S. Navy, two of them in the Pacific and in Southeast Asia.

He received his bachelor of science degree in economics from Franklin and Mar-

shall College in Lancaster in 1930 and his master of science degree in economics from Duke University, Durham, N.C., in 1940. In 1940-41, he did graduate work at Penn State.

Roger W. Rowland, who served on the Board of Trustees for 34 years and was president of the Board from 1963 to 1970, died April 14 at the age of 79.

He was born in Springfield, Mass, and received a B.S. degree from Penn State in 1917. Following graduation, Rowland served as an aviator in World War I, following which he was engaged in the manufacture of steel mill equipment. From 1929 to 1969 he was president of New Castle Refractories Co.

of higher education. The application deadline is May 9, 1974. Additional information may be obtained from the Language and Area Centers Program, U.S. Office of Education, Room 3671, 7th and O Streets, S.W., Washington, D.C. 20022 (Ref. CFOA 13.435).

(12-3) Institutional applications for a quota of fellowships under the Language and Area Studies Fellowship Program are being accepted by the Office of Education with a May 9, 1974 deadline. The program authorizes stipends to individuals undergoing advanced training in modern foreign languages and area studies, international studies, and the international aspects of professional and other fields of study. Information may be obtained from the Language and Area Fellowship Program, U.S. Office of Education, Room 3669, 7th and O Streets, S.W., Washington, D.C. 20022 (Ref. CFOA 13.434).

(12-4) The Alcohol, Drug Abuse and Mental Health Administration (ADAMHA) announces the two deadline dates of June 1 and Oct. 1, 1974 for several programs under its direction. . . . Alcohol Abuse and Alcoholism Research Grants — contact Dr. Albert Pellowick, Chief, Extramural Research Branch, Div. of Research, National Institute of Alcohol Abuse and Alcoholism, Room C603, 5500 Fishers Lane, Rockville, Md. 20852 (301) 435-4223.

Career-Teacher Training Grants, Academic Career Teacher Awards (medical) in Alcohol Abuse, and Alcohol Abuse and Alcoholism Training Grants — contact Dr. Leonard Mitnick, Chief, Extramural

Training Grants, NIAAA, Room 16C26, 5500 Fishers Lane, Rockville, Md. 20852 (301) 443-5000.

. . . Studies of Narcotic Addiction and Drug Abuse Research Grants — Dr. Myrick, Acting Chief, Program Support Branch, Div. of Narcotic Addiction and Drug Abuse, ADAMHA, 5600 Rockledge Lane, Baltimore, Md. 20852 (301) 443-5000 (CFOA 13.249). . . . Drug Abuse Education, Career-Teacher Training Grants, Academic-Career Teacher Awards (medical and non-medical) in Narcotic Addiction and Drug Abuse, Clinical Investigator Awards in Narcotic Addiction and Drug Abuse, and Training for Health and Health Related Professionals in Narcotic Addiction and Drug Abuse — contact Dr. Leonie Mitnick, Chief, Manpower and Training Branch, Div. of Resources Development, National Institute of Alcohol Abuse and Fishers Lane, Rockville, Md. 20852 (301) 443-2755.

REMINISCE OUR DEADLINE DATES April 29 for OE Fulbright-Hays Training Grants and non-medical in Narcotic Addiction and Drug Abuse for OE Ethnic Heritage Studies Program (Feb. 7 INTERCOM 2118-2) . . . May 6 for NEH Research Grants (March 7 INTERCOM 2119-2) . . . May 7 for NEH Fellowship Grants (March 21 INTERCOM 2120-2) . . . May 7 for NSF contracts for Ocean Technology Conversion (April 11 INTERCOM 2124-1) . . . June 1 for NEH Film/TV Grant Program (March 11 INTERCOM 2119-4) . . . June 1 for FOA Food Security Training Grants and Food Research Grants (March 21 INTERCOM 2121-4) . . . June 17 for NEH Senior Fellowship Program (March 14 INTERCOM 2120-4).

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For more information and funding source information, call 865-1372.

APRIL 18, 1974

(125-1) The Office of Education announces funding criteria and a May 8, 1974 deadline for several Education Professions Development Act (EPDPA) programs.

. . . Bilingual Education Training Program — To increase the number of qualified educational personnel serving in bilingual education programs for children with limited English-speaking ability and the number of educational institutions capable of such training (Ref. Title V sec 501 b.531) (CFOA 13.500).

. . . Categorical Programs — for continuation grants including the following programs: early childhood, school personnel utilization, training teacher trainees, teaching training in developing institutions, and volunteers in education (Ref. Title V, Part O, Sec. 531) (CFOA 13.416).

. . . Exceptional Children — to provide training to regular classroom teachers, school administrators, and the trainers of such personnel for children with physical, emotional, or mental limitations (Ref. Title V, Sec. 531) (CFOA 13.417).

. . . New Careers in Education — to attract qualified persons to the field of education and to encourage artists, craftsmen, artisans, scientists, and

persons from other professions and vocations to undertake teaching on a part-time basis or for temporary periods (Ref. Title V, Sec. 534) (CFOA 13.545).

. . . Teachers for Indian Children — to prepare teachers and children teachers, reserves serviced by elementary and secondary schools for Indian children (Ref. Title V, Part O, Sec. 532) (CFOA 13.546).

. . . Leadership Development — to award stipends to experienced vocational educators for undertaking full-time advanced study in vocational education at institutions of higher education. (Ref. Title V, Sec. 532) (CFOA 13.523). Information and application forms may be obtained from: Div. of Educational System Development, U.S. Office of Education, 7th and O Streets, S.W., Room 3500-R0B-5, Washington, D.C. 20022 (Ref. 39 FR 12252-4/4/74).

(125-2) The Office of Education funds Graduate and Undergraduate International Studies Programs to establish, equip, and operate these programs and the international aspects of professional and other fields of study. Programs are evaluated highly if they have international relevance, are interdisciplinary, involve both the campus and the community and neighboring institutions

University Calendar

April 18-28, 1974

Special Events

Thursday-Saturday, April 18-20 — Naiads' show, 8 p.m., Natarium.

Thursday, April 18 — Sports: Men's baseball, vs. Gettysburg, 3 p.m.

Friday, April 19 — University Theatre student preview of "La Ronde," 8 p.m., Playhouse Theatre.

Friday, April 19 — O.T.I.S. Casino Night, 7:30 p.m., HUB ground floor. For benefit of Penna. Assn. for Related Children.

Friday, April 19 — Artists Series, Christopher Parkening, guitarist, 8:30 p.m., Schwab.

Friday, April 19 — P.S.U. Society of Student Social Workers, Jean Allison, National Association of Social Workers lobbyist, 9:30 a.m. and at 12:45 p.m., HUB assembly room.

Friday, April 19 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday-Saturday, April 19-20 — University Theatre, "La Ronde," 8 p.m., Playhouse Theatre.

Saturday, April 20 — Sports: Women's tennis, vs. Maryland, 2 p.m.

Saturday-Sunday, April 20-21 — College of E.M.S. open house.

Sunday, April 21 — Colloquy Lecture by television personality, Dick Cavett, 8 p.m., Rec Hall. Free, open to public.

Sunday, April 21 — Eastern Orthodox Divine Liturgy, 10 a.m., HUB assembly room.

Sunday, April 21 — Sports: Men's baseball, vs. George Washington, 1 p.m.; men's tennis, vs. George Washington, 2 p.m.

Sunday, April 21 — Richard Jackson, classical guitarist, concert, 8 p.m., Room 112 Kern.

Sunday, April 21 — Chapel Service, 11 a.m., Music Bldg. recital hall. Dr. King V. Cheek, president, Morgan State College, Baltimore.

Sunday, April 21 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Monday, April 22 — Lecture on "Creativity and Intelligence Development through Transcendental Meditation," 8 p.m., Room 111 Chambers, by Harold Masover, president of the local International Meditation Society.

Monday, April 22 — Steven Smith, piano recital, 8:30 p.m., Music Bldg. recital hall.

Tuesday, April 23 — Eastern Orthodox Vespers, 7:30 p.m., The Chapel.

Tuesday, April 23 — Sports: Women's softball, vs. Lock Haven, 3:30 p.m.; women's tennis, vs. Lock Haven, 3 p.m.

Tuesday-Saturday, April 23-27 — University Theatre, "La Ronde," 8 p.m., Playhouse Theatre.

Wednesday, April 24 — East Asian Festival lecture-demonstration, Dr. Kenneth Beltel, art education, the art of Japanese porcelain, 8 p.m., Room 101 Kern.

Wednesday, April 24 — Aired String Quartet, 8:30 p.m., Music Bldg. recital hall.

Wednesday, April 24 — Nontime concert, 10 p.m., lobby of Kern.

Thursday, April 25 — U.S.A. Workshop on canning and preserving, 7:30 p.m., Room 112 Kern.

Thursday-Saturday, April 25-27 — Penn State Aquatic Institute and Hall of Fame, Natarium.

Thursday, April 25 — Special meeting of HOPS for faculty and staff members, on "The Relevance of HOPS," 8 p.m.; for place, call U.S.G. Gay Line, 863-0296.

Thursday, April 25 — East Hills Residential Life program on "Women Today," 8:30 p.m., Findlay Hall Lounge. Topic: "The Stigma of Sex Typing," with Patricia Sanders, Dr. Robert O'Connor, and Dr. Mary Dupuis, with film, "Growing Up Female."

Friday, April 26 — Penn State Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Friday, April 26 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.

Friday, April 26 — Eco-Action film and lecture on "The Living Filter," by Dr. Louis T. Kardos, 7 p.m., HUB main lounge.

Friday, April 26 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Saturday, April 27 — Sports: Men's lacrosse, vs. Rutgers, 8 p.m.; women's softball, vs. SUNY-Cortland, 2 p.m.

Saturday, April 27 — Football team family-camera day.

Saturday, April 27-28 — Sports: Rugby, Trys-Tournament.

Sunday, April 28 — Penn State Concert Blue Band, 3 p.m., Schwab.

Sunday, April 28 — Sports: Men's baseball, vs. Rider, 1 p.m.

Sunday, April 28 — Lee Ann Kennedy, pottery demonstration, 12 noon, lobby of Kern.

Sunday, April 28 — Friends of India Celebration, dinner, entertainment, films, 6 p.m., Room 102 Kern.

Sunday, April 28 — Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Raymond Dibble, pastor, State College Christian and Missionary Alliance.

Sunday, April 28 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, April 28 — Eastern Orthodox Divine Liturgy, 10 a.m., HUB assembly room.

Seminars

Thursday, April 18 — Statistics, 4 p.m., Room 109 Willard.

Friday, April 19 — David Andrews, mathematics, University of Toronto, Ontario, on "Robust Regression."

Thursday, April 18 — Chemistry, 12:45 p.m., Room 310 Whitmore. Donald Levy, University of Chicago, on "Why the Sky is Brown: The Excited Electronic States of NO₂."

Thursday, April 18 — Physics, 2:35 p.m., Room 117 Osmond. Leslie L. Foddy, Case Western Reserve University.

Thursday, April 18 — Agronomy, 3:30 p.m., Room 301B Ag. Adm. J. Aipert on "Beneficial Use of Soil for Thermal Discharge."

Thursday, April 18 — Meteorology, 3:55 p.m., Room 541 Deike. Dr. John Norman on "Radiative Transfer in Vegetation."

Thursday, April 18 — Anthropology, 3 p.m., Room 107 Social Science Bldg. G. Ainsworth Harrison, Visiting Professor of Anthropology at Harvard University and Reader in Physical Anthropology, on "Demogenetics in Oxfordshire and New Guinea."

Thursday, April 18 — Landscape Architecture, 7:30 p.m., Room 124 Sackett, Dr.

Thomas Bates, Geosciences Dept., on "Land Use Planning." Sponsored by Student Society of Landscape Architects.

Thursday, April 18 — Urban Transportation and Air Pollution Center, 2:20 p.m., Room 112 Kern. Richard H. Lyon, mechanical engineering, M.I.T., on "Urban Noise — Generators, Propagation, Effects."

Thursday, April 18 — Regional Planning, 7:30 p.m., Room 217 Willard. Franklin C. Wood, Bucks County Planning Commission, on "Plan Implementation in the Community Context."

Friday, April 19 — Analytical Chemistry, 11:10 a.m., Room 333 Whitmore. Andrew J. Stuper on "Psychotropic Agents and Pattern Recognition."

Monday, April 22 — Genetics, 3:55 p.m., Room 111 Tyson. David L. Wilcox, biology, on "Determining Phylogenetic Relationships from Protein Sequence Differences."

Monday, April 22 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Robert Seem, on "Growth Curves and Disease Curves: Some New Concepts."

Monday, April 22 — New Communities, 2 p.m., Room 322 Sackett. Dr. Thomas Nutt, urban studies and planning, M.I.T.,

on "Health and Mental Health in the New Communities."

Monday, April 22 — Computation Center, 7:30 p.m. STPAC (2), Room 110 Osmond. Graphics (9), Room 228 Computation Bldg.

Tuesday, April 23 — Environmental Pollution Control and Solid Waste Management, 2:20 p.m., Room 140 Fenske. Franklin Adams, biology, on "Closing of Orbits."

Tuesday, April 23 — Geosciences, 4 p.m., Room 26 Mineral Sciences. E-An Zen, United States Geological Survey, Washington, D.C., on "Taconian Nappes, Western Newfoundland and Western New England."

Tuesday, April 23 — Chemical Engineering, 3:45 p.m., Room 140 Fenske. Brian Buffham, Loughborough University, England, visiting professor at Lehigh University, on "Simplified Mathematical Modeling of Fixed Bed Exchangers."

Tuesday, April 23 — Microbiology, 4 p.m., Room 52 Frear. G. Stauffer on "Regulation of Serine Transhydroxymethylase Synthesis in *Salmonella typhimurium*."

Wednesday, April 24 — Computation Center, 7:30 p.m. STPAC (3), Room 110 Osmond; Graphics (10), Room 228 Computation Bldg.

puter Bldg.; Census (1), Room 109 Osmond.

Wednesday, April 24 — Animal Nutrition and Nutrition, 3:55 p.m., Room 111 Animal Industries. J. Tellebaum, human development, on "Anthropological Aspects of Obesity."

Thursday, April 25 — Agronomy, 3:30 p.m., Room 301B Ag. Administration. C. H. Chu on "The Effects of Waste Water Removal and Solids in the Agri-Proces Waste Water Complex."

Thursday, April 25 — Chemistry, 12:45 p.m., Room 210 Whitmore. Theodore L. Brown, University of Illinois, on "Chemistry of Metallic Elements in the Ionosphere and Mesosphere."

Thursday, April 25 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Charles C. Mlesse, Transportation Coordinator, Air and Water Division Environmental Protection Agency, Philadelphia, on "The VMT's of Transcontrol."

Friday, April 26 — Two Cultures Dialogue, 12:30 p.m., Room 189 Materials Research Center. Dr. P. D. Bennett, marketing, on "Value Considerations in Engineering and Technology."

Lectures

Monday, April 22 — Gamma Pi Epsilon, women's pre-med society, 8 p.m., McElwain plant lounge. Dr. Edward W. Wickham, (biology).

Monday, April 22 — Population Issues Research Office sponsor, 2 p.m., Room 341 Deike. Dr. John F. Marshall, World Health Organization, on "Defining Cultural Specificities for New Fertility Regulating Methods: The Research Programme of the WHO Acceptability Task Force."

Tuesday, April 23 — George Ignorone, Yale University, on theater design and engineering, 2 p.m., Playhouse Theatre.

Meetings

Tuesday, April 23 — College of Liberal Arts faculty, 3:55 p.m., Room 121 Sparks

Wednesdays — O.T.I.S., 6:30 p.m., Room 203 HUB.

Mondays — U.S.G. Senate, 7:30 p.m., HUB assembly room.

Wednesdays — Academic Assembly, 7:30 p.m., Room 351 Willard.

Thursdays — Hotel Union Board, 7 p.m., Room 206 HUB.

Sundays — U.S.G. Supreme Court, 7:30 p.m., Room 303 HUB.

The Thalia Trio performs work for its program, which marks the first time Britten had written specifically for the medium of television. "Owen Wingrave" may also be seen Saturday, April 27, at 10:00 p.m.

Films

Monday, April 22 — Graduate Commons America Film Series by Allstate Cooke, "America: Money on the Land," 12:05 p.m., Room 112 Kern. Also HUB assembly room, 2:15 p.m.

Wednesday, April 24 — Commonsplace Theatre, "On The Waterfront," 8 and 10 p.m., Room 112 Kern.

Thursday-Sunday, April 25-28 — U.S.G. film, "Let It Be," 7:30 and 9:30 p.m., HUB assembly room.

Exhibits

Museum of Art — Selections from the Permanent Collection, Gallery A. Graphics by Six Swiss Sculptors, Gallery B. Bill Hanson, Harvard Paintings, Gallery C.

Zoller Gallery — MFA Show, opening April 22.

Chambers Gallery — Children's Art Exhibition, until April 19. Art Education Undergraduate Exhibition, opening April 20.

HUB: Art Alley — HUB Arts Committee selected pieces, previewing Arts and Crafts Festival, through April 18.

Arts and Crafts Festival, opening April 20.

Hammond Gallery — Forty paintings by Eleanor Zygler, "Images, Places and Seasons."

HUB specials

The HUB Terrace Room has initiated daily special meals for both lunch and dinner at prices well below customary cafeteria prices also. No substitutions are permitted to benefit from these reduced prices. For the next week, the features (all accompanied by approved side dishes and Sundae) are:

Sunday, April 21 — dinner, roast turkey w/d, chicken, mashed potatoes, peas, \$3.50.

Monday, April 22 — lunch, Italian, \$1.71; dinner, chicken, lasagna, \$1.71.

Tuesday, April 23 — lunch, chicken, beef w/risotto, \$1.19; dinner, hot meat sandwich \$1.41.

Wednesday, April 24 — lunch, grilled ham & cheese sandwich \$1.29; dinner, macaroni & cheese \$1.09.

Thursday, April 25 — lunch, turkey turnover \$1.19; dinner, Italian spaghetti \$1.19.

Friday, April 26 — lunch, tuna noodle casserole \$1.19; dinner, fish cakes \$1.19.

Saturday, April 27 — lunch, chicken chunk meat/rice \$3.09, dinner, franks & beans \$1.29.

WPSX highlights

"Owen Wingrave," Benjamin Britten's opera written especially for television, is "The PBS special of the Week" Monday, April 22, at 8:00 p.m. on WPSX-TV, Channel 3. Based on a short story by Henry James, the opera tells of a young English pacifist who breaks from the military traditions of his aristocratic family. It stars Benjamin Luxon as Owen Wingrave, Jane Baker as his fiancée, Peter Pears as Sir Philip, and Heather Harper as Owen's lone defender. Britten himself conducts the work for this program, which marks the first time Britten had written specifically for the medium of television. "Owen Wingrave" may also be seen Saturday, April 27, at 10:00 p.m.

State Tuesday, April 23, at 8:00 p.m. on WPSX-TV. The Trio — Joanne Zagel, violin; Leonard Faldman, cello; and Robert Baisley, piano — are all faculty members in the Department of Music at Penn State. On "Music at Penn State," they perform Beethoven's Trio No. 10 in E flat, opus 44 ("Fourteen Variations on an Original Theme") and Henry Conell's "Trio in Nine Short Movements."

"A Touch of the Poet," the third play in Eugene O'Neill's unfinished cycle of dramas about the history of one American family, is presented on "Theatre in America" Wednesday, April 24, at 8:30 p.m. on WPSX-TV. Written in 1936, the play is set in Boston during the 1820s and centers around the tragedy of an immigrant Irishman who lives in the past and considers himself more refined than the Yankee mer-

chants around him. When his daughter calls in love with a merchant's son, the Irishman sets out to horsewhip the merchant, only to confront the realities of his situation. Fritz Weaver and Carrie Nye are featured.

"Pornography: A Dilemma in Freedom vs. Censorship" is the subject of a statewide "Pennsylvania Town Meeting" Thursday, April 25, at 8:00 p.m. on Channel 3. The two-hour program will include documentary reports from each of the seven member stations of the Pennsylvania Public Television Network and a discussion of pornography by legislators, specialists, and concerned citizens around the state. At 10:00 p.m., following the Pennsylvania Town Meeting, WPSX-TV will continue the discussion with Penn State experts and area residents expressing their views.

A total of 554 in first screening

Heart risk exam program extended

A successful two-day Heart Risk Screening Program March 27-28 on the University Park campus has encouraged the Central Pennsylvania Heart Association, Continuing Education, and the College of Health, Physical Education and Recreation to schedule an extra period in June when others of the University community may take advantage of the examinations.

Examinations June 11 and 12 will be in addition to those scheduled for April 23-24, for which appointments are currently being accepted at the Association office, 238-1301. The exams will be given from 9 a.m. to noon and 1 to 5 p.m. in Room 301 Agricultural Administration Bldg.

A total of 554 persons, of varying ages, had the examination March 27-28. Officials point out that the exam privilege is available to all members of the family of

University faculty, staff, and students, and that many younger people should consider having it done. One of the measurements made is cholesterol level, considered a factor contributing to heart disease. Only a specialized test can show what a person's level is, it is pointed out.

Other factors measured include blood sugar, blood pressure, skin fold, height and weight, and to these factors are added such information as age, medical history, heredity, smoking habits, and exercise, to develop an indicator of whether the person is a likely prospect for heart disease if he or she continues with present modes of living. If a high risk is indicated, the Heart Association helps the person work out a health program with his physician to reduce the risk.

A \$3 donation is asked for each exam.

Stewart resigns as head of English

Professor David H. Stewart has resigned his position as head of the Department of English to be effective July 1, 1974, according to Dean Stanley F. Paulson. Dr. Arthur O. Lewis, Jr., professor of English and associate dean of the College of the Liberal Arts, will serve as acting head of the Department after July 1.

Dr. Stewart will continue his teaching and research as professor of English.

A search committee to recommend candidates to be considered for appointment as head of the Department is being established by Dean Paulson in cooperation with the English Department.

OGONTZ DEDICATION — The new Physical Education Building and the new west wing of Woodland at the Ogontz Campus will be dedicated Saturday, May 4, and on the same day the first Alumni Homecoming will be celebrated. President Oswald will give the principal address at the dedication, scheduled for 11:30 a.m., and Kenneth L. Holderness, vice president for Commonwealth Campuses, will make the dedication statement. At a buffet luncheon on the nearby athletic field, a talk on the visit to China by the University delegation recently will be given by Dr. Thomas F. Megner. The arts and sciences wing, which completes Woodland, will house art, music, languages, psychology, biology, computer science, and drafting. The physical education building was a \$17 million GSA project and the arts and sciences wing a \$14 million project. The Alumni Homecoming activities will include an alumni meeting, tennis match, women's softball game, exhibits of various kinds, a preview of an upcoming theatre production, Nittany Lion football films, and an Alumni Dinner/Dance, for Ogontz alumni as well as other Montgomery County alumni. James L. Torman, associate director of athletics, will be the principal speaker at the banquet, and other remarks will be made by Ross B. Lehman, executive director of the Alumni Association, and Wesley Olson, assistant professor of physical education at the Campus.

Marines to run in formation for charity

Twenty four Marine Officer Candidates, the Marine Officer Instructor and the Assistant Instructor will take part in a five-mile, in-formation, run Sunday, April 21, for the benefit of the Pennsylvania Association for Retarded Children.

Donations by area residents and former Marines will be used to assist retarded children. Pledges and contributions may be made to Major R. K. Ryman, U.S.M.C., 308 Wagner Blvd.

The Semper Fidelis Society is conducting the run, a test of physical endurance for the Marines, all of whom are current members of the "100 Mile Club" sponsored by the Society.

Contributions of any amount will be appreciated by the Club.

'Women Today' theme of weekly series

A series of programs on the theme, "Women Today," is being conducted by the East Halls Residential Life Program, generally on Wednesday evening at 6:30 p.m. in Findlay Hall, although the next meeting is Thursday, April 25.

This week (April 17) the topic "New Perspectives for Women" was discussed and the

session April 25 will be concerned with "The Stigma of Sex Typing," with a film, "Growing Up Female," and discussion by Patricia L. Sanders, Dr. Robert O'Connor, assistant professor of political science, and Dr. Mary Dupuis, assistant professor of education.

The programs are open to everyone.

OPEN HOUSE at the College of Earth and Mineral Sciences April 20-21 will include tours of the Meteorology Department's Weather Station, where freshman William Bus and graduate student Michael Merry are also examining a surface weather map.

Rock specimens, coal for youngsters

Something for everyone in open house

A mini-mine and a lump of coal will be extra attractions for youngsters attending the College of Earth and Mineral Sciences open house Saturday and Sunday (April 20-21).

In the mini-mine, the children will search for rock specimens, which they may take home, and if they get a numbered rock, they will win a set of mineral specimens.

The lump of bituminous coal will be in a small plastic bag, and it is being prepared

by David Snell, museum curator, who points out that many of these youngsters would never have seen coal, having lived in homes heated with oil, gas, or electricity.

Students of virtually every major field in the College have prepared exhibits of planned activities for the open house. Visitors should go first to the lobby of either Deike Bldg. or Mineral Industries, where hostesses will provide programs and direct them to exhibit areas.

Pi Lambda Theta Installation banquet

Alpha Kappa chapter of Pi Lambda Theta will hold its annual installation banquet on Wednesday, April 24, at 6:00 P.M., in the Laurel Room of the Nittany Lion Inn.

The speaker will be Dr. E-Tu Zen Sun, professor of Chinese history and a member of the recent Penn State delegation to China. Dr. Sun will speak on "The Status of Women in China".

Officers to be installed for 1974-75 are:

NEWS —

(Continued from page one)

May 4 will include the celebrity milking contest, sorority milking contest, the milk "chugging" contest and other events.

GENERAL STORES CLOSING

The yearly inventory at General Stores on the University Park campus will take place during the week of June 3, and the facility will be closed all that week.

WHO SCIENTIST LECTURE

Dr. John F. Marshall, a social scientist with the Human Reproduction Unit of the World Health Organization, will lecture Monday, April 22, at 2 p.m. in Room 341 Deike, on "Defining Cultural Specifications for New Fertility Regulating Methods: The Research Program of the WHO Acceptability Task Force." Dr. Marshall, who is on the faculty of the University of North Carolina, was responsible for the development and coordination of the forthcoming studies of the task force he will discuss. The Populations Issues Research Office is sponsor of the lecture.

BEHREND FORENSICS

Two trophies were won by the Behrend College Forensic Unit at the Eighth Annual Allegheny Individual Events Tournament held at Frostburg (Md.) College recently. Eleven colleges, from four states and Washington, D.C., participated in the

event. Advisors to the Union are members of the speech department, Dr. Ingaborg Chaly and Ernest Weckesser.

CAPITOL STUDENT HONORED

Currently an Air Force Institute of Technology student at Capitol Campus, working toward a baccalaureate degree in mechanical engineering, Major Konrad W. Trautman, former Vietnam prisoner of war, was honored at ceremonies on the Campus April 3, as he received the Purple Heart, Silver Star, and Distinguished Flying Cross, along with three other medals. Col. Alan J. Gil, professor of aerospace studies, presented the awards, which were given for gallantry and achievements recognized only now because of a long internment in a North Vietnam prison camp. He was shot down and reported Missing-in-Action on Oct. 1, 1967 and was held captive until March 11, 1973. Major Trautman has been in military service since 1944. His daughter, Diane, a student at the University Park campus, and he has a son still in high school.

SARGENT ELECTED

Dr. Harold R. Sargent, director of the Shenango Valley Campus, has been elected president of the Pennsylvania Association of Two-Year Colleges. He has served on the Executive Committee for the three years, a position to which Vernon L. Shockey, director of the Mont Carmel Campus, was elected. The Association composed of 50 community college branch campuses, private junior colleges and two-year proprietary institutions.

VISITING PROFESSOR

Dr. Laszlo Tóke, associate professor of chemistry at the Technical University of Budapest, is serving as visiting professor of chemistry at the University Park campus for the next two months. He arrived April 1 and is working with Dr. Maurice Shamma, professor of chemistry, on the total synthesis of quinuclidine alkaloids. This is Dr. Tóke's second visit to Penn State. Previously, he spent the Fall Term of 1972 as a National Academy of Sciences Exchange Scholar at Dr. Shamma's laboratory.

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Division, 805-1387 (ext. line 475-1387). Do not contact the area having the vacancy. Applications will be accepted until 5 p.m., May 2, 1974.

ASSISTANT FINANCIAL OFFICER — Capitol Campus

Responsible for various financial and administrative matters, to include special accounting projects as assigned. Bachelor's degree in Business Administration with a major in Accounting or equivalent. Six months to one year experience desired.

EXTENSION ASSISTANT (YOUTH), AGRICULTURE — Philadelphia

Responsible for organizing, directing, and functioning of County Extension Programs among youth groups. High School or equivalent with one to two years effective experience or associate degree or equivalent in related areas with three to six months experience.

RESEARCH AIDE (BIOCHEMISTRY), SCIENCE — University Park

Responsible for conducting various enzymatic assays, analysis, and experi-

ments relative to protein chemistry research. Bachelor's degree in biochemistry, microbiology or equivalent with minimum of two years effective research experience in enzymology.

CLINICAL PSYCHOLOGIST, STUDENT AFFAIRS — University Park

Responsible for providing mental health services for students of the University. Ph.D. in clinical or counseling psychology or equivalent or master's degree in clinical or counseling psychology or equivalent plus three to four years applicable clinical experience. One year APA approved internship necessary.

PROJECT ARCHITECT, PHYSICAL PLANT — University Park

Responsible for the development of drawings and specifications for maintenance, alterations, and selected new construction projects for the Pennsylvania State University, including development of details, selection of materials and construction methods and specifications. Includes supervision of other personnel in development of plans and specifications. Bachelor's degree in Architecture or Architectural Engineering or equivalent plus two to four years experience as an Architectural Designer and Draftsman. Requires a working knowledge of structural and mechanical systems.

PENN STATE intercom

Volume 3, Number 32

April 25, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Guidelines for projects also announced

Bicentennial observance committee named

The University's observance of the nation's Bicentennial will be assisted by a 28-member Commission representing faculty, students and staff.

The Commission, appointed by President John W. Oswald, held an all-day organizational meeting recently, drawing up criteria to serve as a general guide for the University's participation in the Bicentennial.

In talk opening the Commission meeting, President Oswald suggested that the Commission concentrate on a few projects of high quality that would have an enduring character and would enhance the ongoing programs of the University.

The Commission discussed a number of ideas for University participation in the Bicentennial that had been suggested by individuals and groups during the past few years. It is hoped that additional ideas will be presented to the Commission for consideration.

In addition to sponsoring a limited number of activities itself, the Commission will encourage ongoing groups to consider a bicentennial theme in their 1975-76 program ideas. It will also maintain liaison with local, state and national groups engaged in Bicentennial planning. It was pointed out at the Commission meeting that some funding will be available from the National Foundation for the Humanities and the National Foundation for the Arts for the development of programs. Commission members also are investigating other sources of external funding, particularly in view of the limited funding available from the University's own resources.

It was the sense of the Commission that Pennsylvania's crucial role in the events leading up to the birth of the nation placed the University in a strong position to develop this theme in its Bicentennial programs.

The Commission suggested a number of general guidelines for University participation in the Bicentennial. No single program will meet all these guidelines, but

Penn State Bicentennial Commission

Dr. Stanley Ikenberry (Chairman of Commission), Senior Vice President for University Development and Relations.

Dr. Stanley Weintraub (Vice Chairman), director, Institute for the Arts and Humanistic Studies.

Dr. Doris Seward (Deputy Director), Executive Assistant to the President.

Dr. James Beattie, Dean, College of Agriculture.

Dr. Robert Berneruer (retired), **George Cernacek**, President, Undergraduate Student Government.

Dr. Vladimir Dalesovsky, professor, Child Development and Family Relations.

T. Reed Ferguson, Vice President for Public Affairs.

Dr. Stuart Forth, Dean, University Libraries.

Marlene Froke, Director, Media in Continuing Education.

Dr. Paul Holtzman, professor, Speech.

William Hull, Director of Exhibitions, Museum of Art.

D. Carl Johnson, Head, Building and Planning Construction, Physical Plant.

Olsen Johnson, Head, Department of Public Information.

Dr. Eugene Kelley, Dean, College of Business of Business Administration.

Chris Kamara, Director, University Press.

Oliver LaGrone, Special Assistant to Vice President of Undergraduate Studies, Capitol Campus.

Dr. John Leathers, Director, Altoona Campus.

Dr. Margaret Matson, professor of Sociology.

Dr. Robert Murray, professor of American History.

Patricia Overdier, associate professor, Mathematics, Ogontz Campus.

Roger Richards, president, Graduate Student Association.

Dr. Rustum Roy, professor of Solid State.

Sally Smell, senior assistant librarian, Berks Campus.

Dr. Karl Stuedelink, associate dean, Resident Instruction, Health, Physical Education and Recreation.

Dr. Walter Weilers, Dean, College of Arts and Architecture.

Jacqueline O. Wells, Assistant Professor, Math, McKeesport Campus.

Dr. Philip Young, Research Professor, English.

none should be in direct conflict with them. The Commission suggested that Bicentennial plans should:

- be appropriate to the mission and character of the University;
- be accessible not only to members of the University community but to the citizens of the Commonwealth;
- enrich and contribute to the ongoing academic programs of the University;
- represent a permanent or lasting contribution;
- have some specific relevance to the Commonwealth of Pennsylvania;
- draw on the special uniquenesses and strengths of The Pennsylvania State University;
- appropriately reflect the standards of quality and excellence that should characterize the University;
- be capable of geographic mobility and accessibility;

- reflect the pluralistic character of the University and society at large;
- be designed to appeal to a broad audience;
- be appropriately articulated with the plans of communities, the State and Nation;
- accurately project the University to the citizens of the Commonwealth and enhance public understanding of the University and its programs;
- maintain a balanced Bicentennial focus on the heritage of the past, the realities of the present, the horizons of the future.

Officers of the Commission are chairman, Dr. Stanley O. Ikenberry, senior vice president for University Relations and Development; vice chairman, Dr. Stanley Weintraub, professor of English and director of the Institute for Arts and Humanistic Studies; and deputy director, Dr. Doris M. Seward, executive assistant to the President. The other members are drawn from throughout the University community.

News in brief

LANCASTER DINNER

Dr. Otis E. Lancaster, associate dean for instruction and professor of engineering education in the College of Engineering, who will retire in June, will be honored at a dinner at 7:30 p.m. on Thursday, May 30, in the Nittany Lion Inn.

Reservations for the dinner, sponsored by the College of Engineering, may be made by contacting Ernest R. Weidhaas, 101 Hammond Bldg. at the University. Reservations should be made by May 15.

Paul Ebaugh, associate dean for research in the College, will serve as master of ceremonies, and various other members of the University community will participate.

Kern information

An Information Center has been installed in the lobby of Kern Graduate Building, as the result of studies showing that reception functions of the Graduate Commons and the Graduate School could be combined to advantage. The Center has a telephone number of 865-5436, which should be called to obtain information on the Graduate School or the Commons.

The telephone number of the Graduate School Dean, Dr. James Bartoo, has also been changed, to 865-2516. Also on that same number are Associate Dean Henry Sams, administrative assistant Margaret Bell, administrative aide Madeline Harbach, and secretaries Kathy De Verter and Brenda Grenoble.

MASTELLER GETS FELLOWSHIP

Dr. Edwin Masteller, associate professor of biology at Behrend College, has received a Senior Fulbright Research Fellowship for study in Germany, specifically at the Max Planck Institute for Lymphology, at Schiltz, West Germany. Earlier he was granted a year's leave of absence, beginning Aug. 1, to study the techniques of determining productivity in lotic systems, primarily with insects. He has made studies of this nature in streams flowing into Lake Erie.

(Continued on page four)

Murray's interest in Harding started with a monument

Until a few years ago, Warren G. Harding's reputation had no place to go but up. That his image is beginning to change is due in large part to the trips a boy from Columbus, Ohio, made during the 1930s to visit his grandfather in Indiana.

"Marion, when Harding lived, lies directly on the route we used to take," recalls Dr. Robert K. Murray, professor of American history and author of "The Harding Era."

"The road went by the Harding memorial, which is a magnificent one, and naturally, I asked about it. My Republican family always seemed embarrassed by my questions. Still, I was impressed; I didn't get to see that many monuments."

As a graduate student at Ohio State (where he earned his B.A., M.A. and Ph.D. in history along with a B.Sc. in education), Dr. Murray encountered plenty of disparaging remarks about Harding once he began to do research in modern American history.

"Yet I found that in some respects, Hard-

ing was quite unusual," he says. "Woodrow Wilson, the idealist, had kept Eugene Debs in jail for pacifism and put other radicals behind bars. Harding freed them. This was quite contrary to the mossback type of reaction one would have expected. I began to get interested in him, so when his papers were opened, I was among the first to go and take a look."

"Originally, I went to see what he was like in a personal, anecdotal sort of way, assuming that the things that had been said about him politically were largely true. When I read his letters, I became convinced he was not the complete misfit other historians had held him out to be."

Harding's downfall arose from the Teapot Dome scandals following his administration. Although he was innocent of malfeasance on his own, he tried to cover up for friends who were guilty. The parallels with Watergate are obvious and have made Dr. Murray a sought-after speaker on college campuses.

(Continued on page four)

Dr. Robert K. Murray. Behind him, a model of the Alabama, dreadnaught of Union shipping in Civil War. Dr. Murray builds such models to occupy his hands — during the football season.

TIAA-CREF retirement plan under study as SERS alternative

On March 1, 1974, Governor Milton Shapp signed Act 31 which provides many major changes in the State Employees' Retirement System as described in an earlier INTERCOM article dated Feb. 14, 1974. The final legislation contains a provision granting authority to the University to establish an alternate retirement program.

Over the years, many faculty members have expressed their interest in a retirement plan to serve as an alternate to the State Employees' Retirement System. Some expressed disappointment that the University was heretofore unable to offer the plan of retirement provided by the Teachers Insurance and Annuity Association of New York (TIAA) and TIAA's variable annuity plan provided by TIAA's College Retirement Equity Fund (CREF).

The alternate plan now under consideration is that of TIAA-CREF. It is under

intensive review and study. The Fringe Benefits Subcommittee of the Faculty Affairs Committee of the Senate has reviewed the basic proposal being considered. Plans are to complete the review and present the proposed plan to the Board of Trustees at their May, 1974 meeting for consideration and approval.

When approval of the plan is secured, members of the faculty and staff will be provided an ample period of time (nine months from the effective date selected) to study and review the alternate plan's provisions prior to reaching their decision about the plan they will select. (Employees may remain in the State Plan if they wish.)

Complete details on the plan will be presented to all employees of the University as soon as it is practical to do so.

Students select him for teaching excellence

Richey wins Science award

Dr. Herman G. Richey, professor of chemistry, has been presented the third annual College of Science Student Council C. I. Noll Outstanding Teacher Award for excellence in undergraduate teaching.

A bronze plaque was presented to Dr. Richey at a banquet in his honor Monday night which Dr. C. I. Noll, dean emeritus, Dr. Thomas A. Warlick, dean, department heads, and Student Council members from the College of Science attended.

The Noll Award was established in 1971 through a grant from College of Science alumni. Originally called the Outstanding Teacher Award, its name was changed this year to honor Dean Noll, dean of the College of Science when it was organized in 1963.

Dr. Richey was chosen by the Selection Committee from nominations submitted by students in the College of Science.

In their nominations students most often cited Dr. Richey's competence as a teacher and dedication as an advisor.

Dr. Herman G. Richey and the C. I. Noll award for excellence in undergraduate teaching in the College of Science.

Lectures: architecture, journalism, space, taste

Malcolm Wells, architect, ecologist, journalist, and philosopher, will lecture on "Gentle Architecture" Thursday, May 2, at 7:30 p.m. in Room 102 Forum. The talk, which is subtitled "The Search for Ways to Build without Destroying the Land," will be concerned with the unique approaches to the ecological problems of architecture. Wells is a regular columnist for the Philadelphia "Bulletin" and has published articles in "Harpers" and many architectural magazines.

Norman A. Cherniss, executive editor of the Press-Enterprise paper in Riverside, Ca., will give a talk before initiates of Kappa Tau Alpha, journalism honor society, today (Thursday, April 25) at 7:30 p.m. in Room 102 Forum. The lecture is also open to the public. Cherniss is a Harry Newman Fellow in 1958-59, has served on the Press-Enterprise since 1953 and has held his present title since 1971. He has served as visiting lecturer at U.C.L.A. and at the University of Southern California.

"Progress and Potential in Space Sciences" will be the topic of a lecture, sponsored by the department of astronomy, by Dr. John E. Naugle, NASA deputy associate administrator for space science,

today (Thursday, April 25) at 8 p.m. in Room 102 Forum Building. Dr. Naugle, associated with NASA since 1959, has administered NASA programs in lunar exploration, launch vehicles, and propulsion and has been in charge of programs which use spacecraft and sounding rockets to explore the Earth's environment, make astronomical observations, and study the sun, planets and moon.

The second annual E. A. Day Memorial Seminar in Food Science will be held on Friday, May 3, at 2:20 p.m., Room 301 Agriculture Administration.

The speaker will be Dr. Morley Kare, director of The Monell Chemical Senses Center, University of Pennsylvania. His lecture will be entitled, "The Sensation of Taste."

This special lecture will be held annually in memory of the late Dr. Edgar Allen Day. Dr. Day was adjunct professor of food science at Penn State and executive vice president of International Flavors and Fragrances, Inc., prior to his death at the age of 44. IFF is the world's largest manufacturer of flavors and perfumes, and Dr. Day brought to it his expertise as a widely recognized authority on food flavor chemistry.

The Arts: Thespians, Orchest, music

The hit musical "Fiddler on the Roof" will be performed for the first time on a Centre County stage by the Penn State Thespians May 8 through 11 in Schwab Auditorium. Curtain time is 8:30 p.m. for evening performances and 2 p.m. for the Saturday matinee.

"Fiddler" holds the record as longest-running show on Broadway, and was made into an Academy Award winning motion picture. Such familiar songs as "If I Were a Rich Man," "Matchmaker," "To Life," "Miracle of Miracles," and several others are featured.

Thespians, now in its 76th year and the oldest chartered organization on campus, has selected David Hochy (Grad. Theatre Arts) to direct "Fiddler." Hochy directed the Thespians' production of "Hello, Dolly!" last spring and choreographed "Stop the World, I Want to Get Off" in the fall of '72.

Merrill Plaskow, who appeared as Horace Vandergelder in "Hello, Dolly!," heads the 40-member "Fiddler" cast as Tevye, the delightful milkman who always manages to keep his wits about himself, even when his world seems shattered in pieces around him.

Tickets for "Fiddler on the Roof" will go on sale in the HUB April 29. Mail order coupons from local newspapers may be used for reservations may be made by calling 238-8671. Ticket prices are: Wednesday, Thursday evening and Saturday matinee, \$2; Friday and Saturday evenings, \$2.50.

Tickets are available at White Building, Kern Graduate Building and the HUB for the performances May 2, 3 and 4 (including a May 4 matinee) of the annual dance concert by Orchestras Dance Club. The show is called "Opus 1974" and is under the artistic direction of Patricia Heigel, instructor of dance in the College of Health, Physical Education and Recreation. Women's Recreation Association is sponsor.

Tickets at \$1 for adult non-students and 50 cents for children (University students must obtain tickets but there is no charge) are being sold at White Bldg. (from 8 a.m. to 5 p.m.; at Kern from 11 a.m. to 2 p.m.; and at the HUB desk from 8 a.m. to 5 p.m.)

Twelve original choreographic works will be performed by the dancers, with many individual styles of dance, and some convey an idea or a mode and others contain

a more formal design and style. The dancers represent a number of different colleges of the University; seven of the 21 members of Orchestras are dance majors in the College of Health, Physical Education and Recreation.

Curtain time is 8:30 p.m. for evening performances, 2:30 p.m. for the matinee.

The Thalia Trio — violinist Joanne Zagari, cellist Leonard Feldman, and pianist Robert Baileys — will play trios by Ravel and Smetana in their last concert of the current season Wednesday, May 1, at 8:30 p.m. in the Music Bldg. recital hall. Ravel's 1914 Trio is considered the original source of the composer's influence on the American jazz idiom. The Smetana work is patterned after the dumka, a Slovakian dance form. It was composed in 1855.

John Shannon, a candidate for the master of fine arts degree in the music department, will perform an organ recital of works by seven composers at 8:30 p.m. Monday, April 29, in the Music Bldg. recital hall. Shannon, who holds the bachelor's degree of music from Westminster College, Princeton, N.J., will be assisted by Dr. D. Douglas Miller and a chamber orchestra of music students in the performance of Handel's "Concerto in F Major." Also selected for performance are compositions by Couperin, J. S. Bach, Widor, Pachelbel, Durufle, and Vierne.

In writing

Dr. Graham B. Spanier, assistant professor of human development, is co-editor of "Selected Studies in Marriage and the Family," 4th edition, recently published by Holt, Rinehart, and Winston. The volume is a collection of research articles and essays on the sociology and the social psychology of the family. Preceding the selections is an introductory essay by Dr. Spanier and co-editor Dr. Robert F. Winch, of Northwestern University, on the methodology of science. It is followed by a general theme of the family designed to give the student appropriate background to understand the selections. A discussion on changing and emerging family patterns in America and a selection containing systematic coverage of socialization with respect to sex roles are included.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For more information and funding source information, call 855-1372.

April 25, 1974

(125-1) Directors of NSF's Research Management Improvement Program have issued two related program solicitation notices, May 1, 1974 deadline. The first solicitation is called "Improved Management of Large Scale Interdisciplinary Research Projects" and asks for proposals aimed at improved management of research projects for federally supported interdisciplinary research. Some specific areas are: the relationship of institutional organization and policies to project management; management strategies for planning, initiating, and conducting projects; techniques for effective communication among project personnel, and allocation of research resources. Projects may be awarded for up to twenty-four months duration. Full calls may be provided. (Ref. NSF 74-13)

The second solicitation falls under the title "Improved Management of Large Research Laboratories and Large Specialized Research Facilities." To qualify, these units must receive at least \$1 million in operational and project support for research. Objectives include: developing innovative managerial and organizational methods and procedures, fostering extensive use of management alternatives to achieve greater productivity and cost-effective research support services, and exploring consequences of managerial and organizational al-

ternatives. A twenty-four month project period is allowed. Full calls may be provided. (Ref. NSF 74-14)

(126-2) Applications are being accepted by the Office of Education (OE) for High School to Reserve Teacher Training Program Development grants. Most right to read awards will fall in areas of preservice teacher training, right to read states program, school-based program, community-based program, and special projects for national impact. Unsolicited proposals will be considered but will not receive priority. Applications may be received by OE on or before May 14, 1974. (Ref. 39FR13023/13017, 4/10/74) (CFOA 15,333).

(126-3) The Low Enforcement Assistance Administration (LEAA) has issued a Guide to Discriminatory Grant Programs. Program objectives include the advancement of national priorities, attention to programs not emphasized in state plans, and special impetus to reform and experiment within the total law enforcement structure. Copies of the guide are available from: LEAA, Dept. of Justice, 333 Chestnut St., Suite 800, Philadelphia, Pa. 19106. (Ref. 39FR 12061, 4/2/74)

(126-4) Through NASA's Life Scientist Program, faculty are invited to spend a year at a NASA Center to undertake special studies and/or acquire experience in space flight related aspects of the individuals' life science specialty. Program

assignments are available at the Johnson Space Center, Houston, Texas and the Ames Research Center, Moffett Field, Ca. At Johnson, cardiology/cardiophysiology and neurophysiology are the program assignments. At Ames they are human vestibular physiology, cardiovascular/vestibular research, and chemistry or biotechnology. Nominations from institutions must be received by May 31, 1974. For additional information contact H. S. Brownstein, Director, Program Planning and Control, Office of the NASA Director of Life Science, Washington, DC 20546 (202)755-2252.

(126-5) Through grants from the Office of Education, State Postsecondary Education Commissions will inventory and study "all public and private postsecondary educational resources in the state including the planning necessary for such resources to be better coordinated, improved, expanded or altered so that all persons within the state who desire and qualify for postsecondary education may have an opportunity to do so." Applications from Commissions must be received by OE on or before May 16, 1974. (Ref. 39FR13189, 4/11/74)

(126-6) The U.S. Dept. of Labor supports a Doctoral Dissertation Grant Program authorized by the Department of Labor's Manpower Development Training Act (MDTA) (1962). The goal is the support of dissertation research of Ph.D. candidates who have completed all course work and whose dissertation topics are related to manpower. Under the Small Grants Program, awards for dissertation research are made to universities. Occasional grants are made to individuals in the social sciences and related fields. For more in-

formation on the Manpower Research Institute Grant Programs and Small Grants to conduct MDTA exploratory or feasibility studies, contact the National Manpower Admin., PO Box 8796, Philadelphia, Pa. 19151 or call U.S. Dept. Labor, Washington, DC (202)76-6132.

(126-7) The National Endowment for the Arts (NEA) Media Studies program has been established. NEA will support innovative programming on film, television, and radio. Grants may be used for public media arts programming, experimental projects in film, videotape, and audio recording. Assistance is also available for audio film centers, development of film course curricula, and sponsorship of seminars for in-service film studies may apply for awards on behalf of individuals who have three or more years of relevant postdoctoral experience. The candidate must have been born in the United States, have lived in the U.S. and less than 40 years old. The award is for up to five years, on a full time 12-month basis, with maximum salary contribution set at \$10,000 per year. Grants must be received at NEA no later than June 1, 1974. Awards will be announced by January 1975. For information and applications, contact: Office of Research and Development, Division of Research Grants, NEA, Bethesda, Md. 20814 (301)496-7221.

University Calendar

April 25-May 5, 1974

Special Events

Thursday, April 25 — Special meeting of HOPS for faculty and staff members, on "The Relevance of HOPS," 8 p.m.; for place call 863-0298, Tuesday, Friday or Sunday, 7-11 p.m.

Friday, April 26 — East Hills Residential Life program on "Women Today," 6:30 p.m., Findlay Hall Lounge. Topic: "The Stigma of Sex Typing," with Patricia Sanders, Dr. Robert O'Connor, and Dr. Mary Dupuis, with film, "Growing Up Female."

Thursday, April 25 — GSA Workshop on canning and preserving, 7:30 p.m., Room 112 Kern.

Thursday-Saturday, April 25-27 — Penn State Aquatic Institute and Hall of Fame, Nantatium.

Friday, April 26 — Penn State Wind Ensemble, 8:30 p.m., Music Bldg. recital hall.

Friday, April 26 — Folk and Square Dance Roundup, 7:30-9 p.m., North Gym, White.

Friday, April 26 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday, April 26 — Eco-Action film and lecture on "The Living Environment," by Dr. Louis T. Kardos, 7 p.m., HUB main lounge.

Friday, April 26 — Liberal Arts Career Day program, 1:30-5 p.m., various rooms in Kern. Keynote talk, 1:30 p.m., by Roger Hetzel, Room 112 Kern, on "Liberal Arts and Careers."

Saturday, April 27 — Bicycle Rally, sponsored by Free-U as part of Earth Week,

starting from Parking Area 80 at 2 p.m. Tour through State College, in support of bicycling for health, environment and transportation reasons.

Saturday-Sunday, April 27-28 — Stamp exhibition and bourse, by Mt. Nittany Philatelic Society, assembly room of Nittany Lion Inn, Saturday 10 a.m.-5:15 p.m. and 8-10 p.m.; Sunday, 10 a.m. to 5 p.m.

Saturday, April 27 — 57th Little International Livestock Exposition, sponsored by Black and Bridge Club; competition in beef cattle, swine, sheep and horses, 8 a.m. to 5 p.m.

Saturday, April 27 — Sports: Men's lacrosse, vs. Rutgers, 8 p.m.; women's softball, vs. SUNY-Cortland, 2 p.m.

Saturday, April 27 — Football team family-camera day, 1 p.m., Beaver Stadium; scrimmage at 2 p.m.

Saturday-Sunday, April 27-28 — Sports: Rugby, Phyrst Tournament.

Sunday, April 28 — Penn State Concert Blue Band, 3 p.m., Schwab.

Sunday, April 28 — Sports: Men's baseball, vs. Rider, 1 p.m.

Sunday, April 28 — Lee Ann Kennedy, poetry demonstration, 12 noon, lobby of Kern.

Sunday, April 28 — Friends of India Celebration, Indian entertainment, films, 6 p.m., Rooms 102, 104 and 112 Kern.

Sunday, April 28 — Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Raymond Dibble, pastor. State College Christian and Missionary Alliance.

Sunday, April 28 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, April 28 — Eastern Orthodox Divine Liturgy, 10 a.m., HUB assembly room.

Monday, April 29 — John Shannon, organ recital, 8:30 p.m., Music Bldg. recital hall.

Tuesday-Wednesday, April 30-May 1 — Alpha Phi Omega Bloodmobile, 9 a.m.-5 p.m., HUB Ballroom.

Tuesday, April 30 — Sports: Women's lacrosse, vs. Millersville, 2:30 p.m.; women's tennis, vs. East Stroudsburg, 3 p.m.

Tuesday, April 30 — Eastern Orthodox Vespers, 7:30 p.m., Eisenhower Chapel.

Tuesday-Friday, April 30-May 3 — Peace Corps/Vista Recruiting, 8 a.m.-5 p.m., lobbies of Boucke and Chambers Bldgs. Seniors and graduate students, all majors; also non-students.

Wednesday, May 1 — East Hills Residential Life program on "Women Today," 6:30 p.m., Findlay Hall Lounge. Topic: "The Family — Will It Last?" with Dr. Eloise Snyder and Dr. Helen Meahl.

Wednesday, May 1 — Thalia, Trio, 8:30 p.m., Music Bldg. recital hall.

Wednesday-Thursday, May 1-2 — University Theatre, student preview of "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.

Wednesday, May 1 — Noontime concert, 12:15 p.m., lobby of Kern.

Thursday-Saturday, May 2-4 — Annual Dance Concert of Orchestra Dance Club, "Open 1974," 8:30 p.m.; matinee performance Saturday, May 4 at 2:30 p.m., White Hall Dance Theatre. Tickets required.

Friday, May 3 — Free-U jammy, 7:30-11:30 p.m., HUB ballroom.

Friday-Saturday, May 3-4 — University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.

Friday, May 3 — Sports: Men's lacrosse, vs. Lehigh, 8 p.m.

Friday, May 3 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern.

Friday-Saturday, May 3-4 — Spring Week Carnival, "Movie Mania," Intramural fields near Beaver Stadium, Friday, 7 p.m. to midnight, Saturday, 7 a.m. to midnight. Saturday afternoon activities for children, puppet show and amusement rides. Benefit of Renaissance Fund.

Saturday, May 4 — Keystone Drill Meet, 8 a.m.-5 p.m., Ice Pavilion.

Saturday, May 4 — Sports: Rugby, vs. Barbarians.

Saturday, May 4 — U.S.G. Spring Week Dance Concert, 8 p.m., Rec Hall. Group Performing: Law. Limited number of tickets on sale at HUB desk.

Sunday, May 5 — Marcus Chubbuck, piano recital, 3:30 p.m., Music Bldg. recital hall.

Sunday, May 5 — German Club play, 8 p.m., Room 112 Kern.

Sunday, May 5 — Chapel Service, 11 a.m., Eisenhower Chapel. Rabbi Theodore H. Gordon, Main Line Reform Temple, Beth Elshin, Wyndwood, Pa.

Sunday, May 5 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Seminars

Thursday, April 25 — Meteorology, 3:55 p.m., Room 28 Mineral Sciences. Dr. Nils Buch, Danish Atomic Energy Commission, on "Atmospheric Boundary Layer Research at Risø."

Thursday, April 25 — Agronomy, 3:30 p.m., Room 101B Ag. Administration Bldg. C. H. Chu on "The Effects of Water, Soil Power Renovation and Solts in the Agri-Power-Water Water Complex."

Thursday, April 25 — Chemistry, 12:45 p.m., Room 210 Whitmore, Theodore L. Brown, University of Illinois, on "Chemistry of Metallic Elements in the Ionosphere and Mesosphere."

Thursday, April 25 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 12 Kern. Charles C. Miesse, Transportation Coordinator, Air and Water Division Environmental Protection Agency, Philadelphia, on "The VMT's of Transportation."

Thursday, April 25 — Philosophy, 4 p.m., Room 251 Willard, Dr. Drew Hylton, Trinity College, Hartford, and Dr. Jeffrey Reiman, American University, Washington, on "Political Nihilism."

Friday, April 26 — Two Cultures Dialogue, 12:30 p.m., Room 169 Materials Research Lab. Engineering Dean N. J. Palladino and Dr. P. D. Bennett, marketing, on "Value Considerations in Engineering and Technology."

Monday, April 29 — Inter-Science, 4 p.m., Room 310 Whitmore, Dr. Barry Cooperman, University of Pennsylvania, on "Mechanisms of Phosphoryl Transfer."

Monday, April 29 — Genetics, 3:55 p.m., Room 111 Tyson. Miss Naomi Gusowski, biology, on "Behavioral Genetics of Drosophila; Fate Mapping of Mosiacs As a Technique for Locating Physiological Origin."

Monday, April 29 — Plant Pathology, 9:45 a.m., Room 213 Buckhout, Thomas Starkey on "The Interactions of Plant Pathogens and Indigenous Leaf Surface Microorganisms."

Monday, April 29 — New Communities, 2 p.m., Room 322 Sackett, David R. Goddard, urban and regional planning, University of North Carolina, on "Citizen Participation in New Community Planning and Development."

Monday, April 29 — Computation Center, 7:30 p.m., STPAC (4), Room 1010 Osmond. Conrad J. R. Room 109 Osmond.

Monday, April 29 — Computer Science, 4 p.m., Room 101 Althouse. R. D. Bergeron, Computer Graphics Group, The Netherlands, on "An Environment for Defining Layered Programs."

Thursday, April 30 — Environmental Pollution Control and Solid Waste Management, 2:20 p.m., Room 140 Fenske. Lee Saperstein, mining engineering, on "Management of Mining Wastes — What

Would You Do With a Billion Tons Each Year?"

Tuesday, April 30 — Geoscience, 4 p.m., Room 26 Mineral Sciences, Barry Voigt, geology, on "Stress History and Rock Stress."

Tuesday, April 30 — Chemical Engineering, 3:45 p.m., Room 140 Fenske. Thomas W. Gorman, University of Wisconsin, on "Chemical Engineering Problems in Hydrometallurgy."

Tuesday, April 30 — Microbiology, 4 p.m., 522 Frear, J. Moore on "The Characterization and Ecology of Bacteriophage Active Against the Soil Actinomycete *Agromyces ramosus*."

Wednesday, May 1 — Animal Nutrition and Nutrition, 3:55 p.m., Room 111 Animal Industries. M. Mahoney, psychology, on "Behavioral Modification of Obesity."

Thursday, May 2 — Chemistry, 12:45 p.m., Room 310 Whitmore. Robert Merrill, University of California, Berkeley, on "Interaction of H₂ and O₂ with Platinum Single Crystals."

Thursday, May 2 — Agronomy, 3:30 p.m., Room 111 Tyson. M. Grove on "Some Competitive Effects of Weeds on Yield, Percent Leaf Nitrogen and Physiological Age of Field Corn."

Thursday, May 2 — Physics, 3:35 p.m., Room 117 Osmond. J. R. Klauer, Bell Telephone Laboratories, Murray Hill, N.J., on "Recent Developments in Field Theory."

Thursday, May 2 — Meteorology, 3:55 p.m., Room 28 Mineral Sciences. Albert Weiss, Cornell University, on "Airflow Above and Between Rows of a Vineyard."

Thursday, May 2 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. George Smerk, transportation, Indiana University, Graduate School of Business, on "Can Transit provide a Viable Alternative to the Automobile."

Friday, May 3 — Analytical Chemistry, 11:10 a.m., Room 333 Whitmore. A. L. Yergey, Scientific Research Instruments Corp., on "Chemical Ionization Mass Spectrometry."

Films

Thursday-Sunday, April 25-28 — U.S.G. film, "Let It Be," 7:30 and 9:30 p.m., HUB assembly room.

Monday, April 29 — Graduate Commons America Film Series by Alstair Cooke, "America: The Huddled Masses," 12:05 p.m., Room 112 Kern. Also HUB assembly room, 2:15 p.m.

Wednesday, May 4 — Commonsplace Theatre, "Time Machine," 8 and 10 p.m., Room 112 Kern.

Lectures

Thursday, April 25 — Dr. John A. Naugle, NASA deputy associate administrator for space science, on "Progress and Potential in Space Sciences," 8 p.m., Room 102 Forum, sponsored by Department of Astronomy.

Monday, April 29 — Biological Lecture Series. Dr. Jean Mayer, nutrition, Harvard University, on "Regulation of Food Intake and the Obesities," 2:30 p.m., Room 112 Kern. "Domestic Food and Nutrition Problems," 8 p.m., Room 112 Kern.

Tuesday, April 30 — Spanish, Italian and Portuguese, 8 p.m., Room 101 Kern. John E. Englekirk, visiting professor of Spanish from U.C.L.A., on "The Frontier in the Literature of the Americas."

Thursday, May 2 — Malcolm Wells, architect, ecologist, journalist, and philosopher, on "Gentle Architecture," 7:30 p.m., Room 102 Forum. Sponsored by the Department of Architecture.

Thursday, May 2 — Dr. Pedro A. Grases, Venezuelan historian and scholar, on "The Ideology of Latin American Independence: Historical and Contemporary Perspectives," 8 p.m., Room 26 Mineral Sciences. The lecture is sponsored by the Latin American Studies Committee and the University Committee on International Programs.

Friday, May 3 — Food Science Annual E. A. Day Memorial Lecture, 2:20 p.m., Room 201 Ag. Adm. Bldg. Dr. Morley R. Kare, Professor of Physiology and Director, Monell Chemical Senses Center, University of Pennsylvania, on "The Sensation of Taste."

Artists Series

Tickets go on sale Monday, April 29, for the Artists Series programs May 8, 10 and 11 by the Pittsburgh Symphony Orchestra and the University Choirs in the new University Auditorium. The tickets for the three performances will be on sale at the box office at the Auditorium from 10 a.m. to 6 p.m. daily.

Three performances have been scheduled to accommodate the expected large numbers of people wishing to hear and see the performance of Beethoven's Ninth Symphony with soloists Phyllis Curtin, soprano, Betty Allen, mezzo soprano, Seth McCoy, tenor, and Ara Berberian, bass.

The program will open with the Berlioz overture to *Benvenuto Cellini*.

(Note that season ticket holders must exchange their Recreation Hall tickets for one of the three performances in the Auditorium and that April 27 is the final date to receive priority for this exchange.)

William Steinberg, who has made an annual visit to the campus for one of the highest performances of the Artists Series season, will direct the orchestra. The Choirs were directed in their preparation by Raymond Brown, professor of music. The three performances are at 8:30 p.m.

William Steinberg, returning once again, to give premiere performance of the University's new auditorium, with the University Choirs, May 8, 10 and 11.

Meetings

Mondays — O.T.I.S., 6:30 p.m., Room 203 HUB.

Mondays — U.S.G. Senate, 7:30 p.m., HUB Assembly room.

Wednesdays — Academic Assembly, 7:30 p.m., Room 351 Willard.

Thursdays — Hetzel Union Board, 7 p.m., Room 206 HUB.

Sundays — U.S.G. Supreme Court, 7:30 p.m., Room 203 HUB.

Exhibits

Museum of Art — Selections from the Permanent Collection, Gallery A. Graphics of Six Swiss Sculptors, Gallery B. Bill Hanson, Harvard Paintings, Gallery C.

Zoller Gallery — MFA Show, to May 3.

Hammond Gallery — Forty paintings by Eleanora Zyglis, Images, Places and Seasons, until April 28.

Pattee Library — Photographs by Steve McCurry, first floor east.

WPSX highlights

"Wall Street Week," the only regularly scheduled television series devoted to the economic aspects is the subject of its normal format to present a videotaped visit to a local brokerage house Friday, April 26, at 8:30 p.m. on WPSX-TV, Channel 3.

Medical ethics and medical experimentation on human beings is the subject of an hour-long "Nova," documentary Sunday, April 28, at 7:30 p.m. on Channel 3. The program begins with a look at the medical experimentation code that resulted from the war crimes trials at Nuremberg and goes on to explore the ethical problems surrounding medical experimentation on American convicts and mentally retarded children. "Nova" may also be seen Saturday, May 4, at 2:00 p.m.

Rhodesian Prime Minister Ian Smith, whose white supremacy policies have been described by Forbes magazine as "unabashed racism," confronts William F. Buckley, Jr., in the second of two "Firing Line" debates recorded in London, Friday, April 28, at 10:00 p.m. on WPSX-TV.

"Lorraine Hansberry: To Be Young, Gifted, and Black," a unique biography of the late black playwright who wrote "Raisin in the Sun," is featured on "Theatre in America" Wednesday, May 1, at 8:30 p.m. on WPSX-TV. Ruby Dee and Al Freeman, Jr., star in the play.

HUB specials

The H.U.B. Terrace Room has initiated daily special meals both lunch and dinner at prices much below customary cafeteria prices. No substitutions are permitted to benefit from these reduced prices. For the next week, the features (all accompanied by appropriate side dishes and beverages) are:

Sunday, April 29 — dinner, baked ham w/sauce \$1.01; supper, Welsh rabbit w/rst. \$1.11.
Monday, April 29 — lunch, grilled beef steak \$.99; dinner, pleasers beef w/noodles \$1.49.
Tuesday, April 30 — lunch, grilled chicken sandwich \$1.09; dinner, frenks and meat \$1.39.
Wednesday, May 1 — lunch, roast prime rib \$1.11; dinner, turkey ala king/rst. \$1.69.
Thursday, May 2 — lunch, apple fritters w/bac. \$1.12; dinner, hot beef sandwich \$1.41.
Friday, May 3 — lunch, egg/cul-de-sac \$.89; dinner, shrimp creole w/rice \$1.49.
Saturday, May 4 — lunch, macaroni & cheese \$.81; dinner, meatloaf \$1.39.

MURRAY—

(Continued from page one)

"Harding fell down as President because he was not willing to base his faith on the good will of the American people," Dr. Murray comments. "If he had told the truth, he might have found that the public is very forgiving and usually respects honesty. I wish Nixon was a better historian. If he is not guilty, he, too, has been mainly responsible for damaging his own reputation."

Dr. Murray traces the escalation of Harding's troubles and the gulpoists they present today.

"The President is almost always one of the first, not the last, to know about corruption in his administration. Harding heard rumors about his associates; these things are hard to hide from a President. He talked to some of the culprits, and they denied it. Then, despite the fact that he was given irrefutable proof, he took no aggressive, legal, direct action, hoping things would blow over."

"The next stage found the President beginning to make excuses, to tell half-truths. The credibility gap between him and the press widened, and the newspapermen became increasingly antagonistic."

"The President began to worry and brood. He withdrew into Presidential secrecy and prerogative."

"Growing pressures began to affect his health. (Although Harding's death from a coronary was a natural one, it probably was hastened by events.)"

"Inevitably, the President surrendered the initiative, and others seized it. A relatively simple scandal became exaggerated and ramified as rumors flew about. Congress

McKay Donkin Award nominations are sought

The Committees appointed by President Oswald for the purpose of recommending candidates for the McKay Donkin Award request assistance in nominating persons eligible for the award.

The award was established in 1969 in honor of the late McKay Donkin, who served as Vice President for Finance and Treasurer of the University from 1957 to 1958. It is to be awarded to the full-time member of the faculty, staff or retiree who has contributed most to the "economic, physical, mental or social welfare of the faculty" of the University.

The contribution of the nominee should be for duties or services

which are above and beyond his regularly assigned duties. The award consists of \$500 and a certificate. Previous awardees have been William G. Mather, Ernest B. McCoy, Samuel C. Blazer, and Eugene Weststone.

Recommendations for the award should be sent to any member of the Committee by Friday, May 10, 1974. Included with any recommendation should be information supporting the basis for the recommendation.

Committee members are Ray T. Fortunato, Room 108 W. Building; Asa J. Berlin, 104 Psychology Building; and N. J. Paladino, 101 Hammond Building.

NEWS—

(Continued from page one)

BICYCLE TOUR

"Cycle Awareness" will be promoted Saturday, April 27, with a bicycle tour of State College sponsored by Free-U and with the support of department of architecture students, Education, Penn State Cycle Club, and the Centre Region Hike-Bike Association. The rally-tour will start from Parking Area 80 (north campus) at 2 p.m. and follow a route in the community as approved by Borough Council. The tour is part of Earth Week activities, open to everyone on a bicycle, to dramatize biking for health, environmental and transportation reasons.

ECONOMY TALK

Arthur M. Hughes, director of economic policy in the Office of Policy Analysis and Evaluation, Federal Energy Agency, will discuss "Planning for Political Independence." Tuesday, May 7, at 8 p.m. in the J. Orvis Keller Bldg., as part of the S&H Environmental Economics Lecture Series, a Continuing Education Service of the College of the Liberal Arts. Various approaches to energy self-sufficiency for the nation during the 1980s will be discussed.

SCRANTON MEETING HOST

The Worthington Scranton Campus will host the 40th annual meeting of the Pennsylvania Junior Academy of Science April 25, 26 and 27 at Mt. Airy Lodge in the

Poonos. Dr. Robert Naismith, assistant professor of biology at the campus, is state chairman for the annual meeting. Dr. Laurence Golden, assistant professor of physics, is serving as awards chairman. Dr. Edward K. Kravbill, campus director, will welcome the expected 1,400 participants, including teachers and students from throughout Pennsylvania.

PREREGISTRATION

Students who are not planning to enroll for Summer Term and want to pre-register for Fall Term 1974 may file complete preregistration forms with the Records Office at 112 Shields Building between May 6 and May 24.

Preregistration forms may also be filed at Summer Term 1974 registration or at 112 Shields Building during the first 21 days of Summer Term, June 12 through July 2, 1974.

LITTLE INTERNATIONAL

Block and Bridle Club will sponsor the 57th annual Little International Livestock Exposition Saturday, April 27, in the Ice Rink Pavilion, beginning at 8 a.m. and continuing all day. Showmanship and fitting competitions will be held in beef cattle, sheep, swine, and horses, and winners of the four classes will then compete for the Master Showman Award by showing in all four classes. A raffle, tickets for which will be available at the door, will be held with a hind quarter of beef as prize.

1924, where delegates cast 103 ballots during a two-week period.

"Everything that could happen to a political party in the way of splintering, dividing and bloodletting occurred there," he says. "A very real parallel exists between the situation of the Democratic Party then and at its 1972 Convention. Then, as now, the Party was in a state of flux, trying to find a new coalition and somebody to lead it."

"At the 1972 Convention, the issues were non-political: abortion, blacks, ethnic groups, women, and youth. In the twenties, there was Prohibition and women's suffrage, the WASP-Gothic split, and the Klu Klux Klan."

"Yet in 1932, the Democratic Party pulled itself together and with Roosevelt made America a Democratic country. I predict they'll do it again. The life and vitality needed to resolve the many cultural, intellectual, and social problems bothering the country aren't present in the Republican party."

"Just as they did in the twenties, the Republicans are currently passing up the chance to effect a lasting coalition by not speaking adequately to the grass roots traumas and interests of the American electorate."

Dr. Murray, who is the author of two other books, "Red Scare" and "The Politics of Normalcy," came to Penn State in 1949. During his tenure here, in addition to teaching and writing, he served for ten years as head of the history department. Currently, he is one of the national advisers on television programming for the Bicentennial celebration and a member of the National Archives Advisory Committee.

"One of the Archives Committee's chief responsibilities," he explains, "is to de-

TWO CULTURES DIALOGUE

Dean N. J. Palladino, Engineering, and Dr. Peter Bennett, professor of marketing, will introduce the subject of "Value Considerations in Engineering and Technology Marketing Education" for the Two Cultures Dialogue session tomorrow (April 26) at noon, Room 189 Materials Research Laboratory. Many of those participating in these Dialogues take their own lunch; beverage is provided.

HAZLETON FESTIVAL

The 15th annual Tri-County Senior High School Oral Interpretation Festival will be held at the Hazleton Campus Friday, April 26, at 7 p.m. in the library. Students from Luzerne, Carbon, Columbia and Northumberland counties compete in this annual event, which is sponsored by the Berks Lettner Literary and Cultural Society. For tickets, call Prof. Andrew Katka, faculty advisor, (717) 454-8731.

BERKS THEATRE

Six musical productions and six children's shows will be given this summer by the Berks Summer Theatre Program at the Berks Campus. William Angstadt, Penn State graduate in theatre arts, is director, and he has assembled a company of 20 actors, singers and dancers, following auditions last month in Reading and New York City. Other performers will be obtained from among local talent, including apprentices who will receive classes in stagecraft from the staff.

termining what historians should save for the future from among the billions of documents the Government issues each year. The papers of the Veterans Administration, for example, for a single year occupy an entire warehouse, and people are afraid to throw anything out. Multiply this by all our Government bureaus on the federal, state and local levels, and the mass of material is absolutely staggering."

Preoccupied as he is with scholarly pursuits, there is another side to Dr. Murray, and one which he finds almost as stimulating. About eight years ago—on a stage where men either find exciting new hobbies or start running around with other men's wives"—he took up blue water sailing and is the owner of a Pearson Coaster based in the Virgin Islands.

"A sailboat at the mercy of the elements is the last frontier where an individual has full control or non-control over the quality and permanency of his existence," Dr. Murray says.

"Sailing is a totally invigorating, adventure, a sort of challenge. A storm at sea is probably one of the most soul searching circumstances you can undergo. You don't win at sea; you merely survive, and the experience makes you increasingly grateful. It's an important lesson for life."

The Murrays (wife Evelyn, a son, William and two daughters, Vicki and Corrie) also participate in ocean racing, probably one of the most grueling and night competitive of all sports. Dr. Murray finds that sailing refreshes him for history.

"I don't think of history as a science or a social science," he says. "We have no jargon, no linguistic politics. We use the plain old English language. I feel as a historian that I'm essentially involved in an art form, that history is one of the last remaining great disciplines. McKay philosophy in that it still asks 'what are the reasons so many other disciplines only ask how.'"

"History isn't a popular subject any more. People say it's not relevant. Economically relevant; it tells you the process by which the price of oil is going up. But history tells you some of the reasons you are getting the oil in the first place. That the prior relevancy it seems to me."

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Division, 865-1327 (Network Line 476-1327). Do not contact the area having the vacancy. Applications will be accepted until: 5 p.m., May 2, 1974.

ASSISTANT TO THE DEAN OF STUDENT AFFAIRS, RESIDENT COMMUNITY COORDINATOR — Behrend College

Responsible to maintain and develop a positive living-learning environment and coordinate programs in residence hall community. Supervises resident hall staff, addresses residence hall governing committees. Master's degree or equivalent in Student Personnel, Counselor Education or equivalent with one

to two years effective experience preferably in residence hall administration.

ENGINEERING AIDE, APPLIED RESEARCH LABORATORY — University Park

Responsible for performing required signal systems processing and system checks and calibrations. Associate degree in electronics or equivalent plus two to three years experience in signal processing and related areas.

RESEARCH AIDE (DAIRY SCIENCE), AGRICULTURE — University Park

Responsible for the performance of a variety of research duties. Two to three years college or equivalent with background in biology or animal science plus two to three years experience in biochemical and tissue culture techniques.

ASSISTANT DEAN OF STUDENT AFFAIRS — Behrend College

Responsible for the organization, administration and coordination of Student Affairs programs and services. Master's degree in Student Personnel, Counselor Education or equivalent with two to three years effective experience.

PENN STATE intercom

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Pittsburgh Symphony here for week

Auditorium to open May 8

The week-long visit of the Pittsburgh Symphony Orchestra, not only to give three performances on the Artists Series May 8, 10 and 11 but also to offer its talents in

During the visit next week of the Pittsburgh Symphony Orchestra, the Chamber Orchestra, 40 members, directed by Donald Johanos, associate conductor of the Symphony, will give a free public concert Thursday, May 9, in the Music Bldg. recital hall.

Free tickets for this event will be distributed in Room 232 Music Building, beginning Monday, May 6, at 8:30 a.m.

The program will include Saint Saens' "Concerto No. 1 for Cello and Orchestra, Op. 33," in which first cellist Michael Grebanier will be featured soloist. Other compositions to be played are Haydn's "Symphony No. 99 in E-flat Major," Ravel's "Le Tombeau de Couperin" suite, and 12 concert variations by Gilester.

a variety of ways, has been made possible by grants from a number of sources.

The National Endowment for the Arts, the Pennsylvania Council on the Arts, the A. W. Mellon Educational and Charitable Trust, and the Penn State Foundation have all provided assistance for the unusual event, which coincides with the opening of the University's new 2600-seat auditorium.

Dr. William Steinberg will conduct the

Betty Allen, mezzo soprano soloist on Artists Series

Orchestra in the Artists Series program, when the University Chorus, directed by Raymond Brown, professor of music, will join in the performance of Beethoven's Ninth Symphony. The Orchestra will also play the Berlioz overture to the opera, "Benvenuto Cellini."

The Symphony will also participate in a rehearsal with the Penn State Symphony Orchestra, in which student compositions with student soloists will be performed. Informal sessions involving individual orchestra members and students will be held also.

And, as noted in the accompanying short article, the Chamber Orchestra will give a free public concert Thursday, May 9.

Medical pioneer on stress

Hans Selye gives two talks

Professor Hans Selye, director of the Institute of Experimental Medicine and Surgery in Montreal, Canada, and considered one of the pioneers of medicine, will give two lectures this weekend, sponsored by the Gerontology Center and the Graduate School Lecture Series.

The first lecture, at 8:15 p.m. Friday, May 3, will be concerned with "Stress without Distress." The second, at 10 a.m., Saturday, May 4, will be on "Stress and Aging." Both lectures are in Room 108 Forum.

In 1936, Dr. Selye's revolutionary concept of stress was announced, opening many new avenues of treatment through

the discovery that hormones participate in the development of many nonendocrine degenerative diseases, such as coronary thrombosis, brain hemorrhage, hardening of the arteries, certain types of high blood pressure and kidney failures, arthritis, peptic ulcers and even cancer.

Honored in many ways and on many occasions, Dr. Selye holds sixteen honorary degrees from universities around the world. He is a Fellow of the Royal Society of Canada and an Honorary Fellow of 42 other scientific societies. He has received the Casgrain and Charbonneau Prizes for original work in the prevention and treatment of disease.

Alumni nominees named for Board

Ten alumni have been named as candidates for the three positions on the University's Board of Trustees which are to be filled by election by alumni. The ten, three of whom are currently trustees, are:

Frederick R. Close II, retired chairman of the Board of Directors of the Aluminum Company of America (Incumbent).

Ralph D. Hetzel, Jr., dean of the College of Fine and Professional Arts and professor of art, Kent State University (Incumbent).

H. Ridge Riley, retired executive secretary of the Penn State Alumni Association (Incumbent).

A. Robert Brooks, senior partner of Brooks and Redfoot, Sharon (Pa.) architectural firm.

Walter J. Conti, owner and operator of Conti's Cross Keys Inn, Doylestown.

Henry A. Giuliana, partner in the law firm of Falvello, Ustonski, Giuliana and Bernstein, Hazleton.

Richard S. Grossman, president of Material Distributors, Inc., Philadelphia.

J. Robert Hicks, vice-president and comptroller, Goodyear Tire and Rubber Co.

H. Clifton McWilliams, Jr., Cambria County judge.

Stanley G. Schaffer, president, Duquesne Light Co.

Health council seeks questions

The Centre Area Health Council, through its Consumer Concerns Committee, is seeking to answer the health-care related concerns of all area residents and students.

Not only does the Committee wish to learn of specific problems encountered in health care, but it is also looking for constructive suggestions for area health care systems. The Committee refers these problems and suggestions to agencies which can do something concrete with them.

The Council, which includes local citizens and physicians, dentists, and other medical practitioners on its board, expects through this consumer-oriented program to improve the delivery of health care service in the area.

Concerns and suggestions should be addressed in writing to Mrs. Mary Maniulli, chairman, P.O. Box 702, State College, Pa. 16801.

Information asked on publications

Those who wish their publications and professional activities listed in the University's annual bibliographies should send this information to their department heads and deans.

Detailed instructions for the submission of these listings are given in a May 1 memo from Dr. R. G. Cunningham, Vice President for Research and Graduate Studies. Copies of this memo are available from your department head or research dean.

Commonwealth Campus faculty should send their listings to their respective department head at University Park with an informational copy to their campus director and Commonwealth Campus dean. Contributions should be in the department head's hands in sufficient time to reach the vice president by July 31.

The bibliography will be split into two publications, "Research Publications and Professional Activities" and "University Publications & Reports to Agencies." To be included are research papers and articles, books reviewed and printed by established publishers, substantive and/or final reports sent to state and federal agencies, informational materials (articles and reports printed in non-standard journals), and novels, short stories, musical compositions, exhibits of fine arts, inventions, patents, and any other activity that meets recognized standards of excellence in its field.

For complete information, faculty members should see the May 1 memo.

Grad faculty meets

A discussion of a proposed amendment to the "Articles of Authority and Standing Rules of the Graduate Council," in addition to the annual report of the Graduate School Dean, will highlight the annual Graduate Faculty meeting Tuesday, May 21, at 3 p.m. in Room 112 Kern.

The proposed changes in the "Articles" were recommended by a Graduate Council Committee on Committees and Procedures, and at the April 3 meeting of the Council the recommendations were approved. These changes are in the area of the election of Council members.

It is proposed under the amendment that approximately half of the Council membership be elected each year for a two-year term. Currently, all Council members are elected at two-year intervals.

Alternate commencement plans made

An alternate "rain" plan for June commencement at University Park has been devised with the new University Auditorium as part of the plan.

Commencement will be held Saturday, June 1, at 10:30 a.m. at Beaver Stadium, but if rain forces the ceremony indoors, the Auditorium, Rec Hall, and Schwab Auditorium will be pressed into service in simultaneous ceremonies both in the morning and afternoon.

The use of the facilities will permit accommodation of all graduates' families and friends; in the past, limitations were placed on the number of guests if the ceremony had to be held indoors.

The plan also involves a change in diploma distribution methods, explains Dr. Barnes W. McCormick, University Marshal. In case of rain during the outdoor ceremony, in such case, the option of distributing diplomas under the stands will be available, tables having been set up beforehand for the purpose.

Conference on women's horizons

Returning Women Students of Penn State is sponsoring an all-day conference, on the theme "Widening Women's Horizons," Saturday, May 11, in the Kern Graduate Bldg. The conference is directed toward women of Pennsylvania, who have been out of the classroom for many years and want to start, or continue, a college career. The sponsor is an organization of women at Penn State who have begun or con-

tinued a college career after a lapse in formal education.

Among the speakers will be Dr. Beverly Cassara, acting dean of the Graduate School at Federal City College, Washington, D.C.; Caryl M. Kline, director of continuing education for women at the University of Pittsburgh; and Mary Iverson, director of the Women's Center for Continuing Education at Syracuse University.

DEATH

James B. Chubbuck, assistant professor of chemistry at the Altona Campus, died April 15; he was 58. A member of the faculty since 1960, he was graduated with distinction from the U.S. Military Academy in 1938, with a B.S. in civil engineering. He served as a junior officer in various capacities in this country until 1942 when he was sent to the European Theatre, as executive officer and battalion commander, remaining there until 1945. Still in military service, he obtained an M.S. degree in chemistry at the University of California, Berkeley in 1948, then held various posts, as lieutenant colonel, at Fort Belvoir, Washington, D.C., and in France, where he served as liaison with French military personnel and as civil engineer in 1956-59. In the year before joining the Altona faculty, he was chief of the combined arms branch at Fort Belvoir.

HONORS

A Resident Fellowship at the Folger Shakespeare Library, Washington, D.C., has been awarded for the Fall Term to **Dr. Michael Kiernan**, assistant professor of English. Dr. Kiernan is preparing a critical edition of the "Essays" of Francis Bacon, and he will collate 17th-century printed copies of the essays from the Folger's extensive collection of Bacon material, and will also prepare critical notes and commentary for the edition.

News in brief

DUSTIN HOFFMAN HERE

Screen actor Dustin Hoffman, who has starred in such movies as "The Graduate" and the current "Papillon" will appear in Rec Hall Tuesday, May 7, at 8 p.m., sponsored by COLLOQUY. A donation of 50 cents will be asked for the benefit of the Renaissance Fund, which is also the beneficiary of Spring Week activities.

KUJUNDZIC ON PANEL

Zeljko Kujundzic, recognized internationally as an authority on a unique method of constructing ceramique sculpture, was a member of a four-man panel for the Eighth National/International Sculpture Conference at the National Sculpture Center, University of Kansas, April 24-26. The panel also included artists from Belgium, India, and Mexico. He made a slide-illustrated presentation, "Sculpture without Armature — From Prehistoric Times to the Present," and at the special request of the Kansas Center presented one of his own pieces, "Adolescents," a slab-built ceramique sculpture. Kujundzic is assistant professor of art at Fayette Campus.

COLLOQUY SPEAKERS

Two recent speakers brought to the University Park campus by Colloquy have complimented the academic community, one directly, the other indirectly. Dick Cavett, the television show host, who packed Rec Hall, was making only his second college campus lecture in coming here; he chose Penn State over 200 other colleges and universities, it is said. Victor Gold, the syndicated columnist of conservative bent, who spoke here March 19, devoted considerable space in a column

The Library's Shakespeare holdings will be utilized to bring to completion an annotated, classified bibliography of recent scholarship for the forthcoming Modern Language Association re-issue of the Variorum Edition of Shakespeare's "Henry IV, Part One."

Elmer C. Plier, who retired in 1969 as associate professor of Agronomy extension, received the Meritt Certificate Award of the American Forage and Grassland Council at the Council's 75th Research-Industry Conference held recently in Bossier City, Louisiana. He served as executive secretary of the organization from December 1970 until March 1974.

IN WRITING

"A Random Walk in Science," compiled by **Dr. Robert L. Weber**, associate professor of physics, and edited by Prof. Eric Mendoza, Hebrew University, Jerusalem, has been published by Crane Russak and Co., New York, and The Institute of Physics, London and Bristol.

Described as a "fun book of science," the volume has selection titles such as "When does jam become marmalade?" and "A contribution to the mathematical theory of big game hunting." The 133 selections "provide an insight into the wit and intellect of the scientific mind through a balanced blend of amusing and serious contributions written by and about scientists. Included are anecdotes about noted scientists, items of historical interest, and

shortly thereafter pointing out that while his views brought spirited exchange in the question-answer period, the "open-minded inquiry and base civility — are very much in evidence here this night. A visit to a campus like Penn State is a 'happy' note for anyone looking for something to be optimistic about regarding American higher education."

BOOKSTORE SALE

This week the University Park Bookstore has been holding its First Anniversary Sale in the McAllister Bldg. basement. Two thousand paperbacks and a large selection of recent hardbacks have been on sale at half price. The sale is scheduled to end tomorrow, if it hasn't already run out of sale items. The HUD supply department has also been conducting a sale of novelty items.

SINGERS PRAISED

The University Choirs, which performed Beethoven's Ninth Symphony with the Harrisburg Symphony Orchestra last week, were praised by the orchestra's conductor, Dr. Edwin McArthur, who retired from the post after 23 years as music director and conductor. Dr. McArthur expressed his gratitude to the Choirs for their contribution and praised them as "one of the finest, if not the finest, choirs I have ever conducted." Raymond Brown is director of the Choirs.

NEW HONORARY

Sigma Theta Tau, national honor society in nursing, has been granted a charter to establish a chapter at Penn State. Initiation ceremonies will be held for the first time in May. The organization seeks to recognize achievement of superior scholarship; recognize development of leadership qualities; foster high professional stand-

articles showing the bizarre ways that scientific theories are sometimes hatched.

The Physics Bulletin says that it is "... a sparkling monument to the ingenuity and unquenchable cheerfulness of the scientific spirit."

Dr. Jon N. Weber, associate professor of geology, is editor of "Geochemistry of Germanium," which is Volume 11 in a series published by Dowden, Hutchinson and Ross, Inc. The series is titled "Benchmark Papers in Geology." The 464-page work, with 43 papers, is the first book ever to deal exclusively with the element germanium. Included is a detailed examination of the distribution of germanium in the Earth's crust, in meteorites, and in lunar surface materials, emphasizing the geochemical behavior of germanium in such processes as magmatism, sedimentation, and hydrothermal mineralization.

APPOINTMENTS

Dr. James A. Whiteside, as associate professor of physical education and athletic team physician, effective July 1. He has been a team physician for all sports at Coral Gables High School since 1957. He received a B.S. degree in pre-med from Auburn University in 1948, an M.S. in physiology from the University of Wisconsin in 1949, and an M.D. degree from the University of Alabama in 1953. He interned at the U.S. Naval Hospital in Philadelphia.

ards; encourage and support research and other creative work in nursing; and strengthen individual commitment to the ideals and purposes of the nursing profession.

BUSINESS FELLOWSHIP

James W. Harvey, doctoral candidate in Business Administration, has been awarded the \$6,000 cash grant Beta Gamma Sigma Doctoral Fellowship, a program established in 1967 by the honorary society to enable doctoral candidates to devote full time toward completion of their dissertations. The grant was made on the basis of timeliness and potential value of the research by the candidate; Harvey's dissertation proposal is titled "The Process of Legislation." Dr. H. Lee Mathews, professor of marketing, is chairman of the research committee.

BERKS ADVISORY BOARD

Four new Advisory Board members have been elected at the Berks campus. They are **Thomas P. Handwerk**, a certified public accountant and Wyomissing Borough councilman; **John K. Kooker, Jr.**, owner of a 300-acre dairy farm and president of the Berks County Dairy Farmers Association; **Ernest W. Schleicher**, vice president of the Reading Chamber of Commerce; and **Joanne K. Stevenson**, associate director of the Reading-Berks Human Relations Council.

McFARLAND AWARD

The 25th annual David Ford McFarland Award of the local chapter of the American Society of Metals will be presented May 11 to Dr. Howard Bomberger, 1942 graduate in metallurgy, who won international recognition for his work in titanium technology. The chapter's banquet will be held at the Centre Hills Country Club. The award, which memorializes the man who

... **Research Project Grants — Basic, Clinical, and Applied Research** — contact Dr. Luis Angeles, Asst. Chief for Research, Research Resources Branch, Oliv. of Research Resources, 5303 Westland Ave., Bethesda, Md. 20014 (301) 496-7447.

... **Projects to Support Animal Resources and Research Manpower Development Program** — contact Dr. Charles McPherson, Chief, Oliv. of Research Resources, Room 5831, Bldg. #31, 9000 Rockville Pike, Bethesda, Md. 20014 (301) 496-5451.

(127-3) June 1 and Oct. 1, 1974 are the next two deadlines for **National Institute of Occupational Safety and Health**, Oliv. of Research and Demonstration. Research project objectives are: Control of work environment to eliminate factors harmful to the worker's health. Direct and indirect costs are funded. Projects have ranged in size from \$5,000 to \$100,000 and have averaged \$35,000. Demonstration project objectives are: Develop and pilot full scale activities showing technical and economic feasibility of new or improved OSH procedures, methods, techniques, or systems. Project objectives may also include examinations of present OSH conditions in health systems, or industry. These examinations are to lead to a demonstration project. Grants have averaged \$140,000 but some small grants have been awarded. For additional information about both programs contact: Dr. B. H. Bruckner, Deputy Director, Office of Extramural Activities, NIOSH, Center for Disease Control, Room 3-44, 5600 Fishers Lane, Rockville, Md. 20852 (301) 443-4493.

(127-4) The National Institutes of Health (NIH) Office of Biotechnology Resources provides assistance to develop and sustain established technological capabilities such as computer resources, biological material preparation sources vital to biomedical research and patient care. Research and training are not funded by this program. Resources are usually on a case-by-case serving multidisciplinary, multicampus research programs. The establishment and maintenance of a research resource, including equipment and building expenses is funded. Grants amounts have had a broad range and have averaged \$280,000. The next two deadlines are June 1 and Oct. 1, 1974. For information contact: William F. Haug, Chief, Biotechnology Resources Branch, Oliv. of Research Resources, Bldg. #31, Room 5819, 9000 Rockville Pike, Bethesda, Md. 20014 (301) 496-5451.

(127-5) Instructional Equipment Grants to institutions of higher education to improve graduate instruction will be available through the Office of Education through the state centers. Deadline dates will be specified in the state centers and are expected to be between Oct. 15 and 15 for the fiscal year. Criteria for standards of selection have been established in the Federal Register and are available (Ref. 39FR12620, 74) (CFDA 13.518).

Psychology has annual Spring Symposium May 10

The annual Spring Symposium in Clinical Psychology, Friday, May 10, at University Park, will feature three talks, on homosexuality, aggression, and psychotherapy in the general theme of "Cross-Cultural Perspectives," beginning at 9:30 a.m. in Room 112 Kern.

The Department of Psychology is sponsoring the symposium which is free and requires no registration. The three speakers, in morning and afternoon sessions, will discuss the results of their research, and the implications of cross-cultural research for clinical psychologists' theories and practices. The speakers are:

Dr. Todd Fady, University of Western Ontario, speaking on "Homosexuality: Universal or Culture-Specific," at 9:30 a.m. Dr. Fady has studied patterns of homosexual prostitution and of sexual role transitions in The Philippines, Latin America, and the U.S.

Dr. Napoleon Chagnon, Penn State (anthropology), on "The Social Organization of Aggression in Primitive Societies." He has studied the Yanomamo, pre-literate Indian group in Brazil.

Dr. Raymond H. Prince, McGill University, on "Psychotherapies in Cross-Cultural Perspective." His studies have been of the treatment of mental illness among the people of West Africa.

served as professor and head of the department of metallurgy from 1920 to 1951, is given to an alumnus for achievements in the metals profession. Dr. Bomberger, now director of research and development with RMI Company, Niles, Ohio, has over the past quarter century been granted 39 U.S. and 35 foreign patents and has published more than 40 papers in his research with titanium and its alloys.

DOCTORAL CANDIDATE AWARD

Ronald P. Cleveland, doctoral candidate in microbiology, is the recipient of a grant from the American Association for Microbiology which he will use to study for a week in New York with Dr. Richard Steves, developer of a new method for analysis of leukemia virus. He hopes to eventually apply the techniques in research with Dr. Walter Geglowski, associate professor of microbiology. They are currently studying the action of certain leukemia viruses in suppressing the body's natural defenses against disease.

TENNIS COURTS READY

Four tennis courts in a new building near the Ice Rink Pavilion are ready and reservations may be made for use of the courts on an hourly basis from 8 a.m. to 10 p.m. by calling 865-1381. The new building has two locker rooms and shower rooms, an observation deck, office and a tennis shop. The courts are of synthetic material.

ALTMAN ETCHINGS ON SALE

New etchings and lithographs by Hans Altmann are among items for sale at the Museum Store in the Museum of Art and History on the Arts and Humanities Campus. In 1915, did the artist in the Museum of Art in Paris. Several award-winning works are included among the 32 prints for sale.

for Disease Control, Room 3-44, 5600 Fishers Lane, Rockville, Md. 20852 (301) 443-4493.

(127-4) The National Institutes of Health (NIH) Office of Biotechnology Resources provides assistance to develop and sustain established technological capabilities such as computer resources, biological material preparation sources vital to biomedical research and patient care. Research and training are not funded by this program. Resources are usually on a case-by-case serving multidisciplinary, multicampus research programs. The establishment and maintenance of a research resource, including equipment and building expenses is funded. Grants amounts have had a broad range and have averaged \$280,000. The next two deadlines are June 1 and Oct. 1, 1974. For information contact: William F. ... **Mental Health of the Aging** — contact Dr. Thomas Anderson, Chief, Section on Mental Health of the Aging, Oliv. of Mental Health Programs, Room 1295, 5600 Fishers Lane, Rockville, Md. 20852 (301) 443-3726.

(127-2) The National Institutes of Health (NIH) has two groups of programs for which the next two deadline dates are June 1 and Oct. 1, 1974.

University Park Calendar

May 2-12, 1974

Special Events

Thursday-Friday, May 2-3 — Peace Corps/Vista recruiting, 8 a.m. to 5 p.m., lobbies of Boucke and Chambers Bldgs. Seniors and graduate students, all majors.

Thursday, May 2 — University Theatre, student preview, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.

Friday-Saturday, May 2-4 — Annual Dance Concert of Orchestra Dance Club, "Opus 1974," 8:30 p.m.; matinee performance Saturday, May 4 at 2:30 p.m., White Hall Dance Theatre.

Friday, May 3 — Free-U Jammy, 7:30-11:30 p.m., HUB ballroom.

Friday-Saturday, May 3-4 — University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.

Friday, May 3 — Sports: Men's lacrosse, vs. Lehigh, 8 p.m.

Friday, May 3 — 3rd Annual Technical Paper Conference, Soil Conservation Society of America, 10 a.m.-3 p.m., HUB assembly room.

Friday, May 3 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday-Saturday, May 3-4 — Spring Week Carnival, "Movie Mania," Intramural field games near Beaver Stadium, Friday, 7 p.m. to 9 p.m.; Saturday, 7 a.m. to midnight. Saturday afternoon activities for children, puppet show and amusement rides. Benefit of Renaissance Fund.

Friday, May 3 — Initiation and banquet, the Honor Society of Phi Kappa Phi, 5:30 p.m., HUB ballroom.

Friday, May 3 — Address by Secretary of the Air Force John L. McLucas to AFRO TC Dining-Hall, 6:30 p.m., State College Elk's Country Club.

Saturday, May 4 — Keystone Drill Meet, 8 a.m.-5 p.m., Ice Pavilion.

Saturday, May 4 — Sports: Rugby, vs. Barbarians; men's tennis, vs. Michigan (previously scheduled May 11), Beaver Stadium.

Saturday, May 4 — U.S.G. Spring Week Dance Concert, 8 p.m., Rec Hall. Group performing: Law. Limited number of tickets on sale at HUB desk.

Sunday, May 5 — German Club play, 8 p.m., Room 112 Kern.

Sunday, May 5 — Chapel Service, 11 a.m., Eisenhower Chapel. Rabbi Theodore H. Gordon, Main Line Reform Temple, Beth Elsholm, Wynnwood, Pa.

Sunday, May 5 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Monday, May 6 — Gamma Phi Epsilon, women's pre-med society, 8 p.m., McElwain piano lounge. Marjorie E. Ward, special education, on "The Visually Handicapped and Recent Medical Research."

Monday, May 6 — Sports: Men's tennis, vs. Lehigh, 3:30 p.m.

Tuesday-Saturday, May 6-11 — University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.

Tuesday-Wednesday, May 7-8 — Second Annual Health Fair, 11 a.m. to 7 p.m., HUB ballroom. Exhibits, demonstrations, health assessment services.

Thursday, May 7 — Talk by George Hemp, West and polo polo with film, "Polo," 7:30 p.m., Room 162 Willard, sponsored by PSOC Equestrian Division.

Wednesday, May 8 — Student Cross-Cultural Dialogue, 3 p.m., Room 115 Kern. Dr. Eugene White, Materials Research

Lab, Dr. R. Richard Ritt, Center for the Study of Human Development, and Dr. Joseph S. Schuchman, chairman, College of the Liberal Arts Research Committee, on "Research Funding, Grantsmanship or Who Gets the Money and Why."

Wednesday, May 8 — Sports: Men's lacrosse, vs. Cortland, 7 p.m.

Wednesday, May 8 — Nontime concert, 12:15 p.m., lobby of Kern.

Wednesday, May 8 — Health Education Symposium dealing with contemporary trends in human sexuality, 6:30-8:30 p.m., HUB assembly room.

Wednesday, May 8 — Student-faculty rap session on "The Management Major of P.S.U." Sigma Chi Fraternity, 8 p.m., sponsored by Management Club.

Wednesday-Saturday, May 8-11 — Penn State Thespians, "Fiddler on the Roof," 8:30 p.m., Schwab. Saturday matinee, 2 p.m.

Wednesday, May 8 — Artists Series, Pittsburgh Symphony and University Choirs with vocal soloists, 8:30 p.m., University Auditorium.

Thursday, May 9 — ROTC Awards Day, 4 p.m., Ice Pavilion.

Thursday, May 9 — Graduate School sponsored Artists Workshop, 7:30 p.m., Room 101 Kern.

Thursday, May 9 — Pittsburgh Symphony Chamber Orchestra, 8:30 p.m., Music Bldg. recital hall. Tickets free, distributed beginning May 8, Room 232 Music Bldg.

Thursday-Sunday, May 9-12 — Community Awareness, East Halls Student Association and Redave Productions, "The Only Game in Town," 8:30 p.m., FUB lounge, East Halls.

Friday, May 10 — Free-U Jammy, 7:30-11:30 p.m., HUB ballroom.

Friday, May 10 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday-Saturday, May 10-11 — Artists Series, Pittsburgh Symphony and University Choirs with guest soloists, 8:30 p.m., University Auditorium.

Friday-Saturday, May 10-11 — Women's Liberation films, 8-11 p.m., Room 111 Forum. Friday, "The Women's Happy-time Commune." Saturday, "Gertrude Stein: When You See This, Remember Me."

Friday, May 10 — Annual Spring Symposium in Clinical Psychology, Room 112 Kern, beginning at 9:30 a.m. on theme, "Cross-Cultural Perspectives," with speakers Dr. Todd Fay, University of Western Ontario; Dr. Napoleon Chagnon, Penn State; and Dr. Raymond H. Prince, McGill University. No registration, no fee required.

Saturday, May 11 — Model Railroad Club with vocal soloists, 8:30 p.m., Room 203 HUB.

Saturday, May 11 — Football, Blue-White game, 1:30 p.m. Women's lacrosse, vs. Wilson, 1 p.m.

Sunday, May 12 — Penn State Glee Club Mother's Day Concert, 3 p.m., Schwab.

Sunday, May 12 — Sports: Men's baseball, vs. Colgate, 2 p.m.

Sunday, May 12 — Chapel Service, 11 a.m., Music Bldg. recital hall. A Service of Music and Homily, the University of Western Ontario.

Sunday, May 12 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Seminars

Thursday, May 2 — Chemistry, 12:45 p.m., Room 310 Whitmore. Robert Merrill, University of California, Berkeley, on "Interaction of H₂ and O₂ with Platinum Single Crystals."

Thursday, May 2 — Agronomy, 3:30 p.m., Room 111 Tyson. M. Grove on "Some Competitive Effects of Weeds on Yield. Percent Leaf Nitrogen and Physiological Age of Corn."

Thursday, May 2 — Physics, 3:35 p.m., Room 117 Osmond. J. R. Klauder, Bell Telephone Laboratories, Murray Hill, N.J., on "Recent Developments in Field Theory."

Thursday, May 2 — Meteorology, 3:55 p.m., Room 26 Mineral Sciences. Albert Weiss, Cornell University, on "Airflow Above and Between Rows of a Vineyard."

Thursday, May 2 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. George Smerk, transportation, Indiana University Graduate School of Business, on "Can Transit Provide a Viable Alternative to the Automobile?"

Thursday, May 2 — AIAA, Central Pennsylvania Section, 4 p.m., Room 232 Hammond Bldg. Dr. R. E. A. Arndt, aerospace engineering, on "Aerodynamic Noise Research: Past Accomplishments and Future Work."

Thursday, May 2 — Mechanical Engineering, 4 p.m., Room 103 Mechanical Engineering Bldg. Dr. Thomas Patten, head of Mechanical Engineering and Director of the Institute of Offshore Engineering, Heriot-Watt University, Edinburgh, on "The Impact of the North Sea Gas and Oil Field on Engineering Education and Research in Scotland."

Friday, May 3 — Analytical Chemistry, 11:10 a.m., Room 333 Whitmore. A. L. Yergey, Scientific Research Instruments Corp., on "Chemical Ionization Mass Spectrometry."

Monday, May 6 — New Communities, 2 p.m., Room 322 Science. Suzanne Salomon, Community Development Consultant, Washington, D.C., on "Planning of Social Services in the New Communities."

Monday, May 6 — Plant Pathology, 9:45 a.m., Room 213 Buckout. Leon Burpee on "Mycorrhizae: Biological Determinants of Pathogenesis."

Monday, May 6 — Entomology, 3:50 p.m., Room 204 Patterson. Stephen Kincaid on "Pheromone Experimentation with a Mushroom Infesting Scliarid Fly, 'Lycorella mact.' and P. C. Sotiropoulos on "Relations between Formulations of Systemic Pesticides and Their Concentration within the Plant."

Monday, May 6 — Inter-Science, 4 p.m., Room 310 Whitmore. Dr. Joseph E. Cole-

man, biochemistry, Yale University, on "EPR Studies of Enzyme Systems."

Monday, May 6 — Genetics, 3:55 p.m., Room 111 Tyson. Joan M. Oriolski, pharmacology, on "Enzymatic Differentiation and Gene Expression."

Monday, May 6 — Computation Center, 7:30 p.m. SPSS, 10 p.m. 110 Osmond.

Tuesday, May 7 — Ecology, 1 p.m., Room 111 Life Sciences I. Dr. D. Seale on "Effects of Amphibian Larvae on Primary Production and Nutrient Dynamics."

Tuesday, May 7 — Chemical Engineering, 3:45 p.m., Room 140 Fenske. Clay J. Radke on "Thermodynamics of Adsorption and Interparticle Forces."

Tuesday, May 7 — Physics, 3:45 p.m., Room 119 Osmond. Dan I. Bolef, Washington University, on "Interaction of Ultrasound with Nuclei and Electron Spins in Solids."

Tuesday, May 7 — Environmental Pollution Control and Air Pollution Management, 2:20 p.m., Room 140 Fenske. F. Glade Loughry, Pennsylvania Department of Environment Resources, Chief of Soil Section, Division of Community Services, on "Roll of Soils for Hazardous Waste Disposal."

Tuesday, May 7 — Ceramic Science, 11 a.m., Room 301 Mineral Industries. Dr. Val Krukonis, Avco Systems Division, on "High Performance Silicon Carbide and Boron Filament Development."

Wednesday, May 8 — Computation Center, 7:30 p.m., Room 110 Osmond. SPSS.

Wednesday, May 8 — Animal Nutrition and Nutrient Requirements, 3:55 p.m., Room 111 Animal Industries.

Thursday, May 9 — Physics, 3:35 p.m., Room 117 Osmond. Paul A. Flurry, Bell Telephone Laboratories, Murray Hill, N.J., on "Recent Developments in Light Scattering from Simple Molecules."

Thursday, May 9 — Chemistry, 12:45 p.m., Room 310 Whitmore. E. C. Taylor, Princeton University.

Thursday, May 9 — Computer Science, 4 p.m., Room 101 Althouse. John Hopcroft, Cornell University, on "Efficient Design of Algorithms."

Thursday, May 9 — Agronomy, 3:30 p.m., Room 301A Ag. Adm. Bldg. W. D. McIlwain on "Development of Mycorrhizae on Crop Plants."

Thursday, May 9 — Meteorology, 3:55 p.m., Room 26 Mineral Sciences. Dr. R. E. Munn, Chief Scientist, Air Quality and Environmental Research Branch, Atmospheric Environmental Service, Downsview, Ontario, on "International Problems of the Environment."

Thursday, May 9 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Robert Suvarman, environmental lawyer, Dechert, Price and Rhoads, Philadelphia, on "The Role of Law in Shaping the Urban Environment."

Friday, May 10 — Geoscience, 1 p.m., Room 26 Mineral Sciences. Frank Press, Chairman, Department of Earth and Planetary Sciences, M.I.T., on "Origin and Evolution of the Lithosphere."

Friday, May 10 — Geosciences, 4 p.m., Room 26 Mineral Sciences. Krzysztof Birkenmajer, geology, Polish Academy of Sciences, Krakow.

Friday, May 10 — Analytical Chemistry, 11:10 a.m., Room 333 Whitmore. Albert C. Conner on "Redox Thermochromism of Iron Porphyrins."

Friday, May 10 — Ecology, 4 p.m., Room 101 Kern. Dr. Frederick Smith, Harvard University, on ecosystem modeling and evolutionary implications.

Meetings

Monday, May 6 — College of Health, Physical Education and Recreation faculty meeting, 7 p.m., Room 109 White.

Tuesday, May 7 — University Faculty Senate, 10 a.m., Room 112 Kern.

Mondays — O.T.I.S., 6:30 p.m., Room 203 HUB.

Mondays — U.S.G. Senate, 7:30 p.m., HUB assembly room.

Wednesdays — Academic Assembly, 7:30 p.m., Room 351 Willard.

Thursdays — Hotel Union Board, 7 p.m., Room 206 HUB.

Sundays — U.S.G. Supreme Court, 7:30 p.m., Room 203 HUB.

Films

Monday-Sunday, May 6-12 — Videotape service, "Dr. John" concert program, times and locations to be announced.

Monday, May 6 — Graduate Commons America Film Series by Alistair Cooke, "America: The New Found Land," 12:05 p.m., Room 112 Kern. Also HUB assembly room, 2:15 p.m.

Wednesday, May 8 — Commonsplace Theatre, "Roaring 20's," 8 and 10 p.m., Room 112 Kern.

Friday-Saturday, May 10-11 — "The Chase," 7:30 p.m., Room 105 Forum, sponsored by Delta Sigma Phi.

Official

Monday, May 6 — First day for signing NDSL National Direct Student Loans, SEOG (Supplemental Educational Opportunity Grants), BEOG (Basic Educational Opportunity Program), and University Long Term Loans for Summer Term.

Monday-Saturday, May 6-11 — Preregistration for Fall Term for those not attending Summer Term.

Friday, May 10 — Last day for signing NDSL, SEOG, BEOG, and University Long Term Loans for Spring Term.

Lectures

Thursday, May 2 — Malcolm Wells, architect, ecologist, journalist, and philosopher, on "Gentle Architecture," 7:30 p.m., Room 102 Forum. Sponsored by the Department of Architecture.

Thursday, May 2 — Dr. Pedro Grasses, Venezuelan historian and scholar, on "The Ideology of Latin American Independence: Historical and Contemporary Perspectives," 8 p.m., Room 26 Mineral Sciences. The lecture is sponsored by the Latin American Studies Committee and the University Committee on International Programs.

Thursday, May 2 — Dr. Eulalia Fagan, practicing psychologist in Hollidaysburg and Altoona, on "Transsexuality," 8 p.m., Room 369 Willard, sponsored by Homophiles of Penn State.

Friday, May 3 — Food Science Annual E. A. Day Memorial Lecture, 2:20 p.m., Room 301 Ag. Adm. Bldg. Dr. Morley R. Kars, professor of Physiology and Director, Monell Chemical Senses Center, University of Pennsylvania, on "The Sensation of Taste."

Friday-Saturday, May 3-4 — Graduate Lecture Series With Gerontology Center. Professor Hans Eyley, Director of the Institute of Experimental Medicine and Surgery, Montreal, on "Stress without Distress," 8:15 p.m., Friday; "Stress and Aging," Saturday, 10 a.m. Both talks in 100 Forum.

Tuesday, May 7 — S & H Environmental Economics Lecture Series, 8 p.m., Room 201 Keller. Arthur M. Hughes, director of economic policy, Office of Policy Analysis and Evaluation, Federal Energy Office, on "Planning for Project Independence."

Exhibits

Museum of Art — Selections from the Permanent Collection, Gallery A, until May 5. Manyakun and Other Places: Paintings and Drawings by Francis Speight, opening May 12, Gallery A. Graphics by Swiss Sculptors, Gallery B. Quetzalcoatl, opening May 12, Gallery B. Bill Hanson, Harvard Paintings, until May 5. Zoller Gallery — Annual Juried Student Art Show, opening May 8.

Hammond Gallery — Studies in Visual Communication, opening May 12.

Chambers Gallery — Art Education Undergraduate Exhibition, until May 12. John Wahling, textiles, and Jenny Foch, ceramics, opening May 11.

Kern Gallery — Sculpture by Rod A. Taylor, instructor in art education, continuing until May 11.

Fiddler on the Roof at Schwab

Penn State Thespians, one of the University's "traditions," will stage a hit musical show about traditions, "Fiddler on the Roof," which was a hit on Broadway and in the movies. The show opens May 8, continuing through May 11, with evening

"Hello, Dolly!" and "Man of La Mancha." Other Thespians and dedicated persons working behind the scenes of "Fiddler" include: production-stage manager Nan Cingman, technical director Douglas E. Burns, assistant director Virgil Roberson,

E. "Skip" Brightbill as Perchik, and Mary Lenciel as Hodel, in "Fiddler on the Roof" at Schwab Auditorium May 8-11. Perchik is a revolutionary student engaged to Hodel. She leaves her village to be with him where he is imprisoned.

performances at 8:30 p.m. each day and a Saturday matinee at 2 p.m., in Schwab Auditorium.

Based on one of Sholem Aleichem's stories, "Fiddler" is set in the small Russian village of Anatevka on the eve of the Russian revolution, in 1905. What happens to families and to the village when the strong Jewish traditions in Anatevka are broken is the basis for the story. The story revolves around the family of Reb Tevye, a dairyman, whose three eldest daughters break away from the tradition that a matchmaker must arrange all marriages. Each daughter upsets the family and the rest of the village by making their own matches; Tzeitel when she marries a poor tailor rather than a rich butcher, Hodel when she leaves for Siberia to marry a revolutionary student imprisoned there, and Shava, especially, when she runs away to wed, of all people, a Russian soldier, like all soldiers, considered to be an enemy of the village.

David Hochoy, graduate student in theatre arts, is director and choreographer. Musical director is Richard Victor, who filled the same role in productions of

Jr., costume designer Kathy Groil, lighting designer Don Melpolder, scenic designer Gerald Hartshorn, master carpenter Arthur O. Soyk, stage carpenter Dennis Cassaday, costumer Linda Murray, and master electrician Betr England. The entire production is under the supervision of Ruth Yeaton, advisor to the Thespians.

Dr. W. O. Luciw, head of Slavic program of the University Libraries, has also been advising and assisting with the production of "Fiddler." Dr. Luciw was born and raised in a culture very similar to the one in Anatevka. He is a native of Galisia in Eastern Europe. He has particularly aided the costume designer and has advised the directorial staff on the conduct of particular rituals, such as the wedding ceremony.

The lead role of Tevye, the dairyman, is portrayed by Merrill Plaskow, graduate student in theatre arts who has many campus theatre roles to his credit and is in a full-length feature film, "Brainchild," to be released this year. Plaskow's parents were Russian Jews who migrated to this country to flee the Czarist revolutionary terror.

Health Fair includes testing

The second annual Health Fair will be held May 7 and 8, 11:00 a.m. to 7:00 p.m., in HUB Ballroom.

The Health Fair will feature booths sponsored by approximately 30 local and state organizations. Representatives from these organizations will be on hand to provide information and literature, to conduct demonstrations and to provide health assessment services such as blood pressure mea-

surement and physical fitness testing.

The Health Fair is sponsored by the University Health Services, the Department of Nursing in the College of Human Development, and the Health Education Program in the College of Health, Physical Education and Recreation.

Admission to the Fair is free, and no fees will be charged for the literature, demonstrations, or health assessment services.

Continuing ed projects win awards

Four awards were presented to the University at the 59th annual conference of the National University Extension Association recently for a variety of programs:

Marlowe D. Froke, director of media and learning resources, Continuing Education, one of four top awards for innovative programs, his being for counseling services for adult students.

Richard M. Bunnell, director of the Continuing Education Conference Center, one of four 1974 Professional Service Awards, recognizing "outstanding individual contributions toward the advancement of the profession of conference and Institute administration."

A College of Arts and Architecture continuing education conference, "The Zoning Game," a Creativity Award. Academic chairman of the conference was William G. King, assistant professor of landscape architecture, with aid from Wayne R. Bechdel, assistant dean in Arts and Architecture for continuing education.

The independent study by correspondence Music 8 course, for the best college credit course offered in correspondence. This was developed by the College of Arts and Architecture, with authors Burt L. Fenner and James D. Benshoof, and the Continuing Education correspondence study department.

HUB specials

Sunday, May 5 — dinner, roast pork w/dr., \$1.99; supper, tuna potato chili casserole \$1.39.

Monday, May 6 — lunch, chili con carne, \$7.79; dinner, spaghetti w/meat sc. \$1.09.

Tuesday, May 7 — lunch, chicken chow mein/rice, \$.95; dinner, lamb pot pie \$1.43.

Wednesday, May 8 — lunch, Welsh rarebit w/rst., \$1.10; dinner, corned beef & cabbage \$1.69.

Thursday, May 9 — lunch, lasagne, \$1.11; dinner, meatloaf \$1.39.

Friday, May 10 — lunch, fish cakes, \$1.22; dinner, French fried chicken \$1.49.

Saturday, May 11 — lunch, beef pattie w/onions, \$.95; dinner, Maryland chicken steak \$1.95.

The Arts: music, plays, exhibits

The 44-voice Penn State Glee Club will feature a variety of composers and vocal forms in its annual Mother's Day concert Sunday, May 12, at 3 p.m. in Schwab Auditorium. Assistant professor of music Bruce Trinkley will direct the Glee Club in Poulenc's "Lauds of Saint Anthony of Padua," choruses from Monteverdi's "L'incoronazione di Poppea;" von Weber's "Oberon;" Beethoven's "Fidelio;" and Musorgsky's "Boris Godunov." The Hi-Los, 12 members of the Club, will also be a highlight of the program.

A powerful drama with an all-female cast, "The House of Bernarda Alba," will open at Pavilion Theatre Friday, May 3, starring professional actress Carol Gustafson as Bernarda and with Manuel Duque,

Earl Davis and Ann Shields, the leads in "The Only Game in Town," at the FUB.

Frank D. Gilroy's romantic drama, "The Only Game in Town," a hit Broadway show which was made into a film starring Elizabeth Taylor and Warren Beatty, will be performed in the East Halls' FUB lounge Thursday-Sunday, May 9-12, at 8:30 p.m. Starring Ann Shields as Fran Weaver and Earl Davis as the luckless piano player Joe Grady, the production is being directed by Davis, with Lee Coffey as associate producer. Vince Horton is the rich business fiancée of Fran.

Community Awareness, the East Halls Student Association, and Redave Productions are cooperating in the production. Redave previously produced three other theatre-in-the-dorm shows.

Admission is 50 cents, at the door.

Carol Gustafson, starring in Garcia Lorca play.

assistant professor of theatre arts, as director.

The last complete play of Spanish poet-playwright Federico Garcia Lorca, the story is about maternal domination and the tragic revolt that results from the severe frustration of sexual fulfillment. The setting is in Spanish villages.

The University Theatre production, which has student previews May 1 and 2, will continue May 4 and May 7-11. All curtains are at 8 p.m.

Miss Gustafson has appeared on and off Broadway, in films, television dramas, and in commercials. Broadway productions she played in include "The Odd Couple," "Dylan," and "Separate Tables." Most recently she starred in "Twigs" at Falmouth Playhouse.

Duque joined the faculty in 1970 after having taught, directed and acted at Bennington College, Bucknell and the University of Illinois.

Tickets may be reserved by calling 865-1884.

Project needs engineering students

Student majoring in various engineering fields are being sought to work in a project, scheduled to run from June 3 to Aug. 23, entitled "Community Design for Optimal Energy and Resource Utilization."

The National Science Foundation has provided \$7,130 for the project, part of the Student Originated Studies Program. Stephen Bilenky, a junior in general agriculture, is the student director of the study, which will consider domestic energy efficiency, proper land use, pollution reduction, materials efficiency, and social satisfaction. Bilenky needs students experienced in architectural engineering, general engineering, environmental resource manage-

ment, and man-environment relationships. Those working on the project will be paid about \$80 for a 40-hour week.

Interested students should contact project advisor, Dr. Robert M. Butler, assistant professor of agricultural engineering 865-2651.

The information developed in the study, Bilenky believes, should assist designers and planners in providing improved resource uses in their community development.

Gary J. Malyn, sophomore in landscape architecture, helped in the project proposal development.

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Division, 865-1387 (Baltimore Line 475-1387). Do not connect the area having the vacancy. Applications will be accepted until: 5 p.m., May 16, 1974.

ASSISTANT MANAGER, HOUSING & FOOD SERVICES — **Heintzelman Campus**
Responsible for assisting in supervising the overall operation of the Housing and Food Service Units. Associate degree in Institutional Management or equivalent with one to two years experience in food supervision.
JR. ELECTRICAL DESIGN TECHNOLOGIST, APPLIED RESEARCH LABORATORY — **University Park**

Responsible for applying the most appropriate design concepts and modern technological innovations in components and design philosophy to the implementation of critical digital and analog circuits and for following through their development and integration into large instrumentation systems. Bachelor of Technology degree or equivalent, plus up to one year of experience.

RESEARCH AIDE (BIOPHYSICS), SCIENCE — **University Park**
Responsible for conducting research tasks and experiments on the effects of radiation on living fungus cells. Bachelor's degree in microbiology, U.C. claims and coordination of layouts, and secretaries of University employees or laboratory experience preferred.

DIRECTOR, EDUCATIONAL OPPORTUNITY PROGRAM, STUDENT AFFAIRS — **University Park**
Responsible for planning, developing, implementing, and administering the Educational Opportunity Program. Ph.D. or equivalent with at least three to five years experience in fields of counseling, teaching and administration.

UNEMPLOYMENT COMPENSATION SPECIALIST, PERSONNEL ADMINISTRATION — **University Park**
Responsible for assisting in the coordination and administration of the University's unemployment compensation program, including the investigation of U.C. claims and coordination of layouts, and secretaries of University employees and supervisors. A Bachelor's degree, or equivalent, plus at least five years of administrative experience are required.

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Faculty convocation Monday

President John W. Oswald will utilize the new University Auditorium to conduct the first University-wide faculty convocation to be held in many years.

The convocation will be held at 4:00 p.m. Monday (May 13). All University Park faculty, as their schedules permit, are invited to attend the convocation as are faculty members from the other University campuses who are in University Park that day.

To accommodate faculty at other locations, a simultaneous broadcast will be made at each of the 21 locations in space convenient for faculty members.

President Oswald will discuss current issues of importance to the University Community, including a number of items suggested by faculty members in response to his invitation.

"Since coming to Penn State I have been eager to find a feasible arrangement and setting for communicating directly, personally, and simultaneously with our large and dispersed faculty," President Oswald said. "The new auditorium now seems to provide the core facility, and I look forward to this innovation in our University community life."

Penn State, Jefferson cooperate

Unique nutrition program funded

Penn State and the Jefferson Medical College, Philadelphia, are establishing what is termed "a unique program" in nutrition education. It was announced Monday of this week.

The Howard Heinz Endowment, Pittsburgh, has provided a four-year grant of \$850,000 to finance the program. The grants will be made through the Nutrition Foundation, a public non-profit institution.

Designed to serve as a prototype for similar efforts throughout the country, the program will include nutrition education for the medical and health professions, college and university students, public school teachers, high school and elementary students and the general public. In addition, nutrition consultation resources and clinic services will be set up in selected communities.

Dr. William J. Darby, president of The Nutrition Foundation, described the program as "a major step toward the development of an integrated approach to nutrition education in this country."

"In both doctors and teachers will receive adequate training in nutrition in order that our expanding knowledge of nutrition science can be applied to improving the health and welfare of the American people."

"The Heinz Nutrition Program is the first one of its scope in the United States and we hope that it will be emulated again and again in other parts of the country."

Jefferson Medical College, the largest medical school in Pennsylvania, is marking its 150th anniversary this year. It has a cooperative accelerated medical education program with Penn State. Each year 40 students enter the medical school after a year of undergraduate work at Penn State. The Nutrition Foundation selected the two universities for the development of this nutrition program because of the experience and interest of their faculties in nutrition education and the good working relationships which exist between them.

At Penn State, Dr. Helen A. Guthrie, professor of nutrition, will direct the program, which will be coordinated by the Division of Biological Health. In addition, the Health Planning and Nursing faculties will collaborate in both the educational and research aspects of the program.

College Dean Dr. Donald H. Ford said, "The mission of the college is to develop professionals who are dedicated to improving the health and quality of individual and community life through direct services to individuals and families."

At Jefferson, the Department of Community Health and Preventive Medicine will coordinate the program. Dr. Willard A. Krehl, who will coordinate the program there, explains that more emphasis on food and nutrition as it applies to clinical problems and those of community health has been needed.

Faculty members should participate in all policy making elements of the University and should be involved in all aspects of governance.

That is the basic thrust of the final report of the Joint Senate Select Committee on Faculty Participation in University Governance.

The 23-page report, with 35 specific recommendations, was presented to the University Faculty Senate at its meeting Tuesday. Copies are being made available to every faculty member.

In the report, developed over almost four months of intensive study, the committee said, "It is clear that there is strong demand and serious need to strengthen the functioning of the Senate and to strengthen the role of the faculty in governance."

Nine of the Committee recommendations are aimed specifically at strengthening the Senate.

The committee recommended that the Senate elect a chairman-elect, who will serve one year in that capacity prior to election as chairman, and would serve the following year as past chairman. It also recommends that the chairman be relieved of most of his non-Senate duties during his year in that post.

One recommendation calls for establishment of a Faculty Executive Committee to serve as an advisory and consultative committee to the president. The committee would consist of the four Senate officers and three faculty members elected at large by the Senate.

Others urge expansion of representation in the Senate; seek more substantial Senate input to the Board of Trustees; and recommend closer linkup between administrative offices and Senate committees, with vice presidents serving on appropriate committees and the committees, in turn, serving in an advisory capacity to the vice presidents.

The committee noted in the report that

News in brief

THESPIANS HONOR TWO

Ridge Riley, retired executive secretary of the Penn State Alumni Association, and Susan Browning, a Broadway and television star, will be honored by Penn State Thespians before the opening curtain of the performance of "Fiddler on the Roof" in Schwab Auditorium Saturday, May 11.

Riley will be recognized for distinguished service to Thespians and in particular his 24 years as a member of the board of advisors and years as secretary-treasurer of the board.

Miss Browning will be honored for Distinguished Contributions to the Performing Arts. She is a 1962 graduate of the University and while on campus was active in several Thespian productions, as performer and in directing dance for two shows. She also appeared in productions of Penn State Players and in the State College Community Theatre's first musical production, in 1961.

SCORE GRAND PRIZE WINNER

A Penn State engineering student, James Gurley, has won the grand prize in the national "Students Against Fires" competition sponsored by the National Student Competitions on Relevant Engineering. Gurley's microfilm data retrieval system

won the divisional prize in addition to the grand prize. Another entry, "Pyrovan," a specially equipped fire truck, won first honorable mention in its division. Forty colleges in the U.S., Canada, and Mexico competed.

ALTOONA BOUNCE

Students at the Altoona Campus, in particular Pi Lambda Theta brothers, helped to raise more than \$18,000 for the benefit of Easter Seals Society for Crippled Children and Adults of Blair County through a 100-hour basketball bounce-a-thon recently. The goal was \$10,000.

GSA RESOLUTION

The Graduate Student Association passed a resolution at its April 23 Council Meeting regarding the collective bargaining issue, as follows: "The Graduate Student Association is opposed to faculty unionization until such time as the graduate students can be assured that unionization will not adversely affect their academic and economic welfare." The resolution implies, says GSA, that some form of collective bargaining could provide a workable solution to many of the problems facing the University academic community.

(Continued on page four)

Faculty role in governance urged in Senate

the premise for its recommendations is that shared responsibility among all elements of the University community is essential to the effective functioning of a major university.

According to Dr. Robert S. Friedman, committee chairman, the group felt the Senate should be the exclusive university-wide agent for faculty participation in governance.

"This doesn't mean that there will be no delegation of authority," he said. "But the committee feels that advice to the president and the provost should be funneled through the Senate."

Several committee recommendations emphasized the need to establish guidelines and recognized procedures for shared responsibility and joint participation in decision-making.

"The committee," Dr. Friedman said, "felt there was a real need for general guidelines for faculty participation in colleges, departments and campuses. Everyone need not have the same procedures for governance, but there should be some general guidelines within which written procedures can be established."

In its report the committee recommended that the president direct each college, department and campus to develop and codify an appropriate faculty organizational structure and procedures (if such do not already exist) that "will ensure a substantial level of faculty participation in all aspects of governance of these units."

In a related matter, the committee recommended that "the president, with the advice of the University Faculty Senate, should develop general University guidelines for a system of peer review regarding academic personnel decisions, including appointments, promotions and tenure, and direct each academic unit to review, and where appropriate, amend these procedures in light of these guidelines."

"Faculty should have a participatory role in all these matters," Dr. Friedman said. "At present, some do and some don't. The level of participation varies greatly and is informal."

"The committee is seeking greater formality through a systematic review in which the faculty role will vary. For example, faculty should play a substantial, but not exclusive, role in review of faculty administrators. And, in all cases, the faculty should have primary responsibility for selection of its own participants in these review procedures."

According to Dr. Friedman, the committee also believes that the administration of the University should be encouraged to perform a leadership and initiative role and that the faculty also should be innovators.

"Both should be encouraged to innovate and initiate new ideas," he said, "but we also need a system of checks and balances."

Dr. Friedman said the committee feels its recommended procedural and structural changes will improve the quality and effectiveness of faculty participation in governance, but also recognizes that no set of procedures can make a timid and/or disinterested faculty effective in governance.

"The committee believes it is essential within departments, colleges and at Commonwealth Campuses, as well as within the Senate, that the faculty develop a determination to speak up and demonstrate that it cares about the destiny of the University. We recognize that this is more easily said than done."

"But no structural recommendation can change a climate conducive to docility and timidity into one of courage and commitment. It will take a change of attitude on the part of the faculty and the administration to make shared responsibility work in the traditions of a great university."

RETIREMENT

Dr. Clare William Pierce, professor of agricultural economics, who has been a member of the faculty since 1937, retired on May 1. He received the bachelor of science degree in agricultural economics from Penn State in 1932. The M.S. degree was conferred by the University of Maryland and the doctor of philosophy degree by Cornell University. Widely regarded as an expert in dairy economics, Dr. Pierce, in addition to teaching, research and continuing education work at the University, has served on numerous Federal, state, and regional groups concerned with milk pricing in various areas.

In Pennsylvania he has consulted with members of the Milk Control Commission, two State Secretaries of Agriculture, and a public commission appointed by former Governor William W. Scranton to study and report on State milk control. He has also served as manager of the Pittsburgh District Dairy Council.

He has been Penn State's representative on the Northeast Dairy Marketing Regional Research Technical Committee for a number of years. With the chairmanship of the group, the several colleges and universities involved undertook a study of state milk control in the northeast.

His counseling and research activities have included work with the Ohio Legislative Bureau, Pennsylvania and New Jersey Departments of Agriculture, Ohio Jer-

Bureau, Illinois Agricultural Association, American Guernsey Cattle Club, Milk Industry Foundation, and Connecticut Milk Producers Association.

HONORS

Dr. Harry Prystowsky, provost of the Hershey Medical Center and dean of the College of Medicine, will be awarded the honorary degree of Doctor of Science by The Citadel, Charleston, S.C., Saturday, May 18, when he will serve as commencement speaker. He is to be cited for his "distinguished service in the field of medicine as practitioner, educator, and researcher." He is a 1948 graduate of The Citadel.

Dr. George C. Shofstall, assistant director of continuing education in the college of Science, was chosen president-elect of the Pennsylvania Academy of Science at the Academy's 50th Anniversary meeting last week and will assume the presidency in April, 1976. The Academy, founded in 1924, is dedicated to the encouragement of scientific activities in the Commonwealth. Dr. Shofstall has served as secretary of the Academy since 1971.

The Council for Exceptional Children has presented a citation to **Dr. Joseph L. French**, professor and head of special education, "for outstanding achievement" to recognize his help in organizing and

developing the Foundation for Exceptional Children. The Foundation was formed three years ago to advance the education of both handicapped and gifted children by providing a supplement to the efforts of governmental agencies to attack the critical problems of exceptional children and special education.

IN WRITING

Dr. Walter Freeman, director, Division of Community Development, is co-editor of "Ethnicity and Nation Building" recently published by Sage. The volume is a collection of essays based on an International Studies Association Conference held in Puerto Rico in 1971. There are introductory essays by Dr. Freeman and co-editor, Dr. Wendell Bell of Yale University. One of the contributors, H. S. Cohen, associate professor of urban planning, has written a chapter on Internal and External Conflicts of an American Indian Community.

"A Conceptual Guide to Finnegan's Wake," edited by **Dr. Michael Bernal**, associate professor of English and comparative literature, and Fritz Senn, has been published by the University Press. Among the 13 contributors was **Dr. Ronald E. Buckwalter**, assistant professor of English, who prepared a chapter. Dr. Bernal wrote the introduction and contributed a chapter also. The book presents a variety of critical positions, including the linguistic, biographical, allusive, and structural.

SERVICE AWARD

Dr. Robert M. Pokras, (right) associate professor of Journalism, received the 25-Year Service Award certificate and chair from College of the Liberal Arts Dean Stanley F. Paulson at an informal ceremony. Pokras joined the faculty as instructor in 1949, after serving on the University of Illinois faculty. He was in the U.S. Army for 43 months during World War II after appearing as editor of a New Jersey paper, as reporter for a Massachusetts paper, and as editorial assistant for Fairchild Publications. He earned his A.B. degree in journalism at the University of North Carolina, M.S. at Illinois, and Ph.D. at Stanford. In 1953, he has taught a great variety of courses in the journalism department, from beginning to advanced degrees.

Philosophy has three-day colloquium on Romanticism

The Department of Philosophy, with aid from the National Endowment for the Humanities, is sponsoring a three-day interdisciplinary colloquium on "Romanticism," May 15-18 at the J. O. Keller Conference Center. The sessions are open to the public. In connection with the Colloquium, three evening programs in the arts will be presented, also open to the public.

A program of Romantic music will be performed Wednesday, May 15, at 8:30

p.m. in Schwab Auditorium by the Aired Quartet, pianist Phyllis Triolo, cellist William Thomas, and bass-baritone Raymond Brown, accompanied by Cynthia Schein. Music by Schubert, Schumann, Chopin, Chausson, and Brahms will be performed.

Friday, May 17, members of the Penn State theatre group, directed by Richard Edelman and Archie Smith, theatre arts, will present readings on the theme of science at 8 p.m. in the Conference Center

The Conference will conclude Saturday, May 18, with a concert by the University Symphony Orchestra at 8 p.m. in Schwab Auditorium.

Lectures in the conference will include the following:

Thursday, May 16, beginning at 10 a.m. — **Geoffrey Hartman**, Yale University, on "Wordsworth and Goethe in Literary History." At 3 p.m., **Richard R. Niebuhr**, Harvard University, on "The Romantic Re-

mation of Religion and Theology." At 8 p.m., **Henry Payne**, City University of New York, on "The Origin of French Romanticism."

Friday, May 17, at 10 a.m., **George Levine**, University of Maryland, on "French Romantic Art: Problems of the Sources." At 3 p.m., **Judith N. Shklar**, Harvard University, on "The Origins of Romantic Political Theory."

Saturday, May 18, at 10 a.m., **Ollo Poeggeler**, Ruhr University, on "Philosophy in the Wake of Heidegger." At 4 p.m., a panel discussion chaired by **Stanley H. Rosen**, professor of philosophy.

Energy symposium next week involves many faculty

Everyone in the University community is invited to attend sessions, any or all, of the "Energy Symposium," May 15-16, a continuing education extension program aided by the Office of Environmental Quality Programs and developed by a planning committee representing each of the academic colleges.

Morning and afternoon sessions will be held in Schwab Auditorium, opening Wednesday at 9 a.m. when President Oswald and Rep. Albert W. Johnson will make opening remarks, and William E. Simon, former director of the Federal Energy Office, or his deputy director, now director, John C. Sawhill, will give the keynote address.

Other visiting speakers include Anthony

Copp, economist, American Petroleum Institute, and Dr. Milo L. Cox, Agency for International Development (AID).

Faculty and staff members on the program are:

Wednesday morning — **Dr. Monroe Newman**, economics; **Dr. R. L. Gordon**, mineral economics; **Dr. J. F. Griffiths**, petrography; **Dr. Robert L. Clewett**, business administration.

Wednesday afternoon — **Dr. George E. Brandon**, agricultural economics; **Dr. Marvin Rozen**, economics; **Dr. David L. Westby**, sociology; **Dr. Arthur H. Patterson**, man-environment relations; **Dr. Craig R. Humphrey**, sociology; **Dr. T. D. Larson**, civil engineering; **Dr. Charles L. Hosier**, Earth and Mineral Sciences; **Dr. W. J. Moroz**, Center for

Air Environment Studies; and **Dr. Eva J. Pell**, plant pathology.

Thursday morning — **Dr. Richard D. Schein**, Office of Environmental Quality Programs; **Dr. L. W. Sargent**, mining; **Dr. R. G. Price**, philosophy; **Monty L. Christiansen**, recreation and parks; **Dr. Peter Bennett**, marketing; **Dr. W. E. Caldwell**, education; and **Dr. W. F. Witzig**, nuclear engineering.

Thursday afternoon — **Dr. William Spackman**, paleobotany; **Dr. E. W. Biederman, Jr.**, PENNAP; **Dr. D. R. Frankl**, physics; **Dr. Forrest J. Remick**, assistant to the vice president for research and graduate study; **Dr. N. J. Palladino**, Engineering; and **Dr. Richard G. Cunningham**, vice president for research and graduate studies.

program proposed; (3) provide a setting for the clinical experience required; (4) include if possible veterans as trainees who have had military health care and public safety training including police, fire, and others. The proposed rules have been distributed and are available. (Ref. 39FR15011-2/57, 74).

(128-5) National Endowment for the Humanities (Office of Fellowships, 806 15th St., N.W., Washington, D.C. 20506) has announced its 1975-76 program of fellowships for scholars, teachers and writers who wish to spend time in 1974 for original research on the socio-economic aspects of the health-care industry. The stipend is \$2500 for one year. Fellows must have completed all requirements for the Ph.D. degree except the thesis and the final exam. The application deadline is June 15. Interested persons should write to the address given above. An application must include a detailed dissertation proposal, research plan and future goals, transcripts, a copy of University requirements for the doctorate, dissertation outline and a list of at least two potential advisors of support including one from the advisor and one from the department head.

Institute awards eight fellowships

Eight research fellowships have been awarded for the coming Fall Term by the Institute for the Arts and Humanistic Studies at the University.

Recipients include:

Dr. David P. Daniel, associate professor of the history of Bohemian college, for a study of the history from Era in Slovakia;

Dr. Walter Doran, associate professor of classics for an analysis of socio-political terminology in the client Greece from the eighth to the fourth century B.C.;

Dr. L. Fanner, associate professor of music, to complete a study of electronic synthesis with the capability of real-time performance;

Charles H. Firmin, assistant professor of theater and film, for a study of British stage lighting;

Stephen Porter, assistant professor of art, development of two stainless steel sculptures;

Dr. Peter H. Schoenman, assistant professor of English, for creative development of a novel-length story;

Dr. Thomas M. Sheehy, professor of philosophy, for research on Hegel's essay "Difference and Fichtenschen and Schelling's Systems;" and

Dr. Wladyslaw A. Stronko, assistant professor of architecture, for "Spaces for Music."

Exhibits

Museum of Art — Manayunk and Other Places: Paintings and Drawings by John Speight, opening May 12, Gallery B.

A and C Graphics by Six Swiss Sculptors, until May 12, Gallery B.

Chambers Gallery — Art Education Undergraduate Exhibition, until May 10, John Wahling, Textiles and Jenny Floch, Ceramics, opening May 11.

Zoo Gallery — Annual Juried Student Show.

Hammond Gallery — "Studies in Visual Communication," opening May 12.

Arts Bldg. — Photography of Henry Wessell, until May 14, Monday-Friday, 1-5 p.m.

Kern Gallery — Sculptures by Oliver La Grone, May 11-18; abstract prints by Florence Auterman, May 12-25; and metal sculpture by David Bachrach, until May sculpture by Rod Taylor, including May 11; sculptures by Spaulding concluding May 10.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For more information and funding source information, call 865-1372.

May 9, 1974

(128-1) The Office of Education will fund 75% of the cost of Educational Opportunity Center Programs established at accredited institutions. These Centers may serve areas with "a concentration of low income persons." These people who pursue a program of postsecondary education can request financial and academic guidance from the Centers, which will also offer higher education admission assistance, and counseling and tutoring aid. Since this is an end of Fiscal Year 1974 program, the deadline date for application is May 29, 1974. Information about this program has been distributed and is available from: Marshall Emm, Educational Opportunity Center Program, Bureau Area 1, University Center, Room 4100, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C. 20002, (202)246-2553. (Ref. CFA 13.543) (39FR14944 & 14955-4/29/74).

(128-2) The Office of Education is seeking for proposals aimed at designing instructional materials for the teaching of the metric system of measurement. Specific subject areas are: Curriculum materials development for metric measurement in career education, intensive training utilizing these materials, and development of "occupational related materials units in metric measurement for under-educated adults. Vocational, technical,

and basic adult education programs are directly involved in the need to understand and apply the metric system. Thirty percent is allowed for project completion. Information about this project has been distributed and is available. The RFP due date is May 22, 1974. (Ref. CBO 4/23/74, p. 2) (RFP 74-64).

(128-3) The National Endowment for the Arts (NEA) Public Education and Awareness program has a July 1, 1974 deadline. A major goal is the integration of design and environmental values with the elementary and secondary school education experience. Special emphasis is placed on programs using communications media including film, tape, TV, radio, posters, and booklets. Matching grants to organizations range from \$10,000 to \$50,000 and non-matching grants to individuals up to \$10,000. The program contact is **Orly Goffey**, Special Asst. to Director, Architecture and Environmental Arts, NEA, Washington, D.C. 20506 (202)382-6657.

(128-4) The Public Health Service has issued proposed rules for Grants for Training in Medical Services. Minimum requirements would include: (1) training in the techniques of providing emergency medical services for students or professionals in medicine, dentistry, osteopathy, nursing, allied health, or other health fields; (2) demonstrate a need for the type of educational

University Park Calendar

May 9-19, 1974

Special Events

Thursday, May 9 — Play, "Christ in the Concrete City," by P. W. Turner, performed by Inter-Varsity Christian Fellowship, 8 p.m., HUB assembly room.

Thursday-Sunday, May 9-12 — East Halls Student Association and Redave Productions, play, "The Only Game in Town," 8:30 p.m., ROTC lounge, East Halls.

Friday, May 9 — FUB Awards Day, 4 p.m., Ice Pavilion.

Thursday, May 9 — Graduate School sponsored Thesis Workshop, 7:30 p.m., Room 101 Kern.

Thursday, May 9 — Pittsburgh Symphony Chamber Orchestra, 8:30 p.m., Music Bldg. recital hall.

Friday, May 10 — Annual Spring Symposium in Clinical Psychology, Room 112 Kern.

Friday, May 10 — Todd Fay, psychology, University of Western Ontario, on "Homosexuality: Universal or Culture-Specific," beginning at 9:30 a.m. Dr. Napoleon Chagnon, anthropology, on "The Social Organization of Aggression in Primitive Societies," 1 p.m. Dr. Raymond H. Prince, psychiatry, McGill University, on "Psychotherapies in Cross-Cultural Perspective," 2:45 p.m. No registration, no fee required.

Friday, May 10 — University Concert Committee program by Ellen McIlwain, 8 p.m., HUB ballroom. Tickets \$2.50.

Friday, May 10 — Free-U Jammy, 7:30-11:30 p.m., HUB ballroom.

Friday, May 10 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Friday-Saturday, May 10-11 — Artists Series, Pittsburgh Symphony and University Choirs with guest soloists, 8:30 p.m., University Auditorium.

Friday-Saturday, May 10-11 — Women's Liberation films, 8-11 p.m., Room 111 Fern. Friday, "The Women's Happy Time Commune," Saturday, "Gertrude

Stein: When You See This, Remember Me."

Thursday-Saturday, May 9-11 — University Theatre, "The House of Bernarda Alba," 8 p.m., Pavilion Theatre.

Thursday-Saturday, May 9-11 — Penn State Thespians, "Fiddler on the Roof," 8:30 p.m., Schwab. Saturday matinee, 2 p.m.

Thursday-Sunday, May 9-12 — Community Awareness, East Halls Student Association and Redave Productions, "The Only Game in Town," 8:30 p.m., FUB lounge, East Halls.

Saturday, May 11 — Folk and Square Dance Workshop, 1-5 p.m. and 8 p.m. to conclusion, north gym, White. Sponsored by Health, Physical Education and Recreation, organized by Penn State Dancers and Interlandia Dance Club. Instruction by David Henry and Al Schwinbart. Admission free; no prior experience needed.

Saturday, May 11 — Model Railroad Club Annual Auction, 2 p.m., Room 203 HUB.

Saturday, May 11 — Football, Blue-White game, 1:30 p.m. Women's lacrosse, vs. Wilson, 1 p.m.

Saturday, May 12 — Penn State Glee Club Mother's Day Concert, 3 p.m., Schwab.

Sunday, May 12 — Sports: Men's baseball, vs. Colgate, 2 p.m.

Sunday, May 12 — Phi Mu Alpha "Brotherhood Recital," an evening of musical variety, 8 p.m., Room 112 Kern. No admission charge.

Sunday, May 12 — Chapel Service, 11 a.m., Music Bldg. recital hall. A Service of Music and Homily, the University Chapel Choir.

Sunday, May 12 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.

Sunday, May 12 — Mothers Day Concert of Romantic Parlor Music, 2 p.m., Room 112 Kern.

Monday, May 13 — Play, "Christ in the Concrete City," 7 p.m., Chapel lounge.

Monday, May 13 — University-wide faculty convocation, 4 p.m., at University Park, new auditorium, at Commonwealth Campuses, simultaneous broadcast. President Oswald commenting on current issues of importance to the University community.

Monday, May 13 — Charles Metz, piano, 8:30 p.m., Music Bldg. recital hall.

Tuesday, May 14 — Organ recital by Mary Ann Frazier, 4 p.m., Music Bldg. recital hall.

Tuesday, May 14 — Sports: Women's golf, vs. Cornell, 11 a.m., White Course.

Tuesday-Wednesday, May 14-15 — Student Peace Union, Slide show, "Post War-War," 11:30 a.m.-1:30 p.m., HUB assembly room.

Tuesday-Wednesday, May 14-15 — Department of Political Affairs — U.S.G., "Candidates Night," 7:30 p.m., HUB reading room.

Tuesday-Wednesday, May 14-15 — University Theatre student group, Jazz Dance Theatre in Concert, 8 p.m., Playhouse Theatre.

Wednesday, May 15 — Penn State Brass Chorale, 8:30 p.m., Music Bldg. recital hall.

Wednesday, May 15 — Sports: Men's baseball, vs. Indiana, Pa., 3 p.m. Women's softball, vs. Ursinus, 3:30 p.m.

Wednesday, May 15 — Nontime concert, 12:15 p.m., lobby of Kern.

Wednesday, May 15 — Folk and Square Dance Roundup, 7:30 p.m., North Gym, White.

Wednesday, May 15 — Interdisciplinary Colloquium Concert of Romantic Music, 8:30 p.m., Schwab. Performances by the Alard Quartet: Phyllis, Triolet, Raymond Brown, William Thomas.

Thursday, May 16 — Oliver LaGrone gallery talk and demonstration, north, lobby

of Kern. Lecture, 7:30 p.m., Room 101 Kern, on "Shattering Myths — Light from the Dark Continent."

Thursday, May 16 — Hillel, 8 p.m., HUB reading room. Dr. Fickersham on "Human Sexuality As a Total Health Entity."

Thursday-Saturday, May 16-18 — University Theatre, Jazz Dance Theatre in Concert, 8 p.m., Playhouse Theatre.

Thursday-Saturday, May 16-18 — Interdisciplinary Colloquium on "Romanticism," Keller Conference Center. Thursday, 10 a.m., Geoffrey Hartman, Yale University, on "Wordsworth and Goethe in Literary History." At 3 p.m., Richard R. Niebuhr, Harvard University, on "The Romantic Reformation of Religion and Theology." At 8 p.m., Henry Peyre, CUNY, on "The Originality of French Romanticism." Friday, 10 a.m., George Levine, University of Maryland, on "The Problem of Problems of the Senses." At 3 p.m., Judith N. Shklar, Harvard University, on "The Origin of Romantic Political Theory." Saturday, at 10 a.m., Otto Poeggeler, 8:30 p.m., Schwab, on "Philosophy in the Wake of Heidegger." At 3 p.m., Panel Discussion.

Friday, May 17 — Marcus Chubbuck, piano, and Terri Vincent, vocalist, 8:30 p.m., Music Bldg. recital hall.

Friday, May 17 — Interdisciplinary Colloquium, Penn State Theatre group in a "Reading on the Theme of Science," 8 p.m., Keller Conference Center auditorium.

Friday, May 17 — Sports: Men's track, Penn State Open Invitational.

Friday, May 17 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Saturday, May 18 — PSU Symphony Orchestra, 8 p.m., Room 102 Kern.

Saturday, May 18 — Sports: Men's baseball, vs. Mansfield, 1 p.m.

Sunday, May 19 — Penn State Ensemble Pops Concert, 3 p.m., Arts Courtyard.

Seminars

Thursday, May 9 — Nuclear Engineering, 4 p.m., Room 111 Breazeale Nuclear Reactor. Dr. Robert W. Bussard, U.S. Atomic Energy Commission, on "Technological Problems in Controlled Fusion Research."

Thursday, May 9 — Aerospace Engineering, 4 p.m., Room 223 Hamory. A. K. Anand on "Three-Dimensional Turbulent Boundary Layer in a Rotating Helical Channel."

Thursday, May 9 — Physics, 3:35 p.m., Room 117 Osmond. Paul A. Fleury, B. L. Telephone Laboratories, Murray Hill, N. J., on "Recent Developments in Light Scattering from Simple Molecules."

Thursday, May 9 — Chemistry, 12:45 p.m., Room 310 Whitmore. E. C. Taylor, Princeton University.

Thursday, May 9 — Computer Science, 4 p.m., Room 101 Althouse. John Hopcroft, Cornell University, on "Efficient Design of Algorithms."

Thursday, May 9 — Electrical Engineering, 11 a.m., Room 328 E. E. East. Dr. Robert H. Dennard, I.B.M. Research Laboratory, on "High Performance MOS Devices — Design for Electron Beam Fabrication."

Thursday, May 9 — Agronomy, 3:30 p.m., Room 3019 Ag. Admin. Bldg. W. D. McIlveen on "Development of Mycorrhizae on Crop Plants."

Thursday, May 9 — Meteorology, 3:55 p.m., Room 28 Mineral Sciences. Dr. R. E. Munn, Meteorologist, Air Quality and Inter-Environmental Research Branch, Atmospheric Environmental Service, Downsview, Ontario, on "International Problems of the Environment."

Thursday, May 9 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Robert Supraman, environmental lawyer, Deckert, Price and Rhoads, Philadelphia, on "The Role of Law in Shaping the Urban Environment."

Thursday, May 9 — Philosophy, 4 p.m., Room 251 Willard. Gerald Press on "Concept of History in Classical Greece."

Thursday, May 9 — Slavic and Soviet Language and Area Center, 3 p.m., Room 171 Kern. John Stevens, economics, on "Discrimination, Autarky and Some Other Characteristics of Soviet Bloc Foreign Trade."

Friday, May 10 — Geosciences, 4 p.m., Room 26 Mineral Sciences. Krzysztof Birkenmajer, Laboratory of Geology, Polish Academy of Sciences, Krakow, Poland, on "Geological Structure of Spitzbergen and East Greenland and Plate Tectonics."

Friday, May 10 — Geoscience, 1 p.m., Room 26 Mineral Sciences. Frank Press, Chairman, Department of Earth and Planetary Sciences, M.I.T., on "Origin and Evolution of the Lithosphere."

Friday, May 10 — Analytical Chemistry, 11:10 a.m., Room 333 Whitmore. Albert C. Consuelo on "Redox Thermochimistry of Iron Porphyrins."

Friday, May 10 — Ecology, 4 p.m., Room 101 Kern. Dr. Frederick Smith, Harvard University, on ecosystem modeling and evolutionary implications.

Friday, May 10 — Meteorology, 3:55 p.m., Room 541 Delke. Dr. Richard Jones, University of Hawaii, on "Time Series Analysis in Meteorology."

Monday, May 13 — Inter-Science, 4 p.m., Room 310 Whitmore. Dr. W. H. Orme-Johnson, biochemistry, University of Wisconsin, on "Recent Developments in Ion-Sulfur Proteins."

Monday, May 13 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Robert Kohut on "The Interaction of Air Pollutants and Plant Pathogens."

Monday, May 13 — Genetics, 3:55 p.m., p.m., Room 111 Tyson. Dennis Peiffer, biology, on "An Analysis of Inguemutatory Purines and Pteridines in Trout: An Approach Utilizing Mutant Color Varieties."

Monday, May 13 — New Communities, 2 p.m., Room 322 Sackett. Dr. Donald Klein, psychology, Johns Hopkins University, on "Problems and Possibilities for Mental Health Programming in New Communities."

Monday, May 13 — Computation Center, 7:30 p.m. SPSS (3), Room 110 Osmond. Census (3), Room 109 Osmond.

Tuesday, May 14 — Environmental Pollution Control and Solid Waste Management, 2:20 p.m., Room 140 Fenske. Walter K. MacAdam, Senior Energy Consultant, Wheelabrator-Frey, on "Technology and Economics of Extracting Energy from Refuse."

Tuesday, May 14 — Ceramic Science, 11 a.m., Room 301 Mineral Industries. Dr. Charles Hulse, United Aircraft Research Labs., on "Directionally Solidified Oxide Eutectics."

Wednesday, May 15 — Computation Center, 7:30 p.m. SPSS (4), Room 110 Osmond. Census (4), Room 109 Osmond.

Wednesday, May 15 — Animal Nutrition and Nutrition, 3:55 p.m., Room 111 Animal Industries. L. Brinkman, human development, on "Dietary Treatment of Obesity."

Wednesday, May 15 — Physics, 3:55 p.m., Room 117 Osmond. Terry L. Loucks, North American Rockwell Science Center, on "Careers for Physicists in Industrial Research."

Thursday, May 16 — Chemistry, 12:45 p.m., Room 310 Whitmore. Robert E. Slattery, Aerospace Research Laboratories, Wright-Patterson Air Force Base, on "Gas Chromatographic and Nuclear Magnetic Resonance Studies of Metal Complexes."

Thursday, May 16 — Agronomy, 3:30 p.m., Room 111 Tyson. D. Wehner on "Isotopes and Varietal Identification."

Thursday, May 16 — Engineering Acoustics, 4 p.m., Room 171 Willard. Geoffrey L. Wilson, A.R.L., on "The Measurement of the Bulk Modulus Loss Factor of Small Solid Specimens."

Thursday, May 16 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Robert McManus, Department of Transportation, Washington, on "The Future of Urban Mass Transportation."

Thursday, May 16 — Anthropology, 3 p.m., Room 107 Social Science Bldg. James Hatch, on "Social Dimensions of Prehistoric Mortuary Practices: A Progress Report."

Friday, May 17 — Analytical Chemistry, 11:10 a.m., Room 333 Whitmore. George W. Goodloe on "Column Selection in Liquid Chromatography."

Lectures

Thursday, May 9 — Henry Wessel, photographic discussion of his works to be displayed in Room 213 Arts Bldg., 8 p.m.

Monday, May 13 — East Asian Festival, Dr. Shahid Javed Burki, sociology, Harvard University, on Chinese economics, 8:00 p.m., Room 112 Chambers.

Tuesday, May 14 — College of Health, Physical Education, Recreation, 7:15 p.m., Room 267 Recreation Bldg. Daniel F. Henley, M.D., American Games Physician, on "Health Challenges, Drugs and Athletic Performance."

Wednesday, May 15 — Army ROTC Department, 8 p.m., Room 121 Sparks. Ambassador Lewis Hollicker, Special Assistant to the Secretary of State on Combating Terrorism, on "The U.S. Government Response to Terrorism: A Global Approach."

Meetings

Tuesday, May 14 — College of Liberal Arts faculty, 3:55 p.m., Room 121 Sparks.

Tuesday, May 14 — College of Agriculture faculty meeting, 4 p.m., Room 301 Ag. Admin. Bldg.

Thursday, May 16 — College of Engineering faculty, 4 p.m., Room 26 Mineral Sciences.

Monday — O.T.S., 6:30 p.m., Room 203 HUB.

Mondays — U.S.G. Senate, 7:30 p.m., HUB assembly room.

Wednesdays — Academic Assembly, 7:30 p.m., Room 351 Willard.

Thursdays — Heron Union Board, 7 p.m., Room 206 HUB.

Sundays — U.S.G. Supreme Court, 7:30 p.m., Room 203 HUB.

Films

Thursday, May 9 — "Five Man Army," directed by Don Taylor, 8 a.m., Schwab.

Friday-Saturday, May 10-11 — "The Chase," 7:30 p.m., Room 105 Fern, sponsored by Delta Sigma Phi.

Monday, May 13 — Graduate Commons stage and Area Center, by Alistair Cooke, "America: Home from Home," 12:05 p.m., Room 112 Kern. Also HUB assembly room, 2:15 p.m.

Wednesday-Friday, May 13-17 — Videotape Network documentary, "House sponsored by HUB board. Times and places to be announced."

Official

Thursday-Saturday, May 9-18 — Prerequisite for Fall Term for those not attending Summer Term.

Friday, May 10 — Last day for signing NDSL, SEOG, BEOG, and University Long Term Loans for Spring Term.

Schuykill anniversary party

A tapestry depicting the Schuykill Campus was presented by the weaver, Marian Bell, to director Henry I. Herring as a gift of the sophomore class during the 40th anniversary celebration of the campus April 25.

The Schuykill Campus, at Schuykill Haven, celebrated its 40th anniversary in the week of April 22 with a variety of activities, including a luncheon at which three current Advisory Board members were honored for 25 years of service to the campus and presented with a service award plaque and Penn State chair.

Another highlight of the celebration was the presentation to the University of a tapestry rendered by weaver Marian Bell. The tapestry, to be displayed permanently in the library, depicts the campus itself. It is a gift of the sophomore class. A resident of Pottsville, Marian has been weaving for seven years.

The Advisory Board members who were honored include Mrs. Maude Sterner Ulmer, of Pottsville; former State Senator Paul Wagner, of Tamaqua; and Judge G. Harold Watkins, of the Pennsylvania Supreme Court.

Established as the Schuykill Undergraduate Center in 1934, at Pottsville, at the request of the School District, the Ministerium, and service clubs of the city, the Campus is one of the oldest in the Com-

monwealth Campus system. Chemistry and physics laboratories of the Pottsville High School were used for the first year, but in succeeding years space was leased in the Bunker Hill building, and expansion was continued in 1945 with the leasing of another four-room school building. Other changes were effected over the years until 1963 when the County Commissioners deeded a 42-acre property adjacent to the borough of Schuykill Haven to the Advisory Board for a permanent campus. Existing buildings were remodeled and the first classes were held at the new site in 1967. An additional 16 acres with four buildings were deeded to the Board by the State in 1966, and in 1968 the property was converted to a residence hall area. Finally, in the past March, the approval of final plans was given by the Board of Trustees for construction of a multi-purpose building for offices, physical education classes, and space for conferences, demonstrations, and exhibits.

In its 40 years, the Campus has enrolled 6,785 full-time students, 1,465 part-time and adjuncts, and approximately 5,000 continuing education students. Now enrolled are 438 baccalaureate, 90 associate degree, and 66 adjunct students.

Henry I. Herring, administrative head of the Center or director of the Campus since 1950 (and member of the faculty since 1942), talked about the 40 years of the campus in activities during the celebration, much of which centered on April 25-26. In addition to library displays, tours for high school students, talks by faculty on computers, mathematics, science, business, engineering, and social studies, and languages, student organizations set up displays and made presentations.

A literary magazine, "Hourglass," was published for the anniversary, distributed free to the public invited to the open house program.

DANCE WORKSHOP

A folk and square dance workshop, sponsored by the College of Health, Physical Education, and Recreation, will be held on the University Park campus on Saturday, May 11. The workshop has been organized by members of the Penn State Dancers and the Interlandia folk dance club and will feature instruction by David Henry and Al Schwinbart.

Henry, currently a dance instructor at Barnard and Queens Colleges in New York, will teach dances from Europe and the Near East. Schwinbart, who is from West Virginia, is an expert in American square and contra dancing and will do the calling for this segment of the program.

This event is open to all interested persons regardless of previous dancing experience since there will be some very simple dances taught for the beginners as well as more advanced material. Admission is free and dancing will start in the north gymnasium of the White Building at 1 p.m. The afternoon session will end at 5 p.m., but dancing will resume at 8:00 that evening.

For more information, contact: Harold White, associate professor of physical education, (865-9202); Elizabeth Haney, instructor of physical education, (865-7591); or Jeanne Reynolds, Penn State Dancers, (865-8756).

Regatta at Stone Valley May 18

The Ninth Annual Regatta and Picnic sponsored by the Sailing Division of the Outing Club will be held Saturday, May 18, at Stone Valley, with events for just about everybody and a chicken dinner to wind things up late in the afternoon. (The rain date is the next day, competitors should call 863-0362.) It is a doubt about weather conditions on the 18th. In addition to various classes of sailing races, for students and non-students, various canoe and rowboat races will be held. Awards are made for the first three places. Spectators have almost as much fun at the Regatta each year as the sailors. The chicken supper can be purchased there, or picnickers are welcome to bring their own food.

The Arts: exhibits, music

"Studies in Visual Communication," an exhibit of enlargements of drawings by first-year architecture students, will go on display May 12 in Hammond Gallery. The projected images, visible from College Ave. after dark, will be the counterpart of the 60 drawings shown in actual form during the regular hours of the Gallery in the daytime. The drawings, made with tempera, ink, and washes, are from a course in architectural rendering taught by Howard Lawrence, assistant professor of architecture. The exhibit continues until May 24.

The U.S. premiere of a work by British pianist and composer, John McCabe, will be a highlight of the program by the Penn State Brass Choral Wednesday, May 15, in the Music Bldg. recital hall. The Choral, directed by James Benshoff, will be joined by the Pennsylvania Vocal Ensemble and June Miller, assistant professor of music and organist, in "Great Lord of Lords." by McCabe, who performed at Penn State last fall when he was in residence. The Vocal Ensemble, conducted by Bruce Trinkle, is composed of members of the University community and other area residents. It will perform several Hindemith compositions. The Choral will also play works by Bliss, Holmes, Tomasi, and Greig, as well as a composition by Arthur Goldstein, a master's candidate, titled "Je Ne Sais Quoi."

Antique quilts, selections from the collection of Miriam Tuska, of Lexington, Ky., will be on display in Gallery C of the Museum of Art May 12 to June 23. The 35 quilts show bold color, sophisticated geometric patterns, and simplified forms. Mrs. Tuska will give a gallery talk on the quilts as an art form Tuesday, May 21, at 10:30 a.m. in the Museum.

The first performance of an original piano composition by recent music graduate James Hughes will be given by Charles Metz in a recital Monday, May 13, at 8:30 p.m. in the Music Bldg. recital hall. Metz, who will also play works by Haydn, Beet-

hoven, and Alexander Scriabin, is a senior in music who was the 1973 recipient of the Atherton Memorial Award and Scholarship. After graduation, he plans to study with Igor Kipnis, the distinguished harpichordist and Baroque scholar.

Two Mother's Day programs, Sunday, May 12, will feature vocal and instrumental music. The first, at 2 p.m. in Room 1121 Kern, will involve seven faculty members and other area residents, Dr. D. Douglas Miller, John Hadden, Erin Headley, Nancy Hadden, James Hughes, Jill Olson, and William Thomas. They will play and sing 19th century parlor music, including music by Stephen Foster, Schumann, Duvernoy, and Von Weber.

The Penn State Glee Club will feature among the songs it will sing in Schuyl Auditorium beginning at 3 p.m., a new composition, "Hail! Oh Hail!" by Ray T. Fortunato, assistant vice president for personnel administration. The 45-voice chorus, conducted by Bruce Trinkle, will also sing four Pauline lauds, choruses for operas by Beethoven, Mussorgsky, Monteverdi, and von Weber, as well as folk songs.

Teri Vincent, soprano, and Marcus Chubbuck, pianist, both undergraduates in music, will give a joint recital Friday, May 17, at 8:30 p.m. in the Music Bldg. recital hall. Chubbuck will play works by Bartok, Robert Schumann, and Chopin. Miss Vincent will sing works by Handel, Mozart, Brahms, and Schumann, including "Die Lorelei blume." Pamela Wissinger will accompany.

Drugs subject of sports lecture

Dr. Daniel F. Hanley, Olympic Games physician and college physician at Bowdoin College, will lecture on "Health Challenges, Drugs and Athletic Performance" Tuesday, May 14, at 7:15 p.m. in Recreation Bldg. In his day-long visit to the campus he will also lecture to a Health Education class and a beginning athletic training course. A graduate of the Columbia University College of Physicians and Surgeons, he has been senior medical consultant to the U.S. Olympic men's and women's teams since 1960.

ATTENTION AIR FORCE RESERVE OFFICERS: The Air Force has established a Liaison Officer (LO) program, named by reserve officers, who on a part-time basis, act as counselors for AFROTC. In return for their time, these reservists receive "credit Air Force units and credits toward a reserve retirement. Each LO is assigned duty in a geographical area. The unit may be one or more counties in a state, and the Liaison Officer's duties are performed around their home area. Working in his assigned area, the AFROTC Liaison Officer is ready reference of information on AFROTC to the recruiting and training of potential recruits. Opportunities to secondary school and junior college students, their parents, youth groups, Civil Air Patrol units, Air Force Junior ROTC units and USAF recruiting detachments.

There are three personnel categories in the AFROTC Liaison Officer program: assigned, attached, and associate. Anyone interested in more information should write to: Capt. Carl Kilts, 109 Wagner Building, or call (614) 560-5455 or 5454.

NEWS—

(Continued from page one)

with weight problems. The tapes are copyrighted by Habit Control Inc. and distributed by Success Motivation Institute. The tapes were put on the dial access system in late April and in the first week were called by 159 persons. The two dial access numbers are 049 and 219; those interested may list at stations in Pollock Library, Undergraduate Library, Sparks, Rackley, Music, and Kern Bldgs., the HUB, Leete Hall, and Pinchot Hall. They are available for use by students, staff and faculty.

CHRISTIAN FELLOWSHIP PLAY

The play, "Christ in the Concrete City," by P. W. Turner, will be performed Thursday, May 9, at 8 p.m. in the HUB assembly room, by Inter-Varsity Christian Fellowship. Admission is free. The play deals with the reasons for the relevance to mankind to deal of Christ's death and resurrection. A cast of six—Mark Shaeffer, Lorraine Wilson, Mike Ciavola, Lorraine Davis, Don Painter and Bill Swallow—will perform the play, which conveys the message on three levels, historically, universally, and personally. The play will also be performed Monday, May 13, at 7 p.m. in the Helen Eaklin Eisenhower Chapel Lounge.

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Division, 865-1387 (Network Line 475-5327). Do not contact the area having the vacancy. Applications will be accepted until: 5 p.m., May 16, 1974.

PRODUCTION MANAGER, UNIVERSITY ARTS SERVICES—University Park

Responsible for technical management of University Auditories; i.e., coordinate production requirements, equipment and personnel resources to function smoothly. University Auditorium facilities are defined as University Auditorium, Schwab Auditorium, and Recreation Bldg. when used for cultural and performing arts events and such other similar areas as may be designated in the future. Master's degree or equivalent in Technical Theatre with one to two years related experience.

APPLICATIONS ANALYST/PROGRAMMER, OFFICE OF BUDGET & PLANNING—University Park

Qualifications and direct execution of programming tasks; design logic for individual programs; prepare logic flow charts; translate system functions into procedure steps for programming; prepare program documentation; design data codes and files; participate in project organization and scheduling; define project schedule and test data requirements. In addition to test data scores; and responsible for providing programming direction and control within the specifications of the project schedule. Bachelor's degree, or equivalent plus two to three years programming experience.

THEATRE SYSTEMS ENGINEER, UNIVERSITY ARTS SERVICES—University Park

Responsible for planning, installing and maintaining all electronic and electrical sound and lighting equipment in University Auditorium facilities. Associate degree in Electrical Technology or Engineering or equivalent plus one to two years related experience.

PUBLIC INFORMATION & ALUMNI AFFAIRS OFFICER—Capitol Campus

Responsible for the implementation and operation of an effective Public Information and Alumni Affairs program. Keep area informed of life and work of campus, maintain effective working relationship with news media. Write and/or edit copy for catalogs, brochures and flyers, special events programs and advertising. Assist in maintaining communications between Penn State alumni association and Capitol Campus Alumni Association. Bachelor's degree in Journalism, English, Communication or equivalent plus three to four years related experience. Experience in mass communication desirable.

HOSPITALITY MANAGER/ENGINEER—Harsheny Medical Center

Responsible for management engineering duties in planning and overseeing utilization of hospital facilities and personnel. Bachelor's degree in industrial engineering or its equivalent, with professional certification plus four to seven years experience in industry or in a hospital.

COORDINATOR, VOLUNTEER SERVICE CENTER, STUDENT AFFAIRS—University Park

Responsible for coordinating the various activities of the Volunteer Service Center and administering the Program of Volunteer services. Teach a course with the College of Human Development, Division of Community Development on volunteer aspects of community service. Master's degree or equivalent preferably in Student Affairs, Social Work, or Student Personnel plus over one and one-half years of related experience.

COMPUTER SYSTEMS AIOE, APPLIED RESEARCH LABORATORY—University Park

Program small and medium sized general scientific problems and perform in-line coding with assembly language. Perform production scheduling, allocation of computer time, document, log and file programs and subroutines. A certificate of formal Data Processing and Programming instruction from an accredited institution equivalent to two years of training beyond high school, plus one to two years of related experience.

PENN STATE intercom

Volume 3, Number 35

May 16, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

The opening performance of the Pittsburgh Symphony Orchestra and the University Choirs, with soloists Betty Allen, Phyllis Curtin, Seth McCoy, and Ara Berberian, was conducted by Dr. William Steinberg.

Conductor, audience praise it generously

Auditorium inaugural great success

Dr. William Steinberg, who has conducted symphony orchestras on many continents in many facilities over a span of 58 years, used a great many superlatives in describing his reaction to the new University Auditorium.

"You should be proud to have such a facility," Dr. Steinberg said. "The acoustics are first rate, and it is a beautiful auditorium."

In his conducting career, which began at the age of 17, Dr. Steinberg has been in many fine concert halls — and in gymnasiums like the University's Rec Hall. In many communities, he points out, the gymnasium is the only large gathering place, and so it was not an unusual experience for the Pittsburgh Symphony when it came to Rec Hall, year after year for the Artists Series. He had high praise for those who managed to improve the sound qualities of the gym by various means.

It was with obvious pleasure that the Orchestra, Dr. Steinberg, guest soloists Phyllis Curtin, Betty Allen, Seth McCoy, and Ara Berberian, and the University Choirs helped to inaugurate the 2600-seat Auditorium which has already found other uses, for Roman Catholic Masses last Sunday and a faculty convocation Monday.

As President Oswald said in remarks from the stage in the inaugural performances, "Now that this impressive facility is installed, we can proceed with further dreams, ideas, and plans within the building to make them real and vital forces in the life experience of the people."

Dean Walter H. Walters, College of Arts and Architecture, to whom major credit goes for "living with" the problems of building the facility from its conception to reality, said "The building is a kind of educational institution in itself, intended to preserve knowledge of the past and investigation of the new."

The auditorium, eight years in the making, will be one of the University's showplaces. The audiences will be impressed with both the beauty and the acoustical qualities, and the feeling of spaciousness. Not so evident at this point, but indicated in the program description, will be the utility of the auditorium, for theatre, music of all kinds, film, meetings, dance, and other occasions.

A few facts: the stage is 110 feet by 55 feet; the proscenium opening is 60 feet; the orchestra lift, hydraulically driven, is capable of taking the entire symphony orchestra from stage floor level to a depth of nearly 17 feet; lighting conditions can be changed by use of 1,100 potentiometers; acoustical conditions can be altered by motor-driven shutters and manually operated portals so that individuals or very large groups can be heard on every audience level.

Dr. Steinberg was obviously pleased with the sound qualities of the new auditorium as he experienced them, but he emphasized that as conductor he could not evaluate the concerts the Symphony gave from an aesthetic standpoint because he was surrounded by the sounds from the orchestra and the chorus.

The musicality of the University Choirs, which are directed by Raymond Brown, was superb, Dr. Steinberg declared, and he added that the chorus "invoked the spirit" of the Beethoven work in spite of singing in a language that few of them understood.

Before the Saturday performance, of which the University Choirs presented Dr. Steinberg with a bronze sculpture, "Hand," rendered by John A. Cook, professor of art, "with deep affection and appreciation for the many performances of the Symphony and the Choirs over the past number of years."

At the opening of the new University Auditorium, Dr. Walter H. Walters, dean of the College of Arts and Architecture, and President John W. Oswald, with Charles S. Dickler, of the architectural firm of Sanders and Bickler, who designed the Auditorium.

To enhance communication

Colleges, campuses elect ombudsmen

In the May 8, 1973 meeting of the University Faculty Senate, a report of the Faculty Rights and Responsibilities Committee included a recommendation that colleges and campuses should have a person or group to serve in the role of "ombudsman."

The list of ombudsmen, and alternates, is now complete and is given below.

"The objective," said the report, "would be to enhance communication and clarify possible misunderstandings in situations which involve potential disputes, to advise faculty members and administrators as to appropriate courses of action, and to help settle matters before they become hardened into serious disputes. The individual or group should be selected by procedures approved by a majority of the faculty in the unit."

(In the following list, the alternate's name is given after the ombudsman's.)

Allentown Campus — Jane Schooley, Peter Behrens.
Altoona — Valerie Stratton, Albert Corney.
Bever — Raymond Lumley, Lou Takahashi.
Behrend — Ernest Weckesser, Norman Patterson.
Berks — Russell A. Reed, Arthur R. Hill.
Capitol — Roger B. Saylor, Lloyd W. Woodruff.
Delaware County — Edward S. J. Tomaszko, Hilda P. Duncan.
DuBois — Merle U. Fox, Samuel A. King.
Fayette — David R. Anderson, Evelyn Hovance.
Hazleton — M. Leonard Sheeuel, Harold Aarand.
McKeesport — Nicholas Gavrilis, Robert Haesser and Richard Reynolds.
Mont Alto — Duane L. Thomas.

New Kensington — Robert E. Cernahan, Marshall Witchee.

Ogontz — Robert A. Bernal, Maylan C. Mills, and Ingeborg Schuster (all ombudsmen).

Schuylkill — James W. Beach, Robert J. Purdy, and Ronald Dietz (all ombudsmen).

Shenango Valley — Thodd Praelner, Frederick Leeds.

Wilkes-Barre — Robert L. Sobelino, Walter A. Sowa.

Worthington Scranton — Austin D. Hall, Robert S. Hyde.

York — Joseph F. Douglas, Leonard J. Berkowitz, Hershey Medical Center — Robert Greor, William Graham.

King of Prussia — Richard Llorens, Margaret Delzer.

AT UNIVERSITY PARK:

Agriculture — Frank Anthony, 113 Armsby; Donald Crider, 205B Weaver.

Arts and Architecture — George Zoritch, 302 Visual Arts; George Bouwman, 103 Arts.

Business Administration — John P. Coyle, 509L Business Administration; Arthur L. Williams, 509F B.A.

Earth and Mineral Sciences — Richard C. Bradt, 228A Min. Ind.

Education — John Withall, 220 Social Sciences; John J. Kitzky, 272 Chomce.

Engineering — Arnold Addison, Applied Science; George J. McMurry, 228 Elec. Eng. West.

Health, Physical Education and Recreation — Thomas Tai, 270 Rec Hall; John Goutills, 103 Rec Hall.

Human Development — Charles Taylor, 5102 Human Development; Harry S. Goblentz, 5126 H.D.

Liberal Arts — Robert W. Green, 812 Liberal Arts; Henry S. Altschul, N161 Burrows.

Science — Paul H. Culter, 538 Oovey Lab; Gerd M. Rosenbalt, 128B Dawey.

Library — Ronald Fillipelli, W342 Pattee; Allen Cohen, R566 Pattee.

Four nominated for Senate chairman

A University Faculty Senate Nominating Committee has named four persons as candidates for 1974-75 Senate chairman.

Nominated are Barnes W. McCormick, professor of aerospace engineering; Patricia M. Overder, associate professor of mathematics at the Ogontz Campus; Dan P. Silverman, associate professor of history; and Helen L. Snyder, associate professor of educational psychology.

Ronald W. Wietz, assistant professor of

biology at the Schuylkill Campus, and Sally S. Small, senior assistant librarian at the Berks Campus, have been nominated for vice chairman.

Nominees for secretary are John J. Cahir, assistant professor of meteorology, and John J. Coyle, professor of business administration.

Election is by mail ballot. The new officers will be installed at the July Senate meeting.

Arthur Miller drama, "Death of a Salesman," will run Aug. 2-10. A brochure containing ticket and other information will be available in early June.

GRADUATE ASSISTANTS

Advanced degree candidates who will be in their third or later term at Penn State during the Fall Term may wish to apply for assistantship grants-in-aid, says Dr. B. F. Howell, Jr., associate dean of the Graduate School. Although the deadline for regular applications has already passed, usually a few (8-10) are released by students awarded assistantships. The deadline for these few assistantships is July 15, 1974; application forms may be obtained at the Fellowship Office, Room 317 Kern.

ENVIRONMENT GRANT

The Worthington Scranton Campus of the University has received a grant of more than \$50,000 from the Appalachian Regional Commission for the purchase of autotutorial equipment. The project will enable the campus to purchase and operate an autotutorial learning laboratory and to purchase, review and develop autotutorial materials for associate degree program.

(Continued on page four)

Dr. William E. White, second from left, and Dr. Paul D. Simkins, hold copies of the certificate awarded sightlying they are the 1974 Matthew J. and Anne C. Wilson Outstanding Teachers in the College of Earth and Mineral Sciences. The awards were presented by Mrs. Wilson, at right, last Wednesday at the awards banquet of the College, which Dean Charles L. Hostler, left, presided over.

Simkins, White honored by EMS

Dr. Paul D. Simkins, professor of geography, and Dr. William E. White, professor of geochemistry, were awarded the 1974 Matthew J. and Anne C. Wilson Outstanding Teaching Awards of the College of Earth and Mineral Sciences at a student-faculty awards banquet May 7. Presentation of the honors was made by Mrs. Wilson.

The awards consist of \$1,000 and a plaque. They are made possible by a trust fund which was provided by the will of the late Matthew J. Wilson, a 1918 mining engineering graduate of the University of Holland, Mich., who died in 1963. His will also provided for the establishment of the Matthew J. Wilson, Jr. Trust Fund which provides for loans to deserving and needy full-time students in the College.

The recipients of the teaching awards are selected by the dean of the College from nominations and petitions submitted by students. Each of this year's recipients was nominated by both graduate and undergraduate students.

Dr. Simkins received his bachelor of arts

and master of arts degree from the University of Missouri and was awarded his doctor of philosophy degree by the University of Wisconsin in 1961. While working on his doctorate, he was an instructor at Southwest Missouri State College and served as a teaching and research assistant at the University of Wisconsin. He joined the Penn State staff as an assistant professor in 1959, became associate professor in 1964, and professor in 1971.

Dr. White received his bachelor of science degree in chemistry at Juniata College. Following graduate studies at the University of Pittsburgh, he came to Penn State where he received his doctor of philosophy degree in geochemistry in 1962. While in Pittsburgh, he worked as a research associate in chemical physics at the Mellon Institute. He served as a graduate and research assistant at Penn State while working on his doctorate and joined the staff as a research associate in 1962. He was named assistant professor of geochemistry in 1963, associate professor in 1967, and professor in 1972.

Dr. W. D. Horrocks

Dr. R. A. Bernheim

Dr. P. T. Baker

Three named Guggenheim Fellows

Dr. Paul T. Baker, professor of anthropology, Dr. Robert A. Bernheim, professor of chemistry, and Dr. William D. Horrocks, Jr., professor of chemistry, have been named Guggenheim Fellows for 1974.

They are among the 342 scholars, scientists and artists chosen by the committee of selection from among 2,668 applicants in the John Simon Guggenheim Foundation's fiftieth annual competition. The fellowships are awarded on the basis of demonstrated accomplishment in the past and promise for the future. In all, 113 colleges and universities are represented among the Fellows.

During the period of his fellowship, Dr. Baker plans to continue his work in human population biology. The first phase will include his work as coordinator of the International Biological Program, the presentation of papers in Europe and atten-

dance at a conference in India on high altitude studies of man, and the preparation of a book. Later, Dr. Baker will plan the development of a large-scale research program to study the biological impact of migration on man, a project that will take him to the Pacific and to South America.

Fundamental research on basic molecular structure will be continued by Dr. Bernheim at Stanford University and the University of Southampton, England. He expects to study the application of lasers to the detection of magnetic resonance in transient molecular species, especially using tunable dye lasers.

At Harvard University Medical School Dr. Horrocks will conduct research in the laboratory of Professor Bert L. Vallee in the Department of Biological Chemistry. He will continue his work on the use of paramagnetic metal ions as probes of structure and function in enzyme systems.

The Arts: three music programs

Dr. D. Douglas Miller, assistant professor of music, will conduct the University Symphony Orchestra in a concert of music by Mendelssohn, Schubert, and Mozart Saturday, May 18, at 8:30 p.m., in Schwab Auditorium. Flutist Nancy Hadden, instructor of music, and Linda Thomas, undergraduate

student and harpist, will be featured in Mozart's "Concerto for Flute and Harp." The orchestra will also play Schubert's Unfinished Symphony (No. 8 in B minor) and Mendelssohn's "Overture to Ruy Blas."

The Wind Ensemble, directed by Smith Toulson, assistant professor of music, will feature light music in its annual Pops Concert Sunday, May 19, at 3 p.m., in the Art Courtyard (Music Bldg. recital hall in case of rain). The "William Tell Overture," "Trumpeters Lullaby," marches, excerpts from "Porgy and Bess" and from Gilbert and Sullivan operettas, will please youngsters and adults alike.

New compositions by students in music will be performed in three sessions in the Music Bldg. recital hall Tuesday and Wednesday, May 21-22. Tuesday at 4 p.m., a concert of taped electronic music composed by five students will be featured. Evening concerts at 8:30 p.m. both days will consist of vocal and instrumental works performed by the Wind Ensemble, the Brass Orchestra, Alard String Quartet, Chamber Wind Quintet, Musica Camera and other music faculty and students. The works of 13 graduate and undergraduate students will be performed in this "Festival of New Music."

HONORS

Dr. Harold E. Dickson, professor emeritus of art history, will receive the ninth annual Lion's Paw Medal during annual class reunion weekend June 8. Dr. Dickson is widely known for his research on Pennsylvania art and for his efforts in popularizing the work of Pennsylvania artists. He was responsible two years ago for the University Museum of Art's premiere exhibit, "Masterworks by Pennsylvania Painters in Pennsylvania Collections," and during the centennial year of the University, 1955, he assembled an exhibit, "Pennsylvania Painters." Established in 1965 by the Lion's Paw Alumni Association, the Medal honors persons who have contributed notable service to the University and fostered its traditions.

Former Medal winners have been John Henry Frizzell, Robert A. Higgins, Robert W. Ostermayer, Sr., Burke M. Hermann, Joseph V. Paterno, Dr. Hummel Fishburn,

Ridge Riley, Robert E. Galbraith and Wilmer E. Kenworthy. Ostermayer was a 1954 Distinguished Alumnus; the others have been either faculty or staff members.

Dr. James R. McAdams, assistant professor of English, has been appointed a Fulbright-Hays Senior Lecturer for the next academic year and will lecture in English and American literature at the University of Jordan, in Amman.

Dr. Gordon F. De Jong, professor of sociology has been elected to the International Union for the Scientific Study of Population. Election is based on the publication of research that has received international recognition for its contribution to the field of demography. Dr. De Jong is associate director of Penn State's Population Issues Research Office.

IN WRITING

Dr. Stuart Patton, Evens Pugh Professor of Agriculture, has recently completed the manuscripts of a monograph entitled

"Lipid Metabolism and Membrane Functions of the Mammary Gland." He was selected in this endeavor by Dr. Robert G. Jensen of the Department of Nutritional Sciences, University of Connecticut. The book will be published in the fall by Pergamon Press, Oxford, England. The book is one of a series entitled, "Progress in the Chemistry of Fats and Other Lipids," edited by Dr. Ralph T. Holman. Dr. Patton plans to use the monograph as a text for a new course on biological and medical aspects of the mammary gland.

"Words For A Deaf Daughter," by Paul West, professor of English and comparative literature, first published in 1970 by Harper and Row and now in its sixth printing, was recently released in paperback form by Signet Books. The book was named by TIME magazine one of the Best of 1970, and West appeared on the NBC "Today" show to discuss it. A Penguin paperback edition was published in England last year.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For more information and funding source information, call 865-1372.

May 16, 1974

(129-1) The new NSF/RANN Program Environmental Effects of Energy, is organized to emphasize four major research fields. These are: *Pollutant Analysis* of pollutants existing from energy extraction, air, water and soil control; *Transport and Fate* — understand pollutant movements in space and time, degree of change, flux rates and environmental sinks; *Ecological Effects* — assess concentrations of pollutants in several levels of ecological organization; and *Environmental Management* — examine issues, analyze energy systems, determine trade-offs and demographic shifts, and assess costs of environmental controls and environmental quality. Program directors want to fund research into methods of minimizing the environmental impact of fuel extraction, energy generation, and fuel consumption. All unsolicited proposals received will be treated as preliminary to encourage a dialog between proposers and staff. Detailed information has been distributed. RANN guidelines are to be used for proposals and are available.

(129-2) The next two deadlines for National Endowment for the Humanities (NEH) Program Grants are July 1, 1974 and Jan. 1, 1975. Program grants support the development and implementation of humanities programs to meet specific curricular needs. The new program must have

teach and administrative support in all curricular areas affected by the grant and the program must continue in the permanent humanities curriculum after NEH funding has ended. Grants usually do not exceed \$100,000 for a three-year program. Eight percent of total costs is the maximum provided in the first fiscal year; thereafter, less money will be furnished. Indirect costs are supported. The program contact is: Dr. Roger Rosenblatt, Officer, Div. of Educ., NEH, Washington, O.C. 20506 (202)328-8981.

(129-3) The Exxon Education Foundation supports an IMPACT (Implementation of Materials and Procedures Affecting College Teaching) program through which information about educational innovations of demonstrated merit is disseminated to educational institutions for implementation. The Foundation selects the innovations of its choosing. Four innovations are currently supported: (1) guided design, (2) student-to-student counseling, (3) tips, and (4) expert sim. Details are available. Cost sharing is required. Grants do not usually exceed \$5,000 and operating expenses are not included. The next two deadlines are July 1, 1974 and Feb. 1, 1975. Detailed information is available. Program contact is: IMPACT Program, Exxon Education fnd., 111 W. 49th St., New York 10020 (212)974-2273.

(129-4) The National Science Foundation

(NSF) Instructional Improvement Implementation Program invites project proposals designed to implement major curriculum and course developments at the pre-college level in the natural and social sciences and mathematics. Emphasized will be mechanisms for implementation, including dissemination of curriculum changes focusing on familiarization with alternative curricula, training of resource teams, and installation in a school system. Proposals should describe elements of cooperation, coordination, and commitment among personnel and institutions involved. Proposals will be classified by types of implementation activities such as leadership specialist projects, teacher projects, or school system projects. Originality and diversity of projects is encouraged. Information about this program has been distributed. The closing date for applications is Aug. 1, 1974 (Ref. NSF/E-74-5).

(129-5) Danforth Foundation (222 S. Central Ave., St. Louis, Mo. 63105) will grant 3 or 5-year fellowships for 1975-76 to exceptionally qualified senior and recent graduates planning graduate study as preparation for a teaching career. Applicants must be nominated by the Graduate School and are evaluated on intellectual ability and breadth, teaching potential and evidence of a concern for the relations of ethical or religious values to disciplines, the educational process, and social and social responsibilities. Preference is given to humanities, arts, and social sciences students. Awards are \$2025/year plus tuition and fees, plus dependency allowance. GRE scores are required no later than the Oct. 26 examination (Oct. 8 registration deadline). A preliminary application including complete college transcripts,

three letters of recommendation, a vita, and a discussion of career and lifetime goals must be submitted to the Fellowship Office, 317 Kent Hall, University of Wisconsin, 480 Lincoln Drive, Madison, Wis. 53706. For further information contact the Fellowship Office or write to address given above. (May 2 INTERCOM 112-7-1.)

(129-6) Research Corporation (410 E. 6th St., Schuylar, 405 Lexington Ave., New York 10017) announces fellowships for 1975 in *Cytophenol* and *Agriculture Food Crops* for recent post-doctoral and graduate students. Application deadline is Nov. 1, 1974. Preliminary brief applications describing the nature and significance of the proposed research, a vita of the applicant, and where and with whom the research will be undertaken should be submitted well in advance of this deadline. If approved, formal application materials will be sent. For further information write to the address above.

REMINERS AND DEADLINE DATES

June 1 for several NIH Mental Health Programs (May 2 INTERCOM 112-7-1). June 1 for NIH Research Projects and Biotechnology Research (May 2 INTERCOM 112-7-2 and 12-7-4). June 1 for NIH Research and Demonstration Project (May 2 INTERCOM 112-7-3). June 1 for NIH ADAMHA programs (April 1 INTERCOM 112-7-4). June 1 for NIH Film/TV Grant Program (May 2 INTERCOM 112-7-5). June 1 for NIH Research Grants (March 21 INTERCOM 112-7-6). June 1 for NEA Media Studies Program (April 25 INTERCOM 112-7-7). June 1 for NEH Senior Fellowship Program (March 14 INTERCOM 112-7-8). June 1 for NEA Public Education and Awareness projects (May 9 INTERCOM 112-8-3).

University Park Calendar

May 16-26, 1974

Special Events

Thursday, May 16 — Department of Theatre and Film, "Special Student Film Show," 7:30 p.m., Room 112 Kern.
Thursday, May 16 — Oliver LaGrone gallery talk and demonstration, noon, lobby of Kern. Lecture 7:30 p.m., Room 101 Kern, on "Shattering Myths — Light from the Dark Continent."
Thursday, May 16 — Hillie, 8 p.m., HUB reading room. Dr. Wickersham on "Human Sexuality As a Total Health Entity."
Thursday-Saturday, May 16-18 — Interdisciplinary Theatre in Concert, Playhouse Theatre.
Thursday-Saturday, May 16-18 — Interdisciplinary Colloquium on "Romanticism." Kellier Conference Center, Thursday, 3 p.m., Geoffrey Hartman, Yale University, 3 p.m., Richard R. Niebuhr, Harvard University, 8 p.m., Henry Peyre,

CUNY. Friday, 10 a.m., George Levline, University of Maryland; 3 p.m., Judith N. Shklar, Harvard University. Saturday, 10 a.m., Otto Poggepeter, Ruhr University, 3 p.m., Panel Discussion.
Friday, May 17 — Marcus Chubbuck, piano, and Teri Vincent, vocal, 8:30 p.m., Music Bldg. recital hall.
Friday, May 17 — Interdisciplinary Colloquium, Penn State Theatre group in a "Reading on the Theme of Science," 8 p.m., Kellier Conference Center auditorium.
Friday, May 17 — Sports: Men's track, Penn State Open Invitational.
Friday, May 17 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.
Saturday, May 18 — PSU Symphony Orchestra, 8:30 p.m., Schwab.
Saturday, May 18 — Sports: Men's baseball, vs. Mansfield, 1 p.m. Rugby, vs. Blackthorn.

Sunday, May 19 — Penn State Wind Ensemble Pops Concert, 3 p.m., Arts Courtyard.
Sunday, May 19 — Chapel Service, 11 a.m., Eisenhower Chapel. Rev. Hays Rockwell, Colgate-Rochester Divinity School, Rochester.
Sunday, May 19 — Black Christian Fellowship worship service, 11 a.m., Black Cultural Center.
Monday, May 20 — Paul Ferrone, piano recital, 8:30 p.m., Music Bldg. recital hall.
Tuesday-Wednesday, May 21-22 — Penn State Players performance of "Old Times," 8 p.m., 8 p.m. A Festival of New Music, Electronic Music, 4 p.m., Music Bldg. recital hall.
Tuesday-Wednesday, May 21-22 — A Festival of New Music, vocal and instrumental, 8:30 p.m., Music Bldg. recital hall.
Friday-Sunday, May 24-26 — Penn State Springboard and Tower Divining Clinic.

Lectures

Thursday-Friday, May 16-17 — Dr. Yi-Fu Tuan, University of Minnesota, 4 p.m. both days; Thursday in the Chapel Lounge, on "Space and Place" and Friday Room 173 Willard, on "Place."
Thursday, May 16 — Speech Communication, 8 p.m., Room 265 Willard, Dr. Alvin M. Liberman, University of Connecticut, on "Speech and Language."

Films

Thursday-Friday, May 16-17 — Videotape Network documentary, "Millhouse," sponsored by HUB board. Afternoon, Kern.
Monday, May 20 — Graduate Commons American Film Series by Alistair Cooke, "America: Gone West," 12:05 p.m., Room 112 Kern. Also HUB assembly room, 2:15 p.m.

Seminars

Thursday, May 16 — Chemistry, 12:45 p.m., Room 310 Whitmore. Robert E. Sievers, Aerospace Research Laboratories, Wright-Patterson Air Force Base, on "Gas Chromatographic and Nuclear Magnetic Resonance Studies of Metal Complexes."
Thursday, May 16 — Agronomy, 3:30 p.m., Room 111 Tyson. D. Wehner on "Isoenzymes and Varietal Identification."
Thursday, May 16 — Engineering Acoustics, 4 p.m., Room 71 Willard, Geoffrey L. Wilson, A.R.L., on "The Measurement of the Bulk Modulus Loss Factor of Small Solid Specimens."
Thursday, May 16 — Urban Transportation and Air Pollution Control, 2:20 p.m., Room 112 Kern. Robert McManus, Department of Transportation, Washington, on "The Future of Urban Mass Transportation."
Thursday, May 16 — Anthropology, 3 p.m., Room 107 Social Science Bldg. James Hatch, on "Social Dimensions of Prehistoric Mortuary Practices: A Progress Report."
Thursday, May 16 — AIAA, Central Pennsylvania Section, 4 p.m., Room 232 Hammond. John Pacey, Manager, Space Sys-

tems Requirements, Vought Systems Division, LTV Aerospace, Dayton, Ohio, on "The Scout Launch Vehicle System."
Thursday, May 16 — Statistics, 4 p.m., Room 169 Willard. James M. Landwehr, Bell Laboratories, Murray Hill, N.J., on "Approximate Confidence Regions from Cluster Analysis."
Thursday, May 16 — Physics, 3:45 p.m., Room 119 Osmond. Michael E. Fisher, Cornell University, on "Critical Points and Their Exponents."
Friday, May 17 — Analytical Chemistry, 11:10 a.m., Room 333 Whitmore. George W. Goodlee on "Column Selection in Liquid Chromatography."
Friday, May 17 — Biological Health, 8 p.m., Room S-205 Human Development. Dr. C. West Churchman, business administration, University of California at Berkeley, on "Ecologic Perspectives on Health and Society."
Friday, May 17 — "Arts Management," conducted by Frederic Vogel, Foundation for the Extension and Development for the American Professional Theatre, 10 a.m. and 2 p.m., Playhouse Gallery.
Monday, May 20 — Two Cultures Dialogues, 12:30 p.m., Room 169 Materials

Research Lab. Andrew Mitchell, business administration, and Richard Barton, on "Value Considerations in Communication and Media Education."
Monday, May 20 — Genetics, 3:55 p.m., Room 111 Tyson. Miss Sharon Ventura, biology, on "Genetic Analysis of the Selling Phenomenon in the Myxomycete, 'Didymium iridis.'"
Monday, May 20 — Microbiology, 2:30 p.m., Room 250 North Frear. Dr. Maurice Stroun, Pavillon des Isotopes, Geneva, on "Circulating DNA."
Monday, May 20 — Inter-Science, 4 p.m., Room 310 Whitmore. Dr. David Usher, chemistry, Cornell University, on "Model Studies of Enzymic Reactions."
Monday, May 20 — New Communities, 2 p.m., Room 322 Sackett. Dr. Gordon F. DeJong, sociology, on "Residential Preferences and Potential Residence of New Communities."
Monday, May 20 — Plant Pathology, 9:45 a.m., Room 213 Buckhout. Dr. T. O. Diener, Research Plant Pathologist, U.S.D.A., Northeastern Region, Agricultural Research Center, Beltsville, Maryland, on "Recent Viroid Research."
Tuesday, May 21 — Statistics, 4 p.m., Room 169 Willard. Lawrence S. Mayer, Virginia

Polytechnic Institute, on "Exploring the Relationships between Abstract Variables."
Tuesday, May 21 — Microbiology, 4 p.m., Room 52 Frear. M. Weinberger, on "Plasmid Coded Utilization of 2-Hydroxyxypiridine by *Arthrobacter* crystallophilus".
Tuesday, May 21 — Ceramic Science, 11 a.m., Room 301 Mineral Industries. Dr. Paul Becher, Naval Research Lab., on "Hot-working and Strengthening of the Alkali Halides."
Tuesday, May 21 — Environmental Pollution Control and Solid Waste Management, 2:20 p.m., Room 140 Fenske. Robert Louis Adams, Office Economic Analysis, U.S. Bureau of Mines, on "Economics of Metals Recycling."
Wednesday, May 22 — Animal Nutrition and Nutrition, 3:55 p.m., Room 111 Animal Industries. General discussion and summary by J. Mendez, Laboratory for Human Performance.
Wednesday, May 22 — Biochemistry, 4 p.m., Room 101 Altohouse. David Spelcher on "Enzymatic Composition of Crude Trypsin and the Enzyme Requirements for Dissociation of Rat Heart Tissue."

WPSX highlights

The politics of landmark architecture is the subject of "Who Built This Place," an award winning comedy documentary Saturday, May 18, at 7:30 p.m. on Channel 3. The half-hour program shows how "landmark" buildings really get built by illustrating four different building projects: Boston's new city hall, the Transamerica Pyramid in San Francisco, an unconventional bank building in Atlanta, and the new Dallas city hall.
Fusion reactors, a source of energy that would use cheap, non-polluting sea water as fuel, is the subject of an hour-long "Nova" program, Saturday, May 19, at 7:30 p.m. on WPSX-TV. The program focuses on the nuclear fusion race among the Russians, English, and Americans. Appearing on the program are American and European scientists involved in fusion research.
Abstract-expressionist painter Sam Francis, who rarely talks about his work and who dislikes being photographed, is the subject of "Sam Francis: These are My Footprints" on "The PBS Special of the Week," Wednesday, May 20, at 9:00 p.m. on Channel 3.
Members of Cincinnati's Playhouse in Eden Park are featured when "Theatre in Eden Park" presents "Monkey, Monkey, Bottle of Beer, How Many Monkeys Have We Here?" Wednesday, May 22, at 8:30 p.m. on Channel 3. The play is a psychological drama about an unusual medical experiment and features an almost exclusively female cast.
"Health Care in America" is the subject of a round-table discussion on "The Open Mind" Wednesday at 10:00 p.m. on Channel 3. Lead-off speakers are Sen. Edward Kennedy of Massachusetts and Dr. Malcolm D. Todd, president-elect of the American Medical Association, who explain their positions on how to finance medical services. Their ideas are further discussed by Dr. John M. Knowles, president of the Rockefeller Foundation, and Dr. Louis Lasagna, chairman of the Department of Pharmacology and Toxicology at the University of Rochester. The discussion centers around the quantity vs. quality dilemma facing medicine in a democracy.

Meetings

Thursday, May 16 — College of Engineering faculty, 4 p.m., Room 26 Mineral Sciences.
Tuesday, May 21 — Graduate faculty, 3 p.m., Room 112 Kern.
Mondays — O.T.I.S., 8:30 p.m., Room 203 HUB.
Thursdays — Hetzel Union Board, 7 p.m., Room 206 HUB.
Sundays — U.S.G. Supreme Court, 7:30 p.m., Room 203 HUB.

Exhibits

Museum of Art — Quilts, opening May 19, Gallery B.
Zoiler Gallery — Annual Juried Student Show, until May 25.
Hammond Gallery — Studies in Visual Communication, until May 25.
Chambers Gallery — John Wahling, Textiles. Jenny Floch, Ceramics.
Kern Gallery — Oliver LaGrone, Sculpture, until May 19. Craig G. Myers, Oil Paintings, opening May 18. Patty Carroll, B&W Photographs, opening May 26.

Official

Monday-Friday, May 20-24 — Preregistration for Fall Term, for those not attending Summer Term.
Wednesday, May 22 — Last day for signing Emergency Loans for Spring Term.
Wednesday, May 22 — Classes end, 12:25 p.m.
Thursday-Saturday — May 23-25 — Final examinations.

Jazz dance

Jazz Dance Theatre in Concert is currently the Playhouse Theatre feature, with performances through Saturday.
Jean Sabatine, director-choreographer, has dancers from Chicago, Michigan, New York, Pennsylvania and Trinidad in her company, one of the few dance companies devoting its efforts to jazz dance.
In debut in these performances is a work combining contemporary jazz styles with the elegant Tudor court dances of the sixteenth century, "Anne Boleyn," which presents a new approach to the second wife of Henry VIII.
A five-part study, "Loneliness," is one of the featured dances also, a dramatic look at the ordinary fears and isolation of common people. "Family Tree," on the other hand, is a lively review of old social dances, from the Charleston to the Penguin. "Njamba" is a blend of ballet and modern, in the style of primitive dance.
Jean is the author of a book and a number of articles on jazz dance, and her work has appeared on television throughout the country.

Jazz Dance Theatre in Concert, at Playhouse Theatre, through Saturday, May 18.

Fountain installed in Arts court

George Tsutakawa, who designed the new fountain in the Arts Courtyard, at the moment the sculpture was "activated."

Installation of a fountain by the sculptor, George Tsutakawa, of Seattle, Wash., in the reflecting pool of the Alumni Arts Court on the University Park campus has been completed.

The fountain, described by the sculptor as "a totemic arrangement of three open-faced spheres," is made of solid bronze with antique black finish. It stands 9 feet high, including the base, and weighs 800 pounds.

Tsutakawa, sculptor and painter, is a professor of art at the University of Washington. He has been commissioned to provide sculptures, especially fountains, for public buildings and parks throughout the United States, and his works, for which he has received numerous awards, have been exhibited in this country and in Europe, Asia, and South America.

The Court and the fountain were made possible through unrestricted gifts from alumni and friends of the University through the Penn State Foundation. The reflecting pool was given by Samuel Whitman of Ithaca, N.Y., a 1914 graduate, in memory of his wife.

NEWS—

(Continued from page one)

grams. It will provide an autolateral learning laboratory with 24 complete learning stations and four auxiliary stations with a capacity for 400 students. Cost of the project is \$70,000, with \$52,500 being provided by the Appalachian grant and \$17,500 by local sources. Dr. Robert W. Naismith, assistant professor of biology at the campus, is project director.

CAPITOL FOLK FESTIVAL

A country/western, folk, jazz and rock music festival will be held at the Capitol Campus Saturday, May 16, with no admission and parking charge. The program, which began two years ago as the Harrisburg Rock Festival, is sponsored by Good People Productions.

MATHEMATICS CONFERENCE

A conference on Eulerian Series and Applications, which will have an international group of speakers in the mathematics field, is convening today (May 16) through Saturday. Dr. George E. Andrews, professor of mathematics, is directing the conference in which he and Dr. Nathan Fine, professor of mathematics, will be among those presenting papers. Dr. Arun Verma, currently visiting the department here from Luknow University, India, will also speak.

SPACE, PLACE

Three "conversations" by Dr. Yi-Fu Tuan, professor of geography at the University of Minnesota and editor of "Annals," are being given this week sponsored by the Department of Geography. The first given last night (Wednesday) was titled "Space,"

and the talk today at 4 p.m. in the Helen Eakin Eisenhower Chapel Lounge is titled "Space and Place." The concluding talk tomorrow (Friday) at 4 p.m. in Room 173 Willard, is on "Place." The speaker is author of "Topophilia: A Study of Environmental Perception, Attitudes and Values."

VISITOR

Dr. F. D. Tamas, associate professor of silicate chemistry, Veszprem University, Hungary, is spending three weeks at the University in work associated with that of Prof. D. M. Roy in the Materials Research Laboratory. The joint research program is an outgrowth of Dr. Roy's studies on generation of very high strength in cement, and will incorporate Dr. Tamas' studies of chemical processes in cement hardening. Research will be conducted under the sponsorship of a new United States-Hungary Cooperative Science Program.

SCRANTON MEETING

Two faculty members at the Worthington Scranton Campus have been cited for their role in the statewide meeting of the Junior Academy of Science hosted by the campus April 25-27 at Mt. Airy Lodge, Mt. Pocono. In his capacity as chairman of the Advisory Board of Region II of the Academy, Dr. Robert W. Naismith, assistant professor of biology, arranged the meeting and served as master of ceremonies at the awards banquet. Dr. Lawrence B. Golden, assistant professor of physics, was responsible for obtaining and supervising judges for the meeting at which more than 1,000 junior and senior high school students from throughout the state presented papers.

Military training duty leave

This is the time of year when military reservists and National Guard members may be making requests for leaves of absence for annual military training duty.

The University, in accordance with the law, grants leaves of absence without salary for annual training duty, regardless of an individual's length of regular University service. In addition, University policy provides that if a regular faculty member or employee has six months of regular University service prior to the date of the requested leave, the leave is granted according to the provisions of PS-20 (Leave of Absence for Annual Military Training Duty).

PS-20 provides that a regular faculty or staff member on a 12-month basis, whose military base pay is less than his or her University salary would be for the same calendar period, will be paid the difference by the University for a period of active duty of at least seven calendar days up to a maximum of fifteen calendar days, upon request by the faculty or staff member.

If a faculty or staff member may be expected to charge the ENTIRE period of training to accumulated vacation. In such instances, the individual continues to receive full salary from the University.

Fishburn to be feted June 7

Area residents are being invited to join University alumni in "Evening of Fun with Hoot," a special tribute to Dr. Hummel Fishburn, professor emeritus and former head of the Department of Music and Music Education at the University, who has been associated with musical activities at Penn State for more than 50 years.

The event, which is being planned by a group of former students and friends of Dr. Fishburn, will be held Friday, June 7, at the State College Elks Country Club.

Boalsburg, as a special activity of the University's Alumni Class Reunion week-end. It will open with a social hour at 6:30 p.m., followed by dinner at 7:30 p.m.

Musical numbers, skills, and reminiscences, all related to the honored guest's long association with both the town and the University, will be featured in the program.

Tickets for the event may be purchased at the Music Mart in State College or the Alumni Office, Room 105 Old Main.

Fraternity installed at Hazleton

A milestone in Commonwealth Campus history was reached on Saturday, March 16, with the installation at Hazleton Campus of the Psi Pi chapter of Alpha Phi Omega Fraternity, first national service fraternity to establish a chapter at a Commonwealth Campus.

The installation ceremony was performed by members of the Muhlenberg chapter of Alpha Phi Omega. Present at the dinner held after the ceremony were John Zuk,

at Hazleton

sectional representative of the fraternity, Warren Weidman, regional chairman and national representative; and Dr. William David, campus director, who accepted the chapter on behalf of the University.

Installed were the following officers and advisors: Anthony See, president, David Wolf, vice-president, Mark Butler, treasurer. Dr. Joseph Dandois, historian, and advisors Dean Joseph McCallus, Karl Krone, Dr. Dandois, and Everett Binn.

Engineering gives an alumni award

Charles W. Yoder, head of a Milwaukee, Wis., engineering consulting firm and president of the American Society of Civil Engineers, has been named the 1974 Outstanding Alumnus of the College of Engineering. He will receive a certificate at the College's annual Honors Day luncheon today (Thursday, May 16).

The award, which was established eight years ago, is given to an engineering graduate who has contributed significantly to his field of work.

A 1932 civil engineering graduate, Yoder, a Pointon native, worked for Bethlehem Steel Co. earlier in his career, and later served for three years in the U.S. Army Corps of Engineers as an assistant engineer in the Office of Chief of Engineers.

Equestrian Club has horse show

Members of the Equestrian Division of the Penn State Outing Club and the Women's Auxiliary to the Centre County Medical Society are co-sponsoring the Penn State Horse Show, which will be held Saturday, May 25th starting at 9 a.m. at Capriola Stables on Whitehall Road.

Eighty percent of the proceeds of the Show will benefit the Auxiliary's Health Careers Scholarship Fund, which last year gave six scholarships to Centre County youths, to help them in pursuing their training in some allied field of medicine. Mr. Myron Sevik and Mrs. Nicholas Palmer are co-chairmen on behalf of the Medical Auxiliary and Judy Sterling is chairman representing the Equestrian Division.

The Show, which is being held for its fourth consecutive year, is expected to draw entries from Pennsylvania and neighboring states. The Auxiliary will be serving refreshments. There is no admission charge for spectators.

Student film show

Pet Anderson, left, and Kevin Myers, two students in film production classes taught by George Bowman, prepare to shoot a scene for a class project. A two-hour showing of similar film, from brief two-minute productions to 10-minute films, will be shown today (Thursday, May 16) starting at 7:30 p.m. in Room 112 Kern. The students handle all aspects of their films, from concept to print. Some are documentaries, some are short stories or on any other subject. Only the best from the year's productions (since last summer) in beginning and advanced classes, will be shown. There is no admission charge. (Photo by Steve McCurry.)

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or faculty non-exempt jobs listed below may apply by calling Employment Division, 865-1387 (Network Line 475-1387). Do not contact the area having the vacancy. Applications will be accepted until: 5 p.m., May 30, 1974.

CHEST PHYSIOTHERAPIST — Hershey Medical Center

Responsible for conducting in-service programs in chest physiotherapy as well as treating patients who have special pulmonary problems. Three years of training in an accredited school of physiotherapy plus two to three years related experience in a clinical hospital and completion of the American registration of inhalation therapist examinations.

MANAGEMENT TRAINEE, OFFICE OF PHYSICAL PLANT — University Park
Responsible for assistance in a wide variety of administrative and management duties, working within a structured program toward the overall goal of obtaining well-rounded management experience in all areas assigned within the Office of Physical Plant. At the completion of training, incumbent may move into a permanent management position within the Office of Physical Plant, if such is available, or will terminate employment with the Office of Physical Plant. No

permanent assignment is guaranteed. Bachelor's degree in Business Administration or related field. Some work experience preferred. However, position is an entering level in the field of management.

PHYSICS DEMONSTRATION SPECIALIST, SCIENCE — University Park

Responsible to design, construct, and test various demonstration devices for faculty members to use in their teaching. Associate's degree or equivalent in electrical engineering, or physics plus two or three years experience in the maintenance and operation of electronic devices and equipment. Familiarity with instructional media, audio-visual aids, etc. is desirable.

EDITORIAL ASSISTANT, DIVISION OF UNDERGRADUATE STUDIES — University Park

Responsible for assistance in the writing and editing of various Instructional and informative publications and reports. Assist with the collection, maintenance and reporting of information pertinent to several areas of the Division's responsibility. Bachelor's degree or equivalent in English, journalism or related area plus six to nine months related experience.

MANAGER, HOUSING AND FOOD SERVICE — Commonwealth Campus

Responsible for the operation of Housing and Food Services at the Commonwealth Campus to which assigned. Bachelor's degree or equivalent plus two to three years related experience.

Dog show aids scholarship fund

Hundreds of purebred dogs and their handlers will compete in the annual Nee Nee Kennel Club match at the Ice Pavilion on Sunday, May 19.

Classes in conformation and obedience will be offered, with registration from 10:00 to 12:45 Sunday morning, and a Parade of Champions scheduled for 1:00 p.m. Judging will begin at 1:30 p.m.

Conformation classes will be for puppies from 6 to 9 and 10 to 12 months, American bred, and open dogs, divided by sex, and obedience competition will be held at 1:30 p.m. Novice, open, and utility levels.

Judges representing a five-state, will award trophies and ribbons, with a Best of Breed winner for each breed chosen from conformation class winners. Dog judging and the awarding of Best Dog in Match will culminate the afternoon's competition.

The Shigley Memorial Scholarship for veterinary science at the University benefits annually from match proceeds. Entry fees are \$2.00; general admission is 50 cents. The public is invited to attend.

Commencement listed at 21 campuses

Twenty-one Commencement programs will be held by the University between May 24 and June 8. The number of degree candidates listed is approximate at this time.

FRIDAY, MAY 24:

Hazleton Campus, 7:30 p.m. outdoors on campus. Kenneth L. Holderman, vice president for Commonwealth Campuses, will speak. Forty-three degree candidates.

SATURDAY, MAY 25:

The Milton S. Hershey Medical Center, 10:00 a.m. in Founders Hall of The Milton S. Hershey School. Dr. John W. Oswald, president of the University, speaker. Sixty-three candidates for medical degrees and eight for graduate degrees.

SUNDAY, MAY 26:

Behrend College, 2 p.m. in Erie Hall. Speaker is Dr. Robert O. Chapman, former Behrend student and an official in the NASA program at Goddard Space Flight Center. Ninety-one associate and bachelor degree candidates and four candidates for master of engineering degrees.

Schuylkill Campus, 2 p.m. in the Field House. Speaker is Dr. James Delli, president of the Schuylkill Campus Faculty Organization. Thirty-one degree candidates.

THURSDAY, MAY 30:

Opotiski Campus, 7:30 p.m. in Lares Bldg. Dr. Fred Humphrey, head of the Department of Health, Physical Education and Recreation at Temple University, will speak. Forty degree candidates.

FRIDAY, MAY 31:

DuBois Campus, 2 p.m. in the Multi-Purpose Bldg. Dr. Eugene J. Kelley, dean of the College of Business Administration, will speak. Fifty-four degree candidates.

York Campus, 8 p.m. in the gymnasium. Vice President Kenneth L. Holderman will speak. Forty-to-degree candidates.

SATURDAY, JUNE 1:

McKeesport Campus, 10 a.m., Buck Union Bldg. Speaker is Vice President Kenneth L. Holderman. Thirty-five degree candidates.

Berks Campus, 10:30 a.m. in the Community-Student Learning Center. Judge Frederick Edenharter, of the Berks County Court of Common Pleas, will speak. A total of 125 degree candidates.

University Park Campus, 10:30 a.m. in Beaver Stadium. Speaker: Former Governor William Scranton. A total of 4,438 degree candidates.

Delaware County Campus, 11 a.m. Speaker is Bill Kuster, KYW-TV ecology editor and weatherman. Thirty-five degree candidates.

Mont Alto Campus, 11 a.m., outdoors on campus. U.S. Rep. E. G. (Bud) Shuster will speak. A total of 107 degree candidates.

Wilkes-Barre Campus, 2 p.m. outdoors on campus. U.S. Rep. Daniel J. Flood will speak. Approximately 100 degrees.

Worthington Scranton Campus, 8 p.m. in the physical education — multipurpose building. Speaker is State Sen. Robert J. Mellow. Approximately 100 degrees.

SUNDAY, JUNE 2:

Shenango Valley Campus, 1:30 p.m. in the auditorium. Dr. Robert G. Quinn, dean of academic instruction for Commonwealth Campuses, will speak. Forty-eight degree candidates.

Altoona Campus, 2 p.m. in Adler Gymnasium. Vice President Holderman will speak. Approximately 175 degree candidates.

Beaver Campus, 2 p.m. in the Gymnasium. The Hon. John N. Sawyer, president judge of the Beaver County Court of Common Pleas, will speak. A total of 77 degree candidates.

Fayette Campus, 2 p.m. at Conneltsville Area High School auditorium. Miss Carol Dezort, a Fayette Campus student, will speak. A total of 92 degree candidates.

New Kensington Campus, 2 p.m. in the Little Theatre on campus. Speaker is John S. Modler, an executive vice president of The Union Corp. A total of 74 degree candidates.

Allentown Campus, 3 p.m. in First Presbyterian Church, Allentown. Fifteen degree candidates.

SATURDAY, JUNE 8:

Capitol Campus, 11 a.m., outdoors on campus; 1 p.m. in Hershey Community Theatre in case of rain. Speaker is Dr. Thomas J. Knight, associate professor of social science and history. Total of 586 degree candidates, including 532 baccalaureate and 54 master's degree candidates.

Tomezsko gains Delaware honor

Dr. E. S. J. Tomezsko

Dr. Edward S. J. Tomezsko, associate professor of chemistry, has been named the outstanding teacher of the year at the Delaware County Campus.

Dr. Tomezsko was selected from among 43 eligible full-time faculty members at the campus by a special committee composed of past winners of the award. The committee polled students, faculty, and administrators in their determination of this year's recipient. The annual award was initiated in 1972.

Dr. Tomezsko holds a B.S. in chemistry from Villanova University, and an M.S. in fuel technology and a Ph.D. in chemistry from Penn State. He is a former senior research analyst at Atlantic Richfield Company, and joined the campus faculty in 1971.

Tomezsko was cited for his "excellent teaching, high standards and concern for students, and his outstanding contributions to all aspects of campus life." He received a monetary award and an engraved plaque.

News in brief

EDUCATION VACATIONS

Across the nation there is a developing trend for entire families to take a summer vacation by going to college together. Penn State's version of such a program will be held July 29 to Aug. 2 at the Mont Alto Campus when vacation workshops on a variety of themes will be offered to individuals or families living on the campus.

The workshops will be on Civil War history, Families and Crafts, and Nature Study. Complete information will be provided by Clyde J. Johnson, assistant director for Continuing Education at the Mont Alto Campus (Mont Alto, Pa., 17237, phone 717-749-3134). The workshops are a continuing education service of the Colleges of the Liberal Arts, Education and Science.

HUB FOOD SERVICE

As a special service, the HUB will provide food service for both breakfast and lunch Saturday, June 1, Commencement Day. The Terrace Room will be open from 8 a.m. through 1:15 p.m.

In the period between terms, with that exception, the Terrace Room will be closed after the evening meal Friday, May 25 and remain closed until lunch Sunday, June 9. The Lion's Den snack bar will close Friday, May 24, at 7 p.m. and reopen Monday, June 10, at 7 a.m.

HERSHEY MILESTONE

The 200th physician will be graduated by the College of Medicine at commencement

(Continued on page two)

Calendar

SPECIAL EVENTS

Friday-Sunday, May 24-26 — Penn State Springboard and Tower Diving Clinic.

Saturday, June 1 — Spring Term Commencement, 10:30 a.m., Beaver Stadium. In case of rain, ceremonies at 10:30 a.m. and 2:30 p.m., in Rec Hall. University Auditorium, and Schwab Auditorium (not at 2:30).

Saturday, June 1 — ROTC Commissioning, 8 a.m., Music Bldg. recital hall. Commencement speaker, Dr. Robert E. Dunham, Vice President for Undergraduate Studies.

SEMINARS

Thursday, May 23 — Biophysics, 4 p.m., Room 517 Life Sciences. Robert Honess, University of Chicago, on "Syntheses and Post-synthetic Processing of Herpesvirus Proteins."

Friday, May 24 — Electrical Engineering, 11 a.m., Room 329 Electrical Engineering East. D. R. Alrey, Central Electricity Generating Board, Marchwood Engineering Laboratories, England, on "Electricity Generation and Transmission Research at Marchwood."

LECTURE

Thursday, May 23 — Man-Environment Relations, 4 p.m., Room S131 Human Development. Dr. Amos Rapoport, School of Architecture, University of Wisconsin-Milwaukee, on "Developing Theories of Man-Environment Relations."

EXHIBITS

Museum of Art — Gallery A, Selections from the Permanent Collection; Gallery C, Quilts.

Zoller Gallery — Annual Juried Student Art Show.

Hammond Gallery — Studies in Visual Communication, through May 24.

Kerr Gallery — Florence Puttermar, abstract prints, through May 25. Craig G. Myers, oil paintings, through June 1. Patty Carroll, B&W photographs.

At University Park

Scranton is commencement speaker

Former Governor William W. Scranton will deliver the commencement address at the University Park Campus at 10:30 a.m. on Saturday, June 1.

"It is a particular pleasure to announce that Governor Scranton will be the commencement speaker," University President John W. Oswald said Monday.

"During his service as Governor, Mr. Scranton showed a special concern for the development of public higher education in the Commonwealth. Since leaving public office, he has contributed significantly to the development of higher education on the national level. I know of no private citizen who devotes more of his energies to public service or who serves the public interest more effectively."

Following the serious campus disruptions in the spring of 1970, Mr. Scranton was appointed by President Nixon to head a national commission to explore the causes of campus violence and to recommend ways of resolution.

For the past several years, Mr. Scranton has served as a member of the Carnegie Commission for the study of higher education. This group has made several landmark studies that form much of the framework for present planning for higher educational development.

Mr. Scranton is a graduate of Yale University and the Yale Law School. He began public service as a special assistant to the then Secretary of State, Christian A. Herter.

Prior to being inaugurated Governor in January, 1965, he served one term in Congress as a representative of Pennsylvania's Tenth District.

More than 4,400 students will receive degrees at the University Park Campus commencement ceremonies, scheduled for Beaver Stadium. Included are 3,704 candidates for baccalaureate degrees, 604 for master's degrees, and 130 for doctorates. The University holds four commencement services annually.

At 62, under certain conditions

SS benefits for idle summer period

University employees age 62 or older who will not be working during the summer months may qualify for social security benefits for one or more of the summer months provided certain conditions are met, according to John V. Pezzoni, Director of Personnel Services. This provision of the Federal Social Security Act covers situations such as faculty and staff members whose contracts do not require service during the summer term or other employees placed on summer layoff. An employee does not have to be retired to qualify and may still be receiving salary payments. All employees age 62 and over who will not be working during the summer may wish to contact their closest social security office to determine whether or not they qualify.

HONORS

Dr. Edwin L. Herr, professor and head of the department of counselor education, was given two national awards at the annual convention of the American Personnel and Guidance Association recently. One was the Merit Award of the National Vocational Guidance Assn., for distinguished contributions to the advancement of professional vocational guidance; the other was a Certificate of Achievement from the Association of Counselor Education and Supervision (A.C.E.S.) for service as editor of the association's journal. On July 1, Dr. Herr will become president of the A.C.E.S.

Richard E. Bland, associate professor of engineering research and special assistant to the director of the Applied Research Laboratory, has been selected "Fire Protection Man of the Year" by the Society of Fire Protection Engineers. The award was made yesterday (May 22) at the annual

meeting of the Society in Miami Beach, Fla.

Dr. R. Devere Boyd, family practice resident at the Hershey Medical Center who obtained his M.D. degree there in 1973, is one of 16 doctors throughout the nation to be named to receive \$1,200 Mead Johnson awards from the American Academy of Family Physicians. The awards are given to finance graduate training in family practice.

LEAVE

Dr. Robert W. Oit, assistant professor of art education at the University, has been granted a leave of absence for post-doctoral study at the University of London, beginning in September.

During his leave Dr. Oit will participate in the Association Programme of the Institute of Education of the University of London.

The Associateship Programme is comprised of internationally advanced scholars

who are awarded one year of full-time study and investigation of selected research topics in the field of education. The head of the art department of the University of London, Stanislaw Frenkiel, and the heads of the educational service departments of the Victoria and Albert Museum, The Tate Gallery and the Commonwealth Institute of the British Museum will serve as senior tutors for Dr. Oit's research. He will conduct a study of the in-service teacher and art teacher preparation programs that offer university credit for teacher education within museums of art.

IN WRITING

Dr. Corland Eyer, professor emeritus of Romance Languages, has written a history, "Foreign Languages at Penn State (1859-1947)," which will serve as a reference work on the development of the language programs at the University in pre-University years, as well as the faculty members who contributed to that development. The

book-length, loose-leaf volume also serves as a commentary on language instruction at Penn State, which in many ways reflects the changes in the University as a whole. Dr. Eyer depended on a variety of materials, including the files of the Penn State Board, Board of Trustees minutes, annual reports, personnel record sheets of instructors, annual reports of department heads, and to personal contact with former members of language faculties and their descendants. Dr. Eyer was a member of the Department of French for 24 years before his retirement in 1970.

The volume concludes with the observation concerning the anomaly that while the modern language programs began to lose their purely "service" function of their earlier years and to build their own undergraduate and graduate curricula, there appeared "a constantly accelerating movement to reduce the foreign language requirement for graduation and ultimately to eliminate it altogether."

NEWS—

(Continued from page one)

exercises Saturday (May 25). He will be the last person to receive his diploma that day.

In all, 56 men and 7 women will receive medical degrees; they are from 21 Pennsylvania counties and 10 other states. One graduate will not be present, however, and with a good excuse: he will be working as the only physician at a 25-bed hospital in a remote area of Bolivian Andes. Walter S. Kuhn and his wife, Sharon, a second-year medical student at Hershey, are working together at the hospital, and she is receiving academic credit for the work from the Hershey department of family and community medicine.

JOURNALISM ACCREDITED

The American Council on Education for Journalism has accredited a program in the School of Journalism and reaccertified two others. The broadcast news sequence was accredited and the advertising and news sequences reaccertified by the Council, which is the body designated by the National Commission on Accrediting, and

approved by the U.S. Dept. of Health, Education, and Welfare, to accredit journalism and related programs.

CREDIT UNION LOANS

On May 15, The Penn State Federal Credit Union waived the three day waiting period required by the Truth-in-Lending law by substituting a simpler note. Loans can now be approved and funds given out within one day of application.

MONDAY HOLIDAY

Monday, May 23, is the day this year for observing Memorial Day; University offices will therefore be closed that day.

GENERAL STORES

In order to take inventory, General Stores on the University Park campus, will be closed June 3-7.

MORTAR BOARD

Sixteen women have been selected, on the basis of scholarship, leadership and service, to become members of Mortar Board's local chapter. Founded in 1918, Mortar Board is the national senior women's honor society, the first and only national organization with such a purpose.

Transportation

Members of the faculty are invited to attend sessions of the International Symposium on The Effects of the Energy Shortage on Transportation Balance May 29-31 at Penn State Park campus. Those wishing to attend should contact the office of the conference organizer, Frank A. Haght, 865-1891, or the Conference Center, 865-7557.

The purpose of the Symposium is to consider how the energy shortage, in the long-term view, will affect the balance between various modes of transportation, for passengers and for freight, in urban settings or over long distances.

Among the international speakers to be heard among the 460 participants from eight countries, will be C. Kenneth Orskov, OECD, Paris, France, who will give one of the keynote talks, on "The Potential for Fuel Conservation" at the opening session Wednesday, May 29, at 9 a.m. All sessions will be held at the Conference Center.

John H. E. Taplin, of the Bureau of Transport Economics, Canberra, Australia, will talk at the same session.

WPXS program

Legalized gambling, from bingo to off track betting, is the subject of "Pennsylvania Town Meeting" Thursday, May 30, 8:00 p.m. on WPXS-TV and other member stations of the Pennsylvania Public Television Network. The two-hour program centers around legislation that would legalize various forms of gambling in the State. Included will be filmed reports on the issues, comments by guest experts, and a "town meeting" of people from many of the 168 backgrounds within the WPXS-TV viewing area.

HUB special

The H.U.B. Terrace Room has initiated daily special meals for both lunch and dinner at prices much below customary cafeteria prices. No substitutions are permitted to benefit from these reduced prices. For the next few days, the menu (all accompanied by appropriate side dishes and beverages) are:

Thursday, May 23 — lunch, apple slices w/ice cream, \$1.12; dinner, hot beef salad \$1.45.
Friday, May 24 — lunch, apple cobbler, \$1.00; dinner, shrimp cobbler w/rice \$1.45.
Saturday, May 25 — lunch, macaroni & cheese \$1.00; dinner, meatloaf \$1.39.
The Terrace Room will be closed May 26-June 1.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For more information and funding source information, call 865-1372.

May 23, 1974

(130-1) Under Its Regional Organization Program (on behalf of the Public Media Program), the National Endowment for the Arts (NEA) wants to "stimulate interest in the cinema" by furnishing matching grants to regional film centers. According to NEA, there are three purposes: (1) build new, outlying screening facilities; (2) providing research and film study; and (3) disseminating information to encourage the development of broad-based film education. Support is restricted to establish facilities that can provide facilities and overhead, have a program in operation with public showings of reasonable cost, and have access to materials and information in a study center. Grants are for up to \$25,000 maximum and must be matched. The application deadline is Aug. 15, 1974. For information, guidelines, and application forms, contact: Chloé Aaron, Director, Public Media Program, NEA, Washington, O.C. 20506 (202)382-6178.

(130-2) National Endowment for the Humanities (NEH) Development Grants provide support to bring about reform in humanities instruction. Although traditional focus for the program has been the liberal arts, development grants have been awarded to schools of engineering, medicine, and environmental relations. These units have designed humanities courses of specific interest to their professional students. Applications may be submitted for up to five years of support ranging from \$10,000 to \$250,000. For information, contact: William G. O'Neil, Director, Development Grants Program, Div. of Educ. Programs, NEH, Washington, O.C. 20506 (202)392-6955.

(130-3) Proposed regulations have been issued by the Office of Education for research and training, exemplary and curriculum development program in Vocational Education. (Vocational Education Act of 1973 — Includes technical education). Guidelines have not yet been issued as of this writing. The research and training program (Part C) includes experimental, demonstration, new curricula, and new career activities. Exemplary programs (Part B) are to create a bridge between schools and earning a living for young people who are (1) still in school, (2) have left school by graduation or otherwise, and (3) in postsecondary vocational programs. Guidance and counseling, improvement of vocational education curricula and motivational programs are among those acceptable under

this part. Promotion of cooperation between public education and manufacturing and vocational education program models are also included in exemplary programs. Curriculum Development Programs (Part I) support development of curricula for new and changing occupations and coordination of improvements in and dissemination of existing curriculum materials. The regulations have been distributed and are available (Ref. 39PFR15294, 5,272.4 and CFDA 15-498, 13,502).

(130-5) A memorandum from the National Science Foundation states: "It is these areas listed below) of basic research to which NSF's Research Opportunities program is devoted as part of the Nation's energy research and development program. Areas selected for special attention are: sensors and other colloidal phenomena; biological catalysis; chemical synthesis; chemical physics of atomic, molecular, and ionic processes; chemical transformations and processes; combustion; catalysis; electrolysis; electrical power and electromagnetic properties of materials; environmental motion-fields and transport processes; environment of fossil fuels; fission and fusion; geo-

engineering; biology, institutional, and societal responses; heat budget of the earth; heat and mass transfer; heterogeneous catalysis; homogeneous catalysis; information — the 460 participants from eight countries, will be C. Kenneth Orskov, OECD, Paris, France, who will give one of the keynote talks, on "The Potential for Fuel Conservation" at the opening session Wednesday, May 29, at 9 a.m. All sessions will be held at the Conference Center.

John H. E. Taplin, of the Bureau of Transport Economics, Canberra, Australia, will talk at the same session.

(130-6) NASA will fund analyses of lightweight vehicles, ranging from fully compliant to hybrid types, combining both static and aerodynamic lift. Economic evaluations, assessment of operational problems, institutional restraints, and environmental impacts will be considered. Ames Research Center, Moffett Field, CA 94035 and ask for Request for Proposals 2-47791, 00-92.

(130-7) Institute of International Education

tion (609 Union Nations Plaza, New York 10007) invites current juniors, seniors and graduate students to apply for study abroad in 1975-76. The application deadline is Sept. 30, 1974. Applications from racial minorities are especially sought. Information and application forms are available at the Fellowship Office, 317 Kern Grad. Bldg. NEA wants to "stimulate interest in the cinema" by furnishing matching grants to regional film centers. According to NEA, there are three purposes: (1) build new, outlying screening facilities; (2) providing research and film study; and (3) disseminating information to encourage the development of broad-based film education. Support is restricted to establish facilities that can provide facilities and overhead, have a program in operation with public showings of reasonable cost, and have access to materials and information in a study center. Grants are for up to \$25,000 maximum and must be matched. The application deadline is Aug. 15, 1974. For information, guidelines, and application forms, contact: Chloé Aaron, Director, Public Media Program, NEA, Washington, O.C. 20506 (202)382-6178.

(130-8) Graduate school grants-in-aid of tuition for fall quarter. The deadline for applications is already past. A few (8) are still unallocated by students awarded assistantships. The deadline for applications for their grants-in-aid will be July 15, 1974. Applicants should be a U.S. citizen and have a B.S. or later term at Penn State during the Fall term. Application forms are available at the Fellowship Office, 317 Kern Grad. Bldg.

PROFESSOR LIBRARY ANALYST, INTERCOLLEGE RESEARCH PROGRAMS — University Park

Responsible for the overall effective management of the Computer Center's program and Technical Library. Will acquire and install new programs, materials files, assist users, and manage reference library. Consult with research units on teaching facility, Commonwealth campuses, other universities, as well as on the availability and exchange of programs and documentation. Bachelor's degree in Computer Science or equivalent plus two to three years of related experience. Broad knowledge of programming language, computer applications, and competence in Job Control language and data management necessary. Familiarity with Library of Congress Cataloging in Publication (CIP) and Operations Supervisor, Continuing Education — University Park

Responsible to the Assistant Director for Operations and Services for the scheduling of facilities and personnel for operations and production of programs, and for supervision of lighting, set construction, and general stage supervision on a day-by-day basis. Bachelor of science or arts degree or equivalent and at least three to six years of previous experience in television production and/or stage production.

DEVELOPMENT AND TEST ENGINEER, APPLIED RESEARCH LABORATORY — University Park

Responsible for the development and field testing of complex electrical and mechanical equipment. Test and develop equipment at remote sites (other than University Park) for extended periods. Bachelor's degree in science or engineering or equivalent, plus 10 years of experience in development of undersea equipment.

FINANCIAL OFFICER — New Kensington

Responsible for financial and administrative matters pertaining to the University and campus policies and procedures. Bachelor's degree in accounting or equivalent plus at least three to four years related experience.

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Division, 685-1387 (Network Line 475-1387). Do not contact the area having the vacancy. Applications will be accepted until: 5 p.m., May 30, 1974.

COORDINATOR, EDUCATIONAL OPPORTUNITY PROGRAM —

Wilkes-Barre Campus

Assist the Director of the Educational Opportunity Program in developing, coordinating and administering the Educational Opportunity Program at the assigned campus. Bachelor's degree in a field reasonably related to Educational Opportunity Program or equivalent plus a minimum of two years related experience.

ASSISTANT SPORTS DIRECTOR, PUBLIC INFORMATION — University Park

Responsible for writing original and creative articles, features and reports on sports and related topics for writing and preparing editorial copy for brochures and programs; for coverage of athletic events on off campus; and for maintaining press book facilities. Bachelor's degree in Journalism or equivalent plus at least six months experience in related sports information experience.

DIRECTOR, CAREER DEVELOPMENT AND PLACEMENT CENTER, STUDENT AFFAIRS — University Park

Responsible for coordinating and administering the programs and services of the University Career Development and Placement Center. This includes Career Counseling Programs; providing updated materials on general and specific career information, manpower and market research, information delivery systems; Employer Relations and special information on post college opportunities. Interview scheduling and credentials services. Doctor's degree or equivalent with at least 5 years experience in the fields of college or counseling psychology, plus administrative experience in Higher Education.

PENN STATE intercom

Volume 3, Number 37

May 30, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Commencement plans, in case of rain June 1

Commencement planners seldom like the sound of the word "rain," but they plan for it nevertheless. Should there be, on June 1 at University Park, such an unlikely occurrence as a heavy rainstorm which would preclude holding ceremonies in open-air Beaver Stadium (at 10:30 a.m.), here is what the planners have arranged:

A decision to hold indoor ceremonies may be made as late as 7:30 a.m. June 1, and announcement would be made on area radio stations. (In 1972, Hurricane Agnes forced the ceremony indoors, and since many people could not reach University Park, only one ceremony was held. In that case, the decision was announced early that the change would be made. On June 1, 1957, rain forced the ceremonies into Rec Hall. These are the only two times in recent history that indoor ceremonies were required for the June commencement.)

At 10:30 a.m. in Rec Hall, Former Governor William W. Scranton will give the Commencement Address, with President Oswald presiding. Graduates of the Colleges of The Liberal Arts, Human Development, and Arts and Architecture will receive degrees. In University Auditorium, Provost Russell E. Larson will speak as College of Education majors attend. And in Schwab Auditorium candidates for advanced degrees will hear Graduate School Dean James Barlow.

At 2:30 p.m., a ceremony in Rec Hall, with President Oswald as speaker, will be held for graduates in Business Administration, Engineering, and Science. At University Auditorium, Provost Larson will speak, with College of Agriculture, Earth and Mineral Sciences, and Health, Physical Education and Recreation graduates in attendance.

About 4,100 degrees will be granted at these exercises.

JGE announces editor change

The Journal of General Education, edited and published at the University, has new editors, with the recently issued April, 1974, volume.

Dr. Robert B. Eckhardt and Dr. Caroline Eckhardt, husband and wife and members of the Penn State faculty, have assumed the post from Dr. Henry W. Sams, who remains as associate editor. Dr. Sams has edited the Journal since it transferred to the University six years ago. The University Press has published the Journal in that same period.

In the April issue, Dr. Carl G. Vaught, associate professor of philosophy, has an article, and Dr. Jo S. Searles, assistant professor of English, at the Beaver Campus, has contributed a short poem, "tic." Two former Penn State students, Nancy Esther James and James J. Sosnoski, are also represented in the volume, Nancy by a poem and Sosnoski by a book review. She is now at Westminster College (Pa.), and he is at Miami University in Ohio. Dr. Vaught's article is on "Religion as a Quest for Wholeness: Melville's Moby-Dick."

The lead article is by Dusan Soudek, M.D., associate professor at Queens University, Kingston, Ontario, on "Chromosome Variations and Human Behavior." He is also a research associate of the Ontario Mental Health Foundation.

Artists Series

May 31 is the final day on which Artists Series season ticket patrons of the past year will receive special consideration in the allocation of reserved seating for the 1974-75 season in both Schwab Auditorium and University Auditorium.

After that date, all season ticket applica-

(Continued on page two)

News in brief

HUB COMMENCEMENT

Breakfast and luncheon service at the HUS for Commencement Day, Saturday, June 1, will feature "HUB Specials." In addition to the usual breakfast and luncheon items. The breakfast special will include two eggs, toast, pot of coffee, and a doughnut, for 65 cents. The luncheon special will be ham steak with appropriate vegetables and salad, plus usual accompaniments for \$1.89. Breakfast service will be from 8 a.m. to 10:30 a.m.; luncheon service will be from 10:30 a.m. to 1:15 p.m.

GENERAL STOCK FORMS

Departments and colleges which still have on hand, and use, requisition forms for General Stock dated prior to 4/71 (lower left-hand corner of form) should return those forms to General Stock, which will then send newer forms. A change in procedures makes the old forms obsolete.

LECTURE IN POLAND

Dr. Bruce H. Barnes, associate professor of computer science, will lecture in War-

saw, Poland, next week at the Stefan Banach International Mathematical Centre. He will be one of ten international experts, each a specialist in his field, giving lectures on the mathematical foundations of computer science. He will be in Warsaw June 1-10. A grant from the National Science Foundation is providing partial aid.

WINS CONTEST

Clarence E. Craver, McKean County agricultural agent, was declared a state winner of the seventh annual Public Information Awards Contest, which is sponsored by the National Association of County Agricultural Agents. His entry, judged best among 48 submissions, was a 12-minute taped radio program.

CONFERENCE TALK

Dr. Edward K. Kraybill, director of the Worthington Scranton Campus, will speak at the 1974 International Conference on Frontiers in Education July 15 through 19 at City University, London, England. Dr. Kraybill's talk, "Engineering Student Retention — Inadvertent or Planned?" concerns a nationwide project to seek causes for baccalaureate students remaining in or leaving engineering programs. The Inter-

national conference, conducted by the Institute of Electrical and Electronics Engineers, aims to increase understanding of the role of educational technology through exposition and discussion of its applications, scope and potential, with particular reference to engineering education and training.

CARPENTER TO HAWAII

Dr. C. Ray Carpenter, research professor emeritus of psychology and anthropology who served on the faculty from 1939 until retirement in 1970, is continuing professional work. Starting July 1 he will serve as visiting researcher with the East-West Communication Institute at the East-West Center, Honolulu.

Dr. Ray, professor of geochemistry and director of the Materleis Research Laboratory in 1962, Dr. Carpenter remained active as research professor of psychology and anthropology at the University of Georgia (Athens). In his new position, he will participate in a technology and instruction project of the developmental communication subdivision of the Communication Institute's program, concentrating on innovation and studies of excellence in technology and instruction.

(Continued on page two)

Service Awards in Engineering and EMS

Virgil E. Neilly (left), who as associate professor of engineering works in the office of Dean N. J. Palladino, didn't have far to go to receive his 25-Year Service Award plaque and Penn State chair from the dean. A native of Illinois who was graduated from high school in Kentucky, Neilly earned a bachelor's degree in electrical engineering at Penn State in 1949, and shortly thereafter he joined the Engineering Extension staff as instructor. While a student he was active in the Symphony Orchestra, the Glee Club, Varsity Quartet, Blue Band, and Thespian, in addition to the professional society, A.S.E.E. In addition to the obvious interest in music he has also been a "ham" for many years (W3LNV), and through that interest has many friends in Latin America. Neilly is secretary of the Industrial and Professional Advisory Council of the College of Engineering, which provides direct communication between the engineering faculty and engineering personnel from industry, government agencies and private practice.

At College of Earth and Mineral Sciences Honors Day activities recently, Dean Charles L. Hooser (left) presented 25-Year Service Award plaques to Dr. William Spackman, Rustum Roy, and Harold L. Lovell. Dr. Spackman, professor of paleontology and director of the Coal Research Section, was the subject of an INTERCOM in-depth story in the Nov. 1, 1973 issue, in which it was pointed out that his research in coal petrology is widely known. Locally he has been president of the Board of Trustees of Center Community Hospital, during a period of great expansion. Dr. Roy, professor of geochemistry and director of the Materleis Research Laboratory, began his career on the faculty in 1950, but previously he had been a doctoral student here for two years as a Government of India Overseas Scholar, and then he worked here as a postdoctoral fellow in the department of mineralogy for a year. He returned to his native India as the senior scientific officer of the National Cosmic Research Institute, before coming back to Penn State to stay in 1950. He was named director of the Materleis Research Laboratory in 1962. From his research and that of other members of MRL have come many research papers, awards and honors. Dr. Lovell, professor of mineral engineering and director of the Mine Drainage Research Section, is a Penn State-trained scientist, receiving degrees in chemistry before earning the Ph.D. in fuel technology in 1952. As early as 1944 he was a research assistant in the Metallurgical Research Institute, before coming back to Penn State to stay in 1950. He was named director of the Materleis Research Laboratory in 1962. From his research and that of other members of MRL have come many research papers, awards and honors. Dr. Lovell, professor of mineral engineering and director of the Mine Drainage Research Section, is a Penn State-trained scientist, receiving degrees in chemistry before earning the Ph.D. in fuel technology in 1952. As early as 1944 he was a research assistant in the Metallurgical Research Institute, before coming back to Penn State to stay in 1950. He was named director of the Materleis Research Laboratory in 1962. From his research and that of other members of MRL have come many research papers, awards and honors. Dr. Lovell, professor of mineral engineering and director of the Mine Drainage Research Section, is a Penn State-trained scientist, receiving degrees in chemistry before earning the Ph.D. in fuel technology in 1952. As early as 1944 he was a research assistant in the Metallurgical Research Institute, before coming back to Penn State to stay in 1950. He was named director of the Materleis Research Laboratory in 1962. From his research and that of other members of MRL have come many research papers, awards and honors.

HONORS

Ralph H. Wherry, William Elliott Professor Emeritus of Life Insurance, was honored by the College of Business Administration recently in the presentation of the 1973-74 Alumni Awards. The other award went to Richard A. Zimmerman, president of Cory Corporation. Since his retirement in 1970 after serving for 23 years on the faculty, Wherry has taught part time at the University of South Florida and served as executive consultant on advanced training and education to the Philadelphia Life Insurance Co.

Dr. Thomas M. York, associate professor of aerospace engineering, has been named Outstanding Faculty Adviser in the College of Engineering. He received the award, which includes a certificate and a \$500 stipend, at the College's 13th annual Honors Day luncheon. The award recognizes superior guidance and counseling and the recipient is chosen from student recommendations. Dr. York received the bachelor of science and master of science degrees in aerospace engineering from the University and the doctor of philosophy degree from Princeton University. He joined the Penn State faculty in 1959.

Dr. Nelson A. Chagnon, associate professor of anthropology, has won first place honors in the anthropology and ethnography category of the American Film Festival for his documentary film, "Magical

Death," which deals with the Yanomamo Indians of Brazil and Venezuela. The festival was held May 14-18 in New York.

At the 1972 American Film Festival, two other films for which Dr. Chagnon was co-producer and co-director won prizes: "The Feast" won a first place award and "Yanomamo: A Multidisciplinary Study," gained second place laurels, both in the educational films category.

In all, Dr. Chagnon has spent 36 months of field work with the Yanomamo, a recently-contacted tribe numbering between 10,000 and 15,000. His first contact was in November, 1964. To February, 1966, and from that work in Southern Venezuela came his doctoral dissertation, "Yanomamo Warfare, Social Organization and Marriage Alliances." He returned for three months in 1967, and in 1968-72 he spent several months each year continuing his field work.

"Magical Death" concerns the interrelationship of religion, politics, and the use of hallucinogenic snuff in shamanism.

The film is available from Audio-Visual Services and is part of the Psychological Cinema Register. It may be obtained from AVS by calling 865-6317.

IN WRITING

Dr. Frank Swetz, assistant professor of mathematics at Capitol Campus, is author of "Mathematics Education in China," published by the Massachusetts Institute of

Technology Press, Cambridge, Mass. The book resulted from three years of research by Dr. Swetz, with the aid of a grant from the East Asian Institute at Columbia University. It is a detailed study of the growth of math education in China, from 1860 to 1970, with particular concern for the developments initiated by the Communist state. Dr. Swetz served with the Peace Corps and traveled widely through Asia. He is a lecturer with the National Committee on U.S.-China Relations, Inc. He has been at Capitol Campus since 1969, with research interests in education and developing nations.

"Richard Olney, Evolution of a Statesman," by Dr. Gerald G. Eggert, professor of American history, has been published by the University Press. The volume is a biography of a controversial cabinet officer who served as Attorney General under President Grover Cleveland, in 1893-95. In addition to problems of the Pullman Strike, Coxey's Army of unemployed, and the struggle over the gold standard, Olney was responsible for the Government's case in three Supreme Court decisions of importance: the Sugar Trust case, the Income Tax cases, and the Eugene V. Debs Case. In 1895, Cleveland appointed Olney to the post of Secretary of State, and immediately he became involved in the boundary dispute between Venezuela and British Guiana. What followed had much to do with strengthening the Monroe Doctrine.

PARTICLE SIZE COURSE

A three-day short course will be offered by the Mineral Processing Section of the Department of Material Sciences July 16-18 on the subject of "Particle Size Analysis," in which the principal lecturer will be Dr. Richard Hogg, of the mineral processing sector. Other faculty members are Dr. G. Austin, Dr. F. F. Aplan, and Dr. R. H. White, all of Penn State, and Dr. B. H. Kaye, director of the Fine Particles Research Institute, Laurentian University, Sudbury, Ontario, Canada. Expected to attend are engineers and scientists concerned with the characterization of particulate materials.

are available. (Ref. 39FR15484, 5/7/74).

(31-4) The Health Maintenance Organizations (HMO) sponsored by the Public Health Service (PHS), in addition to providing federal financial assistance for establishing health maintenance organizations, furnishes grants and contracts for feasibility surveys and for planning and initial development costs. These grants are provided to qualified organizations which are or propose to become health maintenance organizations. The grants have been distributed. Copies are available. (Ref. 39FR 16421, 5/8/74).

(31-5) The Office of Education (OE) has issued criteria for selection of applications in FY1974 for Projects in Research, Teacher Education and Learning Disabilities. Projects include research on the handicapped, training personnel who will educate the handicapped, and specific learning disabilities projects which propose creative approaches that meet educational needs of children and identify and prevent learning disabilities. The criteria have been distributed. Copies are available. (Ref. 39FR15519, 5/7/74).

(31-6) The Office of Education (OE) has issued proposed guidelines for its programs of Financial Assistance for Community Service and Continuing Education. The original State grant part of the program strengthened the community service programs of colleges and universities in rural and suburban areas including housing, poverty, government, recreation, employment, youth opportunities, transportation, health, and land use. The second part of the program strengthened academic institutions in carrying out special programs and projects which seek solutions to national and regional problems relating to technological and social development. The program is authorized by PL 92-318. In the discretionary program is money to fund projects that involve innovative methods, systems, or materials; cooperative projects; and demonstrations of educational strategies. Proposed guidelines have been distributed. More are available. The program contact is: Community Service and Continuing Education Program, U.S. Office of Education, Washington, D.C. 20202 (Ref. 39FR15951, 5/6/74).

COMPUTER OPERATOR, UNIVERSITY LIBRARIES — University Park

Responsible for preparing the computer program processing and for the satisfactory completion of each scheduled computer operation. High School graduate or equivalent with operators training in basic computer systems, equivalent to two years of college, plus one to two years of experience in computer operation.

AREA REPRESENTATIVE, CONTINUING EDUCATION — McKeesport

Responsible for the functions of development, organization, operation and administration of Continuing Education programs and services within an assigned territory. Bachelor's degree or equivalent with three to four years of experience in business, industry or education.

RESIDENT AREA COORDINATOR, STUDENT AFFAIRS — Behrend College

Responsible for assisting in carrying out the missions of the office of Student Affairs. Bachelor's degree or equivalent with three to four years of experience in the field. Resident Hall Program. Masters degree in college student personnel or equivalent with one to two years of related experience.

Calendar

SPECIAL EVENTS

Saturday, June 1 — Spring Term Commencement at University Park campus, 10:30 a.m. Beaver Stadium. In case of rain, ceremonies in University Auditorium, Rec Hall, and Schwab Auditorium at 10:30 a.m. and in Rec Hall and University Auditorium at 2:30 p.m. Speakers at 10:30 a.m. in Rec Hall, Former Governor William W. Scranton. Saturday, June 2 — R.O.C.T. Commissioning exercises, 8 a.m. Music Bldg. Rec Hall. Speaker, Dr. Robert E. Dunham, vice president for undergraduate studies. Sunday, June 3 — New students arrive for Summer Term.

EXHIBITS

Museum of Art — Gallery C, Quilts, from collection of Miriam Tuska, Lexington, Ky.

Heart program

The Third Heart Risk Screening Program of the current year will be held Tuesday and Wednesday, June 11-12, in Room 301 Agricultural Administration Bldg. The first two programs were extremely successful from the standpoint of the number examined, according to the Penn State Heart Association, which is responsible for the examinations. The College of Health, Physical Education and Recreation and Continuing Education are cooperating in the program.

Appointments for the examination may be made by calling the Association office, 238-1301.

The examination is used to indicate whether the person should consider a special heart program to reduce the risk of heart disease.

WPSX program

Pennsylvania Auditor General Casey is featured in a half-hour conversation on "People, Places, Things, Now" Friday, May 31, at 7:30 p.m. on WPSX-TV, Channel 3. Casey will discuss his responsibilities as auditor general and what role the auditor general plays in the operation of State government. Casey will also answer a variety of questions from newsmen.

A gallery of unusual video works by thirty artists exploring video as a new means of communication is presented in "Video: The New Wave" Monday, June 3, at 8:00 p.m. on Channel 3. The program is described as a "celebration of the video revolution" in which every man becomes his own cameraman, producer, and director. Art critic Brian O'Doherty introduces and narrates the hour-long special.

Raymond Pace, assistant professor of music at Penn State, performs in a half-hour "Music at Penn State" concert Monday, June 3, at 8:30 p.m. Tuesday, June 4, at 8:00 p.m. on WPSX-TV. On the program, Pace and assistant professor of music June Miller perform J. S. Bach's Sonata No. 5 for violin and harpsichord. Pace also plays Max Regers Suite No. 1 for two violas. Both works are in four movements.

"Nourish the Beast," Steve Teitel's riotous comedy about the predicaments of a very unusual family, is featured on "Hollywood Television Theatre" Wednesday, June 5, at 8:30 p.m. on WPSX-TV. Elliott Brennan stars as Goya, the life-assuming matriarch who adopts new children the day grown ones leave and who advertises for replacements when old husbands die.

ARTISTS —

(Continued from page one)

tions will be handled on a first-come, first-served basis. Tickets for individual events will not be sold until a few days before the event, even though seats in both Schwab and University Auditorium will be reserved.

There are three live-performance series and three film series; the season's program will also include some special events, for which only individual-event tickets will be sold.

In University Auditorium, the Music Series and the Theatre-Dance Series are available in season tickets for each series. In Schwab Auditorium includes six events, emphasizing music but including a performance by the National Theatre of the Deaf.

A brochure explaining the various ticket plans and the complete program is available from the Artists Series, Room 202 Schwab, if you have not already received one in a campus mailing.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For procedural and funding source information, call 865-1372.

May 30, 1974

(310-4) NSF's Materials and Instruction Development (MID) (College) Program encourages science and college educators to organize projects for the improvement of pre-college education in mathematics, the sciences (physical, biological, and earth), and social sciences including the history and philosophy of science. High priority will be given to proposals for development of materials that relate science and environmental and societal problems. MID will consider proposals for projects in science literacy at the elementary and secondary levels and projects leading to careers in science and technology at the secondary level. Special Interest includes: projects for a broad ability range of students, interdisciplinary in the social sciences, innovative educational technologies, and experimentation with new structures and procedures in science education. There are no formal deadlines. Format proposals require four to six months for decision. (Ref. NSF 6-75-3).

(31-1) The Health Services and Mental Health Administration (HSMHA) DHEW supports a Child Health Research Grants Program. Research funds will be awarded to projects dealing with maternal and child health services or crippled children's services that substantially contribute to the advancement of such services. Grants are made to institutions and individuals. Priority grants range in amounts from \$15,000 to \$450,000, averaging \$95,000. Some program accomplishments include health status and services for mothers and children in urban and rural communities, new approaches to maternal health services, increasing the effectiveness of child health programs, evaluation of costs and program effectiveness, nutrition, and services for teenage parents. The next two deadlines for application are Aug. 1 and Dec. 1.

1974. Program contact is: Mrs. Gloria Wackernah, Grants Mgmt. Officer, Maternal and Child Health Service, HSMHA, Room 12A08, 5600 Fishers Lane, Rockville, MD 20852 (202)443-2190 (Ref. CFDA 13-232).

(31-2) The National Institute of Health (NIH) has released proposed rules for Inter-professional Health Services Schools of Medicine, delivery, osteopathy, nursing, training centers for allied health professionals, and other emergency medicine services training programs including ambulance services. The information is to be given in FY1974 to programs stressing a team approach to the delivery of emergency medical services and the establishment and operation of programs that would provide a regional resource for the training of one or more classifications of emergency medical personnel (Ref. 39FR15151, 5/7/74). Proposed regulations were released earlier (Ref. 39FR 15011, 4/29/74). This information has been distributed and is available.

(31-3) The National Institute of Education (NIE) has published rules and regulations for its Research Grants Program. Program goals are: (1) to make educational programs more effective in meeting the needs of persons from low-income families and minority communities; (2) to increase the effectiveness of educational resources; so that individuals and society can better afford high quality education; and (3) to improve the quality of educational resources. Research includes: activities designed to increase or synthesize basic knowledge of processes and conditions relevant to human learning and education or providing answers to important questions concerning actual or possible conduct of education in this country. Applicants are requested to first submit a prospectus for initial review. Full proposals will be invited for evaluation. These rules and regulations have been distributed and include a prospectus format. Copies

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Office 238-1387 (ext. 145-1387). Do not contact the department directly for the vacancy. Applications will be accepted until: \$300 pm, June 13, 1974.

SENIOR SYSTEMS PROGRAMMER, UNIVERSITY LIBRARIES — University Park

Responsible for providing direction and assistance in the systems programming group. Responsible for participation in evaluation, development and implementation of projects, undertaken for the Library Information Access System. Bachelor's degree in computer science or equivalent. Systems programming experience must be in a time-share environment on state-of-the-art computer hardware. Demonstrated supervisory abilities are desired.

PENN STATE intercom

Volume 3, Number 38

June 6, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Board approves TIAA retirement plan

The Board of Trustees of the University has accepted a recommendation from the University administration to establish an alternate retirement program to the State Employees' Retirement System (SERS) program currently available to regular, full-time faculty and staff members.

This recommendation was made possible with the passage of Act 31 of the Pennsylvania Legislature on March 1, 1974, which changed the State Employees' Retirement Code to permit the establishment of an alternate retirement system at the University.

It was also recommended and approved by the Board to designate the retirement program provided by the Teachers Insurance and Annuity Association of New York (TIAA) as the optional alternate plan.

Robert A. Patterson, senior vice president for finance and operations, in making the recommendation, said that the University will move to establish the alternate plan effective September 1, 1974. He also said that complete information describing both systems will be distributed to all eligible faculty and staff members prior to the effective date to help them decide on the plan of their choice.

According to Mr. Patterson, current employees will be given a nine-month period commencing with September 1 to make their

choice. New faculty and staff hired after September 1 will be required to make their choice within the first thirty days of their employment. No one will be permitted to enroll in both programs, however.

Mr. Patterson added that the choice of TIAA as the alternate retirement program was due in part to the overwhelming acceptance of this organization at other educational institutions. Currently, there are some 420,000 TIAA annuity owners in nearly 2,800 colleges and universities.

In the development of the alternate program, Mr. Patterson worked in close cooperation with the subcommittee on Fringe Benefits of the Committee on Faculty Affairs of the University Faculty Senate. Dr. Donald C. Rung is chairman of the subcommittee.

Faculty and staff members who choose to join TIAA will also have the option of participating in a companion organization, the College Retirement Equity Fund (CREF), which provides a variable annuity component based on CREF's investments in the stock market.

The addition to the University's employee benefits, Mr. Patterson said, gives greater flexibility to retirement planning.

Program of chairs, professorships, fellows approved

Trustees of the University have approved the establishment of chairs, professorships, and faculty fellows to be supported by special grants from benefactors as a means to give special recognition and support to distinguished faculty members of the University.

Appointments to all three positions will be made by the president upon recommendation of the dean of the appropriate College.

"The program provides a means for interested benefactors to support and help to enrich the academic program of the University and provides distinguished scholars with opportunities to make even more outstanding contributions in teaching, research, and public service," says President Oswald.

The funds, which in the case of the professorships and fellows will require supplemental support from the department of the faculty member designated, will provide, in addition to the faculty member's salary, support in such areas as graduate student salaries, secretarial assistance, and travel expenses.

Designated titles, in all cases, will include the name of the benefactor, which may be an individual or an interested company. Faculty members designated will hold the title until their retirement or the termination of their employment, contingent on the continuing support, in the case of the professorships and the fellows, of the benefactor.

Schein elected president of Faculty Club

Dr. Richard D. Schein was re-elected president of the Penn State Faculty Club in a recently-completed mail ballot, and other officers were elected, including:

Vice president, Donald R. Olson
Secretary, Robert L. Clewett
Treasurer, G. Edward Phillips
Directors-at-large, Peter D. Bennett, Ralph W. Condee, Marjorie East, Ross B. Lehman, Arthur O. Lewis, Jr., Robert F. Lima, Jr., Thomas F. Magner, and R. William Millman.

All positions, except those of secretary and treasurer who serve two-year terms, have terms of one year, beginning Sept. 1.

Lindback awards go to Goldberg, Guber

Dr. Stella R. Goldberg, associate professor of child development, and Dr. Albert L. Guber, associate professor of geology, were honored at Commencement Exercises last Saturday in receiving the Christian R. and Mary F. Lindback Awards for Distinguished Teaching.

Each received a plaque and check for \$1,000.

Dr. Goldberg, a graduate of New York University with bachelor of science and master of arts degrees, received her doctorate in child development and family relations from Columbia University.

She joined the Penn State faculty in 1953 as assistant professor of child development and family relations and was promoted to the rank of associate professor in 1968.

A leader in experimentation with teaching methods, Dr. Goldberg was the first faculty member in the College of Human Development to teach successfully using live television. Each summer she has offered a workshop devoted to teaching family relations at the secondary level.

Previous recognition of her teaching excellence has come at both the national and local level.

In 1969 Dr. Goldberg was designated "Adviser of the Year" by students in the College of Human Development, and in 1972 she received the Ernest G. Osborne Award of the National Council of Family

Relationships for distinguished teaching in the area of family studies.

A graduate of the University of Pittsburgh with a bachelor of science degree in geology, Dr. Guber received his doctor of philosophy degree in geology from the University of Illinois. He joined the Penn State faculty in 1963 as assistant professor of geology and immediately developed a new introductory paleontology course.

Dr. Guber was one of the primary or-

Dr. A. L. Guber

Dr. Stella Goldberg receives congratulations of President Oswald.

ganizers of an experimental course for geological science majors and served as faculty adviser to a National Science Foundation-supported Student Originated Studies investigation of acid mine drainage.

He is director and principal instructor in the highly successful Marine Sciences Field Studies Program, an inter-disciplinary and inter-College program which has been offered by Penn State each spring since 1972 at Wallops Island, Va.

Annual trustee election held

Walter J. Conti, of Doylestown, has been elected to a three-year term on the University's Board of Trustees, succeeding Frederick J. Close II, of North Madison, O., who has been serving on the Board since 1968.

Alumni, in balloting conducted by mail, also elected to the Board two incumbents, Ralph D. Hetzel, Jr., of Kent, O., and Ridge Riley, of Boalsburg.

Delegates of industrial and agricultural societies re-elected four incumbents: H. Thomas Halliwell, Jr., of Jenkintown; John L. Romig, of Kennett Square; John M. Phillips, of North East; and J. Lin Huber, of St. Thomas. All terms are for three years. Conti is owner and operator of Conti's Cross Keys Inn, Doylestown, and is a past president of the Pennsylvania Restaurant

Association.

Hetzel, dean of the College of Fine and Professional Arts and professor of art at Kent State University, has been a board member since 1956, while Riley, who retired in 1970 as executive director of the Penn State Alumni Association, is completing his first term.

Halliwell, chairman of the board of Standard Presses Steel Co., has been a member of the board since 1950, serving three terms as vice president. Romig, retired manager of Quarry and Mining Industry, Atlas Chemical Industries, Wilmington, Del., served as an alumni-elected member from 1960 to 1969 and was first elected by Industrial delegates in 1971. Phillips, a fruit grower, has been a board member since 1968 as has Huber, a dairy farmer.

R. M. Smith assistant provost

Dr. Robert M. Smith, professor of special education, has been named to the newly created position of assistant provost.

The position was established in the Office of the Provost to provide administrative support in matters involving faculty, academic programs, and the administration of various academic units of the University.

Dr. Russell E. Larson, provost, says that Dr. Smith will assist with coordinating, supervising and monitoring such activities as academic policy, procedures and program analysis, and advancing program and personnel effectiveness and efficiency in instruction, research, public service and scholarly achievement.

He also will be concerned with faculty welfare, rights and responsibilities, and

with studies to promote and foster excellence in the academic programs of the University.

Dr. Smith has been a member of the faculty since 1967. He had previously taught at the University of Pittsburgh, the University of Florida, and the University of Illinois.

A graduate of the University of Maryland with a bachelor of science degree in industrial education, he received his master of education and doctor of education degrees, both in special education, from the University of Illinois.

During the 1973-74 academic year, he served at Penn State as a Fellow in the Academic Administration Internship Program of the American Council on Education.

DEATH

Russell Cooper Miller, professor emeritus of animal industry and nutrition, died May 31 in Corning, N.Y. Dr. Cooper, who graduated from Penn State in 1922, obtained his doctorate from Cornell University in 1926 and joined Penn State's faculty the same year. He retired in 1965, after service as head of the Division of Animal Science and Industry.

HONORS

Charles E. Boughton, instructor in physical education at the Wilkes-Barre Campus, has received the 7th Annual Hayfield Award, which is sponsored by the Student Government Association of the Campus in recognition of exceptional academic performance and contribution to the co-curricular environment at the Campus. SGA designates the recipient as the outstanding faculty member for the academic year.

Dr. Sheldon R. Gelman, assistant professor of sociology, has received the Rosemary F. Dywlad International Award of the National Association for Retarded Children, and he will use the grant to study the interrelation between consumer organizations and government officials in

terms of service delivery for the retarded in Norway and England this summer.

Dr. Helen Wise, member of the Board of Trustees, has been named Distinguished Alumni of Delta Sigma Rho-Tau Kappa Alpha.

The announcement was made at the recent National Conference of DSR-TKA at the University of Massachusetts. Delta Sigma Rho-Tau Kappa Alpha, National Honorary Fraternity in Forensics, confers Distinguished Alumni status to members of DSR-TKA whose personal and professional life merit the highest recognition of the society.

As an undergraduate at the University, Dr. Wise was active in the debate and forensic program; as recognition of high scholastic standing and participation in forensics she was invited into membership in Delta Sigma Rho-Tau Kappa Alpha.

RETIREMENTS

Dr. Albert S. Hunter, member of the faculty since 1957, will retire on July 1 as professor of soil fertility. Throughout his career his chief interests have been in soil fertility, soil moisture, and crop management. He worked with the agronomic problems of guayule in California and Tex-

as for the U.S. Department of Agriculture; with soil fertility as related to nutritional values of crops at the U.S. Plant, Soil, and Nutrition Laboratory at Cornell University; with the fertilizer needs for irrigated crops and dryland wheat in eastern Oregon; and with soil fertility and liming problems of Pennsylvania crops and soils. On sabbatical leave from the University in 1965-66, he served with the IRI Research Institute at Recife in northeast Brazil as specialist in soil fertility, under the U.S. Agency for International Development. In 1972-73 he was in Castelar, Buenos Aires, Argentina on a Penn State AID project, teaching soil chemistry, plant nutrition, and soil-plant relations in the Graduate School of Agricultural Sciences. A native of Worthington, Ind., he engaged in farming in Missouri and Idaho for ten years following his graduation from high school in Bell City, Mo., in 1925. In 1934 he entered Utah State University, where he earned the bachelor of science degree in chemistry. He received the master of science degree from Washington State University and the doctor of philosophy from Rutgers University.

Orvel A. Schmidt, associate professor of forestry, retired June 1 after serving on the faculty for 28 years. In addition to his teaching and research, he served as administrative assistant to the director of

Penn State's School of Forest Resources, and as co-director of the administrative management program for natural resource managers. He developed and conducted a number of short courses in sawmill operations and lumber grading and is the author of a correspondence course on small woodlot management. He is the author of a series of papers on the sawmills of the northeastern United States and of a number of papers on forest drainage structures and methods and results of preservation treatments. In 1959 in Panama and in 1960 in Chile, he served as consultant on lumbering problems through the International Cooperation Administration of the Department of State. He studied lumbering and forestry utilization at the University of Freiburg, Germany, while on sabbatical leave in 1959. Later he spent three months studying lumbering and manufacturing problems on the west coast of the United States and in Taiwan, and in 1966 he was a special consultant in lumber manufacture and sawmill problems in Bolivia under the auspices of the Council for International Progress in Management. A native of Shawano County, Wisc., Professor Schmidt studied at the University of Wisconsin and earned both the bachelor of science in forestry and the master of forestry degrees at the University of Michigan.

Service Awards

Two County Agricultural Agents of the Cooperative Extension Service received 25-Year Service Awards recently. Amos Zimmerman (seated in left photo) and Harold E. Stewart (seated right).

Zimmerman, who has been in Union County since 1954 full time, and county agent since 1966, began his Extension service as an assistant in Cambria County in 1949 and following military service was assigned to both Snyder and Union Counties. Stewart has been Dauphin County agent since 1959, serving for seven years as assistant in the same county before that and in Carbon and Monroe Counties from 1949 to 1952.

With Zimmerman are College of Agriculture Dean James M. Quattle, assistant Extension director Frank S. Zeile; and associate Dean Thomas B. King. Dr. Beutler and Dr. King are with Stewart.

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Division, 865-1387 (Network Line 45-1387). Do not contact the area having the vacancy. Applications will be accepted until: 8:00 p.m., June 13, 1974.

ASSOCIATE HOSPITAL DIRECTOR — Hershey Medical Center — University Park

Responsible to the Charge Nurse Dispensary for assailing physicians by providing nursing services and administering emergency treatment. Registered nurse with one to two years nursing experience.

Responsible for the administration, implementation and coordination of various departments of the Teaching Hospital, particularly in the areas of planning, staffing, budgeting and controlling of various programs. Degree in health care administration, or its equivalent, with four to seven years related experience as Assistant Hospital Administrator.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For procedural and funding source information, call 865-1372.

June 6, 1974

(NEA-1) The National Endowment for the Arts (NEA) has issued FY1975 guidelines for its **Literature and Environmental Arts Program**, 39FR17137, 5/13/74. One of twelve NEA program areas, this program supports research, program development, and exploratory design studies. The categories of funding are: **Public Education and Awareness program**—deadline July 1, 1974 (see May 9 INTERCOM #120-3); **Assistance to State Art Agencies**—deadline July 1, 1974; and **Academic and Professional Research Grants, Design Fellowships, and Services to the Field**—deadline Jan. 6, 1975. There will be no National Theme Program for FY1975. Program contact is Bill N. Levy, Director, Architecture & Environmental Arts Program, NEA, Washington, O.C. 20506 (202)382-6557.

(ISC-2) The Office of Education (OE) has issued rules and regulations for **Grants for Training in Librarianship** (Ref. 39FR17540, 5/17/74). In-state grants, fellowship grants and training grants will be funded through institutions which have established a graduate or undergraduate library program. Participant eligibility includes para-professionals. Minority, economically deprived, and handicapped training and retaining receives high priority. The stress is on the retaining of professional librarians, training of teachers of library science, and training of administrative and supervisory personnel. Rules and regulations have also been issued for **Library Research and Demonstration Grants** (Ref. 39FR17545, 5/17/74) relating to the improvement of libraries or of training in

librarianship including new techniques, systems, and equipment for processing, storing, and distributing information and for disseminating the information derived from the research. Special consideration will be given to proposals dealing with the total informational, educational, and cultural resources of communities and organizations. The aim of proposals is to develop new personnel, or to service to underemployed, undereducated, or culturally isolated groups. Studies will also be supported.

(ISC-3) The Office of Education (OE) has issued final rules and regulations (guidelines) for its program of **Financial Assistance for Environmental Education Projects**. Grants and contracts will be authorized to support research, demonstration, and pilot projects designed to educate the public on the problems of environmental quality and ecological balance. Projects support the development of educational processes dealing with man's relationship with his natural and man-made surroundings. Major areas of concern are: population, pollution, resource allocation and depletion, conservation, transportation, technology, and urban and rural planning to the total human environment. Emphasis is on the development of skills and insights to understand the structure, requirements, and impact within and among various environmental entities, systems, and subsystems. Some areas of particular interest are: impact of inventories, human settlements, food production, implications of selected inter-related human life support activities, and the water, energy, and resource utilization. (Feb. 14 INTERCOM #161: for details). (Ref. 39FR17842, 5/21/74).

RESEARCH AID (POULTRY SCIENCE), AGRICULTURE — University Park
Responsible for conducting research by performing biochemical analyses upon various animal tissue, tissue fractions, and body fluids. Collect tissues and body fluids and prepare samples for analysis. Conduct *in vitro* experiments on the metabolism and radioactive substrates by subcellular tissue fractions. Summarize and report the results. Prepare histological sections of selected tissues for microscopic examination. Bachelor of Science, preferably in Chemistry or Biochemistry or equivalent with one to two years laboratory experience.

RESEARCH AID, DAIRY SCIENCE — University Park
Responsible to the professor of dairy science for the collection of semen, the recording of body weight and sexual behavior, and the preparation and adjustment of individual feeding schedules for experimental cattle. Bachelor of Science degree in animal industry, animal or dairy science, or related areas, or its equivalent, plus over one year of experience with the management and feeding of cattle.

(ISC-4) The National Institute of Education (NIE) has recently re-emphasized its funding source mechanisms used to establish NIE funding opportunities: (1) **Requests for Proposals (RFP)** are released through the Commerce Business Daily for quick-response program needs. The Federal Register is also used to establish priorities and announce special programs; (2) **Unsolicited Proposals** are accepted at any time; (3) **Research Grants Program** of direct research is at present on an annual submission basis with a Jan. deadline. Plans call for an eventual semi-annual submission for this program; (4) The last mechanism that has been stressed is personal contact by the potential investigator with agency program officials. Contact information for this purpose is available for NIE and for other agencies.

HUB specials for June 9-15

The Hub Terrace Room serves daily special meals for both lunch and dinner at prices much below customary cafeteria prices a la carte. No substitutions are permitted to benefit from these reduced prices, which include appropriate side dishes and beverages.

Sunday, June 9 — lunch, baked ham w/sauce, \$1.65; supper, Welsh rabbit w/tea, \$1.15.
Monday, June 10 — lunch, grilled beef steak, \$9.99; dinner, platters beef w/steak, \$14.99.
Tuesday, June 11 — lunch, grilled beef steak w/sauce, \$10.99; dinner, franks and kraut, \$5.99.
Wednesday, June 12 — lunch, meat pineapple, \$11.11; dinner, turkey a la king, \$15.99.
Thursday, June 13 — lunch, apple trifles w/bac, \$11.11; dinner, hot beef sandwich, \$14.41.
Friday, June 14 — lunch, egg cutlet/salad, \$8.99; dinner, shrimp cocktail, \$14.99.
Saturday, June 15 — lunch, macaroni & cheese, \$8.11; dinner, meatloaf, \$13.99.

Calendar SPECIAL EVENTS

Sunday, June 9 — Arrival Day for new students.

Monday-Tuesday, June 10-11 — Orientation, advising, and registration for Summer Term.

Wednesday, June 12 — Classes begin at 8 a.m.

Wednesday, June 12 — Commonsplace Theatre, Room 112 Kern, 8 and 10 p.m. "The Wild Ones."

Friday, June 14 — Commonsplace College house, 8 p.m., Room 102 Kern. Entertainment by Lottman.

Friday-Sunday, June 14-16 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Five Easy Pieces."

Sunday, June 16 — Interlândia Folk Dance Club dance, 7:30 p.m., HUB ballroom.

EXHIBITS

Museum of Art — Quilts, Gallery B, continuing until June 30.
Kern Gallery — Anthropology Dept. exhibition through June. Black and White Photography by Patty Carroll, until June 15.
Opening June 16, oils and sculpture by La Vern Grant.

Funds approved

A recommendation by the Board of Directors of the Penn State Foundation for the allocation of \$30,000 in undergraduate funds to the University Fund has been approved by the Trustees.

The sum of \$15,000 has been allocated for the support of an artist in residence for one month each year for a five-year period in the Department of Art.

Funds of \$5,000 will be used to collect, analyze, and prepare for publication folklore and folklife elements found specifically in Union, Snyder, and Centre Counties of Pennsylvania.

Funds of \$1,500 will be used for the publication of 1,000 copies of an annotated catalog of audio tapes in the Pattee Library which represent recorded voices and events of importance in Penn State's history.

The sum of \$3,000 will be used to support the production of "Fifty Years of Surrealism," a program-catalog for the national conference on Surrealism to be held at the University marking the 50th anniversary of the Surrealist Manifesto.

Another \$3,000 has been allocated to the publication of the manuscript, "Hans Holbein as An Artist," by Francis E. Hyslop, Jr., professor of art history.

Under Student Aid, the Trustees approved \$50,000 for Alumni Memorial Scholarships, \$10,000 for an emergency loan fund for international students; and \$5,000 for funding to help the various Campuses of the University to undertake recognition of the recipients of scholarships from the Bay Area and Ethel M. Kunkle Scholarship Funds. Allocation of supplemental funds for existing programs includes: \$12,500 in support of the interdisciplinary graduate program in the humanities; \$15,000 in support of residency this summer for the Pennsylvania Ballet; and \$10,000 in support of the Black Christian Fellowship Program.

PENN STATE intercom

Volume 3, Number 39

June 13, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Dr. Helen Snyder elected to head University Senate

The University Faculty Senate has its first woman chairman.

Elected to the post for the 1974-75 academic year was Dr. Helen I. Snyder, associate professor of educational psychology.

Other new officers installed at the June 4 Senate meeting were Sally S. Small, head librarian at the Berks Campus, vice chairman, and Dr. John J. Coyle, Jr., professor of business administration, secretary.

Dr. Snyder, who also is acting assistant dean of undergraduate education in the College of Education, succeeds Dr. Ernest L. Bergman, professor of plant nutrition, as Senate chairman. She predicted the faculty group's chief concern in the coming year will be "the matter of governance and shared responsibility. I think we must address ourselves to that."

In other election results announced at the meeting, Dr. Bergman and Dr. William Rabinowitz, professor of educational psychology, were named to the Standing Joint Committee on Tenure. Elected to the Faculty Rights and Responsibilities Committee were Dr. Raymond G. D. Ayoub, professor of mathematics; Dr. Ronald J. Harshbarger, assistant professor of mathematics at the Beaver Campus; and Dr. Stanley J. Paulson, dean of the College of the Liberal Arts.

The Senate voted to appoint a special committee to evaluate operation of the pass-fail grading system. The action came under amendment of recommendations of the Subcommittee on Academic Standards. Dr. Elton Atwater, subcommittee chairman, said pass-fail grades have been difficult to evaluate, noting there were various discrepancies from college to college in the use of the system.

The special committee, as outlined in the amended resolution, is to recommend to the Senate any necessary changes in the system. If the committee finds that it is not working effectively, it may recommend termination of the grading plan.

The committee, to be appointed by the Senate chairman, is to report to the Senate no later than the December meeting.

The Senate also voted to change a student rule to clarify the standards under which associate degree students may qualify for recognition of distinction at graduation.

Under the new rule, distinction will be awarded to associate degree students having a grade point average of 3.40 or higher, based on at least 30 credits earned at the University to satisfy the requirements of the student's particular associate degree program.

1,000 enroll

More than 1,000 new freshmen began Summer Term classes at University Park yesterday.

Along with the freshmen reporting at University Park, 70 freshmen began their studies at three of the Commonwealth Campuses: Altoona, Delaware County at Media, and Ogonitz at Abington.

Warren H. Hatfield, director of admission, records, and scheduling, says enrollment for the Summer Term will approximate that of last year when a total of 11,577 were registered at University Park, and the grand total of all students at all locations was 20,972.

Promotions for 218 faculty announced

Promotions for 218 faculty members, effective July 1, were announced by President John D. Oswald today.

TO PROFESSOR

Dr. Sumner C. Aggarwal, management science
Dr. Dorothy E. Alkire, education
Dr. Charles D. Ameringer, Latin-American history
Dr. Paul B. Baltes, human development
Dr. Alice F. Beatty, biology (DuBois)
Dr. Helen E. Bell, home management extension
Dr. Asa J. Berlin, speech pathology
Dr. John A. Brighton, mechanical engineering
Dr. Robert W. Carubba, classics
Dr. G. Phillip Cartwright, special education
Dr. Alice F. Chaplin, engineering (Berks)
Dr. Richard W. Cleveland, plant breeding
Dr. Mary C. Coleman, experimental foods
Dr. Anthony Cutler, art history
Dr. William L. Dulaney, journalism
Dr. William A. Fleming, biology
Dr. Victor L. Dupuis, education
Dr. Gordon N. Dunson, physics
Dr. Kenneth D. Frandsen, speech communication
Dr. Paul J. Glantz, veterinary science
Dr. William P. Graham, III surgery (Hershey)
Dr. Robert B. Greer, M.D., surgery
Dr. Keith A. Hall, education
Dr. J. Cordell Hatch, agricultural communications
Dr. Robert O. Herrmann, agricultural economics
Dr. Emerson Hibbard, biology
Dr. Jean Leans Jansma, agricultural economics
Dr. Robert L. Kabel, chemical engineering
Glenn R. Keane, animal science
Dr. Edward S. Kennedy, nuclear engineering
Dr. Jaan Kiuslaas, engineering mechanics
Philip Klass, English

John Kolesar, engineering (Wilkes-Barre)
Dr. Wesley R. Kriebel, agricultural economics extension
Dr. Gerard Lachs, electrical engineering
Dr. Budugur Lakshminarayana, aerospace engineering
Dr. Richard L. McCarl, biochemistry
Dr. Willis L. McClellan, agronomy extension
Alfred R. McClung, engineering (New Kensington)
Dr. Kenneth W. Masters, social science (Capitol)
Dr. Peter B. Plahl, floriculture
Dr. Thomas F. Powers, organizational behavior
David L. Raphael, industrial engineering
Dr. Jack C. Shannon, horticultural physiology
Dr. Jeanne L. Smith, psychology (Gontz)
Dr. Samuel H. Smith, plant pathology
Dr. T. A. Roussoun, (Adjunct) plant pathology
Dr. Jon N. Weber, marine geology
Dr. Eugene W. White, solid state science
Dr. Fern Kelly Willets, rural sociology
Dr. Melvin H. Wolf, humanities and English (Capitol)
Dr. Paul J. Wuest, plant pathology extension

TO LIBRARIAN

Dr. Wasyli O. Luciw, librarian
Dr. Murray S. Martin, librarian

TO ASSOCIATE PROFESSOR

Dr. Archibald Allen, classics
Dr. Gert Aron, civil engineering
Dr. John E. Ayers, plant pathology
Dr. Stanley B. Baker, education
William F. Bates, mining engineering (Fayette)
Dr. Robert M. Bear, finance
Dr. David E. Berry, health planning
Dr. Nicholas A. Brasca, education
Dr. Jon G. Bresderson, electrical engineering
Barry S. Brinsmaid, music

Samuel L. Bridewell, engineering (Mont Alto)
Dr. Gordon D. Brown, health administration
Dr. W. Dale Brownswell, mathematics
Dr. Ronald E. Buckalew, English
Dr. John W. Burnside, medicine (Hershey)
Dr. John J. Cahir, meteorology
Monty L. Christiansen, landscape architecture
Dr. Edward J. Ciolkosz, soil genesis and morphology
Dr. Charles A. Cole, engineering (Capitol)
Dr. W. Edward Craighead, psychology
Sabir H. M. Dahir, engineering (Capitol)
Dr. R. Austin Dally, accounting
Dr. Steven J. Danish, human development
Dr. Peter Deines, geochemistry
Dr. James F. Delansky, electrical engineering
Dr. David R. DeWalle, forest hydrology
Dr. Ronald W. Dietz, zoology (Schuylkill)
Dr. William J. Duiker III, history
Dr. Bennett Dyke, anthropology
Dr. James Estenstien, political science
Dr. Frances Faircloth, education
Dr. Terry A. Ferrar, economics
Martha A. Fisher, English (Mont Alto)
Dr. Stephen J. Fonash, engineering sciences
Dr. Edwin V. Gaffney, biology
Dr. Anthony V. Galanti, engineering (Hazleton)
Egon Gartenberg, music (Mont Alto)
Dr. Lawrence B. Golden, physics (Worthington Scranton)
Dr. Luis F. Gonzalez-Cruz, Spanish (New Kensington)
Dr. Earl K. Graham, Jr., geophysics
John W. Gross, engineering (Shenango Valley)
Dr. Donald A. Harter, agricultural extension (Lebanon)
Dr. Tom Hickley, human development
Dr. Charles W. Hill, biological chemistry (Hershey)
Dr. John J. Horan, education
James F. Holahan, English
Dr. Donald W. Johnson, education
Herbert C. Jordan, poultry science extension
Dr. Daniel Katkin, law
Dr. Alan E. Kazdin, psychology
Dr. Donald B. Keal, education
Dr. Manfred E. Keune, German
Dr. Edward R. Kimmel, engineering mechanics
Kenneth Kuhn, art (Altoona)
Zeljko Kujundzic, art (Fayette)
Dr. Carl A. Lindsay, education
Dr. Allan Lipston, medicine and microbiology (Hershey)
Dr. Jean W. MacCluer, biology (McKeessport)
Dr. Chris Maricondi, chemistry
Dr. Roy J. Martin, Jr., animal nutrition
Arthur I. Martinale, engineering (Delaware County)
Christopher K. McKenna, management science (Capitol)
Dr. Francis R. McKenna, education
Dr. Rodrigue Mortel, obstetrics and gynecology (Hershey)
Harold E. Neigh, consumer education extension
Dr. Osamu Nishikawa, physics
Dr. Hiroshi Ohmoto, geochemistry
William H. Parsonage, law enforcement and corrections
Dr. James H. Patterson, mgmt. science
Dr. Winfred M. Phillips, aerospace engineering
Dr. Daniel D. Quiring, nursing
Winston A. Richards, mathematics and statistics (Capitol)
Dr. Gordon E. Robinson, nuclear engineering
Dr. Audrey T. Rodgers, English
Dr. Richard C. Rose, physiology and surgery (Hershey)
Dr. Ralph J. Sabock, physical education
Dr. Michael A. Santulli, philosophy (Hazleton)

1973-74 Senate contributions cited

Editor's Note: The following remarks, with some omissions, were made by outgoing Senate Chairman Ernest L. Bergman at the June 4 meeting.

Last year when I stood here in front of you after overcoming the shock of being elected Senate Chairman, I asked you for your help, input, and support. Furthermore, I asked you to think University-wide first, and only then to remember that you are a part of a college or campus. You must have done this because the amount of work accomplished in the past year is very gratifying, and without your full support this would have been impossible. . . .

This brings me to the Commonwealth Campus Senators. I think they did more than their share for this Senate. If you consider that they have to drive rather large distances, you can appreciate their problem. When they finally arrive at Penn State they sometimes get into trouble with parking regulations and parking tickets. Naturally, I could say why should they be better off than we are, but it is kind of irritating when you are tried to do your best. I cannot agree with the present way of enforcing parking regulations and hope for all of us this will be changed in the very near future. The administration worked with us and supported us. Both the President's and Provost's Offices were always open to me when I needed them. On the other hand, they were not afraid to call me, too. Such cooperation between the Senate and administration is essential. . . . Now let's review some of the year's accomplishments.

First of all, I am very proud to report to you that the Faculty Rights and Responsibilities legislation, which was passed by the Senate, went into operation with the approval of the President on Sept. 1 and so far has worked very well. You may remember that this legislation was actually initiated as early as 1968 and took us nearly five years to get through the Senate and into operation. In my opinion, there is one missing link in the rights and responsibilities legislation pertaining to items of unit magnitude which actually might also affect the ombudsman of that unit. Therefore, may I suggest that there be appointed an ombudsman-at-large to keep liaison in such cases. This ombudsman-at-large could be the Past-Chairman, Vice-Chairman, or Secretary of the Senate, but it should be somebody who knows the operation of the University and its administrators.

The second big event was the creation of the University Faculty Senate Ad Hoc Committee to study implications of Collective Bargaining for Faculty Governance. This Committee worked extremely hard and followed down the line the charge of the Chairman, namely, to look into the pros and cons of collective bargaining as objectively as possible and report this to the Senate without recommendations. The Committee did a commendable, thorough job. The report was well received, and requests for it have been received from more than 30 universities in the United States and Canada. Later on, as you may remember, we had a forensic session on collective bargaining when we invited the representatives of AAUP, Graduate Students Association, Open Options, and PSPUA for an open discussion. The whole session was video-taped, and these tapes were requested by nine campuses.

Eleven faculty members announce retirements on July 1

Dr. Joseph D. Coppock, a professor of economics at the University since 1965, will retire on July 1. In September, he plans to go to the American University of Beirut, Lebanon, as a visiting professor of economics, a post he also held there from 1963 to 1965.

Dr. Coppock, born in Peru, Ind., prepared for college at Culver Military Academy, received his B.A., summa cum laude, at Swarthmore College, and was awarded his advanced degrees by Columbia University. About one-third of Professor Coppock's career has been spent with the U.S. Government, with the remainder in teaching and research. During and after World War II, he worked for the War Production Board, the Office of Price Administration, the Office of Strategic Services (dealt with the U.S. Navy), and the U.S. Department of State. In 1961 and 1962, he was director of the Foreign Economic Advisory Staff of the Department of State.

Dr. Coppock's principal teaching posts have been at Hendrix College, Swarthmore College, the University of California at Berkeley, and Earlham College, before coming to Penn State in 1965. He has been a visiting professor at Haverford College, the University of Oregon, the National War College, Indiana University, the University of Wisconsin, the University of Michigan, and Thammasat University, Thailand. He has served on the research staff of the National Bureau of Economic Research, of the Brookings Institution Price Discrimination Study, and of the Carnegie Corporation Project on Education for Business. In recent years, Dr. Coppock has specialized in international economics, with research on international trade instability. His 1962 "International Economic Instability" is still the standard work in this field. He has written monographs on "Foreign Trade of the Middle-East" and "Foreign Trade of Asia and the Far East," as well as books on the "Economics of the Business Firm," "The Food Stamp Plan," and "Government Agencies of Consumer Installment Credit."

Harry E. Cowan, associate professor of mathematics at the DuBois Campus, will retire July 1 after 28 years of service as a faculty member. He was one of the original students at the DuBois Campus, receiving his bachelor of science degree in education from the University in 1939. His master's degree in education was granted by the University of Illinois. He taught mathematics at Coudersport High School and served as a teaching assistant in mathematics at the University of Illinois. Following service in the U.S. Navy, he joined the DuBois Campus faculty in 1948 as an instructor in mathematics and physics. He was promoted to assistant professor of mathematics in 1951 and to associate professor of mathematics in 1960. For the past seven years, Cowan also has served as scheduling officer at the DuBois Campus.

A leading scholar in medieval history and the author of seven books in this field, **Dr. Joseph H. Dahmus** is retiring as professor of history after 27 years of service. Dr. Dahmus, who has been given emeritus status, came to Penn State after teaching at Aquinas College in Grand Rapids, Mich., at the College of Mount St. Vincent in New York City, and at St. John's University in Brooklyn. Born in St. Maurice, Ind., he received a B.A. degree from Josephinum College. His M.A. in classics was awarded by St. Louis University, and his Ph.D. in history by the University of Illinois.

The author of some 50 book reviews and a number of articles in professional journals, Dr. Dahmus published his first book in 1950. It was "The Metropolitan Visitations of William Courtenay." His second book, "The Prosecution of John Wyclif," appeared two years later and was reprinted in 1970 as an Archeon Book. He wrote "A History of Medieval Civilization" in 1964 and "William Courtenay, Archbishop of Canterbury, 1381-1396" in 1966. One of Dr. Dahmus's most popular books was "Seven Medieval Kings," published in 1967. "The Middle Ages: A Popular History" came out in 1969 and "Seven Medieval Queens" in 1972. The number "seven"

was selected by Dr. Dahmus, he explains, because it was held sacred in the Middle Ages. He used it again in a book now in press, "Seven Medieval Historians." He has a ninth book also in press, "Medieval Encyclopedia."

During his years at Penn State, Dr. Dahmus served on numerous department and college committees and organized and directed the Medieval Studies Program from 1965 to 1972. He was also named a Senior Fellow of the Institute for the Arts and Humanistic Studies.

The trustees of the University have approved the rank of professor emerita of child development for **Dr. Irene E. Harms**. Dr. Harms, who joined the faculty in 1957, will retire July 1. A graduate of Washington State University, she received her M.A. and Ph.D. in child psychology from the State University of Iowa.

At Penn State, Dr. Harms has specialized in infant development, supervised the care of babies in the home management houses, and has been responsible for developing and implementing undergraduate and graduate courses in this area of study.

Kenneth L. Holderman, vice president for Commonwealth Campuses, will retire July 1, completing 33 years at the University. Trustees of the University have approved the rank of vice president for Commonwealth Campuses emeritus and professor emeritus of engineering for him. An alumnus of the University, having earned a B.S. in architecture in 1931, Mr. Holderman was engaged in residential and commercial design in Los Angeles, Calif., and later served in the engineering offices of Douglas Aircraft Co. before returning to Penn State.

Appointed to the staff of the Department of Engineering Extension in 1941, he was responsible for course coordination and supervision of all work in engineering graphics conducted by the University during the war years under the Engineering, Science, and Management War Training Program.

He served as director of the department from 1949 to 1956 when he was appointed assistant dean of the College of Engineering and Architecture. He remained in that post until his appointment in 1959 as coordinator of the Commonwealth Campus System. Designated director of Commonwealth Campuses in 1964, Mr. Holderman was named vice president for Commonwealth Campuses in 1970. He has been active in the American Society for Engineering Education and also served as secretary and chairman of the Engineering Extension Section of the American Association of Land-Grant Colleges and State Universities. In 1969, he was presented the James H. McGraw Award in Technical Institute Education. Last year he received the John E. Wilkinson Award for Administrative Excellence "presented annually to an administrator at The Pennsylvania State University for outstanding achievement in the administrative field."

In retirement, he expects to maintain a long and intense interest in all sports of the University. As an undergraduate, Mr. Holderman broadcast the first Nittany Lion football game from Beaver Field in 1928 and originated the "TV Quarterback" program with former Coach Rip Engle in 1962.

Albert J. Magnotta, associate professor of engineering at the Worthington Scranton Campus, will retire on July 1. Recipient of the Penn State Engineering Society's "Outstanding Adviser Award for 1968," he began his educational career in 1934 as an instructor in drafting and mathematics with the Scranton School District. He joined the Worthington Scranton faculty in 1958 as an assistant professor and was promoted to associate professor in 1965. He served as group leader of the Mechanical Engineering Technology Program until 1973 when he became group leader of the Architectural Engineering Technology Program, a program he instituted at the Campus. A graduate of Central High School, Scranton, Magnotta received his bachelor of science degree in architectural engineering from Penn State and a master's degree in edu-

cation. He has served as a member of the University Faculty Senate, chairman of the faculty at the Worthington Scranton Campus, and on numerous campus committees.

Dr. William R. Mills will have completed 34 years on the faculty when he retires July 1 as professor emeritus of plant pathology. Early in his career, Dr. Mills began to focus his research on the potato, and he has acquired an international reputation for his contributions to the breeding of potatoes and control of their diseases. One of his particular interests has been in developing the best kinds of potatoes for use in the potato chip industry.

A native of Fillmore, N.Y., Dr. Mills received his B.S. from Cornell in 1931. While still a Ph.D. candidate, he spent two years as chief of the Section of Genetics at the Instituto de Pesquisas Agronomicas in Recife, Pernambuco, Brazil, before there were any formal programs of cooperation with the United States. After receiving his Ph.D. from Cornell in 1939, he remained there as a research assistant in plant pathology until he joined the Penn State faculty in 1941.

During his tenure at the University, Dr. Mills traveled to several countries of Latin America to study and consult on potato-growing problems. For nearly 20 years, he represented the northeast section of the Potato Introduction Station at Sturgeon Bay, Wisc., a national repository for various wild species of potatoes used for research and selection. In 1971 the Potato Association of America conferred upon Dr. Mills its highest honor, Honorary Life Membership, for his contributions to the potato industry.

Margaret G. Sheridan, associate professor of English at the Altoona Campus, has retired with 14 years of service. She joined the faculty in 1960 as instructor, was named assistant professor in 1964, and associate professor last year. Her husband, Dr. Laurence Sheridan, retired as associate professor of mathematics last year. She had a career as a singer, music teacher, and professor of English and humanities, serving at one point as assistant to the president of American University in the preparation of a new English-humanities curriculum. She also conducted music therapy experiments in an Army rehabilitation program while in Washington.

Glenn N. Thiel, professor of physical education and assistant to Dean Robert J. Scannell, is retiring after 40 years at the University. Thiel came to Penn State in 1934 as head lacrosse coach, having earned All-American honors in the sport himself in 1932 and 1933 at Syracuse, where he obtained his degree in industrial engineering. His teams chalked up 86 wins during

the next 22 years and produced three All-Americans. Thiel also coached the National team in three North-South All-Star Games and was twice named "Man Who Did the Most for Lacrosse" by the U.S. Intercollegiate Lacrosse Association.

Since giving up coaching in 1956, Thiel has helped build facilities and programs for the College of Health, Physical Education and Recreation, coordinating the new additions to Recreation Bldg., the moving of Beaver Field, the construction of the Natatorium and outdoor swimming pool, and the planning and installation of the Astorfield field. He also played an important part in the building of the new Pavilion, the football team room, the indoor tennis building, and the intramural fields.

Dr. Winston R. Weisman, research professor of art history, will retire on July 1 with emeritus status after 21 years of service. Dr. Weisman, who is also a Senior Fellow of the Institute for the Arts and Humanistic Studies, served as head of the Department of Art History from 1958 to 1971. During his tenure, the Department instituted a master's and doctoral program and established a Center for the Study of Renaissance and Baroque Art.

A native of New York, N.Y., Dr. Weisman earned a B.A. in journalism at Ohio University and an M.A. in fine arts from the Institute of Fine Arts at New York University. He obtained his Ph.D. in fine arts from Ohio State. He has written and lectured both in this country and abroad on his special areas of interest, the history of commercial architecture and the development of the skyscraper in America. In recent years, he has devoted much of his attention to the cast iron buildings which preceded the skyscrapers.

He was instrumental in efforts to preserve New York's SoHo District, a 35-block area in lower Manhattan considered one of the greatest cast iron museums in existence. The site has now been designated as an historic area by the Landmark Preservation Commission of New York. Under Dr. Weisman's direction, a group of Penn State students produced a lengthy documented study of SoHo, which forms the basis for the Commission's final designation report. Among his other contributions was the authorship of an essay, "A New View of Skyscraper History," one of four specially commissioned for a book, "The Rise of American Architecture," published as part of the 100th anniversary celebration of the Metropolitan Museum of Art in New York. He is currently preparing a history of the skyscraper and one dealing with cast iron architecture in New York. This summer, he plans to travel through Europe continuing an investigation which he began some five years ago into a form of architecture which is rarely studied — buildings used for commercial and industry from ancient times onward.

Chesler K. Reuckert, Jr., president of the Behrend College Advisory Board, presents the Board's "Excellence in Teaching" Award to Dr. Mary G. Chisholm, assistant professor of chemistry, during commencement exercises while Dr. Theodor Fox, dean of faculty, looks on. Dr. Chisholm, whose husband, Bernard, is assistant professor of physics at Behrend, has played a major role in development of the College's organic chemistry program and serves as advisor to pre-med students. She was chairman of the campus development committee and presently is a member of the Behrend College Faculty Senate.

BARRY S. BRINSMAID, associate professor of music at the University, is congratulated by Dean Walter M. Walters on the receipt of his 25-year service award. Robert W. Baskley, professor and head of the department of music, is at right. Brinsmaid, who has appeared as a pianist before countless University and town audiences, came to Penn State in 1949. He earned his B.S. in music at Johns College and his M.A. in music and music education at Columbia University. Before joining the faculty, he taught grade school and junior high music in Clinton, N.Y.

News in brief

TEACHING AWARD

Dr. Thomas J. Knight, associate professor of social science and history at Capital Campus, received the third annual James A. Jordan, Jr., Memorial Award for Teaching Excellence at commencement exercises in Middletown.

The award, which is presented to the faculty member students select as the most effective teacher-educator, honors Dr. Jordan, a former professor at Capital who died in a boating accident.

A native of Texas, Dr. Knight joined the faculty at Capital in 1968, after teaching at Michigan State University and the University of Nebraska. He earned his Ph.D. in European history at the University of Texas.

DENGLER PRIZE

William M. Murray, of State College, was awarded the first annual Robert E. Dengler Memorial Classics Prize at the University. A history major, who will begin graduate study in archaeology and history at the University of Pennsylvania next fall, he is the son of Dr. Robert K. Murray, professor of American history here. The Dengler Prize is named to honor the University's former head of classics who died last September. Dr. Dengler had been a member of the faculty for 35 years when he retired in 1955. Recipients will be selected from the general area of classical studies. Contributions for the prize fund were collected on campus and from friends and former students of Dr. Dengler's.

RESIDENCY APPROVED

A residency program in otorhinolaryngology (ear, nose and throat) at Hershey Medical Center has been approved by the Residency Review Committee representing the American Board of Otorhinolaryngology of the American College of Surgery and the Council on Medical Education of the American Medical Association. The three-year program will train physicians to become specialists in the diagnosis, treatment and rehabilitation of patients with diseases and injuries of the head and neck, ear, nose and throat.

LIBRARIES' HOURS

The branch undergraduate libraries are now on the following summer schedule. The Pollock-South branch is open from 9 a.m. to 5 p.m. Monday through Friday. The East branch in the basement of Findlay Union Building is open from 5 p.m. to 12 midnight Monday through Friday; 9 a.m. to 5 p.m., Saturday; 1 p.m. to 12 midnight, Sunday.

COPIES AVAILABLE

Copies of the University's 1974-75 State Appropriation Request have been placed in Pattee Library for the information of faculty, staff, and students. The statement was prepared for the Appropriation Committee of the Commonwealth's House of Representatives and Senate.

NSF GRANT MADE

The National Science Foundation (NSF) has awarded a \$242,800 grant to the Materials Research Laboratory to expand its program in ceramic and luminescent materials. The grant, effective May 15, was made under the NSF's Materials Research Laboratory Program and brings to 15 the number of such NSF-funded centers at universities throughout the country. Such centers provide researchers with central experimental facilities normally not available to individual investigators. Developed by the University during the past 2 years, Penn State's Materials Research Laboratory, directed by Dr. Rustum Roy, professor of the solid state, is unique among the laboratories at major universities in having had no block funding so far. It is also distinguished by the fact that it has emphasized the study of non-metallic materials, especially their preparation and characterization.

BUILDING CITED

The new physical education building at the Ogonitz Campus has been cited in the May issue of "Progressive Architecture." In an article entitled "The Fifth Facade in Abington," David Morton, senior editor, describes the new structure and how site location and modification of its roof structure brought it more into scale with smaller buildings on the campus. The \$1.8 million General State Authority structure, which was dedicated May 4, contains a 40,000 square foot gymnasium, an auxiliary gymnasium, classrooms, faculty offices and locker rooms.

SERVICE STOPPED

As a result of financial exigencies, Pattee Library will no longer be able to provide book delivery service to faculty after June 11, 1974. Accordingly, all library materials will have to be picked up and returned to the library in person. The decision to end this service was made in light of the need to establish basic priorities of service within limited budgetary conditions.

SIMMONS AWARD

Rita C. Brown, of Huntingdon Valley, received the Simmons Award in Teaching from the University. A graduating senior who majored in German with a teaching option, Miss Brown was also elected to Phi Beta Kappa, national scholastic honorary society. Her award is named for the late Dr. Lucretia Van Tuij Simmons, who served as head of the Department of German at Penn State from 1919 to 1939.

CAPITOL EXHIBIT

Faculty and student works of art — photography, decoupage, collage, free-hand drawing, silhouettes, and paintings in various media — are on display at the Capitol Campus, in an annual art show that was part of the spring music/art festival on campus. The exhibit continues until June 15.

Building changes

Changes in the University's physical plant were approved by the Trustees at their May meeting.

The former Sigma Chi fraternity building, located at Pollock and Burrows Roads, will be demolished. Built in 1905, the four-story brick structure was vacated in 1972 by the chapter because it was considered unsuitable for occupancy by a fraternity. After study, the University found that very extensive and costly alterations would be necessary to make the building comply with safety codes.

Preliminary plans for an addition to the Helen Eakin Eisenhower Chapel were approved. Located to the west of the existing building, the structure will have meeting rooms, a lounge area, and offices, as well as a large multi-purpose room. Funds to build the addition have been provided by gifts from friends of the Eisenhower family.

Also approved were preliminary plans for a business services building, to be constructed west of the Air National Guard Armory. It will provide facilities for such activities as printing, addressing, and mail services. Earnings from the auxiliary enterprise functions of the building will finance the project.

A new cardiovascular research laboratory will be built at Hershey. The unit, an enlargement of the facilities for work with large animals, will be financed in part by a \$350,000 grant from the Kresge Foundation, as well as by funds from grants, contracts and other sources.

Bernlohr head

Dr. Robert W. Bernlohr, professor in the departments of microbiology and biochemistry at the Medical School of the University of Minnesota, has been appointed professor and head of the department of microbiology, effective Sept. 1.

Dr. Eugene H. Cota-Robles, who had headed the department, resigned last year to become vice-chancellor at the University of California at Santa Cruz.

Dr. Bernlohr joined the Minnesota faculty in 1962. Prior to that he was assistant professor of agricultural biochemistry at Ohio State University.

He is a graduate of Capital University, where he earned a B.S. in chemistry. His Ph.D. in biochemistry was conferred by Ohio State. In 1968, he was associated with the Molecular Biology Institute of the University of California at Los Angeles, and in 1971-72 he was with Minnesota's department of pediatrics.

Dr. Bernlohr, who has written some 50 papers and a number of reviews and abstracts, is an editor of a book, "Enzyme Replacement in Genetic Disease," published by the National Foundation-March of Dimes in 1973. He has served as a member of the editorial board of the "Journal of Bacteriology" since 1965, and for three years he was a member of the advisory panel for the Metabolic Biology Program of the National Science Foundation.

Senate contributions

(Continued from page 1)

Third, but not last, is the report of the Joint Senate Administrative Select Committee on Faculty Participation in University Governance. Here a joint committee of the Senate and the President looked at all the aspects of faculty governance and produced an excellent report. I have charged as per your request, the Senate Committee on Committees and Rules to start implementation of the various items pertaining to the Senate. The President submitted the report to the Board of Trustees, and I am sure that soon he will be ready for some implementations; the next Senate Chairman and the President have to work together to take care of the joint items. This report, in essence, has my wholehearted support, because something had to be done to get a smoother operation going. As a matter of fact, a subcommittee of the Senate Council has started already to investigate better publicity for the Senate and better information for the faculty at large.

Furthermore, an External Degrees Committee was created. IRC was busy with reviewing Faculty Organization Constitutions and Bylaws for recommendations to the Senate and the President for approval. So far 15, or about 50 percent of all the units, have approved Constitutions and Bylaws. This Committee also prepared legislation for Criteria and Procedures for Delegation of Authority and Responsibility to these organizations which was passed by the Senate.

A permanent Subcommittee of the Academic Affairs Committee on Student Evaluation was established after the Senate turned down the student evaluation proposal. I would like to reiterate that this student evaluation was not turned down because the faculty does not want to be evaluated. It was turned down because the faculty was not satisfied with the instrument of evaluation; and since these evaluation forms may be used for other purposes, the faculty felt that it should be in a manner with which the faculty, as well as the students, can live.

Credit Acquisition was reviewed, defined, revised, and extended. Seventy-five of some 120 student rules were revised, updated, and sent to the printer. But still quite a bit of revision and updating is left for the coming year.

The Technological Concept was dropped from the Baccalaureate Degree Requirements.

A Capitol Campus Review Committee was established and performed its task with a report coming before the Senate at the next meeting.

The Faculty Affairs Committee had a busy year, and a subcommittee is working right now on an Academic Ranks and Tenure proposal, which should be completed before Fall Term.

An External Affairs Committee was created to act as liaison with the world outside the confines of this University.

Furthermore, the Curricular Affairs Committee reviewed literally hundreds of courses.

Being a member of the University Promotions Committee and the Sabbatical Leave Committee was a real eye-opener. I wish each of you could serve on these committees. You can be assured that everything went fairly and squarely and everybody got a just deal. Sometimes, however, I wondered if this was also the case before these committees received the recommendations from colleges and campuses. If my suggestion to look into this after the new Rank and Tenure proposal has been accepted.

We have a great University, but this doesn't mean that it couldn't stand improvement here and there. One of our big problems is keeping information flowing in both directions between our top administrators and the faculty. There is a seemingly impervious layer of people in between who, thinking they are doing the best for the University, actually only foster their selfish interests. In agricultural land we call this a claypan or hardpan, which prevents water flow or root penetration. Research in North Africa has shown that charges of dynamite will bring about flow in either direction. While I do not advocate dynamite in our case, I would like to see some new means taken to correct this situation.

You undergraduate students, who are always so much interested in what the faculty is doing in the various committees or the Senate as a whole, perhaps the first step you should take is helping us in getting our story into the "Collegeian." I failed to get this accomplished in the past year, and I hope you will take it upon you to do so.

For two years now we have had problems with the election of graduate student Senators because there seemed to be apathy on the students' part to run for offices in spite of the fine work done by those in charge. I cannot understand why the Senate is so adamant in asking for College representation. We could overcome this annual problem by just asking for four elected graduate student Senators and let them worry about representation.

Last year the proposal of making the Vice-Chairman the Chairman-elect was defeated, and I too voted against the proposal. I hope when this proposal comes back to the Senate, as based on the Governance Report, you will see fit to support it and amend it if necessary until we have what we really need, because continually is essential.

Promotion list

(Continued from page 1)

Dr. Richard W. Scholz, veterinary science
Carolyn R. Schrock, home management
extension
Dr. John S. Shenk, plant breeding
Dr. George E. Slater, petroleum and natural
gas engineering
Dr. Zane Smiowitz, entomology
Dr. John B. Smith, English
James E. Stenposen, Jr., art
Frank J. Swetz, mathematics and education
(Capitol)
Dr. Duane L. Thomas, physical education
(Mont Alto)
Dr. Brian J. Turner, forest management
Dr. G. Frank Tyers, surgery (Hershey)
Dr. Rajaram Venkataramani, mining
engineering
John C. Villamea, business administration
(Worthington Scranton)
Dr. Narayanasamy Viswanathan, chemistry
(Fayette)
Dr. Walter B. Weimer, psychology
Ruth A. Wilson, clothing extension
Dr. John J. Zavodni, zoology (McKeesport)

County)

Calendar

SPECIAL EVENTS

Friday, June 14 — Commonsplace Coffee-
house, 8 p.m., Room 102 Kern. Featuring
"Lohlorien."

Friday, June 21 — Commonsplace Coffee-
house, 8 p.m., Room 102 Kern. Featuring
"David Martin" and "1898."

FILMS

Friday-Sunday, June 14-16 — Commons-
place Theatre, "Five Easy Pieces," 7
and 9 p.m., Room 112 Kern.

Monday, June 17 — Commons Midday Cin-
ema, "Room to Breathe," documentary on
the Toxics Flood Project.

Monday, June 21 — Commonsplace The-
atre, "1984" and "Animal
Farm," 7 and 9 p.m., Room 112 Kern.

SEMINARS

Thursday, June 13 — Microbiology, 1 p.m.,
Room S2 Frear. John Larenzo, Packard
Instrument Co. representative, on "Basic
Isotope Counting."

Monday, June 17 — Microbiology, 4 p.m.,
Room S2 Frear. Sylvia M. Stein on
"Arginine-rich Protein and Cell Surface
Mediated Growth Control."

MEETINGS

Monday, June 17 — O.T.I.S., 9 a.m.-5:30
p.m., Room 213 HUB.
Monday, June 17 — Bridge Club, 6:45
p.m., HUB ballroom.

OFFICIAL

Friday, June 21 — Add deadline.

EXHIBITS

Kern Gallery — Anthropology Department
exhibit, cases. Patty Carroll, photo-
graphy, through June 15. LaVern Grant,
oil and sculpture, opening June 16.
Charles Hoot, photography, opening June
23.

Museum of Art — Quilts, Gallery B. Selections
from the Permanent Collection,
Galleries A and C.

Campuses name five to posts

Five new appointments have been made
to the administrative staff of the Common-
wealth Campus system.

Joseph F. Douglas, associate professor
of engineering at York, was named associ-
ate dean of academic instruction for Com-
monwealth Campuses, while John V. Cooney,
formerly acting director at Allentown,
will become director of that Campus.

In addition, three associate directors for
academic affairs have been appointed. They
are Dr. Richard J. Thomas, McKeesport;
Dr. Robert D. Arubckle, New Kensington;
and Dr. Wayne D. Lammie, Shenango Valley.

A member of the faculty since 1966,
Professor Douglas received the Christian
R. and Mary F. Lindback Award for Dis-
tinguished Teaching in 1972.

His B.S. in electrical engineering was
granted by Purdue and his M.S. in the same
field by the University of Missouri. He has
held jobs with Government and industry as
well as an associate professorship at
Southern University.

Cooney obtained both his degrees from
Penn State, a B.S. in physics and M.E. in
engineering science. He joined the Allentown
town faculty in 1965 and also served as
dean of student affairs there.

Dr. Thomas, chairman of the department
of history at Baldwin-Wallace College,
earned his B.A. in history at Syracuse, his
M.A. in American history from Wayne State,
and a Ph.D., also in American history, from
Indiana University.

Dr. Arubckle, presently serving as as-
sistant professor of history at New Ken-
sington, is a graduate of Clarion State Col-
lege. He received his M.A. and Ph.D. in
history from Penn State.

A graduate of Muskingum College, Dr.
Lammie received his M.A. in history from
the University of Pittsburgh and a Ph.D.,
also in history, from Ohio State. He has
been at Shenango Valley since 1966.

New model calculators ready

During the past academic year Listening-Learning Services operated an elec-
tronic desk calculator laboratory in Room
6 Sparks Building on an experimental basis.
The extensive use of these older calculators
led to the purchase of the latest model
series of calculators in both the statistical
and scientific versions. The new machines
are being installed in Rooms 6 and 7
Sparks Building and are ready for use at
the beginning of Summer Term.

The Monroe, Model 1920, is designed
to perform automatic statistical functions,
including statistical summations of X
paired data and single-variable (grouped or
ungrouped) data summations. Upon com-
pletion of summations, single key depres-
sions will produce standard deviation,
mean, standard error of the mean, cor-
relation coefficient, slope, intercept, t-
dependent and t-independent statistics.
This same calculator also has other sta-
tistical functions for chi-square, F, t-dis-
tributions, permutations and/or combina-
tions, common and natural logarithms,
square root, reciprocal, number to a power,
and factorials.

The Monroe, Model 1920, is designed
principally for engineering and scientific
calculations. Instead of statistical capabili-
ties, the 1920 has Tan, Cos, Sin, and the
inverse of these functions. This model also
features degrees, minutes and seconds
conversion to decimal, and decimal de-

Tuition, housing charges raised

Increases in tuition as well as room and
board charges, both effective with the Fall
Term, have been approved by the Board of
Trustees.

The tuition increase amounts to \$20 per
term or \$60 for an academic year for stu-
dents at the University Park Campus and
half of that amount for students at the
Commonwealth Campuses. The new rates
bring tuition at University Park to \$960 per
academic year and at the Commonwealth
Campuses to \$915 per year for Pennsylv-
ania residents. Tuition for all non-Pennsylv-
ania students at all campuses will be
\$2160 per academic year.

An increase of \$65 per term for Pennsylv-
anians enrolled as medical students at
Hershey Medical Center has been ap-
proved, bringing tuition to \$1,500 per ac-
ademic year. The increase for non-Pennsylv-
ania students in the medical program will
be \$130 per term bringing tuition to \$3,000
per year. An increase of \$20 per term was
approved for all non-medical students at
the Medical Center, bringing tuition for
non-medical students there to \$960 for
Pennsylvania residents and \$2,160 for out-
of-state residents.

President Oswald noted the increases
were made "with great reluctance."

At the same time, he said, "The Univer-
sity has been under continuing pressure
to raise its tuition to the \$1,000 level re-
commended by the State Master Plan for
all three Commonwealth Universities. We
have consistently resisted the pressure to
move too rapidly to that amount and have
insisted upon keeping annual increases
moderate in order to avoid undue hard-

Stewart asked to head new study

The Association of Departments of Eng-
lish has asked Dr. David H. Stewart, pro-
fessor and head of the department of
English, to conduct a second national study
for the group.

Dr. Stewart previously served as chair-
man of the ADE Workload Committee,
which prepared a statement on "Class
Size and Workload for College and Univer-
sity Teachers of English."

The new study will survey the profession
to determine its compliance with the rec-
ommended workloads. Universities, four-
year colleges, and junior and community
colleges throughout the country will be
asked about workloads actually in existence
and the problems confronting department
administrators.

Results of the studies are sent to every
chapter of English in higher education in the
United States.

Commenting on the first study, Elizabeth
Wooten, director of English programs for
the Modern Language Association and ADE
coordinator, said: "We feel that this state-
ment will become a touchstone for de-
partment planning; according to all reports
at our national office, the profession is

grees to degrees, minutes, and seconds,
automatically. It also performs rectangular
to polar coordinate conversion and polar
to rectangular coordinate conversion. The
1920 calculates in either degrees, radians,
or grads, and is also capable of intercon-
version between degrees, radians, and
grads.

Both the 1930 and 1920 models have
simple algebraic operation, triple nesting
of parenthesis keys, and ten data storage
registers. Operation of these calculators
is relatively simple.

These calculators are available for use
at a very low cost, by faculty and students
on a University-wide basis. They may be
used for class meetings or individual study,
however, the former will be given first
priority. To allow sufficient time for pur-
chasing and distributing schedules, instructors
wishing to schedule the thirty-two stations
in 7 Sparks for group meetings should con-
tact Listening-Learning Services as soon
as possible, preferably at least one week in
advance.

Rooms 6 and 7 Sparks will be open
Monday through Friday 8:00-12:00 and 1:00-
5:00. The rooms will also be open on
evening 7:00-9:30, except Friday and Sat-
urday.

On Monday, June 17, and Tuesday, June
18, a Monroe representative will be in 7
Sparks from 7:30 to 8:30 p.m. to in-
dicate those interested in using the calculators.

ships on individual students and their pa-
rents during their four years of enrollment.
The 1974-75 appropriation request includes
what is hoped will be the final step toward
tuition equalization with other Commop-
wealth Universities."

The increase for room and board amounts
to \$18 per term or \$54 per academic year
for the combined room and board services.
This will bring the charge for a typical
double room accommodation to \$415 per
term or \$1,239 for an academic year. Rates
for different types of rooms vary slightly
with the type of accommodations provided.

Housing and food service facilities are
operated on a self-sustaining basis, and
all costs must be met from charges to
students living in the facilities.

The tuition increases also apply to part-
time and continuing education students.

Rates for Pennsylvania students carrying
seven or fewer credit hours were increased
by \$3 per credit hour at University Park
and \$2 per credit hour at other Campuses
for an overall rate of \$40 per credit hour
at University Park and \$35 at Commonwealth
Campuses for Pennsylvania students. Out-
of-state rates will be \$91 per credit hour.

Continuing Education course increases
of \$3 per credit at University Park and \$2
per credit at other locations were approved
for Pennsylvania residents, bringing fees
to \$40 and \$35 per credit, while for non-
Pennsylvanians the increase was \$3 per
credit to bring the new rate per credit to
\$91. Unit course increases of \$2 also were
approved to \$23 per unit for Pennsylvania
students and \$54 per unit for non-Pennsylv-
ania students.

desperate for such a document."

Guidelines for maximum workload and
class size in English during the 1970's in-
clude:

—College teachers should spend no more
than 12 hours per week per semester in
the classroom in undergraduate instruction
exclusively and no more than nine hours
per week in graduate instruction.

—They should teach no more than 25
students per section nor more than three
sections per semester of composition and
even smaller remedial or advanced crea-
tive writing sections.

—They should not be restricted to teach-
ing several sections of the same course nor
have to prepare more than three dif-
ferent courses in a semester.

—Literature courses should enroll no
more than 35 students. If large lecture
courses are necessary, a teacher should
have an assistant for each additional set
of students to help evaluate written assign-
ments.

—If teachers are assigned major ad-
ministrative duties, they should teach a
reduced weekly load.

PENN STATE intercom

Volume 3, Number 40

June 20, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Dr. W. L. Ferrara

Ferrara named Faculty Fellow

Dr. William L. Ferrara, professor of accounting, has been named a Price Waterhouse Faculty Fellow in the College of Business Administration.

The appointment, made by President John W. Oswald, on the nomination of Dr. Eugene J. Kelley, dean, and colleagues in the College of Business Administration, is the first to be made since the Trustees of the University on May 31 established the position of faculty fellow, as well as chairs and professorships supported by special grants from benefactors as a means to give special recognition and support to distinguished faculty members of the University.

The designation for Dr. Ferrara, who continues also as professor of accounting, is for a five-year period.

In making the appointment, Dr. Oswald complimented Dr. Ferrara "on having achieved the high level of excellence in your scholarly activities that has resulted in your colleagues and the University desiring to honor you as the first Faculty Fellow at The Pennsylvania State University."

He also expressed his appreciation to Dean Kelley and to Price Waterhouse for the efforts that they have given in promoting and supporting this means for providing special recognition and support for distinguished Penn State faculty.

Dr. Ferrara, who came to Penn State in 1962 after teaching at the University of Illinois and Michigan State University and serving with a certified public accounting firm in East Lansing, Mich., is a graduate of DePaul University, Chicago, Ill. His master of arts and doctor of philosophy degrees were conferred by Michigan State. In 1969 he was honored by DePaul University Alumni Association with the Distinguished Achievement Award.

Invention

Dr. Donald R. Olson, professor of mechanical engineering and a member of the Staff of the Applied Research Laboratory at the University, has invented a chemical heat tube for which a patent has been granted. The device is used for producing high amounts of heat without excessive pressure rises.

Academic programs announced by Trustees

Four new options for the University's academic program have won approval from the Board of Trustees. Areas affected are landscape architecture, vocational education, and industrial arts education.

A five-year Bachelor of Landscape Architecture degree for students desiring to enter professional practice will now be offered to provide an alternative within the Landscape Architecture program, where the four-year bachelor of science degree will continue to be available.

Under the new curriculum, students can graduate after four years with a B.S. and enter graduate school. If they want to go into professional practice following graduation, they would continue into the fifth year

and receive a bachelor of landscape architecture degree.

"This curriculum," according to Dr. Robert E. Dunham, vice president for undergraduate studies, "permits students with financial hardships as well as those who are undecided the option of taking a bachelor of science degree in four years and working in the field until they are prepared to or desire to complete a professional degree program."

A new intercollegiate program leading to the doctor's degree in vocational education has also been established.

Designed to prepare candidates for leadership in comprehensive technical vocational education, the program offers op-

tions leading to either the doctor of philosophy or the doctor of education degree.

At present, doctoral options are available in each of three areas of vocational education: agricultural education, in the College of Agriculture; and home economics education and vocational industrial education, in the College of Education. These, as well as master's degree programs, will continue to be offered.

The new program has arisen in response to guidance from three sources: faculty students, and the State Department of Education, which support the new direction of the offering because of emerging changes in the field of vocational education.

Master's and doctor's degrees in academic curriculum and instruction will now be offered by the College of Education in place of the advanced degrees in elementary, secondary and industrial arts education now in effect.

Combining the degrees into one focus — academic curriculum and instruction — would align the advanced degree offerings with the organizational changes effected in the College of Education in 1971, when the Division of Academic Curriculum and Instruction was created and the Departments of Elementary and Secondary Education eliminated.

The chief rationale for the change is that the separation of teacher training programs into elementary and secondary levels has no current functional validity since public schools are no longer simply grade schools or high schools but embrace a wider variety.

Moreover, within what have traditionally been called secondary programs, the training of teachers has followed broad disciplinary lines — mathematics, science, language, etc. — rather than the methodological distinction between teaching elementary versus secondary children.

Penn State Foundation redesignated

Gifts, Endowments office approved

A re-emphasis of Penn State's program to obtain private gifts and grants to enrich the University's educational programs was signaled recently in the redesignation of the Penn State Foundation as the Office of Gifts and Endowments.

The change was recommended to the Board of Trustees by President Oswald to provide clearer identification of the University's fund-raising effort. The Penn State Fund is being established as the vehicle encompassing all private and alumni fund-raising and will incorporate the present Alumni Fund. As a major advisory group to the Trustees and the President in regard to its program of gifts and endowments, a new Penn State Fund Council will be established. The present members of the Foundation Board will become the nucleus of this Council together with other

alumni and friends of Penn State experienced in finance and fund-raising.

As in the past, funds from undesignated gifts to the University will be used to respond to proposals from members of the University community to enrich existing educational programs and to serve as seed money to launch new ventures.

During the 22-year history of Penn State's private fund-raising efforts, undesignated funds have sparked a variety of educational innovations, President Oswald said.

Charles Lupton, who has served as executive director of the Penn State Foundation for the past several years will direct the Office of Gifts and Endowments, and present staff members will be transferred to the new office.

Calendar — June 20-30

Official

Friday, June 21 — Deadline for adding courses.

Meeting

Monday, June 24 — O.T.S.I., 9 a.m. to 5:30 p.m., Room 213 HUB.

Exhibits

Museum of Art — American Quilts, Gallery C, through June 23. Selections from the Permanent Collection, Gallery B and Gallery A (through June 23). Milton Osborne Drawings, Gallery A, opening June 30.

Graduate Commons Gallery — LaVern Grant, oils and sculpture, Charles Holt, photography, opening June 23.

Pattie Library, Rare Books Room — "The Romantic Movement in Literature and the Arts."

SPECIAL EVENTS

Thursday, June 20 — Enter teams for men's softball (fast and slow pitch) and basketball leagues for summer, Room 208 Recreation Bldg., by noon. Open to both undergraduate and graduate students.

Thursday, June 20 — Artists Series, Horror Classics Film Series, "Bride of Frankenstein," 9 p.m., Schwab.

Friday, June 21 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Featuring "David Martin" and "1898."

Saturday-Sunday, June 22-23 — Penn State Chess Tournament, Saturday at 10 a.m., 3 and 8 p.m., Sunday at 9 a.m. and 2 p.m., HUB.

Sunday, June 23 — Interlandia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Monday, June 24 — Duplicate Bridge, 6:45 p.m., HUB ballroom.

Wednesday, June 26 — Artists Series, Horror Classics Film Series, "The Body Snatchers," 9 p.m., Schwab.

Wednesday, June 26 — P.S.U. Sports Car Club, 7:30 p.m., Room 251 Willard.

Thursday, June 27 — Artists Series, Horror Classics Film Series, "Haunting," 9 p.m., Schwab.

Friday, June 28 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Sunday, June 30 — Interlandia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Films

Thursday-Friday, June 20-21 — Commonsplace Theatre, "1984" and "Animal Farm," 8 p.m., Room 112 Kern.

Monday, June 24 — Commons Midway Cinema, "Selling of the Pentagon — Parts I and II," 12:30 p.m., Room 112 Kern.

Wednesday-Thursday, June 26-27 — Commonsplace Theatre, "Spacewalk to the Unknown," 8 and 10 p.m., Room 112 Kern.

Lectures

Dr. F. A. M. deHaan, Fulbright Visiting Scientist, soils and fertilizers, Agricultural University, Wageningen, The Netherlands, four lectures in Agronomy, 4 p.m., Room 301A.

Monday, June 24 — "Phosphate Removal from Sewage Water by Bonding in the Soil System."

Tuesday, June 25 — "Land Disposal of Potato Starch Processing Wastewater."

Wednesday, June 26 — "Anion Interactions with Soil Colloids."

Thursday, June 27 — "Heavy Metal Pollution of Soils in the Netherlands."

Capitol class designs park

A Graduate Program in Regional Planning at Capitol Campus has designed a unique, multi-purpose park for East Donegal Township in Maytown.

The Township Park Commission consulted a wide variety of local groups to learn the recreational needs of the community. The design of the park was then executed by Regional Planning Students at Capitol Campus under the direction of Dr. Francis Ferguson.

The 28-acre park, in addition to baseball and football fields, will have a special area for elderly people, a small children's playground, basketball and tennis courts, and a combination field and ice hockey area.

The plans also include an addition to the present fire house, a parking area and pavilion. A town hall and equipment garage are presently under consideration by the Township supervisors. On one quarter of the area, a residential development is proposed.

The Regional Planning Graduate Students designed the park to make the best use of open space, play areas and necessary facilities in order to serve the leisure time of the entire community.

The chief designers of the project were Thomas Glowacki and Anthony Kadysewski. They were assisted by Edward Chubb, Donald Hartman, Robert Korman, Barbara Long, John Petro, and Gregory Webb.

More retirements announced

Joseph A. E. Hindman, associate professor of engineering at the Ogontz Campus, will retire July 1. A graduate of the U.S. Naval Academy with a bachelor of science degree in engineering, Hindman served as a line officer in the Navy from 1930 until his retirement in 1953. He joined the Ogontz faculty as an instructor in engineering in 1964 after serving as marketing manager for the Burroughs Corp. He was named assistant professor of engineering in 1966 and promoted to associate professor in 1971.

Dr. Ois E. Lancaster will retire on June 30 as associate dean for instruction in the College of Engineering, but he will remain on the faculty next year as George Westinghouse professor of engineering.

A native of Missouri, Dr. Lancaster received the bachelor of science degree in education from Central Missouri State College, the master of science degree in mathematics from the University of Missouri, the doctor of philosophy degree in mathematics from Harvard University, and the doctor of aeronautical engineering from California Institute of Technology.

Prior to coming to Penn State in 1957 as George Westinghouse Professor of Engineering Education, Dr. Lancaster had served as assistant director of the research division, Bureau of Aeronautics, Navy Department; a member of the aviation design research division, Bureau of Aeronautics, Navy Department; a member of the planning staff of the Internal Revenue Service; head of the statistics and economics division of the Post Office Department; assistant professor of mathematics at the University of Maryland; and as an instructor at Harvard University.

The George Westinghouse Professorship is unique nationally, in that the

holder of the chair can devote his entire effort to the research and study of engineering education.

At Penn State, Dr. Lancaster has been involved with the development of engineering faculty, and has received acclaim for directing seminars on effective teaching of engineering at both national and local levels. He has been a leader in determining ways of measuring teaching effectiveness and has directed a graduate program for the preparation of engineers to become teachers of engineering technology in technical institutes and two year colleges. Graduates of this program (about 150) are dispersed throughout 36 states. He has also recently written a book on effective teaching and learning.

In addition to these new educational ventures, Dr. Lancaster has continued in his specialty, aircraft propulsion and operations research. He has written a book and edited another book in the former field, taught classes, and advised graduate students.

As George Westinghouse Professor of Engineering Education, Dr. Lancaster will continue to conduct studies for the development of engineering faculty, conduct his annual seminar for effective teaching, and further improve his faculty evaluation system. He will also teach courses in industrial and aeronautical engineering and will continue his stress on design and engineering education.

Dr. Lois Boe Hyslop, an international authority on Baudelaire and 19th century French literature, is retiring July 1 as professor of French with emerita status. The author of five books, four of them written with her husband, Dr. Francis E. Hyslop, Jr., professor of art history at the University, she joined the faculty in 1948. During

her tenure at Penn State, she became the first of her sex to serve as chairman of the College of the Liberal Arts Planning Committee in 1962 and 1963 and as president of the University's chapter of the American Association of University Professors (1964 to 1968). Between 1963 and 1965, she was also acting head of the Department of French, and she was the first woman selected as a Senior Fellow of the Institute for the Arts and Humanistic Studies. She was graduated from Augustana College in Sioux Falls, S.D., summa cum laude, and then went on to the University of Wisconsin to complete her master of arts and doctor of philosophy degrees by the time she was 25. Her first job was at Susquehanna University, and from there she moved to Skidmore College, serving as chairman of its French Department in 1947 and 1948. Her most recent book, "Henry Beque," was published in 1972, and she is at present completing a book of essays on Baudelaire. In collaboration with her husband, she has written and edited "Baudelaire on Poe," "Baudelaire: A Self Portrait," "Baudelaire as a Literary Critic," and "Baudelaire as a Love Poet and Other Essays." The latter work was the outgrowth of a Baudelaire Symposium attended by more than 200 scholars, which Dr. Hyslop organized in 1967 on the 100th anniversary of the poet's death.

Herbert K. Anders, assistant director of the Cooperative Extension Service and professor of agricultural extension, will retire from the faculty July 1 with 38 years of service. Since 1955, he has been in charge of Extension programming in northwestern Pennsylvania. He currently supervises Extension work in Erie, Crawford, Mercer, Lawrence, Venango, Forest, and Warren counties.

Anders was appointed to the University staff in 1936 as assistant Butler County

agricultural agent. He was employed there until 1943 when he was named acting State County agent. In 1945 he was promoted to Lyscoming County agent and served in that capacity until his appointment as assistant director. A native of Landisville, Mr. Anders received a bachelor of science degree from Penn State in 1935 and master of science degree from Cornell University in 1933. Prior to joining the Extension staff, he was employed by the Farm Security Administration for one year. In 1952, he received the Frank R. Pierce Foundation Fellowship to do graduate work at Cornell University. He was chairman of the State's first Farm-City Week for Kiwanis, of which he has been a member for 30 years and which he has also served in a variety of positions.

William H. Hill, Jr., associate professor of English composition and a member of the faculty since 1947, will retire July 1. He has served as the Commonwealth Campus liaison officer for the Department of English for the past 22 years. His original association with Penn State began in 1929 when he enrolled as a freshman, earning his bachelor of arts degree in 1933. During the next five years, he served as an instructor with the Pennsylvania Department of Public Assistance before assuming the chairmanship of the freshman English program at Nanticoke High School. He left Nanticoke in 1944 and spent three years as chairman of the English Department of Bulis Preparatory School. He joined Penn State's faculty at the Schuylkill Campus where he was assistant administrative head and coordinator of the English program. He received his master of arts degree in English from Penn State in 1952 and moved to University Park. He has taught freshman composition, technical writing and business writing and prepared two revisions of the Correspondence Study Guide for English I.

Promotion

An additional promotion has been announced by President Oswald, to add to the 218 promotions announced last week. It is that of Dr. Catharine P. Fussell, to associate professor of biology, at the McKeesport Campus.

Honors

Dr. William A. Steele, professor of chemistry, is one of 40 United States scientists who received a NATO Senior Fellowship in Science recently, awarded by the National Science Foundation and the Department of State. Recipients of the fellowships will study new scientific techniques and developments abroad under a program designed to foster interchange of information among nations of the North Atlantic Treaty Organization.

Dr. Steele, who first joined the University faculty in 1951 as a doctoral fellow in the Cryogenic Laboratory, was a National Science Foundation pre-doctoral fellow in 1954-55 and NSF post-doctoral fellow in 1955-59. In 1963-64 he was at the Free University of Brussels, Belgium, under an NSF senior post-doctoral fellowship. His low-temperature research in physical chemistry has been supported by a number of National Science Foundation grants.

Five members of the Cooperative Extension Service staff, who last month were named state winners in the seventh annual Public Information Awards Contest, have been selected as northeastern United States regional winners.

The contest, conducted by the Pennsylvania and National Associations of County Agricultural Agents in cooperation with American Products, Inc., is designed to recognize excellence in the use of mass media approaches to Extension teaching and information programs. The five are C. E. Craver, McKean Co. agent; Thomas E. Piper, Adams Co.; N. Alan Bell, Lancaster Co.; John H. Holbert, Bedford Co.; and Dr. Donald A. Harter, area resource development agent, stationed in Lebanon. They will receive cash awards at the annual meeting of the National Association of County Agricultural Agents, in October, and their entries will also be judged in national competition.

Dr. John W. Slocum, Jr., professor of organizational behavior, was elected pres-

ident of the Eastern Academy of Management at the recently held meeting of the Association at the University of Maryland. Prior to being elected president, Professor Slocum served as vice-president for program, chairman for research and publications and editor of a book of readings published by the Association, entitled "Research in Organizations."

Dr. Ralph R. Ricker, who retired in 1970 as associate professor of physical education and special assistant to the dean of the College of Health, Physical Education and Recreation, was honored at the fourth annual Carlisle (Pa.) High School all-sports banquet recently when he was given the Distinguished Alumni Award. The award is given to recognize former Carlisle athletes who have distinguished themselves in the general area of athletics after high school. "Dutch" Ricker, who was also a letterman on Penn State football teams, returned to the University in 1952.

Appointments

Henry M. Libhart, chairman of the art department at Elizabethtown College, will be visiting Professor of Art at Capitol Campus during the summer term. He will teach a course in "Studio Art: Watercolor." He has been a professor of art at Elizabethtown College since 1967 and previously taught at Millersville State, Penn State (University Park), and for two years at Solanco High School in Quarryville. A graduate of the Franklin and Marshall, Libhart did his graduate work at Penn State. His paintings have won numerous prizes and are included in a variety of art collections. He serves as a consultant on American Painting to the Rock Ford Foundation.

Dr. Robert J. Raudabaugh, who for the past year has been serving as a visiting professor of engineering, has been re-appointed for one year. A former national president of the American Society for Metals and the Engineers Joint Council, Dr. Raudabaugh is the first Alumni Distinguished Professor in the College of Engineering, a position created with the support of alumni funds. During the past year, Dr. Raudabaugh has lectured to various engineering classes, participated in the College's Effective Teaching Seminar, prepared a profile of engineering at Penn State, and evaluated existing design

courses in engineering. This year, he will serve as chairman of an interdisciplinary committee on design, to consider a practice-oriented graduate engineering program.

William Empson, emeritus professor of English literature at Sheffield University in England, will serve as a visiting professor of English for four terms beginning July 1. An internationally known scholar in English literature and poetry, in particular, Professor Empson also taught for some years in the Far East. He was at Bunrika Daigaku in Tokyo and at Peking National University in China and served as Chinese editor for the British Broadcasting Corporation from 1941 to 1946.

Dr. Hironao Kojima, assistant professor in organic synthesis at Yamashita University, Kofu, Japan, is serving as adjunct visiting scientist in the Materials Research Laboratory at the University. He began a one-year stay at Penn State on April 1, working with Dr. W. B. White, professor of geochemistry.

In Writing

Richard S. Paul, assistant professor of mathematics, and **M. Leonard Shaevell**, assistant professor of physics, both at the Hazleton Campus, have collaborated on a new mathematics textbook, "Essentials of Technical Mathematics," just published by Prentice-Hall in its Series in Technical Mathematics. The book was written for students in various programs of engineering technology and in community colleges, technical institutes, and junior colleges. The authors' purpose is to provide a firm understanding of essential mathematical principles and to illustrate meaningful ways in which they are applicable to the engineering technologies. Professor Paul and Professor Shaevell are also co-authors of a textbook published in 1970 by Prentice-Hall, "Contemporary Technical Mathematics with Calculus."

Dr. Klaus Friedrich, associate professor of economics, is the author of "International Economic Correlation Issues," a new textbook published by McGraw-Hill Book Co. The volume is designed to introduce students to the field of international economics. To accomplish this, Dr. Friedrich presents several basic theoretical concepts in detail. The conventional diagrammatic trade model is developed in several chapters, as is the concept of the

balance of payments in relation to the foreign exchange market, and Keynesian income determination for the open economy. A member of the faculty since 1967, Dr. Friedrich obtained his bachelor's degree in law at Rheinische-Friedrich-Wilhelms University in Bonn, and his M.A. in economics at Ruperto Carola University in Heidelberg. His Ph.D. in economics was granted by Cornell University.

Dr. Ben W. Weaver, assistant professor of Italian, has compiled "An Annotated Bibliography on the Theater of Italy Svevo," published recently by the University Libraries as part of the Bibliographical Series. He did the research for the bibliography while holding a fellowship grant from the Institute for the Arts and Humanistic Studies, which has awarded him a second grant to work in Trieste, Italy, this summer, doing research on the relationship between Svevo's theater and that of Pirandello.

Dr. Howard B. Palmer, professor and chairman of the Fuel Science Section of the Department of Material Sciences, was co-editor of "Combustion Technology: Some Modern Developments," published recently by Academic Press. Dr. J. M. Beer, University of Sheffield, England, was the other editor and with Dr. Palmer was organizer of a short course on combustion, which he held every two years, which is the basis for the book. Fifteen chapters in the book were prepared by experts in combustion, including Penn State faculty members Dr. Robert H. Essenhigh, fuel scientists; Dr. Robert J. Heinsch, mechanical engineering; and Dr. Philip M. Becker, fuel science.

Leaves

Dr. John M. Shemick, associate professor of industrial arts education, has been granted a leave of absence for six months, beginning Sept. 1. Dr. Shemick will be working with the Peace Corps in Seoul, Korea, training volunteers for work in vocational technical schools.

Dr. Edward G. Coffman, Jr., professor of computer science, has been invited to assume a one-year distinguished visitor post beginning in September at the principal French research institute in computer science, the Laboratoire de Recherche en Informatique et Automatique, in Paris. He will conduct research there and teach at the University of Paris.

News in brief

SECOND RETIREMENT

Dr. Hans Neuberger, professor emeritus of meteorology who retired from Penn State in June 1970 after 33 years of service, is retiring again, this time from the University of South Florida in Tampa where he spent the last 3½ years as visiting professor of geography. He and his wife will continue to live in Sun City Center, Florida.

GIUSTI HONORED

Dr. Joseph P. Giusti, director of the Beaver Campus, was given the Distinguished Service Award for 1974 at Commencement Exercises June 2. The Award is presented each year to the person or organization especially personifying the intent of the award. The Beaver Campus academic community selects the recipient of the award, which last year went to Ernest P. Kline, lieutenant governor of the Commonwealth, for his public service. The citation accompanying the award to Dr. Giusti, said, "You were given a concept and you made it a reality. You took men's dreams, blended them with your own and created a tribute to all who dream. You recognized the strengths in others, welded them together and built a living monument to learning and wisdom."

EXAM LEADER

A graduate student in business logistics achieved the highest examination grade among persons seeking admission to practice before the Interstate Commerce Commission. Gail Roger Dieleman, of Montezuma, Iowa, led 53 other answer applicants who passed the six hour written examination given in February at Interstate Commerce Commission field offices throughout the United States. The Commission reported the successful candidates constituted 56.8 per cent of those examined. Also successfully completing the examination was Joseph L. Cavinato, instructor in business logistics.

STUDENT AWARDS

Five students have received Evan Johnson Awards, given annually in memory of Dr. Evan Johnson, Jr., who served on the mathematics faculty from 1930 until his death in 1965. Chosen for the awards were Richard D. Ankey, sophomore in nuclear engineering; Errol L. Lloyd, junior in computer science; and William M. Kazez, Keith C. Miller, and Kim A. Winnick, all math majors.

The Robert W. Stone Award, which honors the professor of microbiology who is retiring this year, has been given to Bridget A. Polanski, a microbiology major, and to Ira G. Mandel, who is majoring in pre-medicine. The award, which includes a certificate and \$25, was previously known as the Textbook Award. Dr. Stone, who served on the faculty for 37 years, was chairman of the department of bacteriology and later microbiology for a total of 23 years.

The John and Elizabeth Holmes Teas Scholarships, amounting to \$1,000 each, were awarded to Craig A. Mellott, sophomore in physics; Carl J. Phillips, sophomore in chemistry; David Michael Pusch, junior in physics; and Gary Hayes Robertson, junior in physics. The award ceremony was held recently.

Elizabeth and J. Paul Smith Memorial Scholarships of \$1,000 each have been awarded to chemistry majors Gary W. Burling, junior class; Timothy Francis Gallagher, sophomore; Anthony R. Kerlavage, sophomore (Schuykill Campus); and Gerald Edward Lepone, junior.

The Wheeler P. Davey Memorial Scholarship, established in memory of Dr. Davey, professor of chemistry and physics for 25 years, has been awarded to George Bernard Norriss, senior in physics.

John F. Elliott, who was graduated on June 1 with a B.S. in community development, with distinction, has won the Eric A. Walker Award, given annually to the senior who has enhanced the University's reputation "through hard work beyond the classroom." Elliott was a leader in the establishment of "On Drugs, Inc.," the student organization with the purpose of providing continuous and direct access to aid in drug-related matters. The basic purpose of the organization is to prevent adverse psychological and physiological reactions from drug use.

LONDON BUS

During the Summer Term, the London Bus, which makes regular tours of the campus, will operate at 12:45 p.m. and 4 p.m., Monday through Friday. Departure is from the HUB. A guide is provided in each bus to describe the many points of interest viewed from the bus in its circuit of the entire campus.

SUMMER TOURNAMENTS

A summer handball and a summer racquetball tournament will be held this year, open to all staff and students. Play is expected to begin the week of July 10. Entry deadline is Friday, July 5. Both tournaments are singles. There is no entry fee for either tournament, nor are there trophies. Participants should expect to play two matches per week, for the tournament will end before the conclusion of the term. Interested persons may register in the Intramural Office, 206 Rec Bldg. For additional information call 865-5401.

HERSHEY GROWTH

Dr. Harry Prystowsky, provost of the Hershey Campus and dean of the College of Medicine, illustrating the growth of the Center since it opened in 1967, pointed out that the 1974 fall class of potential physicians will have 91 students, compared to 40 admitted the first year. He also noted that the total student population at the Center now numbers more than 700, including the medical students, graduate students, nursing students, MEDEX students, and others receiving training in allied health professions and residents receiving postdoctoral training.

PRESS BOOK

As part of its Series in German Literature, The Pennsylvania State University Press has published a book on, "Kafka's Narrative Theatre" by James Roleston of Yale University. Designed to enable the reader to enter Kafka's world without a preconceived idea about what will be found there, the book analyzes the works represented in it as works in their own right, unpredictable even in retrospect. The author seeks to foster an awareness of the problems of perspective and presentation explored by Kafka in his fiction.

Ferrar named to head Center

Dr. Terry A. Ferrar, associate professor of economics, has been named director of the Center for the Study of Environmental Policy. A graduate of Penn State, where he earned a B.S. in industrial engineering and M.A. in economics, Dr. Ferrar received his M.S. and Ph.D. in economics from Purdue. He joined the faculty in 1971 as assistant professor of economics and during 1972-73 was a visiting lecturer with

Walker memorial election planned

A small planting area in the proposed Penn State Arboretum will be named the Darrell E. Walker Memorial Planting in honor of the late Dr. Darrell E. Walker, professor of plant breeding and head of the Department of Horticulture until his death last July.

Preliminary plans for the area were approved by the Board of Trustees, acting on a proposal of colleagues of Dr. Walker.

While specific plans have not been made, it is proposed that the memorial be a small sitting area including some of Dr. Walker's favorite plant materials, such as dogwood, viburnum, holly, and rhododendron. They would be combined in such a way that a homeowner visiting the area could take away some ideas for his own property. The Arboretum will be located on farms east of Overlook Heights.

Education alumni honor four

Certificates of appreciation have been awarded to four men by the College of Education Alumni Association and the College of Education.

Those honored at a recent luncheon were: Dr. Glenn Gamble, director of Career Development and Placement at Rutgers, the State University of New Jersey; Dr. Daniel S. Seid, director of the Office of International Student Affairs at the University from 1964 to 1974; Dr. Bernard M. Bronstein, assistant executive director of the Penn State Alumni Association; and Dr.

AGRONOMY VISITOR

Dr. F. A. M. deHaan, Agricultural University, Wageningen, The Netherlands, will visit the Department of Agronomy June 24-29 and will give four lectures in that period. As a Fulbright Visiting Scientist, Dr. deHaan, of the department of soils and fertilizers at Wageningen, will be focusing his attention primarily on waste disposal research programs at Penn State, and on the total research program in soil science. His lectures, generally related to sewage and soil pollution problems, will be given Monday through Thursday, at 4 p.m. in Room 301A Agricultural Administration Bldg.

ELECTED

Dr. Richard D. Cunningham, vice president for research and graduate studies, has been elected vice president of the Policy Board, Education, of the American Society of Mechanical Engineers. He will be responsible for the coordination of policies and procedures by which A.S.M.E. can improve engineering education, encourage the development of young engineers, and improve cooperation in raising the standards required for legal practice.

CHOIR'S TOUR

Members of the University Choirs departed last week for a performance tour of seven countries, the group's tenth European tour.

Eighty students from the Chapel Choir, the Concert Choir, the Penn State Singers, and the All-Faith Chapel Choir with director Raymond Brown, professor of music, left from New York on June 14 for the month-long tour.

Fifteen to twenty concerts are planned, including performances in Munich, Innsbruck, Venice, Dalmi, Belgrade, Vienna, and Prague.

Financed by individual Choir members personally and through fund-raising projects, the tour was preceded by a week of intensive rehearsal at University Park. The Choirs sing solely from memory.

Previous tours have featured critically acclaimed performances in Britain, continental Europe, and the Middle East, with nearly 600 students having participated.

the Graduate School of Resource Economics at the University of California at Riverside. Since his return, he has also served as research associate with the Center for Air Environment Studies and the Center for the Study of Environmental Policy. Dr. Ferrar is particularly interested in the application of economics to environmental problems and has written and delivered a number of papers in the field.

PBK chapter elects officers

Dr. Elyu Zen Sun, professor of Chinese history, is serving as president of the Lambda Chapter of Phi Beta Kappa for the year 1974.

Dr. Doris M. Seward, executive assistant to the president, is secretary of the Chapter; Dr. Joseph C. Clay, associate professor of philosophy, treasurer; and Dr. Ira V. Brown, professor of American history, historian.

Members of the Executive Committee include Mrs. Langhorne Brickwedde, assistant professor of physics; Dr. Charles D. Ameringer, associate professor of history; Dr. Barton W. Browning, assistant professor of German; and Dr. Daniel Walden, associate professor of American studies.

Phi Beta Kappa members in the area are urged to affiliate with the Lambda Chapter by contacting any of the officers.

Gordon C. Godbey, associate dean of Continuing Education of the College of Education.

The certificates, engrossed on gold-colored parchment and bearing the 50th anniversary seal of the College of Education, cited the recipients "for exceptional contribution and personal interest in education and in the College's Academic Community." They were presented by Dr. G. Lester Anderson, acting dean of the College of Education.

Exam services charge

As a result of financial exigencies, Examination Services of the University, Division of Instructional Services, now charging departments for answer sheets which formerly were provided free for resident instruction.

The new policy is in line with the Division's practice of recovering costs of materials for their services to resident instruction. An exception has been made in the past for the answer sheets, but rising paper costs and a reduced budget require a charge now.

Boxes of answer sheets may be obtained by departments by issuing an IOT to Examination Services; the materials may be picked up in Room 207 Mitchell Building.

A charge schedule has been sent to all academic departments, the charges varying from \$5 to \$7.50 per 500 sheets, according to the type of form.

Two acquisitions by Ag Library

Two recent acquisitions by the Agriculture and Biological Sciences Library have special significance. They are:

Landmarks of Science. This is a comprehensive collection of source material in its history of science comprising the significant contributions to the advancement of science and technology. This extensive set of scientific works in microfilm, begun in 1966, is now nearly percent complete and includes the full works of nearly 3,000 scientists. The collection, produced by the Readex Microprint Corporation, is housed in the Microforms Department, 6 East Palace.

Science Citation Index. New to the Agriculture and Biological Sciences Library, 205 East Palace, this index offers researchers access to sources cited by authors in current literature and obituaries at least partly the procedure of examining the original bibliographies. Approach is provided by author, cited author, and subject. This tool is also available in the Physical Sciences Library, 230 Davey Laboratory.

Physics announces teaching awards

Citations for outstanding teaching by Graduate Teaching Assistants were made recently by the Department of Physics. To identify those graduate students in the Department whose teaching is superior and whose interest in teaching is strong.

Dr. Roland H. Good, Jr., chairman of the Department of Physics, presented a \$100 check and a framed certificate for outstanding teaching to each award winner: Paul M. Campbell, Gregg M. Gallati, James H. Gray, III, John E. Heldrich, Maria-Teresa Torrado, Eric W. Young.

In addition a certificate recognizing his superior teaching was presented to John A. LaFemina.

Recommendations by faculty members who supervise the undergraduate courses and responses to questionnaires by undergraduates in their classes were considered in making the awards.

July short course on particle size

A three-day short course will be offered by the Mineral Processing Section of the Department of Material Sciences July 16-18 on the subject of "Particle Size Analysis," in which the principal lecturer will be Dr. Richard Hogg, of the mineral processing section. Other lecturers will be Dr. L. G. Austin, Dr. F. F. Aplan, and Dr. E. H. White, all of Penn State, and Dr. R. H. Kaye, director of the Fine Particles Research Institute, Laurentian University, Sudbury, Ontario, Canada. Expected to attend are engineers and scientists concerned with the characterization of particulate materials in industrial practice.

Vol. 3, No. 40
Penn State INTERCOM is a weekly publication for the scientific community of The Pennsylvania State University. Published each Thursday, it contains news, notices, and information and items for the calendar should be sent to the editor by Tuesday of the week preceding publication. Room 207 Old Main Building.

At Radio Astronomy Observatory

Effects of satellite on radio studied

An International series of tests to determine whether the world's first "teaching satellite" will spell disaster for radio astronomy began last week at the University.

The tests were made at the Radio Astronomy Observatory as the satellite directs its radio beam over Appalachia. Additional tests were performed concurrently at the National Radio Astronomy Observatory and nine other observatories within the United States and Canada.

Dr. John P. Hagen, professor and head of the Department of Astronomy at the University, says the tests are necessary because interference from the satellite's signal could force radio astronomers to change the band of frequencies they've used over the last 20 to 30 years, causing the loss of vast amounts of research data. Studies of the sun and of pulsars and quasars, the newly-discovered mysterious celestial sources of radio waves which some astronomers believe are the "keyholes of the universe," would be seriously affected.

The satellite, called ATS-6 for Applica-

tions Technology Satellite, was launched from Cape Canaveral May 30 and is now in a stationary position over the equator at 94 degrees west longitude. It is scheduled to begin beaming televised health and training programs to doctors and school teachers in rural areas of Appalachia, the Rocky Mountains, and Alaska later this month.

The problem, according to Dr. Hagen, lies in the broadcasting frequency assigned to the satellite. Radio astronomers use the frequency band between 2690 and 2700 megahertz. The satellite has been assigned the band immediately adjacent at 2655 to 2690 megahertz. This means, Dr. Hagen says, that there is a probability that the teaching satellite's programs will "spill over" into the next band, obscuring the signals from space. The effect would be something like the interference that develops when two adjacent stations on your home radio come in at the same time.

Dr. Hagen says there is no danger of the satellite interfering with home radio

(Continued on page four)

To study quality and relevance

Undergrad programs under review

An Undergraduate Academic Program Review — designed to encourage the process of continuous review of academic quality and relevance of undergraduate programs — has been instituted at the University.

The review process, approved last December by University President John W. Oswald, is being directed by an Undergraduate Academic Program Review Coordinating Committee chaired by Dr. Robert E. Dunham, vice president for undergraduate studies.

The Committee has developed guidelines for the ongoing review which is differentiating from a departmental or discipline review in that it covers the total program leading to a specific undergraduate degree.

According to the Committee, all requirements within and without the academic unit sponsoring the program should be considered on the basis of quality and relevance or appropriateness. The review process is not to be concerned with cost effectiveness or other fiscal measures of academic programs.

In a letter to all faculty members, the Committee detailed the first step in the process — a Program Self-Assessment by members of the program faculty utilizing criteria approved by the University Faculty Senate. A deadline of Nov. 15, 1974, has been set for the first group of 16 academic programs to complete the self-assessment.

An undergraduate academic program is defined by the University Faculty Senate as an array of courses leading to a degree. Three components in each program are the major requirements, elective courses, and general or common requirements.

"In the self-assessment," Dr. Dunham pointed out, "program faculty will look at each of the three components and also how well they are articulated."

Criteria for the program self-assessment

were developed by the Senate Curricular Affairs Committee and approved by the Senate. They cover wide-ranging aspects of an academic program, including objectives, integrity, faculty, instruction, academic advising, University interaction, services and resources, needs of students and society, and future plans.

The second step in the review process provides for a Program Review Subcom-

First Libraries Award to Mann

Charles W. Mann, Jr. (left), head of the rare books and special collections of the University Libraries, was presented with the 1st "Award for Outstanding Contribution to The Pennsylvania State University Libraries" by Dean Stuart Forth, at a reception June 19 in the courtyard of Pattee Library. The award included a framed citation, a Nilgiri Lion statuette, and a check for \$250. The award program was announced in February as an annual presentation to be made to a Libraries staff member, a member of the University teaching faculty, administrative or research staff, or a benefactor of the Libraries. The program receives support from the Penn State Foundation. The citation read: "The first Award for Outstanding Contribution to the Pennsylvania State University Libraries is presented to Charles W. Mann, Jr. It recognizes his talents and gifts as scholar, teacher, librarian-curator, and, most importantly, as a generous friend and steward of the wealth over which he presides. Mann, who has been curator of the rare books collection for 15 years, and before that was assistant, has had much to do with the development of the special collections program which has served many faculty and students in their research and study."

mittee to study the self-assessment and prepare a report based on guidelines established by the Coordinating Committee.

The Subcommittee's report and another from the Curricular Affairs Committee, following its established criteria, are then submitted to the dean of the College who prepares a final report for the provost. Copies of the final report are to be made available to the program head and committees involved in the review.

(Continued on page four)

Council to study role changes

The University Council last week established a three-member committee to comment on extensive changes in the composition and role of the Council proposed in the report of the Joint Senate-Administrative Committee on Governance.

Dr. Charles Hosler, dean of the College of Earth and Mineral Sciences, was named chairman of the committee. Other members are Dr. John J. Coyle, professor and head of the Department of Business Logistics; and Mark S. Singel, undergraduate student member of the Council.

The governance report, approved by the Faculty Senate on May 7, recommended that the Council become a coordinating body made up of the senior officers of the Senate, the student government bodies, and the Council of Academic Deans, with the University Provost continuing as a member.

Present functions relating to policy on academic program priorities, calendar policy, fact-finding studies, and recommendations to the President would be discontinued under the joint committee recommendations.

In a brief discussion of the recommendation, the Council reviewed the Board of Trustees document establishing the Council in 1970.

The Council also received an interim report on the spring evaluation of courses and instruction by graduating seniors from Leslie P. Greenhill, assistant vice president for academic services, and David W. Stickell, supervisor of examination services. A final report is expected to be made at the next meeting of the Council on July 18.

Dr. Donald V. Josephson, professor and head of the department of dairy science, attended his first meeting of the Council as a Faculty Senate nominee succeeding Dr. Charles N. Cofer.

Calendar—June 27-July 7

SPECIAL EVENTS

Thursday, June 27 — Artists Series, Horror Classics Film Series, "Haunting," 9 p.m., Schwab.

Thursday, June 28 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern.

Sunday, June 30 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 p.m., Johnston (East Halls) Hall Free Talk Center. Open to everyone.

Sunday, June 30 — Interlandia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Monday, July 1 — Duplicate Bridge, 6:45 p.m., HUB ballroom.

Wednesday, July 3 — Chess Club, 8 p.m., ground floor HUB.

Wednesday, July 3 — Meditation, sponsored by Office of Religious Affairs, 12:30 p.m., Helen Eakin Eisenhower Chapel. Rev. Ned Weller, Methodist Campus Ministry, on "Death/Eternal Life."

Friday, July 5 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Featuring "Deb Greeroff," "John Davids" and films.

Sunday, July 7 — Interlandia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

SEMINARS

Thursday, June 27 — Agronomy, 4 p.m., Room 301A Agricultural Administration Bldg. Fulbright Visiting Scientist, Dr. F. A. M. deHean, Agricultural University, Wageningen, The Netherlands, on "Heavy

Metal Pollution of Soils in the Netherlands."

Official

Friday, June 28 — File for Pass-Fall.

Friday, June 28 — File for Repeat Course.

Monday-Tuesday, July 1-2 — File for Pass-Fall.

Monday-Tuesday, July 1-2 — File for Repeat Course.

Tuesday, July 2 — Preregistration deadline.

Thursday, July 4 — No classes; offices closed all day.

Films

Thursday, June 27 — Commonsplace Theatre, "Spacechase to the Unknown," 8 and 10 p.m., Room 112 Kern.

Monday, July 1 — Commons Midday Cinema, "Mystery of the Stonehenge," 12:30 p.m., Room 112 Kern.

Exhibits

Museum of Art — Milton Osborne Drawings, Gallery A, opening June 30. Selections from the Permanent Collection, Gallery B. (Free guided tours every Tuesday at 1:30 p.m.)

Zolter Gallery — Central Pennsylvania Festival of the Arts, opening July 7, Graduate Commons Gallery — La Vern Grant, oils and sculpture. Charles Hoot, photography.

Pattee Library — "The Romantic Movement in Literature and the Arts," Rare Books Room.

Three retirements announced

Francis E. Hyslop, associated with the University for 40 years, will retire July 1 as professor emeritus of art history. He has taught the history of art and architecture to thousands of students and made important contributions to the art and heritage of the University since joining the faculty in 1934. He was instrumental in the addition of such integral parts of the Penn State scene as the Land Grant frescoes in Old Main and the Nittany Lion near Recreation Bldg. and in the expansion of the University collection of woodcuts, etchings, lithographs, water colors, drawings, and oil paintings. He also aided in the development of an impressive slide collection in the Department of Art History Library. A Philadelphia native, he was educated at Princeton, the University of Paris, and the University of Brussels, and he has traveled widely in Europe engaging in research in art history. Among his many scholarly articles, books, reviews, and translations are two translations of works by Le Corbusier, and he has co-authored four books on Beaudelaire with his wife, Lois Boe Hyslop, professor of Romance languages who is also retiring July 1.

Dr. Robert W. Stone will retire July 1 as professor emeritus of bacteriology after serving on the faculty for 37 years. He was professor and head of the department of bacteriology, then in the College of Agriculture, and was named chairman of the new Division of Biological Sciences in 1959. Four years later, the department of microbiology was transferred to the College of Science, and Dr. Stone served as department head until 1970, when he gave up administrative responsibilities, continuing as professor of bacteriology. A native of Oregon, he earned his B.S. degree at Oregon State University, obtaining the Ph.D. at Iowa State University. At Penn State, he coordinated the program in medical tech-

nology in addition to teaching, administrative, and research work. He has made extensive studies in the field of bacterial physiology, sludge fermentation, and penicillin production. He was among the first microbiologists to show that virtually every type of naturally occurring hydrocarbon can be degraded by microorganisms. Since 1970 he has conducted research on the function of bacteria in strip mine soils, the study being supported by the U.S. Bureau of Mines and the College of Agriculture; he intends to continue with this research in retirement. He is conservation chairman of the local Sierra Club group, interested in the Club's efforts to have more land in Eastern U.S. designated officially wilderness areas.

Langhorne H. Brickwedde, assistant professor of physics, will retire July 1, but plans to continue professional activities in the Department of Physics. He began teaching at the University on a part-time basis in 1963 and became a full-time member of the physics faculty in 1967. She has taught undergraduate courses and has been in charge of developing the physics laboratory for non-science majors.

Before coming to Penn State, she was employed by the U.S. National Bureau of Standards in Washington, D.C., engaged in research and maintenance of the primary standard of electromotive force — the international volt. She was employed several summers as a chemist at the Los Alamos Scientific Laboratory. A graduate in the first class of the Junior College of Augusta (now Augusta College), she earned two degrees at the University of Georgia, the bachelor of science in chemistry and the master of science in physics. She was honored recently by her colleagues in the Physics Department, who established the Langhorne H. Brickwedde Award for outstanding students in physics.

HONORS

OUTSTANDING TEACHER in the Ogontz Campus, Dr. Claire Hirsfield, associate professor of history, received the award of Commencement ceremonies from Dr. Tony Mobley, associate professor of physical education. Dr. Hirsfield was cited for exceptional ability to generate enthusiasm and motivation for the study of history, through unique approaches to the subject matter, and for her warm interest in the personal and academic growth of each of her students. The recipient of the award, given annually, is selected by the Ogontz Faculty Senate. A citation, plaque, and check for \$200 are given to the honored faculty member.

Dr. Robert Pitts, left above, assistant professor of business administration, received the College of Business Administration Outstanding Teacher Award from the president of the Student Council, Kenneth A. Orton, at a recent ceremony. The College's Alumni Association joins with the Student Council in sponsoring the award, which includes a \$100 U.S. Savings Bond and engraved Nittany Lion statuette.

Dr. Forrest J. Remick, associate professor of nuclear engineering, director of the Institute for Science and Engineering, assistant to the Vice President for Research and Graduate Studies, and new coordinator of energy programs for the University, has been elevated to "Fellow of the American Nuclear Society." The announcement was made Tuesday of this week at the 50th annual meeting of the ANS in Philadelphia. He was honored for his "contribution to the development of the safe operation and utilization of university research reactors; for his contributions to the training and licensing of reactor operations personnel; for his service to ANS; and for his devotion to communicating with the general public on the peaceful uses of nuclear engineering."

Margaret E. Jennings, assistant professor of physical education, Ogontz Campus, was cited as Outstanding Academic Adviser for 1973-74, selected by a Faculty Senate committee from among nominees whose names were submitted by both students and faculty. She is advisor for the College of Human Development at Ogontz.

Also at Ogontz, Douglas McDowell, instructor in sociology was named 1974 Chief Ogontz. The honor is bestowed of a faculty member each year by the student government association, recognizing "dedication, inspiration, educational ideals, active participation and outstanding contributions to student life."

DEATH

Dr. William F. Hall, professor emeritus of agricultural education and a member of the faculty from 1921 to 1957, died June 17 at the age of 82, in State College. He began his long career in education even before college, teaching in a one-room elementary school in Perry County when he was 18. Subsequently he enrolled at Millersville State Teachers College, became assistant principal of the Duncannon High School in 1913-14 and principal of a Lancaster Co. high school the following year. He enrolled at Penn State in 1915, but his studies were interrupted by military service during World War I, so his degree wasn't conferred until 1920. He taught in Delaware and Huntingdon counties, then was appointed instructor in agricultural education at Penn State in 1921. He received an M.S. degree in 1924. Cornell University conferred the Ph.D. in 1934.

LEAVES

Dr. Jane M. Singh, associate professor of elementary education, for six months beginning June 1, 1975, to make a comparative study of early childhood education programs in mainland China, Russia and England, specifically looking for the rationale of the importation into these countries of American authored-illustrated books for use in early childhood education programs.

Grace E. Laubach, for the current Summer Term, to study pediatric nursing at the University of Pittsburgh. She is associate professor of nursing assigned to the Milton S. Hershey Medical Center.

Dr. Gladys Ritchie, associate professor of speech communication at County Campus, Springdale, Fall Term 1975, to do graduate work at Temple University, use the archives of the Library of Congress and the American Film Institute, and use the film library of the Museum of Modern Art, New York, and facilities of New York University, in a study of film as a communicative art.

Dr. Gabriel M. Escobar, associate professor of anthropology, for one year beginning July 1, to teach and do research in the department of anthropology at Catholic University of Peru in Lima. He will also take part in an international faculty seminar on Andean studies.

Dr. John R. Nichols, professor of social science and psychology at the Capital Campus, will be on leave during the Winter and Spring Terms, 1975, to write a book on the compulsive use of chemical agents such as drugs and alcohol.

Dr. Amos G. Hollinger, associate professor of physics at the Altoona Campus, will study the philosophy and history of modern physics during a one-year leave of absence beginning July 1. Included will be a study of quantum mechanics and general relativity at the Boston University Center for the Philosophy and History of Science.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For procedural and funding source information, call 865-1372.

June 27, 1974

(135-1) RANN guidelines for unsolicited proposals have been issued by the National Science Foundation. Because the objectives of the program, Research Applied to National Needs, differ from general NSF objectives, RANN guidelines should differ sharply. (See NSF 73-37 RANN guidelines).

The principal elements of the RANN program are: . . . Energy Research and Technology — solar and geothermal energy, energy conversion and storage, energy systems and resources, advanced alternative propulsion, and energy and fuel transportation;

. . . Advanced Technology Applications — disaster and natural hazard research and technological opportunities;

. . . Environmental Systems and Resources — regional environmental systems, environmental aspects of space contaminants, weather modification, and environmental effects of energy;

. . . Social Systems and Human Resources — municipal systems and services, human resources and services, social and environmental and public regulation and economic productivity; and . . . Exploratory Research and Problem Assessment — technology assessment, consumer and the marketplace, minority group problems, societal implications of an aging population, and technology-related transitional problems. (NSF 73-712 is the designation for NSF programs and guidelines that apply to other NSF research programs.)

(135-2) Academic Institutions can apply to the Office of Education for grants to fund library acquisitions. OERI program, Grants for College Library Resources, will pay costs of ordering, processing, and cataloging books and materials, plus delivery to place of use. Basic grants may not exceed \$5,000 for a single institutional applicant nor exceed that amount per institution for a combination of institutions. Supplemental Grants are also available in addition to the basic grant under certain conditions. Special Purpose Grants are also available with emphasis on areas of economic and social deprivation, concentration of minority groups, and research and training toward support for these conditions. Proposed rules (Ref. 39FR17656, 5/29/74) have been distributed.

(135-3) The Office of Education (OE) has issued regulations Strengthening Development Institutions Program (Ref. 39FR16649, 5/29/74). Two- or four-year institutions qualify. Two-year institu-

tions must have a full-time equivalent enrollment of at least 300 but not more than 10,100. Other criteria are based on full-time enrollment, degree level among faculty, faculty salaries, students from low income families, budget, and total volumes in library. The program objectives are carried out through cooperative arrangements in which developing institutions draw upon the talent and experience of assisting institutions of higher education. National Teaching Fellows may be requested to release faculty to developing institutions and Professors Emeriti may be requested to make special contributions to institutional needs. Two types of arrangements will be funded — bilateral between applicant and assisting organization and consortium between applicant developing institution and at least two other developing institutions. This latter may also include an assisting institution. These regulations have been distributed. The closing date for receipt of applications is Oct. 31, 1974. (Ref. 39FR21001, 6/17/74).

(135-4) The Bureau of Education for the Handicapped (BEH) has been designated a major administrative unit of the Office of Education (OE) and assigned an annual budget of from \$200 to \$300 million. BEH now has four divisions: Division of Innovation and Development; Division of demonstration, and experimental programs; Division of Personnel Preparation — training programs for teachers, clinicians, and allied personnel; Division of Assistance to States — financial and technical aid to States, education agencies and institutions of higher education serving the handicapped; and the Division of Media Services — educational and media technology.

(135-5) U.S. Dept. of Housing and Urban Development (Ass. Sec. for Policy Development and Research, Washington, A.C. 20470) provides doctoral dissertation grants to \$5,000 per year. Student stipend of \$4000 plus \$500-\$1600 dependency allowance may be part of grant. Faculty on leave to teach degrees may receive larger stipends. Favorable to doctoral students, computer time, stipend, indirect costs are allowable. A \$2500 cost allowance is allowable out of which tuition may be paid. Closing date for applications are Nov. 1 and March 1. Students must have passed comprehensive examination by start of fellowship tenure. Application instructions may be picked up from the office. For further information write to the address given above.

REMINERS AND DEADLINE DATES

Aug. 1 for Instructional Development Improvement Implementation Program (May 1974 INTERCOM 129-4). Aug. 1 for New Development Grants (May 23 INTERCOM 130-2). . . . Aug. 1 and Oct. 1 for Housing and Urban Development (May 23 INTERCOM 131-1). . . . Aug. 15 for NEA Regional Development Program (May 23 INTERCOM 130-1). . . . Aug. 31 for NSF US-Japan Cooperative Science Program (June 28 INTERCOM 132-2).

Vol. 3, No. 41

June 27, 1974

Penn State INTERCOM is a weekly publication for the academic community of the Pennsylvania State University, published each Thursday when classes are in session. General information and items for the calendar should be sent to the editor by Tuesday of the week preceding publication date, Room 312 Old Main. Editor: W. F. Ackerman Phone 865-7517

Five Service Awards In College of Agriculture

Dr. Henry R. Fortmann, (center in right photo) assistant director of the Agricultural Experiment Station and Regional Coordinator of the Northeastern Association of Agr. Exp. Station Directors, joined the faculty as assistant professor of agronomy in 1949. Eight years later he took his present post, being concerned with the operation of off-campus field research laboratories. A graduate of the U. of Wisconsin, he obtained the M.S. degree at Oregon State and the Ph.D. in plant breeding at Cornell. He served with the U.S. Marine Corps in the Pacific Theater in 1943-45. Presenting him with the 25-year Service Award certificate is College of Agriculture Dean James M. Buxton (far right), with Dr. Walter L. Thomas, associate dean for research, observing.

Dr. Stuart Patton, since 1966 Even Pugh Professor of Agriculture, seated in photo at left, received the 25-year Service Award from Dean Beattie, with Dairy Science Dept. head Dr. Donald Josephson (left) as witness. Dr. Patton came to Penn State as a freshman when Dr. Josephson was an instructor in dairy husbandry. After military service in the Pacific and work in private industry, he returned to Penn State as assistant professor of dairy manufacturing. His research since then, known internationally, has taken many directions, but one in particular, the study of lipids, has gained much attention.

Dr. Robert L. Cowan, professor of animal nutrition, accepts the Service Award certificate from Dean Beattie, with Dr. R. Baumgard, head of the animal science department, looking on. Dr. Cowan, who has done extensive research on the nutrition of deer, came to Penn State as a freshman in agricultural biochemistry and received all three degrees here, in 1943, 1949 and 1952. He joined the faculty in 1949, as instructor, after serving as graduate assistant. He served in the U.S. Navy from 1943 to 1946 and was a food chemist for General Foods Corp.

Lloyd E. Adams, professor of entomology extension since 1955, accepts the comfort of the Penn State Chair, while Dean Beattie prepares to give him the Service Award certificate and Dr. Beckford F. Coon, head of the entomology department, is witness. A graduate of the University at Missouri, with a master's degree also from Missouri, Adams was a state entomologist in the Show-Me state before being appointed assistant extension entomologist at Penn State in 1945. He served in the U.S. Army, from 1941 to 1946, with service in the South Pacific, advancing to the rank of major.

Orvel A. Schmidt, associate professor of forestry and administrative assistant to the director of the School of Forestry, who is W. W. Word, at left, actually has 26 years of service at the University and has announced his retirement as of June 1, a fact that was noted in the June 8 issue of INTERCOM (which see). A graduate of the University of Michigan, he also obtained a Master of Forestry degree there.

Library receives research grant

The Penn State Library is a recipient of a research grant from the National Agricultural Library. Research grants for utilization of the CAIN (Cataloging-Indexing Information) data base on-line have been awarded to eight land-grant university libraries, each grant being for \$3,500 to be used for subscription service fees and communication costs in direct support of CAIN on-line. CAIN is a computerized on-line bibliographic search service on agricultural literature.

Each library will investigate a different research project and report its findings. Work will begin this summer and continue throughout the year. Personnel will be sent from each university for an intensive training course at the National Agricultural Library. Dr. Keith Roe and Mr. Robert Seeds will represent the Libraries.

The research project, which was proposed by Vladimir Micuda, Life Sciences Librarian, will be to determine the effect of CAIN-ON-LINE services on the agricultural research in progress at The Pennsylvania State University; to ascertain the effect of CAIN-ON-LINE services on the present dissertation research being undertaken by doctoral candidates in the College of Agriculture at Pennsylvania State University; and to evaluate the application of CAIN-ON-LINE services to research projects conducted by the Fusarium Research Center.

Chapel mid-week meditations

A series of weekly meditations on Wednesdays from 12 noon to 12:30 p.m. in the Helen Eakin Eisenhower Chapel is being sponsored by the Office of Religious Affairs.

Entitled, "Escence," which is defined as "the process of beginning," the meditations have been planned by Charles L. Coleman, program director of religious affairs. The resource leaders are representatives of the Campus Ministry. Musicians, soloists and readers are drawn from the campus and the community.

The purpose of the series is to provide an opportunity for students and faculty of various religious persuasions to develop their imaginations and meditation skills and to discover their natural gifts for renewing the mind, body, and spirit.

Future sessions will deal with "Death/

Eternal Life," led by the Rev. Ned Weller of the Methodist Campus Ministry, July 3; "Man/Woman," led by the Rev. Quentin Schaut, O.S.B., Catholic Chaplain, with Dorothy Flexner, organist, and Carol Stoltz, soloist, July 10; "Love," led by the Rev. Donald Davis of the United Campus Ministry, with Mary Ann Frazier, organist, July 17.

"Future/Hope," led by the Rev. Imgart Soltan of the United Campus Ministry, with Roger Boop, organist, and Tommie Irwin, soloist, July 24; "Spirit," led by the Rev. Joseph U. Gerg, O.S.B., Catholic Chaplain, with Roger Boop, organist, and Debra Fatula, soloist, July 31; "Life," led by the Rev. Leon B. Hall of the Black Christian Fellowship, with Prof. Joseph Wigley, reader, and Jay Martin, organist, Aug. 7; and "Joy," led by the Rev. Mr. Coleman, with Jay Martin, organist.

Creative dramatics for children

A free workshop, Creative Dramatics for Children, will be conducted this summer by the Department of Theatre and Film beginning Monday, July 8.

Boys and girls entering the fourth or fifth grades this fall are eligible to attend this non-competitive group experience based on games, exercises, and improvisational techniques which enable the child to explore his five senses and his imaginative powers and

to develop greater sensitivity to himself, others, and his environment.

Sessions will be conducted from 9:45 to 10:45 a.m. on Mondays, Wednesdays, and Fridays through August 21.

Parents interested in having their children attend should call Alex Krakover, course instructor, 865-5586, by July 5. Registration by telephone is necessary as only a limited number of children may be accommodated.

WPSX highlights

The court-martial trial of the first black man ever to graduate from West Point is the subject of "The Trial of Henry Flipper" Saturday, June 23, at 9:00 p.m. on WPSX-TV, Channel 3. The hour-long dramatized documentary focuses on the 1881 military trial for embezzlement and Flipper's lifelong efforts to clear his name. Though found not guilty of embezzlement, Flipper was dismissed from service for conduct unbecoming an officer and gentleman. He later led a successful civilian life, becoming assistant to then Secretary of the Interior Albert B. Fall in 1921.

"The Impeachment of Andrew Johnson" is the "PBS Special of the Week" presentation Monday, July 1, at 8:00 p.m. The hour-long program combines a re-creation of the actual impeachment proceedings against Andrew Johnson with a discussion of how these proceedings may be important to the present impeachment problem.

Satmyl Weintraub, research professor of English and director of the Institute for the Arts and Humanistic Studies, talks about the artists of the late Victorian era on "Talkabout" Monday at 7:00 p.m. and Tuesday, July 2, at 3 p.m.

"Man Builds, Man Destroys," a series of half-hour documentaries about the international ecology crisis, begins Tuesday, July 2, at 8:00 p.m. on WPSX-TV. The first program, subtitled "It Can Be Done," examines three specific environmental situations and how people are dealing with them. Included are views of noise pollution in New York City, mercury poisoning in Minamata, Japan, and the practice of spraying DDT in Connecticut.

Colored pencil drawing, "Wrigley Tower and Chicago Tribune Bldg." is among the works of Milton Osborne which go on display June 30 at the Museum of Art.

Osborne exhibit

A show of drawings by Dr. Milton S. Osborne, a long-time Centre County resident, will open on Sunday, June 30, in the Museum of Art. Dr. Osborne, who died last year at the age of 76, was professor emeritus of architecture at the University and head of the architecture department at Penn State from 1946 until his retirement in 1962.

Sketches of many of the historical structures visited during the architect's travels in Europe, Canada, Mexico, and the United States are featured in the exhibit of 58 works, on view through Sept. 1 in Gallery A.

Dr. Osborne served as chairman of the Centre Regional Commission and as a member of the State College Planning Commission, also engaging in consulting work which included the design of the Gettysburg home of President Eisenhower.

Exhibited widely in the United States and Canada, his work included sketches of colonial and classic revival buildings which are now part of the Library of Congress collection. The Pennsylvania Historical Museum numbers several of his drawings of historic buildings in the state in its permanent collection.

Museum gallery and store hours are noon to five p.m. daily except Monday, when the facility is closed. Free public tours of exhibits, which currently include many works from the Museum's Permanent Collection, are conducted every Thursday at 1:30 p.m.

EFFECTS —

(Continued from page one)

or television set. They're just not sensitive enough. The supersensitive radio telescopes will be the only device affected.

The tests are under the direction of the Committee on Radio Frequencies of the National Academy of Science and are being coordinated by the National Radio Astronomy Observatory in cooperation with the National Aeronautics and Space Administration.

Dr. Paul N. Swanson, assistant professor of astronomy, and Raymond W. Vogt, research associate in astronomy, will work with Dr. Hagen on the Penn State phase of the tests.

The Penn State team expects to issue a report in coordination with the other members of the testing program staff.

Dr. Hagen is hopeful that the tests will show that severe interference does not occur. However, he adds, "If the interference is severe, the group will be in a position to convince our national authorities and through them the International Telecommunications Union that satellites of this type should be allocated to another frequency band at the next World Administrative Conference of the ITU or that further work needs to be done in the development of more efficient radio frequency filters which could be installed in satellite transmitters to keep the frequencies radiated by the satellite within their assigned bands."

Dance, theatre, music, exhibits

Arts featured in summer program

Nittany Mountain Summer, a new concept in family programming in the visual and performing arts at the University, begins on July 31 with offerings in professional dance, theatre, and music and a special exhibit in the Museum of Art.

A three-week residency of the Pennsylvania Ballet and its resident Pennsylvania Orchestra, two classic American plays of the four programmed by the Pennsylvania State Festival Theatre, and a show of works by Philadelphia artists will be featured in the first annual program, with events scheduled almost daily through Aug. 17.

Six weekend concerts by the Ballet Company, at 8 p.m. on Aug. 2, 3, 9, 10, 16, and 17, will be highlighted by two world premieres of dances choreographed for the dancers.

The Ballet companies will mark the first full-scale theatrical use of new University Auditorium, which opened in May with performances by the Pittsburgh Symphony Orchestra and the University Chorus.

The Pennsylvania Orchestra, which will be resident with both the Ballet and the Philadelphia Grand Opera, will present a series of free concerts at 8 p.m. Wednesdays beginning July 31, in the Music Building Recital Hall at the University. The shirtsleeve concerts will be set informally with frequent commentary by music director Maurice Kaplow on the three programs of music spanning seven centuries.

Also as part of the Ballet residency, associate artistic director Benjamin Harkavy will conduct open public sessions at 4 o'clock on Saturday afternoons before the concerts. In University Auditorium, with company dancers, he will explore a range of subjects related to the Ballet, from the choreography of a dance to current trends in the ballet dance form, which is enjoying increasing popularity in America.

Cole Porter's "Kiss Me Kate," in the Playhouse Theatre, and Arthur Miller's "Death of a Salesman," in the Pavilion Theatre, will be staged by the Festival

Theatre beginning Aug. 1 and 2, with Saturday matinees and performances nightly except Mondays.

Free public forums are also planned to give a behind-the-scenes look at the two plays, at 4 o'clock on the afternoons of Aug. 8 and 9 in the theatres.

In the Museum of Art at the University, new and established Philadelphia artists will be shown in a Nittany Mountain Summer exhibit opening Aug. 4 in Gallery C. A variety of works in many media will be displayed in the show, which will continue through Sept. 1.

Ticket information may be obtained by calling the University at 814-865-2242. The box offices opened June 24 for the theatre and ballet concerts.

Stone Valley visitors profiled

A profile of visitors to the University's 700-acre recreation area at Stone Valley, in Huntingdon County, has been developed by researchers at the College of Health, Physical Education and Recreation from a survey directed by Dr. Betty van der Smissen, professor of recreation.

The data, taken last year, indicate for one thing that visitors are most likely to be adults who live within a radius of 40 miles of Stone Valley or who have some association with the University. The survey also suggests that parties of men and women were most frequent visitors. About 20 per cent of those in the 1,404 persons questioned were men and women and women with children; another 14 per cent were men alone. About 77 per cent were associated in some way with the University.

Most of the visitors were students, faculty or staff and their families, and others were relatives of students or alumni. While visitors came from 51 of the 67 counties of the State, about half were from Centre, Huntingdon, and Blair Counties. Fewer than one per cent came from other states. A third of those questioned indicated that

Pennsylvania Ballet Co. dancers in residence at the University this summer will give 10 performances Aug. 2, 3, 9, 10, 16 and 17 in University Auditorium, the first full-scale theatrical performance at the facility. Tickets are currently on sale for these performances as well as for University Theatre productions, at the box offices. Information about tickets may be obtained by calling 814-865-2242.

they were visiting the facility for the first time, and about five per cent had used Stone Valley since it was opened in 1962. Canoeing appeared to be the most popular activity, followed by picnicking, fishing, hiking, and rowing. Most of the visitors came in late summer months, but one in five indicated that they also came in cold weather for such outdoor recreation as ice-skating and ice-fishing.

In general, Stone Valley visitors consider the area one of high environmental quality and natural attractiveness. Comments and suggestions offered by 240 of the 1,404 persons surveyed suggested the incorporation of a swimming area, the dropping of the 50 cent parking fee, and improvements to the access road.

Working with Dr. van der Smissen on the investigation team were Dr. Jerold E. Elliott, associate professor of recreation, and parks and director of Stone Valley; Dale Roth, associate director for support services at Stone Valley; Daniel J. White and Jean L. Kinneer, research assistants; and James A. Burkhardt and Stephen S. Light, graduate students.

UNDERGRAD —

(Continued from page one)

According to Dr. Dunham, the program represents an opportunity for faculty members to review their undergraduate academic programs and "to begin what we hope will be a continuous process of review so that programs can maintain or achieve a high level of quality."

"It asserts the necessity for faculty members to participate in improving the academic quality of the program," he added, "and the Coordinating Committee is eager to work with them to fulfill that opportunity."

"In assessing the strength, quality and effectiveness of our undergraduate academic programs, I expect we'll be impressed with most of the undergraduate programs in this University."

Members of the Undergraduate Academic Review Coordinating Committee, besides Dr. Dunham, are Dr. Asa J. Berlin, professor of speech pathology and chairman of the Senate Academic Affairs Committee; Dr. Victor L. Dupuis, professor of education and chairman of the Curricular Affairs Committee; Joseph Kaplan, president of the Student Academic Assembly; Dr. Arthur O. Lewis, associate dean of the College of the Liberal Arts; Dr. Matthew Rosenshine, associate professor of industrial engineering, and Kiyoe Mizusawa, associate professor of psychology at Behrend College.

Staff vacancies

University faculty or staff members who are interested in any of the following exempt or staff non-exempt jobs listed below may apply by calling Employment Office, 865-1367 (Network Line 475-1367). Do not contact the area having the vacancy. Applications will be accepted until: 5:00 p.m., July 11, 1976.

FIELD SUPERVISOR, OHIA, COLLEGE OF AGRICULTURE — University Park
Responsible for the training and data reporting accuracy of the Dairy Herd Improvement Association (DHIA) personnel. Check accuracy of data and for weighing and sampling milk in the OHIA Program. Interpret OHIA rules to supervisors and dairymen. Counsel and advise OHIA directors. Associate Oakes or equivalent preferably dairy science plus two to three years related experience. Knowledge of milk sampling procedures, feed management and data collection techniques related to dairy operations is desirable. Requires extensive travel throughout Pennsylvania.

ASSISTANT COORDINATOR, STUDENT AFFAIRS — University Park
Assists Area Coordinator in supervising residence hall staff and student programming in a residence hall community housing 1200 to 4000 students. Master's degree or equivalent experience required.

RESEARCH AIOE (MICROBIOLOGY), COLLEGE OF SCIENCE — University Park
Responsible for conducting research tasks pertaining to study in Microbiology. Prepare culture bacteria and bacteriophage. Conduct experiments to assess the pattern of damage suffered by the cytoplasmic membrane of the host bacterial cell during the replication of the infecting virus. Prepare bacterial and bacteriophage systems for electron microscopy. Operate variety of laboratory equipment such as spectrophotometer and microscope. Perform literature searches. B.S. degree or equivalent in microbiology and some training in bacteriology. Two to three years related experience.

ACCOUNTANT, DINING HALLS, HOUSING AND FOOD SERVICES — University Park

Responsible for the control and coordination of accounting procedures during dining hall, for financial statements of the dining units and departmental accounting and departmental income control. A Bachelor's degree or equivalent in accounting and one to two years related experience.

RESIDENCE HALL COORDINATOR, STUDENT AFFAIRS — University Park
Responsible for promotion of relationships with services and departments involved with the Residence Hall Programs and coordination of Residence Hall Area. Master's degree or equivalent in Behavioral Science and two to three years of related experience are required.

PENN STATE intercom

Volume 3, Number 42

July 4, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

University's appropriation bill passed

Provost Russell E. Larson has thanked the Legislature for passage last week of the \$94,132,000 University appropriation bill for the 1974-75 fiscal year.

"The bill passed by the Legislature Wednesday enables us to grant much-needed salary increases as of July 1," Dr. Larson said. "Together with additional revenues from an increase in tuition, it will also help us meet in part the added operational costs brought on by the present inflationary spiral.

"We are also grateful for passage of the bill before the beginning of the new fiscal year, since it will permit us to make effective distribution of financial resources throughout the budget year."

The bill passed by the Legislature June 21 represents an eight percent increase over the \$87,159,000 appropriated for the University in 1973-74.

Still unresolved, Dr. Larson said, is the question of a \$1.7 million increase in the University's share of State retirement payments made necessary by passage of Act 31 providing for substantial increases in State retirement benefits.

The University was notified of this action on April 5 — too late to be included in the Governor's budget message — and represented an entirely unexpected addition to the University's costs for 1974-75.

Black Studies director is sought

A director is being sought for the University's Black Studies Program; it is considered to be a key position, and the person to fill it must be highly qualified, with a doctorate, teaching experience, publications, and a keen interest in developing a sound academic program.

Anyone interested in the position should send vita and letters of recommendation to UNIVERSITY BLACK STUDIES COMMITTEE, Box 905, Room 117 Old Main, The Pennsylvania State University, University Park, Pa. 16802.

Dr. Cyril E. Griffith is chairman of the University Black Studies Committee.

VSC organizes free Day Camp

The Volunteer Service Center, which arranges a variety of service activities manned by volunteer students, staff and faculty, will conduct a free Day Camp this summer, for children 5-11, as a pilot program.

The activities will be recreational and educational, held on the HUB lawn and in the HUB ballroom, with field trips added. Mid-morning refreshments will be served.

The sessions will be between July 9 and Aug. 8 on Tuesdays and Thursdays, for three hours beginning at 9:30 a.m. Children will be welcomed on a first-come, first-served basis.

A preliminary telephone registration is needed (formal registration will be completed July 9 at 9:30 a.m. in the HUB ballroom) and may be done by calling 865-3431 between 8 a.m. and 5 p.m. or David Noble, coordinator, 237-5919, in early evenings.

Music literature gift honors Jedelev

The Department of Music has received a large donation of keyboard literature from alumni and faculty in memory of former music faculty member Mary Jedelev.

Miss Jedelev, an assistant professor who taught piano in the department for six years, was killed in an automobile accident in June, 1972. A graduate of Eastman School of Music, she was engaged in doctoral study at the time of her death.

At the suggestion of fellow music faculty, the Jedelev Memorial Collection of Keyboard Music, contributions to which have

enabled the purchase of some 500 volumes of piano literature valued at over \$3500, was established in her memory.

Recently cataloged and shelved in the Music Library and ready for use this term, the collection represents a substantial addition to library resources. Continuing contributions will expand and maintain the Jedelev collection.

Music faculty organizing and administering the ongoing memorial fund are assistant professors Smith Toulson and Steven Smith and Overda Page, music instructor.

CHOIRS IN EUROPE Members of the University Choirs currently touring in Europe were invited for an impromptu mini-concert in the Nymphenburg Castle, near Munich, once the home of King Ludwig I of Bavaria. The Choir's month-long tour, which began in mid-June, takes them also to Austria, Italy, Greece, Yugoslavia, Hungary, and Czechoslovakia, singing as they go. Raymond Brown, director, and Tommie Irwin, assistant director, of the Choirs, are in charge of the tour.

Theatre opens with rainbow July 11

"Finlan's Rainbow," the hit musical show that includes such singable tunes as "If This Isn't Love" and "How Are Things in Glocca Mora," will open the summer Festival Theatre schedule July 11 at Playhouse Theatre.

Tickets for this and other summer productions are currently on sale at the Playhouse box office or may be reserved by calling 865-1884 (until 6 p.m. now, until 9 p.m. on days of performances).

Richard Edelman, associate professor of theatre arts, who directed "Brigadoon" last summer, is directing "Finlan's Rainbow" and serving as artistic director for the Festival. Choreographer is Deborah Adler, and lead roles are played by Al Corbin, the father, and Tanny McDonald, the daughter, both Equity actors.

This is Festival Theatre's 17th season; it is also the fourth season of the five-year program emphasizing American plays and shows. Other productions will include "Harvey," opening July 18 at Pavilion Theatre; "Kiss Me Kate," opening August 1 at Playhouse; and "Death of a Salesman," opening August 2 at Pavilion.

Performances of "Finlan's Rainbow" will be given July 11-14 and 16-20, with a matinee July 20 at 2 p.m. Evening performances begin at 8 p.m. except Sundays, 7:30 p.m.

In rehearsal for Festival Theatre's production of "Finlan's Rainbow" are Al Corbin and Tanny McDonald, who play the father and daughter. The musical comedy opens July 11 at Playhouse Theatre.

Calendar — July 4-14, 1974

SPECIAL EVENTS

Friday, July 5 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Featuring "Deb Crecraft," "John Davide" and films.

Sunday, July 7 — Interlandia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Sunday, July 7 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 a.m., Johnston (East Hall) Hall Free Talk Center. Open to everyone.

Monday, July 8 — Evelyn Hodges, piano recital, 8:30 p.m., Music Bldg., recital hall.

Monday, July 8 — Duplicate Bridge, 6:45 p.m., HUB ballroom.

Monday, July 8 — Penn State Overcomes, 7:30 p.m., Room 220 Boucke.

Wednesday, July 10 — PSU Sports Car Club, 7:30 p.m., Room 251 Willard.

Wednesday, July 10 — Chess Club, 8 p.m., ground floor HUB.

Wednesday, July 10 — Meditation, sponsored by Office of Religious Affairs, 12:30 p.m., Helen Eakin Eisenhower Chapel. Rev. Donald Davis, United Campus Ministry, on "Man/Woman."

Thursday-Sunday, July 11-14 — Festival of American Theatre, "Finlan's Rainbow," 8 p.m.; Sunday, 7:30 p.m., Playhouse Theatre.

Saturday, Sunday, July 13-14 — Slide talk by Hugh Manchester on old Bellefonte, in connection with exhibit in Zoller Gallery, 3:30 p.m.

Sunday, July 14 — Interlandia Folk Dance, 7:30 a.m., HUB ballroom and terrace.

Sunday, July 14 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 p.m.,

Johnston (East Hall) Hall Free Talk Center. Open to everyone.

SEMINARS

Tuesday-Wednesday, July 9-10 — Phil Delta Kappa, College of Education Lecture Series, Room 112 Kern. Tuesday, 7:30 p.m., Erlu Z. Sun, professor of history, and Stanley Paulson, dean, College of Liberal Arts, on "Education and Nation Building in 20th Century China." Wednesday, 11 a.m., William Rabinowitz, professor of educational psychology, on "Some Observations on Education and Poverty."

OFFICIAL

Thursday, July 4 — No classes; offices closed all day.

FILMS

Monday, July 8 — Commons Midday Cinema, 12:30 p.m., Room 112 Kern. "Prudhoe Bay or Bust."

Wednesday, July 10 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Destruction Saturn."

The Museum Store in conjunction with the Museum of Art exhibit of Milton Osborne drawings has available for purchase reproductions of works depicting familiar University scenes by the late architect, professor, and department head of the State.

Offered are a color reproduction of a mural featuring Old Main and reproductions, in sepia on off-white and dark green on pale green, of sketches of Patten Library and two views of Old Main.

Also among the wide variety of art and craft items in the Store, just off Gallery A on the first floor of the Museum, are a newly arrived assortment of hand-woven African wall hangings from the Ivory Coast and many new art books.

Store hours coincide with Museum hours: noon to five p.m. daily except Mondays, when the facility is closed.

Student jobs

The Student Employment Office is open full time during the Summer term and welcomes phone calls from university job supervisors with information concerning part-time job openings. There are still many students seeking part-time employment for the Summer term. By calling the Student Employment Office at 863-0336 job supervisors could have interested and qualified students referred to them to fill the employment openings.

EXHIBITS

Museum of Art — Milton Osborne Drawings, Gallery A. Selections from the Permanent Collection, Gallery B. Central Pennsylvania Festival of the Arts.

Zoller Gallery — Central Pennsylvania Festival of the Arts exhibit on "Early History of Central Pennsylvania."

Commons Gallery — LaVern Grant, oils and sculpture, until July 9. Charles Hook, photography, until July 9. Central Pennsylvania Festival of the Arts Juried Exhibition, opening July 11.

RETIREMENTS

Elizbeth Bodenstein, assistant professor of German, and a member of the Hazelton Campus faculty since September 1, 1956, retired July 1. Mrs. Bodenstein is known for her excellent command of German, and some of the University's best qualified majors in German received their beginning instruction from her. She is active in the American Association of Teachers of German, Central Pennsylvania Chapter; the Pennsylvania Council of Teachers of English; the Modern Language Association; and the Pennsylvania Library Association. Born in London, she became a United States citizen in 1940. She attended the University of Berlin and earned her bachelor's and Master's degrees at The University of Texas in Austin. Before assignment to the Hazelton Campus, she taught at the University of Texas; Panola County Junior College, Carthage, Texas; and the Stephen F. Austin College, Nacogdoches, Texas. She is active in the Hazelton Art League, the Greater Hazelton Oratorio Society, and the Friends of the Greater Hazelton Area Public Library, for which she served as president. On the Hazelton Campus, she was College Representative for the College of Human Development and an adviser to the Delta Sigma Pi service sorority.

Don Kepler, instructor of physical education and one of the world's foremost authorities on survival training, retired July 1. He was also assistant baseball coach. His career has been marked by "famous

firsts": he pitched in the first night baseball game involving a major league team; he taught the first survival courses offered by the U.S. armed forces; he developed and taught the first course on survival offered on a college campus; and he trained the first U.S. military corps volunteers in survival techniques. During World War II, along with two other Penn States, Frank and John Craighead, Internationally known naturalists, Kepler taught survival training to 75,000 soldiers. These first survival courses were taught in Kepler's special classrooms — swamps, sand bars, and deserts. The book authored by Kepler and John Craighead, "How to Survive on Land and Sea," is still read by serious students of survival. Many of the techniques employed by Kepler back then were incorporated into his unique survival course at Penn State. The course has proven to be one of the most popular offered at the University.

Louise H. Dye has retired from the faculty as assistant professor of music education, effective July 1. She began teaching at the University in 1958, and her special field of interest has been in music and methods for elementary classroom teachers. A native of Warren, O., Mrs. Dye received her bachelor of arts degree in music education from Carnegie-Mellon University and earned the master of education from Penn State. She is a member of the Music Educators National Conference. She has served as advisor to the College of Education Student Council and is a past

president of the Alumni Chapter of Mortar Board. Before joining the University faculty she taught in the public schools of Ingram, Chambersburg, and State College.

HONORS

Irving Hand, associate professor of regional planning at Capitol Campus, is one of three persons given a national award by the Council of State Planning Agencies. It was announced this week. The award, honorary membership in the Council, was given also to Senator Hubert H. Humphrey and to Charles Eliot, former executive director for the National Resources Planning Board. Hand was cited for his "continuing interest and leadership in state and regional planning and for his many contributions to the programs and objectives of the CSPA."

Dr. Warren F. Witzig, professor and head of the department of nuclear engineering, has been honored by the American Nuclear Society which named him "Fellow" for his "pioneering engineering accomplishments in the early days of the nuclear submarine program and his later contributions to nuclear engineering education." The announcement of the elevation of Dr. Witzig to Fellow was made at the recent 20th annual meeting of the ANS.

Dr. E. Willard Miller, professor of geography and associate dean for resident instruction, College of Earth and Mineral Sciences, has been made Honorary Member of the Pennsylvania Academy of Science. The honor was bestowed on him at the 50th

anniversary meeting of the Academy, which is dedicated to the encouragement of scientific activities in the Commonwealth. Dr. Miller was also honored by the Pennsylvania Council for Geographic Education, with the presentation of the Council's 1974 Distinguished Service Award in recognition of long and distinguished service to the geographic disciplines.

Dr. Roy C. Buck, professor of sociology and sciences and associate director of the Center for Continuing Liberal Education, has been appointed the American Committee on Rural Development in the International Labor Organization for a term of five years. The Committee meets annually at I.L.O. headquarters in Geneva, Switzerland, and is a standing body of the I.L.O. with the responsibility of advising the I.L.O. on actions it might most usefully take in the field of social advancement in farm activities. It is also a liaison organ with the rural world, particularly in developing countries.

LEAVE

Dr. Donald Langmuir, associate professor of geochemistry, has been granted a six-month leave of absence, beginning in September, to conduct research at the Desert Research Institute of the University of Nevada, Reno. Dr. Langmuir is studying chemistry of ground waters, including their possible contamination beneath the Atomic Energy Commission's Nevada Test Site, and the development of a ground water supply for a major fish hatchery at Nevada's Pyramid Lake Indian Reservation.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For procedural and funding source information, call 865-1372.

(136-1) Following is a description of the Education Program of the National Science Foundation. The five program objective areas are noted as follows:

I. IMPROVEMENT OF EDUCATION CAREERS IN SCIENCE

- (1) Secondary schools — Materials and Instruction Development — Develop course packages and models that can fit into new or existing courses. (Ref. E-75-3); Instructional Improvement Implementation (adding new course material in the classroom). (Ref. E-75-4)
- (2) Alternatives in higher education — Development of Instructional Materials and Modes (newly emerging and problem-relevant subject areas). (Ref. E-75-5); College-Faculty Workshops (newly significant science or engineering areas — Ref. E-75-6); Alternative Degree Programs (typical basic science researches). (Ref. E-75-7); Graduate Fellowships (Ref. E-75-8); Faculty Research Participation (ongoing laboratory research — Ref. E-75-17); Science and Engineering Technician Education (SETP) (two- to four-year collegiate level program. (Ref. E-75-18); Instructional Scientific Equipment Program (Improvement).

ment of undergraduate science instruction).

(3) Continuing Education for Scientists and Engineers (aimed at subjects in the non-academic labor force). (Ref. E-75-9)

(4) Student-Oriented Program — Student Science Training (for high ability secondary students); Undergraduate Research Participation (to provide experience and formal credit). Student Originated Studies (emphasizing student origination and management of studies — Ref. for all three — E-75-7).

(5) Ethnic Minorities and Women in Science — (Minority Initiatives Science Improvement Program (limited to Institutions that were founded to serve minority groups). (Ref. E-75-10); Special Assessment and Experimental Projects (to move women and minority group members into careers in Science — Ref. E-75-11 or NSF Special Science Literacy).

(6) Development of Science Literacy — (Increase substantially the number of persons who are able to make use of the methodology of science in their daily lives. (Ref. E-75-12 and E-75-14 also referenced earlier).

III. INCREASING THE EFFICIENCY OF EDUCATION

TION PROCESSES TO IMPROVE ITS COST-EFFECTIVENESS.

(1) Technological Innovation in Education — Technology and Systems — supporting computer technology research; Applications and Courseware — supporting dissemination of technology. Projects for Exploring Computer Technologies — Ref. E-74-9.

(2) Educational Program Restructuring — (program efforts in pre-service teacher education, changing the educational learning environment, and pre-college education improvement — Ref. E-75-10).

IV. PROBLEM AREAS OF SCIENCE AND TECHNOLOGY

PROJECTS IN SCIENCE — (Designed to increase the impact of education programs in science education through student-initiated and field-initiated studies and experimental projects. (Ref. E-75-11).

V. GRADUATE STUDENT SUPPORT — Develop a cadre of first-line researchers.

(1) About 500 new three-year fellowships will be awarded in FY1975. Deadlines is Dec. 2, 1974 — Ref. E-75-12.

(2) Postdoctoral programs are also funded — NATO Postdoctoral — Ref. E-75-13; and NATO Senior Fellowships — Ref. E-75-14.

(3) Foreign-Related Graduate (ERG) Traineeships — (Designed to increase the number of foreign scientists to lecture and consult with U.S. scientists. (Ref. E-75-15).

Additional information is available for all the above NSF programs — Ref. E-75-1.

(136-2) The Public Health Service has announced the availability of a National Research Fellowship Award for postdoctoral research in fields related to cancer, heart, lung, general medicine, allergies, and infectious diseases. Awardees will receive institutional support for training opportunities. Support can be given for up to three years to U.S. nationals only. Salary range is \$10,000 to \$14,000. There is an institutional allowance of \$1,000 and provision for additional allowances. The application deadline is Sept. 15, 1974; for additional information write to: National Research Service, Division of Postdoctoral Fellowships, 5600 Fishers Lane, Rockville, Md. 20852; Center: Mrs. Helen O'Connell, 490-7885; Heart and Lung; Dr. J. M. J. Smith, 490-7886; Gen. Med. Sci. Dr. M. Carlson 490-7855; Cancer; Dr. J. M. J. Smith, 490-7885; or N. H. Gross 490-7820.

General Research: Dr. R. J. Schellenfeld 490-7870.

(136-3) The Graduate School of Public Health, 1744 Graduate School Financial Awards deadline dates for application information to be submitted by Oct. 1, 1974. The following are the 1974-75 Term Tullian Grants-in-Aid alternatives: Oct. 1, 1974 — Winter Term Tullian Grant-in-Aid; Jan. 5, 1975 — Spring Term Tullian Grant-in-Aid; Feb. 3, 1975 — Graduate School and Pa. Research Fellowships in ERG Traineeships; Feb. 17, 1975 — Eric A. Walker and Graduate School Fellowships, Fellowship Supplemental to ERG Traineeships; April 11, 1975 — Summer Term Grants-in-Aid; April 25, 1975 — Fall Term Grants-in-Aid.

Hub specials

The H.U.B. Terrace Room has inflated daily special meals for both lunch and dinner at prices much below customary cafeteria prices all year. No substitutions are permitted to benefit from these reduced prices. For the next week, the featured meal, accompanied by appropriate side dishes and beverages) are:

- Tuesday, July 7 — Dinner, roast pork with dressing, \$2.50; supper, hot roast meat sandwich, \$1.50.
- Monday, July 8 — Lunch, beef and bean soup, \$1.16; dinner, spaghetti, \$1.37.
- Tuesday, July 9 — Lunch, chicken chow mein/rice, \$1.51; dinner, val parmigiana, \$1.51.
- Wednesday, July 10 — Lunch, golomski, \$1.11; dinner, noodle goulash, \$1.67.
- Thursday, July 11 — Lunch, lasagna, \$1.22; dinner, french meatloaf, \$1.39.
- Friday, July 12 — Lunch, fish cakes/hot sauce, \$1.66; dinner, french fried clam/sauce, \$1.62.
- Saturday, July 13 — Lunch, chicken chow mein, \$1.62; dinner, chicken steak Maryland, \$1.49.

They've moved

The Department of Statistics faculty and staff have moved to Pond Laboratory (from McAllister Bldg.) and the Department of Mathematics has occupied the space formerly held by the Statistics group.

Dr. William Harkness, professor and head of statistics, now is in Room 218 Pond, and the main office of the department is in Room 219 Pond.

The Statistical Consulting Service is in the group of offices in Room 212 Pond and the new director, Dr. John Wolkowsky, is in Room 214 Pond. Only the Service's telephone numbers have been changed; they are now 863-0281-2 and -3.

The main Mathematics Department office is now in Room 215 McAllister; the undergraduate office is in Room 230; and the office of the assistant department head in Room 226.

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or self-non-exempt jobs listed below may apply by calling Employment Office, Room 210, for consideration. On contract basis. No salary advance on the vacancy. Applications will be accepted until: 5:00 p.m., July 11, 1974.

COMPUTER OPERATOR, INTERCOLLEGE RESEARCH PROGRAM — University Park

Operate computer console and input/output equipment; process computer jobs from submission by users to return to users, providing courteous service and maintaining allowances for error conditions. Associate degree or equivalent in two years of college mathematics or two years of college science or engineering is required. Familiarity with computer programming and operation in batch processing is highly desirable.

DESIGN AND ENGINEERING ESTIMATOR, OFFICE OF PHYSICAL PLANT — University Park

Responsible to the Chief Estimator, for the preparation of estimates and for converting approved and funded estimates into form. Estimate for all trade areas such as carpentry, masonry, sheetmetal, painting, plumbing, electrical, visible-ultraviolet spectrophotometer, ultraviolet-visible spectrophotometer, liquid scintillation spectrometer. Operate continuous flow centrifuge to separate and purify subcellular fractions and cytoplasmic droplets. Characterize fractions by sedimentation velocity, sedimentation equilibrium, and ultracentrifugation studies by fixing, dehydrating, embedding of tissue samples. Background studies in Biochemistry, Biology, or Chemistry or its equivalent and up to one year of effective experience is required. Knowledge of biochemical techniques and instrumentation as well as recent formal class work in Biochemistry, is desirable.

PROGRAMMER, MANAGEMENT SERVICES — University Park

Responsible to the program director for the design, coding, documenting and other programming tasks required to produce reports, make mathematical computations or maintain information files. Prepare and interpret detailed flow charts, prepare and write job control programs for processing programs. Bachelor's degree or equivalent in Computer Science or related field plus two years related experience.

LIBRARY ASSISTANT — DuBois Campus

Responsible for the maintenance of library operations. Two years of college or equivalent plus two to three years library experience.

RESEARCH AID, COLLEGE OF SCIENCE — University Park

Prepare tissue slices and tissue cultures for, and assist in, metabolic studies. Purify substrates by electrophoresis, chromatography and recrystallization. Prepare reagents and media as needed. Conduct radiochemical analyses to measure substrates utilized and to evaluate metabolites accumulating. Operate a visible-ultraviolet spectrophotometer, ultraviolet-visible spectrophotometer, liquid scintillation spectrometer. Operate continuous flow centrifuge to separate and purify subcellular fractions and cytoplasmic droplets. Characterize fractions by sedimentation velocity, sedimentation equilibrium, and ultracentrifugation studies by fixing, dehydrating, embedding of tissue samples. Background studies in Biochemistry, Biology, or Chemistry or its equivalent and up to one year of effective experience is required. Knowledge of biochemical techniques and instrumentation as well as recent formal class work in Biochemistry, is desirable.

ASSISTANT INSTITUTIONAL ANALYST, OFFICE OF BUDGETING AND PLANNING — University Park

Responsible for the conduct of special analyses and survey research; perform institutional analyses by making comparative analyses between similar factors; assist with studies such as institutional cost surveys, investigations directed toward the identification and collection of data reflecting student and faculty action-plan-making, admissions, etc.; design questionnaires used for basic studies;

prepare reports of work projects; gather and study data in order to write brief interpretive summaries; and assist with formulation of plans for lean work projects. A Bachelor's degree or equivalent preferably in the social sciences when quantitative analytical skills are developed; over six months of related experience in research or working knowledge of statistical methods, computer applications and familiarity with at least one programming language, preferably Fortran; requires a knowledge of elementary statistics, advanced writing skills in the field of research and collection of data; and a minimum of two years of related experience in research or working knowledge of statistical methods, computer applications and familiarity with at least one programming language, preferably Fortran.

NURSE, INTERCOLLEGE RESEARCH PROGRAMS — University Park

Responsible for assisting project directors in laboratory preparation and conducting of research and for assisting the physicians in various tests and physical examinations. Bachelor's degree or equivalent and a registered nurse as required by Nursing certificate.

PROGRAMMER (INFORMATION SYSTEMS), OFFICE OF BUDGET AND PLANNING — University Park

Participates in program design, coding and other programming tasks required to produce reports, mathematics, computations, and maintain information files. Prepare and interpret detailed flow charts, prepare and write job control programs for processing programs. Bachelor's degree or equivalent in Computer Science or related field plus two years related experience. Bachelor's degree or equivalent in two years of college mathematics or two years of college science or engineering is required. Familiarity with computer programming and operation in batch processing is highly desirable.

UNDERGRADUATE STUDIES CONSULTANT, COLLEGE OF THE LIBERAL ARTS — University Park

Responsible for the planning and management of an Undergraduate Studies Academic Information Center within the College. Provide professional staff assistance to the Division of Undergraduate Studies during registration and pre-registration counseling program periods. Master's degree or equivalent in an appropriate Human Development Discipline. Academic experience and knowledge of the College of the Liberal Arts and opportunities of the College of the Liberal Arts highly desirable.

UNDERGRADUATE STUDIES CONSULTANT, COLLEGE OF HUMAN DEVELOPMENT — University Park

Responsible for the planning and management of an Undergraduate Studies Academic Information Center within the College of Human Development.

Responsible for assisting project directors in laboratory preparation and conducting of research and for assisting the physicians in various tests and physical examinations. Bachelor's degree or equivalent and a registered nurse as required by Nursing certificate.

ACADEMIC ASSISTANT (INSTITUTE FOR RESEARCH ON LAND & WATER RESOURCES) INTERCOLLEGE RESEARCH PROGRAMS — University Park

Responsible to the Director for facilitating, coordinating, and providing supportive services to the research teams and Technology Transfer Program. Provide assistance in the following areas: Research and Technology Transfer Program as assistance in planning and developing research programs; supervision of information retrieval services; assistance in preparation and/or editing and/or proofreading of research reports and reports; and assistance in developing Technology transfer programs, including Technology Transfer Conference, teaching, writing, or its equivalent, plus two years professional experience in research or communication.

PENN STATE intercom

Volume 3, Number 43

July 11, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Recommendations due by May, 1975

Senate appoints governance action committee

The University Faculty Senate has appointed a 10-member steering committee to facilitate action on recommendations for faculty participation in University governance.

Dr. Helen I. Snyder, Senate chairman, will serve as chairman of the steering committee whose major consideration will be the 35 recommendations of the Joint Senate Administrative Select Committee on Faculty Participation in University Governance.

Noting that the primary mechanism for the attainment of shared governance is the delegation of authority, Dr. Snyder said the steering committee has been charged to coordinate actions by the Senate, the Colleges, Campuses and central administration "so that shared governance, as defined in the 35 recommendations, moves forward systematically and smoothly."

The committee is to prepare a worksheet for each of the recommendations detailing supporting information that will be needed. It is not expected, Dr. Snyder noted, to provide documents for action by the Senate.

"It is intended to provide a readily accessible body for informed sharing of information from the various areas of action on shared governance. And it is intended to serve the best interests of both faculty and administration to assure that staff work has been adequate and that the interactions with other components of the total University enterprise are taken into account."

The committee is to have the 35 recommendations ready for action by the May, 1975, Senate meeting.

Steering committee members, besides Dr. Snyder, are the other Senate officers, Sally S. Small, vice chairman, and Dr. John J. Coyle secretary; Dr. Ernest L. Bergman, past Senate chairman; Dr. Stanley O. Ikenberry, senior vice president for University development and relations; Dr. Eugene J. Kelley, dean of the College of Business Administration; Dr. Robert S. Friedman, professor and head of the Department of Political Science; David G. Nixon, instructor in political science at the McKeesport Campus; Joe A. Miller, associate professor

of community development; and Dr. John J. Cahir, associate professor of meteorology.

In other action at its July 2 meeting, the Senate received informational reports from the Senate office, the subcommittee on Internal Operations and Subcommittee on Catalog and approved a recommendation of the Ad Hoc Committee on Communication between the Senate and the University community.

Under the recommendation, a Senate newsletter is to be established as part of the Penn State INTERCOM.

An extended discussion of the problem of faculty parking on campus was initiated by Dr. George M. Guthrie, a senator and professor of psychology. Several other senators voiced their concern over the situation.

Dr. Russell E. Larson, University provost, said the administration is aware of the problem and that it is being taken into consideration in development of long-range physical plant plans.

CHOIRS IN EUROPE. As the University Choirs, in their current European tour, warm up in a courtyard adjacent to the Basilica of San Marco, in Venice, they have an interested listener in the window behind. The next day, they sang in the Basilica and have since been in Budapest, Vienna and Prague, winding up the active part of their trip Monday, July 15. Warmups and impromptu concerts are almost as much a part of the trip as the formal programs they sing.

Groff scholarship fund established

A scholarship fund of more than \$100,000 has been established at the University with a bequest from the estate of Eva Brinser Groff and G. Weidman Groff. It will be known as the Eva B. and G. Weidman Groff Memorial Scholarship Fund.

Mr. Groff, a native of Anville, Pa., who in 1953 was honored as a Distinguished Alumnus of Penn State, devoted his life to plant science and humanitarian work in China and in the United States.

The scholarships will benefit outstanding undergraduate and graduate students enrolled as full-time students in the Division of Plant Science and Industry of the College of Agriculture.

When Mr. Groff, a 1907 graduate of the University in horticulture, went to Canton Christian College (later Lingnan University)

at the end of that year, he was a free agent exploring a new field. His friends at Penn State sent contributions donated at the Sunday Chapel services, and this led to the formation of the Penn State in China Committee and the allocation of Chapel offerings for the development of agricultural studies at Lingnan.

During his years in China, Mr. Groff, who came to be known in University circles as "Daddy" Groff, built a department of agriculture embracing agronomy, animal husbandry, horticulture and sericulture (silk production), and supervised farms, gardens and an arboretum and herbarium.

He became the first dean of the College of Agriculture at Lingnan in 1921 and director of the Lingnan Plant Exchange

(Continued on page 2)

U.P. enrollment will top 30,000 in fall

Resident education enrollment at the University Park campus for the Fall Term is expected to approximate 30,000, an increase of 800 over the 29,397 who were enrolled for the Fall Term, 1973.

Smaller increases are expected at Behrend College, Capitol Campus, and at the Hershey Medical Center. The expected resident education total enrollment should approximate 49,470. This would be an increase of about 1,930 over last Fall.

The number of new freshmen at University Park is expected to total 3,325, an increase over the 3,242 enrolled a year ago, while students transferring from the Commonwealth Campuses will increase to 3,550 from the 3,364 last year.

The shortage of residence hall facilities, it is explained, is directly related to an increase in enrollment. With freshmen required to live in the residence halls, upperclassmen who were the last to file applications for accommodations are the students without residence hall rooms. Many of these are students who lived in the residence halls last year but who delayed in filing requests for rooms while others are students who had been living off campus and now are seeking rooms on the campus.

Residence hall officials on June 11 advised more than 800 applicants that there would be no space for them in campus residence halls, the applicants being those last to file their applications.

Bibliography information needed by July 31

Information to be printed in the 1973-74 editions of "Research Publications and Professional Activities" and "University Publications and Reports to Agencies" should be sent to the vice president for research and graduate studies before July 31.

Earlier deadlines have been set by departments to ensure that information can be transmitted to college research deans for their review well before deadline. A memorandum issued May 1 sets forth the format for the bibliographical listings and is available from departmental offices and from the vice president for research and graduate studies, 207 Old Main.

Calendar — July 11-21, 1974

Special events

Thursday, July 11 — Slide show, "Le Grande Album Ordinaire," 3 p.m. and 4 p.m., Room 101 Chambers, by David Heath, Ryerson Technical Institute, Toronto, Canada. Photos from daguerotypes to most modern.

Thursday-Sunday, July 11-14 — Festival of American Theatre, "Finian's Rainbow," 8 p.m.; Sunday, 7:30 p.m., Playhouse Theatre.

Sunday, July 14 — Interludia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Sunday, July 14 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 p.m., Johnston (East Halls) Hall Free Talk Center. Open to everyone.

Monday, July 15 — Duplicate Bridge, 6:45 p.m., HUB ballroom.

Monday, July 15 — Penn State Overcomers, 7:30 p.m. Room 220 Boucke.

Wednesday July 17 — Chess Club, 8 p.m., ground floor HUB.

Wednesday, July 17 — Meditation, sponsored by Office of Religious Affairs, 12:30 p.m., Helen Eaten Eisenhower Chapel. Rev. Donald Davis, United Campus Ministry, on "Love."

Thursday-Sunday, July 18-21 — Festival of American Theatre, "Harvey," 8 p.m.; Sunday, 7:30 p.m., Pavilion Theatre.

Friday, July 19 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Featuring "Stan Shepherd," "Tim Craven" and films.

Sunday, July 21 — Interludia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Sunday, July 21 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 p.m., Johnston (East Halls) Hall Free Talk Center. Open to everyone.

Exhibits

Museum of Art — Milton Osborne Drawings Gallery A. Selections from the Permanent Collection, Gallery B. Central Pennsylvania Festival of the Arts, Gallery C. Free Museum tours Thursdays, 1:30 p.m. **Zoller Gallery** — Central Pennsylvania Festival of the Arts exhibit on "Early History of Central Pennsylvania." MFA Show,

Jeffrey Spaulding and Pamela Turner, opening July 17.

Commons Gallery — Central Pennsylvania Festival of the Arts Juried Exhibition. Joyce K. Stover, jewelry.

Materials Research Laboratory — "Beauty in Science" exhibit, July 11-14.

Seminars

Thursday, July 16 — Phi Delta Kappa, College of Education Lecture Series, 7:30 p.m., Room 112 Kern. Dr. Margaret Matson, sociology, on "They Call It Welfare." **Wednesday, July 17** — College of Education Lecture Series, 12:30 p.m., Room 112 Kern. William Toombs, education, on "Education in a Learning Society."

Wednesday, July 17 — Bioengineering and Mechanical Engineering, 4 p.m., Room 103 Mechanical Engineering. Lloyd A. Back, jet propulsion laboratory, California Institute of Technology, on "Liprotein Deposition and Oxygen Transport to Arterial Walls."

Films

Thursday-Sunday, July 11-14 — Festival of the Arts film program, 9:30 p.m., Old Main lawn. Free.

Thursday, July 11 — Films on "Animation" with discussions by Patrick Trimble, 7 p.m., Room 112 Kern. Free. Festival of the Arts program.

Saturday, July 13 — Bergman's "Blink of Life" and Brakhage's "Window Water

Baby Moving," 7 p.m., Room 112 Kern. Free. Festival of the Arts program.

Monday, July 15 — Commons Midday Cinema, 12:30 p.m., Room 112 Kern. "Harvest of Shame," classic documentary on the migrant worker.

Wednesday-Thursday, July 17-18 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Charade."

Harry A. Reed, assistant professor of engineering at the McKeesport Campus, re-

George W. Healy, associate professor of metallurgy, retired July 1 after 11 years on the faculty, having come to Penn State in 1963 from the Union Carbide Metals Division of Union Carbide Corp. where he had worked as a junior engineer and manager of the metals group in a 23-year period of service. The author of the textbook, "The Basic Oxygen Process," written for continuing education courses, he has written a number of papers, one of which, done jointly with D. C. Hilty, won for him the Hunt Award of the American Institute of Metals for the best paper by a Petroleum Engineer, in 1958. He has been a consultant in the areas of ferroalloys, iron and steel making, and waste utilization. His degrees were conferred by the University of Paris (Sorbonne), a certificate of advanced studies in mathematics; and a B.S. in mechanical engineering cum laude by Yale University. He was a member of the Aluminum alloys from 1933-39 at the Munich, Germany, technical institute and the university.

Dr. Joseph H. MacNeill, professor of food science, a leave for the academic year 1974-75, to go to Turkey as a Senior Fulbright-Hays Scholar at the Middle East Technical University at Ankara. In an international program sponsored by the U.S. State Dept., he will spend most of his leave lecturing in food science at the department of biochemical engineering, primarily graduate level courses in food preservation.

Dr. Peter Gould, professor of geography, is the co-author of "Mental Maps," a book published recently by Penguin Books. The other author is Dr. Rodney White, a member of the Northwestern University geography faculty who received his master's degree in geography from Penn State in 1967. The book is a study of the geography of perception — of the mental images people form of places — images shaped by a selective channelling of information. These images, the authors point out, are crucial to people's decisions as to where to live, where to locate factories, and new towns, and where to take their vacations. Among the interesting examples of mental maps included are accounts of mental maps at work in America, Sweden, Southeast Asia, and parts of Africa and Britain.

The 134-page manual is intended for recreation planners and planning agencies and was developed through funds provided by the State Department of Community Affairs. Copies of the publication may be obtained from the Department of Community Affairs, South Office Building, Harrisburg.

Nine associate county agricultural agents have been promoted and given the titles of county Extension agent, effective July 1. A new rank system in the Cooperative Extension Service was created recently providing recognition of the roles played by county agents and county Extension directors. The nine are **Harold R. Bock**, Looming County; **Anthony G. Dobrosky**, York; **Joseph S. Beard**, Crawford; **William A. Reagan, Jr.**, Franklin; **Clarence R. Bryan, Jr.**, Delaware; **Richard A. Long**, Butler; **Thomas H. Osbourn**, Erie; **Donald P. Fowler**, Northampton; **Glenn A. Shirk**, Chester.

A juried crafts show will be held in the Museum of Art Gallery C, beginning July 11 and continuing until July 28, with ceramics, textiles, jewelry, and art works in metal, wood and glass on display as part

Films in Festival

As part of the Festival of the Arts program underway in the community and on campus, films will be shown on a daily basis in front of Old Main, beginning at 8:30 a.m.

will be shown in Room 112 Kern Building (auditorium) at 7 p.m. today (July 11) and Saturday, July 13. The films today will be illustrative of a lecture on "Animation" by Patrick Trimble, graduate student in theatre arts, who will discuss the history and purposes of animation, with 11 films, starting with a 1909 animation, "Gertie, the Dinosaur" and including "Popeye" and a 1963 social commentary, "The Hangman."

At Pavilion theatre, beginning July 1: the whimsical Mary Chase comedy, "Harvey," about Elwood P. Dowd and his imaginary rabbit, will delight audiences as it has for three decades. It opened in New York in 1944 and took the Pulitzer Prize, and since then it has been a "standard" across the nation. "Harvey" will be at Pavilion July 18-21 and July 23-27, with matinee July 27.

Tickets for both shows may be reserved by calling 865-1884 (from 10 a.m. to 9 p.m. on days of performances). Note that senior citizens may obtain tickets at the student discount rate.

A slide show using three simultaneous screen projectors and stereophonic sound will be given by David Heath today, Thursday, July 11 at 3 p.m. and again at 4 p.m. in Room 101 Chambers.

Heath, who is serving as judge for the Central Pennsylvania Festival of the Arts, is a photography exhibit, teaches photography at the Ryerson Polytechnical Institute, Toronto, Canada. His show, titled "L'Album Ordinaire," has been given at the National Gallery of Canada and the Visual Studies Workshop, Rochester, N.Y.

Photographs from albums dating from the 1800's, from daguerrotypes to Polaroid snapshots, are included.

Heath was a Guggenheim Fellow in 1966. He is the author of "Dialogue with Solitude" published in 1965.

The slide presentation is sponsored by

the department of art as well as the Festival of the Arts.

Tickets for the evening concerts by Pennsylvania Ballet in August are currently on sale at the University Auditorium box office.

Performances Friday and Saturday, August 2 and 3, in the Auditorium, will include "The Four Temperaments," by George Balanchine, set to music by composer Philip Hindemith; "Eight Movements in Raggy Time," by John Jones for music by Scott Joplin; "Quartet," by Benjamin Harkavy of the Pennsylvania Ballet's associate artists; and "After Eden."

"The Four Temperaments" ballet is one of three Balanchine works that will be performed by the Pennsylvania Ballet in concert series, which includes weekly performances Aug. 9-10 and Aug. 16-17.

Saturday afternoon sessions, open to the public without charge, will be held at the Harkavy will conduct "Quartet" on August 1 (at 4 p.m. in the University Auditorium) in a session given the name "At Ease with the Pennsylvania Ballet."

(Continued from page 1)

when it began in 1934.

Mr. Groff was increasingly interested in a plant exchange service. He brought Lingnan promising plants from the hinterlands of China for testing and eventual distribution in China and the Americas as well as plants from America offering promise of adaptability in China.

Mr. and Mrs. Groff returned to the United States in 1941. Mr. Groff established the Lingnan Plant Exchange in Laurel, F. D., an area where growing conditions resembled those of south China.

Following his death in 1954, his field records and books pertaining to plants of China and Southeast Asia were given to the University. Mrs. Groff, a native of Harrisburg, died in 1972.

The staff of the Civil Defense University

Extension Program (CDUEP) has moved to the Accelerator Bldg. (the telephone numbers, 5-1391 and 5-1392 remain the same). Affected by the move are coordinator Dennis J. King, Dennis W. Keiser, Robert E. Baldwin, and James Baldwin, all of whom work in Shields Bldg.

Sunday, July 14 — Dinner, roast turkey/dressin

\$2.31; supper, chicken Salisbury, \$1.33.
Monday, July 15 — Lunch, ham with lima beans, \$1.44; dinner, Maryland chicken steak, \$1.44.
Tuesday July 16 — Lunch, frank and onion, \$1.44; dinner, hot meat sandwich, \$1.57.
Wednesday, July 17 — Lunch, grilled ham and cheese, \$1.15; dinner, sweet and sour pork and rice, \$1.44.
Thursday, July 18 — Lunch, turkey turnover, \$1.07; dinner, lasagne, \$1.47.
Friday, July 19 — Lunch, tuna potato chip casserole, \$1.09; dinner light Newburg on rice, \$1.56.
Saturday, July 20 — Lunch, chicken chow mein, \$1.44; dinner, beef and rice, \$1.33.

University faculty or staff members who are interested in any of the staff exempt or staff non-exempt jobs listed below may apply by calling Employment Division 855-1387 (Network Line 475-1387). Do not contact the area having the vacancy. Applications will be accepted until: 5:00 p.m., July 25, 1974.

JR, COPY EDITOR, UNIVERSITY PRESS —
University Park
Responsible for editing book manuscripts in ac-

responsibility for editing book manuscripts in accordance with standard usage, press style, and special requirements. Responsible for checking copyright permissions and for liaison with production design and advertising personnel. Bachelor's degree or equivalent plus one to two years of experience in editorial practices.

EARTH AND MINERAL SCIENCE — University Park
Conduct microscopic analysis of coal samples; interpret data gathered through examination; establish techniques and procedures for obtaining petrographic data; process data by calculator and computer; maintain accurate records and files. Bachelor's degree with some courses in physical science or equivalent plus at least one year of laboratory related experience.

Participate in the development and execution of

educational programs in clinical nutrition for medical students, interns, residents, medical dietetic students and interns, nursing interns, community nutrition, and other health professional groups. Registered Dietitian, graduated from an accredited internship, plus at least two years administrative experience as head of a dietetic department.

Responsible to assist with the preparation and editing of manuscripts for journals, brochures, catalogs, special articles, special reports, research studies and other printed material. Bachelor's degree in English, Journalism, Science or equivalent plus one to two years experience writing for journals and magazines.

(137-1) Research Into problems of alcoholism, drug abuse, and mental health is supported by the Public Health Service and its division of the Alcoholism and Drug Abuse Administration. The National Institute on Alcohol Abuse and Alcoholism (NIAAA) Under the Research Scientist Development Program. Type 1 awards for "young" investigators and Type 2 awards for "established" investigators are available to each of the three Administration Institutes: National Institute on Alcohol Abuse and Alcoholism (NIAAA), National Institute of Mental Health (NIMH), and National Institute of Drug Abuse (NIDA). Research areas include health applications of biomedical, behavioral, and social science supported, and research capacity building. For information, details, contacts, and renewal applications are Aug. 1, 1974; future deadline dates are Oct. 1, 1974 and Jan. 1, 1975. For information, details, contacts, and renewal applications are available.

(137-2) The Office of Education (OE) has issued general guidelines for its **Right to Read** Program. The program is designed to help states, localities and parents, supply dissemination of information in the field of reading. Technical assistance related to the program is available. For information, details, and the teaching of reading are sought. Ref: 30F921247 6/20/74. The closing date for receipt of applications is Aug. 1, 1974. (Ref: 30F924252 6/20/74)

(137-3) The National Institute of Education (NIE) supports three major categories of activities: basic research (Office of Research); dissemination (Office of Utilization and Resources); and developmental activities (Office of Programs). Developmental activities include: (a) development of instructional materials (emphasizing reading skills); productivity (to improve delivery); problem solving (assistance to state and local education); diversity (group needs differences identification); and education and workforce education; (b) education activities (career, continuing, graduate, and adult education placement; curriculum research and development; financial and legal barriers to career education; institutional settings for learning; and systematic institutional change. NIE plans to continue funding through a number of mechanisms: Request for Proposals; grants; REP's (Requests for Proposals) for priority projects; and unsolicited proposals.

Aug. 1 for NSF Instruction Improvement Implementation Program (May 16 INTERCOM #129-4).

Aug. 1 for NEH Development Grants (May 23 INTERCOM #130-2) . . . Aug. 1 and Dec. 1 for HSM Child Health Research Grants (May 30 INTERCOM #131-1) . . . Aug. 15 for NEA Regional Development Program (May 23 INTERCOM #130-1)

Oxygen symposium a feature

Two chemistry celebrations near

The Third Biennial Conference on Chemical Education and the second Centennial of Chemistry celebration will be held at University Park July 30-Aug. 2, commemorating the dual anniversary of Joseph Priestley's discovery of oxygen 200 years ago (Aug. 1) and the first U.S. National chemical congress in 1874.

As a feature of the celebration, an Oxygen Bicentennial Symposium will be held Friday, Aug. 2, in which all four papers to be presented will deal with oxygen. The papers are by Dr. T. G. Traylor, University of California, San Diego; Dr. Joe M. McCord, Duke University Medical Center, Dr. Michael Kasha, Florida State Uni-

versity; and Dr. Christopher S. Foote, University of California, Los Angeles.

Dr. Stephen J. Benkovic and Dr. Gordon A. Hamilton, professors of chemistry, organized the Symposium.

During the five-day conference, some 70 other papers on chemical education topics will be presented on such topics as lecture experiments, individualized instruction, computers in chemical education, high school chemistry teaching, and frontiers in education.

The Division of Chemical Education of the American Chemical Society and the Department of Chemistry at Penn State are sponsors of the Conference.

Postage stamp sets for observance

Stamp collectors among the 600 chemists attending the Second Centennial of Chemistry celebration July 30-Aug. 2 at University Park will be happy to know that a set of commemorative postage stamps will be available, assembled expressly for the occasion.

Each stamp in the set of four was designed to represent a different facet of the celebration, which commemorates the dual anniversary of Joseph Priestley's discovery of oxygen on Aug. 1, 1774, and the first United States National Chemical Congress on Aug. 1, 1874.

Dr. John R. Hayes, associate professor of chemistry, and Dr. Roy A. Olafson, professor of chemistry, made the selection.

They chose a three-cent 1951 American Chemical Society anniversary stamp to represent the 1874 Congress where a committee was formed that later founded the Society. The meeting was held in Priestley's Northumberland, Pa., home and called the Centennial of Chemistry because par-

ticipants believed his discovery of oxygen one hundred years earlier signaled the end of alchemy and the start of modern chemistry.

A 1955 three-cent stamp saluting Penn State (along with Michigan State) as the first of the land-grant colleges represents the University's long association with the Priestley House. It dates from 1919 when faculty and alumni of the Department of Chemistry at Penn State bought the house and the attached laboratory to save them from demolition. The Department later built a small museum on the grounds. The University presented the house and museum to the City of Northumberland in 1955 and in 1970 the home became a National Historic Site.

A three-cent 1956 Benjamin Franklin and a one-cent 1965 Thomas Jefferson complete the set, selected to represent Priestley's associations with two of his most illustrious contemporaries.

Only 200 stamp sets have been made up.

News in Brief

MEETING DATES

Dates on which Commonwealth Campus faculty and staff will meet at the University Park Campus have been announced by Dr. R. G. Oulfin, dean of academic instruction for the Commonwealth Campuses, as follows:

For 1974 — August 6, August 28-29; September 6-7; and September 19, October 1, October 17; November 12, November 26-27; December 3.

For 1975 — January 7, January 23; February 4, February 20; March 4-5; April 1, April 17; May 6; June 3-4; July 1.

The policy of designating single- and two-day meetings was established last year in the interest of economy and efficiency so that departments and organizations within the University could plan better.

PRESIDENT ELECTED

President Oswald has been elected vice president of the Pennsylvania Association of Colleges and Universities for 1974-75. The Association is comprised of the presidents of 117 public and private institutions of higher learning in the state. Previously he had been secretary-treasurer. The new president is Dr. Arthur L. Schultz, president of Albright College, Reading.

PRESS BOOK

"The Letters of Emily Lady Tennyson," a personal view of the lives of Alfred Lord Tennyson and his wife, has been published by The Pennsylvania State University Press. James Hoge, of the University of Georgia, edited the volume and wrote the introduction, which provides a history of Lady Tennyson's early life and the long courtship between the two.

OFFICE MOVES

The office of the Area Director of Continuing Education for University Park, who is Harry V. Weaverling, has moved from Room 1 Shields to Room 309 Shields. Many programs that affect University staff members are organized through this office.

CIVIL DEFENSE MOVES

The staff of DCUEP — Civil Defense University Extension Program — has moved from Shields Bldg. to the Accelerator Bldg. Staff affected by the move include coordinator Donald J. King, Dennis W. Keiser, Robert Dillman, and James Baldwin.

Informal free concerts planned

Members of the New York Renaissance Band will perform on campus with the Pennsylvania Orchestra in a series of "shirt-sleeve" concerts July 29 thru Aug. 17.

The series of three informal free concerts will be presented at 8 p.m. on successive Wednesdays, beginning July 31 in the recital hall of the Music Bldg.

Lucy Bardo, on viols and vielle, Allan Dean, on cornetto, recorder, and krumphorn, Ben Harms, on percussion and viols,

Reserve lists

Reserve reading lists for Fall Term 1974 should be submitted to the Main Undergraduate Library on or before July 24, to allow ample time for processing. Lists received after the deadline will be accepted only if material requested is not needed until the beginning of the third week of classes; all reserve lists will be processed strictly in order received.

The July 24 deadline provides a reasonable amount of time to order books and to prepare available materials for reserve use.

Only required readings, which will circulate either for a two-hour period or for an overnight loan period, will be placed on reserve.

Lists should be submitted on reserve forms which are available by mail or in person from the Undergraduate Library, W11 Pattee Library. Lists should be typewritten and contain full bibliographic information, including the author's full name, title, publisher and the date of publication.

SENATE COMMITTEE

Officers of the Committee on Faculty Rights and Responsibilities of the University Faculty Senate, for 1974-75, are:

Dr. Richard Craig, chairman, Room 106 Tyson, 865-2572.

Dr. E. T. Sun, vice-chairman, Room 706 Liberal Arts, 863-0112.

Dr. Jeanne L. Smith, secretary, Ogontz Campus, 1600 Woodland Dr., Abington, Pa., 19001, (215) 866-9400.

TELEPHONE SIGNAL

Beginning July 10, when Bell Telephone Co. sets new equipment into operation in State College and vicinity, calls from the campus will sound somewhat different; there will be a dial tone if you dial 8 for campus calls and also if you dial 9 for local calls. Until then, there is no tone following the dialing of those numbers. So don't be alarmed at the new sounds; your phone isn't out of order.

FALL ENROLLMENT

Latest estimates of the expected Fall Term enrollment of "resident" students places the figure at 30,300 for University Park and 49,470 for all campuses. Add to these figures the students enrolled in Continuing Education credit and non-credit classes and Penn State will have a grand total enrollment nearing 70,000 probably.

and Sally Logemann, on shawns, dulcian, end recorder, will be featured with the orchestra in programming from the Medieval and Renaissance periods. The guest artists will also perform on the modern-day counterparts of the instruments with the orchestra, resident orchestra with the Pennsylvania Ballet.

Maurice Kaplow, Pennsylvania Ballet music director, will conduct the concerts and include discussions about the music.

To: Departments needing folders

Salvage and Surplus has a large quantity of slightly used manila folders, 2 1/2 right tab, letter size. The identical folder in General Stores, 708500, is priced at \$19.20 per thousand. These are in perfect condition and have only a gummed label on the tab. They are available at S. and S. on a first-come, first-served basis at \$5 per thousand. Call Kenneth Ishler, 865-4371 if interested.

SERVICE AWARD — Dr. Louis Don Hyelop, whose retirement as professor emerita of French effective July 1 was noted in INTERCOM June 20, had one last official "duty" last week — to receive a 25-Year Service Award certificate and Penn State chair from College of the Liberal Arts Dean Stanley F. Paulson (left) and Dr. Richard L. Freuchis, head of the French department. Dr. Hyelop, whose husband Dr. Francis E. Hyelop also announced his retirement July 1 and who earlier had received a Service Award chair, joined the faculty as a lecturer on a part-time basis in 1946 and in 1953-65 served as acting head of the department.

Archie Smith sees rabbit at Pavilion

P. Dowd (Smith) and the bunny only he can see. Dowd and friend will be at Pavilion Theatre until Saturday, July 27, with the exception of Monday, July 22. Curtain is 8 p.m. for evening performances except on Sunday (7:30 p.m.), and there is a matinee performance (2 p.m.) Saturday, July 27.

Smith, a member of the faculty since 1970, acted in last summer's Festival of American Theatre with roles in "Brigadoon" and "Little Murders," and was director of "Arenic and Co. Lages."

In his acting career, Smith has played in a dozen Broadway shows, the first with Helen Hayes in "Harriet" and later in "The Madwomen of Chailott" with Martia Hunt and "The Andersonville Trial," with George C. Scott. His favorite Broadway role was that of Scopes, in the play, "Inherit the Wind," which starred Paul Muni.

After New York, Smith was with the Seattle Repertory Theatre for seven years, with more than 40 roles. After a summer at Harvard University, he came to Penn State.

Archie Smith, assistant professor of theatre, has the task of making an invisible six-foot rabbit "real" to the audience at Pavilion Theatre for the next ten days.

Opening tonight (Thursday, July 17) is "Harvey," the Mary Chase story of Elwood

Calendar—July 18-28 1974

SPECIAL EVENTS

Thursday-Saturday, July 18-20 — Festival of American Theatre, "Finian's Rainbow," 8 p.m.; Saturday matinee, 2 p.m., Playhouse Theatre.

Thursday-Sunday, July 18-21 — Festival of American Theatre, "Harvey," 8 p.m., Sunday, 7:30 p.m.

Friday, July 19 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern. Featuring Stan Shepard, Tim Craven and films.

Sunday, July 21 — Interludia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Sunday, July 21 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 p.m., Johnston (East Halls) Hall Free Talk Center. Open to everyone.

Monday, July 22 — Duplicate Bridge, 6:45 p.m., HUB ballroom.

Monday, July 22 — Penn State Overcomers, 7:30 p.m., HUB ballroom.

Tuesday-Saturday, July 23-27 — Festival of American Theatre, "Harvey," 8 p.m., Saturday, matinee, 2 p.m., Pavilion Theatre.

Wednesday, July 24 — Chess Club, 8 p.m., ground floor HUB.

Wednesday, July 24 — PSU Sports Club, 7:30 p.m., Room 251 Willard.

Wednesday, July 24 — Meditation, sponsored by Office of Religious Affairs, 12:30 p.m., Helen Galt Hall.

Wednesday, July 24 — Rev. Irigaitz Sotola of the United Campus Ministry on "Future/Hope."

Friday, July 26 — Teri Gemberling, piano recital, 8:30 p.m., Music Bldg. recital hall.

Friday, July 26 — Commonsplace Coffee-house, 8 p.m., Room 102 Kern. Featuring "John Elliot" and "Open Mike."

Friday, July 26 — Duplicate Bridge, 7:30 p.m., HUB ballroom.

Sunday, July 28 — Interludia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Sunday, July 28 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 p.m., Johnston (East Halls) Hall Free Talk Center. Open to everyone.

SEMINARS

Tuesday, July 23 — Phi Delta Kappa, College of Education Lecture Series, 2:15 p.m., Room 112 Kern. Helen Snyder, "Educational psychology, on 'Consciousness Based Education Reassessed: A Learning Point of View.'"

Wednesday, July 24 — College of Education Lecture Series, 2:15 p.m., Room 112 Kern. Kenneth Bell, "On 'Formative Hermeneutics of Learning, or Should One Bug the Arlet at Work?'"

FILMS

Thursday, July 18 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Charade."

Monday, July 22 — Commons Midway Theatre, 8 and 10 p.m., Room 112 Kern. "Red China Drama."

Wednesday-Thursday, July 24-25 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Sherlock Holmes Faces Death."

EXHIBITS

Museum of Art — Milton Osborne Drawings, Gallery A. Selections from the Permanent Collection, Gallery B. Central Pennsylvania Festival of the Arts, Art Through 28. Free Museum tours Thursday — 1:30 p.m.

Zoller Gallery — MFA Show, Jaffer Spaulding and Pamela Turner, through July 27.

Commons Gallery — Central Pennsylvania Festival of the Arts, Art Through 28, through July 28. Joyce K. Stover, jewelry through July 30. Rebecca Kames, metal sculpture, opening July 29.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For procedural and funding source information, call 865-1372.

(138-1) Research proposals are now being accepted by The International Sugar Research Foundation, Inc. relating to the utilization of sugar. Research which has been of interest to the Foundation includes: nutritional and metabolic studies of sugar and other sugar-related public health issues; technology related to the improvement of sugar containing processed foods including comparative studies of sucrose and other sweeteners; development of products resulting from research; and by-product utilization. Application forms are available from M. R. Kohler 865-1372. The agency contact is: International Sugar Research Foundation, 7316 Wisconsin Ave., Suite 400, Bethesda, Md. 20814. Applications must be received by August 19, 1974. Request for full application or negative notice will be made October 1, 1974.

(138-2) Under recently issued regulations for its Grants for Emergency Medical Services Activities, the Public Health Service (PHS) covers Feasibility Studies and Planning, Establishment and Initial Operation, and Expansion and Improvement. An "emergency medical services system" provides for the arrangement of personnel, facilities, and equipment for the effective and coordinated delivery of health care services in an appropriate geographical area under emergency conditions. (Ref. 39FR20320, 7/1/74). The PHS has also announced rules and regulations for Grants for Research Projects in Emergency Medical Techniques, methods,

devices, and delivery. Special consideration will be given to applications for research relating to the delivery of emergency medical services in rural areas. (Ref. 39FR24231, 7/1/74).

(138-3) The International Society for Solution of Environmental Problems consists of four elements: (1) major research programs, (2) project research, (3) research by individual faculty members, and (4) university-based seminars. Research may be multidisciplinary, interdisciplinary, or interdisciplinary and may cover any transportation topic including behavioral, ecological, engineering, mathematical, medical, earth, natural, physical, political, social science, economic, law, management, policy, and planning. Additional information and application forms are available to faculty writing on University letterhead to Office of University Research, Office of the Secretary, U.S. Department of Transportation, Washington, O.C. 20590. Information is also available from Dr. Thomas O. Lerman, Director, Pennsylvania Transportation Institute, 865-1891. The closing date for receipt of proposals is October 1, 1974.

(138-4) Social science students who wish to study social change in Latin America and the Caribbean apply for pre- and post-doctoral fellowships on contracts at the University. Application deadline for the fellowships of up to 15 months duration is Oct. 1, 1974. For more

information, write to Mrs. E. Vestch, Information Center, the International Foundation, 1515 Wilson Blvd., Rosslyn, Va. 22209.

(138-5) Aid and Water Pollution fellowships of from \$2000 to \$5500 are offered by the Environmental Protection Agency. Areas of interest include environmental law, land use, urban planning, transportation, and environmental economics. Applications may be submitted by people engaged in or preparing for careers in pollution abatement and control. Application deadlines for air pollution fellowships are March 1 and Aug. 1, for water pollution fellowships, May 15. For further information write: Air Pollution — Academic Training Section, Environmental Protection Agency, Programs, National Env. Res. Center, Room C222, Research Triangle Park, N.C. 27711; Water Pollution — Academic Training Section, D. Lukow, Chief, Office of Environmental Programs, U.S. Environmental Water Program Operations, Env. Protection Agency, Washington, O.C. 20460.

(138-6) Scholars working on projects "designed to contribute to the understanding of the nature and resolution of significant contemporary or emerging common problems of industrial societies" are invited to apply to the German Marshall Fund of the United States, the German Marshall Fund of the United States, 177 Massachusetts Ave., N.W., Washington, O.C. 20036.

Staff vacancies

University faculty or staff members who are interested in any of the exempt or staff non-exempt jobs listed below may apply by calling Employment Division 865-1387 (Network Line 475-1387). Do not contact the area hiring the vacancy. Applications will be accepted until: 5:00 p.m., July 25, 1974.

RESEARCH AIDE (MICROSCOPIST), COLLEGE OF EARTH AND MINERAL SCIENCE — University Park
Conduct microscopic analysis of coal samples; interpret data gathered through examination; establish techniques and procedures for obtaining photomicrographic data; process data by calculator and computer; maintain accurate records and files. Bachelor's degree with some courses in physical science or equivalent plus six to nine years of laboratory related experience.

JR. COPY EDITOR, UNIVERSITY PRESS — University Park
Responsible for editing book manuscripts in accordance with standard usage, press style, and special requirements. Responsible for checking copyright permissions and for liaison with production and advertising personnel. Bachelor's degree or equivalent plus one to two years of experience in editorial practices.

PATIENT NUTRITIONAL CARE COORDINATOR — Hershey Medical Center
Participate in the development and execution of educational programs in clinical nutrition for medical students, interns, residents, medical dietetic students and interns, nursing interns, community nutrition and other allied health professional groups. Registered dietitian, graduated from an accredited internship, plus at least two years administrative experience as head of a department.

EDITORIAL ASSISTANT — Hershey Medical Center
Responsible to assist with preparation and editing of manuscripts for journals, brochures, newsletters, special articles, special reports, research studies and other printed material. Bachelor's degree in English, Journalism, Science, or equivalent plus one to two years experience writing for journals and magazines.

RESEARCH ENGINEER, HEALTH, PHYSICAL EDUCATION AND RECREATION — University Park
Design and develop technical data analysis system planning experimental set-ups, evaluate lower level employees, conduct post-design investigations of systems so as to verify validity and effective utilization of the systems. Program and maintain the laboratory computer and provide informal in-

struction to graduate students. Bachelor's degree or equivalent preferred in electrical engineering with advanced degree work highly desirable. Four to five years related experience including some work in computer science.

ADMISSIONS COUNSELOR, RECORDS, AND SCHEDULING — University Park
Responsible for interviewing prospective applicants, collecting and processing information for making decisions regarding the admission of Recollegiate, Associate, Adjunct and Foreign Students. Represent the University and give presentations on admission at Colleges, Universities, and College Admission Panels, and other group meetings. Bachelor's degree or equivalent with two to four years experience in related fields such as secondary schools, colleges and/or industry.

MARKETING SPECIALIST, COLLEGE OF AGRICULTURE — University Park
Review, recompile, and modify data submitted monthly by food firm managers participating in the Pennsylvania Quota Management Information System (PQAMIS). Responsible for the processing of data through computerized systems and ensure return of confidential analysts to participating firms. Interview top management food distribution firms to discuss and explain PQAMIS program. Responsible for brochure service to participating firms. Perform for PQAMIS participants. Responsible for adapting and modifying aforementioned computer programs as conditions warrant; maintain close liaison with program. Bachelor's degree or equivalent plus two to four years in food distribution and/or management information systems.

ASSISTANT DIRECTOR, COOPERATIVE EXTENSION SERVICE, COLLEGE OF AGRICULTURE — Northampton Region (Erie, Crawford, Mercer, Lawrence, Venango, Carbon, Forest, Warren, Tioga, and Lycoming Counties)
Responsible for the total Extension program in the region, and for the personnel to conduct such a program. Works closely with persons at the state level who are responsible for program development. Master's degree or equivalent plus a minimum of five years experience in County Extension. Master's collection of research and extension.

ACTING INSTRUCTIONAL SERVICES OFFICER — Capitol Campus
Responsible for administration of department programs in the field of the maintenance of the faculty and students including audio-visual services, television services, production of materials, instructional materials, language laboratory, copying and printing. Must have a minimum of three years of ability in Instructional Media or in an Instructional Medium such as Audio-Visual Aids, Television Pro-

duction, Motion Picture Production, etc. and over two years related experience. This is a temporary position and will be limited to 12-18 months.

ELECTRON MICROSCOPIST — Hershey Medical Center
Responsible for the operation, care, and preparation of materials for the use of the electron microscope in research. Master's degree in microbiology or equivalent with at least two years of experience related to specific research project.

FOOD PRODUCTION SUPERVISOR, NUB FOOD SERVICE, HOUSING AND FOOD SERVICE OPERATIONS — University Park
Responsible for menu preparation, food production, merchandizing, cafeteria service, costs, sanitation, and quality control of Food Service operations for the HUB and catered Food Service. Assists in planning and developing Food Service for special promotions. Bachelor's degree or equivalent plus four to six years of experience.

ASSISTANT HOUSEKEEPING SUPERVISOR, HOUSING AND FOOD SERVICE OPERATIONS — University Park
Responsible for administering and coordinating housekeeping operational functions in a specific residence hall. Coordinate the activities of technical-service employees, inspect work being performed, inspect area and recommend changes in routine. High school graduate plus two to four years of related experience.

COUNSELOR AIDES, HEALTH, PHYSICAL EDUCATION AND RECREATION — University Park
Responsible for design, construction, maintenance and operation of electronic and mechanical test equipment used in a block of experimental work. Supervise and instruct part-time employees including undergraduate research assistants. Associate degree or equivalent in electrical technology plus two to three years experience in the field of electronics.

CRAFT FOREMAN — Hershey Medical Center
Responsible for the selection, scheduling, and inspection of functions of the maintenance craftspeople in the department of Maintenance and Electronics. Associate degree or equivalent in a technical field or equivalent training, experience or approved, accredited apprenticeship in one of the trades areas plus eight to ten years experience in the supervision of building maintenance.

COUNSELOR AIDES, INDIVIDUAL AND GROUP COUNSELING — University Park
Responsible for individual and group counseling, assisting primarily on educational/vocational concerns. Assist with prerequisite testing and counseling program. Provides consultation to Univer-

sity students, and supervision of interns or graduate assistants. Master's degree or equivalent in Clinical Psychology or Counseling, Counselor Education or related area, plus three years of experience.

SENIOR RESEARCH AIDE (ANIMAL SCIENCE), COLLEGE OF AGRICULTURE — University Park
Supervise employees in seedbed preparation, tillage, and other operations for seed and forage crop and pasture experiments. Instruct and assist graduate students in the practical aspects of forage crop harvesting, seeding, fertilization, and seed dispersal. Conduct field and laboratory experiments to determine the effect of manure nutrients on the performance of forage and pasture species and livestock. Determine quality methods for pasture species which will ensure maximum amount of feed nutrients. Calibrate seeders, fertilizers, and spraying equipment; select seed and fertilizer rates for use in field experiments. Control in forage and pasture experiments. Bachelor's degree or its equivalent in agriculture or agronomy with minor or strong related experience, plus two to four years related experience.

PUBLICATIONS AND PROMOTION SPECIALIST, UNIVERSITY ARTS SERVICES — University Park
Responsible for the promotion and publicity of the Arts Series programs. Develop copy for advertising, develop concept for writing programs, communication with Artists Series personnel, and assist in the Arts, Theater Arts or related field plus two to four years related experience.

PROGRAM ANALYST, COLLEGE OF AGRICULTURE — University Park
Supervise the work of Junior Programmers. Confer with project personnel to determine the nature of the project, establish the goals, and the confidentiality and use of project data; advise researchers in the design of survey forms, file analysis possible and time required; develop and design the program and upgrade, maintain and edit existing programs. Plan logical steps to solution of problems, use of computer languages, and equipment. Advise and assist researchers in the efficient use of the system and develop alternative solutions. Bachelor's degree with a major in mathematics or statistics and a minor in computer science or statistics or computer science or equivalent. Four to six years of related experience required. Course work in linear algebra, numerical analysis, calculus, statistics, computer languages and systems programming are particularly desirable.

PENN STATE intercom

Volume 3, Number 45

July 25, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Trustees authorize open meetings

The Board of Trustees of the University has authorized the opening of its meetings to the public.

The action, taken at the regular July meeting, follows the passage of Pennsylvania House Bill 124, the so-called Sunshine Act, which was signed by Governor Shapp last week.

In taking the action, which has been under discussion at Board meetings for more than a year, the Board authorized the appointment of a committee of trustees and University administrators to establish procedures for conducting the first open meeting, scheduled for September 20.

Budget guidelines discussed

No tuition increase indicated

Guidelines under which the University will present its 1975-76 budget request to the State were discussed by the Board of Trustees last week.

Under the guidelines discussed, no increase in tuition for the 1975-76 academic year is proposed.

President John W. Oswald said the Trustees took the position that the policies for financing higher education as set forth by the Pennsylvania Association of Colleges and Universities are sound and call for no further increase in tuition at public universities.

The guidelines considered anticipate a total enrollment growth throughout the University of 600 to 1,000 students, Dr. Oswald explained. He said that the serious inflationary factors affecting both the living costs for employees, and thus salary increase requirements, and also the rising costs of materials the University uses, also are considered in the guidelines affecting the appropriation request.

Concerning the 1974-75 appropriation, signed Friday by Governor Shapp, Dr. Oswald said the trustees directed him to attempt to have legislation introduced when the Legislature returns in September which would provide a special \$1.7 million appropriation to enable Penn State to pay the employer's share of the additional mandated contributions to the State Retirement System. The additional costs were placed in effect after the request for the 1974-75 appropriations had been submitted.

U. Council comments on changes proposed by governance group

The University Council has decided to forward its comments on proposed changes in the composition and role of the Council to President Oswald.

Council discussed in detail comments prepared by a three-member subcommittee concerning a recommendation of the Joint Senate-Administrative Committee on Governance.

After further clarification and revision, the comments will be sent to the president, to be followed with recommendations on what members consider the most effective function Council can serve.

"There is an underlying feeling," said Charles J. Smith, Council vice chairman and director of the Goggin Campus, "that the Council as presently structured, uniquely made up of faculty, students and administrators, is perhaps one group in the University that can respond to questions without being an advocate of a partial segment of the University.

"We would not like to see a group such as the University Council with such broad representation done away with."

The governance report approved by the University Faculty Senate on May 7 recommended that Council become a coordinating body made up of the senior officers of the Senate, the student government bodies, and the Council of Academic Deans, with the University Provost continuing as a member.

Present functions relating to policy on academic program priorities, calendar policy, faculty-finding studies, and recommendations to the President would be discontinued under the joint committee recommendation.

In other business, Council reviewed the format of the results of the spring evaluation of courses and instruction by grad-

uating seniors as prepared by the University Division of Instructional Services. The results are to be sent to department heads for their analysis.

Council also agreed to recommend to President Oswald that Commonwealth Campus directors be given discretion to rearrange class schedules to compensate for local weather conditions. The action was taken in response to a letter from the Student Government Association at the Schuylkill Campus.

The next meeting of Council was set tentatively for August 22.

Fischer to head computer science

Dr. Patrick C. Fischer, chairman of applied analysis and computer science at the University of Waterloo, Ontario, Canada, has been named professor of computer science and head of the department of computer science, effective Aug. 19.

Dr. Fischer served on the Waterloo faculty for six years and was chairman of applied analysis and computer science from 1972. Prior to joining the faculty there, he served for one year as visiting associate professor in computer science at the University of British Columbia, Vancouver; associate professor in computer science at Cornell University; and assistant professor at Harvard University.

Dr. Fischer received the bachelor of science degree in mathematics and the master of business administration degree in actuarial science from the University of Michigan. His doctor of philosophy degree in mathematics was conferred by Massachusetts Institute of Technology.

Trustees approve new department; issue environmental statement

The Board of Trustees of the University took the following actions or received the following information at its meeting last week:

1. Approved establishment of a new Department of Engineering Science and Mechanics, combining the Department of Mechanics and the engineering science program administration. Until a permanent head of the new department is named, Dr. John R. Menter, professor of engineering science and head of the engineering science program, will be acting head of the new department. The current undergraduate program in engineering mechanics will be phased out gradually, although students currently enrolled will continue their bachelor's degree programs. College of Engineering Dean N. J. Palladino says the new department is responsible for offering programs leading to graduate degrees in engineering mechanics and the B.S.

Gotolski named assistant dean

Dr. William H. Gotolski, professor of civil engineering, has been appointed assistant dean for resident instruction in the College of Engineering.

He succeeds Dr. Walter C. Braun, professor of chemical engineering, who is now associate dean for instruction.

Dr. Gotolski received the bachelor of science and master of science degrees in civil engineering from Columbia University and the doctor of philosophy degree from Penn State. Prior to coming to Penn State in 1952, he was an instructor in civil engineering at Ohio University.

Methodology for control of pesticides

Environment center gets study grant

The University's Center for the Study of Environmental Policy will develop a benefit-cost methodology for use by Federal officials in their regulatory control of the production, distribution, and use of pesticides.

Dr. Terry A. Ferrar, director of the Center, said that the University has been awarded a grant of \$98,072 to conduct the 18-month study.

The Federal Insecticide, Fungicide and Rodenticide Act as amended and supplemented by the Federal Environmental Pesticides Control Act of 1972, grants the administrator of the Environmental Protection Agency comprehensive, regulatory

in engineering science.

2. Issued an Environmental Policy Statement which "supports both in philosophy and practice the preservation of the basic ecological integrity of all University locations. . . ." The statement recognizes officially and indicates support for the creation of University Environmental Quality Boards with coordination through the University Park Environmental Quality Advisory Board and the Office of the Vice President for Business. The Board approved an Environmental Impact Statement, which requires that an environmental impact assessment be made for all new construction projects at the University as an initial step in project planning and approval.

3. Approved construction and related plans as follows: (a) final plans for a cardiovascular research laboratory for the Hershey Medical Center which will be financed with a \$350,000 grant available from Kresge Foundation and matching funds from other grants and contracts, (b) preliminary plans for an addition to the outpatient services area and expansion of surgery facilities at the Hershey Medical Center, (c) final plans for an addition to the Helen Eakin Eisenhower Chapel, (d) preliminary plans for alterations and renovations at the Nittany Lion Inn at the University Park Campus, (e) construction of six lighted platform tennis courts adjacent to the tennis building at the University Park campus, to be financed by funds from athletic income, (f) granting of a right-of-way at Behrend College to PennDOT for construction of an acceleration lane on Interstate 90, involving transfer of 0.2 acres of land.

control over the use, production, and distribution of pesticides.

The objective of this project is to conduct a pilot benefit-cost assessment of the pesticide use decision which can serve as a basis of future work in the fulfillment of the administrator's legally mandated responsibilities.

Co-principal investigators for this project will be Dr. Donald J. Epp, associate professor of agricultural economics, and Dr. Lee M. Day, professor of agricultural economics. Dr. Epp is a specialist in the economics of natural resource use, and Dr. Day has extensive experience in Federal agency decision processes.

Surrealism conference is planned

An international conference to celebrate the 50th anniversary of the founding of Surrealism will be held at the University, November 7, 8, and 9.

Surrealism was founded by the French poet Andre Breton, who published the first "Manifeste du Surrealisme" in 1924.

The effects of the revolutionary movement on art, literature, film, theatre, and music will be discussed at the conference both by cultural historians and actual practitioners of Surrealism.

An art exhibit featuring major Surrealist paintings, sculpture, and photographs is planned, according to Dr. Robert Lima, head of the comparative literature program and conference organizer. Works from many

private collections and museums will be exhibited.

At the same time, Surrealist plays, films, music, and ballet will be presented. Rare books, manuscripts, journals, posters, and other items of the Surrealist movement will be on display during the celebration. For the conclusion of the conference, a Surrealist banquet is planned.

To record the events of the celebration, a program-catalog will be produced which will also make a permanent scholarly contribution, according to Dr. Lima.

The Institute for the Arts and Humanities studies is aiding in support of this conference.

J.J. Cramer named Faculty Fellow

Dr. J. J. Cramer

Dr. Joe J. Cramer Jr., professor of accounting, has been named an Arthur Andersen Faculty Fellow in the College of Business Administration.

The appointment was made by President Oswald, on the nomination of Dr. Eugene J. Kelley, dean, and colleagues in the College of Business Administration.

It is the second appointment to be made since the Trustees of the University on May 31 established the position of faculty fellow, as well as chairs and professorships supported by special grants from benefactors as a means to give special recognition and support to distinguished faculty members at Penn State.

In June, Dr. William L. Ferrara, also a professor of accounting in the College of Business Administration, was named a Price Waterhouse Faculty Fellow in the College.

Dr. Cramer's appointment will extend for a five-year period, with support from Arthur Andersen and Company.

Dr. Cramer, a native of Texas, has served on the University faculty since 1963. He is one of only a few blacks in the United States who holds a combination of the Certified Public Accountant certificate and a doctoral degree.

He has been involved in the recruitment of minority students, serving for four years on the Committee on Minority Recruitment and Equal Opportunity sponsored by the American Institute of Certified Public Accountants.

In the College of Business Administration, he has been active in administrative affairs, serving as acting head of the Department of Accounting and Management Information Systems. In 1971, chairing its Graduate Policy Committee, and working on the Committee on Faculty Recruitment.

Dr. Cramer received the bachelor of business administration degree from Texas Southern University and the master of business administration and doctor of business administration degrees from Indiana University. He has written numerous technical articles and coauthored a book with Dr. G. Kenneth Nelson, professor of accounting, "Budgeting Problems."

Three receive 25-Year Service Awards

Dr. James W. Shigley, left above, receiving the 25-Year Service Award certificate from College of Science Dean Thomas Marik, was appointed to the faculty as instructor in agricultural biochemistry in July, 1949, after receiving his Ph.D. at Penn State and serving as graduate assistant for three years following three years of military service. He was named assistant professor in 1953, associate professor in 1960, and professor of biochemistry in 1970. He has taught biochemistry courses from the elementary to the advanced courses and has done research in the physical and chemical properties of fatty acids. He received his B.S. from Penn State in 1940, then was a graduate fellow at the University of Maine for two years before receiving his M.S. degree there.

William H. White (second from right) received the University's 25-Year Service Award certificate from College of Agriculture Dean Dr. James A. Beattie, in the presence of his wife, Thelma (at his right) and Ellen M. Garber, assistant director of Extension for the eastern region, which includes White's Philadelphia County, where he is the county Extension director and county agent. A 1940 graduate of Penn State, after serving during World War II in the U.S. Marine Corps, White became an assistant extension representative in April of that year. He was promoted to county agent in 1955 and to his present title this year. His bachelor's degree was in dairy husbandry and he earned an M.S. degree in 1959 at the University of Missouri in agricultural extension.

When Leslie P. Greenhill (at right), assistant vice president for academic services and director of UDS, became eligible for the University's service award, the staff of the University Division of Instructional Services held a party, part of which included a recounting, with pictures and words, of Greenhill's life story. D. W. Johnson, left, who acted as master of ceremonies, presented a bound volume of letters, art and pictures which will now have photos of the occasion and of a later affair when President Oswald presented the 25-Year award certificate. Greenhill, native of Australia and educated there, served on the faculty of the University of Melbourne in 1946-47, was in Great Britain for a year for a search on using films and television for educational purposes, then came to Penn State to work in the Instructional Research Program, becoming associate director in 1955; this program became the Division of Academic Research and Services in 1960, and was named UDS in 1965. Greenhill was appointed director of UDS in 1965, assistant to the president for academic affairs in 1965, assistant vice president for resident instruction in 1967, and to his present title in 1970. He also holds the rank of professor of education. He has been concerned on many educational projects nationally and has authored many publications dealing with research on application of films and television to education.

Honors

Dr. Abraham Rosenberg, professor of biological chemistry at the Hershey Medical Center, has been selected as a Fulbright-Hays Scholar for the next academic year by the Board of Foreign Scholarships. He will be at the Louis Pasteur University and the National Center for Scientific Research in Neurochemistry in Strasbourg, France, beginning October 1.

Dr. Barnard Bissinger, professor of mathematics and chairman of the Mathematical Sciences Program at Capitol Campus, was awarded a certificate by the Center for Depreciation Studies of Western Michigan University for "Making and Administering Policy." The Center conducts an annual program in the study of depreciation, for members of public utility companies, telephone companies and consulting firms.

Appointments

Dr. William A. Vogely, former economic adviser to the U.S. Secretary of the Interior and acting assistant secretary for energy and minerals in the U.S. Department of the Interior, as professor of mineral economics Dr. Vogely, who has served also for 12 years as a professional lecturer at George Washington University, was director of the Office of Economic Analysis in the Office of the Secretary of the Interior during 1971-73. He has served also as director of the planning and analysis division of the Internal Revenue Service, assistant director for mineral resource evaluation in the U.S. Bureau of Mines, and Haynes Foundation Lecturer at the University of Redlands, Redlands, Calif. Dr. Vogely received the bachelor of arts degree in economics from Kenyon College, Gambier, O., and the master of

arts and doctor of philosophy degrees in economics from Princeton University.

Dr. Robert S. Dickey as adjunct professor of plant pathology. He has been a member of the Cornell University faculty since 1952. His principal areas of research for the past six years have been phytopathogenic bacteria and bacterial diseases of plants.

Changes in status

Changes in status for three members of the staff of the University Libraries have been approved by the Board of Trustees. The title of Murray S. Martin has been changed from associate director of libraries to associate dean of University Libraries. The titles of Charles Nesbitt and Edward R. Johnson have been changed from assistant director of Libraries to assistant dean of University Libraries.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For procedural and funding source information, call 865-1372.

July 25, 1974

(139-1) Overseas study of foreign languages and area studies by Ph.D. holders and doctoral candidates is supported by the Office of Education (OE). For 1975-1976 awards to Individuals, OE announces a deadline for Oct. 15, 1974 (Oct. 1 for group awards). Guidelines are unchanged from previous years and the same foreign currency countries of Egypt, India, Pakistan, Poland and Tunisia are eligible. Materials and information are available from: International Studies Branch, Div. of International Education, Office of Education, OHEW, Washington, D.C. 20202; Ref. CAU 3476, p. 3.

(139-2) The Health Resources Administration (HRA) and the National Library of Medicine (NLM) have collaborated to create the Office of Audiovisual Educational Development for the purpose of investigating and promoting new technology in the development of audiovisual products for health sciences education. Instructional materials for undergraduate education receive priority, followed by graduate education and continuing education. Initially the greatest need is the development of instructional materials in basic

health sciences education: anatomy, physiology, biochemistry, pathology, physical diagnosis, "life-threatening emergencies," and primary care. The next three deadlines are Sept. 1, 1974; Dec. 1, 1974; and March 1, 1975. Additional information and contract guidelines are available from: Robert E. Sumpter, Program Project Coordinator, Office of Audiovisual Educational Development, Bureau of Health Resources Development, 1600 Clifton Road, N.W., Atlanta, Ga. 30333 (404)633-3351 (Ref. ODP 227, p. 255f).

(139-3) The American Chemical Society will offer continuing education courses to chemists and chemical engineers through an NSB, OOD NSF grant. Designed to update the skills of chemists and engineers, the continuing education program is part of a larger effort by the National Science Foundation to furnish similar programs for other professionals. ACS will develop, design, produce, evaluate, market and distribute continuing education materials in chemistry using in part computer-assisted instruction, color videotapes, audiocassettes, films, and printed matter for use-controlled short courses. NSF anticipates support for continuing education

projects in other fields. For additional information call Walter H. Dodd, NSF (202)632-5704. (Ref. NSF 74-163 7/5/74).

(139-4) The National Science Foundation (NSF) Office of International Programs administers Cooperative Science Programs to foster the interchange of information among U.S. and foreign scientists, scientific activities, basic research, and assistance to U.S. institutions for research abroad. Cooperative research, seminars, and scientific visits are paramount in the programs with Australia, Rep. of China, Eastern Europe, Italy, Latin America, and Japan. Research in mathematical, physical, chemical engineering, biological and social sciences is emphasized in the U.S.-India program. Basic and applied research in the natural sciences, agriculture and health sciences, science services, and special technologies in transportation, energy, earth zone research, and environmental problems are featured in the U.S.-Israel program (Sept. 1 and March 1 next specified deadlines). Requirements and review periods vary among the eleven program areas: Contact areas follow. Each telephone extension should be preceded by (202-632-4300). Australia and India: Dr. Max Hellman (5680); Japan and China: Dr. J. E. O'Connell (5782); France and Italy: Henryk Uznanski (5756); Romania and East European: Dr. Robert Hull (5756); USSR: Dr. John Thomas (5741); Spain and Latin America (6811); and Israel: Dr. R. R. Ronkin (5795). For mailing:

NSF, 1800 G Street, N.W., Washington, D.C. 20540 (Ref. ODP227, p. 261f).

(139-5) National Endowment for the Arts (NEA) Office of Contemporary Arts administers fellowships for experienced professional designers to develop new skills and concepts. (They are not intended for formal education.) Applicants formulate short-term fellowship programs. The next application deadline is Jan. 6, 1975. Grants of \$10,000 are given for 6-12 months. For further information write to address given above (Ref. ODP 74-163 7/5/74).

(139-6) National Science Foundation (NSF) set Dec. 2, 1974 as the deadline for its 1975 NEA season Program (May 16 INTERCOM 2129-4). The U.S. who have not completed one year of graduate study may apply. For further information and application forms write to NEA Office, National Research Council, 2101 Constitution Ave., N.W., Washington, D.C. 20546. (Ref. ODP 74-163 7/5/74).

REMINERS AND DEADLINE DATES
1. For NSF Instruction Improvement Program (May 16 INTERCOM 2129-4).
1. For NEH Development Grants (May 16 INTERCOM 2130-2).
1. For NSF U.S.-Japan Cooperative Science Program (June 20 INTERCOM 2134-2).
1. For NSF Dept. Transportation University Grants (July 18 INTERCOM 2138-3).

PROSIM adopted as teaching device in Russian university

PROSIM, a computer management simulation production package, developed by Dr. Paul S. Greenlaw and Dr. Michael P. Hohenstein, professors of management, is to be used as a teaching device at Moscow State University, U.S.S.R.

Basically, a learning package in which students play a business game, PROSIM is used to aid the understanding of various theories, analytical tools and concepts in the field of production. It has been

Totalling more than \$8 million

Higher education grants aid over 15,000 at Penn State

More than 15,000 students at the University received some \$8 million in Pennsylvania higher education grants during the 1973-74 academic year.

Kenneth R. Reether, executive director of the Pennsylvania Higher Education Assistance Agency, said the agency processed 18,675 applications from Penn State students.

A total of 15,501 grants, valued at \$8,186,276, were awarded for the academic year.

Three memorial scholarships set

Three memorial scholarship and prize funds were announced by the Trustees last weekend.

Honoring the late professor emeritus of Greek, a Robert E. Dengler Memorial Classics Prize Fund was established, with funds provided by the classics faculty, former students and friends of Dr. Dengler; additional funds may be made available by interested persons or groups. Dr. Dengler, who served on the faculty for 35 years before retiring in 1955, died last September.

The Irving L. Foster Memorial Award, which honors the professor of Romance languages who was a member of the faculty from 1896 to 1929, was established at the instigation of Richard F. Mezzotero, of Hamden, Conn., a former student of Dr. Foster's, who contributed \$1,000 to the fund; an additional amount was provided by a nephew, Warren C. Foster, of Washington, D.C. The award will be given to an outstanding student majoring in French, Spanish, or Italian, being rated among the three majors annually.

Graduate students who have held assistantships in mathematics will be aided by the Charles H. Hoover Memorial Fund which was established with funds provided by Mrs. Margaret H. Hoover, of Philadelphia, in memory of her husband, who was a 1928 graduate of Penn State. The yearly award will be made to the assistant who has demonstrated excellence in teaching during the current year.

Through funds provided in the estate of Dr. Martin J. Eyster, a 1925 alumnus who majored in chemistry, a scholarship fund has been established for the benefit of full-time undergraduates majoring in chemistry who have completed two years of study with a superior academic record.

Vol. 3, No. 45
Penn State INTERCOM is a weekly publication for the academic community. The Pennsylvania State University, published each Thursday where news is in session. General information and items for the calendar should be written to the editor by Thursday of the week preceding publication. Editor: Dr. Old Main, Room 605-7517. Phone 865-7517.

Staff vacancies

University faculty or staff members who are interested in any of the staff exempt or staff regular jobs listed below may apply by calling ENR001, Division 865-1327 (Network Line 476-1327). Do not contact the area having vacancy. Vacations will be accepted until: 5:00 p.m., Aug. 8, 1974.

ENGINEERING AIOE, COLLEGE OF ENGINEERING

University Park
Responsible for the design, construction, testing and maintenance of complex and technical research devices and equipment such as electron microscopes, high vacuum systems, and electron detectors, and for assistance in the preparation of proposals in technical development of research facilities such as fabrication methods and materials specifications and ordering. Associate degree or equivalent and two to four years experience in precision machine shop.

ASSISTANT DIRECTOR OF NURSING — **Marcelline Center**
Participate in developing a written philosophy and objectives for the Nursing Department which are

published by International Textbook Company.

According to Professor V. M. Efimov, a faculty member of the Soviet Institution, he and his colleagues have been able to convert the American PROSIM FORTRAN computer program into the Soviet Union's computer system. Professor Efimov adds that some faculty members have experimentally played the game, using all the analytical

Included were awards to 2,564 Vietnam War era veterans valued at \$1,887,783.

According to PHEAA, the number of state higher education grants represented approximately 41 per cent of the Pennsylvania residents enrolled as full-time undergraduate students at Penn State.

In its student loan guaranty program, PHEAA reported that 5,760 Penn State students, including 367 graduate students, received loans totaling \$8,734,296.

News in Brief

SCULPTURE FOR MRL

The Carbournum Co., Niagara Falls, N.Y., has donated a sculpture by the Mexican artist Feliciano Belar to the Materials Research Laboratory, as part of the company's Awards for Excellence program. Two other art works, by Dame Barbara Hepworth and Max Bill, were donated previously to MRL for its permanent collection, which includes works acquired with the assistance of the University's Office of Gifts and Endowments.

CAPITOL EDITORS

Dr. Richard Heindel and Dr. Robert Bresler, of the Capitol Campus faculty, are editors of the magazine "Intellect," which has been expanded recently. Dr. Heindel, who is professor of international relations, is editor of the international affairs section; and Bresler, associate professor of social sciences, is editor of the national affairs section. The magazine, published by the Society for the Advancement of Education, grew out of the publication "School and Society." It will begin publication in October in its new form.

FRIZZELL AWARD

The ninth annual John Henry Frizzell Award, of \$300, given by the Pennsylvania Lambda Education Foundation of Phi Kappa Psi, has been given to Patrick J. Sobinski, of East Stroudsburg, junior in political science. The award honors Mr. Frizzell, professor emeritus of public speaking and University Chaplain emeritus.

BOOKSTORE MANAGER

F. Owen Heney, director of stores at the University of Vermont for the past 12 years, has been named manager of the University Park Bookstore, effective August 15. Daymon M. Henson, who organized and operated the bookstore which opened in March of last year, will again devote full time to his responsibilities as coordinator of Commonwealth Campus bookstores, a position he has held since 1970. Heney, served at Bucknell University, 1961-62, and earlier was a student assistant to the bookstore manager at Keene State College, Keene, N.H.

compatible with the purpose of the Medical Center; guide the Nursing Care Coordinators in ensuring that the needs of the Nursing Service Department are familiar with established standards and their responsibilities and upholding them; supervise the Nursing Care Coordinators on the 3-11 and 11-12 shifts. Conduct performance evaluations for employees directly supervised and plan formal and informal communication conferences with them. Master's degree or equivalent in nursing service administration plus four to six years of related experience preferably in a teaching hospital environment.

LABORATORY WORKER, COLLEGE OF AGRICULTURE — University Park

Supervise laboratory analyses including nitrogen, fiber, fat, energy, ash, and dry matter. Manage flow of samples, laboratory inventories and coordinate work of technical service employees and Research Aides. Occide on priorities of samples to be analyzed. Assist in teaching and training of laboratory techniques to undergraduate and graduate student classes. Operate calculator; prepare data for computer analyses. Collect tissue and physiological fluid samples, assist in collection of data on experimental analyses, as required.

materials provided to understand the dynamics.

In the near future, three periods of "play" will be undertaken by five Russian students, and plans call for the formal introduction of PROSIM into the institution's educational program by having students play PROSIM once a week, in much the same way PROSIM has been used in numerous schools of business and management in the United States.

Reether said the State Higher Education Grant Program assisted some 99,000 Pennsylvania students to attend the post-secondary educational institution of their choice in the 1973-74 academic year. Included are 11,300 Vietnam War era veterans.

The loan program processed \$59 million in guaranties to Pennsylvania residents enrolled in Pennsylvania colleges and universities.

PIANO RECITAL

Tier Gemberling, pianist, will present a recital of music by Haydn, Brahms, and Beethoven at 8:30 p.m. Friday, July 26, in the Music Bldg. recital hall.

An instructor in music, Miss Gemberling is a graduate of State College High School and received the bachelor of fine arts degree in music from the University in 1973. She was a member of the University Choirs and Penn State Singers.

RETIRED STAFF CLUB

Membership in the Retired Staff Club, the organization of University faculty and staff members (and spouses) who have retired, stands at 566, a report by Van D. Bisey, membership chairman, indicates. The Club's annual picnic will be held September 5 at the Civil Engineering Camp at Stone Valley.

ARTS APPOINTMENTS

Two appointments related to the arts have been made: Theodore S. Glatas as manager of University auditoriums and Carrol D. Price, II, as assistant to the director of University Arts Services. Glatas will manage functions in both Schwab and the University Center auditoriums. Price will coordinate fund-raising and promotional efforts and the development of a central information office for the arts.

LEAVES

Dr. Alfred J. Engel, professor of chemical engineering, will teach two graduate courses and aid in establishing a graduate research program at the University of Negel, Beer-Gheva, Israel, while on leave during the 1974-75 academic year as a Fulbright-Hays Senior Lecturer in Chemical Engineering.

Dr. Arthur L. Boettcher, professor of geochemistry and chairman of the geochemistry and mineralogy section, College of Earth and Mineral Sciences, will be at the Menlo Park, Ca., office of the U.S. Geological Survey and the University of British Columbia, Vancouver, for six months beginning next January, continuing his research related to the origin, evolution and nature of the interior of the Earth and other terrestrial planets.

Associate degree or 3-5 years experience in analytical work and an additional 1-2 years in supervisory work including coordination of research efforts. Must have ability to get along with end communicate with people.

FINANCIAL OFFICER, CONTROLLER'S OFFICE — Beaver Campus

Responsible to the Controller, through the Director of Financial Officers, and to the Campus Director in financial and administrative matters pertaining to University and Campus policies and procedures. Bachelor's degree in accounting or equivalent plus over four years up to and including one year of related experience.

RECORDER, COLLEGE OF HUMAN DEVELOPMENT — University Park

Coordinate and maintain a data system to fulfill the requirements of various agencies and departments. Prepare and maintain enrollment statistics and project student rotation schedules. Provide information to students concerning program requirements, recommend course offerings, uniforms and equipment, malpractice insurance, etc. Coordinate current information with all nursing advisors. Admit and screen students for credit by examination. Bachelor's degree or equivalent with six to nine

Electrical work

Electrical service to a number of buildings on West Campus at the University will be interrupted from 2 to 8 p.m. today (Thursday, July 25), to make repairs to the electrical distribution system.

Buildings affected include the Nittany Lion Inn, Recreation Bldg., Kern Graduate Bldg., J. Orvis Keller Bldg., Social Science Bldg., all units of West Halls, Noll Laboratory for Human Performance Research, Applied Research Bldg., Deike Bldg., Food Stores Bldg., Service Bldg., Electrical Engineering, East and West units, Ihseng Bldg., Water Tower No. 1, and the touch football field.

WPSX highlights

The life and career of England's Sir Arthur Conan Doyle is the focus of the next dramatization on "Masterpiece Theatre." Sunday, July 28, at 9 p.m. and Friday, Aug. 2, at 9 p.m. on WPSX-TV, Channel 3. This program about the creator of the famed sleuth Sherlock Holmes is presented as part of "The Edwardians."

William F. Buckley's guests on "Firing Line" Sunday, July 28, at 10 p.m. are Dr. Russell Roth, president of the American Medical Association, and Max Fine, executive director of the Committee for National Health Insurance. The two will exchange views on new national health insurance proposals and the possibility of federally-insured medical care.

Anne Jackson and Eli Wallach star in "The Typists" Wednesday, July 31, at 9 p.m. and Saturday, Aug. 3, at 9:30 p.m. on "Hollywood Television Theatre." The play, written by Harold Pinter, is a touching comedy of two people who are caught up in the routine of office existence.

The history of hunting in Pennsylvania and ways that hunting license revenues pay for the conservation efforts in the state are outlined on "Conservation and the Hunter," Thursday, August 1, at 7:30 p.m., Friday at 3 p.m. and Saturday at 1:30 p.m. The program features John Behel, hunting safety coordinator of the Pennsylvania Game Commission and is produced by Penn State Television. "Conservation and Hunter" is the first of a new 5-part series called "Safe Hunting."

Award winners

Three special citations were awarded to the Department of Publications, directed by Jean W. McManis, by the American College Public Relations Association, Association of American University Presses, and Graphis Annual, at the ACPPA meeting in Atlanta, Ga., July 10.

The three publications cited were "Penn State Libraries," designed by Glenn Ruby, now art history editor of the University Press; the 1973 Festival of American Theatre programs and posters, designed by Larry Krezo, art assistant in Publications; and "The Western by Penckpach," a poster designed by Joe Kredlow, art assistant in Publications.

In addition, a book jacket designed by Marilyn Shoben, art editor of Publications, was among the winners in its category and will be shown in an exhibit which will travel throughout the U.S. and Canada. Also, the program designed for the 1973 exhibition by Hungarian and U.S. gymnasts will be included in Graphis Annual, an International collection of award-winning graphic art. A former art assistant, Maria de Febo, designed the program.

months experience with administration. A working knowledge of the nursing program at Penn State would be an engineering asset.

NURSING STUDENT, COLLEGE OF HUMAN DEVELOPMENT — University Park

Coordinate and insure the efficient operation of courses and clinical experiences. Skills offered at the Benedict House. Plan and schedule student testing of required fundamental skills involved in nursing courses such as catheterizations, medications, etc. Order and maintain an inventory of soft materials and nursing supplies utilized in demonstrating nursing skills. Registered Nurse with one year practical experience in basic nursing skills.

ENGINEERING AIOE, APPLIED RESEARCH LABORATORY — University Park

Functions as an engineering aide performing required signal systems processing, data computations and analysis, and system checks and calibrations. A minimum of an Associate degree in electronics or related plus experience in signal processing and related areas is required.

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER.

Veteran actor has long-time connection to Penn State

Max Gulack

Max Gulack's friendship with Penn State theatre productions goes back to the days of the barn playhouse at Standing Stone, which had a sometimes leaky roof and set furnishings on an occasion left something to be desired in the way of stability. Nothing like the outstanding facilities and sets of today's Playhouse in the Arts Building and Pavilion Theatre down the street a block.

Max has two roles in Festival Theatre this year. Currently he is Dr. Crumley, in "Harvey," at Pavilion. Next week he will be Charlie, in "Death of a Salesman." They're two quite contrasting roles, but then Gulack has had a wealth of experience in all kinds of theatre productions as well as radio, films, and other media.

His first association with Penn State theatre offerings at Mater Playhouse (near Neff's Mills, 20 miles from campus) in 1962 was in "Tiger at the Gates," the Christopher Fry adaptation of Jean Girardoux's "The Trojan War Shall Not Take Place." In that same summer he was in "A Thurbur Carnival," a musical review of representative stories and fables by James Thurber; Robert Penn Warren's "All the King's Men"; "Send Me No Flowers," and Norman Barasch-Correll Moore comedy; and "Blood, Sweat and Stanley Poole," in which he played a not-too-bright P.C. Rooney, obviously a character role.

Gulack was also in the summer theatre company which opened Pavilion Theatre the following year. He was Dr. Bonfant in the Jean Anouilh comedy, "The Waltz of the Toreadors" and Dr. Maguire (type-casting?) in "Look Homeward, Angel," by

Ketti Fring. One of his outstanding roles here came that same summer, as Jean, in "Rhinoceros," by Eugene Ionesco.

Also, in 1963, Max played Uncle Ben, in

"Death of a Salesman." It is not the same role but it's the same play in which he winds up another summer at Penn State. It's apparent he likes to come here.

"Harvey" will continue at Pavilion through Saturday, July 27. "Death of a Salesman" opens Friday, August 2 and continues through August 10 with the exception of Monday, August 5. There are matinees Saturday, August 3 and 10.

The Cole Porter musical show, "Kiss Me Kate," opens Thursday, August 1, at Playhouse theatre, directed by Gene Lesser, a member of the drama faculty at the Julliard School since 1948. The show will star Tanny McDonald (who also starred in "Finian's Rainbow" which opened the current season) Fred Suthman, Judd Jones, and Ray Fry (who also appeared in the same show).

Tickets for "Death of a Salesman" and for the musical "Kiss Me Kate" which opens at Playhouse Thursday, August 1, may be reserved by calling 865-1884. But they are going fast.

Alumna Weisberger labored hard for Ballet's success

The executive artistic director of the Pennsylvania Ballet, which opens a series of six week-end concerts August 2, is Barbara Weisberger, a Penn State alumna who founded the company eleven years ago.

Concerts will be given at 8 p.m. Friday and Saturday August 2 and 3, 9 and 10, and 16 and 17, in the new University Auditorium, with a different program each week-end. Free public sessions with the chore-

ographer, George Balanchine. She enrolled in college at the age of 16 and was graduated in three years. There followed two years of grade school teaching. These years away from the ballet terminated any career ambitions she may have had as a performer, but her love of the dance led her to rejoin her family in Wilkes-Barre where she began to teach ballet.

By 1956 her school had produced a

Free tickets for informal sessions

Free tickets for the informal sessions with professional artists performing in the events of Nittany Mountain Summer are available at the University Auditorium and Festival Theatre box offices. Among the summer's free offerings are the Pennsylvania Orchestra concerts at 8:00 p.m. on July 31, Aug. 7, and Aug. 14 in the Music Building Rectal Hall. Conducted by Pennsylvania Ballet music director Maurice Kaplan, the concerts will feature selections of music from seven centuries.

Saturday afternoons will feature "at ease" sessions with the Pennsylvania Ballet associate artistic director, Benjamin Harkavy, and company dancers, at 4:00 p.m. in University Auditorium. Harkavy will discuss a different topic each Saturday, August 3, 10, and 17, including how a

ballet is choreographed, current dance trends, and the relationship of dancer and choreographer as ballet artists.

In the Festival Theatre, the director and several performers and technicians from the production of "Kiss Me Kate" will offer a behind-the-scenes look at the show at 4:00 p.m. on Friday, August 8, in the Playhouse. On Thursday, August 9, also at 4:00, "Death of a Salesman" will be the subject in the Pavilion.

The theatre, ballet, and concerts sessions will all be informal, casual forums in which audience participation in discussions will be encouraged. Admission will be by free ticket only, until 5 minutes before the session begins when available seats will be released to non-ticket holders.

regional company of good dancers, but the area's relative isolation from a major population center limited the growth potential of her dancers and the company. The situation led Brooklyn-born Mrs. Weisberger to start a school in Philadelphia in 1962.

A year later, the Pennsylvania Ballet was formed with ample encouragement and advice from Balanchine. A major gift from the Ford Foundation sustained the company's early development and provided the

"Gueriel," performed by Pennsylvania Ballet members Enid Britten, Dore Lafontes, Janek Schergen, and Gretchen Warren, will be discussed by Benjamin Harkavy during the Ballet's "At Ease" session Saturday, Aug. 3, at 4 p.m. in the University Auditorium.

catalyst for enlarged corporation, foundation, and individual support.

At the time, Mrs. Weisberger, in addition to handling artistic matters, shouldered a major share of the responsibility for stimulating and promoting public interest in the Pennsylvania Ballet's future. She also rallied the world's finest choreographers to contribute ballets to the company's repertoire, which today includes 60 dance works embracing every significant trend and movement in the evolution of ballet.

Barbara Weisberger's impact on the American dance scene has resulted in numerous honors including an honorary doctor of humane letters degree from Swarthmore College, the 1971 Medal of Achievement from the Philadelphia Art Alliance, an honorary doctor of fine arts degree from Temple University, and a Distinguished Alumna award from Penn State.

ographer and associate artistic director, Benjamin Harkavy, with company dancers will be held in the Auditorium at 4 p.m. prior to each Saturday's concert.

Ticket information for the Ballet and all Nittany Mountain Summer Events is available at the University Auditorium box office, 865-2242. Tickets for the afternoon sessions can be obtained at no charge at the same box office.

As a youngster, Mrs. Weisberger studied ballet with the famed choreographer and

And there will be other kinds of dancers too

More than 800 enthusiastic dancers from seven or eight states will converge on the University Park campus the weekend of August 3-4 for a music-filled summer festival.

A two-day youth rock concert? Hardly — at least one of the dancers will be over 70-years-old.

They'll be do-si-do-ing, not boogalooing, at a unique and colorful event that once again will show "square dancing is here to stay."

The event is the 21st annual Penn State Square Dance Festival, an affair that brings together square dancing fans, ranging in age from the mid-tens to the mid-70s, for a weekend of instruction and fun.

Square dancing in Pennsylvania is bigger and better than ever, says Dr. Fred C.

Snyder, director of short courses for the College of Agriculture and coordinator of the Festival. While more than 800 will participate, many more have been turned away because of lack of space.

It seems that square dancing is very serious business at times, and many dancers return annually to the Festival to attend the various instructional clinics. Dr. Snyder points out that many square dancers are intricate and require much practice and knowledge. He advises that nothing "wrangles" a serious square dancer, more than being labelled a "barn dancer."

But is there really that much new about square dancing that requires dancers to attend clinics every year?

"There sure is," says Dr. Snyder. "For instance, when a square dance caller de-

velops a new dance it's as if he wrote a book. His name often goes along with the new dance."

The Penn State Festival is one place where an aspiring square dance caller can develop his technique. Experts will be on hand to break them in and teach them the latest calling methods.

But the work pays off on Saturday night at the traditional closing square dance. Its "real Americana," claim the dancers, who fill two ballrooms. And Dr. Snyder adds that the closing dance isn't something that can be ended by telling the dancers the party's over.

"When it's all done," he says, "they go back to their motels and residence halls where they've been housed and start dancing in the lobbies."

Calendar July 25-Aug. 4

Special events

Thursday-Saturday, July 25-27 — Festival of American Theatre, "Harvey," 8 p.m. Saturday matinee, 2 p.m., Pavilion Theatre.

Friday, July 26 — Teri Gemberling, piano recital, 8:30 p.m., Music Bldg. rectal hall.

Friday, July 26 — Duplicate Bridge Club tournament, 7:30 p.m., HUB ballroom.

Friday, July 26 — Commonsplace Coffee house, 8 p.m., Room 102 Kern. Featuring "John Elliott" and "Open Mike."

Sunday, July 28 — Interlandia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Sunday, July 28 — "Topics of the Times" weekly discussions sponsored by Campus Ministries at the University, 9 p.m., Johnson (East halls) Hall Free Talk Center. Open to everyone.

Monday, July 29 — Duplicate Bridge, 8:45 p.m., HUB ballroom.

Monday, July 29 — Penn State Overcomers, 7:30 p.m., Room 220 Boucke.

Wednesday, July 31 — Chess Club, 8 p.m., ground floor HUB.

Wednesday, July 31 — Meditations, sponsored by Office of Religious Affairs, 12:30 p.m., Eisenhower Chapel. Rev. Joseph U. Gerg, O.S.B., Catholic Chaplain, or "Spirit."

Wednesday, July 31 — Shirt Sleeve Concert, Pennsylvania Orchestra, 8 p.m., Music Bldg. rectal hall.

Thursday-Sunday, August 1-4 — Festival of American Theatre, "Kiss Me Kate," 8 p.m. Sunday, 7:30 p.m.; Saturday matinee, 2 p.m., Playhouse Theatre.

Friday, August 2 — Commonsplace Coffee house, 8 p.m., Room 102 Kern. Featuring "John Elliott" and films.

Friday-Sunday, August 2-4 — Festival of American Theatre, "Death of a Salesman," 8 p.m. Sunday, 7:30 p.m.; Saturday matinee, 2 p.m., Pavilion Theatre.

Friday-Saturday, August 2-3 — Pennsylvania Ballet in Concert, 8 p.m., University Auditorium.

Saturday, August 3 — At ease with the Pennsylvania Ballet, 4 p.m., University Auditorium.

Note, Please

INTERCOM will print a Fall Term calendar in its September 5 issue. Departments or organizations having material to include in this calendar should send it to the Editor, Room 312 Old Main, by FRIDAY, AUGUST 16.

Films

Thursday, July 25 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Sherlock Holmes Faces Death."

Monday, July 29 — Commons Middle Cinema, 12:30 p.m., Room 112 Kern. "The Great Escape."

Wednesday-Friday, July 31-August 2 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Something for Every One."

Meetings

Tuesday-Saturday, July 30-August 3 — The 21st Biennial Conference on Chemical Education and the second Centennial of Chemistry celebration.

Exhibits

Issue of Art — Milton Osborne Drawings, Gallery A. Central Pennsylvania Festival of the Arts, Gallery C, through July 28. Philadelphia Artists, Gallery C, opening August 4. Free Museum hours, 10:30 a.m. to 5:30 p.m.

Zoller Gallery — MFA Show, Jeffrey H. Spaulding and Pamela F. Turner, through July 27. MFA Show, Robert Diercks and Chriss Manchester, opening July 28.

Commons Gallery — Central Pennsylvania Festival of the Arts Juried Exhibition through July 28. Joyce K. Stover, jewelry, through July 30. Rebecca Kampen metal sculptures, opening July 29.

HUB specials

Sunday, July 29 — Dinner, grilled ham steak, \$1.95; supper, included with cake, \$1.95. **Monday, July 29** — Lunch, stuffed tomato with chicken salad, \$3.49; dinner, chicken Macaroni, \$1.30.

Tuesday, July 30 — Lunch, franks and beans, \$.58; dinner, meatloaf, \$1.05. **Wednesday, July 31** — Lunch, Oceanburg, \$1.15; dinner, spaghetti with meat sauce, \$1.34.

Thursday, August 1 — Lunch, lasagna, \$.25; dinner, beef pie, \$1.25. **Friday, August 2** — Lunch, macaroni and cheese, \$.95; dinner, french fried clams, \$1.34.

Saturday, August 3 — Lunch, stuffed spaghetti, \$1.10; dinner, cheese Salisbury steak, \$1.25.

PENN STATE intercom

Volume 3, Number 46

August 1, 1974

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Murray named assistant director

Zubrod acting director at Altoona

Jack G. Zubrod, a member of the faculty since 1946, first at Dubois Campus and since 1951 at Altoona, is serving as acting director of the Altoona Campus, and Dr. Dennis E. Murray has been named assistant director for resident instruction.

A graduate of the University of Pittsburgh, Zubrod taught at Portage High School, worked as a civilian electronics inspector for the Navy Department, enlisted in the Navy and served in the Pacific Theatre until 1946, then joined the DuBois faculty, as instructor of botany. He was promoted to assistant professor of biological sciences when he transferred to Altoona in 1951 and in 1955 was named Dean of Faculty, a title which later became as-

sistant director for resident instruction. He was instrumental in forming the faculty senate at the campus, later serving in the University Faculty Senate and on a number of its committees and task forces. He is currently chairman of a task force developing a five-year plan for the campus.

Dr. Murray, a member of the Altoona faculty since 1967, is a graduate of Slippery Rock State College, earned a master's degree at Duquesne University, and was granted the Ph.D. by Penn State in 1937. He is assistant professor of education. Before joining the faculty he taught in Franklin Area School District, Plum Borough, and Oakmont districts, and at Robert Morris Junior College.

H. Lee Mathews heads marketing

Dr. H. Lee Mathews, professor of marketing, has been named acting head of the Department of Marketing. Dr. Peter D. Bennett, professor of marketing, resigned as head of the Department, effective July 1, to return to full-time teaching and research.

Dr. Mathews has served on the faculty at the University since 1965. His main areas of research are marketing planning and strategy for both consumer and industrial products companies.

The author of numerous articles appearing in business journals, Dr. Mathews has served as a consultant to various firms, including General Electric, Sperry Rand, Eastman Kodak, and Standard Steel.

Center exhibit

Art works of a painter, a photographer, and a ceramic artist are featured in an exhibit at The Cultural Center, Walnut Bldg., which will run from August 5 to September 14.

Murry DePillars, currently a candidate for the Ph.D. in art education, has exhibited his art, described as revolutionary, in many one-man and group exhibitions, among them the Museum of Science and Industry in Chicago and the Whitney Museum of American Art in New York. A native of Chicago, he holds B.A. and M.A. degrees from Roosevelt University.

Photographer Robert Jackson, who developed his skills while attending Washburn University, describes the objective of his work "to communicate humanistic expressions." He has exhibited in galleries in Chicago and at the Ann Arbor Art Center in Michigan and the Johnson's Wax Gallery, Racine, Wis.

Lawrence Jordan, who received a B.S. in art education from Penn State in March of this year and is currently working on an M.Ed. degree, will exhibit ceramic forms.

Fellowships given

Two research fellowships have been awarded for Winter and Spring Terms, 1974-75, by the Institute for the Arts and Humanities Studies.

Dr. Roy L. Austin, assistant professor of sociology will carry out research on the topic of Romanticism and Caribbean political integration, and Dr. Trond Gilberg, associate professor of political science, will study the use of literature and art as agents of political socialization in Romania.

The Age Khan prize for fiction

West gets Paris Review award

The "Paris Review" 1974 Aga Khan Prize for Fiction, named for the "Reviews" founder and publisher, has been awarded to Paul West, professor of English and comparative literature, for his short story, "Tan Salaam," published in the "Paris Reviews" 20th Anniversary Issue of Spring 1974.

The \$500.00 Prize is given annually for the best piece of short fiction, in English or in translation from another language, published by the "Review" in the preceding twelve months.

VSC volunteers number 2,300

A report of the Volunteer Service Center at the University reveals that more than 2,300 volunteers from all of the Colleges of the University served in individual and group projects during the past academic year.

The report, released by Dr. Melvyn S. Klein, director of Student Activities, indicates that 873 individuals participated in 55 group projects, while 1,433 persons undertook projects as individuals, 274 of them of a tutorial nature.

There were 515 former individual participants and 30 groups who returned as volunteers from previous years; new participants numbered 994 individuals and 31 groups.

All colleges of the University and the Graduate School were represented, with the most coming from the College of Education (366) and the Liberal Arts (361).

Judging was by the "Reviews's" board of editors, including George Plimpton, Peter Mathlessen, and William Styron. Among previous winners of the Aga Khan Prize are Philip Roth, Christina Stead, and Mordecai Richler.

West's story, one of three which he presented at the English Colloquium during the Spring Term, is about a self-styled Tanzanian guru, Tan Salaam, who lives in the Serengeti grasslands and is visited by an interviewer from the United States.

Services rendered include work in nursery schools (including Head Start), tutoring and teacher aides, community service, youth development, and services to the handicapped and retarded and to nursing homes and hospitals.

The projects, in addition to teaching, ranged from services to individuals and community projects to money-raising activities for such humanitarian enterprises as UNICEF and entertainment of children, underprivileged, and elderly persons.

Participating groups included fraternities and sororities, groups from residence halls, and various campus clubs.

A summary report of Volunteer Service Center's activities from its inception in October, 1968, to May, 1974, indicates that nearly 13,000 volunteers have served in individual and group projects in the past five and a half years.

Calendar — August 1-11, 1974

Special events

Thursday-Sunday, August 1-4 — Festival of American Theatre, "Kiss Me Kate," 8 p.m. Sunday, 7:30 p.m.; Saturday matinee, 2 p.m., Playhouse Theatre.

Friday, August 2 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Featuring John Davide, and films.

Friday-Sunday, August 2-4 — Festival of American Theatre, "Death of a Salesman," 8 p.m. Sunday, 7:30 p.m.; Saturday matinee, 2 p.m., Pavilion Theatre.

Friday-Saturday, August 2-3 — Pennsylvania Ballet in Concert, 8 p.m., University Auditorium.

Saturday, August 3 — At Ease with the Penn HUB ballroom, 4 p.m., University Auditorium. No admission charge.

Sunday, August 4 — Interludia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Sunday, August 4 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 p.m., Johnston (East Halls) Hall Free Talk Center. Open to everyone.

Monday, August 5 — Jazz by "The Dance Band," 7:30 p.m., Fisher Plaza between Kern and Chambers sponsored by Graduate Student Association. Music of the "swing era."

Monday, August 5 — Duplicate Bridge, 6:45 p.m., HUB ballroom.

Monday, August 5 — Penn State Overcomers, 7:30 p.m., Room 220 Bouckee.

Tuesday-Saturday, August 6-10 — Festival of American Theatre, "Death of a Salesman," 8 p.m.; Saturday matinee 2 p.m., Pavilion Theatre.

Tuesday-Saturday, August 6-10 — Festival of American Theatre, "Kiss Me Kate," 8 p.m.; Saturday matinee, 2 p.m., Playhouse Theatre.

Wednesday, August 7 — Shirt Sleeve Concert, Pennsylvania Orchestra, 8 p.m., Music Bldg., recital hall.

Wednesday, August 7 — Chess Club, 8 p.m., ground floor HUB.

Wednesday, August 7 — Meditations, sponsored by Office of Religious Affairs, 12:30 p.m., Eisenhower Chapel. Rev. Leon B. Hall, Black Christian Fellowship, on "Life."

Wednesday, August 7 — PSU Sports Car Club, 7:30 p.m., Room 251 Willard.

Thursday, August 8 — A Behind-the-Scenes Look at "Kiss Me Kate," 4 p.m., Playhouse Theatre.

Friday, August 9 — A Behind-the-Scenes Look at "Death of a Salesman," 4 p.m., Pavilion Theatre.

Friday-Saturday, August 9-10 — Pennsylvania Ballet in Concert, 8 p.m., University Auditorium.

Friday, August 9 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Square Dance, featuring a bluegrass band.

Saturday, August 10 — At Ease with the Pennsylvania Ballet, 4 p.m., University Auditorium.

Sunday, August 11 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 p.m., Johnston (East Halls) Hall Free Talk Center. Open to everyone.

Meeting

Thursday-Saturday, August 1-3 — The Third Biennial Conference on Chemical Education and the Second Centennial of Chemistry celebration.

Lectures

Friday, August 2 — Father Romano Almagno, bibliographer of Hebrew and Aramaic manuscripts at the Vatican

Library, on "The Vatican as a Working Library," 3 p.m., Rare Books Room, Pattee Library. Reception follows the lecture. The talk is sponsored by the University Library Faculty Colloquia Committee.

Tuesday, August 6 — Dr. Raimo Anttila, linguistics, University of Helsinki, on semantics, 8 p.m., Room 369 Hallink.

Wednesday, August 7 — Dr. Raimo Anttila on historical linguistics, 9:30 a.m., Room 17 Sparks. Talks sponsored by the Department of Slavic Languages, the linguistics program and the Liberal Arts Research Office.

Films

Thursday-Friday, August 1-2 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Something for Everyone."

Monday, August 5 — Commons Midway Cinema, 12:30 p.m., Room 112 Kern. "Future Shock" and "The Futurists."

Wednesday-Thursday, August 7-8 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "The Raven."

Exhibits

Museum of Art — Philadelphia Artists, Gallery C, through Sept. 1. Selections from the Permanent Collection, Gallery B. Milton Copley Drawings, Gallery A. Free Museum tours Thursdays, 1:30 p.m.

Zoller Gallery — MFA Show, Robert Diercks and Chris Manchester, through August 7. MFA Show, W. Joseph Helseth and Linda Herod, opening August 8.

Cultural Center, Walnut Bldg. — Murry DePillars, painting, Robert Jackson, photography, Lawrence Jordan, ceramics, Aug. 5-Sept. 14.

Commons Gallery — Rebecca Kamen, metal sculpture. Mary Hamilton, children's prints, opening August 11. Dan Reinhold, jewelry (cases).

Death

Dr. Fred F. Linsinger, who retired in 1952 as director of the Agricultural Experiment Station, died Monday, July 22, at the Lutheran Home, Gettysburg, at the age of 81.

Following his retirement, he had served three years as chief of the Agricultural Institutions and Services Branch, Food and Agriculture Organization of the United Nations, with headquarters in Rome, Italy. Earlier he had served with the FAO in China and in 1961, he was visiting professor to the University of Mandalay, Burma.

He began his career at Penn State in 1917 as agricultural extension representative in Mercer county, then turned to farming and later became director of the Morrison Cove Vocational School at Marlinsburg.

He returned to the University in 1926 as assistant professor of agriculture economics and in 1938 was named head of the Department of Agricultural Economics. He was named vice-dean of the School of Ag-

riculture in 1940 and headed the Agricultural Experiment Station from 1942 until his retirement with emeritus rank in 1952. On leave in 1933-34, he served with the Brookings Institution, Washington, D.C. Dr. Linsinger was a graduate of Penn State with a B.S. in animal husbandry and held the master of science and doctor of philosophy degrees from Cornell University.

Appointments

Ken A. Barber as assistant in animal science in the Division of Animal Science and Industry at the University, effective July 1. He is a graduate of Colorado State University, where he earned the bachelor of science degree in agricultural education. He received the master of science degree from Penn State in June and is a candidate for the doctor of philosophy degree. His research is in the area of reproductive physiology. He has been serving as a research aide since 1971.

Mayrann Mager, as lecturer in the department of microbiology at the University, effective Sept. 1. She holds the bachelor of science degree in biology from Gonzaga University and the master of public health degree from the University of California at Berkeley, where she is a candidate for the doctor of public health degree. She has also studied medical technology at the University of Oregon Medical School and has spent a year at Loyola University, Rome, Italy. Before undertaking graduate work, Miss Mager was a medical technician in Hertel Laboratory and Kaiser Hospital, both in San Francisco, Cal.

Dr. Karl G. Mikalakis, as assistant professor of physics, effective Sept. 1. For the past two years, he has served as lecturer and research associate at Case Western Reserve University. He earned bachelor's and master's degrees at the American University, Beirut, Lebanon; his Ph.D. was conferred by SUNY at Stony Brook.

Phyllis R. Kaplan, as assistant professor of music education. She has been a mem-

ber of the Kent State University School of Music for the past ten years and previously served as a member of the board of elementary music in the South Euclid-Lyndhurst City Schools, South Euclid, Ohio. She is currently a candidate for the Ph.D. degree in music education at the University of Michigan, where she earned bachelor and master of music degrees.

Dr. Niels Busch, head of the meteorology section of the Danish Atomic Energy Commission Research Establishment at Risø, has been named adjunct professor of meteorology. His appointment reflects a continuing collaboration between the Department of Meteorology at Penn State and the Danish group in the study of processes in the atmosphere's boundary layer. Dr. Busch also served as a visiting scientist and visiting professor at the University in 1965-67. He received the master of science degree in physics and the doctor of philosophy degree in micrometeorology from the Technical University of Denmark.

WPXS highlights

"The Silent Years," a collection of twelve full-length, uncensored silent film classics, premieres Friday, Aug. 2, at 10 p.m. on WPXS-TV, Channel 3, with "The Gold Rush." Charlie Chaplin's 1925 comedy classic. Hosted by Owen Welles, the series uses original musical tracks for each film along with the color tints that were used when the films were originally shown in theaters. Another series of silent films, "The Silent Comedy Film Festival," premieres on Sunday, Aug. 4, at 8 p.m. with a look at the short comedies of Buster Keaton.

A double-feature of dramas from the Hollywood Television Theatre are featured on "The PBS Special of the Week" Monday, Aug. 5, at 8 p.m. First is "The Gilded Age," a historical drama about the Gilded Age. Second is "The Police," a biting political satire about a country where the last revolutionary decides he loves the government, thus leaving no work for the police. Then, "Lemonade" presents Martha Scott and Elton Herlie as two lonely matrons who set up lemonade stands along a highway. The lemonade is laced with alcohol, and the ladies' exchanges become increasingly revealing as the afternoon progresses.

"Orpheus in Hell," Jacques Offenbach's delightful comic opera, is featured on "International Performance" Thursday, Aug. 8, at 9:00 p.m. The French television production (with English subtitles) features dancers from the Moulin Rouge in a re-creation of the cancan, which made its first appearance in this work.

Artists working with the electronic media are the focus of "Video Visionaries," a series of thirteen programs premiering Thursday, Aug. 8, at 10:30 p.m. on Channel 3.

HUB specials

Sunday, August 4 — Dinner, roast turkey/dressing, \$1.00; supper, beef, macaroni and tomato, \$1.02.
Monday, August 5 — Lunch, grilled cheese sandwich, \$.65; dinner, sweet and sour pork/ribs, \$1.00.
Tuesday, August 6 — Lunch, beef biscuit roll, \$.95; dinner, Spanish meatloaf, \$.90.
Wednesday, August 7 — Lunch, chili's salad, \$.93; dinner, lasagne, \$1.02.
Thursday, August 8 — Lunch, Coneciny Island, \$4.49; dinner, veal curry with rice, \$1.34.
Friday, August 9 — Lunch, fish sandwich, \$1.00; dinner, Italian shrimp and macaroni, \$1.18.
Saturday, August 10 — Lunch, hot and cold sandwich, \$1.07; dinner, stuffed cabbage, \$1.16.

With the help of some faculty

The Big Band makes local comeback

A number of faculty members and other area residents are doing something about preserving the "big band" spirit and to show their love for the "sound" and their hopes to preserve it, they will give a concert Monday, Aug. 5, at 7:30 p.m. in the new Herman G. Fisher Plaza between Kern and Chambers buildings.

The 19-piece group, known as "The Dance Band," has performed on a number of occasions in the Centre County area in recent months, playing dance music and the kind of jazz played in the big-band "swing" era. A cooperative amateur project, the band uses whatever proceeds it receives to buy music and equipment.

About half of the group are faculty and staff members. Dr. Eugene N. Borza, associate professor of history (and trumpet player) as musical director. The band

manager is an HRB-Singer electronics technician, Charles F. Ryan. For the concert August 5, the band will include saxophones of Joe Alessandro, Dick Greene, Bob Skipper, Jack Meyers, and Don Keat; trombones of Ken Siano, Les Shaw, Jack Miller, and Warren George; trumpets of Rich Victor, Lou Lanz, Charles Ryan, Dick Adams, and Borza; drums of Hubie Haugh; Hapler, bass of Ken Simpson; and the guitar of Carl Holman.

Music by the Dorsey's, Glenn Miller, Benny Goodman, Stan Kenton, Count Basie, Duke Ellington, and many others will be featured.

The Graduate Student Association, which has provided a series of jazz concerts during the summer, is sponsoring "The Dance Band."

Pennsylvania Ballet concerts begin

The Pennsylvania Ballet, now in residence at University Park for a three-week period, gives its opening concert performances this Friday and Saturday at 8 p.m. in University Auditorium. Tickets are still available for both performances. One of the featured dancers in the program will be Lawrence Fioresi, acknowledged as one of the world's greatest male dancers, who will perform with Albo Calzade in "After Eden," a ballet choreographed by John Butler.

Funding Opportunities

Instruction—Research—Continuing Education—Fellowships

For procedural and funding source information, call 865-1372.

August 1, 1974

(140-1) The National Library of Medicine (NLM) has three grants programs with an Oct. 1 deadline date (Feb. 1, 1975 is the next proposal deadline). **Library Resources Grants** will be made to expand and improve basic medical and health related library resources and health information services (Ref. CPOA 13.340). **Biomedical Scientific Publications Grants** are funded to furnish biomedical information of significance to the national health effort (Ref. CPOA 13.340). **Biomedical Communications Research Grants** will expedite the processing and dissemination of health information through research, development, and demonstrations in medical library science, techniques, systems, and equipment (Ref. CPOA 13.351). Application procedures are contained in the PHS-56 application program. Program contact is Dr. Roger Dahlin, Chief, Div. of Biomedical Information Support, Extramural Programs, NLM, 8600 Rockville Pike, Bethesda, Md. 20814. (301-496-4191) (Ref. PPH Oct. deadline).

(140-2) Agencies like industrial research laboratories under contract to the government or to commercial or academic organizations, and university research institutes or centers, may apply to the National Science Foundation (NSF) Faculty Research Participation Program. October 1, 1974 is the deadline for proposals; a list of approved agency programs will be released in January 1975, at which time faculty wishing to participate can apply. Objectives are the broadening of faculty instructional goals and improvement of science instruction. This notice is published to alert non-university agencies, university research centers and faculty. Proposals from agencies must be written according to guidelines 1-75-17. Faculty applicants in January 1975 will refer to guidelines 1-75-22. The deadline for these latter proposals is expected to be in February 1975. Washington contact for this program may be made at (202-292-7760). Ref. C&U Ref. 2477, 7/15/74.

(140-3) A personnel development program aimed at generalizing training programs for people who wish to play public educational roles in museums and historical societies has been built into the Museums and Historical Societies Program at the National Endowment for the Humanities (NEH). Graduate fellowship programs; internship programs; and seminars, workshops, and other in-service training will be funded. Interpretive exhibitions and community education projects of museums and historical societies will also be funded. The next deadline date for proposals is Oct. 1, 1974. Program information is available from Paula Deppa, Division of Grants, NEH, 805 Fifteenth St., N.W., Washington, D.C. 20506 (202-382-5714). (Ref. NEH Prog. +OFF Oct. deadline).

(140-4) The Rockefeller Foundation (Fellowship Program in Environmental Affairs, 111 W. 50th St., New York 10020) invites applications from scholars desiring support for research or public service in environmental affairs. Preference will be given to post-doctoral scholars working in interdisciplinary areas on innovative projects. An application consists of a concise proposal, a letter of endorsement, two letters of recommendation, a vita (including transcripts for recent graduates) and an itemized budget. Persons planning to affiliate

THE UNIVERSITY IS AN EQUAL OPPORTUNITY EMPLOYER.

with Penn State should process their application through the Coordinator of Contracts, 5 Old Main, University Park, Pa. 16802. For the Fellowship Office, 317 Kern Graduate Building, Penn State, University Park, Pa. 16802. The next application deadline is Sept. 1, 1974. Further information write to the address given above. (Ref. P274-14)

(140-5) Forms and guidelines for operational grants under the Youth Challenge program are now available. The program is designed to serve poverty communities who want out of community service-learning centers supported by this program. Contact ACTION, Region 1, 1000 N. 10th St., Lincoln, Neb. 68502. (402) 441-1000. Regional Office (254-597-0732) (Ref. 38P202-6/27/74).

REMINDEES AND DEADLINE DATES
May 23 INTERCOM (1130-1) . . . Aug. 19 for International Super Research Foundation proposals. July 15 INTERCOM (1138-1) . . . Aug. 15 for NSF-U.S. Science Cooperative Scheme (June 20 INTERCOM (1132-2)) . . . Sept. 1, 1974 for 1 for HRA audiovisual educational health education studies. July 25 INTERCOM (1132-1) . . . Oct. 1 for U.S. Dept. Transportation University Research proposals. July 19 INTERCOM (1133-3) . . . Oct. 1 (ignoring Oct. 15 for OE foreign language and studies. July 25 INTERCOM (1138-1)).

Braithwaite is named coordinator

Developmental Year program initiated

Lancelot Braithwaite, assistant professor of English, has been named coordinator of the University's Developmental Year program.

The new academic program, to be offered for the first time in the Fall Term at University Park, is designed to accommodate and develop the varied talents of educationally disadvantaged students.

It is being administered as a resident education program under the office of Dr. Robert E. Dunham, vice president for undergraduate studies.

Students in the Developmental Year program will be offered individualized curricular opportunities designed to alleviate previous scholastic deficiencies in the basic skills and to cultivate their knowledge of course materials in areas of potential difficulty.

"We're going to attempt to strengthen their basic skills," Dr. Dunham said, "as

well as provide personal counseling and support services necessary to their adjustment to the University."

Approximately 150 Educational Opportunity Program students and 50 disadvantaged student veterans can be accepted into the program in the first year.

Lancelot Braithwaite

Professor Braithwaite, who will continue his teaching duties along with his new responsibilities, joined the Penn State faculty in the Winter Term 1973.

A member of the University's Black Studies Academic Committee, he taught in the 1973 Summer Program for Educational Opportunity Program students and coordinated the English portion of the program.

A graduate of the New York University School of Commerce with a bachelor of science degree in communications arts, he was a television engineer with WOR-TV, New York City, from 1965 to 1969 and served one year as a contributing editor.

Prior to joining the University faculty, Professor Braithwaite was manager of audio visuals for the Educational Development Corp., Menlo Park, Calif. He also directed educational programs on a consultant basis for Economies and Associates, San Francisco, Calif.

Joseph O'Connell, with one of his paintings in a current exhibit in Chambers Bldg., along with craft products of the Renaissance Gallery, State College, continuing until Aug. 20.

Calendar August 8-18, 1974

Special Events

Thursday, August 8 — A Behind-the-Scene Look at "Kiss Me Kate," 4 p.m., Playhouse Theatre.

Thursday-Saturday, August 8-10 — Festival of American Theatre, "Death of a Salesman," 8 p.m.; Saturday matinee 2 p.m., Pavilion Theatre.

Thursday-Saturday, August 8-10 — Festival of American Theatre, "Kiss Me Kate," 8 p.m.; Saturday matinee, 2 p.m., Playhouse Theatre.

Friday, August 9 — A Behind-the-Scene Look at "Death of a Salesman," 4 p.m., Pavilion Theatre.

Friday-Saturday, August 9-10 — Pennsylvania Ballet in Concert, 8 p.m., University Auditorium.

Friday, August 9 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Square Dance, featuring a bluegrass band.

Saturday, August 10 — At ease with the Pennsylvania Ballet, 4 p.m., University Auditorium.

Sunday, August 11 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 p.m., Johnston (East Hall) Hall Free Talk Center. Open to everyone.

Monday, August 12 — Duplicate Bridge, 6:45 p.m., HUB ballroom.

Monday, August 12 — Penn State Overcomers, 7:30 p.m., Room 220 Boucke.

Wednesday, August 14 — Shirt Sleeve Concert, Pennsylvania Orchestra, 8 p.m., Music Bldg. recital hall.

Wednesday, August 14 — Chess Club, 8 p.m., ground floor HUB.

Thursday, Aug. 15 — Free introductory lecture presented by SIMS on transcendental meditation, 8 p.m., Room 101 Chambers.

Friday-Saturday, August 16-17 — Pennsylvania Ballet in Concert, 8 p.m., University Auditorium.

Friday, August 16 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Featuring Earl Reinharter.

Saturday, August 17 — At ease with the Pennsylvania Ballet, 4 p.m., University Auditorium.

Sunday, August 18 — Peggy Horner, soprano vocal recital, 3:30 p.m., Music Bldg. recital hall.

Sunday, August 18 — "Topics of the Times," weekly discussion sponsored by Campus Ministries at the University, 9 p.m., Johnston (East Hall) Hall Free Talk Center. Open to everyone.

Films

Thursday, August 8 — Commonsplace Theatre, 8 p.m., Room 112 Kern. "The Raven."

Monday, August 12 — Commons Midway Cinema, 12:30 p.m., Room 112 Kern. "Nightmare in Red."

Wednesday, August 14 — Commonsplace Theatre, 8 and 10 p.m., Room 112 Kern. "Rebel Without a Cause."

(Continued on page two)

News in Brief

ACCREDITATION

The Hershey Medical Center hospital has been accredited for a two-year period by the Joint Commission on Accreditation of Hospitals. Joint Commission accreditation surveys are voluntary, but approval represents a distinction higher than governmental licensure alone.

ARNELLE NOMINATED

Board of Trustees member H. Jesse Arnette, who starred on Penn State basket-

ball teams for four years in the 'fifties, has been nominated for induction in the Nal-smith Memorial Basketball Hall of Fame. The induction is based on election by sports writers and others; the results of the next voting will be announced in February, 1975. Arnette, a criminal defense attorney in San Francisco, holds 26 Penn State individual basketball records. He was also president of student government in his senior year.

COMPARATIVE LITERATURE

The Office of the Comparative Literature Program has moved from Room 346 North

Burrowes to Room 208 Burrowes; the telephone number remains 863-0589. Dr. Robert F. Lima, Jr., is in charge of the program.

KERN EXHIBIT

Hand-wrought sterling and gold jewelry by Dan Reinhold, silversmith of Mill Hall, is on display in the Kern Graduate Bldg. and will remain during the entire month of August. Reinhold was among those who developed the Millbrook Art Gallery, now one of the recognized arts centers in the U.S., as a regional center at which artists and craftsmen display their work.

SENATE REPORT is a communication to the entire University faculty from the University Faculty Senate and is provided by the Senate office to which comments or questions should be addressed: Room 205 Willard.

involves others in the University system who hold faculty research rank but have no departmental affiliation with regard to rank and tenure.

While studying these issues, Engel said the subcommittee has not yet developed specific positions that it will take on the matters.

The subcommittee, which also is reviewing all regulations in the University Policy Manual pertaining to promotion and tenure, expects to have a draft report ready for wide circulation and review early in the fall.

Subcommittee members, besides Engel, are George E. Andrews, Ronald L. Filippelli, Charles W. Hill, Stanley O. Ikenberry, Eugene Kelley, Robert Mazur, G. Edward Phillips, Marvin E. Rozen, Henry J. Tamowski, and Richard Tomsic. Marjorie East and Ernest L. Bergman are ex-officio members.

(Note: Communications to the subcommittee should be addressed to Dr. Phillips, professor of accounting, who is chairman of the Senate Faculty Affairs Committee.)

At the July 23 Senate Council meeting, the following were selected to serve on the Faculty Advisory Committee for Research for 1974-75:

Area 2 — Humanities, Philip Young; Area 3 — Social Sciences, Carolyn W. Sherif; Area 4 — Science, Steve Armentrout; Area 5 — Professional Schools, Stuart Patton; Area 6 — Commonwealth Campuses, Robert W. Douglas; Area 7 — Hershey Medical Center, Irwin L. Baird; Area 8 — Capitol Campus, Kenneth W. Masters.

The Area 9 representative will be selected by the Academic Affairs Committee of the Senate at its next meeting.

Dr. Warren F. Wiltzig, head of the Department of Nuclear Engineering, has been named to replace Dr. Edwin Masteller on the Administrative Committee of the Office of Environmental Quality Programs.

SENATE REPORT

A subcommittee of the Faculty Affairs Committee of the University Faculty Senate currently is making a detailed study of the University's tenure and promotion policies.

The subcommittee, which has been holding three-hour meetings twice a week during the Summer Term, is examining in great detail all University regulations concerning tenure, promotion and rank.

According to subcommittee chairman Dr. Alfred J. Engel, professor of chemical engineering, some of the major issues addressed thus far by the group included:

1. The meaning of tenure at The Pennsylvania State University. Is it tied to a specific program and/or location or is it to be considered University-wide? In its study, the subcommittee has found that the legal and actual implementation of the meaning of tenure is not clear, in that there is little precedent, and the issue currently is under examination in the courts in other states.

To the best of our knowledge, Engel said, the precise meaning of tenure has never been defined here.

2. The problem of getting too high a ratio of tenured to untenured faculty if the University reaches a period of no growth. In examination of this problem, the subcommittee has concentrated on gathering data and attempting to make some projection on what can be done about the situation which has been characterized as "tenuring-in."

3. The possibility of coupling tenure to promotion to the rank of associate professor.

4. An examination of the entire review procedure for promotion and tenure.

On this issue, the subcommittee has developed a tentative scheme for peer review at all levels of review.

5. Examination of the status of research faculty not officially affiliated with any department.

This study has focused primarily on Applied Research Laboratory and Materials Research Lab personnel, but also in-

Death

Joe Samuel Taylor, professor and head of dairy science extension, died July 19; he was 59. He joined the faculty in 1945 as associate professor after serving as extension dairy specialist at Cornell University and county agent in Cortland County, N.Y., from 1942 to 1945. He was a field representative for the American Jersey Cattle Club, New York, from 1938 to 1942. A 1937 graduate of Texas A. & M., he received the M.S. degree in dairy husbandry at Cornell two years later. He was born in Berwyn, Oklahoma. He was the author of a correspondence course in civil defense used widely throughout the U.S.

Honors

Dr. Joseph D. Harrington, professor of agronomy, has received a certificate for exceptional contributions to education of the Northeastern Branch of the American Society of Agronomy, the outstanding award for teaching given by the branch. Previously, he had been recognized on the campus for excellence in teaching, with the Christian A. and Mary F. Lindback Award and by the students who have on several occasions nominated him as one of the outstanding teachers in the College of Agriculture.

Dr. John D. Sink, professor of meat science, has been elected president of the American Meat Science Association, the first member of the Penn State faculty to be so honored. The organization promotes research and provides a forum for debate on research topics related to all aspects of meat.

Appointments

Carol A. Riddick, as instructor in extension health education in the Department of Agricultural Economics and Rural Sociology, with primary responsibility for advising and conducting programs and appropriate educational materials to assist members of local health councils and boards to understand issues, problems, techniques, and alternatives in planning for and organizing local health services. Currently working on her doctorate in therapeutic recreation at Penn State, she received a B.A. in sociology and an M.S. in urban regional planning from Florida State University at Tallahassee. She was a research assistant in the Institute for Research on Land and Water Resources at Penn State.

Gundula U. LaBadie, as research assistant in microbiology. She is a graduate of Drexel University, and is completing requirements for an M.S. in microbiology at Penn State. She was previously a research technician at the Institute for Cancer Research, Philadelphia.

John M. Stevens, as assistant professor of economics, effective with the start of the Fall Term. He is completing Ph.D. require-

ments in economics at Penn State; He received both B.A. and M.A. degrees here also.

Dr. Roger P. Ware, as associate professor of mathematics. A graduate of the University of California at Berkeley, he received advanced degrees at Santa Barbara. He has served on faculties of Northwestern University and the University of Kansas, where he has been serving for the past two years.

Dr. Edward L. Robertson, as assistant professor of computer science, effective Sept. 1. He comes from a position as assistant professor of applied analysis and computer sciences at the University of Waterloo, in Ontario, Canada. He has also served on faculties of the University of Wisconsin and the University of Ghana. He was graduated from California Institute of Technology and has advanced degrees from Wisconsin.

Dr. David L. Pearson, as assistant professor of biology, effective Dec. 1. He had done research in tropical ecology in the South and Central Pacific, South America, Africa, Indonesia, and in Guatemala. For the past years he has been acting as assistant professor of the University of Washington, which has granted him the Ph.D.; his other degrees were given by the Pacific Lutheran University and Louisiana State University, all in zoology.

James C. McDavid, as assistant professor in the Institute of Public Administration, effective August 1. Currently completing Ph.D. degree requirements in political science at Indiana University, where he has served as research assistant, he received his other degrees from the University of Alberta, Canada, both in political science.

Dr. Robert L. Cohn, as assistant professor of religious studies, effective Sept. 1. He received a B.A. degree in the history of religion from Northwestern University in 1969, an A.M. in religious studies from Stanford University in 1971; and a Ph.D. in religious studies and humanities from Stanford this year.

Gerard J. Gross, as instructor of English to teach technical writing, beginning with the Fall Term. He is a graduate of Spring Hill College, Mobile, Ala., with a B.S. in physics, and received an M.S. in physics from Case Institute of Technology. He was a physicist with the Aerospace Corp. from 1965 to 1971, when he returned to Case to obtain an M.A. degree in English. He is currently writing a dissertation on the endings of Shakespeare's comedies.

Dr. Peter J. Downey, as assistant professor of computer science, effective Sept. 1. He received a Ph.D. degree at Harvard University, where he has been a teaching assistant. He earned a bachelor's degree and a master's degree in computer science at the University of Virginia. He has served as a mathematician in the Air Force Electronics Systems Di-

vision and with the Army Engineer Mathematics Computation Laboratory. He has also taught at the University of Virginia and at Northeastern University.

Dr. David A. Sibley, as assistant professor of mathematics. He is a graduate of the University of Massachusetts and received the Ph.D. degree from California Institute of Technology, where he was an N.S.F. trainee.

John E. Skeen, as instructor of wildlife technology at the DuBois Campus. Now completing his doctorate at Virginia Polytechnic Institute and State University, he was graduated from West Virginia University with a bachelor's degree in forestry and received an M.S. in wildlife management from V.P.I., where he was an NDEA fellow and a research assistant. He has served as a forestry aide with the U.S. Forest Service in Washington and Idaho and as a wildlife aide at the Northeastern Forest Experiment Station, in Morgantown, W. Va.

Dr. Kyra M. Riegle, as assistant professor of nursing assigned to the Hershey Medical Center. She is a graduate of Deaconess Hospital School of Nursing, Buffalo; received a B.S. in nursing at SUNY at Buffalo; and was granted a Ph.D. in physiology by the University of Kansas. She was a staff nurse and head nurse at Deaconess Hospital and served as instructor prior to matriculating at SUNY, Buffalo.

Dr. John H. E. Clark, as associate professor of meteorology. He is a former associate program director of meteorology with the National Science Foundation. His bachelor's and master's degrees were conferred by McGill University and the Ph.D. by Florida State. His research has centered on large scale dynamics of the atmosphere. In 1969-70, he was post-doctoral fellow at the National Center for Atmospheric Research and during 1970-73 he was on the University of Texas civil engineering faculty.

Dr. Beverly J. Lindsay, as assistant professor of education, Division of Education Policy Studies. She is a specialist in social and cultural foundations, and she has taught at Federal City College, Washington, D.C. and at the American Forum, Cleveland. She was a graduate associate at the University of Massachusetts, 1972-74. A graduate of St. Mary's University, San Antonio, Tex., she earned the M.A. and D.Ed. degrees at Massachusetts.

Edward C. Horvath, as assistant professor of computer science. He has been, for the past year, director of education at APL Services, Inc., Trenton, N.J. An M.I.T. graduate, he received an M.A. degree from Princeton University, where he is currently completing his Ph.D. dissertation. He has been with I.B.M. and R.C.A. and has served as a visiting lecturer at Stevens Institute of Technology.

In Writing

Dr. G. Frank O. Tyres, associate professor of surgery at the Hershey Medical Center, is author of "Self-Assessment of Current Knowledge in Cardiothoracic Surgery," published by Medical Examination Publishing Co., Inc., Flushing, N.Y. The book tests a physician's knowledge of history, pathology and applied knowledge of congenital and acquired cardiovascular disease, and congenital and acquired noncardiovascular thoracic disease.

Museum of Art — Philadelphia Art Museum. Gallery C. Selections from the Permanent Collection, Gallery B. Free. **Osborne Drawings, Gallery A.** Free. **Museum Hours** Thursdays, 1:30 p.m. to 5:00 p.m. **Zoller Gallery — MFA Show.** W. Joseph Helseth and Linda Herod. **Walnut Building — Murry DePillars, painting.** Robert Jackson, photography. Lawrence Jordan, ceramics. **Contemporary Galleries.** Rebecca Kamen, sculpture. Mary Hamilton, glass. Reinhold's prints, opening August 12. Reinhold, jewelry (cases). **Chambers Gallery — Iconography** paintings by Joseph Osmond; ceramics, jewelry, stained glass and weavings of the Renaissance Gallery, State College, until Aug. 20.

WPXS highlights

Rudolph Valentino's last film, "The Son of the Sheik," is featured on "The Silent Years" Friday, August 9, at 10:00 p.m. Made in 1926, this film was the last Valentino made before his untimely death. It is one of his best performances. The broadcast includes the color tints used when the film first played in theaters. **Willie Nelson and America's** back-country authors, are honored by three of her closest friends — Yahudi Menehlin and her sisters, Yallah and Hepzibah — on "A Menehlin Tribute to Willie Nelson," Monday, August 12, at 8:00 a.m. Saturday, August 17, at 9:30 p.m. The weekly Saturday program combines private reminiscences with a memorial concert for Willie Carter. Healy music that played a part in her career.

HUB specials

Sunday, Aug. 11 — Dinner, beef stroganoff with noodles, \$1.55; soup, beef salad, \$1.12. **Monday, August 12 — Lunch, Jo Mazzoli, \$1.15; dinner, beef steak, \$1.25.** **Tuesday, August 13 — Lunch, grilled cheese sandwich, \$1.11; dinner, franks and hot potato salad, \$1.23.** **Wednesday, August 14 — Lunch, ham turnover, \$1.05; dinner, chicken Brunswick steak, \$1.35.** **Thursday, August 15 — Lunch, American omelette, \$1.17; dinner, lasagne, \$1.22.** **Friday, August 16 — Lunch, egg cutlet with almond sauce, \$1.24; dinner, shrimp cocktail, \$1.35.** **Saturday, August 17 — Lunch, beef barbeque on bun, \$1.94; dinner, Spanish meal, \$2.95.**

(141-S) National Research Council of the National Academy of Sciences, 2101 Constitution Ave. N.W., Washington, D.C. 20540 (invites applications for postdoctoral research associateships at the National Ecological Research Lab., Corvallis, Oregon. Awards for persons with less than five years experience are for \$14,000/year. The application deadline is July 15, 1974. For details, conditions and further information, write to the address just above (Ref. F074-16).

(141-S) National Endowment for the Humanities, 400 Fellowship Drive, 15th St. N.E., Washington, D.C. 20508 has announced the competition for 1965 post-doctoral Summer Stipends to college teachers in humanities, arts and humanistic studies of the social sciences. Preference is given to applicants engaged in studies related to the Revolutionary era. \$2000 of support is provided for each stipend recipient. Other stipend applicants must be nominated by the University. Applications must be received at 317 Kern Graduate Office by Sept. 30, 1974. Penn State can nominate only three individuals, one in each stage of his career; one a more advanced scholar. Applications will be judged on overall promise, scholarship, significance and practicability. Proposed study, the conception, definition, preparation and presentation of the proposal, and participation in the bicentennial of the Revolution. For information and application instructions, write to: 317 Kern Graduate Office, University of Pennsylvania, Philadelphia, Pa. 19107.

REMINERS AND DEADLINE DATES Sept. 1 and Oct. 1 for HRA audited educational health sciences (July 25 INTERCOM #139-2) Oct. 1 for U.S. Dept. Transportation (H38-2) Oct. 1 for U.S. Dept. of Health, Education and Welfare (H38-2) Oct. 1 (groups) and Oct. 15 for OE foreign language and area studies (July 25 INTERCOM #139-2) Oct. 1 for National Library of Medicine (H38-2) Oct. 1 for National Library of Medicine (H38-2) Oct. 1 for NEH Participatory Program (H38-2) Oct. 1 for NEH Participatory Program (H38-2) Oct. 1 for NEH Participatory Program (H38-2)

Staff vacancies

University faculty or staff members who are interested in listed staff or staff non-exempt jobs may be applied by calling Employment Office 865-1387 (Network Line 476-1387). Do not contact the area having the vacancy. Applications will be accepted until: 5:00 p.m., Aug. 22, 1974.

RESEARCH AIDE (ANIMAL INDUSTRIES), COLLEGE OF AGRICULTURE — University Park

Conduct invitro rumen fermentations; prepare microscopic slides of biological materials; identify animal tissues; prepare histological sections; collect fecal, acetate, and biological fluids for analysis by atomic absorption spectrophotometer; analyze samples on amino acid analyzer; use electrophoresis for protein analysis; collect and analyze blood, urine, fecal, and physiological fluid samples; prepare samples for analyses. Assist in collection of data on experimental animals, as required. Requires college level courses in animal, organic, and inorganic chemistry, and biological sciences and mathematics. Two to four years of laboratory experience with demonstrated ability to conduct independent research required.

ASSISTANT HERDSMAN, COLLEGE OF AGRICULTURE — University Park

Oversee the leading, watering and general care and maintenance of animals and livestock area by supervising the mixing of feed, leading, of pen area and cleaning. Determine medication in feeding rates and management practices in accordance with individual animal performance. Responsible for maintenance of health records; attend animals at parturition and newborn animals, treat or refer sick animals to veterinarian, and administer proper preventive health programs. Prepare and exhibit animals for shows and sales. An associate degree or equivalent in animal science plus two to four years of related experience.

August 8, 1974

(141-1) The Food and Drug Administration will consider research proposals written by researchers specializing in one or more of the following areas: (1) carcinogenicity; (2) biological contaminants; chemical contamination, processing methods, epidemiology of food poisoning and advanced techniques; shellfish sanitation — evaluation of chemical and microbiological processes contributing to shellfish contamination; poison control — scientific information to prevent, diagnose and control poisoning; (3) food safety and inspection of product safety including the microbial control of raw materials and preservation systems; veterinary drugs — animal toxicology, physiology, endocrinology, pharmacology, immunology, safety of use of chemicals; medical devices — study of safety and reliability, bio compatibility research, clinical evaluation of devices; toxicological studies — including carcinogenicity, mutagenicity, teratogenicity, extrapolation to man; pathology; radiological health — electromagnetic radiations, magnetic fields, sound (incl. infra and ultra), health risks; biological standards; instrumentation; and biologics — vaccines, blood and products, toxins, toxins, antitoxins, antivenoms, antigens, allergens, in vitro diagnostics, and immunological assays for applications (Ref. 1, 1974, Feb. 1 and June 1, 1975 next). Outdated information and guidelines are available from: Dr. Robert Littford, Director, Office for a Safe Food and Drug Administration, Food and Drug Administration, Room 7-67, 5600 Fishers Lane, Parklawn Bldg., Rockville, Md. 20852 (301-434-4603) (Ref. Food & Drug Rational Criteria). FWP deadline.

(141-2) The National Endowment for the Arts (NEA) has issued grants guidelines for: **Dance** (Ref. NEA Guide 1-WFP deadline) **Teaching Program** with an Aug. 1974 deadline

date — contact **Don Anderson**, Director, Dance Program, NEA, Washington, D.C. 20506 (202-382-5833); **Expansion Arts Program** with an Oct. 1, 1974 deadline (1974-75); **Visual Arts Program** with an Oct. 1, 1974 and (1975) deadline date for Neighborhood Arts Services, Instruction and Training and Special Summer Program — contact **Vanille White** for Director, Expansion Arts Program, NEA, Washington, D.C. 20506 (202-382-6071) and **Jazz/Folk/Ethnic Music Program** with a Sept. 15, 1974 deadline date — contact **Wendy White** for Director, Expansion Arts Program, NEA, Washington, D.C. 20506 (202-382-5755) (Ref. 39FR26391, 7/18/74).

(141-3) National Endowment for the Arts (NEA) announces current guidelines for Assistance to Small Presses under the NEA Literature Program: Applications for matching funds ranging from \$500 to \$10,000 may be made to support projects for publication and distribution of checkbooks. Matching fellowships will also be made to individual small press publishers emphasizing poetry or short fiction. Applications will be accepted now and must be postmarked no later than Nov. 1, 1974. Contact **Leonard Randall**, Director, Literature Program, NEA, Washington, D.C. 20506 (202-382-6186) for information and application forms. (Ref. 39FR27191, 7/25/74).

(141-4) Innovative approaches to the presentation of the arts through NEA's Programming in the Arts. As part of the NEA Public Media Program, matching grants support production, research, and development to improve arts programming by professional individuals and organizations. Grants rarely exceed \$10,000 but can range up to \$50,000. The annual application deadline is Oct. 1, 1974. Contact **Chloe Aaron**, Director, Public Media Program, National Endowment for the Arts,

An internal communications medium for the academic community of The Pennsylvania State University published weekly during the four terms of the class schedule

Additional data to be given in September

Preliminary information given on TIAA-CREF

On May 31, 1974, the University's Board of Trustees approved a recommendation that the University offer membership in an alternate retirement program to all faculty and staff members participating in the State Employees' Retirement System (SERS). The alternate retirement program will be made available beginning September 1, 1974, and will be provided by the Teachers Insurance and Annuity Association (TIAA) and its companion company, the College Retirement Equity Fund (CREF).

An official announcement will be mailed to each eligible faculty and staff member shortly after the beginning of the Fall Term. That announcement will also contain information describing the basic provisions of both the State plan and TIAA. Hopefully, that material will contain sufficient pertinent information to enable faculty and staff members to decide whether to remain in SERS or switch to TIAA.

A nine-month option period will be available to present SERS members, whereas faculty and staff employed with an effective date on or after September 1, 1974, will have 30 days from date of appointment to make their choice.

Although TIAA is the largest company in the United States in terms of retirement and insurance programs at educational institutions, many University employees may not have had any association with the company and thus would be unfamiliar with the provisions of TIAA-CREF's retirement program. Information contained in this article is provided to give faculty and staff members some preliminary information about the new option. You are urged to retain this issue of INTERCOM to serve as a supplement to the September announcement.

YOUR ANNUITY COMPANIES — TIAA AND CREF

TIAA is a nonprofit, legal reserve life insurance and annuity company incorporated in the State of New York. Founded in 1918 by the Carnegie Foundation for the Advancement of Teaching, TIAA provides annuities and life insurance at low cost for the college world.

Today there are more than 400,000 participants, most of them employed by the 2,700 educational institutions that have TIAA retirement or insurance plans.

CREF is a separate nonprofit corporation, companion to TIAA, established in 1952 by a Special Act of the New York State Legislature to provide retirement benefits based on common stock investments.

TIAA and CREF employ no agents and pay no commissions. A modest charge is made to participants to cover operating expenses. Eligibility is limited to employees of colleges, universities, private schools, and certain other nonprofit research or educational organizations.

HOW DO TIAA AND CREF WORK TOGETHER?

Premiums to your TIAA annuity purchase a definite amount of future retirement income for you. To make sure you will receive this guaranteed income, TIAA invests your premiums almost exclusively in fixed-dollar obligations — a broadly diversified group of bonds and mortgages.

Your TIAA annuity money accumulates at compound interest during your working

years. When you retire, TIAA sends you a check each month as long as you live. The amount remains the same from year to year except for dividends as declared.

Your premiums to CREF purchase a variable, or unit, annuity. In combination, TIAA and CREF annuities are designed to provide annuitants an opportunity for reasonably stable purchasing power during retirement.

During your working years, premiums to CREF buy accumulation units (like shares of ownership) in a broadly diversified common stock fund. The earnings on your portion of the common stock fund are reinvested for you, buying additional units for your account.

During your retirement, CREF pays you, each month for life, the current value of a certain number of annuity units — your retirement shares in the Fund. The number of annuity units to be "paid out" to you each month is determined actuarially when you retire and remains the same as long as you live. The dollar amount you receive changes, however, from year to year,

reflecting primarily changes in the market prices and dividends of the common stocks owned by the Fund. Thus CREF links retirement income to the investment experience of common stocks so that you can receive an income based on common stock value and dividend earnings.

ALLOCATION OF PREMIUMS

Participants may allocate their monthly payments (including the institution's contributions) between TIAA and CREF in any of the following proportions:

100% allocation to either company,
75%-25% to either company, or a
50%-50% split.

WHAT IF I LEAVE MY PRESENT EMPLOYER?

You take your TIAA and CREF annuities with you, including all benefits purchased by your own and your employer's contributions.

Ownership of TIAA and CREF retirement and survivor benefits is fully vested in you. This full vesting allows University

(Continued on page two)

Senate also discusses insurance, parking

Plan study on tax-deferred annuity program

The University Faculty Senate has acted to establish a joint faculty-administration committee to study tax deferred annuity programs for University faculty and staff.

The action was recommended at Tuesday's Senate meeting by the Subcommittee on Fringe Benefits, which also presented its report on comparison of retirement systems.

Noting that faculty will be able to leave the State Employees Retirement System (SERS) and join the Teachers Insurance and Annuity Association (TIAA-CREF) after Sept. 1, Dr. Donald C. Rung, subcommittee chairman, said most faculty members probably would get higher benefits under SERS.

The motion passed by the Senate specifically charged the joint committee with developing "policy," but Dr. John W. Oswald, University president, while supporting the work of a joint committee on the

matter, pointed out that actual development of policy is in the hands of the Board of Trustees.

While moving to establish the joint committee, the Senate adopted an amendment calling on the administration to place the group life insurance and accidental death and dismemberment or loss of sight insurance plans on a periodic bid basis at the earliest opportunity.

A second proposed amendment was accepted as a separate motion and will be discussed at the next Senate meeting Oct. 1. It recommends that the Fringe Benefits Subcommittee and the External Affairs Committee attempt to have legislation introduced in the General Assembly to lower the retirement age to 55 and provide an automatic yearly cost-of-living adjustment in retirement benefits.

Concerning common parking problems,

Calendar August 15-25

Special Events

Thursday, August 15 — Free Introductory Lecture presented by SIMS on transcendental meditation, 8 p.m., Room 101 Chambers.

Friday-Saturday, August 16-17 — Pennsylvania Ballet in Concert, 8 p.m., University Auditorium.

Friday, August 16 — Commonsplace Coffeehouse, 8 p.m., Room 102 Kern. Featuring Earl Reinhalter.

Friday, August 16 — Duplicate Bridge, 6:45 p.m., HUB ballroom.

Saturday, August 17 — At ease with the Pennsylvania Ballet, 4 p.m., University Auditorium.

Sunday, August 18 — Peggy Horner, vocal recital, 3:30 p.m., Music Bldg. recital hall.

Sunday, August 18 — Interlandia Folk Dance, 7:30 p.m., HUB ballroom and terrace.

Sunday, August 18 — "Topics of the Times," weekly discussions sponsored by Campus Ministries at the University, 9 p.m., Johnston (East Halls) Hall Free Talk Center. Open to everyone.

Monday, August 19 — Duplicate Bridge, 6:45 p.m., HUB ballroom.

(Continued on page two)

Physics graduate education meeting next week

Nearly 100 representatives of government, industry, and academia will meet next week at University Park to consider whether traditional graduate education is still the best way to train physicists for today's changing job market. The meeting begins Monday.

Serious changes in the employment patterns of physics graduates with advanced degrees and substantial changes in the funding of physics research have produced doubts in the minds of some physicists, employers, and educators.

Titled "Tradition and Change in Physics Graduate Education," the conference is designed to re-examine the graduate education process, to determine whether changes can and should be made, and to generate concrete suggestions for graduate educational institutions, according to conference co-chairman Dr. Roland G. Good, head of the physics department.

Speakers at the conference will include John L. McLucas, Secretary of the U.S. Air Force; Terry Lee Loucks, Director of the North American Rockwell International Science Center; Sidney Millman, a member of the governing board of the American Physical Society (APS); Mildred Wigdoff, chairperson of the APS Committee on Women in Physics; and Paul P. Craig, Deputy Director, Office of Energy R&D Policy, National Science Foundation.

More than 25 universities and colleges will participate including Penn State, Temple, Pitt, Brown, M.I.T., Purdue, Stanford, the University of California, and the Memorial University of Newfoundland.

A session on physics and politics scheduled for Tues., Aug. 20, will feature discussions of attitudes toward science in congress by Benjamin S. Cooper, an APS Congressional Science Fellow assigned to

the U.S. Senate's Committee on Interior and Insular Affairs. Scientific norms and political values will be discussed by Joseph Haberer of Purdue University.

Other scheduled session topics include economic prospects for the graduate and the profession, employer's expectations of today's graduate, and public interest physics.

Martin L. Perl of the Stanford Linear Accelerator Center is serving as co-chairman with Dr. Good.

The conference is sponsored by the Forum on Physics and Society of the American Physical Society, the American Association of Physics Teachers, and the Committee on Education of the American Physical Society.

NOTE: The conference program and abstracts of Conference papers were published in the July issue of the Bulletin of the American Physical Society.

Colloquy series to have Shapp

Colloquy, the student-originated program of lectures and general interest activities, has scheduled five speakers for the Fall Term, including Gov. Milton J. Shapp, who will speak Monday, Sept. 9, at 8 p.m. in the University Auditorium.

The governor will discuss "Issues Affecting Colleges and Universities in Pennsylvania."

Other speakers in the series will discuss topics ranging from vampires to sports. They are:

George Plimpton, author and editor, Friday, Oct. 11, at 9:30 p.m., University Auditorium, on "An Amateur Among Pros."

Dr. Raymond McNally, expert on vampires and Dracula, Sunday, Oct. 20, at 8 p.m. in Schwab Auditorium, on "In Search of Dracula."

Alan Oken, astrologist, Monday, Oct. 21, at 8 p.m. in the HUB ballroom, on "The Occult Sciences: Numerology, Astrology and Tarot."

Dr. Raymond Buckland, Tuesday, Oct. 22, at 8 p.m. in Schwab Auditorium, on "Witchcraft." He is a witchcraft expert and high priest.

These lectures are all free and open to the public.

Capitol Campus has special program for servicemen

Capitol Campus is one of 250 colleges and universities in the nation to be designated as a SOC — Servicemen's Opportunity College; it is also the only one of the Penn State system to be so designated.

Servicemen's Opportunity College is a network of institutions across the country and abroad which cater to the service person's needs. Since the service person travels, not only from state to state but from country to country, it has been difficult in the past to complete a bachelor's and/or a Master's degree. With the institution of SOC, an educational environment which understands and assists the mobile service person has been created. Now it is possible for a service person to obtain a

bachelor's and/or Master's degree without interruption in military obligations.

The participation of the Capitol Campus in the SOC program means that service people in and around the Harrisburg area, of whom there are many, can combine a college education with military service. Capitol Campus provides the opportunity for continuing education by having a generous transfer policy, by providing a special servicemen's counselor, by offering credit for educational experience obtained in the armed services, and by having a Veterans Center.
